CALIFORNIA STATE FAIR, 1905.

SACRAMENTO, SEPTEMBER 2d, 5th, 6th, 7th, 8th and 9th

Guaranteed Stakes for Harness Races. Entries Close July 10, 1905.

PROGRAMME.

Saturday, September 2d.

- 1—OCCIDENT STAKES, \$400 added.....Closed Jan. 1, 1903
 2—STALLION STAKES, Pacing Division.....Closed June 1, 1903
 3—2:09 CLASS PACE.....\$800
 4—2:15 CLASS TROT.....700

Tuesday, September 5th.

- 5—STALLION STAKES, Trotting Division.....Closed June 1, 1903
 6—2:13 CLASS PACE.....\$600
 7—2:12 CLASS TROT.....700

Wednesday, September 6th.

- 8—2:20 CLASS PACE.....\$600
 6—2:30 CLASS TROT.....600
 10—CLAIMING RACE FOR 2:25 CLASS PACERS.....500

Winner to be sold at auction at the conclusion of the race for \$300. If sold for more than \$300, one-half of the surplus to go to the second horse and one-half to the State Agricultural Society. Any horse in the race except the winner to be claimed for \$300 and the amount of second money.

N. B.—Races Nos. 3, 4, 6, 7, 8, 9, 10, 12, 13, 15, 16, 17, 18 and 19 Close MONDAY, JULY 10, 1905, and all Entries by Mail must bear Postmark not later than that Date.

SPECIAL CONDITIONS.

Entrance five per cent.
 Five per cent of the amount of the stakes closing July 10th (except the Stanford Occident Pace) will be deducted from money winners.
 All races, mile heats, three in five, except otherwise stated.
 Moneys to be divided 50, 25, 15 and 10 per cent, unless otherwise specified in conditions.
 All races to fill satisfactory to the Board of Directors or they may be declared off.
 Distance in all heats 80 yards, but if the field is more than eight, 100 yards. A horse not winning or making a dead heat in three, to be ruled out, but will retain his position in summary, except otherwise stated.
 If there are less than four starters the Society may, if they so decide, allow them to contest for the entrance moneys only paid in, to be divided 60, 30 and 10 per cent.
 Stakes are for the amount guaranteed—no more, no less.
 When only two start they may contest for the entrance money paid in, to be divided 66 2/3 per cent the first and 33 1/3 per cent to the second.
 A horse distancing the field will only be entitled to first and fourth moneys

B. F. RUSH, President.

NOTICE TO OWNERS AND TRAINERS.

SPECIAL—Owing to the demand for stabling the Society will only provide stalls for horses entered in races. Special stalls for horses shown for premiums. It is not intended to give any specials. If you want to start your horses or secure stalls, enter in advertised races.

Address all communications to the Secretary.

The Crowley Stake No. 2

A SIDE STAKE FOR STARTERS IN THE THREE-YEAR-OLD DIVISIONS

—OF THE—

Pacific Breeders Futurity Stakes No. 5

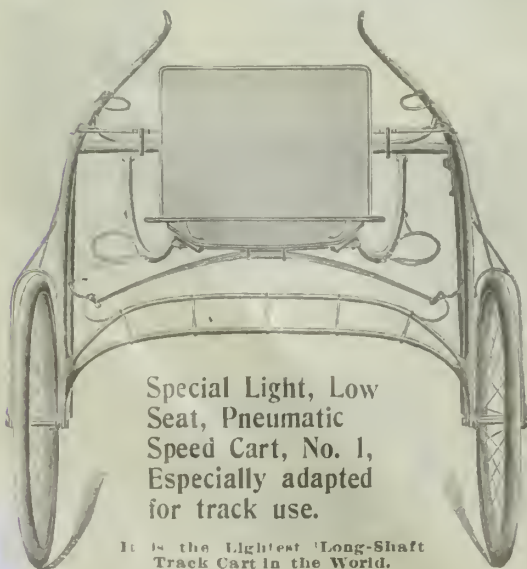

(FOALS OF 1905—TO TAKE PLACE IN 1908)

Entries to Close Tuesday, August 1, '05

CONDITIONS.

A Side Stake of \$25 each for Trotting and Pacing Foals of 1905 that were entered or substituted and will start in the Three-Year-Old Divisions of the Breeders Futurity in 1908. All money paid in on trotting foals to be divided among those starting in the trotting division, and all money paid in on pacers to be divided among those that start in the pacing division. Moneys divided 75 and 25 per cent and to go to the first and second horses in this side stake, according to their positions in the final summary of each race. In case all those in the side stake should be distanced in the first heat of either of the regular events, they shall start in another race best two heats in three, on the same day, to decide the money winners. Entrance to the side stake \$25 each. The money to be deposited in some reputable bank, to remain at interest until the stake is trotted.

Entries Close Tuesday, August 1st, with F. W. KELLEY, Secretary P. C. T. H. B. A. 36 Geary St., San Francisco.

It is the Lightest 'Long-Shaft' Track Cart in the World.

San Francisco, Saturday, July 8, 1905.

A BIG SUCCESS is the Los Angeles meeting. Racing has been first class since the opening day, the time has been fast, contests good and clean, and a large crowd has been in attendance every day. The Los Angeles Harness Horse Association deserves the thanks of every horseman in California for its effort. The energetic gentlemen who organized it, showed their faith in the popularity of the sport by offering a splendid program of \$1000 purses, and the horsemen responded by giving them a good entry list, and the best racing that Los Angeles has seen for years. The Los Angeles Association has shown what energy and enthusiasm can do. There are a dozen towns in California where successful meetings could be held every year, if only the people most interested in harness horse breeding and development had a little of the energy and push the Los Angeles horsemen have. They have the tracks and everything else that is necessary except the enterprise. Cannot some of the horsemen who are at Los Angeles this week discover the energy germs, capture a few, bring them north and inoculate the harness horse people and track owners here? They are nearly all afflicted now with the sleeping sickness, and we think the Los Angeles germ might effect a cure if it could be introduced into this section.

ENTRIES CLOSE MONDAY NEXT for the State Fair harness events and also for six additional purses for the Breeders meeting at Fresno. These are the only remaining meetings advertised for California this year except the Santa Rosa meeting for which entries are already closed, so if owners wish to race they must make entries at these two places. The new track at Sacramento is almost finished and will be ready to jog over within two or three weeks. A big force of carpenters and laborers is at work on the grounds and things will be in readiness for the first fair at the new grounds, which is already the talk of the State. The harness program is a most liberal one, providing generous purses and three races each day. Every owner, breeder and trainer who has any interest in the breeding or developing of harness horses should do everything in his power to aid the State Fair this year. Make entries if you can, and solicit your friends to make entries. Make the fair a success so far as your efforts go, and help to build up a State institution that under intelligent management will be one of great good to all. Entries close Monday next, July 10th.

Left Denver for Eastern Tracks.

Last Saturday the first consignment of harness horses that have been racing at Denver left for the East. The first carload contained the W. A. Clark Jr. string, including Bon Voyage, Miss Georgie, Morone, Sally Lunn and Will Clark. With this string were shipped Oregon Maid and Getaway of the J. A. Richardson string, Helen Norte and Belladi of the Brent stable, and Morosco 2:12 and Mack Mack 2:12½, who are in charge of Driver Henry Hellman.

These owners planned to stop off at Libertyville, Ill., to take advantage of the six days' race meeting there. They will then split up. Driver Rutherford of the Brent string and Hellman will probably take their charges direct to Detroit. The Clark horses will go through to Readville, Mass. They will start at Saugus, Me., and other New England meetings, avoiding the Detroit and Buffalo meetings, and will start on the Grand Circuit at the Hartford meeting.

The Clark string is not exactly in the best condition just at present. Mr. Clark has had any number of offers from horsemen who would like the privilege of using Will Clark, his green trotter for a year, but has received no offers that look good to him. If some

reasonable offer is made, it is more than probable that this son of Strathway will remain in the West. The trotter has shown great speed this season, but seems scarcely over his indisposition of last season.

Miss Georgie went wrong in the only race she started here; Bon Voyage has not been right since he astonished horsemen by stepping a last quarter in :30, and Sally Lunn is now indisposed.

The match race between Getaway and Della McCarthy did not come off, the owners of the mare paying forfeit. Della McCarthy is a good mare and probably worth the money paid for her, but the Denver trainers do not think she is a 2:10 prospect by a good deal.

Hallina Morgan, the three-year-old filly, stepped a quarter in 29 seconds in a workout the last day of the meeting. She is barely three years old being a June foal. She is owned by Joseph Barrett of Albuquerque, and has won nearly \$2000 this year, most of her starts being against aged horses. Her present record is 2:21, made at Las Vegas, but she was a close second in 2:13½ at Denver this week.

Fast Mile by Tom Axworthy.

The other day at Cleveland, Tom Axworthy, the gelding that took a four-year-old trotting record of 2:08½ last year in October, was down on the matinee program for an effort to beat 2:13½ to wagon. In the absence of his owner, F. G. Jones of Memphis, H. K. Devereux drove him. Of course everybody looked for a winning mile, but no one anticipated the extreme speed he displayed. Tom Axworthy is a giant, and built on the lines of a greyhound. He hasn't the slashing, determined gait of most great horses—a gait that is impressive of extreme speed—but he glides so smoothly, so tigerishly stealthy, and so seemingly without barely touching the ground, that he deceives one as to his speed. He did not look to be going fast, but when he finished the mile the watches showed 2:09, with the last half in 1:03½, and the last quarter in 31½ seconds. When Mr. Devereux finished the performance he said: "My, but that is a fast horse. He did not look to be going fast, and the fact is that he was only jogging apparently through the stretch. I never urged him." With the exception of Lou Dillon no trotter ever negotiated a mile in time as fast at this season of the year. What Tom Axworthy will do later on no one will venture a prediction. Mr. Jones will start him frequently at the matinees, and when the inter-city meeting takes place Tom Axworthy will be a starter for the gold cup.

Racing at Concord, July 4th.

Three good races were pulled off over the new track at Concord on Independence day with an attendance of 600 interested spectators. The weather was hot the mercury climbing to 100 degrees. E. J. Randall officiated as presiding judge and starter, while Messrs. Williams and Mitchell held the watches. The results:

First race, 3 in 5, purse \$100.
Edna De Beck by Hamb. Wilkes..... (Palmer) 3 2 1 1 1
Pilot by Abbott-Jord, Jr..... (Flemming) 1 1 2 4 2
Goldie by Orator..... (Clark) 2 3 3 2 3
Fly Away by Comet Wilkes..... (Durham) 4 4 4 3 4
Time—2:22, 2:23, 2:24½, 2:25, 2:27.

Second race, 2 in 3, purse \$75.
Diabness by Diablo..... (Day) 2 1 1
Jackie F. by Sidmoor..... (Palmer) 1 2 2
Dick McGinty by Sidmoor..... (Perry) 3 3 3
Time—2:28, 2:24¼, 2:31.

Third race, 3 in 5, purse \$35.
All Welcome by Welcome..... (Perry) 1 2 2 1 1
Dewey by Strathmore..... (Palmer) 2 1 1 3 2
Rae C. by Rey Direct..... (Clark) 3 3 3 2 3
Keno Wilkes by Comet Wilkes..... (Holliday) 4 4 4
Time—2:34½, 2:35, 2:36, 2:37½, 2:35.

Officers Chosen.

LOS ANGELES, July 5.—At a meeting of the stockholders of the Los Angeles Jockey club to-day the following directors were chosen: Epes Randolph, J. J. Fay, J. M. Hale, W. R. Dunn, George Rose, Thomas Fitzgerald and J. W. Brooks. The officers chosen for the ensuing year are as follows: Epes Randolph, president; J. J. Fay, vice-president; J. W. Brooks, manager. It was decided to open the winter race meeting on Thanksgiving Day. J. W. Brooks, who leaves for the East August 1, states that the outlook for the coming season is the most promising of any yet held by the Aseot organization.

S. Christlanson of this city has returned from his trip to Denver, where he spent a week attending the Overland Park meeting. He says he saw some fine racing, but the high altitude makes horses inconsistent, as they will go a fast race one day and be all out in slower time at their next start. Mr. Christlanson speaks in the highest terms of the Gentlemen's Driving Club, of which he was a guest while there. It has 240 members, fine club rooms, and is very prosperous. Its matinee racing is held on a track in the park, and no races are trotted or paced for money. Mr. C. brought back samples of this club's year books, stationery, etc., to show the members of the new driving club which is being organized here in San Francisco.

Frank Herdic Still in the Game.

[American Sportsman.]

No man is better known to the horsemen of the country than the pool seller, Frank Herdic. Mr. Herdic was quite ill this winter, and not long ago a Pennsylvania horseman brought the news to this office that he had suffered a relapse and would hardly recover. The following letter from Mr. Herdic explains itself:

WILLIAMSPORT, PA., June 22, 1905.

American Sportsman:—As I see in your paper I had had a relapse and was very low, I drop you this line to let you see I am very much alive and will start in next month at Pittsburg and go along with the boys. Have had quite a race and am lucky to get a heat, but second money will do where you don't want a record. Looks as though we might have some races at that, and Cleveland's coming back in the ranks again looks like old time sport. I expect to see good racing where they trot horses and pace them, and not try to make running horses out of the trotter and pacer. The more they fuss with the old style of racing, the more they cut off the revenue, and the tracks need all the commissions they can get to pay out, and I know it. But there are those who have an idea and are always advancing opinions when it don't cost them a cent—agritators and kliekers, saying people want short races and quick action for their money. I never saw any time in my life where a man could win \$25 or \$50 or more that he was not willing to stay until dark. They tried the dash system at Empire City and Brighton Beach last year, and we worked as hard as two men could—that's Uncle Bill Riley and self—and could simply not do 25 per cent of what we should have done. The public will not put their money on dashes, for if they get in wrong they have no chance to get out, and what they can do to books is good and plenty. It opens a hole, and there you are. I could say a whole lot, but guess I will let them use their own judgment.

Truly yours, FRANK L. HERDIC.

Gaiting a Saddle Horse.

An expert in gaiting horses gives the following hints:

Always select the gait you wish to go and make the horse take it; don't allow the horse to decide. Always go into the other gaits from the flat foot walk. Never let your horse rush away when first mounted, but instead start in a walk. Do not keep him constantly at one gait, but change quite often, otherwise he will soon become adapted to the one gait in which you ride, and practically lose the other gaits.

For a trot slacken the reins a trifle, and steadily take hold of the mane or touch the neck with the right hand, and at the same time rise slightly in the saddle, urging on the horse gently. If he makes a mistake, and mixes, pull him back to a walk at once, and repeat the maneuver. For the canter, slacken the reins, incline your body forward, raise your right hand as if to salute, and cluck to the horse. When he starts, take sufficient hold of the reins to pull in his nose and make him arch his neck.

Many highly trained horses will go into a canter at the mere inclination of the body. For a rack, or single foot, tighten the reins and give the bit a number of almost imperceptible jerks, at the same time urge him on with voice or whip, as he requires. If you feel him falter, or as if he was going to change into another gait, slightly shake the bit and urge him on. It is well to remember that this last gait is the hardest of all on the horse; for this reason he should not ordinarily be asked to go at this gait for more than a mile without change.

New Track at Los Alamos.

Messrs. J. Doherty and E. P. Holloway are just completing the grading of a new five furlong track at Los Alamos, Santa Barbara county. It is located just a half mile southeast of the town and is pronounced by all the horsemen who have seen it an excellent track. The proprietors propose to get up some colt stakes to be trotted and paced in the future, and will give meetings with such purses as they can afford. There is much interest in horse breeding and training in that locality, and the new track will be popular with the public.

Horses Growing More Valuable.

Horses are growing more valuable every day. The world's supply is less than in any year for a decade. The theory that automobiles, street cars, traction engines, etc., would in time supersede the horse has not been verified. Good horses are higher today than ever. This should put breeders and horse owners in general on their guard to protect their brood mares and colts against all forms of contagious and debilitating diseases, such as distemper, influenza, pink eye, shipping fever, etc. Preventive measures should be adopted in all cases. Craft's Liquid Distemper Cure will cure every case started and will prevent others, no matter how exposed, from attack. It acts on the blood and glands and expels the germs that cause the disease. It is simple and easy to give; absolutely harmless to anything but the germs of disease. It is sold by all druggists and turf goods houses, or the manufacturers, Wells Medicine Co., 13 Third street, Lafayette Indiana.

Good Prospects for Fresno Meeting.

The horsemen of Fresno and vicinity are doing a lot of hustling for the meeting there July 19-22 and from the present outlook it will be one of the best weeks of racing on the Coast this year. The following from the Fresno *Republican* tells the story of what is going on at the Raisin City track:

A great deal of interest is being taken in the Fresno meeting to be held July 19-22 and prospects are first class for a week of good sport. A week will intervene between the Los Angeles meeting and the Fresno race goes will have a chance to see the campaigners in their work, as most of them will be shipped here about next Sunday.

Any lover of harness horses can spend several interesting hours any morning at the Fresno Fair Grounds track watching the different trainers getting their trotters and pacers ready for the races. The Fresno track has long had the reputation of being one of the fastest tracks in the country, and although interest in the local horse business has not been as lively in the past few years as it might have been, the track is as good as it ever was and Fresno may yet regain the name of being one of the best race horse centers on the Coast.

There are now about fifty head of horses in training here and of these the best work this season has been shown by the dun mare Thedonna by Athadon 2:27, owned by J. M. McKay, of Fresno, and in the string of Schuyler Walton. This mare was purchased as a two-year-old for less than \$100 from Colonel Hay, and has been trained but very little until this year, yet she has shown such a remarkable turn of speed that Monroe Salisbury offered \$5000 for her. Thedonna has never started in a race, but recently paced a mile in 2:10½, with the last half in 1:02½, and good judges say she will surely go in 2:04.

Another one in Mr. Walton's stable that will race here is Geo. L. Warlow's great three-year-old stallion Athasham that earned a two-year-old trotting record last season of 2:20. He is a good-looking, nice-made colt by Athadon 2:27, dam Flora Wickersham by Jun'o, and if nothing goes wrong with him, should develop into one of the best three-year-olds of the year. Last week Athasham trotted a work-out mile in 2:18½ pretty handily and it looks as if a mile in 2:15 would be easy for him.

Others in Mr. Walton's stable that look promising are Mr. Warlow's two-year-old colt Stanford McKinney by McKinney, dam Avena by Palo Alto 2:08½, Clara, a three-year-old St. Clair colt, owned by Louis Bachant of Fresno that has raced a mile in 2:22½, with a half in 1:08½; Mabel C. 2:20½ by Strathway, owned by Joe Corey of Hanford; the pacing mare Babe, owned by Harry Bernstein of Hanford and Teddy J. and Bobby J. both owned by R. B. Parker, which have shown ability to step in 2:25.

One of the nicest gaited trotting mares at the track is a bay daughter of Athadon, owned by a local enthusiast and in the stable of Charley Clark. This mare has had but very little training and has not beaten 2:20 in her work, but is a very promising mare and will be heard from later. Mr. Clark has quite a number of good green trotters in his charge, but will not have anything to race until next season.

The best race prospect in the string of Charley Middleton is the seven-year-old bay mare by Junio, out of Susie Hall by El Capitan. She has been trained but little and has never been asked to step a fast mile, but has shown a remarkable turn of speed for a trotter and is a most promising prospect. Mr. Middleton is also training Louis Bachant's pacer George 2:18½, that will start in the Fresno Driving Club race, and a lot of green prospects, mostly two and three-year-olds. Among the latter is a handsome three-year-old by Athadon, dam Daybreak, owned by L. Stock of Fresno.

Joe Depoister is training a number of good green ones, among the best of which are the three-year-old colt Guy by Guy McKinney, dam by Dexter Prince and Milton Gear, a pacer by Harry Gear, dam Lulu N. by Dawn.

Denver Meeting.

Two harness events with good fields were on the racing program at Overland Park Friday afternoon. Martha B., owned by J. Fred Roberts, and driven by Harry Bush, won the 2:11 pace in straight heats. The fastest time was 2:09½, made in the first heat.

Dewey, the winner of the Yellowstone trotting stake, took the 2:30 trot in straight heats, the fastest time being 2:15½, in the second heat.

In the first heat of the pace the field got away to the eighth in :15½. The quarter was reached in :31½. When the half was passed in 1:03½ the enthusiasm in the stands grew marked. Martha B. gave evidence of her speed qualities, and the three-quarters was reached in 1:36 flat. They raced home, covering the mile in 2:09½.

The second heat was materially slower. The sixteenth was passed in :16, the quarter in :33, the half in 1:06, and the three-quarters in 1:40. The time for the mile was 2:12½. The summaries:

Pacing, 2:11 class, purse \$500.	
Martha B., b m by Ashland Wilkes..... (Bush)	1 1
Jess C., s g by Catata..... (Frank)	4 2
Young Hal, b h by Hal Dillard..... (Frost)	2 5
Klown, b g by Garnet Wilkes..... (Gonzales)	3 4
Amble W., b m, by Alta Boy..... (Cassidy)	5 3
Time—2:09½, 2:12½.	

Trotting, 2:30 class, purse \$500.	
Dewey, s g by Superior..... (Smith-Loomis)	1 1
Woody R., b g by Woody C..... (Johnson)	2 2
J. J. M., Jr., b h by Robin..... (McGuire)	4 3
Iosa, b m by Phillonides..... (Steller)	3 4
Time—2:16½, 2:15½.	

But one harness race was on the program for Saturday, the 2:20 class pace, and this proved a very tame affair as there were but two starters, Geo. Easterbrook's mare Florodora greatly outclassing her opponent, the bay horse Foxy Quiller, own brother to the champion trotting stallion Cresceus, although Foxy Quiller might have made her go faster had he tried. Loomis evidently thought that Ed Geers' remark was a wise one when he said that many a good horse is ruined trying to heat one that is known to be much faster, and he acted accordingly. The summary:

Pacing, 2:20 class, \$1000.	
Florodora, b m by Dadrien..... (Maguire)	1 1 1
Foxy Quiller, b m by Robert McGregor..... (Loomis)	2 2 2
Time—2:14½, 2:21½, 2:16½.	

On Monday, Golden Gate, "Smokestack" Brown's Bay Bird pacer, took a record of 2:13½ in the first heat of the 2:30 pace, and was second in the remaining heats, thereby getting second money. Harold D., the favorite, won the second heat in 2:12½, but was distanced in the next heat, and the race went to Lady M. Summary:

Pacing, 2:20 class, purse \$500.	
Lady M., b m by Pomona..... (Cummings)	4 3 1 1
Golden Gate, b g by Bay Bird..... (Brown)	1 2 2 2
Harold D., ch g by Dexter Prince..... (Dunlap)	3 1 dis
Hallina Morgan, b m by Duplex Hall..... (Frost)	2 3 dis
Pueblo Girl, blk m by Harris..... (Loomis)	5 4 dis
Time—2:13½, 2:12½, 2:13½, 2:15½.	

A holiday crowd packed the grand stand July 4th, the last day of the harness racing, so far as the regular program is concerned. The results of the two harness events are as follows:

Pacing, 2:13 class, purse \$1000.	
Florodora, b m by Dadrien..... (McGuire)	3 3 1 1 1
Rey Del Diablo, ch g by Diablo..... (Chaboya)	1 1 2 4 2
Jess C. and Dr. Almont also started.	
Time—2:12½, 2:14½, 2:14½, 2:16½, 2:17.	
Trotting, 2:35 class, purse \$500.	
Redemption, ch g by Superior..... (Hooper)	1 1
Rosalind, b m by Stam B..... (Newman)	2 2
The Jester, Nettle Vangrundy and King Bezzant also started.	
Time—2:17½, 2:22.	

San Francisco Driving Club.

The races of the San Francisco Driving Club at Ingleside track drew a crowd of about 2000 people on July 4th. Four harness and two running events made up the card. Two books handled the coin and did a thriving trade. The purses raced for amounted to about \$150 in each case. For each harness event the books hung up \$100 to which was added the entrance fee of \$10 for each horse. The results were as follows:

First race.	
Lady Diana.....	1 1
Little Jim.....	2 3
General Hughes.....	3 2
Grille, Nora Hagerty, White Cloud and Peggie also started.	
Best time 2:34½.	
Second race.	
Vic Schiller.....	5 5 1 1
King V.....	2 1 2 2
Kitty D.....	1 4 4 3
Lady Jeffries, Welladay and Harry Hurst also started. Best time 2:20 in first heat.	
Third race.	
Bill Ellsworth.....	2 1 1
Dynamite.....	1 5 2
Grace McKinney.....	4 3 2
Toughy A., Tehama Boy and Mixer also started. Best time 2:25½.	
Sixth race.	
Dan Alden.....	2 1 1
Fred Chase.....	1 3 7
Senator Hearst.....	3 2 2
Don L., Mott D., Ed Rea, and Billy K. also started. Best time 2:38½.	

State Fair Notes.

The last outstanding liability, consisting of purses due horsemen and other minor obligations, will be paid within the next fortnight. The total indebtedness amounts to less than \$25,000, and the appropriation which became available July 1st, is more than sufficient to settle what is due.

Over one hundred men and seventy-five teams are now engaged in grading for the new track and in laying foundations for the buildings.

The grading on the track was finished last evening, and the track is now ready for the top coat.

Architect M. A. Allen, who has superintended construction of Harlem, Hawthorne, Emeryville, Tanforan and Ascot Parks, says that conditions are most favorable for securing a fast track at the new park. The soil, he says, is of springy character, a mixture of clay and loam that is always a guarantee of speed upon a well-constructed track.

The cross-grades on the turns are so constructed that a horse rounding them at a two-minute gait maintains his exact equilibrium.

The premium list for the livestock and poultry exhibits will go to the printer in a few days. It will offer about \$20,000 in prizes.

It has been decided to give three running races each day, the smallest purse to be \$200 and the average to be considerably more.

For the Stanford, Occident and Stallion Stakes, in the harness events, the payments have been as numerous as during any past year, and the directors have advertised liberal money in all harness races, intending to give this department special encouragement. Entries will close July 10th.

At the meeting of the directors to be held on July 8th bids will be opened and contracts let for the construction of buildings for sheep, swine and exhibition horses. It is expected that this work will cost about \$20,000.—*Sac. Union*.

Charley Herr 2:07.

Charley Herr was as true, as honest, as game, as reliable and as mismanaged a trotter as ever lived. No horse of recent years has ever occupied the same place in public esteem as this remarkable stallion, and had fortune been kind enough to have taken from his path the many obstacles that where strewn in his way it is more than probable that his list of victories would have been doubled. Charley Herr was one of the very few absolutely reliable trotters this country has ever seen; he never trotted a bad race when he was fit; he never left his feet except when an accident befell him; he tried every inch of the journey, and was probably driven for more heats than any trotter that ever lived whose campaign was no longer than his. His very honesty commanded the respect and admiration of every lover of gameness in an animal, and the honest little Irishman who owns him and who should have reaped a rich reward through the ownership of so remarkable a horse, was himself in this respect an example for all horsemen. Nearly all of Charley Herr's races were hard battles, and in each he covered himself with glory, for in victory or defeat he struggled gamely for supremacy, and could always be depended upon to stick to a trot. He has probably been driven from "end to end" more frequently than any other horse in turf history, and has gamely stood enough gruelling and severe punishment to have put an end to any other horse. Possibly the most sensational race in his career was the one in which he was overcome by Cresceus at Readville, and in this game struggle he lost only by the narrowest of margins. It will be remembered that in the first two heats he was returned a winner and lost the third by an eyelash, so close in fact was the finish that none but the judges could tell which of the two stallions had the best of it at the wire.—*Hawley in Ky. Stock Farm*.

The Cart Horse Parade in London.

The London Cart Horse Parade recently held in the British metropolis is reported to have been one grand success from end to end. Never, according to the advices we have received, have the exhibits been of such high class nor yet in such superlative condition. It was well shown that the man who first conceived the idea of the parade builded better than he knew. The last was the twentieth parade that has been held and about 1000 horses and nearly as many drivers were in line. Only two of the men who founded the parade were present on this last occasion and these were Sir Walter Gilbey and Mr. Burdett Coutts, both of whom have labored early and late, in season and out, for the improvement of the British horse and the amelioration of his condition. It is said that they had a most handsome reward. Support has for years been lent to the parade by both the Shire and Suffolk pedigree record associations, the Scottish Clydesdale society not yet having taken the same step directly. Enthusiastic indeed are some of the accounts so far received concerning the very marked improvement in the feet and legs of the draft horses now to be seen on the London streets compared to what they were twenty years ago. Not only that but year after year the same old faces are to be seen behind the same horses, proving that the encouragement of the London Cart Horse Parade is redounding not alone to the amelioration of the horses but to the benefit of their owners as well. The entry this year consisted of 75 single-horse two-wheeled vehicles, 714 single-horse four-wheeled vehicles, 72 pairs and 36 unicorns.

Caustic Balsam Does More Than We Claim.

VALADOSTA, Tex., Dec. 4, 1904
The Lawrence-Williams Co., Cleveland, O.
I am a local veterinary. Treat all kinds of domestic animals for various diseases, and I have learned by experience and practice that Gombault's Caustic Balsam is the best medicine for what it is recommended I ever used. It will do more than you claim it will.
J. A. DAVIS.

Notes and News.

Hully Gee! But they're stepping at Los Angeles.

Six new 2:10 performers on the opening day of the meeting.

And Zolock, son of McKinney reduces his record from 2:09½ to 2:06.

The word success is being written all over the account of the first meeting held by the Los Angeles Harness Horse Association.

Grace Kaiser, dam of Coney 2:02, etc., will be bred to Ben Liebes 2:17½, the big son of McKinney owned by H. L. Frank.

John R. Conway 2:13, winner of the 2:17 pace at Los Angeles, is another new member of Diablo's rapidly growing and extensive list of 2:15 pacers.

Ed Malloy has let Lou Dillon step a mile in 2:15 since reaching Cleveland, and Mr. Billings expects to begin giving her some faster miles from now on.

State Fair entries close on Monday next, July 10th. As the fast records made at Los Angeles will be a bar at Sacramento, there should be a big entry list.

Don't forget that six additional purses for the Breeders meeting at Fresno will close Monday next. Look over the advertisement in our business columns.

Nutwood Wilkes gets a new 2:10 performer in Tidal Wave 2:09. There are two or three more of his get that should get into the extreme speed list this year.

Bob Mason is now the sire of three 2:10 performers, the mare Virginia winner of the second heat of the 2:27 class pace at Los Angeles last Monday being by that horse.

W. L. Cadman, of Walla Walla, Wash., has purchased from E. E. Gray, Hinsdale, Ill., the pacer Edgar Boy 2:08½, by Edgar Wilkes, dam Clara, by Gambodo. Price \$2500.

It is said that no meeting will be given at Woodland. This is too bad as Woodland has one of the finest tracks in the State and large crowds always attend the meetings held there.

With Dr. W. 2:08½, Vision 2:09½ and Tidal Wave 2:09 out of the 2:13 class pace, the \$600 purse for that class to close Monday next for the Breeders Fresno meeting should get a big list of entries.

One of the secrets of a successful trainer is a sufficient knowledge of the art of farriery to enable him to have the blacksmith properly shoe and balance his horses. Faulty action may often be remedied by proper shoeing.

Mr. E. C. Peart, of Colusa, who is advertising an auction sale of horses in the BREEDER AND SPORTSMAN writes: "Your paper is doing me good. This mail brings me letters from Fresno, Merced, Sacramento and Oakland."

The McKinneys are starting out this year winning races and reducing records. There is no family that trains on any better than the one established by the greatest son of Alcyone. They get the money and the records, and improve with age.

Is this "tainted money?" The owner of Florence Nightingale 2:15½ regularly donates a part of the winnings of the mare to the Presbyterian Home Mission. On this account the mare is known throughout Ohio as the "Home Missionary mare."

William Cecil reached Cleveland safely with the McKinney mare Lady Mowry 2:28 and a three-year-old sister to her that he is training. Lady Mowry worked a half in 1:05½ at San Jose before she was shipped East and is a likely 2:10 performer.

Helen Keyes, the daughter of Sidney Dillon, will not start in the M. & M. according to an Eastern report. She may not be raced at all this year, Mr. De Ryder considering her too valuable a mare to take any chances with until she is just ready.

Golden Gate, William Brown's pacer by Bay Bird, won the first heat and a record of 2:13½ at Denver on Monday. This gelding has been a very consistent performer at the Denver meeting and has been a good money winner although he has not won a race.

The Helm Stake, which is a free-for-all pace, will be one of the exciting races at Fresno. Zolock 2:06, Edwin S. 2:08, Tom Carneal 2:08½, Kelly Briggs 2:09½ and Daedallon 2:10 are the entries and the probability is that every one will start. Look out for a split-heat race with a mile in 2:05, and all below 2:10.

Dr. De Foe, of San Jose, has two colts that are as well bred as the best bred ones we hear so much about. One is a three-year old by Mendocino 2:19½, dam Rose McKinney the dam of Almaden 2:22½. The other is a yearling by Nutwood Wilkes 2:16½, dam Carrie Malone, own sister to Charles Derby 2:20. Those two colts would do to head a stock farm, breeding mares by one to the other.

If the owner of the pacing horse Bob, formerly owned by Robert Burrell and driven by William Brown desires to sell the horse, he can probably find a buyer if he will address Holmes & Scott, Fair Grounds, Oregon, stating price and present condition, and whether he has had any track work this season.

On the first day of the Los Angeles meeting, Walter Mahen drove the mare Mamie Elizabeth by Red Regent, dam by Chimes, a mile against time to give her a record. She trotted the mile in 2:21½. The next day she was started in the 2:17 class trot and got second money. She was second to The Commonwealth in the first heat of this race in 2:15½.

It is announced in the press dispatches from the West that Japan intends to send several representatives to study closely the horses shown at the Lewis and Clark Exposition in Portland this fall. It is also stated that China will be officially represented in this regard. Much hope is held out that the Island Empire may make large purchases of breeding animals.

Nora McKinney 2:12½, regarded by many horsemen as the finest road mare ever seen in New York, is said to have gone lame in her work a few days ago. She trotted faster than 2:10 in a race at the Empire track last season and won many brushes on the Speedway. William Simpson, who owns her, had counted on a record of 2:06 for the daughter of McKinney this season.

On the opening day of the Denver meeting in the third heat of the 2:30 pace, the pacing mare, Lady M., driven by Walter Cummings was distanced. This caused Cummings to lose his temper, and when Henry Dunlap accidentally got in his way as the horses were all being pulled up, Cummings struck him across the face with his whip. The judges fined Cummings \$50.

Mr. L. M. Ladd, of Hollister, has shipped his Palo Alto bred four-year old stallion Monbello to S. E. Kent at Los Angeles for training. Monbello is by Monbells, son of Electioneer and Beautiful Bells, and is out of the great broodmare Laura C. by Electioneer, second dam the thoroughbred mare Fannie Lewis by imported Buckden. Monbello shows a great turn of speed, and is a most promising trotter.

Fred H. Chase & Co. will hold a sale of fifty head of road and carriage horses at 1732 Market street on Monday, July 24th. The larger part of this consignment is from the Occidental Land and Improvement Company (Sharon Estate), Fresno, and contains many handsome horses by Jim Monroe, Teheran and other good sires. The others are consigned by Mr. C. E. Needham, of Bellota, and are a very fine lot.

Barondale 2:11½, the Iowa stallion that stood at San Jose in 1903 and 1904, had seven new performers last year, and the way his get are stepping this year over the Iowa tracks, makes it look as if as many more new ones would be added to his list this year. Many California breeders that own yearlings and sucklings by Mr. James' horse, hope he will bring him back here, as they would like to have more of the same kind.

At the recent New York Driving Club matinee the team race between L. A. Burke's West Wilkes and El Moro and W. M. C. Floyd-Jones' King Chimes and Gov. Holt, was the best race of its kind ever seen on the Yonkers track. El Moro has a record of 2:13½. He is by Longworth and was bred by the late A. C. Deitz, at Ventura, Cal. El Moro was owned for a time by Mr. Graham Babcock, who used him as a pole horse with Toggles 2:08½.

The 2:09 class pace at Santa Rosa should prove a hot one. The entries are Zolock, Kelly Briggs, Alone, Daedallon, Queen B., El Diablo, Tom Carneal, Rajah, Billy Red, Miss Idaho and Reta H. On his Los Angeles showing Zolock should win, but if he is not on edge there are three or four horses entered that can contest the heats with him from end to end. It is good betting that the track record of 2:06 made there by Clipper in 1900, will be broken.

The two fastest heats ever paced in California are to the record of "the little red horse," John R. Gentry. In 1899, Gentry, Joe Patchen and Anaconda were engaged to give two special performances at the Los Angeles meeting. One was on the opening day of the meeting, October 21st, the other on the closing day, October 28th. John R. Gentry won both events in straight heats, and record time for a California track. The heats on the opening day were in 2:05 and 2:04, and on the second day 2:04½ and 2:03½.

The program of the Spokane Inter-State Fair has been issued. It provides for six days racing, the nice sum of \$11,000 being offered. The 2:14 pace and 2:16 trot, and the Spokane Derby and the Inter-State Relay race are \$1000 each. There are several \$500 purses for harness horses, and purses range from \$150 to \$500 for the over night running events. The fair will be held during the week beginning October 9th. Entries close August 15th. Robt. H. Cosgrove is Secretary and Manager.

The racing at Los Angeles is as good as they have anywhere and it is on the old three in five system, with auction pools and mutuels as the only means of betting and big crowds are in attendance every day. Some of the turf writers who are always crying for new methods probably imagine that the meeting could be improved if there were a dozen or so bookmakers doing business and the races were on the two in three or the dash system, but the people who breed, train and own trotters and pacers don't think so.

There is more profit or at least less loss to men who breed horses to sell a five-year-old for \$225 than to keep the same horse until he is ten years old and sell him for \$700. It is poor economy to hold for high prices until they eat their heads off several times.

On the opening day of the Lima, Ohio, meeting, June 27th, the Diablo gelding Pacific King by Diablo, trained by Vance Nuckols, won the 2:30 pace after dropping two heats. In the fourth heat Pacific King stepped the mile in 2:15½ and could have gone faster. The same day Bogan by Bow Belis won the 2:35 trot getting a record of 2:19½ and Jack Wilkes by Guy Wilkes won the 2:18 trot, reducing his record to 2:20½.

The Tom Hal family of pacers has flourished in the Blue Grass region of Kentucky since 1859, when the founder of the family was foaled. The offshoots of this family have found their way into many States of the Union, and the cross of the family occurs in a great many trotting and pacing pedigrees. It is said that the original was a roan horse called a Canadian pacer, and that he was taken to Lexington from Philadelphia. He died the property of Benjamin N. Shropshire, Harrison, Ky. He was supposed to be the grandsire of Tom Hal.

Mr. A. B. Rodman, of Woodland, has received many congratulations over the winning of the 2:45 trot at San Jose by his big gelding Patrose, whose record of 2:12½ made in third heat makes him the first new 2:15 trotter for the year on this Coast. Mr. Rodman not only bred Patty Washington, the dam of Patrose, but he also bred his grandam Patty P. by Richmond. Patrose started four times last year, but failed to win a heat, but was not in condition at any time. This year he is all right, and never lifted his nose once during the race which he won at Los Angeles. He should trot in 2:10 before the season is over.

Australia is fast becoming a market for the American trotter. Charles W. Wright of Owensboro, Ky., left New York on June 13 on the British steamer Breiz Huel with four high bred ones for a trip of 16,000 miles of ocean travel for Melbourne, Australia. The four animals are Countess Todd three-year-old filly by Todd 2:14½, Blondie Grattan four-year-old filly by Grattan 2:13, Edna Patch five-year-old mare by Dan Patch 1:56, and Beatrice Master six-year-old mare by Quartermaster 2:21½. Mr. Wright is a competent tutor, as he has driven to record the following: Baby Ruth 2:06½, Parker S. 2:06½, Will Kerr 2:07½, Lord Clinton 2:08½ and Henry F. 2:09½. He will instruct the far Southerners how to train and race the American trotter.

That story sent out from Tulare a few weeks ago about Geo. W. Kirkham of that city selling a glass eyed pacer for \$13,000 to Geo. A. Pounder of Los Angeles, was a pretty hot one, and while it was at least \$10,000 to high, the pacer is a wonder and demonstrated it last Wednesday at Los Angeles when he won the two year-old event in straight heats, pacing the first mile in 2:15½, doubtless the fastest mile ever paced by a two-year-old in July. Rockaway is the name under which he started in his first race, but he was called Little Jim by his breeder, and is best known by that name in Tulare county. He has two "glass" eyes, a bald face and three white legs and is not much for beauty. He is a pony in size, but when he starts pacing has two minute speed. It is believed that with special preparation he could pace a half in one minute before he gets out of his two-year-old form. He was entered in both the two-year-old and three-year-old pacing events at Los Angeles.

J. M. Johnson of Calais, Me., has bought Ponkapoag the breeding farm of the late J. M. Forbes. There are one hundred and sixty acres in the farm and the price was \$60,000. There are five dwelling houses including a fine mansion house, stabling of the best construction for one hundred and fifty horses, and a three-quarter mile track. It lays at the foot of Blue Hill on its western side and is about two miles from the Readville track. Mr. Johnson owns a large farm within the city limits of Calais, Me., which is provided with well built large barns and a half mile track. He also owns a farm in Andover, Mass., situated near the famous Hood farm. He owned the great race and broodmare Nancy Hanks, the stallion Lord Roberts, by Arion 2:07½, dam Nancy Hanks, and is reputed to have an interest in Todd now standing in Kentucky. He has a stable of fifteen horses in training at Readville, another at Calais, Me., in charge of Jesse Humphreville, and quite a lot of horses on his Andover farm. The catalogue which he issued last spring of his Calais farm stock contained the names of fifty fine horses, all highly bred.

Senator Stanford used to think that when he got a colt that could trot, sired by a trotting stallion and out of a thoroughbred mare, that he had a stock horse. The bay colt Electro, foaled April 22, 1903, is one of this sort. He is by Sutter 29069, record 2:18½, and his dam is the grandly bred thoroughbred mare Buchu by Buchanan, winner of the Kentucky Derby. Buchu's pedigree can be traced through a dozen generations in the American Stud Book, where she is registered. Electro is owned by Mr. E. C. Peart of Colusa, who bred him, and will be sold with the others catalogued for the sale at Colusa August 9th. In Electro there is high class producing blood combined with high class race winning thoroughbred blood, some of the best Kentucky ever produced, and as Mr. Peart says he ought to get a world beater. He stands 15 hands high and weighs 1025, is as pretty as a picture and likes to trot. Has been jogged only but can show better than a 2:40 gait. Will make a valuable stud as well as a race horse. Is entered in the Stanford and Occident Stakes for 1906. Mr. Peart says, "This is my ideal colt and the man that gets him will get something good." Send for a catalogue of the August sale. Address E. C. Peart, Colusa.

CIRCUIT OPENS AT LOS ANGELES.

Racing is Best Ever Held in the Southern City and Attendance is Large.

LOS ANGELES, July 3.—With flags flying everywhere and the band playing "Home Ain't Nothin' Like This" the initial meeting of the new Los Angeles Driving Club and incidentally the first of the year on the Coast, opened at Agricultural Park this afternoon. The weather was a trifle hot for comfort but a big crowd was on hand just the same and was treated to a great afternoon of sport as the horses raced all afternoon and only one of the three races was completed when darkness came. The meeting looks like a winner right from the jump and already many old timers have begun to call it "the best meeting ever held on the Coast." The track was in good condition as the time will indicate, the racing was keen throughout and there was a general run of enthusiasm during the entire afternoon. The auction pools and the pari mutuels were well patronized and the betting promises to be lively during the meeting. The judges are Capt. J. C. Newton, Dr. Wm. Dodge and C. A. Canfield; the timers are Dr. Ralph Hagan, J. A. Fairchild and C. O. Canfield while Chas. Saddler is doing the starting. These gentlemen seem to have the situation well in hand and no attempts were noticed to "juggle with the cards."

The first race was the Willard Stimpson Stake for 2:13 pacers which brought out a field of seven side-wheelers, with I. C. Mosher's chestnut horse Tidal Wave an equal choice over the field. They were sent away for the first heat with Doctor W. at the pole and as soon as the word was given Leggett took him out in front at a merry clip and beat the favorite from wire to wire in 2:08½. Old Tidal Wave with all his rigging was out for business, however, and after trailing Dr. W. to the head of the stretch he set his sails and nosed out the black gelding in 2:09. All this time Fred Ward had been riding in the ruck pretty easily with the brown gelding Vision and he won the next two heats in such handy fashion that he looked to have the race at his mercy but Doctor W. came back in great shape this trip and barely nosed him out after a mile in 2:11. Then the race was postponed on account of darkness.

Seven other good pacers scored down for the word in the Christopher Stake for the 2:27 class, and this race demonstrated among other things that the Los Angeles matinee horses can hold their own with the best of them, as after a very fast and hard five-heat race the winners of first and second moneys turned up in the pacers that parade in the amateur event when there is no bigger game to shoot at. C. J. Cleveland's handsome little mare Virginia by Bob Mason was the tip of the wise brigade and they played her like it was all over but cashing the tickets, but she failed to land although she won the two fastest heats in the race and was beaten by very narrow margins in the other three. The winner turned up in Geo. A. Pounder's chestnut gelding Glen by Glenwood, out of Nettle by Robt. McGregor. He was driven in good style by Will Durfee and was "there or thereabouts" in each of the five heats. Argyle showed flashes of speed during the race and is undoubtedly a pacer of promise, but was hardly up to a bruising race of this kind. The other four starters caught the flag before the race was ended.

M. J. Reams' black gelding Oro Belmont was supposed to be the proper pacer for the 2:45 trot, but Frank Wright had a little surprise party up his sleeve and won the only heats trotted with the big Falrose gelding, Pat Rose, owned by A. B. Rodman of Woodland. Pat Rose has had the reputation of being a little erratic in his work but he did not lift his nose today and both of the heats won by him were taken into camp pretty handily. Oro Belmont was close up all the way in the opening heat and finished second, but went to a break in the second and the place went to the black gelding Charlie T. that was a good third in the first heat. Sam Washington, driving Lady Gipsy, had a collision with the fence in the first heat but neither the mare or her driver were damaged to any extent and she was allowed to start again. The summaries:

The L. J. Christopher Stake, 2:27 class pacing, purse \$1000.
Glen, cb g by Glenwood-Nettle by Robt. McGregor (Durfee) 1 2 2 1 1
Virginia, ch m by B. h Mason (Delaney) 2 1 2 2
Argyle, b s by Charles Derby (Springer) 4 3 4 3 3
J. A. C., ch s by Dr. W. Dodge (Washington) 6 4 3 4 ds
John R. Conway, ch s by Diablo (Chadbourne) 3 ds
Loganetta, s m by Gen. L. W. (Knowles) 5 ds
Bud, b s, breeding unknown (Baker) 7 ds
Time—2:12, 2:10, 2:11, 2:13, 2:14½.

SECOND DAY.

LOS ANGELES, July 4.—A holiday crowd of about 8000 came out to Agricultural Park today and it is

safe to say that they all stayed for the finish as it was one of the greatest day's racing ever seen here and of variety enough to suit the most critical. There were three regular events and two unfinished races on the card and each one of them furnished something worth seeing. The 2:09 pace was naturally looked upon as the feature of the afternoon and it not only resulted in a little upset for the talent, but also in the fastest race of the year. Frank Wright's brown pacer, Kelly Briggs, has been working some sensational miles here recently, and the wise brigade expected him to win with colors flying, but they got in wrong without a chance to hedge as the race resulted in a sensational straight victory for Ben Davies' handsome brown McKinney stallion, Zolock, who carries a new record of 2:06 as a result of his hard earned victory. The winner drew the pole for the first heat and when Vet Kent, who was driving him owing to the illness of Henry Delaney, took out in front and won from wire to wire in 2:10½, the talent thought little of it as the sidewheelers behind him appeared to have paced an easy mile, and Zolock tickets could still be had at a very cheap figure. In the second heat they went away boiling, and this time Kelly Briggs raced head and head with Zolock to the half in 1:03 and to the three-quarter in 1:35, and the wise ones figured that this was about as far as Zolock would care to go at this clip, but instead of backing up he came on faster and beat out the pacer from Woodland with something to spare in 2:06. Le Roi and Ira both caught the flag in this heat. In the third heat Jonosa Basler tried to turn the trick where Kelly Briggs had failed but the effort was without avail as Zolock raced them on even terms to the three-quarter in 1:36 and then left them by the wayside by pacing the last quarter in 30½ seconds, finishing out the mile in 2:06½. Zolock's mile in 2:06 reduces his record over three seconds and his two miles in 2:06½ and 2:06 sets a new record for the Coast. He was far from being all in when he finished his mile in 2:06 and could probably have come close to the 2:05 mark if necessary. At any rate, Zolock stock is soaring tonight.

Another good thing went wrong in the 2:20 pace when the much touted green pacer Fearnot was beaten in straight heats by James Long's bay mare Nellie R., driven by John Quinn. Fearnot is said to have shown some of the fastest work ever shown here by a green horse and, as there were only three horses in the race, was supposed to be in a soft spot; but the Pleasanton trained mare beat him to it, although it was necessary for her to pace the second heat in 2:10. The first half of this mile was in 1:03 and the second quarter was in 31 seconds, but Nellie R. was equal to the emergency and looks like a 2:05 mare.

There were five starters in the 2:11 trot, and after Ole had won the first heat in 2:10½, distancing H. D. B. and Robizola, he had rather an easy thing of it as neither Briney K. nor Lady Madison were able to give him much of a race. Walter Maben had the son of Silas Skinner out in the lead from wire to wire in each of the three heats, and did not appear to be in difficulty in any of them. Briney K. took second money from Lady Madison.

After a well-judged drive in the unfinished pacing race Fred Ward won the long end of the purse with Vision in 2:09½, while Pat Rose finished up the 2:45 trot by beating Charlie T. and Kinmont after a great mile in 2:12½. The summaries:

The Willard Stimpson Stake, 2:13 class pacing, purse \$1000.
Vision, br g by Vanquish-dam unknown (Ward) 4 5 1 2 1
Dr. W., bl s by Robt. Basler (Leggett) 1 2 6 2 1 2
Tidal Wave, ch s by Nutwood Wilkes (Mosher) 2 1 2 3 3
Bonnie Aisle, br m by Faustino (Kent) 6 3 4 4 ds
Friskarina, br m by Bayswater Wilkes (Hoy) 5 7 5 ds
Queen B., b m by Comet (Lindsay) 7 4 3 ds
Cresco Wilkes, b s by Nutwood Wilkes (Albertson) 3 6 ds

Fearnot, bs by Lynmont (Stewart) 2 2 2
Ring Rose, b g by Falrose (Reams) 3 3 3
Time—2:11, 2:10, 2:14½.

THIRD DAY.

LOS ANGELES, July 5.—Things cooled down to a normal temperature to-day at Agricultural Park and no miles in 2:10 or better were seen, but the racing was good just the same and every event furnished a good horse race. The most sensational feature of the afternoon was the great performance of the two-year-old pacer Rockaway that won the first race on the card. That he won the race was no surprise, as he was an even money favorite over the field, but the first mile was paced in the remarkably fast time of 2:15½, which is a performance almost unheard-of for a two-year-old at this season of the year, and is a good mark for the baby pacers to shoot at all summer. There were only four starters in the race, and when the word was given for the first heat Rockaway went out to the front by himself and was at the quarter in :33½ and the half in 1:07, almost a dozen lengths in front of the others. Here Sam Hoy commenced to move up with the good Diablo colt McFadyen, and when they entered the homestretch he forced Rockaway to a mild drive, but the effort was useless as the latter was pacing with plenty in reserve, and it looked like he could have paced pretty close to 2:12. Hoy tried different tactics in the second heat and sent McFadyen after the winner with a rush, and for a time it looked like he was on the right scent, for Rockaway made a break going around the first turn and for a second seemed in difficulty. He soon settled, however, and after taking the others to the half in 1:07 he had things all his own way and jogged home an easy winner in 2:19½. McFadyen, owned by E. D. Dudley, is a high-class colt and paced a great race, and might have a chance to trim Rockaway later in the season, but the latter was too much for him to-day and the victory was a clean one. Rockaway is a son of Stoneway, is owned by the local horseman Geo. A. Pounder, and was driven by his old trainer, Jacob Broliar.

The 2:17 trot brought out a field of five and it developed into a hard fought and interesting contest. Will Durfee's Jupiter B. appeared to be the class of the race and was an even money favorite over the field in the auctions before the first heat. He won the race in good style, but the big Shadeland Onward stallion, The Commonwealth, had him stepping his best about all of the time and every heat was a hard one. Jupiter B. drew the pole and when the word was given Durfee took him out in front and was leading at the half in 1:07½ by quite a good margin. Here Lindsay commenced to let out some sail with The Commonwealth and as they swung around the second turn was racing head and head with the favorite. As they came down the stretch both teamsters were driving hard and it appeared to be any one's race up to within one hundred yards of the wire where Jupiter B. went to a break and The Commonwealth got the verdict in 2:15½. The latter made a bobble about the same time as Jupiter B. went into the air, but was on his stride again in a hurry and reached the wire first by over a length. They started on the second heat in about the same fashion as in the first, Durfee having taken Jupiter B. out in front again, with The Commonwealth close up. They trotted the whole mile close together and entered the stretch like a team, but Jupiter B. was out for business this time and won the heat by half a length in 2:13½. The third heat was won by Jupiter B. in about the same fashion but in the last The Commonwealth went to pieces and Durfee had no trouble in winning in 2:16½ from What Is It. The latter was third the first three heats and second in the fourth and trotted a good race but was not up to a hard race of this sort. Zambra and Mamie Elizabeth showed speed in spots but both were erratic.

The Charles Derby mare Economizer was a luke warm favorite over a field of six in the 2:17 pace but was not quite equal to the emergency and was third in the summary after a four heat race. The favorite was right out in front when the word was given and held the lead until they turned into the stretch where Vet Kent came along with Mistake and beat him at the wire in 2:13½. In the second heat the field was pretty well bunched to the three-quarters and it looked like a toss up between Mistake and Economizer but neither one was the winner as Fred Chadbourne came along with a nice burst of speed with the chestnut stallion John R. Conway and beat them both easily in 2:13. The winner of this race had things all his own way in the next two and won with something to spare in slow time. He made a disastrous break in the last

heat and lost about fifteen lengths near the half mile pole but came out very fast and was going easily at the end. The summaries:

The J. A. Fairchild Stake, two-year-old pacers, purse \$500, 2 in 3
 Rockaway, ch c by Stoneway-dam untraced.....(Broiler) 1 1
 McFadyen, ch c by Diablo.....(Hoy) 2 2
 Magladi, b f by Del Norte.....(Delaney) 3 4

 Major Sultan, b g by Lord Sultan.....(Hackney) 4 5 5 ds
 Time—2:13½, 2:13, 2:17, 2:15.

FOURTH DAY.

"Dad" Trefry showed up a high class three-year-old by McKinney today, but after winning an easy heat with him in 2:17, the colt made a disastrous break in the second heat and was distanced. It was one of those unfortunate occurrences that come when least expected. Kenneth C., as the colt is called, was the favorite and it looked as if he could win without extending himself as he was known to have great speed and won the first heat handily. He is out of the dam of the pacer Tom Carneal 2:08½, but is one of the best gaited three-year-olds on the track. After his break the filly Princess Louise by McKinney's son Coronado 2:12½ went on and won in straight heats, her miles being in 2:20, 2:19 and 2:21, stamping her as a very high class filly. She is the first of the get of Coronado to start and is owned by Mrs. L. J. Hastings of Los Angeles. Her dam is a mare by Woolsey, own brother to Sunol 2:08½. The records made by Kenneth C. and Princess Louise are the fastest made by any three-year-old trotters this early in the season for years, and the manner in which the filly finished her race showed that had the colt kept his feet, a horse race would have been on which might have resulted in one or both being in the 2:15 list when it was ended.

The 2:27 trot was second on the program and strung out to five heats, all being trotted within a second of the same notch. The big bay gelding Modoc by Daly took the first heat in 2:19½, and Old Hickory, a chestnut gelding by Aeolus, took the second in 2:19, but the brown gelding Wildbell, a son of Wildnut and the once champion yearling Bell Bird, owned by Capt. Ruhstaller of Sacramento, came on and won the next three heats in 2:18½, 2:18½ and 2:19½. Old Hickory took second money and Modoc third. This field of horses will make a race at any time in which the winner will be hard to pick as they are all pretty evenly matched.

In the 2:24 pace, 2:10 was equalled twice by the Bob Mason mare, Virginia, who won in straight heats, with Glen, who beat her the first day, a good second. Miss Winn, a daughter of Demonio, won third money, and Bessie Barnes and Argyle were shut out in the last heat. The summaries:

The H. N. Henderson Stake, for three-year-olds without records purse \$600.
 Princess Louise, b f by Coronado, dam by Woolsey.....(Julian) 2 1 1 1
 Osoola, br c.....(Mosher) 3 2 2 2
 Kenneth C., br c by McKinney-Mountain Maid by Cresco.....(Trefry) 1 ds
 Time—2:17, 2:20, 2:19, 2:21.

The Chas. Saddler Stake, 2:27 class trotting, purse \$1000.
 Wild Bell, br g by Wildnut-Bell Bird by Electioneer.....(Freeman) 5 4 1 1 1
 Old Hickory, ch g by Aeolus.....(Wallace) 2 1 2 3 3
 Modoc, b g by Daly.....(Zibbell) 1 2 3 4 4
 Miss Mabel, b m.....(Maben) 4 3 5 2 2
 D. E. Knight, b g by Lynmont.....(Ables) 6 6 6 5 5
 Talisman, ch g by Steinway.....(Stewart) 7 5 4 ds
 Glennita, b m.....(Kent) 3 7 ds
 Time—2:19¼, 2:19, 2:18¾, 2:18¼, 2:19½.

The Hotel Potter Stake, 2:24 class pacing, purse \$1000.
 Virginia, ch m by Bob Mason, dam by Grandee.....(Maben) 1 1 1
 Glen, ch g by Glenwood.....(Pounder) 4 2 2
 Miss Winn, ch m by Demonio.....(Reames) 5 5 3
 Bessie Barnes, blk m by Zombro.....(Sherwood) 2 3 ds
 Argyle, bh by Chas. Derby.....(Springer) 3 4 ds
 Time—2:10, 2:10, 2:12¼.

NOTES.

Secretary A. W. Bruner is to be complimented upon the up-to-date and thorough manner in which the meeting is being managed and much of its success is due to his faithful efforts. The racing is started promptly, there are no delays between heats, everything goes on in a business like manner and there is a completeness about the whole thing that is commendable. This is the first meeting of consequence held here in some time, but it has made a most favorable impression on both the horseman and the public and it is to be hoped that Los Angeles is in the game to stay.

The trainers from the north are beginning to realize that the horses trained in Los Angeles are pretty tough propositions and that miles around the 2:10 mark can be expected any time they score for the word. So far the horses trained at the local track have won the lion's share of the money and it is rea-

sonable to expect that they will continue to do so, but the trainers from the northern tracks are doing very well under the conditions and have no great cause for complaint.

Chas. Saddler did the starting on Monday but since then the flag has been handled by Capt. J. C. Newton. The latter has been very successful and as a rule he has been able to send them away in good style without any delay.

The fields have been rather small all week owing to sickness and lame horses in several of the stables. The racing, however, has been high class every day and makes up in quality what is lacking in quantity.

The 2:13 pace was a great eye-opener for the week and was a race that will long be remembered. It is not often that the first three heats are won by different horses and all of them in 2:09½ or better.

The two-year-old pacer Rockaway that won the pacing stake on Wednesday and earned a mark of 2:15½ is one of the most remarkable little horses one ever saw, not only because of his wonderful speed but also because of his peculiar markings and general make up. He isn't much bigger than your fist, is a light sorrel, with a coat well sprinkled with white, has three legs that are white to the hock, a blaze face and two glass eyes. You can imagine that he wears the hobbles when ready for business. This is the horse that created quite a little talk this spring when he was called Little Jim and was purchased by his present owner Geo. A. Pounder from Jacob Brolier, at a price that ran away up into the thousands. He was started once as a yearling at Tulara when he won a half mile

ZOLOCK 2:06—Winner of 2:09 Pace

heat race in 1:12 and is undoubtedly one of the fastest youngsters since the days of Directly for since coming to the local track he has shown a half in 1:02 and a quarter in 30 seconds and the limit of his speed is not known. He is by Stoneway, son of Strathway and his dam was a mare always used on the road and whose breeding is not known.

The boys are still talking about Zolock 2:06 and the great race he won the other day and it goes without saying that it was one of the greatest races ever seen on the Coast, and it might be that if the son of McKinney and Gazelle was tuned up for a trip against the watch he might step a mile right close to the two minute mark. He has been in the stud regularly up to a month ago and within the past two weeks has served a half dozen mares, so his two heats in 2:06 and 2:06½ under the circumstances make him look pretty good. He raced in hobbles for the first time the other day and although Henry Delaney did not drive him it proved that he knew what he was talking about when he said that all Zolock needed to be a 2:04 horse was the straps.

Walter Maben gave the boys a little treat on Wednesday morning by stepping Mr. Canfield's black pacing gelding, Highball 2:08½ by Silkwood 2:07, a mile in 2:06½. Highball was not entered here in any of the regular events but a special free-for all has been substituted for the two-year-old trot and Highball will probably be seen in this. A mile this fast was hardly expected of him, but he did it well within himself and paced each of the quarters at about the same rate of speed. He is a level headed, good mannered horse and should give a good account of himself if he starts with the free-for-allers.

It is not often that a horse takes to the hobbles as easily as did John R. Conway 2:13. Fred Chadbourne trained him all spring at Pleasanton without thinking of the straps and he was working easy miles in 2:12 and was considered a right good prospect but his showing in the 2:27 pace on Monday was so bad that his trainer concluded that he was either sick or full of the devil. He was entered on Wednesday and as he appeared to be in good shape it was decided to start him, also to race him in hobbles and he was given his first warm up in pajamas about twenty minutes before the race. This seemed to be about what he wanted as he won the race handily and could have stepped faster than was asked of him.

B. McMAHAN.

Aids to Action in Horses.

About this time of the year horses with high action are always in keen demand. This is true of all seasons of the twelve-month, but just before the advent of warm pleasant weather there is always a little more urgency to the inquiry than at other times of the season. This naturally draws attention to the high-stepper in a more than ordinarily pointed manner and as a result we receive letters asking how horses may be made to lift knees and hocks higher and generally, in a word, "how to improve their action." This is a hard proposition. Time and again we have detailed the most usual methods, such as the posts laid on the ground and over which the horse is led, being forced in that manner to raise his knees and hocks away up in order to get his feet over the obstacles. The ditch full of some yielding footing and other contrivances have also been described in reply to inquiries of this sort. We doubt if very much has ever been accomplished by an inexperienced man attempting amelioration of action by such methods.

Action is a hard thing to make. Dr. Grenside has told readers of this journal in good set terms how essential to the development of action a good mouth is. Without a really responsive mouth a horse will never show the highest class of action in front or behind. A horse that has too soft a mouth will never go up on the bit enough to get the proper amount of headway on, while the horse that pulls hard gets too much headway on and is not under proper control. Hence it will be seen that the making of action in a horse begins at least with his breaking and while it is true that something can be done later to make a horse go higher in front, it is an uphill job, unless the breaking has been properly accomplished from its initial stages. Therefore those who are seeking to breed high-priced carriage horses must never lose sight of this fact. If they let their horses' mouths be ruined at the start they have lost half or rather more than half of the battle.

Naturally this immense call for high-acting horses has caused many inventions to be exploited as just the thing to make horses go right. Various sorts of hobbles, some with springs and some with rubber pulleys, all designed to make the horse bend his legs fore and aft sharply at knee and hock, have been on the market, but none have ever gained any permanent sale. In the very nature of things rubber and springs can only aid the horse to jerk his feet up and then slam them down again on the ground, and that is no sort of action at all as action really is. Genuine high action of the typical sort is seen when the horse raises his front foot off the ground gracefully, brings it up high with a wide bend and then sets it forward and downward as though following the rim of a rolling wheel. That is about as unlike the jerky action described as it can be, and the judges nowadays give due weight to the possession of the right movement. Behind the hocks should be sharply flexed, carried close together, raised up high and then the foot set forward squarely beneath the body without any twisting inward or scythelike outward sweep.

In order to obtain this sort of action it is necessary to breed for it, not try to make it. Those who are essaying to produce carriage horses should see to it that they use in the stud only stallions possessing such action and perfect balance of conformation. A horse may have a star-gazing way of going and throw his front feet away up into the air and yet be far from commanding a high price, simply because he lacks balance. He never can be taught to do anything with hocks, for the same reason that he is all in front. The horse that goes high in front is better than the one that goes not at all, but the aim of the breeder should be to get all the money, so to speak, and not only part of it. Hence the well balanced stallion is the one to buy. If he can go well fore and aft and has the typical conformation he is worthy paying a lot of money for, and will surely do his owner good. Then if the colts by such a sire are properly broken their natural bent will suffice admirably to produce the action and contrivances of one kind and another will not be required. There is no short cut to the production of high-class carriage horses with the right kind of action. The way to get them is to breed for them from well selected parents, not to take animals bred for some other purpose and then try by means of ingenious devices to transmogrify them into the semblance of the real article. The futility of the latter practice was well brought out at all the great horse shows of America the last two seasons.—*Breeders' Gazette.*

Belle Hamlin 2:12¼, the first trotter to bring fame to the late C. J. Hamlin as a breeder, is now owned by John Bradburn, for many years superintendent at Village Farm. The old mare has been bred to Prince Ideal.

Strike!—If they don't give you Jackson's Napa Soda when you ask for it.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

Coming Events.

Rod.

April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steel-head in tidewater.
April 1-Sept. 15—Closed season for lobsters and crawfish.
April 1-Nov. 1—Trout season open.
June 1-Jan. 1—Open season for black bass.
July 8—Saturday Fly-Casting Contest No. 8. Stow lake, 2:30 p. m.
July 9—Sunday Fly Casting Contest No. 8. Stow lake, 10 a. m.
Sept. 10-Oct. 16—Close season in tidewater for steelhead.
Sept. 10-Oct. 16—Close season for catching salmon.
Oct. 16-Nov. 15—Close season for taking salmon above tide water.
Nov. 1-Sept. 1—Open season for crabs.
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

Feb. 15-Sept. 1—Closed season for mountain quail, grouse and sage hen.
Feb. 15-Oct. 15—Closed season for quail, ducks, etc.
April 1-Oct. 15—Close season for English snipe.
June 27, 30—The Interstate Association's Grand American Handicap Target tournament, Indianapolis, Ind.; \$1000 added money. Elmer E. Shaner, Secretary-Manager, Pittsburg, Pa.
July—Washington Gun Club. Blue rocks. Kimball-Upson grounds, Sacramento, Cal.
July 1-Feb. 15—Dove season open.
July 16—Mount View Gun Club. Blue rocks. Mount View, Cal.
July 9—Empire Gun Club. Blue rocks. Alameda Junction.
July 9—California Wing Club. Live pigeons. Ingleside.
July 9, 23—Fish and Game Gun Club. Blue rocks. San Jose.
July 16—Union Gun Club. Blue rocks. Ingleside.
July 30—Millwood Gun Club. Blue rocks. Mill Valley Junction.
Aug 1-Oct. 15—Deer season open.
Aug. 6—Golden Gate Gun Club. Blue rocks. Ingleside.
Aug. 6—Blue Rock Gun Club. High-street grounds, Alameda.
Aug. 29, 30—Interstate Association tournament. Blue rocks. Denver, Col.
Sept. 9, 10—Empire Gun Club. Merchandise shoot. Blue rocks. Alameda Junction.
Sept. 12, 13, 14—Interstate shoot. Blue rocks. Ingleside. Elmer E. Shaner, Manager. Pacific Coast Handicap under auspices of S. F. Trapshooting Ass'n., A. M. Shields, Secretary.
Sept. 30-Oct. 1—Two-day blue rock tournament. Biggs, Butte county. H. Haselbusch, manager.
Sept. 30-Oct. 1—Biggs Gun Club. Two-day blue rock tournament. Biggs, Cal.

Bench Shows.

July 6, 7, 8—Pacific Sheep Dog Club. Second annual show. Santa Cruz. Geo. W. Still, Secretary. A. K. C. rules.
Aug. 15, 18—Orange County Agricultural Society. Middletown, N. Y. D. A. Morrison, Secretary.
Aug. 23, 25—Rockland County Industrial Association. Bench show in New York City. A. A. Vanderbilt, Secretary.
Aug. 31-Sept. 2—Newport Dog Show. Newport, R. I. Francis M. Ware, Secretary.
Sept.—Stockton Kennel Club. F. A. Gelsea, Secretary, Stockton, Cal.
Sept. 16—Englewood Kennel Club. Englewood, N. J. M. W. Robinson, Secretary.
Sept. 27, 28—Valley Fair Kennel Club. Brattleboro, Vt. Howard C. Rice, Secretary.
Oct. 3, 6—Danbury Agricultural Society, Danbury, Conn. G. M. Rundle, Secretary. Jas. Mortimer, Superintendent.
Nov. 15, 18—Boston Terrier Club Specialty Club. Boston. F. H. Osgood, Secretary.
Nov. 29-Dec. 1—Philadelphia Dog Show Association. Philadelphia. J. Sergeant Price, Secretary.
1906.
Feb. 12, 15—Westminster Kennel Club. New York. Robt. V. McKim, Secretary.
Feb. 20, 23—New England Kennel Club. Boston. Wm. B. Emery, Secretary.
March 7, 10—Duquesne Kennel Club. Pittsburg, Pa. F. S. Steadman, Secretary.

Field Trials.

Aug. 15—Iowa Field Trial Club. Geo. C. Cooper, Secretary, P. O. Box 55, Des Moines, Ia.
Aug. 23—North Dakota Field Trial Club. Inaugural trials. Grand Forks, N. D. A. E. Palmer, Secretary, Grand Forks, N. D.
Sept. 4—Nebraska Field Trial Association. 4th annual trials. O'Neill, Neb. H. H. McCarthy, Secretary, O'Neill, Neb.
Sept. 6—Manitoba Field Trial Club. 19th annual trials. La Salle, Man. Eric Hamber, Secretary, Winnipeg, Man.
Sept. 21—British Columbia Field Trial Club. 3d annual trials. Ladner, B. C. H. S. Rolston, Secretary, Vancouver, B. C.
Oct. 23—Ohio Field Trial Association. Washington Court House, O. C. T. Phillips, Secretary, Columbus, O.
Oct. 30—American Field Futurity Stake. For Pointers and Setters whelped on or after January 1, 1904, whose dams have been duly qualified. Robinson, Ill., entries closed July 1. Address Am. Field Publishing Co., Chicago.
Oct. 31—Connecticut Field Trial Club. Hampton, Conn. F. M. Chapin, Secretary, Pine Meadow, Conn.
Nov. 6—Independent Field Trial Association. Hutsonville, Ill. S. H. Sowell, Secretary, Indianapolis, Ind.
Nov. 13—Illinois Field Trial Association. Robinson, Ill. Wm. R. Green, Secretary, Marshall, Ill.
Nov.—Indiana Field Trial Club. (Week following Illinois Champion Stake). C. F. Young, Secretary, Clay City, Ind.
Nov. 21—International Field Trial Club. Rathven, Ont. W. B. Wells, Honorary Secretary, Chatham, Ont.
Dec. 2—Continental Field Trial Club. 11th annual trials. John White, Secretary, Hempstead, Long Island.
Dec.—Pointer Club of America (following the Continental trials). Barber, N. C. C. F. Lewis, Secretary, 128 Maiden Lane, New York.
Dec. 12—Eastern Field Trial Club. Waynesboro, Ga. S. C. Bradley, Secretary, Fairfield, Conn.

1906.

Jan.—Pacific Coast Field Trials Club. 23d annual trials. Bakersfield, Cal. Albert Betz, Secretary, 201 Parrott Bldg., San Francisco.

DOVE SEASON.

The dove season opened on July 1st and closes February 15th next. Such is the State law, but this open season has been abridged in many counties, among them Santa Clara, Yuba and Placer, where the open season begins August 1st.

DOINGS IN DOGDOM.

SANTA CRUZ SHOW.

The second annual show of the Pacific Sheep Dog Club (formerly The Pacific Collie and Old English Sheep Dog Club) began at Santa Cruz on Thursday with the following number of entries by breeds: St. Bernards 9, Great Danes 4, Deerhounds 1, Pointers 10, Setters 14, Dalmatians 2, Irish Water Spaniels 2, Field Spaniels 4, Cocker Spaniels 28, Collies 28, Old English Sheep Dogs 1, Bull Terriers 5, French Bulldogs 4, English Bulldogs 10, Boston Terriers 10, Airedale Terriers 5, Fox Terriers 6, Irish Terriers 6, Skye Terriers 2, Scotch Terriers 1, English Toy Spaniels 6, Japanese Spaniels 1, Daschundes 4, Pomeranians 1.

COLLIE NOTES.

Glen Tana Collie Kennels of Spokane sold Ch. Bo Peep, a grand brood bitch and a good producing dam, to J. S. Kloher, of Green River.

Mr. Griffith advises us that he has for sale a list of the best stud dogs, brood bitches and best bred puppies in the West today. It will pay Collie fanciers to write for a descriptive circular.

TAPE OR SPECIE?

Cash prizes or ribbons is a vexed question with many exhibitors on the Atlantic side of the plantation and the argument is having a lively flailing out by the scribes, and fanciers who like to write to the papers. As to the merits of the case in the East, we are not prepared to say, circumstances and conditions there being beyond our sphere of observation. The champions, under both the silk and specie banners, are having their say, with the honors about even.

The matter came up on the Coast when the S. F. K. C. first decided to change the routine and award ribbons and medals instead of coin. There was, of course, some opposition and much comment, but now the counter product has evidently come to stay, for this precedent has been religiously followed by about all of the Coast shows and seems to work, now, harmoniously.

One point made by an Eastern writer and one whom we believe most thoroughly understands dog shows and all that pertains to the fancy, is that "Ribbons shows are the happy medium through which a pleasant chance to win a few honors is afforded that would not be possible in the money shows where the big kennels and professionals sweep down and gobble up all the grist, which of course they have a perfect right to do, and by the same token the other exhibitor has a perfect right to show for a ribbon. A lot of fellows who cry out about shows doing this, that and the other, for exhibitors who do not help them out when they get in a hole, at least very few of them do, have very little idea of the expense and risk of even a ribbon show, and especially is that risk great when the show is held in some country place where the gate has to be gauged with a microscope."

Shows shall not die: For ribbon prizes! Nay:
The Kennel Club goes to't, and the small, gilded specialty clubs
Does lecher in my sight.
Let ribbon shows thrive—

Yea, let ribbon shows prosper, for many good reasons, among these we might urge the one, that if ribbon shows will help to cut down show expenses there might then accrue a fund for one legitimate expense, and we would thus avoid the unpleasant duty of respectfully declining the contribution of requested gratuitous advertising.

A. K. C. CLASSIFICATION.

The Stud Book Committee recommended the following divisions of breeds to the last A. K. C. quarterly meeting which suggestion was adopted and the recognized breeds of dogs are now known as sporting, non-sporting and Terriers.

Regarding the division of breeds into sporting and non-sporting divisions the Committee was of the opinion that if they are so divided the recommendation of allotment be the following:

Sporting: Chesapeake Bay, Bloodhounds, Otter Hounds, Foxhounds, Harriers, Beagles, Basset Hounds, Dachshunde, Greyhounds, Deerhounds, Russian Wolfhounds, Irish Wolfhounds, Setters, Retrievers, Irish Water Spaniels, Water other than Irish Spaniels, Clumber Spaniels, Sussex Spaniels, Field Spaniels, Cocker Spaniels, Pointers, Fox Terriers, Irish Terriers, Scottish Terriers, Welsh Terriers, Dandie Dinmont Terriers, Skye Terriers, Airedale Terriers, Bedlington Terriers, Whippets.

Non-Sporting: French Bulldogs, Bulldogs, Mastiffs, Great Danes, Newfoundlands, St. Bernards, Collies, Old English Sheepdogs, Dalmatians, Poodles, Bull Terriers, Black and Tan Terriers, Toy Spaniels (as separately divided), Japanese Spaniels, Pekinese Spaniels, Yorkshire Terriers, Maltese Terriers, Italian Greyhounds, Chow Chows, Pomeranians, Pugs, Schipperkes, Griffons Bruxellois, Boston Terriers, Chihuahuas, Foreign Dogs.

"Your Committee desires the association to consider the advisability of dividing the breeds into three sections, as follows: sporting, non-sporting and Terriers, believing that such a division might facilitate the judging of special prizes, which is the cause of this matter having been referred to the Committee.

It would make fewer and more equal contestants

and could not in any way affect the standing of a breed, as, no matter how they may be divided for such show purposes, their characters would remain the same," as follows:

Sporting: Bloodhounds, Otter Hounds, Foxhounds, Harriers, Beagles, Basset Hounds, Dachshunde, Greyhounds, Deerhounds, Russian Wolfhounds, Irish Wolfhounds, Whippets, Pointers, Setters, Retrievers, Irish Water Spaniels, Water other than Irish Spaniels, Clumber Spaniels, Sussex Spaniels, Cocker Spaniels, Chesapeake Bay.

Non-Sporting: French Bulldogs, Bulldogs, Mastiffs, Great Danes, Newfoundlands, St. Bernards, Collies, Old English Sheepdogs, Dalmatians, Poodles, King Charles Toy Spaniels, Blenheim Toy Spaniels, Ruby Toy Spaniels, Tri-color Toy Spaniels, Pekinese Spaniels, Japanese Spaniels, Italian Greyhounds, Chow Chows, Griffons Bruxellois, Pomeranians, Foreign Dogs, Pugs, Shipperkes.

Terriers: Airedale, Bedlington, Black and Tan, Bull, Boston, Dandie Dinmont, Fox, Irish, Scottish, Skye, Welsh, Yorkshire, Toy, White English.

Which latter classification is now the official one.

In the June issue of the *Kennel Gazette*, the frontispiece is a half tone picture of the Bulldog Ch. Felton Prince. The picture is a grand illustration of type and an object lesson in one respect. The dog is well spread at the shoulders and has sturdy, almost straight forearms in contradistinction to some low-legged cripples that pass current for the upper crust in the breed.

Dalmatians, notwithstanding the comparative scarcity of good ones, are in demand on the Coast. We refer our readers to the announcement of Mr. Buck, of Sutter Creek, which appears on page 15 of this issue.

Mr. James Cole of Kansas City judged at a show held at Calgary, Alta, N. W. T., Can., on Wednesday.

Kennel Suggestions.

There has been a good deal said of late about kerosene and salt as a cure for follicular mange and those obstinate skin diseases that sometimes visit the best of regulated kennels. Several instances were first given in the English papers of the efficacy of this very simple remedy, and we are in a position to add our mite.

Some time ago a Cocker Spaniel was afflicted with what seemed like blood poisoning. The lips and legs and head swelled to abnormal size; great bulbs of soft matter stuff formed on the sides, the shoulders and legs; looked like puff balls, and when pressed would exude a bloody matter; on some parts of the body dark blue spots would appear and on these being pressed, thin blood would spurt out, sometimes to the distance of a yard. The legs swelled out of all shape and were corrugated like an elephant's hide. At one time the flesh around the shoulders and neck took on the appearance of the rough part of an alligator's hide. The hair fell out in most of the affected parts but not in the others, although the dog was finally almost denuded of hair. The animal suffered a lot of pain. The eyes became affected. Every handy remedy that had proved efficacious on ordinary cases of skin diseases was tried, but without result and in most cases seemingly made the dog worse. The skin at times hurt like fire, and was very red.

Finally the kerosene and salt was tried. Two table-spoonsful of salt being put to the pint of kerosene. The salt is not soluble in the oil so we cannot see where it is of any benefit except perhaps as a cleanser. However, after two applications (the first being a very weak solution) the swelling began to subside, and the dog to live up, and continued to do so for two days, when the animal was washed in a hot bath. Some remains of the original trouble being still visible the dog was done over again with the kerosene mixture, and this left on for a day, when after another hot bath, the dog's skin began to peel off in scales leaving the surface as smooth as a glove.

All swellings disappeared, the legs and head assumed their natural form, appetite picked up and the dog began to take an interest in life once more, and is almost as lively as ever, and moreover, the hair is beginning to come in again and everything looks as if in a month or two the Cocker, will be as well as before. This was the worst case of three, though all were afflicted with exactly the same conditions. They were taken down very suddenly. They had been running with several other puppies that have not been affected. Their quarters and feed and care have been of the very best, and the only way to account for the trouble is that when a neighboring field was spread with manure, they ate a couple of little puppies that had been thrown into the manure during the winter. This is not known as a fact but is presumed.

The other puppies, brothers and sisters, have had no troubles. Here is a case that is pertinent to the discussion as to the efficacy of this kerosene treatment and which we can personally vouch for. We might say that with the idea of avoiding blistering the skin, the first time the kerosene was applied it was diluted with water, but that subsequently when it was found that this did not take hold as expected the full strength was applied with no blistering effects. In another case of obstinate skin disease that had resisted all the ordinary treatments, two or three applications of the oil brought out a splendid coat with no recurrence of the trouble. The coat does not seem to be damaged in any particular, in fact the coat is improved. The low cost of the remedy brings it within the reach of all. Particular care must be taken after the oil is applied that the dog is kept quite warm and free from draughts, or salivation may set in and all sorts of complications ensue that generally end in death.—*The American Stock-Keeper.*

Big Basin Road Project.

The importance of a direct road into the Big Basin Park from the Santa Clara Valley, San Jose being the initial starting point, is felt to be an urgent necessity. The construction of a broad boulevard, from the valley to the park, that will always be open to teams and automobiles, by the most direct route, is a project now in the hands of a joint committee composed of representatives of the Sempervirens Club, Native Sons of the Golden West, and Santa Clara County Pioneers. An appeal has been promulgated in the name of these worthy associations, to the people of this State, to build this much needed highway by public subscription.

So well has the movement been received thus far that several individual subscriptions of \$500 each have been received.

The Big Basin Road Committee composed of: Arthur M. Free, Chairman; Andrew P. Hill, Secretary; Bank of San Jose, Treasurer; J. G. McMillan, Surveyor; W. P. Lyon, L. A. Spitzer, Jackson Hatch, Arthur M. Free, A. P. Hill, A. P. Murgotten, Finance and Executive Committee; Joint Committee—Alex. P. Murgotten, George S. Andrews, L. A. Spitzer, A. R. Woodhams, W. D. J. Hamby, Page Hollister, Pioneer Society; Rev. E. S. Williams, Dr. A. E. Osborne, W. P. Lyon, A. P. Hill, Lester Morse, Judge J. R. Welch, Sempervirens Club; Arthur M. Free, Fayette Mitchell, H. W. McComas, G. B. Cottle, Fred Doerr, Chas. A. Thompson, Native Sons, have issued a circular descriptive letter together with subscription blanks which are being mailed to many individuals with the request for a donation for the laudable purpose explained.

There has been a ready response in nearly every instance. A letter of inquiry addressed to Mr. Arthur M. Free, Chairman, or in fact, any of the above named committee, will meet with prompt attention. We recommend the enterprise to all of our readers who are interested in the development of this State to help make accessible this great natural attraction. The early completion of this road will make the Big Basin easily reached by a drive of about seventeen miles from the Santa Clara valley—from Saratoga Summit to the Park; a road open at all times and thus making the Park accessible to the whole State.

The State Redwood Park (Big Basin) and its Pliocene forests, lying in the Santa Cruz mountains ten miles in an air line from the Santa Clara Valley, forty miles south of San Francisco, seventeen miles northwest from Santa Cruz, five miles distant from the sea, nineteen miles southwest of San Jose and ten miles by road from Boulder Creek, is a feature unique among California's marvels.

It is one of the few spots that, owing to its peculiar geographical and geological formation, has retained the wealth of flora and beauty of the Pliocene Age. It has been bequeathed to us in its primitive condition, almost unmarred, with its gigantic Sempervirens trees (some having a diameter of more than twenty feet) the oldest and largest of their species. The rugged and romantic scenery of the Basin is especially pleasing. It is surrounded by a mountain rim, traversed by great ridges of forest lands and deep wooded canyons with their gorges, and waterfalls and sparkling streams filled with trout contribute greatly to its interest. Its wonderful forests (said to contain fifty-four varieties of plants), its moss covered rocks and graceful ferns, wild azaleas and tiger lillies, tend to make a scene that for beauty, educational purposes and general interest stands unrivalled by any forest in the world. Its scientific and practical value to mankind is widely recognized. It is in a warm belt, possesses a peculiarly hygienic climate, owing to the topography of the country, and is in a district where frost is seldom known. This Park is destined to become as famous for a winter as it is for a summer resort. It has excellent facilities for camping. A survey made in June of the present year, 1905, shows that the altitude at the camping points selected varies from 1100 to 1500 feet. The elevation of the rim surrounding the Park varies from 1600 to 2600 feet above the sea.

The Park can be made a place of such attraction that all tourists who visit California will feel that they should see at least the giant redwoods of the Big Basin before returning to their homes or completing their tour.

GOSSIP FOR SPORTSMEN.

NEW TERRITORY FOR SPORTSMEN.

Within a comparatively short period new country for the angler and hunter will be opened by means of several projected lines of railroad.

One road contemplated will be constructed from Weeds station on the Southern Pacific in Siskiyou county to Klamath Falls, a distance of about 100 miles. This region is practically unknown to the angler and devotee of rifle or shotgun.

The California Northwestern Railway has within a year or so extended its line first to Willits and recently to Sherwood, Mendocino county, thus opening up for the sportsman a region hitherto only accessible by vehicle or horseback, a trip denied for obvious reasons, to the main body of sportsmen.

The proposed electric line, which will tap the coast shore region between this city and Santa Cruz, will give access to a territory hountiful in the extreme for outing, camping, trout and sea fishing, deer and small game shooting.

A SWELL MARYSVILLE CLUB.

The recently organized Tule Hunting Club of Marysville has leased nearly 18,000 acres of what is claimed to be "the finest shooting grounds in the world," for a period of ten years. The opportunities for duck shooting, trout and black bass fishing, combined, are unequalled. The initiation fee for membership is placed at \$100, a low figure. It is expected the club will be fully organized within a short period. Col. E. A. Forbes, Dr. J. H. Barr, A. O. Frye, C. F. Aaron, H. D. King and J. W. Stewart compose a

committee who will select a site upon which will be erected an elegant club house. The club will be incorporated with a capital stock of \$50,000, divided into shares of \$100 each. The club membership will be limited to 100.

TRUCKEE IN LINE.

Early in June some fifty of Truckee's representative citizens and sportsmen met for the purpose of hearing Deputy Fish Commissioner Welch of this city and Game Warden Neate of Sacramento and also to complete the organization of a local association—The Truckee River Fish and Game Protective Association.

The officers elected were: William Rowison, president; W. O. Blinn and R. C. Koepke of Iceland, vice-presidents; F. M. Rutherford, secretary and treasurer; Trustees, J. C. Hadley of Floriston, W. H. Rapp, Herman Wilkie, Chas. Cole and Stewart McKay.

HUNTING DOGS.

The season is now at hand when sportsmen will be eager to find a suitable dog to work to the gun during the coming open season. For upland shooting the Setter or Pointer has the call. For duck shooting the Irish Water Spaniel is the choice of many marsh hunters. Notwithstanding this climate is free from the rigorous conditions prevailing in the East and Middle West during the winter ducking season, or even which prevails up north, still it is asking too much of a short or thin coated dog to work in the water, for weather conditions here are cold enough at times to cause a dog much suffering.

Finding a suitable bird-dog is one of the hardest possible things for the hunter. Some acquaintance may recommend a dog to him and claim for it every good quality with which a kind providence has endowed the denizens of dogdom, yet when he inspects the animal the hunter will see nothing extraordinary about him and think he is simply and ordinary "pup."

Frequently the hunter, especially if he is not familiar with dogs or type, will allow the general appearance of the animal to have great weight with him. He may disapprove of the way the dog hangs his head, or because he is not always snooping around as if he were sniffing out game, or about to point.

The only thing about a dog which always is doing these things which makes the average hunter think he wants him is the fact that it always keeps the spectator in a state of suppressed excitement. This is not the quality of a high class dog, and nine times out of ten that style of dog is a false pointer and seldom an effective ranger.

Few high class dogs of today have a great deal of tail action or style when ranging at speed, and only show this characteristic when nearing the game. The reason for this is due to the natural tendency of conservative energy. A great deal of unnecessary energy is consumed by excessive tail action and excitement. Many experienced trainers are coming to doubt the capacity of a dog which seems to be "making game" all the time.

When is a dog broken? This is another question which seems to bother many. Dogs, which under the handling of one man show the greatest intelligence, are frequently singularly lacking in sense when another takes charge of them. These people seem to think a dog will remember anything when it is once taught. This is not true. A dog which is well broken this season is apt to forget a great portion of his teachings when next year comes and has to be broken over again.

Many of the finest dogs are sensitive and seem to fear having strangers near them. They are not timid when working after the game, however, and their owners need to remember that some of the best dogs in the country have this fault. Some Deerhounds will quit a trail and turn tail to it if they meet a stranger in the woods. Foxhounds, Beagles and even some Greyhounds seem to be afflicted this way, but if care and patience are shown they can soon be broken of this faulty habit.

The Sutter Dove Club, composed principally of Sacramento sportsmen has been organized with a membership of twenty-two. The club has secured a lease of the McDermot tract near Hangtown Crossing and the preserve has been posted against poachers and trespassers.

AT THE TRAPS.

A big team shoot will come off at the grounds of the Vallejo Gun Club on Sunday, July 23d. The following clubs will enter five man teams: Golden Gate, Union and Empire Gun Clubs of San Francisco, Santa Rosa Gun Club, St. Helena Gun Club, Vallejo Gun Club and Hercules Gun Club of Pinole, Cal. Each club is privileged to enter as many teams as desired. The race will be for a trophy—best two out of three wins for permanent ownership, 25 targets and \$5 entrance per team. The winning team to name place of next contest for the trophy.

The committee in charge of the shoot will be: M. A. Clark, Vallejo Gun Club, Captain of the day; Thos. L. Lewis, Secretary of the Union Gun Club, Manager; and J. W. Elias, Secretary of the Vallejo Club; F. W. Hesse, Jr., Captain of the Santa Rosa Gun Club; Edgar L. Forster, Secretary of the Golden Gate Gun Club; J. B. Hauer, Secretary of the Empire Gun Club; W. Hanson, Captain of the Hercules Gun Club and W. Sink, Captain of the St. Helena Gun Club.

This shoot will be well attended by members of the clubs mentioned and visiting shooters.

Twenty-six guns lined up before the hulkhead on the 2d inst. at Ingleside at the Golden Gate Gun Club shoot. Weather conditions were almost too warm for comfort and undoubtedly affected a number of scores.

The winners in the club race, 100 targets, were: Champion class—E. L. Forster and Ed Schultz divided first and second money, A. J. Webb third money, M. O. Feudner fourth, and M. J. Iverson fifth money. First class—W. J. Golcher first money, F. Schultz

second, W. R. Murdock and "Slade" divided third and fourth, W. S. Wattles fifth, Second class—H. Klevesahl first, F. Knick, McElwaine and C. Ashlin divided second, third and fourth money. Third class—C. Cuneo first money, Harvey second, E. Bowen third. B. Patrick and W. Johnson divided fourth.

Following the club shoot five contestants shot for the Phil B. Bekeart challenge cup—the previous winner, J. W. Bradrick, not being on the field—A. J. Webb won the match, breaking 90 targets out of 100. This is the third time Webb has won this contest. The score 90 is the lowest yet made in the event.

Club race, 100 targets (50 on the straight bulkhead, 50 Sergeant system) \$100 added—\$25 for each class—Champion Class.

Haigh.....	15	17	18	15	83
Feudner.....	18	17	18	18	82
Nauman.....	16	17	16	14	75

The Vallejo Gun Club shoot, June 25th, was well attended. O'Hara, Chappell, Clark, P. Magistrini and C. Mayfield of Napa were the high guns for the day. C. Drake was high gun in the club race. The club grounds are now fitted up with two sets of traps. Among the latest names on the membership list are those of C. Mayfield and W. White. At the last shoot a number of team events were shot. Captain Chappell's team prevailed over Captain Drake's.

The scores in the regular club shoot at 25 targets were: Drake 24, Chappell 23, Comfort 22, Clarke 21, Carter 20, Mayfield 19, P. Magistrini 18, Burnett 18, O'Hara 18, Shouse 18, Dr. Turner 18, Wisecarver 17, Coe 17, S. Magistrini 16, Elias 16, Evans 16, W. Beveridge 14, Rose 13, Dr. Arnold 12, G. Murray 11.

A high wind was blowing during the shoot, which accounts for the lower percentage of several shooters. The club is in an exceedingly prosperous condition and is planning many new improvements, among which are a grandstand for the ladies, as many of the wives and friends of the members find a great deal of enjoyment in attending the shoots. Another bulkhead and set of traps, which will make three altogether will be put in and will be ready this season, when the big shoot is held.

At the Bakersfield Blue Rock Club shoot, June 25th, F. N. Schofield made the highest approximate average, 63 out of 70 targets, 90%; Clem Wilson was next with 87%, 110 out of 115. Captain Shafter, U. S. A., scored 84%. There is much enthusiasm over the sport in Bakersfield and the club is in a flourishing condition. The scores made at this shoot were:

	Shot At	Broke	Per Ct.
Schofield, F. N.....	70	63	90
Wilson, Clem.....	115	100	87
Shafter, Captain.....	115	97	84 1/3
Bakeman.....	70	55	78 1/2
Tupman, Arthur.....	125	98	78 1/3

Henry.....	125	90	72 1/2
Price, George.....	55	39	71
Oswald, John.....	90	63	70
Jewett, P.....	120	83	69 1/6
Jewett, Wright.....	100	96	66
Gilbert, Claud.....	80	51	63 3/4
Whitney, Al.....	105	58	55 1/4
Packard, Bert.....	145	80	55 1/6
Cartwright.....	120	64	53 1/3
Hochelmer, M.....	70	35	50

Sunday, June 25th, a shoot came off between San Luis Obispo Gun Club and Paso Robles Gun Club shooters. The former club won by a big margin—148 to 117. Six events were on the card and a barbecue was an appetizing and appreciated side issue during the luncheon hour. The first prize in the merchandise event was annexed by Curtis of Paso Robles.

The results in the team shoot were: San Luis team—Younglove 14, Van Schaick 14, Mc Caffrey 11, Van Scoy 13, Guthrie 10, Soto 14, Maino 12, Taylor 14, Holmesley 8, Estudillo 16, Greenfield 11, Call 11; total 148 out of 200.

Paso Robles team—Johnson 8, Brown 8, Tognazzini 12, Cullen 12, L. McDaniel 8, Ooley 12, Gaxiola 5, Janney 11, Mader 10, Curtis 9, J. McDaniel 11, Hamilton 11; total 117.

James Drumgoole of Anaconda won the state championship medal at the recent Bozeman tournament. He also annexed the medal for high average. He was the recipient of a handsome cather gun case presented by the Anaconda Gun Club for making the best consecutive run of breaks—290 straight, a pretty good record.

The old State Fair grounds at Sacramento are now a thing of the past, the tract having been cut up into building lots. The favorite trap shooting grounds for Sacramento sportsmen passed at the same time. The location for the new fair grounds is now in full preparation for the coming fair in September. Frank

Newhart and L. S. Upson, representing the Capital City Blue Rock Club, have been inspecting a location for a new shooting ground within the park and have opened negotiations with the society for a lease of same.

A meeting at the traps on June 18th between representatives of the Windsor and Guerneville Gun Clubs brought the Windsor shooters to the good by 13 targets. The summaries in a number of 10 target races were as follows:

McCutchan.....	5	6	8	10	8	6	7	*
Wilson.....	3	9	4	4	4	4	4	..
Young.....	5	8	7	6	9	7
Pyne.....	7	5	5
McCracken.....	5	5
Bogart.....	4	5	6	5
Mead.....	4	5	6	5
Tripplett.....	5	6	7	7	5	8
Gorskle.....	5	2	8	10	7	7
Abbey.....	5	4
Murray.....	5	6
McGill.....	3
Walls.....	6
Wiseman.....	4	1
Butcher.....	4	1

The results at Kenilworth Park on the 18th inst. at the second shoot of the Petaluma Gun Club were as follows: Club race, 20 targets—Drees 15, Clark 17, Atkinson 6, Dickson 13, Lopus 13, Steiger 14, Dr. Hall 11, Goodwin 10, H. F. Smith 5, Bert Ayers 10, J. King 10, Lafranchi 4, Denmore 5. Tony Mego and Joe Clark were "high guns" for the shoot.

At the shoot held June 25th the scores in the club race, out of a possible 20 targets, were as follows: Summerfield 18, Velgar 11, Mego 14, Clark 16, G. Drees 10, Carter 13, Steitz 10, E. Drees 12, Sullivan 8, Ducker 14, Hasper 7, Murphy 14, Focha 7, Beggs 8, Limebaugh 8, Jos. Steiger 9.

There has been quite a change made at the Ingleside trap shooting grounds. The blue rock bulkheads have been removed from the extreme east end of the grounds and set up again on the eastern portion of the live bird section.

This change will be found to be decidedly for the better. The western portion of the shooting ground is well sheltered and surrounded by high fencing which is quite an advantage to the shooter when the westerly trade winds are hurling across the outfield.

Another advantage is that the shooters can now do all of their trap shooting in one enclosure conveniently and without a rather long walk from one section to the other.

The California Wing Club live bird shoot for July is the card at Ingleside tomorrow.

Blue rock shooters are invited to attend the regular monthly shoot of the Empire Gun Club at Alameda Junction tomorrow.

The Bakersfield trap shooting grounds are equipped with a Leggett trap.

WITH THE ANGLERS.

Black bass fishing has been excellent recently in Ballard's lake, near Olivette on the California Northwestern Railway. The killing lure now is a fly, red bodied, tinsel wound, with a canary tail and hare lug wings. This fly, on a No. 6 spout, was found to be a killer by an angler at the lake, two weeks ago. Jack Sammi sent one down to John Benn, who immediately tied a number of flies according to pattern. They were found to be just what the doctor ordered.

Black bass fishing on the Russian river rifles between Guerneville and Russian River Heights is reported to be excellent. Fishing for bass in the river in the vicinity of Duncans is also good. A minnow bait is the proper lure for the river fishing.

Striped bass fishing in Lake Merritt is productive of a deal of sport at present. On Sunday last there was a fleet of boats out about forty fish were landed. Clam bait is the proper caper for catching bass in the lake. President W. Price landed his first bass, a four-pounder on the 4th. He went out on a venture, a regatta was booked there for the day and this promised anything but sport for an angler. Nevertheless he rowed over to a spot indicated by John Fatjo, chummed with a dozen or so fat clams, put his tackle over and before his baited hook struck bottom he had a strike and caught a nice bass. Other anglers out on Tuesday returned to the boat house sunburnt and disgusted.

A report received this week states that striped bass are exceedingly numerous again off San Pablo and that the fish average somewhat heavier than a few weeks ago.

The San Antonio has been prospected fruitlessly by several fishermen recently. Mr. Shattuck of the Petaluma Gun Club is credited with a take of sixteen fine fish a week ago.

Sam A. Heller, a courteous gentleman and a true sportsman, passed away in this city last Sunday. Mr. Heller was a popular member of the San Francisco Fly-Casting Club and also of the California Wing Club. He was an enthusiastic angler and a most congenial companion on the stream. In business circles of this city he had the esteem and confidence of his associates and he was also an appreciated figure in a select social circle. His demise is mourned by many friends with whom we tender to his surviving relatives our sincere sympathy.

Anglers who have made the trip to the Hetch-Hetchy Valley are loud in their praises of a district which, it is claimed, is an ideal trout country. A number of streams, tributaries of the Tuolumne river—the Middle Fork, South Fork, Cherry Creek, Rancheria Creek and Tiltill Creek, are teeming with rainbow and brook trout of good size. In the lakes of this region, Elmor, Laurel, Harden and Tenaya, besides numerous other smaller bodies of water, spoon

and fly-fishing can be had in an almost unfished territory.

There are two routes into the valley, one by railroad to Oakdale, where the angler can take the Sierra Railway to Chinese Camp, and thence by horseback into the valley; the other route is by railroad to Merced and then by stage to his destination. The trip going and coming will take several days, but it is worth the time for a vacation.

In the valley the angler can find good accommodation at University Camp, which is maintained by the students of California and Stanford Universities.

Trout fishing at Boca is reported excellent. Carlos G. Young and H. W. McNoughton left for this famous Truckee angling resort a week ago. James S. Turner, J. Burns and wife and Joseph Dober will spend the coming week at that point.

Thomas C. Klerulff, the popular secretary of the Fly-Casting Club, together with his wife and son, are enjoying trout fishing in the vicinity of Dutch Flat.

The streams of the Yosemite Valley are annually "fished to death," so to speak. None but expert anglers, however, can usually show results for their efforts. Tradition has it that the Indians of the valley are the only fishers for trout who have been successful to any extent. The Indians are essentially market fishermen, and supply the hotels and camps with almost all of the "fresh trout" in the valley hotel cuisine. That the Indians are infallible has been proven a myth time and again, when the knowing angler went after trout. Good fishing in the valley is now to be found only at remote waters, where the general run of visitors do not care, or do not know, where to go. Joseph Leidig is a young man who was born in the valley and is a most skilled angler. Leidig knows every stream and rock in the Yosemite and Hetch-Hetchy valleys.

John Butler returned from Castella on Wednesday. He spent a week at that point enjoying some spirited fly-fishing.

Trout fishing at that point must be excellent, or will be until the spawning salmon arrive up river, for Judge K. M. Jackson, among others, has caught many fish there. Last week Mr. Fred M. Haight received from the judge, a rainbow trout, that weighed dressed 5½ pounds.

Salmon are running plentifully at Santa Cruz, Capitola and Monterey. Many fine heavy fish are being taken daily by anglers out in boats, the Wilson spoon seems to be the tempting tid bit (?) for the fish just at present.

Otto Feudner and Ed Schultz stopped over at Rogue river on their return from the Northwest tournament at Portland. They spent several days on that grand Oregon trout stream at and near the fish hatchery some thirty-three miles from Medford, Or. Mr. Malcolm S. McKeown, a Metford business man, looked after the two anglers while in his hall-wick and they received royal treatment.

The fishing was excellent, many large-sized rainbows were taken. The Rogue river fish are "dead game sports" (after getting in the creel), they strike with a rush and put up a lusty fight, and our two shooters had most enjoyable sport.

Trout fishing is still reported to be good in the Santa Clara valley and contiguous Coast streams.

Al M. Cummings at last accounts was at Webber lake and having great sport with the trout.

Independence and Tahoe lakes are both inviting now to the angler, the fishing is first-class.

TRADE NOTES.

AVERAGES REPORTED.

Rochester, Ind., June 1st and 2d, W. R. Croshy, first general average, 384 out of 400, shooting "New E. C." (Improved). R. O. Helkes, second general average, 371 out of 400, shooting "Du Pont." W. D. Stannard, third general average, 370 out of 400, shooting "Du Pont." H. M. Clark of Wahash, Ind., 362 out of 400, "Du Pont."

Chicago, Ill., June 3d and 4th, W. D. Stannard, first general average, 359 out of 380, shooting "Du Pont." F. C. Riehl, second general average, 356 out of 380, shooting "New E. C." (Improved).

Sioux City, Ia., June 6th, 7th and 8th, Fred Gilbert, first general average, 579 out of 600, shooting "DuPont." Frank Riehl, second general average, 556 out of 600, shooting "New E. C." (Improved). R. Barber, first amateur and third general average, 551 out of 600, shooting "DuPont." Russell Klein and F. Bills, shooting "DuPont," tied for second amateur average, 550 out of 600.

Bozeman, Mont., June 9th, 10th and 11th, J. C. Drumgoole of Anaconda, Mont., first amateur and second general average, 245 out of 265, shooting "Infallible." E. F. Confar, of Livingston, Mont., second amateur and third general average, 244 out of 265, shooting "Infallible." F. M. Bybe of Idaho Falls, Idaho, and R. youlds Fraser of Helena, Mont., tied for third amateur average, 242 out of 265, shooting "Infallible."

PETERS' POINTS.

At New Berlin, Ohio, May 30th, first average was won by Mr. E. F. Haak, third by Mr. F. A. Smith, and fourth by Mr. D. D. Gross, all shooting Peters' factory loads.

At Columbia, Pa., May 30th, Mr. Neaf Apgar broke 99 out of 100 with Peters' Ideals. Accounts do not state why he missed that lone target.

At Chicago, Ill., June 3d, first professional average

was won by Mr. W. Stannard, and first amateur average by Mr. A. Mollé, both shooting Peters' factory loaded shells.

Quite a remarkable score was made on the grounds of the Indianapolis Gun Club, June 3d, by Mr. G. M. Kanouse of St. Paul, Ind. He was high man for the day, breaking 96% and attributed his excellent score to the use of Peters' factory loaded high gun shells.

At Ardmore, Ind. Ter., June 5th, 6th and 7th, Peters' shells were decidedly in evidence. Mr. C. F. Renst was high amateur and Mr. J. S. Day high professional.

At Dublin, Ind., June 8th, Mr. C. A. Young was high gun, Mr. L. H. Reed second, and Messrs. Kirby, Peters and Clark tie for third. The entire bunch using Peters' shells, of course.

On June 9th at Ruffsdales, Pa., Mr. R. S. Denniker won high average, Mr. Ed Hickey second, and Mr. Robert West, third—all using Peters' factory loaded shells.

A SPLENDID 16-GAUGE SCORE.

One of the greatest scores that has come to our notice of late, made with a sixteen bore gun, was the performance at Trinidad, Colo., on June 15, Mr. F. W. Caldwell, shooting a 16-gauge Parker gun, made a score of 72 out of a possible 75, making a straight score of three twenty-fours out of a possible twenty-five. This is a wonderful performance with a 16-gauge gun, and a short time previous Mr. Caldwell broke 48 out of 50 at 16 yards with his 16-gauge Parker.

At London, Ont., Mr. Harry Marlott, with the Parker gun, on June 8th, at 17 and 21 yards rose scored 162 out of a possible 175, winning high average. This is a pretty good record.

Mr. S. C. Yocum of Shamokin, Pa., at the Shamokin Gun Club broke 47 out of 50 and 96 out of 100. Mr. Yocum is strictly an amateur and is a staunch supporter of his "Old Reliable" Parker.

At the Ohio State tournament, Canton, O., D. A. Upson, shooting a Parker gun, won first general average for the three days, with 476 out of a possible 500. F. H. Snow shooting a Parker gun also, was second with 474 out of 500. Frank D. Alkire made the longest continuous run during the tournament of ten days with high amateur average for the third day, losing 8 only out of 235. R. R. Rhoades with a Parker gun won high amateur average the second day, losing only 5 birds out of 160.

The "Old Reliable" Parker was much in evidence, and such records as above prove absolutely that the Parker is the winner of the age.

MERIT ALWAYS COUNTS.

A. J. Webb shoots an L. C. Smith gun. Webb won high average at the recent Northwest Tournament at Portland, he also won the diamond individual championship, made ten straights in various events.

On July 2nd at the Ingleside grounds he won the Phil B. Bekeart perpetual challenge trophy for the third time.

HIGH HONORS AGAIN FOR U. M. C.

At Ingleside, June 2nd, the regular monthly shoot of the Golden Gate Gun Club was held. Twenty-three shooters faced the traps. The chief event of the day's meeting was the contest for the Bekeart Cup—a very pretty race and closely contested by Messrs. Webb, Feudner, E. Schultz, C. C. Nauman and C. A. Haight. Mr. Webb winning out with 90%. Without exception the shooters in this event used U. M. C. ammunition exclusively. It should appear unnecessary to further emphasize the value of the U. M. C. products, a simple statement of the continued use by experts being sufficient, to prove the sterling qualities of accuracy and genuine popularity. Of the twenty-three contestants in the regular shoot, twenty were exclusive users of the U. M. C. ammunition.

AN IMPORTANT BUSINESS CHANGE.

The following circular letters received this week are self-explanatory and will be read with interest by many of our readers.

Mr. Phil B. Bekeart, President of the Phil B. Bekeart Co. states:

I beg to advise you that I have sold out my Tire Agencies and Tire Repair Shops, both in this city and in Los Angeles, to The Fisk Rubber Co., who after July 1st, will conduct these branches for their own account.

In justice to myself and The Fisk Rubber Co., I deem it proper to state that I resigned from the Fisk Agency, for the following reason:

I could not handle the increased business of the Fisk Rubber Co. and still do justice to my largely increased gun business.

I intend in the future to confine myself to my gun and sporting goods business. Before ceasing our business relations, I take this opportunity of thanking you for past favors, and of bespeaking your continued interest in the future, for The Fisk Rubber Co. and the Firestone Tire & Rubber Co.

The Fisk Rubber Co. announces through Mr. G. E. Johnson, Pacific Coast Manager: We beg to advise you that on July 1st, we will open a branch in this city, temporarily located at 146 Second St., second floor, pending the completion of a building now being erected for us at 409 Golden Gate avenue, where we will handle our own account on the Pacific Coast.

This change has been brought about at request of the P. B. Bekeart Co., who formerly handled our account in this territory, for reasons with which you are already familiar, through notice from them. We wish to thank you for past favors given us through the Bekeart Co., and can assure you that with our policy to make the best goods possible, regardless of cost, and with building constructed for our use we can give you both goods and service, of which there will be no cause for complaint.

The Phil B. Bekeart Company conducts the Coast Branch of the Ithaca Gun Company.

The Babcock Test.

One hundred pounds of milk consists of approximately eighty five to eighty six pounds of water and fourteen to fifteen pounds of solids of which in round numbers nearly one-third is butter fat. The Babcock test is simply a chemical means of measuring what proportion of milk is fat. A fair sample is measured into a bottle and an equal amount of sulphuric acid breaks up the solids not fat, leaving the fat to raise into the neck of the test bottle by means of centrifugal force developed in the tester.

In the process of churning the fat is collected together during which more or less water is imprisoned in it, also a little curd: the salt is added to it in the process of working so that butter contains something in addition to pure fat. A given quantity of fat will therefore make more butter than the actual pounds of fat. This amount of butter made more than the fat is commonly spoken of as over-run and will vary from ten to fifteen per 100 pounds fat in ordinary creamery. It might through carelessness be entirely lost so that the churned butter would not be greater than the amount of fat in the milk delivered. Again under varying conditions which are not as thoroughly understood as is desired, it may run more than fifteen pounds.

The question to whom this over-run belongs is one that is often raised. I believe that the simplest method of accounting is about as follows: Supposing for instance the milk tested four and four-tenths. It would therefore contain four and four-tenths per cent butter fat. 1000 pounds of this milk would bring to the creamery 440 pounds fat. If this made up into butter produces 506 pounds of butter there would be fifteen per cent over-run. Supposing this 506 pounds of butter to be sold when butter was worth twenty-eight cents a pound the creamery would receive \$141.68. From this the creamery must pay its running expenses and pay for the fat. This may be done in either of two ways. The actual expense may be deducted from the total receipts and the balance divided among the patrons on the basis of fat delivered, or if the creamery either a private or stock company, agrees to make the butter for fixed price per pound, from three and one-half to four and one-half being a common charge, for the sake of illustration we will deduct four cents a pound for making. This on 506 pounds of butter would amount to \$20.24, leaving \$121.44 to be divided among the patrons. Since this is the amount that 440 pounds of fat is worth, one pound of fat would be worth 1,140th or 27½c. Each patron should therefore receive 27½c a pound for each pound of fat delivered by him.

In the case of a stock company, should the amount deducted at four cents a pound for making be more than enough to pay freight, commission, labor, fuel, repairs, etc., the balance may be held against a time when new equipment is needed or it may be apportioned among the stockholders as a dividend on the money they have invested. It is fair in either case since the patrons have received all the proceeds of the sale of their product less the four cents which the creamery was to get for making, and they get this whether the over-run be large or small.

It is to the interest of the creamery to have as large an over-run as possible. The more pounds of butter there are sold the larger the receipts for making. On the other hand there is no encouragement for them to either to raise or lower the test because their receipts are not influenced by the results of the test, as the pounds of butter made depend on the

pounds of fat actually delivered not on what the test shows.

With the present prices a good four-hotted tester is within the reach of any farmer who is milking four or five cows. He should have one not only to know whether or not the test is being correctly made at the creamery, but to know what his individual cows are doing. The difference in the cost of keeping different cows in a herd will as a rule not vary over \$10 on an ordinary farm, while the returns per cow will vary as much as \$3 or \$40 between the best and poorest. It is not an uncommon experience to find one cow not even paying for the feed she eats, to say nothing of having a margin for interest and depreciation. This is a matter that needs attention.

A man who keeps five or six cows as a side line can no more afford to keep an unprofitable cow than he who is keeping twenty as an important part of his business.—H. E. Van Norman, Indiana Experiment Station.

American Bacon Hogs.

Our bacon hog differs considerably from the English bacon hog. There is, however, a growing tendency toward the typical bacon type. The indications point to the fact that we are at the "parting of the way," and that in the future, we will have a place for the ideal bacon hog as well as for the fat or lard hog.

Corn is at present being used for other purposes, such as the manufacture of corn starch, whisky, and oil. The latter is used for various purposes, as for lubricating, a table oil, as a substitute for olive oil, linseed oil, etc. This has caused the price of corn to go up to nearly what other grains, used as hog feeds, are worth. At the same time, a ration of all corn, which usually forms the principal part of the feed of the fat or lard hog, is coming to be generally recognized as detrimental to the best development of swine from the breeder's standpoint. These things are the cause of a gradual drifting toward a more mixed ration in swine feeding, and usually a ration containing more protein or flesh forming material. Coupled with this, there is not so great a demand for fat pork as there formerly was, and shipping and cold storage facilities are much better, consequently more fresh and lean meats are used.

These various factors are gradually, but most surely effecting a change in the character of swine in the United States. The all fat hog of the past will in the future be partly replaced by the bacon hog, and the fat or lard hog as a whole will in the future more nearly approach the bacon hog in form than in the past. Of course, there will always be a demand for lard, consequently there will always be a place for the fat or lard hog. But the bacon hog will occupy a more prominent position in the future than he has in the past.

There is a demand from foreign countries and more largely from our own country, for bacon, and there being few bacon hogs to supply the demand, the trade is supplied from the lighter hogs of the fat or lard hog type. This bacon however, does not command so high a price on the market as does bacon from typical bacon hogs. The bacon hogs under consideration here weigh from 155 to 195 pounds, and range in age from six to eight months. They are simply hogs selected from the light hogs in general, that conform as nearly as possible to the bacon type. They are not very fat, have fairly good development of muscle, or lean meat, and are as long and deep inside as is possible to obtain them. About 20 per cent of the light hogs that come to the Chicago market are of this type.

Choice bacon hogs are the best of this class; they are hogs that show good length and depth, good quality and are smooth, well developed, and not very

fat. They are hogs that have had considerable exercise and have not been fed on an exclusive corn ration. These bacon hogs are selected for the most part from shipments that come from outside of the corn belt, where the principal feed is similar to that used in Great Britain, Denmark and Canada for bacon production, viz., oats, barley, rye, peas, skim milk and pasture.

These are the feeds that are conducive to the production of the best bacon when fed to hogs of the bacon type, and when fed to hogs of the fat, or lard hog type bacon hogs such as we have under discussion here are produced. These bacon hogs have more fat on the outside and less lean meat on the inside of their carcasses than the typical bacon hogs, but are better in these respects than the typical fat, or lard hogs. In truth, this bacon hog is an intermediary between the fat or lard hog and the typical bacon hog, being more like the former than the latter.

The good bacon hogs of this class may be of poorer quality, may be lower in condition or may be too fat or too much of the fat hog type. Any one or all of these conditions would be the cause of hogs grading lower than choice.

If there is a still more marked deficiency in these characteristics, the hog will grade as a common bacon hog. But this hog has sufficient quality and condition to show that he has been well fed and has been fed so that his sides will do to cure for the cheaper grades of bacon.—William Deitrich.

Dairy Notes.

By keeping the cows clean there will be little danger of stringy milk.

The cow that tests below 3 per cent butter fat is not worth keeping in the dairy herd.

The more study the dairyman puts into his occupation the more success will be attained.

Keep things about the farm dairy clean. Elbow grease costs effort but it's worth the candle when it comes to clean milk, clean separators, clean butter and a clean trade.

The enormous sales of cream separators show the value of the separator on the farm. The warm skim milk for feeding purposes soon pays for the cost of a machine.

Sorghum planted this month in rows and cultivated like corn, then shredded for winter cow feed makes a good milk producing food in the winter time.

To make profits with dairy butter, have the cream ripened properly, churn at the right temperature, wash the granulated butter until the butter milk is removed, work the butter just enough, salt with judgment and pack neatly.

The dairy cow and the hog make an excellent combination. Not only do they pay well but they take little fertility from the farm. Let us have more "cow-hog" combines and then we will hear of less farmer farm-separations.

Where calves are "brought up by hand," so to speak, the rule to stay by first, last and all the time is: Keep everything clean and sweet, feed regularly and carefully, and use kindness above all.

If you are feeding skim milk to calves, don't make the mistake of feeding a larger quantity than you would feed if whole milk were given them. This is a mistake that so many make, and the result is that their calves are troubled with scours.

The dust and air of most cow stables is loaded with bacteria, and when they get into the milk they multiply at the rate of millions per minute. The milker's duty to his family and to humanity in general when he is milking is a serious matter.

Is the air in the stable pure and free from dust during milking? Would he be willing and glad to get a plate of soup while he is milking a cow? If not, why not? Isn't milk a human food, and isn't the milk pail that is under the cow being

filled with food for his table?

After cleaning out the cow stable at least twice each year, sprinkle plaster over the floor to aid in absorbing the liquid and in preserving the wooden floors. Cement floors do not need plaster as they may be flushed with water from a hose. Cement mangers and iron stalls are now put into cow stables and are proving very satisfactory.

Dehorning of Cattle.

Professor Spellman of the Agricultural Department, declares it is possible to dehorn a whole breed of cattle by introducing into the breed a single pure polled animal, though this would require more inbreeding than is desirable. The problem is much easier when a number of breeders work in parallel lines, so that strains are always available that are not closely related. The only difficulty in applying the principles of Mendel's law in dehorning a breed of cattle arise from the fact that the hybrid animal is itself polled, although it is capable of transmitting both the polled character and the horned character to its offspring.

The general principle to be used as a working basis is the important fact that when a number of crosses are secured between polled and horned animals and these crosses themselves are crossed, one-fourth of the progeny will be pure polled animals incapable of transmitting horns to their progeny, and these pure polled animals are to be used as a basis upon which to build a polled breed.

It is entirely practicable for every breeder to secure enough of these pure polled animals as a basis on which gradually to work out the horned animals and increase the pure poll until they constitute his entire herd.

Raising Calves by Hand.

Improvements in stock and methods of feeding young calves have resulted in new ideas in regard to raising calves by hand. Every one who has tried it has experienced difficulty in keeping them thrifty and in securing reasonable growth. It is quite possible by observing the little necessary things to raise calves just as well by hand as in the natural way. Cleanliness about all utensils and care in feeding the milk warm, with judgment as to quantity, seems to cover the ground.

It is possible to raise calves profitably on warm separator milk by substituting whole oats for the cream removed. One of the advantages in hand raising is that after the calf is grown sufficiently to go on dry feed it does better than a calf raised by the cow. Early maturity no doubt is hindered by hand feeding, but it is made up fully or nearly so by educating the calf to hustle for itself to a certain extent. A few years ago the idea of making baby beef out of hand fed calves was considered absurd, but in the past two years this has come to be an established custom in certain dairy sections. Holstein calves are fed by hand and turned off as profitable baby beef at the age of from sixteen to twenty months, and they have been made to gain an average of 1¾ pounds per day, figuring from birth.

Daedalion 2:10 For Sale.

Can Beat His Record Three Times in a Race.

Is entered at Fresno and ready to start. A high-class Race Horse and a Coming Sire.

Sire, DIABLO 2:09 1-4.

Dam GRACE (dam of DAEDALION 2:10, Creolo 2:15, Eagle 2:19, etc.) by Buccaneer.

Owner's business will not permit him to devote any time to racing. For further particulars address

BREEDER AND SPORTSMAN.

FINE ROADSTER FOR SALE.

CHESTNUT GELDING, FIVE YEARS OLD, 16 hands, well broken to harness and also to saddle. Has trotted quarters in 37 seconds. Is not afraid of automobiles and is a fine lady's horse. His sire is Nutwood Wilkes and his dam by Eros. For price and other particulars address J. TWOHIG, Irvington, Cal.

Treatment of Colic in Horses.

Colic is the name given to abdominal pains, no matter from what cause. There is probably no disease, aside from the strictly contagious diseases, which causes so great a financial loss to stock owners as does colic, writes Dr. Barnes of the Kansas agricultural college.

There are a great many causes of colic, but improper food and water are the main ones. Good food and water given either at irregular times or in too large quantities may cause colic. Highly concentrated foods, such as peas, beans, corn, etc., which are difficult to digest, are also fruitful causes of colic.

There is generally more of this disease in the spring when there is an extra amount of work to be done, and the horses are given large feeds of grain to which they are not accustomed. In these cases more work is done by the animal system and the body also has additional work thrown upon it in using this unnecessary food. The stomach and intestines are the organs most easily deranged in colic.

Irregular feeding will bring on this disease. The animals go too long a time before eating, and then when allowed to eat, gorge themselves. The stomach being in an exhausted condition cannot take care of this enormous amount of food.

Other causes of colic may be mentioned, feeding an animal first and then watering him, causing the grain to be carried undigested into the intestines before it is ready for the action of intestinal fluids; sudden changes in the grain; feeding while the animal is exhausted; new grain or hay, also sour food; sucking wind into the stomach, eating stones, sand or sandy food; constipation; worm in the intestines; inflammation of the intestines, kidneys or lining of the abdomen; rupture of navel or scrotum; eating irritants, as chemicals, and lead poisoning.

The first symptoms of colic observed in a horse is pain expressed by restlessness, pawing, kicking the belly with the hind leg, switching the tail, looking at the flanks, rolling and throwing himself violently down and then jumping up again lying on the back, refusing food, straining to pass water and manure.

If the colic is caused by fermenting foods, the animal will bloat. The temperature and respiration are about normal but in spasmodic colic respiration is hurried during the spasm.

Food and water should not be given a horse at meal time until he is cool. He should not be allowed to stand in a draft after he has been overheated. Unless the weather is warm, a woolen blanket ought to be placed over the animal to absorb the sweat. After he is cool give him water, next a feed of hay, and lastly the grain.

A horse should not be allowed to remain in the stable several days without exercise and receive the same amount of food as when working. New grain must be fed sparingly at first to avoid indigestion.

During hot weather the water should be run into a tub and warmed by the heat of the sun before the horse drinks it at the noon hour or at night.

Always water horses before and not after feeding. A point to be emphasized is regular feeding and not abrupt changes in the nature of the feed. Horses should not be put to active work immediately after a meal.

In treating for colic first of all put the patient in a large stall with plenty of straw. If a stall is not available, put him in a yard which can be well bedded. A colic patient should have some competent person to attend him constantly. If the weather is cold, blanket him. Just as soon as possible give a medium sized horse a quart of raw linseed oil. Then if the animal has cramp colic (spasmodic colic) give one-half ounce chloral hydrate in a pint of water. In an hour give another dose of chloral if the animal continues to show pain. An hour later give

two drachms fluid extract Cannabis Indica, one-half drachm fluid extract Belladonna in a half pint of water, even though the patient may seem easier. If the horse becomes violent again it may be necessary to resort to the chloral in half ounce doses.

In buying the chloral it is well to have the druggist put it up in half ounce packages. Be sure to give the oil first, as the object in all kinds of colic is to get rid of the substance causing the trouble. If the horse has wind colic, after giving the oil, then give one-half drachm fluid extract belladonna, one ounce turpentine and a half drachm of fluid extract of nuxvomica in a pint of milk. Walk the horse around and aid him to pass wind by rubbing the belly with wisps of hay or straw. If gas accumulates to such an extent that it is necessary to puncture the intestines, use a trocar and canula. This instrument is boiled for five minutes or more and when cool is introduced into the intestines on the right side of the horse in the center of the triangle formed by the hip bone, last rib and the bones running at right angles at the back bone.

Summer Care of the Milch Cow.

A point in the summer care of the milch cow that is of vital importance and which is very frequently overlooked is that of keeping her up to her normal flow of milk. It is an oft-proved fact that the cow which is allowed to shrink for want of sufficient feed or protection from heat and flies cannot be brought back to her normal flow when these adverse conditions are passed and good feed and favorable conditions are again supplied, writes Prof. Van Norman in *Orange Judd Farmer*. If she is allowed to shrink four or five pounds per day for days or weeks at a time, good feed may increase this a pound or two, but it will not bring it back to the former mark.

This fact emphasizes the importance of something to supplement the scant pasture in the summer time. It will pay to plant a little early sweet corn, to be followed by the regular field corn. Often where there is plenty of silo capacity, there will be silage left from the winter feeding. This, if left undisturbed, will mold on the surface, but when pasture gets short this bad layer can be thrown off and the silage is ready for use. It is important at this season of the year that at least two inches be removed every day, as the warm weather causes a very rapid fermentation and sour silage is not a desirable food.

If it is possible to provide a dark shed, where the cows may go in the middle of the day and avoid the sun and flies, it is a most profitable provision. Most dairy-men find it desirable to continue the grain ration throughout the summer, reducing the quantity when the grass is lush and lessening the proportion of corn and other heating feeds.

Most cow owners have something on the farm which they can feed to supplement pasture. The important thing is to do it. Do not allow the cows to shrink, as a shrinkage of two or three pounds a day is not merely a loss for the time being, but is very much less throughout the remainder of the season. Make your plans now to prevent this loss. Have a patch of corn where it is the least trouble to get it to the cows. Everyone can at least do this.

No one is so well situated to raise thoroughbred fowls as the farmer. Plenty of room, plenty of fresh air, plenty of green stuff in summer and clover and waste vegetables in winter, are advantages he has over half the fanciers. He can raise his fowls cheaper, keep them cheaper and they will be larger, hardier and more vigorous than those of the breeder who must keep both his old and young stock in contracted quarters the year around.

Sponges. S. Adderley, 307 Market St

Capons May Be Easily Grown.

No one is better situated to raise capons than the farmer. On the average farm the additional work required to raise from 100 to 200 capons would not be noticed, and most of this work can be attended to in the winter when time is plentiful with the farmer.

In the neighborhood of Fairbury, Ill., a great many capons are raised every year, and are found to be very profitable. There are many stories told about the sizes to which capons grow, while the truth is that the ordinary capon will grow to but one or two pounds more than the ordinary uncaponized cockerel would in the same time, and to secure this additional weight extra feeding is necessary.

In preparation for capon raising it is wise to hatch about twice the number of chickens as capon desired, for fully half are likely to be pullets. The pullets may be kept for egg production or may be sold for spring chickens, thus securing enough money to pay for the raising of the whole flock up to the time the cockerels are old to caponize—which is about twelve weeks.

The operation of caponizing does not require much skill, though the beginner will probably kill two or three at the start, which will not be lost, for they bleed to death in about the same time as if their throats had been cut, and are exactly as good for table purposes as if bled in the latter way. A set of tools for caponizing costs from \$1.50 to \$2, and with each set is sent directions that anyone can follow.

After the caponizing the cockerels become quiet and docile, and when fed they eat their fill and sit quietly around until feeding time again. Capons always retain that sweetness and juiciness of flesh that is characteristic of the spring chicken the reason why they bring such high prices. They are fed much as other fowls would be, only eating more. About all they eat goes to the formation of juicy, palatable flesh. They are ready to sell February 1st, and the demand for them keeps up as long as they can be bought.

A few years ago capons commanded hardly any attention in the west, and do not yet bring the prices they do in the Eastern cities. As the average Plymouth Rock capon will weigh seven or eight pounds, it will be seen that the capons sell for from 40 to 50 cents more than the chicken of the same age, and the difference in the cost of raising is insignificant. —Exchange.

Hens Need Lime.

Hens that get so crazy for egg shells usually have been improperly fed and they crave lime.

Hens in their natural state produce very few eggs and require little lime for the manufacture of shells. By careful breeding, conditions have been arbitrarily changed until a good hen will now produce six times her own weight in eggs during the year. It takes considerable lime to make shells for so many eggs and unless this is provided for, the hens acquire an abnormal appetite and will eat egg shells or anything else that will satisfy them.

Hens that have once acquired the habit are difficult to handle afterwards because they never forget. Unless hens are extra valuable probably the easiest way out of it is to take their heads off; then be careful about feeding the pullets that are coming on to take their places.

Contrary to general impression, the fewer eggs a hen lays, the more are they likely to be infertile, if we can judge anything from experiments carried on at the Maine station. There an attempt was made to breed downward in egg yield as well as upward. The experimenters were surprised at finding an unlooked for obstacle namely, the infertility of the eggs from hens producing the fewest.

Sober up on Jackson's Napa Soda.

Finish for the Block.

By proper finish in an animal of any kind we mean that the muscles of it have been properly and extensively enough expanded to warrant good returns when cooked. If the animal is only "warmed up" with feed, but not finished, we are likely to find the cells of the muscles very flaccid, and when cooked results will show a decided loss due to the evaporation of water, says *Kimball's Dairy Farmer*. If, however, the animal is overfatted another condition presents itself. The cells now are expanded, and among them are laid large flakes of fat. So extensive are these that in cooking a great loss here also occurs. This loss is not due to that of water, but of oil. The meat from such a piece, in addition to being extremely rich, producing nauseating affects in some cases when eaten often, tends to become stringy.

The hog when properly finished is firmer than before or after that point has been reached. To tell just when it is attained requires some experience, but it can be done with great skill after a little training. A great many buyers are not discriminating against improperly finished hogs, so much as one might expect, but a nickel to fifteen cents per hundred weight is not unusual. If we were to make cuts in prices such as we are warranted in making after having observed the results of the cooking test, they would, in all probability, be much heavier than those indicated above by two or three times.

The time is fast approaching when finish will cut as much figure as quality; in fact, part of the discriminations that are now laid against quality are in reality laid against finish. The time to learn is before the war has begun. A more opportune time than now cannot be found.

We shall soon have the cement silo as a common thing on western farms. The cement floor for barns and stables is already here, and is now being used at a lesser cost than floors made of plank, while infinitely more durable. The cement water tank is also coming to the front as every way better than the old wooden stave tank. We hear of quite a measure of success being attained in the use of the large sized drain tile, while the cement road culvert is unquestionably the best and cheapest type of culvert to construct. The manifold uses to which cement may be put on the farm invite the attention of the progressive farmer.

In feeding for butter it makes a great deal of difference what kind of a cow the feed is given to. If it is given to a cow of beef type, the butter costs about twice as much as if given to a cow of dairy type. The difference is in the cow rather than in the feed or the milker or the churn.

Warranted to Give Satisfaction.

Gombault's Caustic Balsam

Has Imitators But No Competitors.

A Safe, Speedy and Positive Cure for Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a Human Remedy for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. 17 Send for descriptive circulars, testimonials, etc. Address

The Lawrence-Williams Co., Cleveland, O

Time to Market Swine.

It requires nice judgment to determine when pigs have reached the profitable limit. The original cost of pigs, their rate of development and the cost of feed all have to be taken into consideration. Sometimes it is better to sell pigs at six months of age, at other times the increase in weight is profitable up to nine or ten months. As the age increases additional weight is made at an increased cost and this increase is proportionate to the age of the pig. The greatest gain in proportion to cost is made during the first four or five weeks of the pig's life, as the pigs are at that time supported almost entirely by the sow. Generally speaking when other pigs are coming on to take their place it is better to dispose of the porkers at about eight months. The cost is greater each month whether the growth of the pig is rapid or slow.

Our South American agricultural neighbors are learning the value of foreign markets and availing themselves of them more and more each year. Argentine is breeding up her cattle to a standard that threatens more dangerous competition to our own in foreign markets and great quantities of butter are now shipped to England from the fertile plains of Uruguay.

It has been known that a good cow has become a mediocre, because of a change of masters and milkers. One loved the cow and the work, the other had no taste for either. The cow felt the difference and would not respond.

No. 1½ "Jersey" Cut-Under Truck

This Truck is the result of years of endeavor to produce a wagon that has great carrying capacity, ample strength without superfluous weight, low enough to the ground to minimize the labor of loading.
Can turn short among trees, and can be used on the roads as well as on the farm.

The "Jersey" is a pronounced success, not only for the transportation of fruit, but as a general purpose dray in villages and small cities.

"SAVE-THE-HORSE"

TRADE MARK

SPAVIN CURE

"It works different from anything I ever saw." Every user remarks this fact:

It accomplishes what veterinarians and horsemen previously declared impossibilities.

It has power and properties so marvelously effective that it is perfectly safe for us to give a written guarantee, a contract, which protects you fully to treat any case named in the Guarantee.

Do not give up any case of Spavin, Ringbone, Thoroughpin, Curb, Splint, Capped Hock, Windpuff, broken down, bowed or strained tendon or any case of lameness until you read our booklet and letters.

Do not fire or blister your horse, write and describe your case.

Horse can be worked as usual and with boots, as no harm will result from scalding of limb or destruction of hair, and without leaving a scar or blemish.

\$5

PER BOTTLE. Written guarantee with every bottle constructed solely to satisfy and protect you fully. Need of second bottle is improbable except in rarest cases. Copy of guarantee, book and letters on every kind of case sent upon application. At all druggists and dealers, or sent express prepaid.

San Francisco, Saturday, July 15, 1905.

BREEDERS OF HARNESS HORSES on the Pacific Coast, those who have money invested in stallions, brood mares and stock farms, should be active in the promotion of harness meetings. They are the ones most concerned in keeping up the interest in harness horses, either for road or track use, as this interest is the main cause of maintaining values and keeping them at a profitable point. It is the reputation for speed and gameness which his get obtain in races that causes the produce of a stallion to sell for good values at private sale and in the auction ring, and therefore every stallion owner should do everything in his power to promote race meetings wherever they are held according to recognized rules. There are thirty counties in California that should have harness meetings every year, and if the trotting horse breeders who reside in those counties would only display a reasonable amount of energy and enterprise, there would be a California circuit which for class and number of horses could not be equaled by more than two or three States in the Union. The day of the big stock farm has almost passed and the small breeders are the ones that must supply the markets in the future. It does not matter how much money one of these smaller breeders has invested in his stallions and mares, unless the produce of his farm can show speed on the training track or in races there will be no demand for them beyond that of road and carriage use, and unless meetings are numerous and a good California circuit organized, there will be few owners who will train after purchase. It is only the exceptional horse that will be taken across the Rocky Mountains to be raced. Without a circuit of meetings the vast majority of trotting bred colts will only be broken and used for road or other working purposes and racing and records will be unknown to them. Consignments to the big auctions will not be profitable for breeders, as horses without known speed or whose relatives are not showing speed, will not bring the high prices. It is the few crackerjacks that sell for large sums and that make the average price of a consignment high and profitable. Without speed contests to prove to the world the qualities of the trotters and pacers on the farms, breeders may as well quit breeding for speed as there will be no use nor demand for it. There is a general complaint in California that the breeding done this year was far less than last year's record, and this state of affairs can be directly attributed to the falling off in the number of fairs and race meetings since the agricultural districts were refused aid by the State. If breeders desire a revival in breeding, and also of the interest once displayed in harness racing they must do something themselves to promote them. A great meeting closed last week at Los Angeles. It has attracted the attention of horsemen all over the country to the horses that obtained records and to the stallions and mares that produced them. The winning of the three-year-old trot by Princess Louise wherein she gained a record of 2:19, has done more to prove to the public that Coronado 2:12½ will be a great producer, than all the hot air about him that could be blown through newspapers and other advertising mediums for months. His purses won and records made by his colts that makes a stallion valuable. It is the excitement and pleasure of racing and the expectation of winning that causes men to pay out money for service fees, training, harness, hicks, shoeing and feed. It is money hung up in purses that makes the horses go and keeps up the breeding business, and unless those who have money invested in stallions, mares and stock farms see to it that more meetings are given, they will find that their property is lessening in value. There is an old saying and a true one that the good Lord does not help those who do not help themselves.

IN THE DEATH of Blaine S. McMahan, the BREEDER AND SPORTSMAN has lost from his staff one of the brightest minds that ever guided a pen to furnish news for its columns. He had been connected with the journal since the first of March this year, and from the day he first entered the office his genial personality, his frank open manner and a deep interest in his work made him esteemed and loved by his associates. He was a great lover of horses and being a close observer his descriptions of them and their contests were accurate and fair. His big, generous heart never permitting his pen to indite harsh criticisms or unkind words of anyone. He was a young man, about 25 years of age, of handsome form and feature, with a cheery disposition and laughing eye that banished care and sorrow from every group of which he was a member. Yet he was not frivolous in the least, but of an earnest, cheerful, hopeful, bappy nature, honest and faithful to every trust, a wholesome, hearty, lovable young man. He came of excellent stock, his father the late Dr. McMahan having been for many years a practicing physician and leading citizen of Rushville, Indiana, and his heart-broken and widowed mother and loving sister now reside in Indianapolis, where he "grew up" as it were in the office of *The Western Horseman*, and was regularly employed there until he came to California last winter. It is an awful thing for a bright and promising young man to be taken by death from a loving mother, but when cut down so suddenly and so far from home, the blow is doubly terrible and severe. Blaine McMahan had made hundreds of acquaintances since coming to this State, and from each and every one there will go out to that mother and sister in far off Indiana, the deepest sympathy that can be felt by human hearts for their awful and irreparable loss. May a kind Providence sustain them in the hours of their deep affliction and the knowledge he some comfort to them that their manly son and brother so endeared himself to those he met during his short life out here by the sunset sea, that they deeply and sincerely mourn his death and will always hold in fond remembrance their acquaintance with one who by his noble attributes had earned their highest respect and esteem.

A SALE OF HORSES of more than usual merit will be held by Fred H. Chase & Co. (successors to Killip & Co.) at their salesyard, 1732 Market street, this city, during the evening of July 24th. These horses are consigned by two breeders—the Occidental Land and Improvement Company of Sharon, and Mr. C. E. Needham of Bellota. The first named has used the stallions Teberan 2:24 and Ilderim in breeding harness horses, selecting them for the fine conformation, style and action, and mating them with mares of the same qualities and that showed speed. They have been very successful, and the horses to be sold are well proportioned, handsome young animals. Mr. Needham has long been a breeder of fine horses, his mares nearly all being of Morgan stock, which is now more popular than ever with breeders. He has used the stallions Steve Whipple 2:12, Directed (a son of the great Director 2:17 out of the dam of Steve Whipple) and Guy McKinney, one of the best bred McKinneys living. There are several colts in the consignment well entered in stakes—one of them in \$57,000 worth, another in \$10,000 worth. Send to Fred H. Chase & Co., 1732 Market street, for a catalogue.

Horrible and Fatal Accident.

Last Wednesday evening at 9:50 o'clock Blaine S. McMahan, formerly of the *Western Horseman*, Indianapolis, but during the past four months associate editor of the BREEDER AND SPORTSMAN, was instantly killed at the Southern Pacific depot at Fresno, and Willard Zibbell, son of Mr. and Mrs. J. W. Zibbell of this city was so terribly injured that one foot and both hands had to be amputated. The following account of this dreadful accident is from the Fresno *Republican* of Thursday morning:

"The accident in all of its circumstances is a sickening one. The two young men were around town during the evening chatting with friends and assisting in the preparations for the meet of the Pacific Coast Trotting Horse Breeders Association next week. But a few minutes before the time of the accident, they had visited the editorial rooms of the *Republican*, where McMahan had left an article descriptive of some of the horses that are to race here, which article appears in another part of this paper. They then went down to the station to look into the matter of the arrival of some of the horses in which Zibbell was interested. A few minutes later, their friends learned that McMahan was a mangled corpse, and that his companion was maimed and crushed almost beyond hope of recovery. The accident occurred at 9:50 o'clock. No witnesses to the occurrence have been found except the members of the switching crew. Yard Master Crowley for them has given out the following statement of what happened:

The switch engine with Engineer Lawrence and

Engine Foreman Williams was coming north between Kern and Tulare streets, propelling three box cars. The engineer was in the cab, and Williams was on the forward end of the leading car, waving a lantern. As they came to Tulare street, he noticed two men start to cross the track just in front of him, and he shouted to them to look out. They seemed to pay no heed, and he thought they would miss the car, but kept shouting until he could almost touch them. The train was going at about four miles an hour.

At the instant the men were struck, the signal for stopping was given, and the engine came to a standstill in thirty feet. The men had been dragged under the wheels, and the whole length of the car passed over them before they were rescued from under the car by the trainmen.

Word was sent for Dr. J. L. Maupin, who is the local surgeon for the Southern Pacific Company, who came at once, and ordered an ambulance for the carrying of Zibbell to the Burnett Sanitarium. It was seen that McMahan had died instantly, and a little later, the remains were taken to the morgue at Stephens & Bean.

At the time of the accident, two fellow turfmen of Zibbell's were at the depot, J. R. Albertson and A. L. McDonald, and they ran with other people to the scene. Arriving there they saw Zibbell propped up against a box, and recognized him from his voice. He was conscious but groaning with terrible pain.

His first words were, "I am all shot to pieces—how is Mac," referring to McMahan.

He was comforted with the assurance that his companion escaped.

Albertson and McDonald accompanied Zibbell to the sanitarium and on the way up he again inquired for McMahan. This time he was told that McMahan was about as had off as he was, and Zibbell then seemed to realize his companion's fate and asked for him no more.

At the sanitarium he lamented the fact that his racing days were over, just as he had begun to obtain distinction. He implored his companions not to allow the doctors to cut off his arm.

Zibbell's injuries make his recovery extremely unlikely. His left arm was broken and mangled so that it had to be amputated; his right shoulder was crushed and his back bruised; his right hand was crushed and must be taken off today; one foot was ground off. There were no severe internal injuries. Despite the terrible mauling he maintained consciousness, and bore up with remarkable bravery.

Before submitting to an anesthetic he asked to have his father and mother sent for and his sister "Georgie."

McMahan's body was horribly mangled from the chest downward. The upper part of the trunk and the head were comparatively little injured. The only injury to the face was a bruise under one eye. The arms were not hurt except for the crushing of the right hand.

Willard Zibbell is the son of J. W. Zibbell, the veteran driver, whose home is at No. 672 Eleventh avenue, San Francisco. The young man is about 26 years of age and followed his father's career. In conversation with a *Republican* reporter an hour or so before the accident he laughingly remarked that he was reared on a race track, being around horses all his life.

For the last two years he has been driving and is spoken of by horsemen as a very promising man. He brought a string of five horses here to race next week among them being a green horse with which he won a great race in Los Angeles last week.

McMahan was a very gentlemanly young man who made friends with every one he met. He was assistant secretary of the Pacific Coast Trotting Horse Breeders Association and was in Fresno working up interests in the race meet. Before the Los Angeles meeting he spent about a week here and returned last Monday. He was a sporting writer on the BREEDER AND SPORTSMAN and an unusually capable man in his line.

In a conversation with a *Republican* reporter several days ago, McMahan remarked that he thought he had a charmed life, as he had been in several railroad accidents and had escaped each time without a scratch. In one accident he was the only man in the car he was in to escape."

At ten o'clock Friday morning Willard Zibbell was still living and the attending physicians gave strong hopes of his recovery. He has lost both hands and one foot, but his strong physique and rugged health have thus far enabled him to resist the terrible shock.

Willard Zibbell has been considered one of the most promising young horsemen on this Coast. He is a tall, handsome young man about twenty-five years of age and a horn horseman. A "home boy" of excellent habits, straightforward and upright in his dealings, he is the idol of his father, mother and sister with whom he resided. As a trainer of harness horses he was meeting with great success, and his winning of the 2:24 class trot at Los Angeles on the last day of the meeting with Adam G. 2:14½ was looked upon by all his friends as the beginning of a bright career for him as trainer and driver. His father refused \$8000 for the horse the same day, intending that Willard should take the McKinney gelding through the Grand Circuit next year. Mr. and Mrs. Zibbell and daughter are with the son at Fresno, having been summoned right after the accident and are doing everything and having everything done that medical science and tender care can do to relieve his sufferings. No braver young man ever lived than Willard Zibbell, and his thoughts immediately after and since the accident have been of his dead companion and his own sorrowing family rather than of himself. We extend the sincerest sympathy to the unfortunate young man and his family in their terrible affliction.

CLOSE AT LOS ANGELES.

FIFTH DAY.

LOS ANGELES, July 7.—This was a day of surprises at Agricultural Park, as outsiders in the betting won both of the races that were finished, and the first choice in the third race seemed to be in a bad way when the race was postponed on account of darkness. The fun started with the three-year-old pacing race, in which the two-year-old colt Rockaway was one of the starters, and the talent picked him to win the money on the strength of his good race of Wednesday when he took a record of 2:15½ with comparative ease. He did not keep his backers in suspense long as he was distanced in the first heat, but in justice to the colt it might be said that he had all the worst of the argument and would undoubtedly have done better with an even break. Just as the word was given in the first heat he made a break and his driver, Jacob Brelliar, not hearing the starter say "Go!" pulled him up, and before he realized that the others

Princess Louise (3) 2:19, b. f. by Coronado 2:13½.

were on their way scrambling for the money it was too late to redeem himself and he finished behind the flag. Frank Wright's Diablo filly Deviletta won the heat in 2:14½ after a hustling finish with Memonio, and the former was naturally made a favorite over the remainder of the field. There was a different story to tell in the next heat, however, as Memonio was the first one to reach the wire after she and Deviletta had had a lively journey. The time of the second heat was only 2:17½, and both of the heat-winning fillies seemed pretty well tired, but Memonio stuck to her business all the time and managed to win the next two heats with plenty to spare from Kinney Wood. Memonio is owned by Mannie Reams, but was driven by M. G. Leggett. The Zolock filly Kinney Wood paced a nice race and was well up at the finish of the last two heats.

The 2:11 pace was the feature event of the card and eight sidewheelers scored for the word, with Fred Ward's brown gelding Vision and the stallion Jonesa Basler selling at \$5 apiece in the auctions against \$5 for the field. When the word was given for the first heat Vision, Jonesa Basler and Rita H. started out to make the pace, and they sailed down the backstretch at a merry clip, reaching the half-mile pole in 1:02½. Here the pace began to tell and they slackened up a little, and after a hard drive throughout the last quarter Vision got the verdict from the Basler horse in 2:09½. These two started out for business again in the second heat and practically made a two-horse race out of it, and as they headed down the stretch every one was wondering which one would win; but right here something happened, as J. D. Springer came out of the ruck with the chestnut mare Miss Idaho by Nutwood Wilkes, and after a short argument near the distance stand came on and beat them both in 2:10½. From then on there was nothing to it but Miss Idaho, as Mr. Springer was always out in front with her and she appeared to have quite a little in reserve at the end of each heat. Tidal Wave beat Rita H. for third money after a hard drive in the fourth heat.

Pat Rose was an even money favorite over the field in the 2:20 trot, but he was unable to win a heat in three, and when the race was postponed on account of darkness his chances of winning looked pretty slim. He had all his speed with him to day, but continuous and tiresome scoring evidently caused him to lose confidence in himself and he made bad breaks in each heat. The first two heats went to the black Zombro gelding Charlie T., driven by Al McDonald, and it is doubtful if he should not have had the race, but after reaching the wire first on a break in the third heat

the judges awarded it to Ambush, who was a half length back. The summaries:

The J. H. Reynolds Stake, three-year-old class pacing, purse \$600

Memonio, b f by Damonio-May Mamie.....(Leggett)	2	1	1
Deviletta, b f by Diablo.....(Wright)	1	2	3
Kinney Wood, blk f by Zolock.....(Durfee)	3	3	2

Time—2:09½, 2:10½, 2:11½, 2:10½.

SIXTH DAY.

LOS ANGELES, July 8th—Today saw the close of the meeting here and one of the biggest crowds of the week saw the racing. The feature of the card was the special \$600 purse and a silver cup for the free-for-all pacers and it proved a very interesting race, although Zolock took down the lion's share of the purse without extending himself to the limit. Kelly Briggs and Edwin S. were the only other starters, and before the first heat Zolock brought \$10 in the auctions against \$4 for the field, so it will be seen that his victory was a popular one for the bettors who like to play the sure thing kind. There wasn't very much excitement about the first two heats as Zolock was always out in the lead and won from Kelly Briggs, and then Edwin S. in 2:07 and 2:08 respectively. In the third heat things went along in the same old way until they were headed into the stretch and Zolock seemed to have the race well in hand but Chadbourne came along next to the rail with a rush with Edwin S. and at the distance stand was at Zolock's wheel and seemingly with a possible chance to win but Delaney took Zolock over toward the pole far enough to keep Edwin S. from coming through and led to the wire by about a length in 2:08. After deliberating quite a while the judges placed Zolock last for fouling Edwin S. and gave the heat to the last named pacer, but the decision had no effect on the result of the race as Zolock came right back again in 2:08½, letting Edwin S. down with second money and third for Kelly Briggs. Edwin S. paced a very clever race, although he was hardly up to a hard proposition like this, and showed that he will be a hard horse to beat in a week or so.

About the sleekest green trotter that has come to town lately was turned loose by Willard Zibbell in the 2:24 trot when he won the money in straight heats with the bay gelding Adam G. This horse has been pretty well touted all spring and was a red hot favorite in the auctions but he had never been started in a race and it remained to be seen what he would do in company. Suffice to say he made good in a manner that was emphatic and although he did not have to go very fast, several old horsemen who saw the race were enthusiastic enough to say that 2:08 will not stop him. When the word was given for the first heat the field was sent away with Adam G. taking the dust from the whole bunch but this did not seem to

Kenneth C. (3) 2:17, br c. by McKinney 2:11½.

bother him a bit and after trailing along to the half he was sent around his field with ease and won in a jog in 2:14½. The next heats were play for him and both were trotted in 2:15. Sam Bowers, Oro Belmont and Zambretta were all hustling for the rest of the money, and after some lively scrambling finished in the order named. Adam G. is a racy looking seven-year-old gelding by McKinney, out of Nona Y. 2:18½ by Admiral and is the property of J. W. Zibbell & Son of San Francisco. He is perfectly gaited, carries himself well, never makes a bobble and it is hard to tell just where he will stop. He was bred by President E. P. Heald of the Trotting Horse Breeders Association.

The Commonwealth was made a luke warm favorite

in the 2:14 trot and taking into consideration his good race of Wednesday figured to win the money which he did quite handily in straight heats. It was one of the best betting races of the meeting and all kinds of wild plunges were made during the progress of the event, first on Una K. then on Lady Madison and again on the white gelding Rozelle but the only time when he seemed to be in difficulty was at the finish of the second heat when Rozelle brought him down to a head finish in 2:13½, which was the best time made during the race. In the other heats the white gelding went into the air at times when he seemed to have a "look in." Lady Madison had as much speed as anything in the party but evidently was not at herself and refused to stand a drive when called upon. Una K. was also erratic and the others didn't call for much. The summaries:

The Van Nuys Stake, 2:20 class trotting, purse \$1000.

Time—1:17½, 1:17, 1:16, 1:15.

Santa Rosa Driving Club.

An enthusiastic meeting of horsemen was held at Santa Rosa last Tuesday evening and temporary organization of a new driving club was effected. Mr. P. H. Quinn was called to the chair, Mr. Walter C. Nolan was elected Secretary and Mr. W. E. Healey treasurer. Chairman Quinn was authorized to appoint a committee of fifteen on membership and organization, and Frank S. Turner, Henry Carlton and Fred J. Yandle were appointed a committee on by-laws. It is proposed to give matinee and regular racing on the famous Santa Rosa Farm track, which is one of the best appointed and fastest in California.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

Notes and News.

Now for Fresno.

The track is very fast.

And the program a good one.

Breeders meeting opens there on Wednesday next.

All the fast pacers and trotters will start during the meeting.

The fastest new trotter of the year is Pat Rose 2:12½ by Falrose.

The average time for the seventy-three heats trotted and paced at Los Angeles last week was 2:12½.

Sixteen heats were paced in from 2:10 to 2:06 at the Los Angeles meeting, which is "going some" for the first meeting of the year.

Woodland Daisy, a three-year-old filly by Nazote, took a record of 2:21½ in the second heat of a pacing race at Parsons, Kansas, June 22d.

An opportunity to get a good sulky, speed cart, road cart, harness, hoots, blankets, etc., is offered by the Peart sale at Colusa, August 9th.

The great question with the horsemen in California now is: "Can they beat Zolock at Fresno or Santa Rosa, or make him beat his mark of 2:06?"

William Leach, the well known auctioneer of Marysville, will ask for the bids at the sale of Mr. E. C. Peart's trotting bred horses at Colusa, August 9th.

The first of the get of Coronado to start in a race is the three-year-old filly Princess Louise that won her race and took a mark of 2:19 at Los Angeles last week.

In Japan a law has been passed which provides for the compulsory gelding of all two-year-old stallions not considered of sufficient quality for stud purposes.

Zolock 2:06, besides reducing his record at Los Angeles, had a new performer added to his list in Dixie a trotting filly, that took a time record of 2:26.

The meeting at Windsor, which is the "curtain raiser" of the Grand Circuit, will open on Monday next. There will be a meeting at Columbus the same week.

Zephyr 2:11 by Zomhro has worked to her record twice within the last two weeks, and has shown no signs of unsoundness so far. A lower record is doubtless within her reach.

The pacers Bolivar and Josie, both in the East View Farm stable, were worked out together in 2:14½ at Empire track one day last week, and paced the last quarter in 30 seconds.

The three-year-old gelding Buster Brown by McNeer, a son of McKinney and out of a mare by Dawn, that is to be sold at the Peart sale at Colusa August 9th is worth training for the races.

James Butler is now the sole owner of the Empire City track at Yonkers, N. Y., he having last week purchased the interest of Charles C. Lloyd, the last person to dispose of his interest in the property.

Bonnie Aisle, the brown pacing mare by Faustino, that Walter Mahen has been training at Los Angeles, started during the meeting there to beat her record of 2:13½. She knocked five seconds from it by a mile in 2:08½.

Searchlight is now at Lexington, Kentucky, where, it is said, he will be kept in the future. It is said that his owner, W. Bronston, an Eastern millionaire, intends putting him at the head of a breeding stud which he is to establish.

James Butler started Mamie R. 2:15½ in a matinee race at Empire track June 29th, but she did not win, making a break in each heat. The miles were in 2:17½ and 2:16. The little mare must be off, as these are the first breaks she has made this season.

Nocturno, the stallion by Alfonso that took a time record of 2:26 at Los Angeles, will now be shipped to Albany, Oregon, where he will make a season. He trotted his mile very nicely and can greatly reduce the time if placed in regular training.

Six 2:10 performers at one meeting, and that the first of the year, is a pretty good record for any country. Los Angeles holds this record, and while all are pacers the fact that they paced sixteen heats in 2:10 or better shows that they have class.

There is talk of a three days' meeting at Concord in September. If the managers of the track will advertise a program of harness races with programs ranging from \$200 to \$300, we have no doubt but it would fill and some excellent racing result. The new Concord track is in very good shape and the people of Contra Costa county are good patrons of the sport. After the State Fair is over there will be a large number of owners ready to race anywhere in central California.

Gil Curry and Myron McHenry, who left the trotters some time ago for the runners, are back with the harness brigade again, and it will probably not be long before Scott Hudson will be looking for a few "prospects" and pumping up the tires of his old bikes.

There are five colts by John A. McKerron 2:04½ in Doc Tanner's stable. They are the four-year-old trotter Harry McKerron 2:24½, two three-year-olds, two two-year-olds and one yearling. They are all good sized, handsome and are all promising speed prospects.

The first meeting between Tiverton and Sweet Marie will come off next week at Philadelphia. The gelding is in fine shape and trotted a mile in 2:13 last week, with the last quarter in 29½ seconds. Sweet Marie has been a mile in 2:08, half in 1:02 and a quarter in 30 seconds.

Dr. J. W. Hammond of Byron, who never drives anything but a good road horse, and has bred quite a few, sent his mare Blue Bells to Mr. J. D. Springer's highly bred stallion Suomi this year and believes her to be with foal. Suomils by the great Zomhro and out of the dam of Stam B.

James Thompson drove John Caldwell a mile in 2:08, with the last half in 1:03, at the Cleveland track one day last week. He looks and acts like a money winner. Albata is showing lots of speed, but Mr. Thompson does not like him as he does the Strathway gelding, as he is not so reliable.

Lafe Shafer has resigned as trainer at Terrace Farm, Titusville, to take a position as assistant to Ed Geers. Zephyr 2:11, Elegance by Dare Devil, and King Bardo by Sternberg, all owned at Terrace Farm, and that have been in Shafer's care at Memphis all winter, will go into Geers' stable.

The owner of the pacing stallion Daedallon 2:10 has so much business to attend to requiring his absence from the State more than half the time during the summer racing season, that he desires to sell this elegantly bred son of Diablo. He will be priced right. Address this office for particulars.

It is said that Sweet Marie can beat the fast pacer Nervolo 2:04½ any part of the mile in their workouts. Those who know how fast Nervolo can reel off an eighth or a quarter can appreciate the speed of the daughter of McKinney. She and Tiverton 2:04½ will meet on Wednesday next at Philadelphia.

The horses consigned by C. E. Needham to the auction to be held in this city July 24th at Fred H. Chase & Co.'s salesyard are sired by Steve Whipple 2:12, Directed, a son of Director, Guy McKinney, a son of McKinney, and Chas. Derby 2:20. They are out of mares that are full of Morgan blood.

Lisonjero 2:08½ by Dexter Prince is trotting like a 2:04 horse this year, and is better gaited than ever, although he had the reputation of being the easiest going, lightest shod trotter on the turf last season. He won his first start this year at Saugus two weeks ago but did not have to trot within five seconds of his record.

One of the new rules of the New York Driving Club is that horses tied for second or third position in the summary are awarded positions according to their standing in the faster heat of the race, and it looks like a pretty fair rule. For instance, if A.'s positions were 2-3 and B.'s 3-2 and the time was 2:15-2:13, then B. would be awarded second place and A. third.

Mr. Devereux, the Cleveland amateur reinsman, is a great judge of pace. Last week Mr. Billings asked him to drive Lou Dillon a mile, and requested that it be in about 2:10. The mile was exactly in that notch. Lou Dillon and Major Delmar will be started for a cup at the Detroit meeting. They will probably not be asked to go better than 2:05 this early in the year.

It looks as if this was to be another McKinney year. The harness racing season has not yet fairly opened, but he has Charlie T. 2:14½, Adam G. 2:14½, the three-year-old Kenneth C. 2:17 and Della McCarthy 2:20½, all new trotters to his credit, while his pacing son Zolock has reduced his record to 2:06, which is the fastest record of the year. Tidal Wave 2:09, one of the new 2:10 pacers, is out of a daughter of McKinney.

Fourteen heats were trotted in 2:15 or better by six horses at Los Angeles last week. The fastest was the one in 2:10½ by Ole in the first heat of the 2:11 trot, which reduced his mark just half a second. The horses that trotted these fast seconds were sired by Falrose, Silas Skinner, Gen. Beverley, Shadeland Onward, Zomhro and McKinney.

The State Fair harness races filled well and a high class meeting is sure to result. The track will be in order and the probabilities are that it will be fast as it has been built by Mr. Allen, the most expert track builder in America, and the soil is a mixture of clay and loam which he claims is just the thing for a fast and safe track for training and racing.

Adam G. 2:14½, the seven-year-old McKinney gelding that won the \$1000 2:24 class trot on the last day of the Los Angeles meeting, was bred by President E. P. Heald of the Pacific Coast Trotting Horse Breeders Association. His dam is Professor Heald's favorite mare Nona Y. by Admiral, that is also the dam of the trotter Lady Rowena 2:18½ and the pacers Nance O'Neil 2:09½ and Charles David 2:15. Adam G. is undoubtedly one of the greatest prospects that has been seen on any of the tracks this year and it is confidently believed by the most experienced horsemen that three heats in 2:10 are not beyond his reach.

Good looks, size and soundness are the qualities which the horses possess that are consigned to the sale at Chase's salesyard Monday evening July 24th, by the Occidental Land and Live Stock Association of Sharon, Cal. These horses are by Teheran, Ilderim and a Norman stallion. There are fine roadsters and good express horses in the consignment.

The free-for-all pace at the Fresno meeting next week has five entries as follows: Zolock 2:06, Edwin S. 2:08, Tom Carneal 2:08½, Kelly Briggs 2:09½ and Daedallon 2:10. This will be one of the greatest contests seen in California in years, and will be well worth a trip to Fresno to witness. As the Fresno track is in fine condition it is likely that the winner will reduce his record.

Ambush, the brown colt by Zolock that took a record of 2:16 in the third heat of the 2:20 trot at Los Angeles is only three years old, yet in this race he was pitted against aged horses and got second money. Ambush took a record of 2:20 as a two-year-old last year. He looks like one of the best prospects in California at the present time for a record of 2:10 as a four-year-old.

Most of the importers who have been active of late years and several who have not are at present in Europe, buying stallions for the American trade and the general opinion is that if the horses can be bought more will be imported this season than ever before in any one year. It is believed that many more Shires, Clydesdales and Suffolks will be brought over this year than since the late eighties.

Good horses are hard to get at the present time, but a number of good ones will be sold by auction at the Fred H. Chase & Co.'s salesyard, 1732 Market street, San Francisco, on Monday evening July 24th. They are consigned to the Occidental Land and Improvement Company, of Sharon, Cal., and the C. E. Needham farm at Bellota, Cal. Don't forget this sale if you want a good horse or several of them.

To make a bran mash first wash out a bucket with boiling water, then pour in the quantity required—say three pints—and stir in three pounds of bran. Cover up and leave it for a couple of hours or more if not required for immediate use, says *American Cultivator*. A mash takes hours to get cold and is often offered to a sick horse too hot and refused when it would have been taken if properly prepared and given warm instead of scalding.

Will Durfee was the largest winner at the Los Angeles meeting. He won two races, was second once, third once and fourth once, the total winnings being \$1440. Walter Mahen was next with \$1350 to his credit and Fred Ward was third with \$1250. The others winning \$500 and over were F. E. Wright \$1140, S. Lindsay \$1000, John Quinn \$1000, Fred Chadbourne \$800, M. Reams \$750, Al McDonald \$750, S. E. Kent \$750, J. R. Springer \$650, W. Zibbell \$650, Henry Delaney \$575, Leggett \$550, Stewart \$550, Freeman \$500.

Last year a very large number of draught stallions were brought to this State from the East and were distributed throughout the counties where horse breeding is carried on to any extent. Nearly all these stallions that have made seasons here this season have been liberally patronized and for that reason the supply of grade draught horses which is now very short on the Coast should begin to reach something nearer the demand at the end of the next five years. Until that time, however, the supply will be short, and horses of 1300 pounds and upwards will be held at high figures and find a very ready sale in California.

Zomhro 2:11 by McKinney is getting a lot of high class mares in Oregon this year. Among the record mares that have been bred to him since his arrival at Portland on June 1st, are Sarah S. 2:09½, Flora G. 2:21, Mary Scott 2:24, May Tilden 2:24½, Lady Mack 2:21½, Loveless 2:20, Alto Dell 2:16½ and Altelino 2:21½, Bessie Loveless, two year-old trial 2:24, Beulah, two-year-old record 2:47, own sister to Chehalis 2:04½, Lany Dell, dam of Bettie Gentry 2:16½, Pocahontas, dam of Little Maid 2:18, Bridesmaid, dam of Edmond S., trial 2:17½ and other highly bred and producing mares have also been sent to Zomhro's court during the past month.

Harry Bush, the capable young trainer who gave Confenza her mark of 2:12½ last month at Denver, is receiving many complimentary notices in the press. He is a natural horseman, and has that rare faculty of gaining not only the confidence but the control of highly nervous and erratic horses. He went to Colorado from Des Moines, Iowa, a few years ago in search of health, and although he is much more robust than he was, his voice cannot be raised above a whisper and his lungs are very weak. Confenza was declared a hopeless failure before he began training her, but he has made a valuable racing machine of the daughter of James Madison.

The brown trotting mare Italia by Zomhro, owned by Mr. W. P. Murray of Cleveland, is working better this spring than ever before. She is stronger, looks better, does not show any disposition to be unsteady, and in every way her rest last year has done her good. She will probably be raced later if she continues to improve. Mr. Murray's young trotter, Russell G. by Nutwood Wilkos 2:16½, dam by California Nutwood, second dam by Anteeo and third dam by Venture, is learning fast and bids fair to develop into a useful trotter. Russell G. has a full sister in California, who as a two-year-old last year worked a mile in 2:24½, with a quarter in 33 seconds. She is a very fast filly, and is heavily staked. The dam of Russell G., it is said, never failed to produce speed, as all her colts by Nutwood Wilkos are fast.—*American Sportsman*.

STATF FAIR ENTRIES.

The list of entries to the harness races advertised for the State Fair of this year, which is printed herewith, is a remarkably good one. All the fastest trotters and pacers in California have been named and excellent racing can be expected for the meeting which will open Saturday, September 2d.

2:09 Class Pacing, \$800-12 Entries.

A Ottlinger's h h Daedalion.
Joe Long's br m Nellie R.
J B Springer's ch m Miss Idaho.
F H Lichtenstein's h m Nance O'Neill.
T W Barstow's br m Alone.
B M Turner's b g Vision.
E Gravatt's b s Jonesa Basler.
Gus La Fontaine's b g Hassalo.
L B Lindsay's b g Le Roi.
W G Durfee's br m Rita H.
F E Wright's br g Kelly Briggs.
I C Mosher's ch s Tidal Wave.

2:15 Class Trotting, \$700-9 Entries.

A Ottlinger's h g Zambra.
J W Zibbell's b h Adam G.
A L McDonald's blk g Charlie T.
J A Jones' blk m Lady Jones.
S Siljan's br g Birdcatcher.
F J Ruhstaller's br g Wild Bell.
L B Lindsay's ch g Satin Royal.
W G Durfee's br g Cuata.
I. C. Mosher's b m Oma A.

2:13 Class Pacing, \$600-9 Entries.

Mrs Jane Mastin's br s John A.
E D Dudley's br m Friskarina.
M R Duffy's ch g Core Cread.
I L Borden's h h Cresco Wilkes.
J D Springer's b g Argyle.
F R Lichtenstein's b m Hattie Croner.
Fred Chadbourne's ch s John R Con-way.
Jas Stewart's b s Fearnot.
L B Lindsay's b m Queen B.

2:12 Class Trotting, \$700-11 Entries.

W W Mendenhall's gr g What Is It.
F E Ward's h m Lady Madison.
J Groom's b g Llege.
J B Iverson's b m Princess.
J H Bennett's ch g Dr Hammond.
L B Lindsay's h h The Commonwealth.
W G Durfee's b g Jupiter B.
A B Rodman's ch g Pat Rose.
I C Mosher's ch g Red Skin.
H A Bell's b g H D B.
L W Pfeiffer's br g Walter Wilkes.

2:20 Class Pacing, \$600-14 Entries.

M J Ream's ch m Miss Winn.
M R Duffey's dun s Eagle Pilot.
James Fox's b m Lady Shamrock.
Ray Dittus' b g Instructor.
J C Berry's b m Clara L.
C H Widemann's blk g Joe Robin.
Jas Edgington's gr m Flora G.
F Gomett's b h Little Jib.
J W Olfutt's rn m Mildred O.
M Argy's ch m Loganette.

Jas Stewart's b s Fearnot.
W G Durfee's blk m Bessie Barnes.
Harry Lichtenstein's b m Dot.
Humphrey & Briggs' b g Little Joe.

2:30 Class Trotting, \$600-6 Entries.

M J Ream's b g Oro Belmont.
L C Gates' b m Dew Drop.
Alex Brown's b g La Correcta.
O E Williams' b g Wilmar.
S Siljan's br g Birdcatcher.
L B Lindsay's ch g Sam Bowers.

Claiming Race for 2:25 Class Pacers, \$500.

Did not fill.

Occident-Stanford Pace.

T W Barstow's b f Just It.

2:18 Class Trotting, \$600-6 Entries.

J C Wallace's Old Hickory.
F J Ruhstaller's b g Wild Bell.
Jas A Smith's h g Hank.
J A Jones b m Lady Jones.
W G Durfee's b g Cuata.
Henry Peters' b m Little Babe.

Claiming Race for 2:27 Trotters, \$600.

Did not fill.

2:18 Class Pacing, \$600-5 Entries.

J C Berry's b m Clara L.
C H Widemann's blk g Joe Robin.
F H Lichtenstein's b g El Morino.
W. Mastin's b g Penrose.
Jas Smith's gr m Sweet Heart

Free-for-all Trotting, \$800-9 Entries.

A L McDonald's blk g Charley T.

W W Mendenhall's gr g What Is It.
J Groom's b g Llege.
J B Iverson's b m Princess.
J H Bennett's ch g Dr Hammond.
W G Durfee's b s Petigru.
A B Rodman's ch g Pat Rose.
H A Bell's b g H D B.
J W Zibbell's b h Adam G.

2:25 Class Pacing, \$1500-13 Entries.

M J Reams' ch m Miss Winn.
W R Duffey's dun s Eagle Pilot.
James Fox's b m Lady Shamrock.
Geo T Algeo's b h Mixer.
J D Springer's b g Argyle.
F Gomett's b h Little Jib.
F H Lichtenstein's b m Hattie Croner.
E A Servis' rn g Dr J.
M Argy's s m Loganette.
Jas. Stewart's b s Fearnot.
A L Jacobs' b g Arthur F.
Humphrey & Briggs' b g Little Joe
W G Durfee's b m Bessie Barnes.

Free-For-All Pacing, \$800.

Did not fill.

2:24 Trotting, \$1500-8 Entries.

M J Reams' b g Oro Belmont.
M C Delano's b m Ramona B.
J A Jones' blk m Lady Jones.
A E Williams' b g Wilmar.
S Siljan's br g Birdcatcher.
F J Ruhstaller's br g Billy Dooley.
L B Lindsay's ch g Sam Bowers.
Henry Peters' blk m Little Babe.

Additional Purses for Fresno Meeting.

The following additional purses for the Fresno meeting were advertised to close July 10th and declared filled by the Directors of the Breeders Association this week:

Three-Year-Old Trotting, Geo. L. Warlow Stakes, \$400.

Jas Ervin names Priscilla J, b m by Bonner N B-dam by Jerome Eddy.
Bonnell & Prescott name Ambush, br c by Zolock-May Kinney by Silkwood.
Martin Carter names Elma S, b f by Nutwood Wilkes-Bessie C by California Nutwood.
Geo L Warlow names Athasham, br c by Athadon-Flora Wickersham by Junio.
S K Trefry names Kenneth C, blk c by McKlney-Mountain Maid by Cresco.

Three-Year-Old Pacing, Sunny Side Stakes, \$400.

F E Wright names Deviletta, b f by Diahlo-Clara H by Hank.
M J Reams names Memonio, b m by Demonio-May Norris by Norris.
I L Borden names Roberta, blk m by Robert I-Allie Cresco by Cresco.
J W Marshall names Mona Wilkes, b f by Demonio-Trix by Director.
Ben Davies names Delilah, b m by Zolock-Gipsy by Gov Booth.

2:22 Class Trotting, Grand Central Hotel Stakes \$600.

L B Lindsey names Sam Bowers, ch g by Joseph Simpson-Lady Thorne by Hambletonian Mambrino.
J A Jones names Lady Jones, blk m by Capt Jones-dam by Director.
Jos Long names Wilmar, b h by Wildnut-Sweet Water by Stamboul.
F J Ruhstaller names Billy Dooley, b g by Bay Bird-Maggie O by Cornellus.
Ray Bennett names Oro Belmont, b g by Oro Wilkes-Muscovia by Belmont.
Henry Delaney names Miss Mabel, b m by Thompson-Miss Tiffany by Gibraltar.
Gentlemen's Roadsters-Free-for-All, Local Pacers, Purse \$200, Entrance Free.

E R Reed names Elmont, h g by Almont.
E T Stockdale names Selda, b m by Stormy John.
D L Bachant names George, b g by Loeber.
Joe Cory names Mabel C, blk m by Strathway.
Pat Sweeny names Lady R, b m by Col K R.

Common Sense in Colt Breeding.

With all the theories on breeding there is nothing that will assist in the raising of great colts so much as a fair amount of common sense. This holds good, especially in regard to the raising of colts both before and after being foaled, says *The Horseman*. It hardly seems possible that a man after investing thousands of dollars in stallions and broodmares would allow the young colts to starve, and yet, unfortunately, more than one instance can be cited where promising colts have been stunted and ruined because of stinginess in providing feed for the mare and for the colt after weaning. Possibly no breeder would admit that he ever pursued such a foolish policy, yet in such instances it must be admitted that the breeder has very little common sense in his make up. It is too often the case that a mare and her foal are turned out at this time of the year and allowed to run in the pasture until fall. Between now and that time, it is safe to say, the pasture will not furnish the nourishment needed, either for the mare or her foal. Special care should be taken to see that both are provided with plenty of succulent and nourishing feed. Possibly the pasture will appear sufficient, but if the mare commences to get thin and the colt does not thrive as he

should then pains should be taken to furnish the forage necessary.

Some breeders do not appear to realize that a mare and her colt, idle in the pastures as they are, demand a great deal of good food. A mature workhorse can get along comfortably with less than a mare in foal, yet many breeders seem to think that meager pasturage will furnish all the food necessary. This was called forcibly to mind recently when, in the course of a discussion on a somewhat prominent stallion, a remark was made to the effect that many of his foals in his new home were small, scrubby things, which would never serve to advertise their sire, great speed getter though he has been. In reply the statement was made that it was not to be wondered at that the new owner was prone to turn his colts and mares into a pasture that could not possibly supply all the sustenance necessary. Other breeders with sires of less speed making ability have been extensively patronized because their colts have invariably looked good and when raced have had the size and constitution so essential to a race horse. Colts which have been stunted by starvation cannot stand the strain of hard training and are sure to develop a weak spot when the work becomes too hard. If it is worth while to invest thousands in a breeding establishment it is very essential that the food supply should be sufficient and if the farm will not furnish it then a few hundred dollars should be expended in its purchase. It is the few hundreds so spent that will make the many thousands a successful investment.

Answers to Correspondents.

F. CADMAN, Elmira, Cal.—Square Dealer 3552 was a bay horse, foaled 1881. He was sired by Knickerbocker 200, dam Maggie by Magnolia 68, grandam by Seeley's Black Hawk, a son of Long Island Black Hawk 24, great grandam by Bertrand, thoroughbred. Knickerbocker 200 was a son of Hambletonian 10, dam Lady Patchen by Geo. M. Patchen 30. Square Dealer sired Dimple 2:29½ and Utell 2:24½. He has two producing sons and two producing daughters. We cannot find any reference to a horse by the name of Young Morgan Empire, either in the Year Book, Register, or in Battel's Morgan Horse Register. There was a horse called Young Morgan Emperor however. He was by Emperor, son of Bulrush Morgan.

Friskarina Not Distanced.

In the summary of the 2:13 pace at Los Angeles, printed in the BREEDER AND SPORTSMAN last week, Friskarina was accounted as distanced in the fourth heat. This was a mistake. Mr. E. D. Dudley of Dixon, owner of the mare, writes us that Friskarina was withdrawn after the third heat by permission of the judges as she was sick and in no condition to race.

See This.

Choice cattle and alfalfa ranch, 480 acres, 150 producing alfalfa; fine herd Jersey cows; dairy outfit; 150 hogs; two large electric pumping plants; nine million gallons water daily. Main line Santa Fe, close to Bakersfield. Easy terms. Will consider exchange. Address J. C. ARNOLD, Berkeley, Cal. *

Strikel—If they don't give you Jackson's Napa Soda when you ask for it.

Thinks Highly of George G.

[Hawley in Ky. Stock Farm.]

The present condition of the horses in Ed Geers' stable clearly refute the idea so frequently advanced by trainers that it is impossible to prepare for an extensive campaign the horses in their charge before the middle of the summer, for the cracks that he is now ready to do battle with have been on edge for some time and could easily have begun their campaign some weeks ago. Whatever may be the public performances of the several high class and greatly heralded trotters and pacers which this great reinsman will show to the public remains to be seen, for both Walter Direct and George G. are in a measure unknown quantities. It is true George G. has been seen in public, but it is not all safe to gauge his capacity by his past performances, for every one knows that he is today so vastly improved in manners as to be quite a different horse from formerly.

His speed has always been unquestioned, and no one familiar with him can doubt for a minute that he is a game trotter, and if his capacity can be judged by the manner in which he has taken his work this spring, he is destined to be one of the stars of the year. In view of the fact that he has not in the past performed creditably to himself, it would be folly to predict for him a campaign equal to that of Sweet Marie, for this mare is one among a thousand, but as it has always been conceded that all the gelding lacked was good behavior, and this he seems now to have in abundance, it is reasonable to suppose that the son of Homeward is now as near perfection as the skill of his trainer can make him.

Granted that George G. is a 2:05 trotter, and surely his past performances justify this belief, and conceding his absolute gameness, there is little speculation in pronouncing him a trotter of the very first class, and as such likely to more than hold his own in any company he may meet. Whether or not he can overcome the cracks of the faster division will have to be ascertained when he is put to that test, but that he is master of his own division there seems so little doubt. Everyone who has seen George G. and is familiar with his speed, his way of going and his general make-up has been led to believe that there was in him capacity of the highest order; in fact, there is so much about him to indicate that he was a champion that many of the shrewdest horsemen in America believe him capable of joining the ranks of the fastest division in the very near future.

I firmly believe that this gelding will sweep everything before him this year, unless, of course, it is decided to undertake the impossible with him, and I have such a high regard for the judgment of his trainer, whose opinion of him is of the highest, that nothing the gelding might do would surprise me. Geers has been forced to wait some time with a horse that is very nearly cherry ripe, yet so skillful is he in keeping a fast horse in perfect condition that there is no danger of this trotter having been overdone. His engagements should be at his mercy, unless, of course, he returns to his bad habits of the past, and after defeating the best of his own division, he can be expected to meet either Tiverton, Sweet Marie or both. I am firmly of the belief that if George G. is this year capable of a mile in 2:05, he will overcome Tiverton, if the two ever meet, for he is much more substantially put together, has infinitely more substance, and should be capable of an extended campaign, something that is likely to be the undoing of light, waspish son of Galileo Rex.

The Attraction of Harness Racing.

The harness racing season may be said to have been fairly begun, although thus far it has been confined mainly to the half-mile tracks, and the results of the different meetings, as reported in the columns of the turf press, in sharp contrast to those on the running tracks, are as eagerly scanned by men interested in breeding as by those interested from a racing viewpoint. In no respect is the difference between harness racing and running racing more clearly shown than by this eager interest shown in racing results by those who take no more active part in racing than is shown by going to the races as spectators merely. It is likely true that 90 per cent of those who go to the running races go to speculate, while at the average Grand Circuit meeting it is doubtful if more than 20 per cent of those present take a part in the speculative part of the game. The attendance at the average harness racing meeting is made up largely of persons coming under the following heads: Those who love a driving horse possessing some speed and who have become interested in professional racing through this love of speed so engendered; those who have made a study of trotting horse pedigrees and who are engaged in breeding to a greater or less extent; those who love horses naturally and who have been firm adherents of the harness branch of racing from childhood up. There are, of course, those who love to speculate and who, through preference, prefer to back their judgment of harness horses mainly because they have always fancied horses of this kind, and have made a study of them and the conditions under which they are raced, but, as before stated, it is seldom that this element amounts to more than 20 per cent of the entire attendance. Harness racing attracts more people for sport's sake than any other form of racing because, in a modified form, the amateur reinsman may participate in it, and thus he becomes interested in it in a professional way. The runner is a racing machine, nothing else, while the trotter or pacer is not only a race horse in a professional way, but is also a source of enjoyment to the amateur who may make use of his speed in amateur events. He thus learns to know the feelings and motives which inspire the professional driver, sees in his endeavors to win that which he can neither see nor understand in the mite of a jockey clinging to a runner's back. He appreciates the skill and judgment shown by the men who have who have worked up to the front rank of trainers and drivers, and an afternoon's racing gives him such actual pleasure as few devotees of the running turf ever realize. The two branches of racing are widely different and the gulf that separates them will never be narrowed. Running is the sport of those who delight in speculation, no matter what form it may take, while harness racing is the sport of those who have an undying love for horses and who delight in seeing them reach the highest state of perfection as illustrated by the modern type of the trotter or pacer—a horse of beauty, intelligence and speed, useful not only as a racing machine but as a pleasureable companion as well.—*Horse World*.

"Driftwood" Sees Mack Mack and Morosco.

[Buffalo Horse World.]

Well I have seen Mack Mack 2:12½, the son of the great McKinney 2:11½, dam Nancy by General McClellan, and the impression I had formed of him before seeing him was not overdrawn. He certainly is one of the grandest looking trotting geldings I have ever seen. Like all the McKinneys, he is a very dark bay, in fact he could be called brown, he is eight years old, stands full 16 hands high and will weigh from 1250 to 1300 pounds, when out of training and will weigh right at 1200 now. There is not a blemish of any kind visible on him. There are some things about him that would remind one of Sweet Marie 2:04½. One is the expression about the head and another is his way of going, but there the resemblance ceases. He is longer in the back, which drops to quite a noticeable extent and reminds one of a stallion, along in years, that had done much stud service. He is high over the withers and across the coupling, which is well back, showing the Mambrino Patchen characteristics in this particular. He wears a nine-ounce shoe forward, with two-ounce toe-weights and seven-ounce shoes behind. The boots he wears are more for safety's sake than for the need of them, consisting only of quarter boots forward and shin boots behind. It is only when one steps behind him that his wonderful driving power reveals itself to the critic. He has quarters like a cart horse and stifles to match and the secret of his ability as a racing machine is at once unfolded to the most unsophisticated of observers.

His trainer and half-owner, Mr. Helman, says that in all he has started twenty-eight times, twenty-six of these races he has won and in the other two he won second money. In speaking of him, his trainer says

that he has not the electric turn of speed of Sweet Marie, a quarter in 30½ seconds being the best he has driven him, and that he has never in his work or races been a mile faster than 2:10. He says that while he expects him to be a good horse, he by no means thinks him invincible in his class and will be content with a fair proportion of the money. His good manners will be worth two seconds to him in any race, his owner thinks, as one can place him just where he wants to and be sure of always finding him on the trot. There is no question as to what he will do and he will be certain to add another 2:10 performer to his sire's already long list. Mack Mack's best mile thus far this season was 2:14½ here at Denver. He has not been asked to do much. He will be shipped from here to Libertyville, Ill., where his preparation will begin in earnest and then the eastern public will be able to draw conclusions for themselves as to his ability. His first great race will be in the Empire State \$10,000 purse for 2:10 trotters at Buffalo the week of August 7th.

A horse that is second only in general interest to Mack Mack 2:12½, is Morosco 2:12, the fast son of Wayland W., and Lady Moor, by Grand Moor. I can safely say from the start, he can only be appreciated when in harness and in action. It is at such a time that one who knows something about trotters will begin to enthuse. At any other time he would never give one the impression that he is the really great trotter he is. He is a rakish looking horse and rough in his exterior appearance. A brown in color, full 16 hands high, wears a nine-ounce shoe forward and a seven-ounce behind; quarter and shin boots forward and ankle and shin boots behind. He is a line trotter with full, round action forward going rather low behind, which gives to him a perfectly smooth gait and easy way of going for so large a horse. He hits the ground very light and conveys to one the idea that he is one of the wear and tear kind. Before leaving California he worked a mile to his record, 2:12, but since his arrival at Denver he has not up to this date, June 26, beaten 2:15. He is a horse that wants a free head and if given it, will not pull an ounce and can be placed without trouble. In his races on the Coast it is said that he never made a start that he could not have won. How true this is I would not venture to say. Of one thing I feel sure, the money he will race for this season will be enough to bring out his best efforts. He will start in some minor events but his first great race will be when he starts in the Empire State \$10,000 purse for 2:10 trotters at Buffalo next August at which time his true worth as a race horse will be brought to the surface.

From West Australia.

Mr. A. D. Whitecross, a resident of South Brisbane, Queensland, Australia, who is one of the BREEDER AND SPORTSMAN'S regular readers, writes us that the harness horse is becoming more popular every day in that country and adds "We are getting a better class of trotters here by degrees thanks to importations of stallions from America. Our time however very seldom comes below 2:40, and a 2:30 horse would be a veritable whirlwind. All this is to saddle as we have no tracks fit to carry a sulky except our show tracks which are quarter mile circles. I have seen a mile in harness in 2:42, but the constant turning on a small circle is not conducive to fast driving. Fair sized horses of the trotting strain bring from \$150 to \$200 for buggy horses. The leading breeder of this class of horses is Mr. John Stanfield, and his success in handling, working and showing to advantage is largely due to the information contained in the BREEDER AND SPORTSMAN and in Marvin's book on the trotter which I obtained from him from your city."

Mr. Whitecross in his letter requested the proprietor of the B. & S. to send him a few pounds of Kentucky blue grass seed which he intends sowing on the black soil upland ridges in his section of the country. He states that they already have three or four species of blue grass growing there, and that it is splendid horse and cattle feed. The seed will be sent Mr. Whitecross as asked for by the next steamer and we hope it will thrive and do well there.

Computed Value by Measurements.

An Arab method of ascertaining the value of a horse by his proportions is to measure him with the hand from the extremity of the dock to the middle of the withers, and take note of the number of palms. They then begin again from the middle of the withers to the extremity of the upper lip, passing between the ears. If, in the two cases, the number of palms is equal, the horse will be good, but of ordinary speed. If the number of palms behind is greater than in front the horse will have no "go" in him; but if the number of palms between the withers and the extremity of the upper lip is more considerable than in measuring from the tail to the withers, rest assured the horse will have great qualities.

State Fair News.

The Directors of the State Agricultural Society have made a contract with Murcell & Smith for the construction of one hundred and four cattle stalls, fifty-two in a structure.

Professor W. C. Carlyle, who has judged the livestock at the Fair for several seasons, will not be able to serve this year, and President B. F. Rush has been instructed to engage a judge for that department.

The poultry show is to be made an important feature of the State Fair again, and Secretary Albert Lindley will communicate with Henry Berrar, of San Jose, with a view of engaging his services as judge. Berrar has judged the poultry several years and has given satisfaction to exhibitors.

It has been decided to offer valuable prizes to induce counties to make exhibits of their products. To this end the society will offer a premium of \$500 for the best county exhibit; second, \$250; third, \$150; fourth, \$100; fifth, \$50.

Resolutions of respect to the memory of Frank W. Covey, a former Director of the society, who died recently, were adopted at the meeting of the Directors last Saturday.

The Pavilion will be turned over to the Native Sons this year, and many Parlors will install exhibits of the products of their counties. The big prizes offered will make the competition keen for these prizes and the best county exhibits seen in years are expected. Admission will be free to the Pavilion during the entire week.

Ban Placed on Pool Rooms.

NEW YORK, July 12—The executive board of the Western Union Telegraph Company today adopted a resolution recommending to the full board of directors that racing news be not supplied by the company except to persons receiving it through a regular office. The resolution is as follows:

Whereas, This company, by an order issued by its president, has directed the cessation of the collection of horse race reports; and

Whereas, It is claimed that the distribution of horse race reports still continues notwithstanding the action of this company referred to.

Therefore, be it recommended to the board of directors that the offices of the Western Union Telegraph Company be directed to cease the transmission of any message containing horse race reports, except when such messages are delivered to a regular office of the company for transmission to and delivery through a regular office of the company or for delivery in such or other manner as the president of the company shall authorize over his signature.

The meeting of the committee was short, and among those who attended were President Clowry, Russell Sage, Jacob H. Schiff and James H. Hyde.

Horse Show Association Organized.

As the result of the very successful horse show given by the Tournament of Roses Association at Pasadena last April, a new association has been organized called the Southern California Horse Show Association of Pasadena. It has been duly incorporated and proposes to give a show annually in March. The horses shown last April came from all over the United States and the owners were particularly pleased with the *out door winter show*, something they were not accustomed to in the East. So many Eastern people who winter in Southern California bring their horses with them that an exceptionally fine show can be held.

The officers of the new organization are John S. Cravens, President; John B. Miller and Fred E. Wilcox of Pasadena, Walter S. Newhall of Los Angeles, Robert Lee Bettner of Riverside and W. J. Hogan of Louisville, Ky., Vice-Presidents; Edwin D. Neff of Riverside, Secretary and Treasurer.

Not to Be Bred to Ben Liebes.

An item in last week's BREEDER AND SPORTSMAN stated that Grace Kaiser, the dam of Coney 2:02, etc., would be bred to Ben Liebes 2:17½. This is an error. Grace Kaiser is now owned by Mr. James Coffin of this city. She has a beautiful filly at foot by Zolock 2:06 that Mr. Coffin has refused \$1000 for and has been bred back to Zolock. Grace Kaiser is one of the greatest broodmares in the whole country. In addition to Coney 2:02, she is the dam of Stipulator 2:11½, and the trotters McZeus 2:13 and Grace McK. 2:21½, and grandam of Tidal Wave 2:09.

Lou Dillon Trotted in 2:06 Last Week.

At the Cleveland track, last Saturday morning, Mr. Billings drove Lou Dillon a mile in 2:06, the fastest mile made this year by any trotter. After the workout Mr. Billings said:

"I did not extend the mare a bit. Had I done so she would have stepped the mile in two minutes at least. Lou made the first quarter in 33 seconds, the half in 1:04, the three-quarter in 1:35½ and the mile in 2:06."

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

Coming Events.

Rod.

April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.
April 1-Sept. 15—Closed season for lobsters and crawfish.
April 1-Nov. 1—Trout season open.
June 1-Jan. 1—Open season for black bass.
July 8—Saturday Fly-Casting Contest No. 8. Stow lake, 2:30 p. m.
July 9—Sunday Fly Casting Contest No. 8. Stow lake, 10 a. m.
Sept. 10-Oct. 16—Close season in tidewater for steelhead.
Sept. 10-Oct. 16—Close season for catching salmon.
Oct. 16-Nov. 15—Close season for taking salmon above tide water.
Nov. 1-Sept. 1—Open season for crabs.
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

Feb. 15-Sept. 1—Closed season for mountain quail, grouse and sage hen.
Feb. 15-Oct. 15—Closed season for quail, ducks, etc.
April 1-Oct. 15—Close season for English snipe.
June 27, 30—The Interstate Association's Grand American Handicap Target tournament, Indianapolis, Ind.; \$1000 added money. Elmer E. Shaner, Secretary-Manager, Pittsburg, Pa.
July—Washington Gun Club. Blue rocks. Kimball-Upson grounds, Sacramento, Cal.
July 1-Feb. 15—Dove season open.
July 13—California Wing Club. Live pigeons. Ingleside.
July 16—Mount View Gun Club. Blue rocks. Mount View, Cal.
July 16—Union Gun Club. Blue rocks. Ingleside.
July 23—Fish and Game Gun Club. Blue rocks. San Jose.
July 30—Millwood Gun Club. Blue rocks. Mill Valley Junction.
Aug 1-Oct. 15—Deer season open.
Aug. 6—Golden Gate Gun Club. Blue rocks. Ingleside.
Aug. 6—Blue Rock Gun Club. High-street grounds, Alameda.
Aug. 29, 30—Interstate Association tournament. Blue rocks. Denver, Col.
Sept. 9, 10—Empire Gun Club. Merchandise shoot. Blue rocks. Alameda Junction.
Sept. 12, 13, 14—Interstate shoot. Blue rocks. Ingleside. Elmer E. Shaner, Manager. Pacific Coast Handicap under auspices of S. F. Trapshooting Ass'n., A. M. Sields, Secretary.
Sept. 30-Oct. 1—Two-day blue rock tournament. Biggs, Butte county. H. Haselbusch, manager.
Sept. 30-Oct. 1—Biggs Gun Club. Two-day blue rock tournament. Biggs, Cal.

Bench Shows.

Aug. 15, 18—Orange County Agricultural Society. Middletown, N. Y. D. A. Morrison, Secretary.
Aug. 23, 25—Rockland County Industrial Association. Bench show in New York City. A. A. Vanderbilt, Secretary.
Aug. 31-Sept. 2—Newport Dog Show. Newport, R. I. Francis M. Ware, Secretary.
Sept.—Stockton Kennel Club. F. A. Golsa, Secretary, Stockton, Cal.
Sept. 16—Englewood Kennel Club. Englewood, N. J. M. W. Robinson, Secretary.
Sept. 27, 28—Valley Fair Kennel Club. Brattleboro, Vt. Howard C. Rice, Secretary.
Oct. 3, 6—Danbury Agricultural Society, Danbury, Conn. G. M. Rundle, Secretary. Jas. Mortimer, Superintendent.
Nov. 15, 18—Boston Terrier Club Specialty Club. Boston. F. H. Osgood, Secretary.
Nov. 23-Dec. 1—Philadelphia Dog Show Association. Philadelphia. J. Sergeant Price, Secretary.
1906.
Feb. 12, 15—Westminster Kennel Club. New York. Robt. V. McKim, Secretary.
Feb. 20, 23—New England Kennel Club. Boston. Wm. B. Emery, Secretary.
March 7, 10—Duquesne Kennel Club. Pittsburg, Pa. F. S. Steadman, Secretary.

Field Trials.

Aug. 15—Iowa Field Trial Club. Geo. C. Cooper, Secretary, P. O. Box 55, Des Moines, Ia.
Aug. 23—North Dakota Field Trial Club. Inaugural trials Grand Forks, N. D. A. E. Palmer, Secretary, Grand Forks, N. D.
Sept. 4—Nebraska Field Trial Association, 4th annual trials. O'Neill, Neb. H. H. McCarthy, Secretary, O'Neill, Neb.
Sept. 6—Manitoba Field Trial Club, 19th annual trials. La Salle, Man. Eric Hamber, Secretary, Winnipeg, Man.
Sept. 21—British Columbia Field Trial Club, 3d annual trials. Ladner, B. C. H. S. Rolston, Secretary, Vancouver, B. C.
Oct. 12—Pacific Northwest Field Trial Club. La Conner Flats, Wash. Chas. L. Lundy, Secretary, Seattle, Wash.
Oct. 23—Ohio Field Trial Association. Washington Court House, O. C. T. Phillips, Secretary, Columbus, O.
Oct. 30—American Field Futurity Stake. For Pointers and Setters whelped on or after January 1, 1904, whose dams have been duly qualified. Robinson, Ill., entries closed July 1. Address Am. Field Publishing Co., Chicago.
Oct. 31—Connecticut Field Trial Club. Hampton, Conn. F. M. Chapin, Secretary, Pine Meadow, Conn.
Nov. 6—Independent Field Trial Association. Hutsonville, Ill. S. H. Socwell, Secretary, Indianapolis, Ind.
Nov. 13—Illinois Field Trial Association. Robinson, Ill. Wm. R. Green, Secretary, Marshall, Ill.
Nov.—Indiana Field Trial Club, (Week following Illinois Champion Stake). C. F. Young, Secretary, Clay City, Ind.
Nov. 21—International Field Trial Club. Ruthven, Ont. W. B. Wells, Honorary Secretary, Chatham, Ont.
Dec. 2—Continental Field Trial Club, 11th annual trials. John White, Secretary, Hempstead, Long Island.
Dec.—Pointer Club of America (following the Continental trials). Barber, N. C. C. F. Lewis, Secretary, 126 Malden Lane, New York.
Dec. 12—Eastern Field Trial Club. Waynesboro, Ga. S. C. Bradley, Secretary, Fairfield, Conn.

1906.

Jan—Pacific Coast Field Trials Club, 23d annual trials Bakersfield, Cal. Albert Betz, Secretary, 201 Parrott Bldg., San Francisco.

DATE OF OPEN DEER SEASON.

The open season for the killing of bucks begins August 1st, and not on July 15th, as has been published frequently of late. The State Fish Commission desires that the exact date of the open season be given the widest publication, as the erroneous date of July 15th may be the means of getting into trouble some who are disposed to respect the law.

Pacific Coast Derby Entries.

A total of forty-five nominations for the Coast field trials next January is the gratifying list of young dogs that are entered for the January Pacific Coast Derby stake. This entry is seven in excess of the list closed July 1, 1904 (22 English Setters and 17 Pointers). The entries which closed on the 1st inst. comprise 28 English Setters, 1 Irish Setter and 17 Pointers. The class and quality of the Derby candidates is strongly demonstrated and comprises some of the best blood lines and crosses extant.

For the first time in many years an Irish Setter has been entered for the running in the Pacific Coast trials. The breed is well worthy the attention of our sportsmen. Irish Setters are not by any means overlooked on the Coast, where conditions climatic and geographical are most favorable to bringing the mabogany boys up in the front ranks of our field dogs. We extend our congratulations to Mr. Piepers of Los Angeles and hope to see his Derby dog up with the winners for the Los Angeles kennels contains some excellent and well bred Irish Setters. The entries, which closed July 1st, first forfeit \$5; second forfeit \$5 payable November 1st and \$10 additional for starters, are the following:

ENGLISH SETTERS.

B. J. Baum's (San Francisco) orange and white dog Victor B. (Cavalier-Rod's Sylvia), whelped Jan. 7, 1904. Owner, breeder.
J. W. Riplinger's (Seattle, Wash.) white and black bitch Cynthia (Ch. Stylis Sergeant—Ch. Pera), whelped July 22, 1904. Owner, breeder.
H. A. Jones' (Eureka, Cal.) white, black and tan dog Montauk J. (Bruce—Juna H.), whelped April 10, 1904. Owner, breeder.
Jos. E. Terry's (Sacramento) white and black bitch (Drake Windem—Mary Lou) whelped June 18, 1904. Owner, breeder.
Same owner's white and black bitch Same breeding.
Same owner's white, black and tan bitch Same breeding.
Same owner's white and orange bitch Bessie Mortimer (Kilgariff—Maggie F.), whelped April 3, 1904. P. D. Linville, breeder.
Same owner's white and orange bitch Merry Duchess (Fairland Dude—Merry Hart), whelped July 30, 1904. Chas. N. Post, Sacramento, breeder.
Same owner's white and black bitch (Kilgariff—Belle of the Ball), whelped—1904. H. S. Humphreys, Indianapolis, Ind., breeder.
Hugh Hopkins' (Minturn, Cal.) chestnut and white bitch Aunt Mame (Uncle B.—Sport's Belle), whelped Jan. 3, 1904. H. R. Edwards, breeder.
S. Christenson's (San Francisco) black, white and tan dog Goliath (Kilgariff—Maggie F.), whelped April 3, 1904. P. D. Linville, breeder.
Chas. N. Post's (Sacramento) blue and tan belton dog De Cbarney (Petrel's Count—Moxey Danstone), whelped Feb. 26, 1904. W. J. Baughn, Ridgeville, Ind., breeder.
Same owner's orange and white bitch Sunburst (Fairland Dude—Merry Heart), whelped July 30, 1904. Owner, breeder.
Same owner's white, black and tan bitch Light Heart. Same breeding.
Dr. E. E. Stone's (Napa, Cal.) black, white and tan dog Narcisse (Fairland Dude—Merry Heart), whelped July 30, 1904. C. N. Post, breeder.
Albert Betz (San Francisco) black, white and tan dog Merry Dude (Fairland Dude—Merry Heart), whelped July 30, 1904. C. N. Post, breeder.
Mrs. C. E. Wilson's (Ross, Cal.) white, black and tan dog Encinal (Clipper W.—Rod's Sylvia) whelped Sept. 8, 1904. Dr. C. E. Wilson, Ross, breeder.
Same owner's white, black and tan dog Sour Jack. Same breeding.
J. W. Considine's (Seattle, Wash.) blue belton bitch Miss Hap (Count Rowdy—Roxane), whelped Sept. 23, 1904. Owner, breeder.
J. W. Considine's white and black bitch Lady's Count Gladstone Jessie Rodfield Galore (Count Rowdy—Roxane), whelped Sept. 23, 1904. Owner, breeder.
J. A. Peebles' (Seattle, Wash.) orange and white dog Kipling Whitestone (Count Whitestone—Count's May Belle), whelped May 17, 1904. White and Peebles Seattle, breeders.
J. E. Lucas' (San Rafael) black, white and tan dog Uncle Dudley (Count Whitestone—Count's May Belle), whelped May 17, 1904. White and Peebles, breeders.
W. W. Van Arsdale's (San Francisco) white and orange dog Mendocino (Uncle B.—Count's Gift), whelped Aug. 24, 1904. Owner, breeder.
Same owner's white and orange bitch Madera. Same breeding.
Same owner's white, black and tan bitch Wawona (McCloud Boy—Countess Mark), whelped May 18, 1904. Owner, breeder.
Same owner's white and orange bitch Pima (McCloud Boy—Peach Mark II), whelped July 20, 1904. Owner, breeder.
Same owner's white, black and tan bitch Calpella (Count's Mark—Shasta), whelped May 26, 1904. Owner, breeder.
L. McDaniel's (Templeton, Cal.) white and lemon

dog Cloud Light (Bonner N.—White Wings), whelped Aug. 14, 1904. S. D. Merk, Paso Robles, breeder.

IRISH SETTERS.

Paul Piepers' (Los Angeles) red Irish Setter Lady Elcho II (Cb. Fred Elcho—Miss Lady Finglass II), whelped April 25, 1904. Geo. E. Walter, Rushville, Ill., breeder.

POINTERS.

W. B. Coutts' (Kenwood, Cal.) liver and white dog Tod Sloan (Bolin's Duke—Whisper), whelped July 19, 1904. Owner, breeder.

Same owner's liver and white dog James Wallace. Same breeding.

W. W. Van Arsdale's white and live bitch Sonoma (Dr. Daniels—Babe Jingo), whelped January 13, 1905. Owner, breeder.

F. H. Jermyn's (Scranton, Pa.) white and black dog Raffles (Ch. Senator P.—Miss Rap), whelped July 23, 1904. J. W. Flynn, San Francisco, breeder.

John Erikson's (Seattle) white and black dog Senator's Jack (Ch. Senator P.—Miss Rap), whelped July 23, 1904. J. W. Flynn, breeder.

J. W. Flynn's (San Francisco) black and white bitch May (Ch. Senator P.—Miss Rap), whelped July 23, 1904. Owner, breeder.

Same owner's white and orange dog, Senator's Don (Ch. Senator P.—Flynn's Dolly Jingo), whelped May 13, 1904. Owner, breeder.

Same owner's white and lemon bitch Dollie. Same breeding.

F. G. Schumacher's (Los Angeles) lemon and white bitch Lady Belle (Teddy Kent—Jack's Fashion), whelped May 20, 1904. W. J. Morris, Los Angeles, breeder.

W. J. Morris' (Los Angeles) white liver and ticked bitch Navajo (Teddy Kent—Jack's Fashion), whelped May 20, 1904. Owner, breeder.

Stockdale Kennels' (Bakersfield, M. R. Dodge, Manager) liver and white dog Combination Boy (Cuba Jr.—Bow's Daughter), whelped March 1, 1904. Owner, breeder.

Same owner's liver and white dog Redwood (Cb. Cuba of Kenwood—Petronella), whelped May 1, 1904. Owner, breeder.

Same owner's liver and tan dog Oakwood. Same breeding.

Same owner's white and liver dog Baywood. Same breeding.

Same owner's liver and white bitch Cypresswood. Same breeding.

C. E. Worden's (San Francisco) white and liver dog Hickorywood (Ch. Cuba of Kenwood—Petronella), whelped May 1, 1904. Stockdale Kennels, breeder.

Santa Cruz Show.

The three day show, at Santa Cruz, last week of the Pacific Sheep Dog Club (formerly the Pacific Collie and Old English Sheep Dog Club) is reported to have been well patronized by fanciers and summer visitors at the ocean side town. The show itself was a creditable one and deserving of success it being quite a novel undertaking to attempt a paying show at a resort so far from this city. The patronage and support of Santa Clara and Santa Cruz counties fanciers was good. San Francisco was well represented by well known fanciers and a number of entries. The quality of the show, on an average, was far better than anticipated by a number of the local fancy.

Chas. Lyndon, late of Montreal, Canada, made his initial appearance as judge at a Coast show, his decisions were generally acceptable, although in several instances the awards met with criticism. The presentation of prizes last Saturday evening took on the phase of an exclusive social function, a large attendance of handsomely gowned ladies with their escorts being much interested in the affair. Miss Ethyl Hagar, of this city, in a very gracious and pleasing style presented the cups and trophies to the winners, Hugh McCracken making proper announcement as each winner appeared.

The show was held in a large pavilion close by the beach. A feature of the show was the numerous entries made by the fair sex. During the show the 'Frisco fancy was well represented.

The officers of the club are P. W. Morse, President; Dr. H. C. Brown, Vice-President; Geo. W. Sill, Secretary-Treasurer; Irving Townsend, J. W. Baxter, Geo. Martin, Directors. Bench Show Committee, Chas. R. Harker, F. J. Torchiana 3rd, Geo. Martin, N. J. Stewart. Dr. D. E. Graves, Veterinary; J. C. Berrett, Superintendent.

The entries and number of dogs as shown in the catalogue are as follows: Great Danes, 5 entries, 4 dogs. St. Bernards, 8-4. Deerhounds, 1-1. Greyhounds, 3-3. Pointers, 8-9. English Setters, 11-9. Gordon Setters, 1-1. Irish Setters, 1-1. Field Spaniels, 4-4. Cocker Spaniels, 34-23. Collies, 30-24. Old English Sheep Dogs, 1-1. Bulldogs, 10-5. Bull Terriers, 4-4. French Bulldogs, 4-3. Boston Terriers, 11-7. Alredales, 5-2. Fox Terriers, smooths, 11-7. Fox Terriers, wires, 8-5. Irish Terriers, 7-5. Skyes, 2-2. Scotties, 1-1. Dalmatians, 1-1. English Toys, 6-4. Japs, 1-1. Dachshundes, 4-3. Poms, 1-1. A total of 173 entries and 125 dogs—enough for a two-point show.

The two upsets of the show were when Sir David, the Cocker that won at a wholesale rate at the May show, was beaten by Bobbie R. (Pittsburg Tommy-Mill Girl) owned and bred in San Jose, and also by Ch. Redlight for the Cocker Club special for best. The latter did not get a look in at 'Frisco. Redlight also beat Endcliffe Flash who took special for best at that show. Another jar to the fancy was the award for best to Mason's King over the Pointer

Boston. King was an exceedingly cowed actor in the ring, a habit we have frequently noticed in dogs that have been domiciled in the Woodlawn Kennels. No less an authority than Mr. James Mortimer told us at the 1904 show that Boston should go over King easily. We do not find King entered in the catalogue list. This dog is surely having a pottering time in reaching the championship mark, notwithstanding the cancellations of his wins last fall and the effort to annex the special at the May show this year—a pot house champion as it were. Collies and Cocker were the largest represented breeds and a good quality exhibit. Vern Tottie and Southport Philosopher were both absent. We are indebted to Mr. McCracken for the following list of wins:

AWARDS.

GREYHOUNDS—Puppy and winners dogs—1 Frank Schnitz Prince F., 2 J. M. Struve's Levi C. Local dogs—1 Levi C. Open and winners hitches—1 J. L. Cunningham's Isahellita.

ST. BERNARDS—Novice dogs—1 Mrs. D. Ken- naugh's Czar, 2 A. S. Olney's Teddy Roosevelt, 3 Miss A. McLaughlin's Bruno. Limit dogs—1 Mrs. L. T. Hankins' King B. Open dogs—1 Czar, 2 King B., 3 Bruno. Local dogs—1 Bruno. Winners dogs—1 Czar.

SETTERS—Puppy dogs—1 M. Perry's Dan. Novice dogs—1 C. L. Griffith's Buck, 1 Mrs. E. H. Webb's Duke Mahoning. Local dogs—1 Mrs. J. G. Piratsky's Dick Lee. Open dogs—1 C. D. Carman's Wad. Win- ners dogs—1 Wad, res Buck. Puppy hitches—1 A. J. Hogan's San Jose Belle. Novice and winners hitches—1 C. L. Griffith's Feathers. Local hitches—1 J. E. Willoughby's Dixie.

GORDON SETTERS—Puppy and winners dogs—1 Dr. J. J. Redmond's Jim.

IRISH WATER SPANIELS—Open dogs—1 Wm. Bay's Mike. Open hitches—1 Wm. Bay's Rowdy Girl. Winners—1 Mike, res Rowdy Girl.

FIELD SPANIELS—Local dogs and hitches—1 E. E. Kelly's Jolly, 2 Mrs. F. R. Walt's Teddy. Open and winners dogs and hitches—1 Mrs. C. B. Eunor's Reymo.

COCKER SPANIELS—Puppy dogs, any color—1 F. J. Ruh's Bobbie R, 2 W. N. Parrish's Mr. Lonjers, 3 D. J. Sutton's Shifty, res Mrs. Thos. Murphy's Roman Punch. Novice dogs—1 Bobbie R, 2 Mr. Lon- jers, 3 Caro Roma's Don Jose. Local dogs, any color—1 Mrs. M. Fredericksen's Taps, 2 Mrs. F. H. Carr's Prince, 3 G. P. Byrne's Darkie. Limit dogs, black—1 Bobbie R, 2 D. P. Creswell's Sir David. Open dogs—1 Sir David, 2 Mrs. C. M. Barker's Jeff. Win- ners dogs, black—1 Bobbie R, res Sir David. Open dogs, any solid color other than black—1 A. Wolfen's Ch. Redlight, 2 F. Budgett's Trixie. Open dogs, parti- colors—1 Geo. S. Thomas' Endcliffe Flash. Winners dogs, other than black—1 Ch. Redlight, res Endcliffe Flash. Puppy hitches, any color—1 G. A. Neibor- gen's Creole Belle, 2 D. J. Sutton's Agawan. Novice hitches, black—1 Creole Belle, 2 Mrs. D. W. Graves' Trotwood, 3 P. H. Dohle's Dolly Dainty, v h c W. H. Ames' Dixie, h c W. H. Hamby's Toto. Local hitches, any color—1 Trotwood, 2 Mrs. A. C. Rennie's Fraud, 3 Dixie, res Mrs. M. E. Fredericksen's Lady Nell. Limit hitches, black—1 A. L. Cresswell's Plu- meria Sally, 2 Creole Belle, 3 P. H. Dohle's Mill Girl. Open hitches, black—1 Plumeria Sally, 2 Trotwood. Winners hitches, black—1 Plumeria Sally, res Creole Belle. Open and winners hitches, any solid color other than black—1 G. A. Nieborgen's Patience.

COLLIES—Puppy dogs—1 Wm. Ellery's Val Verdi Perfecto, 2 O. J. Albee's Elwynn Chriss. Novice dogs—1 Hugh McCracken's Presidio Monarch, 2 Val Verdi Perfecto, 3 Elwynn Chriss. Local dogs—1 G. P. Martin's Cheviot Laddie, 2 Miss A. Huiskamp's Chips, 3 J. D. Waite's Heather King. Open dogs, American bred—1 Val Verdi Perfecto, 2 O. J. Albee's Ch. Ormskirk Emerald Jr. Open dogs, sable and white—1 Val Verdi Perfecto, absent Wm. Ellery's Southport Perfection. Winners dogs—1 Cheviot Laddie, res Presidio Monarch. Puppy hitches—1 O. J. Albee's Ormskirk Bonnie, 2 Mrs. G. H. Normand's Lassie, 3 C. H. Brigg's Kirkintuloch Lassie. Novice hitches—1 O. J. Albee's Conqueror's Lucy, 2 Wm. Ellery's Val Verdi Rose. Local hitches—1 Geo. J. Bancher's Lassie, 2 Mrs. G. H. Normand's Lassie. Open hitches—1 Hugh McCracken's Presidio Lassie, 2 Val Verdi Rose, absent Vern Tottie, Ravenswood Pearl, Astrologer Grace. Winners hitches—1 Orms- kirk Bonnie, res Presidio Lassie.

OLD ENGLISH SHEEP DOGS—Open—1 P. W. Morse's Shela.

DEERHOUNDS—Open—1 J. A. Lally's Daoul Roy. GREYHOUNDS—Open and winners dogs—1 T. Cooney's Sir Lipton.

POINTERS—Puppy hitches—1 E. Courtney Ford's Beauty.

BULLDOGS—Puppy dogs—1 F. Clark's Solano Mike. Novice dogs—1 Solano Mike, 2 Mrs. M. Mulli- gan's Dooley. Limit dogs—1 Solano Mike. Open and winners dogs—1 Phil C. Meyer's Endcliffe Baron, 2 Solano Mike. Novice hitches—1 F. F. Rodgers' Girtford Goody. Limit hitches—1 Girtford Goody, 2 Mrs. Charles R. Harker's Ivel Chaddie. Open hitches—1 Girtford Goody. Winners hitches—1 Girt- ford Goody, res Ivel Chaddie.

BULL TERRIERS—Puppy dogs—1 E. Attridge's Edgecote Baron. Novice dogs—1 W. Evans Dent's Milo. Open dogs—1 I. Sparrow's Croydon Czar. Winners dogs—1 Edgecote Baron, res Croydon Czar. Limit, open and winners hitches—1 Mrs. Chas. Reid Thorburn's Meg Merrilies II.

FRENCH BULLDOGS—Novice dogs—1 Mrs. H. R. Rand's Bully. Open dogs—1 Sterling Postley's Vivace. Limit and open hitches—1 C. G. Cook's Margot De Pantin.

BOSTON TERRIERS—1 Phil C. Meyer's Endcliffe Nohhy. Novice dogs—1 Phil C. Meyer's Glenwood Patten, 2 Miss Ethyl Hagar's Nifty. Open dogs—1 G. S. Halliwell's Bayside Chauncey, 2 Endcliffe Nohhy, 3 Nifty. Winners dogs—1 Bayside Chauncey, res Endcliffe Nohhy. Novice hitches—1 Phil C. Meyer's Glenwood Lady Bountiful, 2 A. M. Eaton's Tess. Limit hitches—1 Tess. Open hitches—1 Phil C.

Meyer's Endcliffe Tohy, 2 Tess. Winners hitches—1 Glenwood Lady Bountiful, res Endcliffe Tohy.

AIREDALE TERRIERS—Puppy, novice and local dogs and hitches—1 G. P. Martin's Briardale Rose. Open and winners dogs and hitches—1 Briardale Rose, 2 A. C. Kuhne's Colne Zaza.

FOX TERRIERS (smooth coated)—Novice dogs—1 H. G. Libbey's Pajaro Blizzard, 2 J. Leddy's Bob, 3 F. H. Chavarria's Don Jose. Local dogs—1 Mrs. Montroyd Sharpe's Joie. Open dogs—1 W. W. Stett- heimer's Tallac Chuck, 2 Pajaro Blizzard, 3 Boh. Winners dogs—1 Tallac Chuck, res Pajaro Blizzard. Novice, open and winners hitches—1, 2 J. Leddy's Debbie, Trixie.

FOX TERRIERS (wire haired)—Puppy dogs—1 W. W. Stettheimer's Tallac Marksman. Novice dogs—1 Mrs. J. C. Piratsky's Pajaronian Bristles, 2 Tallac Marksman, 3 N. H. Hickman's Mush. Local dogs—1 Pajaronian Bristles. Open dogs, American bred—1 W. W. Stettheimer's Tallac Private. Open dogs—1 I. C. Ackerman's Ch. Hummerstone Mearns, res Pajaronian Bristles.

IRISH TERRIERS—Open and winners dogs—1 H. M. Papst's Irish, 2 Phil C. Meyer's Glenwood Mixer. Novice hitches—1 J. C. Berret's Tyrone Lass. Local and limit hitches—1 F. J. Torchiana's 3rd Carlton Lonnie. Open and winners hitches—1 H. M. Papst's Sweet Nell, 2 Carleton Lonnie.

SKYE TERRIERS—Local entry—E. G. Haslaw's Travescoahsent. Open and winners dogs and hitches—1 Phil C. Meyer's Glenwood Waddles.

DALMATIANS—Local dogs and hitches—1 Miss Amy Morgan's Jessie.

ENGLISH TOY SPANIELS—Local dogs and hitches—1 Mrs. H. F. Anderson's Dorothy of Blen- heim, 2 Miss Alice Leland's Ethel Barrymore. Open dogs and hitches—1 I. C. Ackerman's Hummerstone Trilby, 2 Dorothy of Blenheim, 3 Ethel Barrymore, res Mrs. A. A. Roi's Pansy. Winners—1 Hummerstone Trilby, res Dorothy of Blenheim.

JAPANESE SPANIELS—Novice dogs and hitches—1 Mrs. M. L. Woodruff's Tokio.

DACHSHUNDE—Local dogs and hitches—2 H. A. Kempf's Walti. Novice dogs and hitches—1 Miss Ethyl Hager's Fritz. Open and winners dogs and hitches—1 Fritz, 2 Mrs. Phil Wand's Ch. Dougie E.

POMERANIANS—Open dogs and hitches—1 Mrs. N. J. Stewart's Atom of Chalecombe.

SPECIAL AWARDS.

Sweepstakes—Best in Show—Bulldog Girtford Goody. Best kennel, any breed, C. K. Harley cup, Phil C. Meyer's Glenwood Kennels. Best Terrier, any variety, W. W. Stettheimer cup. Best owned by a lady and best owned and shown by a lady, Bull Terrier Meg Merrilies II. Best from Santa Clara county, Airedale Briardale Rose. Best from Watson- ville, Collie Cheviot Laddie. Best Pointer or Setter from Santa Cruz county, Dick Lee.

Best Great Dane, Isabellita. Best St. Bernard, Czar, Best St. Bernard from Santa Cruz, Bruno. Best Setter, E. Courtney Ford trophy, Gordon Setter Jim. Best Irish Water Spaniel, Mike Bud. Best Field Spaniel, Reymo.

Best black Cocker Spaniel, Bobbie. Best, other than black, Ch. Redlight. Best hitch, any color, Plumeria Sally (black). California Cocker Club cup, members only, for best, Ch. Redlight.

Best Collie, Arthur Letts' cup, Cheviot Laddie. Golden West Collie Club trophy for best California bred, members only, Presidio Monarch. Wm. Ellery cup for best puppy, California bred, Ormskirk Bonnie. Best from Santa Cruz county, Cheviot Laddie. Best Pacific Coast bred dog, Cheviot Laddie. Best Coast bred hitch, O. J. Albee cup, Presidio Lassie. J. C. Berrett cup for best kennel O. J. Albee (Oakgrove Kennels). Cup for reserve dog in winners, Presidio Monarch.

Best Bulldog, Girtford Goody. Best of opposite sex, Endcliffe Baron. Best Bull Terrier, Meg Merrilies II. Best of opposite sex, Edgecote Baron. Best French Bulldog, Vivace. Best Boston, President's cup, Bay- side Chauncey. Best owned by a lady, Nifty. Best Airedale, Mrs. J. P. Norman cup, Briardale Rose.

Best smooth Fox Terrier, Tallac Marksman. Best wire haired Fox Terrier, Hummerstone Mearns. Best from Santa Cruz county, Pajaronian Bristles. Best Dalmatian, Jessie. Best Toy Spaniel, Phil C. Meyer cup, Tokio. Best Dachshunde, Fritz.

IN AND OUT OF CANADA.

Pleasant news to many field trials devotees is the recent ruling of the Canadian customs authorities at Manitoba to the effect that all dogs going to Manitoba for training, can be taken back across the line to take part in trials in the United States and then brought back to Manitoba to run in the Manitoba trials. This courteous action of the officials is due mainly to the efforts of Mr. Eric Hamher. It is believed that several handlers, by reason of this arrangement, who will train their strings in Manitoba will now take part in the North Dakota and Iowa trials at Grand Forks.

Wm. Bay's Irish Water Spaniel Ch. Rowdy Girl Assiniboine Tim-Assiniboine Bodego was served by W. F. Watson's Ch. Dennis C. (Ch. Mike C.-Biddy C.) This breeding should produce as fine a litter of Irish Water Spaniels as can be had anywhere in America.

Mr. Graham Bahcock had the misfortune to lose Glenwood Fiancee last week. Fiancee was a winner at the 1904 show and a very good Boston. She was, on Saturday, served by Roundsman and fifteen minutes after being placed in her kennel was found strangled, hanging suspended by her lead to a nail which the poor dog had accidentally caught her lead on.

Wm. F. Wattson sold to Ed Donohoe a good-look- ing three months' old Irish Water Spaniel dog puppy hy Ch. Dennis C. out of Kitty Kelly.

Stockton, Oakland and San Mateo are, it is reported, to hold shows this fall.

AT THE TRAPS.

At the California Win- Club shoot on the Ingle- side trap grounds Sunday some excellent shooting de- veloped during the regular club race and events following. In the main shoot over 50 per cent of the participants shot at a distance of from 30 to 34 yards from the line of five traps. Out of the five straight scores three of the shooters shot at 30 and 31 yards, a decidedly clever bit of work with a 12 bore ham- merless. The straights were: Clarence A. Haight (29 yards), A. M. Shields (40 yards), Dr. E. G. McConnell (31 yards), "Pete" Walsh (31 yards) and W. R. Mur- dock (31 yards). The club purse of \$75 was accordingly divided among the quintet of sportsmen who had the proper "shooting eye." C. C. Nauman, the Coast crack, who has been a bit off in form recently, shot from the 34 yard mark. Even at this distance Nauman dropped nine pigeons, out of the eleven, with a single harrel. Helost his fifth bird, an exceedingly difficult one at the distance. Otto Feudner (32 yards) allowed his sixth bird to fly hack unharmed to the pigeon loft. Ten men altogether were in the eleven hole each losing one bird out of the allotted dozen. W. J. Golcher (31 yards), while shooting in excellent form, got two baffling flyers that spoiled his score sheet. The pigeons supplied were strong ones and swift of wing, nothwithstanding, the shooting in the club race accounted for all but just an even dozen, which escaped out of the total hunch of 192 that were trapped.

Following the club match a five-man team race at six birds took place. The Blues won with a total of 28 out of 30 birds. Nine men were in a side pool amounting to \$22 50, eight of whom scored clean, and practically outshot themselves from the money. Feudner, Walsh, Dr. Bodkin and Frank Turner each scored straight in two following six-bird pools.

The shooters in the foregoing races shot under the same handicaps which prevailed during the club match.

The final race of the day was a miss and out pool in which five participants were engaged. The first round began at the 26 yard stat, each succeeding round, the shooters went back one yard until the 36 yard peg was reached. Shields was the first man out, his fifth bird escaping at 31 yards; Donohoe failed on his tenth, at 34 yards rise. Haight's eleventh pigeon, sent him to the bench, after he had gone back to 36 yards. Three men, Nauman, Feudner and Walsh were the con- tenders now from the extreme limit distance. Each, shooting in excellent form accounted for an even dozen of birds—of these 36 pigeons, 16 were grased with a single harrel. Pretty good work it was at the distance. Feudner and Walsh both lost their thir- teenth birds, dead out. Nauman stood on the score to close the round and got a lively "magpie" from No. 3 trap. Both harrels gave the bird a heavy freight to carry, but the pigeon was strong, circling about several times and once dangerously near the arbiting fence, the bird finally lit off No. 1 trap, upstanding and alert.

As clean a retrieve was made by Walsh as we ever saw, it was odds that the bird would fly, but Walsh has a crafty knack of his own in capturing a wounded bird, his skill did not fail this time, for he slowly and at times almost imperceptibly, got closer and closer until with a catlike grab the bird was in hand and Nauman thereby won the freeze out. Each man then shot out the fourteenth round, all killed. The scores in the different events were the following:

Club match, 12 pigeons, distance handicap, \$75 added, five moneys—

Sebastopol sportsmen have organized a gun club and have fitted up a trap shooting ground. The club started off with a list of fifteen members, shoots will take place every Sunday during the summer.

The Stockton Gun Club will smash blue rocks tomorrow, on the 16th inst. a live bird shoot will take place.

The Petaluma Blue Rock Club shoot on the Fourth was well attended. The main event was a "grab hag" shoot at 20 targets. The scores were: P. Murphy 17, Summerfield 15, E. E. Drees 14, Jos. Clark 12, Chas. Vallier 12, O'Rourke 12, Henry Hall 12, Robt. Steltz 11, J. C. McLaughlin 10, Wm. Chapman 10, B.

Pendleton 10, A. Saimina 10, F. Saimina 9, G. Bodwell 9, Guy Baggs 9, B. Doss 9, Jos. Steiger 8, F. Carter 7, Dr. Hall 7, B. Goodwin 7, M. Scott 7, George Brown 6, John Sullivan 4.

Bert Ayers, M. H. Fredericks and M. Flohr also shot. The extreme heat of the day was a decided handicap on the shooters.

The Martinez Gun Club held a shoot on the 2d inst. The scores were:

Twenty targets—C. C. Gill 12, "L. C. Smith" 15, H. Knauff 14, J. Mayo 10, F. A. Hodapp 12, F. Knauff 14. Ten targets—F. A. Hodapp 9, L. C. Smith 6, F. Knauff 5, H. Knauff 9, C. C. Gill 8.

Twenty targets—C. C. Gill 16, L. C. Smith 13, J. McNamara 13, F. Knauff 15, F. A. Hodapp 13.

Ten targets—F. A. Hodapp 7, L. C. Smith 9, F. Knauff 7, H. Knauff 7, J. McNamara 6, C. C. Gill 9.

A blue rock shoot took place at the Claremont Country Club, Oakland, on July 4th. Messrs. Cadman, Smith and Havens drew lots for first prize; Havens was the lucky one. Five other handsome presents were won in the following order: Cadman, Smith, Gould, Knowles, McNear, Jr.

The race was at 60 targets, handicap, the scores were:

	Handicap	Broke	Total
Cadman J. O.	0	46	46
Gould, Charles B.	10	32	42
Rickard, Thomas	10	18	28
Goodall, Edwin	15	20	35
Knowles, Harry	15	27	42
Worden, Clinton E.	15	20	35
Smith, Harry	18	28	46
McNear, Jr. G. W.	20	17	37
Havens, Harold	10	36	46
Prather, E. C.	10	21	31

Walla Walla has secured the 1906 shoot of the Sportsmen's Association of the Northwest. This was decided at the annual meeting held before the close of the recent blue rock tournament. A committee consisting of W. F. Sheard, of Tacoma; E. E. Ellis, of Seattle; Thomas B. Ware, of Spokane; P. J. Holohan, of Wallace, Idaho; and Maurice Abrams, of Portland, was appointed to draft a new constitution and by-laws to be presented for approval at the next annual meeting. One of the principal changes suggested is to permit outsiders to compete for money prizes.

Following is a list of officers elected: President, H. H. Kershaw, of Walla Walla; vice-president, P. J. Holohan, Wallace, Idaho; second vice-president, W. F. Sheard, Tacoma; third vice-president, T. B. Ware, Spokane; fourth vice-president, Sam McDonald, Harrington, Wash.; secretary, J. Smalls, Walla Walla; treasurer, J. C. Scott, Walla Walla; directors—H. O. Snell, Anaconda; Otto Feudner, San Francisco; Capt. Thompson, Vancouver, B. C.; A. P. Bigelow, Ogden, Utah; Dr. H. C. Watkins, Hoquiam, Wash.

The Sequoia Gun Club of Guerneville held its first shoot on the new club grounds on the 2d inst.

	3	3	6	6	1	5	5	4

Lambert	2	9	8	8	8	8	9	9
Wilson	7	9	8	8	8	8	9	9
Klein	7	9	8	8	8	8	9	9

The Emple Gun Club held the final club shoot of the season at Alameda point on the 9th inst. There was a good attendance. The weather was perfect and good scores were the order of the day. One accident occurred to mar the pleasure of the day, but aside from that all had a very enjoyable time.

Just at the close of the last event, we regret to state, the popular secretary of the club, J. B. Hauer, fell from the roof of the club house and sustained a very severe fracture of the left arm. Willing hands assisted him to the train and across the bay to the French Emergency Hospital.

The following are the scores for the day in the different events:

Club championship race, 25 targets—Mastick 9, Mastick (back score) 8, Wm. Janssen 18, A. J. Webb 24, Webb (back score) 24, 23, W. A. Sears 22, W. O. Cullen 22, J. B. Hauer 18, Bert Patrick 16, L. H. Allen 19, Fred Feudner 24, J. Peltiere 13. The highest average in this event was won by A. J. Webb with Fred Feudner second, W. A. Sears third, J. B. Hauer fourth and Wm. Janssen fifth.

Money match at 25 targets: First class—W. A. Sears, 20 yards, broke 22; A. J. Webb 22-19; F. Feudner 20-18; J. P. Sweeney 16-18; W. O. Cullen 18-16. Second class—Wm. Janssen 18-20; J. B. Hauer 20-20; L. H. Allen 18-13. Third class—Bert Patrick 18-16. Fourth class—Mastick 14-7. W. A. Sears having highest averages for the season in this event won first prize, a pair of gold sleeve buttons, and Fred Feudner second won a pair of silver sleeve buttons.

Special handicap, cash prize race, 15 targets—W. O. Cullen, 18 yards, broke 12; W. A. Sears, 20-11; W. A. Sears (back score), 20-14; W. A. Sears (back score) 20-10; A. J. Webb, 22-13; A. J. Webb (back score), 22-13; A. J. Webb (back score), 22-15; J. B. Hauer, 20-10; Iverson, 20-13; Iverson (back score), 20-14; Iverson (back score), 20-14; Wm. Janssen, 18-13; Wm. Janssen (back score), 18-12; Fred Feudner, 20-13; Fred Feudner (back score), 20-13; Fred Feudner (back score), 20-14; L. H. Allen, 18-11. Iverson and Webb tied for high average for the season in this event with Fred Feudner next up.

In the Sweeney record medal race, A. J. Webb and Fred Feudner each scored 19 straight. In the shoot-off the medal was won by A. J. Webb.

The Union Gun Club regular monthly shoot will take place at Ingleside tomorrow as usual.

There will be a mustering of the Millwood Gun Club members at Mill Valley tomorrow forenoon when practice shooting will take place.

Event No. 1, long distance, was not contested Sunday, a temporary fence back of the casting platforms making it impossible for the members to properly handle their tackle.

NOTE: Event 1—Distance Casting, feet. Event 2—Accuracy percentage. Event 3—Dexterity, (a) accuracy percentage (b) dexterity percentage; (c) not percentage. Event 4—Lure casting, percentage.

The fractions in lure casting are 15ths.

STRIPED BASS CLUB DINNER

A jolly gathering of anglers met at a downtown restaurant Wednesday evening, the company present being members of the San Francisco Striped Bass Club. "Jim" Lynch presided as toastmaster. "Doc" Watts gave an entertaining description of a trip to the Big Meadows, H. C. Copeland spoke of the angling sport at Klamath Hot Springs. Frank Smyth rendered several pleasing baritone solos. The club will hold an "outing" at Lake Merritt on the 30th inst. Among those present were: Jas. Lynch, Frank Smyth, Wm. Schad, H. Franzen, H. C. Copeland, W. C. Stevens, L. F. Davenport, Chas. H. Kewell, Bert Spring, N. E. Mead, Jas. Watt, W. Schmidt, W. H. McNaughton, Jr., O. D. Kelso.

SACRAMENTO RIVER FOULED WITH OIL.

Early this week, from Keswick to a point many miles south of Redding, the surface of the Sacramento river was covered with a thin scum of crude petroleum. This condition of the water was due to the heat prevailing at the Keswick smelter. A storage tank, containing 6000 gallons of fuel oil burst and emptied its contents into the river. Boating and bathing in the river was effectually stopped for the time being, the effect of the oil on trout and salmon, it is believed will seriously affect angling conditions.

SANTA CRUZ STREAMS STOCKED.

Game Warden Reed of Santa Cruz has stocked Corralitos creek, in the southern part of the county, with 25,000 steelhead and rainbow trout. The fish have been distributed in the tributaries in Brown valley and Hazel Dell. Twenty-five thousand were also turned loose today in Soquel creek.

The biggest catch of the season was made at Santa Cruz a few days ago when in about a half a day's sport a party of New Yorkers, composed of William W. Tompkins, Miss Elsie E. Goodwin and C. S. du Mont, landed forty salmon, of which number eighteen were hooked by Miss Goodwin. The estimated weight of the fish was about a thousand pounds.

Striped bass and also black bass are reported to be most abundant in French Camp, Walker, Ten Mile, Twelve Mile and Fourteen Mile sloughs—all being in the vicinity of Stockton. These tributary sloughs of the San Joaquin are at present apparently excellent feeding places for the fish. Many anglers have recently made good catches of large sized fish, of both varieties, in all of the sloughs where there were good stages of water.

DOVE SEASON.

The open season for doves begins August first in the following counties: San Mateo, Santa Clara, Placer, San Joaquin, Yuba and Stanislaus. In Sacramento county the open season begins today.

REMEDY FOR THE RATTLESNAKE'S BITE.

Superintendent B. F. Daniel of the territorial prison of Arizona, tells the following story descriptive of what is claimed to be a certain cure for the bite of the rattlesnake.

He first heard of it while he was engaged in mining in Mexico, and since he became superintendent of the prison he has seen two or three Mexican convicts who have been cured and who had the scars to show that they had been bitten. On the hand of one of them was the trace of a centipede's venomous contact, which poison also yields to the remedy. Its existence, however, is not widely known, even in Mexico, and is supposed to be almost entirely unknown out of the country.

"There is in every rattlesnake a small sac, about the size of a Mexican bean, attached to the intestines. This is filled with a brownish or black fluid, and that fluid is the cure for the bite. If it is applied immediately the patient will not even suffer any swelling and will entirely avoid pain.

Many Mexicans carry the fluid with them at all

times when they are in the mountain or desert. These Mexicans kill all the rattlers they can find, and most of them store the fluid in a receptacle made of a rifle cartridge shell, which is kept tightly corked."

In anatomical descriptions of the rattler no mention is made of this particular sac, though air sacs are numerous in the intestines of all members of the snake family.

Mr. Daniel claims he has seen Mexicans remove it frequently.

It may be that this fluid is the secret of the Moki Indians and accounts for the immunity that they enjoy from the poison of the rattler. Those who have attended their annual snake dances and have seen dancers bitten have wondered that the bites were not fatal.

At any rate, the secret of the immunity is one of the most carefully guarded secrets of the rites of the Moki and is kept within a secret order of the priesthood. Dr. D. J. Miller for years annually attended these dances and made a study of the ceremonies. The Indians formally adopted him not only into the tribes, but advanced him in the priesthood. The doctor wanted chiefly to learn the secret of the poison antidote, and he was told year after year that the next year he would be put in possession of the secret. But he died without it.

TRADE NOTES.

IT DOES NOT PIT.

The following letter was sent to Mr. J. S. Fanning: ST. THOMAS, ONT., May 20, 1905.

FRIEND JACK—It may interest you to know that I have recovered my Smith Ejector No. 200 250. You may say for me that "Infallible" will not pit a gun, for my Brother "Bob"—Bob Ensle and myself used the gun at the Dutchman's firing 120 shots from it on December 20th. The gun was not wiped out before it was stolen. I recovered it May 29th still uncleaned. It wiped out just as good as new, without a pit. Will have my shells loaded with "Infallible" for the coming season. JOE COFFEY. Box 482.

WHAT A GOOD GUN DOES.

The wizard of Spirit Lake and the Parker gun.—At Dubuque, Ia., June 13 and 14, Fred Gilbert, shooting the Parker gun, was high man with 392 out of 400, with 193 and 199 for the two days out of a possible 200. On the second day Fred came near equalling his two previous famous records of 200 straight. If he had, he would have said that "it was the gun."

PETERS' POINTS

At the Utica, N. Y., tournament, June 13-16, the New York City cup emblematic of the State Championship, was won by Mr. F. D. Kelsey, using Peters' factory loaded shells. Mr. Kelsey also won the Fulford Memorial Cup. Mr. Harvey McMurchy, the popular representative of the Hunter Arms Co., won second professional average, shooting Peters' Ideal shells.

At Indianapolis, Ind., June 16, C. A. Young won high average, losing only five targets out of 200. Dr. Britton was high amateur with 91½. Both these gentlemen, as well as the winner of the second general average, used Peters' factory loaded shells. The Grand Hotel cup was won by Joe Michaelis with the score of 46 out of 50. This cup carries with it the Inter-State Championship of Ohio, Kentucky, Illinois, Michigan and Indiana. Mr. Michaelis shot Peters' shells.

The tournament held on May 24th at Kane, Pa., was very well attended, and proved a success in every way. The high amateur average was won by Mr. J. T. Atkinson, and second amateur average by Mr. L. B. Fleming, both using Peters' factory loaded shells.

At the Ohio State Shoot, at Canton, Ohio, June 13th, 14th and 15th, the high average for the first day was won by Mr. Tryon, breaking 172 out of 180, and high amateur average on the second day by Mr. R. S. Rhoads, scoring 155 out of 160. Mr. C. A. Young averaged 96.2% during the entire tournament, and Mr. E. F. Haak of Canton, broke 102 straight, the longest run made by any amateur during the tournament. All these gentlemen used Peters' factory loaded shells.

ANOTHER WINCHESTER VICTORY.

The Dominion Day Tournament of the Vancouver, B. C., Gun Club, which was held at Fairview Park, Vancouver, July 1st, was well attended, and as usual shooters of the Winchester Repeating Arms Co.'s products carried off the honors of the day. The large number of contestants using Winchester goods went to show that these goods are held in as high esteem by the best shots of Canada as they are in the United States. The professional average of the tournament was made by W. H. Seaver, of San Francisco, Cal., with a Winchester "pump" gun and Winchester "Leader" shells. Score 105 out of the possible 110. The high amateur average was made by G. W. Miller, with a Winchester "pump" gun and the "Leader" shells, score 104 out of the possible 110. The second high amateur average was made by E. E. Ellis, with a Smith gun and the "Leader" shells, score 103 out of the possible 110. The third high amateur average was tied for by Dell Cooper and R. V. Rowe on the score of 100 out of the possible 110. Both Mr. Cooper and Mr. Rowe shot Winchester "pump" guns. The longest straight run of the tournament, which was 48, was made by W. H. Seaver, shooting a Winchester "pump" gun and the "Leader" shells. The second longest straight run, 42, was made by E. E. Ellis with "Leader" shells. The three man team trophy was captured by the Bellingham team, composed of Messrs. G. W. Miller, R. V. Rowe and Dell Cooper on the splendid score of 72 out of the possible 75, each man making 24 out of the allotted 25. All three of these men used the Winchester "pump" guns.

Improvement of Dairy Stock.

It has often been said, with much truth, that there can be found in the United States now much better specimens of the pure bred Jersey stock than can be found in England or in the channel islands, which are their native home. There are good reasons why this should be true. The first that were brought here were mostly of small size, and produced small amounts of milk very rich in butter fat. Naturally they fell into the hands of men who could afford to pay the high prices which they cost, and could also afford to feed them liberally, and did so. They were called the rich man's pets, and it required time to show that they were also good cows for the poor man who desired to make butter instead of selling milk.

In New England they were turned into the best pastures instead of being tethered out with a rope as their ancestors had been on the island. The exercise they gained in roaming the fields and climbing the hillsides gave them more muscles and larger frame. As our pastures occasionally failed in times of drought to furnish food enough, the farmers began to grow corn and other forage crops to feed them at such times. Many owners also supplemented the green feed in summer and the hay in winter with grain or food containing more of the milk-producing elements than hay alone. This kept up the good reputation of their pets and at the same time led their calves to grow larger and had a tendency to increase the milk production of each generation. As they became more numerous the process of selection began. Calves were raised from the best cows and those that were much inferior were not kept to grow many calves. More than all the rest, perhaps, the improvement was kept up by using only bulls from the best milk-producing cows, others being killed or sold to someone who wished to infuse a strain of Jersey blood into his native herds.

As a result of this practice it is as easy now to find Jersey cows weighing eight hundred to nine hundred pounds and giving sixteen to eighteen quarts, or thirty-four to forty pounds of milk a day, as it was forty years ago to find them weighing 750 pounds and producing ten to twelve quarts of milk a day. And they have also by good feeding and warm stables been made to give milk more months in the year, until now the difficulty with many of them is to get them to go dry even a few weeks before dropping their calves.

Something of the same improvement has been going on in the Holstein-Friesian stock during the last fifteen years, if not longer. Imported here as producers of milk to the amount of thirty to thirty-five quarts a day it was generally acknowledged that their milk was not rich in butter fat. They found in our pastures grasses more nutritious and better adapted to making butter than those growing on the diked meadows of Holland but they grew less luxuriantly, and their owners found it necessary to grow much green fodder to use in the summer and ensilage to feed during the winter to fill their capacious paunches, and keep up the large flow of milk. They also used the grain feeds with these, and if this did not show much effect upon the quality of the milk from these first cows, it has shown in later generations. The process of saving as breeding stock the progeny of those cows which showed by the Babcock method of testing the milk that their product contained the most butter fat aided in the good work, and now it is not unusual to find herds whose milk shows an average test of $3\frac{1}{2}$ to 4 per cent butter fat, while individual cows have shown $4\frac{1}{2}$ to 5 per cent at certain periods of lacta-

tion. There has also been a tendency to round out the forms of the animal better, thus given them a better appearance when fitted for beef.

But great as has been the progress made by these two pure breeds under American handling, it is but small when compared with that made by the use of the pure-bred bulls for crossing upon our native cattle, when the cross has been made with good judgment and good feeding and care has accompanied it.

To understand some of the causes of success or of failures in this grading up of the native herds or scrub stock, as some advocates of the pure breeds prefer to call them, it is necessary to look back a little for the history of those herds. They are not native in the sense of indigenous to America, but are descendants from the cattle brought here by the early settlers of New England, mostly between 1624 and 1670, or a little later. They came, as did the Puritan settlers themselves, from nearly every county in England, and probably were selected from the best those countries had.

Devonshire sent her little red cattle and Durham her larger cattle, well known then for beef qualities, though the Collins Brothers had not then begun to develop them into what we know at Short Horns. Hereford sent some white-faced cattle, and the Long Horns were doubtless from Yorkshire and Lancashire. There were probably a few polled cattle from Norfolk, and from the northern countries, or from Scotland itself, came the Ayrshires, famous for milk production even then.

Those early settlers certainly had but little knowledge of the principles of scientific breeding for improvement, but as the settlements were not near together and but few bulls were imported excepting in the dams, there was probably much inbreeding which served to fix the characteristics of the various breeds so firmly that some of the animals descended from them could have been shown as lately as a half century ago as high grades of the various breeds.

Advantage of Pure Bred Bulls.

1. When a farmer thinks of buying a dairy bull to improve the quality of his future cows, he should look to the quality of the bull, not to the cheapness of the price. The character and reliability of the breeder go a great way in such a transaction. He should try to buy a "future" of good quality that will run on for generations, and that will help increase the good effects of every future sire that may be used.

2. He should always breed in the line of his first effort. If his first bull was a Holstein, or Guernsey, or Jersey, or an Ayrshire, he should not break up the line of prepotencies and make a rope of sand of it. By a wise subsequent selection of sires of the same breed, selecting all the time for breeding power, he will enlarge and broaden the stream of dairy heredity. What we are after, in reality, is a better and stronger heredity.

3. About the most reliable basis of calculation as to the power of transmission, or, as it is called, the prepotency of the bull, is the dairy character of the grandmothers and great grandmothers on both sides of his pedigree. He is the stored up result of what lies back of him. The quality of his ancestors will have more effect on his offspring than the performance of his mother. She gives to him of what she inherited, more than of what she does. She may be rich in inherited qualities, and yet for some reason be herself only an ordinary performer. On the contrary she may be a large performer at the pail, simply as a sport, but not having a strong tide of inheritance in a dairy direction, she has nothing to convey to son or daughter. This will explain why so many Shorthorn cows that are large performers themselves, fail utterly to convey their own

dairy quality to their progeny. Their line of breeding is from a beef heredity for many generations, and they give to their progeny what they inherited. A cow breeds from her blood, not from her udder. So we must have dairy pedigree as well as dairy performance, if we get our money's worth when buying a bull.

4. There is one thing more quite necessary to consider in buying a dairy bull. Does he indicate from his appearance that he possesses a strong, individual character? Is he of clear, determined dairy type, full of nerve energy, so that he will take possession of the female current, with which he is brought into contact, and thus stamp his heirs with the quality of the mothers that lie back of him?—*Hoard's Dairyman*.

Good Prices for Jerseys.

The annual sale of imported Jerseys at Linden Grove, Coopersburg, Pa., property of T. S. Cooper & Sons, took place recently. In all 103 head were disposed of. An aggregate of \$61,060, an average price of \$642 per head, was received for 95 head.

The highest prices paid were \$10,000 for bull Eminent 61631, by Geo. E. Peer of Chili Station, N. Y.; \$2525 for cow Reminder's Duchess 187420, by Bowmont Farms, Salem, Va.; \$2500 for cow Fontaine's Oxford Pride, by Gedney Farm, White Plains, N. Y.; \$2000 for heifer Agatha's Dainty Lady 187478, by Gedney Farm; \$1600 for cow My Gray Buttercup 187416, by Gedney Farm and \$1500 for cow Eminent's Evasion 187443, by Bowmont Farms. The 95 head mentioned included 8 bulls, 42 cows, 28 heifers and 17 calves. The 8 bulls brought \$12,520, an average of \$1565 per head; the 42 cows brought \$31,465, or \$749 per head; the 28 heifers brought \$12,615, or over \$450 per head, and the 17 calves brought \$4460, or \$292 per head.

Adding Butter Color to Salt.

Butter color can often be mixed with the salt and made to color the butter satisfactorily. The evenness in which the color is added in this way depends a great deal on the size of the granules when you add the salt. First mix the color thoroughly with the salt, then add this colored salt to the granular butter in the usual way and by allowing it to stand between workings the butter may be evenly colored. Working a number of times, but a little at each time, is better than trying to do all the working at once. —*Hoard's Dairyman*.

The day of sudden riches and great fortunes in the cattle business is past—it has departed along with the buffalo and the Indian. A realization of this fact and an earnest endeavor to adjust himself to the new conditions is the only salvation for the cattlemen of today. The raising of cattle is no longer in the class of the faro game. It is a hard, cold business proposition. We must have no more of this buying of a bunch of Texas doxies, turning them loose and coming around after them in two or three years. Cattle must now be raised by hand, so to speak. The business has lost its fascinating point—the gambler's chance—and careful business methods must be used to insure success.

One acre of alfalfa will pasture ten hogs from the opening of spring until fall. A hog weighing 100 pounds when turned out will double its weight by fall without any other feed. This means 1000 pounds of pork against 600 made by an acre of corn. Some claim that it is better to give no other feed, furnishing them with plenty of water and salt, but our experience is that a little corn or other grain fed every day is of great advantage. One or two pounds fed the first thing in the morning will suffice for each animal.

Sober up on Jackson's Napa Soda.

In the Sheep Fold.

Sheep are always improving or they are deteriorating.

When you buy a sheep for breeding be sure it is better than what you have.

The secret of successful sheep husbandry is to keep good sheep and in small flocks.

Unless there is a continued effort to improve the flocks they will go backward instead of forward.

In purchasing a ram get one fully developed, strong in limb, straight-shaped and thoroughly typical in his breed.

If a radical change in the rations is made too suddenly, growth of both body and fleece is liable to suffer a check.

The lamb carcass can be produced for less than the aged sheep carcass and will sell for one-fourth more in market.

Uniformity in wool can only be accomplished by regular feeding and keeping the sheep in a healthy and thriving condition.

Feeds are higher than usual, necessitating greater care in the management of flocks, if the profits are to be maintained.

Wool must grow steadily and uniformly as it will have points, that is, weak places here and there that are very damaging.

Hand Separator Cream.

It has been well said that, considering the small volume of gathered cream compared with the whole milk system, there seems little reason in every farmer not having a perfect arrangement for keeping it. But it must be acknowledged that so far as we are able to learn by far the greater part of the cream from hand separators is still kept in cellars with vegetables and all kinds of things that have an odor that is not an addition to the flavor of the cream.—*Farmers' Advocate*.

Butter makers differ as to the relative advantages of the systems of salting butter commonly employed. Some prefer the brine salting process while others place most confidence in the old-fashioned system of dry salting. In theory the brine salting system is the better, as when this plan is followed and the brine is introduced while the butter is still in the form of minute granules the grains become evenly coated all over with a thin layer of salt and in this way it is uniformly incorporated. When the dry salting system is followed considerable difficulty is experienced in effecting uniform incorporation of the salt with the mass of butter, even when in perfectly granular condition. One of the objections to the brine salting system is that it does not admit of such heavy salting as the more common system of applying the salt dry.

The thick, stringy condition sometimes noticed in cream is usually due to the presence of what are known as slimy orropy bacteria, says *Hoard's Dairyman*. They produce a ropiness in milk that may be all the way from a slight viscosity to milk that is so thick it will not pour out of a dipper. When such conditions occur there is but one way of stopping the trouble, and that is by a liberal use of hot water and washing soda. The water must be scalding, and all utensils that are used in handling the milk must be thoroughly cleaned with brush, hot water and soda.

FOR SALE

A three-year-old filly by Zombro 2:11 and a four-year-old filly by Del Norte, both out of Manilla by Antrim (sire of Anzella 2:06 $\frac{1}{2}$). Erie, brown stallion, grandson Eleotoneer, perfect roadster and excellent stock horse.

Ladies' trap horse, two ladies' saddle horses, road cart, sulkeys, buggies, rockaway with pole and shafts, double and single harness, saddles, etc.

This property belongs to the estate of GRANT LAPHAM, deceased. The business and good will is also for sale. Stable with room for 55 horses for rent. Apply to

1309 Pearl St., Alameda, or

Attorney, Park Row, Alameda

The Scrub Must Go.

The *Stockman and Farmer* for nearly a quarter of a century has been trying to tell its readers the advantages to be gained by breeding up their live stock. There was a time when the margin between the price of good cattle and scrubs was not so great as now. There are yet some Texas ranchmen, we are ashamed to say, who argue against the use of improved blood. We are pleased to say, however, that these are a small minority, and their kind are becoming fewer and fewer each year. We doubt even now if one of these mos-backs, although he might so advise, would himself stock his range with a bunch of longhorned scrub cows and scrub bulls.

Stockmen are in the business to make money, and they must produce that which the market demands. Common stuff is not wanted now by anybody. At least the big packers, or little ones either, do not want scrub stuff, as the market shows the demand is for cattle of improved breeding and in good condition. While the market is bad enough still a fair class of stuff has brought fair prices, and always will. The other kind is hardly wanted at all. Texas has made great strides in the improvement of her cattle, but this work is hardly yet begun. Better and better, and still better cattle must be the slogan. Speaking along these lines the *Drovers Journal* in a late issue said:

Stockmen who have been on the Kansas City market the past few days have had an object lesson in the importance of growing high grade cattle that ought to give a stimulus to the grading up of the herds of the southwest country. While all kinds of cattle have been declining and thin stock was a drug on the market buyers from the corn belt states were scouring the yards for high grade stock steers, and many of them had to be satisfied with something less to their liking or go home empty handed. There were plenty of cattle in the pens and owners were anxious to sell them at prices practically of the buyer's own making, but the quality was not right. Cattle are very much like potatoes in one respect. When prices are high any kind will sell, but the cheaper they get the more particular purchasers are as to quality. Dogy steers are cheap because nobody wants them, and nobody wants them because they are cheap—cheap in quality as well as in price.

Dogy steers never make market topers, and still, as a rule, it costs more to put one hundred pounds of gain on them than it does on high grade steers. The high grade steer has a better frame on which to put flesh, has more stretch to him, has a better constitution, is a better feeder and yields more pounds gain to the bushel of grain than the dogy. Some times it pays to feed dogies, just as it pays sometimes to raise small potatoes—if you can't raise large ones. If potatoes are scarce and consequently high the frugal housewife will be content to prepare the little ones for the table notwithstanding the extra labor and patience required. When beef steers are high, packers will buy dogies and pay good prices for them. In the fall of 1903 several feeders took dogy steers to their feed lots from the Kansas City market, buying them at very low prices. In the early summer of 1904 all kinds of beef steers were high and these dogies, if fat, commanded good prices and showed good profits for the feeders.

Right now all kinds of beef steers are low and the best are preferred by the killers, because they are relatively cheaper than the doggies. If the packers want cheap beef now they buy high grade steers, because there is a high per cent of kill to them. This is the case nine times out of ten. Observing feeders see this, and that is why they want the high grade stockers and feeders and willing to pay the prices for them. The moral is plain as day. It is that it behooves stockmen to cull out their pennyroyal breeding

stock and use only the best females and pure bred males for breeding purposes. It pays to do so now, and each succeeding year it will pay bigger. The dogy has had his day.

The Swine Industry.

One of the great industries of our country and the one that a very large majority of the farmers are more interested in than any other, and the one that brings in more money frequently to pay taxes, store bills and doctor bills, is the swine. Truly the hog is the gentleman that roots the mortgage off the farm. Knowing the great importance of this line of farmers' work is the motive that induces me to present a few thoughts that may be beneficial to some brother farmer. If there is any one class of people that deserve the best of everything I believe that class is the toilers of the soil, the ones that feed the world.

This brings me to speak of one of the good things that every farmer should have; that is a herd of well bred hogs. The day of the bazle splitter is past, when it took twelve to twenty-four months to mature them, and fit them for market, and if one at that age weighed 250 or 300 pounds, his owner thought he had a whopper.

In starting in the business a man should be very careful in the selection of his foundation stock. The first thing for him to do is to decide what breed he would rather handle, and there are many good ones. The Berkshire, Duroc-Jersey, Chester Whites, Poland-Chinas, Tamworth and Thin Rine are all popular breeds and have their admirers. I believe this is as it should be, as it gets up a spirit of competition and the different breeders strive to excel in bringing their herds to the highest point of excellence. I believe this idea of difference of opinion being right was fully demonstrated when the preacher said: "If we were all of the same opinion, then every man would want my wife Sallie." Just then one of the men spoke up and said: "Yes, and before God, if they were all of my opinion nobody would want her,"—and so it goes.

I shall now speak of the general make-up of the future brood sow. She should have a short head, wide between the eyes and a good, plump eye, a motherly look, ears not too large. Discard a hog with saddle skirt ears. They are difficult to drive, their ears blind them. Head well set up to the shoulders, a good broad back slightly arched, good hams that come well down on hocks, deep sides and good length, must be roomy in order to raise large litters. Ought to have ten or twelve well developed teats and of course should be chosen from a dam that is known to be a good suckler and that raised large litters. She should have a large bone and stand well upon her feet. To the casual observer these would appear to be small matters, but I wish to say that the farmer who succeeds is the one who looks well after the small details of the farm.—E. W. Robinson in *Ec.*

The Mule.

Although the mule has no pride in his paternity nor hope of posterity, it nevertheless has an ancient if not honorable lineage, says a writer in an exchange. The first record of it, at least in bible times, is to be found in the thirty-sixth chapter of the book of Genesis, where the historian records the descendants of Esau. Dukes were plentiful in those days, but none of them seem to have done anything in particular to beget other dukes, until we read of one Anah, the son of Zibeon. Zibeon does not seem to be a duke at all, the nobility not running in that line, but he begat a son named Anah, of whom the historian pauses to record as follows: "This was that Anah that found the mules in the wilderness, as he fed the asses of Zibeon his father." This man did something, and is about the only one of the lot. He discovered apparently by accident, the method of

hybridizing. We can well imagine his surprise when he saw the long eared colt browsing among the cacti and sage brush in the wilderness and discovered that it was neither like its sire nor like the broncho which he owned as its dam.

Hybridizing fell under the ban of the Mosaic law, but so respectable had the mule become that it seems to have been the favorite animal of the princes of the blood, for Absalom on that fatal day when his army was defeated in the trans-Jordanic country attempted to flee away on a mule. Possibly the princes were trying to dodge the law that they should not multiply horses to themselves by doing what seemed the next best thing, using mules as their favorite chargers, an ancient example of keeping the letter of the law while violating its spirit—not uncommon even among very highly respectable people in later times. Therefore do not despise the mule, but consider him, and consider him wisely, and consider also whether it is not quite as profitable in certain sections of the country to grow mules as horses.

New Way to Make Butter.

By way of a Chicago paper we learn that a committee of the Franklin Institute of Philadelphia has made public a report on the Taylor process of making butter, and recommending that Mr. Taylor receive the John Scott medal and premium. In this process sweet cream is poured into shallow pans, the bottoms of which are covered with absorbent pads. These pads are composed of heavy white blotting paper and absorb from the cream nearly all of its constituents except the fat. The cream fat remains as a layer on the surface of the pads and after several hours standing it may be rolled off. In this condition the product contains rather too much water and milk proteins; on this account, and because of the absence of salt, it does not keep well. If, however, the separated butter fat be worked and salted in the same way as the ordinary churned product, the result is a fine grade of butter. The process has the advantage of cheapness, since the pads may be used over and over again lasting it is said for six months of daily use. The labor of churning is avoided, and, on account of the use of fresh cream instead of that which has stood to ripen for several days, the finished product keeps better than butter made in the ordinary way.

Dairy System Pays.

First select some good breed, the one best adapted to your locality, and most to your liking, and then establish a system in caring for the herd and be regular in carrying it out in every detail, writes E. M. Pike in *Massachusetts Ploughman*.

Feed at the same time each day, and the same amount. Do not think that you can feed three times one day and feed the same amount at two feeds the next and let the cows go with the third feed and get the same result. It does not matter so much how many times a day you feed as it does to feed the same number of times each day. Water as regularly as as you feed and do not forget to card and brush the cows as regularly as you feed and water.

Even the cleaning of the stable and all other work about the stable should be done at the same time each day, as the cows will soon learn to know what time they are to be fed and watered and worked around, and will expect it, and become uneasy and restless if the expected operation is delayed, but will lie down peacefully and quiet after it is performed.

Cows should have their place in the stable, and be tied in the same stanchion each time. This will avoid much confusion in tying them up, as each cow will soon learn her place and take it, and besides a tieup full of cows looks much better if the cows are arranged in order according to size, being graded from one end of the tieup to the other.

Again, it is much more convenient to feed a lot of cows if they are in the same place each time so that the feeder knows just which one he is feeding even if he cannot see her. As hardly any two could require the same amount, this will be found a great convenience. Feed regularly; water regularly; groom regularly; tie up regularly, but above all, milk regularly.

A cow allowed to go any length of time beyond her usual milking time becomes uneasy and restless to the detriment of both quantity and quality of milk.

A cow also becomes used to a milker and should have the same one right along.

The idea of a man, whom I recently met, although quite original and perhaps having some good features, was I believe, wrong in the main. He let his cows come into the stable and take their place anywhere it happened, and then at milking time he and his men began at one end and milked the cows as they came to them. This he said he did because it was difficult to get good milkers, and in this way he got a chance to milk each cow himself once in a while and find out if she was all right. He seemed to forget that the poor milker got the same chance to poorly milk all of the cows as well as himself and thus damage the whole herd.

Establish a system about your stable work and then abide by it to the nearest perfection possible and see if it does not pay.

Just so sure as the number of grazing animals is allowed to increase beyond the capacity of the range we must expect more or less loss. It is never safe to attempt to graze seventy-five or eighty head upon a section of land which will only safely carry fifty head the year round, although if natural conditions are exceptionally favorable during a particular year as they are this season a man may overstock his pastures and realize a profit during that year. On the contrary, should the natural conditions not prove to be as favorable as the stockman had hoped his losses at seventy-five or eighty head to the square mile will largely exceed the normal losses were the land stocked only to the extent of its minimum carrying capacity. Not only will the pecuniary loss, or the probability of such loss, be less and the actual profits on the cattle be more in the case of undergrazing, but the land itself will gradually increase in value and the grazing capacity be augmented from year to year. In one case the land is stocked beyond its carrying capacity, so that it rapidly and continuously deteriorates in value; in the other case constant increase in value may be confidently expected, both of the land and its products during the same series of years.

Sponges. S. Adderley, 307 Market St

Warranted to Give Satisfaction.

Gombault's Caustic Balsam

Has Imitators But No Competitors.

A Safe, Speedy and Positive Cure for Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

The Lawrence-Williams Co., Cleveland, O.

Judging Live Stock.

Stock judging is a skill naturally possessed by some and it is a science that the breeder and feeder should understand. The agricultural colleges are giving practical instruction in judging live stock that is one of the most fascinating studies of the college, as it includes the knowledge of improved stock breeding. The students visit many prominent breeders of the different breeds and at the state fairs and at the Chicago International they test their judgment and skill.

Prof. Ferguson, of the Michigan Agricultural College, gives the following rules to his students:

1. Have confidence in your own powers.
2. Concentrate your thoughts on the breed and breed type of the animals you are working upon.
3. Do not hurry. Take time to decide. Having done so, stick to it. "Be sure you are right, then go ahead."
4. If possible watch the class as it comes into the ring. There is often something about the style and carriage of the winner which marks him out as he walks.
5. Take a minute to look over the line from as near the center as possible in order to get a general idea on conformation.
6. Then pass slowly clear around the ring, inspecting each animal from front and rear.
7. Never be satisfied without using your hand in addition to your eyes. Appearances are often deceitful.
8. In handling always work from front to rear. With cattle work on the right side, approaching the animal from behind.
9. First pick out the winner of the class; then use it as your standard in placing second and third.
10. When first is placed, briefly sum up its strong points.
11. Look for characteristics and most common breed defects.
12. Pay no attention to either the men with you or the crowd around you. Your business is with the animals.

The Dairyman's Four C's.

Washing the churn is something we cannot be too particular about. First, rinse out in clean, cold water, then wash in hot water and scald thoroughly. If you have a dash in your churn, take it all apart and see that it is well scalded, and then dry. Keep your churn in a clean, dry place. Don't let it stand dirty any longer than possible after it is used. All milk utensils should be rinsed in cold water then washed in hot water and scalded. Don't use soap, a little soda is better and will help to sweeten them and remove all odors. Have cloths and towels on purpose for that and see that they are kept clean and pure. We notice where there is complaint about butter not gathering in cold weather is mostly because the cream is too cold when churned. An engineer without water or a steam gauge on his engine is no worse off than a dairyman without a thermometer. Keep your cream well stirred. No unnecessary delay should be allowed between the process of handling the cream and making the butter.

The women of the farm should assert their rights and have the improved methods of caring for milk and butter and thus have a desirable article to sell which has not cost so much hard labor to produce. It is said butter costs from eleven to thirty cents per pound. We should manage our ways so our butter will not cost so much, and that is by introducing better cows, feeding better and employing better methods throughout the work. A noted writer says there are four C's to look after sharply in successful dairying. They are cows, care, comfort and cleanliness.—*Exchange*.

About Pigs.

Grow the pigs from the start. Don't fatten them, but grow them, put on the

muscle, form and bone. Build the frame, the fat can go on later. A fat little pig is in poor condition to grow. You want them smooth, mellow, stretchy, and you will then build a good form.

It is better to raise eight good pigs than twelve inferior ones. There will be more money in the former than in the latter, though they outnumber them. Quality is more important than quantity.

The pig is a clean animal, if you will allow him to be so, although some people compel them to wade through mud leg deep to eat their feed. This is not their fault.

All troughs and feeding pens should be kept scrupulously clean. Don't let any feed remain after they get through with the food in the trough. It sours, moulds and is unhealthy.

If you permit the beds of your little pigs to become wet, damp and unchanged, your pigs will soon be troubled with sore tails and scours.

The healthy pig is the profitable pig. Do all things towards improving and maintaining the health if you would make a profit in the hog business.

Be sure the pigs have a trough for themselves that cannot be reached by the mother or other hogs. It teaches them to eat and prevents any shrinkage during weaning. It is a self-weaner.

The wolf problem has become a live issue around Pinedale, Wyo. Cattlemen are growing desperate because of the raids by wolves. Hundreds of cattle have been lost on the upper ranges, the wolves even attacking grown animals and hamstringing them. A big bounty is being offered to hunters for old scalps.

Sober up on Jackson's Napa Soda.

KENDALL'S SPAIN CURE

Continues to be the one reliable remedy for Spavins, Ringbones, Curbs, Splints and all forms of lameness.

AT LOS ANGELES TRACK

PAT ROSE, Driven by F. E. WRIGHT, Winning Final Heat of 2:45 Trot in 2:12½ from CHARLIE T., Driven by A. L. McDONALD

From a Photograph Made for the BREEDER AND SPORTSMAN by the Late B. S. McMAHAN.

MLR

PHOTOGRAPH OF DAN PATCH 1:56 IN ONE OF HIS WONDERFUL MILES

This Engraving was made from a Photograph taken of Dan Patch in one of his Marvelous Speed Exhibitions. It shows Dan Flying Through The Air with every foot off of the ground, and is as natural and life-like as if you saw him in one of his sensational miles. You will notice that Dan Patch is pacing in his smooth and majestic manner, while the three runners are urged on by voice and whip in their tremendous efforts necessary to keep up with Dan in his record-breaking miles. This picture shows exactly the way Dan makes his exhibition miles. The runners are used to stimulate Dan to greater efforts, because he goes faster when he has a horse to beat. Dan wants and enjoys a close and exciting race, and he will not pace his fastest clip unless he is in company. No trotter or pacer can go fast enough so we use high bred running horses. **Watch For Dan's Exhibition Dates This Fall. He Is Faster Than Ever.**

DO YOU WANT MORE SPEED?

Dan Patch Made Eight World Records After Eating "International Stock Food" Six Months. It Always Gives A Good Appetite, Extra Strength, Endurance, Courage And Nerve Force Which Is Sure To Give Your Horse More Speed. You Cannot Afford To Start Your Race Horse This Year Without Feeding "International Stock Food" Every Day.

DAN PATCH 1:56 EATS

"INTERNATIONAL STOCK FOOD"

3 FEEDS FOR ONE CENT

We feed "INTERNATIONAL STOCK FOOD" every day to our stallions DAN PATCH 1:56.....DIRECTUM 2:05¼.....ARION 2:07¾.....ROY WILKES 2:06½.....BUTONWOOD 2:17.....DIRECTUM JR. Also to our One Hundred Brood Mares and to all of their colts because it gives them better digestion and assimilation, keeps the blood pure and rich and thoroughly strengthens the entire system and prevents disease. Signed by M. W. SAVAGE, Proprietor of "INTERNATIONAL STOCK FOOD FARM" and also of "INTERNATIONAL STOCK FOOD CO."

IT MAKES EXTRA SPEED

BLACKSTONE, MASS.

International Stock Food Co.

DEAR SIR:—I am a constant user of your "International Stock Food" and I have no doubt that it helped Redondale reduce his record last year to 2:12. Please send me pictures of your stallions.

Yours respectfully,
DAN J. KELLY.

MONROE SALISBURY REPORTS.

M. W. SAVAGE. YONKERS, N. Y.

Dear Sir:—Your "International Stock Food" helped me a great deal in keeping Consuella S. 2:07¾ and Judge Green 2:09 strong this year, both sired by your stallion Directum 2:05¼. I think Consuella S. can trot in 2:05 and Judge Green can beat her. Have you any Directum colts to sell or lease?

Yours truly, MONROE SALISBURY.

SPLENDID FOR TROTTING STALLIONS

BANKSVILLE, NEB.

International Stock Food Co.

GENTLEMEN:—I have used "International Stock Food" for over three years and find it very satisfactory. I tested it on a standard young trotter and never saw a colt grow and develop so rapidly. He is two years old and weighs 1050 pounds. Yours very truly, B. W. BENJAMIN.

30 CENTS WORTH WILL OFTEN MAKE YOU \$50.00

It is nothing uncommon for a months use of "International Stock Food" to add \$50.00 to \$100.00 to the selling price of a colt or horse. Its use will always make you big money.

"International Stock Food" with the World Famous Line—3 FEEDS for ONE CENT—is known everywhere. It is prepared from high class powdered Roots, Herbs, Seeds and Barks and Purifies the Blood, Tones Up and permanently Strengthens the Entire System, Cures and Prevents Disease and is a remarkable aid to Digestion and Assimilation so that each animal will obtain 20 to 25 per cent. more nutrition from all grain eaten. We positively guarantee that one ton of "International Stock Food" will make you \$360 net profit, over its cost in growing colts or in strengthening the system and saving grain for older horses. The use of 100 lbs. will make you a net profit of \$18.00 in a saving of grain in your regular feeding. It keeps horses strong and vigorous and gives them more nerve power, which produces more speed. It will make your stallions surer foal getters and cause brood mares to raise better colts because it increases the flow of healthful milk. "International Stock Food" is splendid for all breeding animals and is Equally Good For Horses and Colts and all other kinds of stock. It is perfectly harmless even if taken into the human system.

The use of "International Stock Food" for 30 days will often increase the selling price of a colt or horse \$50 to \$100. Be sure and test it before sending your horse to the sale ring or before a buyer comes to your barn. Its use will make you more money than anything you ever fed your horses. It is especially valuable to a horse with a "poor appetite" or in a run down condition. It will quickly strengthen and fatten the poorest horse on earth.

"International Stock Food" is universally acknowledged as the leading High Class Medicated Stock Food of the world, to be fed in small amounts as an addition to grain in order to give better digestion and more vitality. It is endorsed by over Two Million Horse Owners and One Hundred Thousand Dealers who always sell it on a "Spot Cash Guarantee" to Refund Your Money if it ever fails for any recommended use. We guarantee "International Stock Food" to Save 3 Quarts of Oats Every Day for Each Work, Carriage or Driving Horse and to keep them healthy, strong and glossy, because it greatly helps digestion and assimilation. A practical test on your horses will prove every claim we make. Ask Your Dealer.

STRICTLY IN ADVANCE.

Money should be sent by postal order, draft or by registered letter addressed to F. W. KELLEY, 36 Geary St., San Francisco, Cal. Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

San Francisco, Saturday, July 22, 1905.

SWEET MARIE WAS BEATEN by Tiverton in their match race at Belmont Park, Philadelphia last Wednesday, and according to the telegraphic account of the event which appears on another page, the Galileo Rex gelding had a rather easy race. The track which is controlled by the Belmont Driving Club has not been raced over by the fastest trotters and pacers as its record was 2:11½ for trotters prior to this race. Tiverton reduced it to 2:10½ the first heat and again to 2:07¾ in the second and final heat, a very fast mile at this time of year, although both he and Sweet Marie worked in 2:08 only last week. The race was a very disappointing one as the mare broke in both heats when put to her speed, and was evidently out of shape or condition. It is a peculiar fact that match races seldom result in close fighting contests, and they are generally unsatisfactory. There is no particular reason why this should be true, but it is nevertheless. That Sweet Marie should be beaten easily in 2:10½ and 2:07¾ is absurd unless the daughter of McKinney is decidedly off, which we believe must be the case. At any rate we are not going to accuse Alta McDonald of pulling her, or suggest that the mare be taken away from him as was done last year when Robert Smith lost a heat or two with her, as we believe that like Mr. Smith he would have won if he could. No horse, no matter how rugged and powerful can trot his or her best every day. There are times when they are not right, and we presume Sweet Marie was not in condition last Wednesday. These great trotters meet again at Readville, August 2d, and the chances are a much better contest will be witnessed. It may be that Tiverton is a better horse than the California trotter this season, but we will have to be convinced of this fact by a race where he finishes in front of her when the time is faster than the mare's present record. We hope they may meet on equal terms at Readville next month. Should both be in perfect shape there will be a horse race and the winner will have a record of 2:04 or better even though the season is rather early for such fast time.

THE NEXT MEETING on the brief California Circuit this year will be the annual meeting of the Pacific Coast Trotting Horse Breeders Association at Santa Rosa. It will open on Wednesday, August 16th, and there is every prospect of its success beyond any meeting held this year. The list of entries in all the class races are large, and in addition there will be four colt races decided which are already causing a great deal of talk among horsemen generally, and which will result in some very low records being made. In the three-year-old divisions especially is fast time expected. Several three-year-old pacers are beating 2:15 in their work, and the three-year-old trotters are doing so well that there is a chance that Zombro's record of 2:13 made in 1895 may be equalled. The two-year-olds, both pacers and trotters, are also a high-class lot and will furnish some of the best contests of the meeting. Santa Rosa track was never in better shape than it is at the present time. Lessee Frank Turner says it will be just as safe and fast as he can make it, and as he is an expert at putting tracks in order, there is every probability that the track record of 2:06 will be broken during the meeting. We advise every horseman in California to be in Santa Rosa during the Breeders meeting, and as a friendly warning would suggest that they engage rooms immediately, as while there will be accommodations for all, the best rooms will be taken by the time the meeting opens.

SIX \$1000 STAKES are offered by the Arizona Territorial Fair Association for trotting and pacing events at the first territorial fair which opens at Phoenix, December 4th and continues during the

week. A large number of \$400 purses will be offered later. The Arizona Fair Association has a now \$50,000 plant, and will give one of the most unique expositions ever given in the United States. Special rates will be made by both the Southern Pacific and the Santa Fe railroads, and as the weather of Arizona is ideal in December, the fair will draw thousands of people and be a great success. The new track at the fair grounds is one of the best in America, so that fast time may be expected. California horsemen, especially those living in the southern end of the State, will find the trip to Phoenix a very pleasant and not expensive one. Six \$1000 purses, three for trotters and three for pacers, with ten or a dozen additional purses of \$400 each makes up a program that is very attractive. A new and novel condition governing these stakes is that while they do not close finally until Nov. 1st, entries can be made at any time previous to that date, and any records made after the day on which entry is made, will not be a bar. This should attract a large list of early entries, and as payments are but \$15 at the time of entry, \$15 November 1st, and \$20 the night before the race, the loss will be very light if one's horse goes wrong before November 1st, which is after all racing is over in other parts of the United States. We advise all our readers who own or are racing trotters or pacers this year, to read the advertisement of the Arizona Territorial Fair carefully, and send to this office or to W. N. Tiffany, Secretary, Phoenix, Arizona, for entry blanks.

A FREE FOR ALL PACE has been opened by the California State Agricultural Society in place of the one that was advertised to close July 10th but failed to fill. The amount of the purse is \$600, and as this amount secured the best race of the Los Angeles meeting for this class of horses it should attract sufficient entries at the State Fair to make a good contest. There are more than a dozen pacers in training at the present time in California all of which have a chance to win this contest. They are Zolock 2:05½, Edwin S. 2:08, Dr. W. 2:08½, Tidal Wave 2:09, Vision 2:09½, Jonesa Basler 2:11½, Bonnie Ailse 2:08½, Virginia 2:09½, Miss Idaho 2:10½, Ira 2:10½, Daedalion 2:10, Tom Carneal 2:08½, Alone 2:09½, and several others. While Zolock is looked upon by some as almost invincible, there is no certainty that he can beat the others every time he starts, and then he may be shipped East after the Santa Rosa meeting. With five or six of the best of the others entered the State Fair free for all pace will be one of the best contests ever placed on the program. Entries close August 1st.

THE PERSON who has been reporting the harness race meeting at Windsor this week for the Associated Press is "a bird." He tells about the races, but fails to say what horses started and what time was made. He gives the information that Danube won the 2:17 trot in straight heats, but don't say how fast any of them were, or what horses he beat. In the account of another race he stated that Bonnie Wilkes was distanced in the second heat and High Seven had a hard time beating the flag, but no mention is made of any other horses or the time. Such a thing as a summary is doubtless an unknown quantity to the individual who is doing the Windsor races for the Associated Press. He probably views the races from the three-quarter pole and sees nothing but the last horses at the finish. He is a bird.

Answers to Correspondents.

DR. WM. B. CLOWE, Walla Walla—Ilo Ilo 2:15 was bred by Mr. W. E. Meek of Haywards, and is by his horse Welcome 2:10½ out of Rosemary by Nutwood Wilkes 2:16½, second dam Hybla by Director. He is a bay gelding with both hind ankles white. He was foaled in 1898, and a picture of him appeared in the BREEDER AND SPORTSMAN when he was a three-year-old in 1901, and again in November 1903, after he took his present record. There are many instances of the same name being given two or more horses. Under the rules of registration now in force, the name of a stallion once registered cannot be duplicated. Ilo Ilo 2:15 is a gelding and not registered, and there was nothing to prevent his owner claiming the name when starting him in a race, even though you did register a colt by Alexis, foaled in 1897, by that cognomen. Perhaps, if you could give us the name of the man to whom you sold Ilo Ilo 31434 we might be able to trace the present whereabouts of the horse, if alive.

One of the features for State Fair week at Sacramento will be a driving parade one evening. The Sacramento Driving Club has the matter in charge and it is believed that with the eighty members and many outsiders who have volunteered to take part, a very interesting parade will be arranged.

Harness Game Suffering in the East.

On the other side of the Rocky Mountains harness racing is being injured by the anti-betting laws that have been passed to stop the continuous running meetings that have become obnoxious to the general public. J. L. Hervey writes as follows in the Chicago Record-Herald about the situation:

Horse racing is an extremely expensive sport; the cost of production of a high-class harness horse is great; the cost of assembling hundreds of them to race for purses of four or five figures is immenso. As a business proposition it seldom breaks even, and without the betting angle impossible except in conjunction with fairs and expositions.

The public has always realized this and has tolerated limited betting in many localities where prohibitory legislation existed because of it. This applies, however, only to meetings where the betting has been a minor detail, as it has always been of harness racing. When it comes to be the "whole thing," as it has become in the "running game," the complexion changes; what the public tolerated it then demands the suppression of.

That the volume of betting at harness race meetings was ever sufficient to constitute any menace to public morality is not to be believed, and, had no other form of racing been pursued, that there would now be any anti-betting or pool-selling law in any states can scarcely be considered possible. It has been the outrageous abuse of the betting privileges at the running tracks and their not infrequent open and insolent defiance of law or order and decency that have precipitated the legislation which is paralyzing racing of all kinds, under which the innocent as well as the guilty are being put out of business.

The condition is a vexatious and a disquieting one. Just what the outcome will be no prophet can foresee. A reasonable betting law would resolve the difficulty. But there are these obstacles in the way of such laws. In the first place, while, eventually, most, if not all, of the United States will enact them, they are not yet ready to—the "time is not ripe." In the second place, a betting law that would be regarded as reasonable by reasonable horsemen would never satisfy the running faction—and as long as they cannot get what they want it is plain that they can and will prevent anything else. And there you have it.

Palmer Clark, of the *Inter-Ocean*, also notes the conditions existing and attributes them to the same cause. He says:

That the gambling feature associated with racing has been conducive to this undesirable condition there can be no mistake, and while I have never boosted the wild speculative features connected with the game, yet all sane people must sooner or later come to the conclusion that the spirit that gambled on the existence of a northwest passage or a continent beyond the seas, as when America was discovered, cannot be restrained by legislation or hampered by the restrictions of the long-haired hypocrites who never discovered anything and never will.

Do not let me be misunderstood; there is nothing in this that would infer that I am in favor of the mushroom cigar store poolroom, where the youth of the city, and even women, can be bunked out of their hard-earned pittance and driven to the many crimes that attend the desperation that follows, or the continual farce of racing horses the year round in cities where the racing and horses are made simply the mode and paraphernalia of the gamblers, and subservient to them.

My contention is that the legislators of the country should pass limited pool laws restricted to racing inclosures for a limited period, where the owner who risks \$50 entrance fee to win a purse of \$500, which is the same element of speculation that adheres to the buying of a corner lot, or any other speculation, can have the privilege of backing his horse for a bigger purse in the pools if he is so inclined, or where the man who can afford to raise horses can have the privilege of backing his judgment of the other man's horse's ability. Such speculation rarely has any more demoralizing effect than will attend any other line of human effort.

The breeding of the American light harness horse is a business of far too great importance to be allowed to die out through the machinations of race track managers who consider nothing save their avaricious natures, and the American people, as reflected in the wisdom of its great agricultural population, the best and most progressive element, cannot afford to sit idly by and see any such disaster.

By all means every man who owns, breeds or loves the light harness horses should spend a little time and energy this fall to get to his individual legislator and see that the matter is presented in its true light.

Do not ridicule the well meaning efforts of those who are honestly trying for the moral uplifting of the people—such action speaks well for those so engaged, but see to it that they are properly informed of the true conditions.

George A. Bain, the well known blue-grass auctioneer, has been elected secretary of the Kentucky State Fair with offices in Lexington. Mr. Bain has a very wide acquaintance, especially in this state, and has set out resolutely to make the state fair a permanent Lexington event.

Many men are still looking for handsome buggy horses, well broken, high-headed, well finished and in good flesh. If a little bit of speed can be shown the price will be higher than if it cannot.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

His Last "Copy."

The following news items written for the BREEDER AND SPORTSMAN by Blaine S. McMahan, who was killed at Fresno, July 12th, by a train running over him, were found in his box at the Grand Central Hotel and are probably the last he ever wrote before meeting his untimely death:

Al McDonald has had the misfortune to have one of his best horses go lame for him. This one is the bay pacing gelding Little Jib owned by Fleury Gomet of San Francisco. When he was shipped from Pleasanton Little Jib was in great shape and was thought to be a 2:08 horse, so it seems unfortunate that he should go wrong before he had a chance at the money.

The big bay gelding Argyle by Charles Derby raced very disappointingly at Los Angeles for J. D. Springer. This horse trained well at Pleasanton and Mr. Springer thought he was about the best thing in his stable but he failed to show his accustomed speed last week and was behind the money in both of his races.

While warming up for his race at Los Angeles the pacer Doctor J. by Doctor Hicks, owned by E. A. Servis and in the string of Fred Chadbourne, wrenched himself severely in one of his shoulders and since has been unfit to race. He is rounding to in good shape and will be ready to start for the money in a week or so.

The pacing gelding Tom Carneal 2:08½ by Diablo 2:09½ out of Mountain Maid (also dam of Kenneth C. 2:17) has been sold by S. K. Trefry to Mr. Bransford of Salt Lake City, Utah. Mr. Bransford drove Tom Carneal an easy mile in 2:11 at Los Angeles and the big pacer will probably be seen at the matinees in his new home.

The great broodmare Grace Kaiser, dam of Coney 2:02 and several others, has been sold to James Coffin of San Francisco. Grace Kaiser has a strikingly handsome black filly at her side by Zolock 2:06 and is thought to be in foal to him again.

Edwin S. 2:08½ paced a first class race against Zolock and Kelly Briggs at Los Angeles and will be a hard horse to beat at Fresno. Previous to his race last week he had not shown a mile better than 2:10 and was hardly ready for a hard race, yet he was right there three times in 2:08½ or better and paced the last halves of two miles in 1:01½.

The boys are already saying that the McKinney gelding Adam G. 2:14½ is surely another George G. 2:06½ and it does look as if he is about the highest class new trotter of the season. He is a perfectly gaited, level-headed trotter, that races like an old-timer and he showed in his race last week that 2:10 would be easy for him. This fellow was bred by Prof. E. P. Heald of San Francisco and is now owned by J. T. and Willard Zibbell.

After his two smashing races at Los Angeles last week there was quite a little talk of sending Zolock 2:06 East this fall and it may be that the fast son of McKinney will be seen at Cincinnati, Lexington and Memphis. There will be a class for him at these meetings and if he races there as well as he did at Los Angeles he will give the Grand Circuiters a good run for the money.

Death of Douglas Cone.

Douglas S. Cone, only son of Mrs. Anna R. Cone and the late J. S. Cone, died July 16th, at the Palace Hotel, San Francisco, after a brief illness, of typhoid pneumonia. He was 38 years old and had been a prominent citizen of Butte county ever since attaining his majority.

He was born at the family home near Red Bluff and resided nearly all his life on the home place, known as the Cone Ranch, where he and his wife formerly Miss Lewis of San Francisco have dispensed a delightful hospitality. He was very prominent in the social and business life of the community, having been active in many new enterprises and a leader in all movements for the improvement of livestock of all kinds, particularly horses. He purchased the stallion Kinney Lou 2:07½ as a colt and sold him to Budd Doble, his present owner. His herd of Hereford cattle was one of the largest and best on the Coast.

In 1900 he was a delegate to the Republican National Convention which met at Philadelphia and nominated McKinley and Roosevelt. For many years he was a Director of the District Agricultural Society for Tehama county and took a leading part in all county and district fairs.

Mr. Cone's illness dates from last winter, when he was thrown from a buggy while returning from a trip to the Navajo mine and suffered a compound fracture of his right leg. For some unexplained reason the bones refused to knit and he was compelled to undergo many painful operations. He had been undergoing treatment in Lane Hospital, San Francisco, shortly before his fatal illness, and was still under the surgeon's care when he contracted the disease which caused his death.

The Butler String.

The horses in James Butler's East View Farm string left New York for Windsor last week. Before they left De Ryder stepped most of the members of the string some moderately fast miles, and after they have raced at Windsor this week they should be ready and able to hold their own with the other horses entered down the "big line." Direct View 2:08½, who will in all probability be the farm's starter in the 2:08 classes during the early part of the season, was given two miles last Friday in 2:10½ and 2:10½. Consuella S. 2:07½ has not beaten 2:15, as she is not to be started at the earlier meetings. Fred Direct, the M. and M. candidate, was given two miles Saturday in 2:14½ and 2:15, easily, while Danube, the brown stallion by Direcho, son of Direct 2:05½, also eligible to the slow classes, trotted in 2:13 and 2:14, with the middle halves each in 1:05½. Mamie R. 2:15½ trotted in 2:13½ on Tuesday and has 2:00 speed. She is the best gaited trotter in the stable, and if she proves to be game when the test comes, should win a number of races. Minter 2:28½, the Expedition mare, worked two miles on Friday in 2:13½ and 2:14. Aristo 2:08 and Princess Athel 2:14, two trotters that were not taken to California last winter, have not been asked to step much faster than 2:20 as yet, as they will not be raced till later in the season. There are three pacers in the stable, and while they all wear the hobbles, they have shown that they have enough speed to warrant starting them against the best sidewheelers eligible to their classes. Bolivar 2:21 was given two miles on Friday in 2:10 and 2:07½, while Josie 2:16 stepped heats in the same time. Madam Direct, a black three-year-old entered to start first at Buffalo, worked two miles in 2:18 easily.

Breeding of McNeer.

EDITOR BREEDER AND SPORTSMAN—Dear Sir: In your issue of July 1st, in a notice of the approaching auction sale of Mr. E. C. Peart, of Colusa, (see page 5) the breeding of McNeer's dam is given as by Silver King which is incorrect. McNeer was bred and raised by the veteran horseman, Suel Harris, of Yuba City, Sutter county, Cal., who sold him in his six-year-old form to the Knaggs Bros., of Meridian, same county, whose great misfortune it was to lose him by death less than a year ago at seven years of age. He was by the great McKinney, first dam Viola by Antevolo 2:19½, second dam Esmeralda (dam of Don Lowell 2:14½, Director H. 2:27 and others) by Brigadier, third dam Lady Slattery by Cal. Dexter (son of Whipple's Hambletonian 725 and Kate Leslie by Gray Messenger 155) fourth dam Empress by Langford (sire of dam of Lillian Wilkes 2:17½) by Williamson's Belmont.

It is thus plain that McNeer was one of the stoutest bred sons of his illustrious sire, and his individuality was fully up to his royal breeding. He stood 16 hands in height and weighed fully 1200 pounds and was a horse of great strength, substance and symmetry. He was also a very impressive and promising sire and his death will prove a decided loss to the breeding interests of the section where he was owned, for when the size, style, speed and tractability of his sons and daughters become known, they will be eagerly sought after. This note is not prompted by any personal interest in Mr. Peart's sale or stock, but by an intimate acquaintance with and great admiration for this grand young sire. I have not the pleasure of even an acquaintance with Mr. Peart. I am yours truly, C. W. T.

JUPITER B. 2:13½ BY GEN. BEVERLY

The Detroit correspondent of the Chicago Horseman in writing about the horses working at Grosse Point track has the following to say about a California trotter: Lady Zombro, the M. and M. candidate for which the rail birds were all waiting, did not show her alleged two-minute speed, working easily in 2:16, however. A lot of others, including stake candidates, went easy miles around 2:20. There is a lot of gossip going the rounds about this Lady Zombro, by the way. That she is for sale is no secret, and Trainer Hodges has talked to several well-known Detroiters, offering to show them a mile that would make their hair stand on end. They provided him with their addresses and promised to be within call, yet the call has not yet arrived. The mare is going sound, too, so the Detroiters are guessing without having yet hit on any satisfactory answer.

Tiverton Beats Sweet Marie.

PHILADELPHIA, July 19.—The speedy New York trotting gelding, Tiverton 2:04½, easily defeated Sweet Marie 2:04½ in a \$5000 match race today on the track of the Belmont Driving Club. Tiverton won in two straight heats.

About 5000 persons saw the two Grand Circuit stars race. Sweet Marie drew the pole. They were sent away on even terms in the first heat.

Tiverton set the pace and before the quarter pole was reached had a slight lead. As Sweet Marie passed the quarter pole she broke and Tiverton took the pole. At the half mile post Tiverton led by several lengths. Sweet Marie again broke at the three-quarter pole and Tiverton passed under the wire well in hand and two lengths in the lead. His time for the mile was 2:10½, lowering the track record for trotters in a race one second.

Tiverton led at the quarter in the second heat and increased it to three lengths at the half-mile post. Going to the three-quarter pole Sweet Marie picked up some of the lost ground and both trotters came into the stretch almost on even terms. The spectators looked for a close finish, but at the eighty-yard pole the mare broke and lost her chance to win. Tiverton came under the wire in a fine stride several lengths in the lead. His time was 2:07½, which places the track record at a figure hard to beat.

Scott Hudson Says.

DETROIT, MICH., July 22, 1904.

F. A. Wilcoxson, Tiffin, Ohio.
Dear Sir:—I send you herein my check for one dozen bottles of your liniment. The liniment arrived all right and we are using it with good results. Yours very truly, SCOTT HUDSON.

Notes and News.

Rosalind by Stam B. now carries a record of 2:21½, made in a winning race at Pueblo, Colorado.

It is said that Stanley Dillon 2:07½ will not be a member of Ed Geers' string after the close of the Detroit meeting next week.

B. S. Dillon started twice at the New Haven, Connecticut, meeting the last week in June, and won one race and was second in the other.

The two-year-old division of the American Horse Breeder Futurity, for foals of 1903, will be trotted on Tuesday, Aug. 22d, at the Grand Circuit meeting at Readville, Mass.

A four-year old pacing filly by Star Pointer 1:59½ from Javelin 2:08½ worked a mile in 2:16½ at Cleveland the other day. As she looks very promising she will be saved over until next year.

Strathway 2:19, after a fair season at Pleasanton, was shipped Thursday of this week to his owner, Graham E. Bahcock at Coronado, where there are nearly twenty mares waiting to be bred to him.

August 9th is the date set for the dispersal sale of the standard bred horses, colts and fillies owned by Mr. E. C. Peart of Colusa. Many fine young animals are to be sold. Send to Mr. Peart for a catalogue.

There is considerable talk of a race track being built at Porterville, Tulare county. There are many horses bred and owned in that section that would be trained at home if there were a track in that locality.

At Libertyville, Illinois, July 4th four races were given. The first event was the 2:15 pace. It was won by Billy A. a bay gelding by Fast Nation owned by Mr. J. C. Adams of Phoenix, Arizona. The best time was 2:18.

Don't forget the auction sale of standard bred horses at Fred H. Chase & Co.'s salesyard, Monday evening next, July 24th. This sale will begin at 8 o'clock. Several well staked and promising colts are to be sold.

Murray Howe, Secretary of the Memphis Association, is out with two \$6000 purses for the meeting opening October 16th. These purses are for 2:09 class pacers and 2:14 class trotters, and entries close Monday, the 24th inst.

The colt stakes of 1908, opened by the Agricultural Association of San Benito county, have closed with six entries, made respectively by Robert Orr, R. P. Lathrop, George E. Shaw, Raymond Mead, Irvine Hall and Frank Blessing.

The Rose Hotel at Pleasanton has again changed hands. The new proprietor is F. L. Skaggs a well and favorably known hotel man who has been connected with the St. James at San Jose and the St. Nicholas and Manhattan hotels of San Francisco.

There is a rumor to the effect that the first two minute horse, Star Pointer 1:59½, will be brought to California this fall for the purpose of making a season with him here next spring. He made the season at Two Minute Farm this year at a fee of \$100.

During the Detroit meeting next week Lou Dillon and Major Delmar will trot an exhibition race for a gold cup. Mr. Billings, who owns both horses, will drive the mare and his friend Mr. Devereux will pilot the gelding. It will be an interesting exhibition.

Hallock M., a bay pacer by Hal B. 2:04½, won the 2:15 pace at Johnstown, Pa., July 7th, and took a record of 2:15½. Hal B. is the stallion that made an early season at Los Angeles this year, and was afterwards sold to August Erickson of Portland, Oregon.

Inferna, the chestnut pacer by Diablo, dam Biscari by Director, that took a record of 2:17 at Billings, Montana, last year, has paced in 2:12 in his work this season over the Great Falls track and will be started in all the big stakes for the fast pacing classes on the Montana circuit.

The report which has been circulated saying that Nora McKinney has been lame is not true. Mr. Frank B. Simpson, manager of the Empire City Farm, writes *The Horse World* that Nora McKinney is not lame nor has she ever been lame since she was purchased by the Empire City Farm.

An early report indicates that there will be some thirteen horses left in the M. & M. when all the checks are in for the July payment. For the Chamber of Commerce there will be, it is thought, twelve starters. This will make the usual fields for both of these big events. The indications now are that the quality of the horses are better than last year.

A dapple gray gelding by Strathway, sire of Toggles 2:08½, John Caldwell 2:11½, etc., is offered for sale in our advertising columns. The owner has had to go East, and has left horse, huggy and harness for sale with Thos. Kinney at the Fashion Stables. Read the description of this horse in the advertisement. He is a good one and can be had at a very reasonable figure.

The horses bred by the Occidental Land and Improvement Company of Sharon, Cal., are large, handsome, sound and serviceable. A consignment of thirty of them will be sold by Fred H. Chase & Co. at 1732 Market street next Monday evening.

The Morgan stock is having a regular boom over East, and is bringing good prices. Several of the horses and mares to be sold by Fred H. Chase & Co., Monday evening next, are rich in Morgan blood. They were bred by C. E. Needham of Bellota, Cal.

The old established firm, the O. F. Willey Company, has the best line of fine carriages, huggies, speed vehicles, etc., ever seen in San Francisco. This firm is agent for Brewster & Co. of New York, C. S. Caffrey of Camden, New Jersey, and other makers of high-class goods. Their place of business is 1622 Market street and 23 Hayes street, under the St. Nicholas Hotel.

What is supposed to be the highest horse in this country is Royal Prince, now on exhibition at Dreamland, Coney Island. He arrived from Jamestown, N. Y., on Monday. Royal Prince is a dapple gray, over nineteen and a half hands high. He is five years old and weighs 3700 pounds. His sire was a Percheron weighing 1500 pounds, and his dam was of Arabian stock, weight 1700 pounds.

W. T. Harris of Oakland is the owner of a bay gelding by Bay Bird that stands 17 hands high and can trot a quarter in 34 seconds. The gelding has been very ill with pinkeye, but is recovering and may be started at the Hollister meeting if one is given this fall. Mr. Harris owns a farm in San Benito county, and spends considerable of his time there. He says there is considerable interest in harness horse matters among the people of that section and the Hollister meeting is sure to be well attended. He owns the well bred stallion Sidney Howard and has bred him to quite a number of good mares this year.

ADAM G. 2:14 1-4

Samuel B. Whitehead, well known to every horseman on this coast, will leave San Francisco today on the steamer Korea for a trip around the world, expecting to be away from home about a year. Mr. Whitehead in the old days, when auction and mutual pools were the only systems used to handle the bettings at the fairs and race meetings on this coast, sold pools at all the principal meetings here, and was one of the best auctioneers ever seen on the block. He has not been in the best of health lately and takes this trip doubly for the purpose of regaining it and seeing the sights of the world. His many friends will wish him a joyful trip and a happy return.

A stock farm owner advertised for a trainer. "Wanted," so ran the advertisement he put in a turf paper, "A first class trainer for stock farm. Must be sober and industrious, be able to shoe horses, mend harness, look after the broodmares and keep the farm's books. None but a competent race driver need apply. Best of references must accompany application. Wages, \$40 per month and house rent." The advertisement brought but one applicant, and he wrote as follows: "I am certain I have the ability to fill every requirement demanded in your advertisement, and I would like the job. After thinking it over, however, I don't see any advantage in free house rent. If I did all the things the advertisement asks for I wouldn't have any time to live in the house."

The hundreds of horsemen who know Secretary Murray Howe of Memphis, Tenn., will learn with sorrow that Richard Howe, his five-year-old son, met death in Chicago, June 29th. Mr. and Mrs. Howe and their three children arrived in Chicago from Memphis, Mrs. Howe reaching the home of friends on Lincoln avenue about noon. Richard, in running across the street, was confronted by two wagons going in opposite directions. He hesitated until one wagon had passed and then rushed forward. Owing to the fact that the driver had no chance to see the child and pull up his horse, the wagon passed over the child's body after hurling him violently to the ground. Death was instantaneous. Murray Howe accompanied the body to Memphis the following evening, the funeral services having been held in Chicago. The driver of the wagon, a colored man, was in no way to blame for the frightful accident, and the coronor's inquest so decided. Unlike the automobilists who run over people and then sprit away, he went into the house on his own accord and remained there until the police arrived.—*Horse World*.

J. B. Stetson, the well known trainer, who is now at Portland and will race a string of horses over the North Pacific Circuit, writes that he will winter in California this year. He states that he was near to freezing in Denver last winter, where there was zero weather for six weeks at one stretch, with the mercury as low as 17 below at times.

Tom Carneal 2:08½ was sold during the Los Angeles meeting to Mr. J. S. Bransford of Salt Lake City, who will use him in matinees there. Tom Carneal is by Diablo 2:09½, and his dam is the great broodmare Mountain Maid by Cresco that is the dam of that good three-year-old colt Kenneth C. 2:17 by McKinney. Mountain Maid has two foals by Stam B. 2:11½ that are very promising.

C. A. Durfee, of Oakland, and Claude Jones, of Modesto, returned from Los Angeles this week where they had been in attendance on the meeting of the Harness Horse Association. Although both gentlemen picked more losers than winners they say the meeting was one of the best they ever attended. When the losers find no cause for complaint the racing must have been first class, and the meeting conducted just about right.

The citizens of Eureka, Humboldt county, propose to hold a fair this year in spite of the fact that the directors of the local fair association had about concluded not to hold one. The Eureka fairs have always been largely attended and the enterprising business men of the city concluded they would not permit it to be side tracked this year, so they called a meeting and decided upon a fair that should be second to none ever held in the county. Now that the fair directors have the assurance that the citizens want a fair they will proceed with all the energy they can muster to make it a big success.

The accompanying picture of the gelding Adam G. 2:14½, now owned by J. W. and Willard Zibbell, was taken two years ago at Vallejo. At that time William McGraw of Silas Skinner fame, who has for years past been employed at the navy yard there, was using Adam G. as a road horse. Prof. E. P. Heald, President of the Pacific Coast Trotting Horse Breeders Association, owned the horse at the time and was permitting Mr. McGraw to use him. The editor of the BREEDER AND SPORTSMAN was in attendance at the Vallejo meeting, and while engaged in photographing some of the horses met Prof. Heald, who remarked that he had a gelding there that was worth photographing, as some day he would be racing in fast time. Prof. Heald did not have the horse regularly trained until he sent him to Willard Zibbell (the unfortunate young trainer so frightfully injured at Fresno last week), who soon saw he had a prize and with his father purchased the gelding from Professor Heald. As the horse is the talk of the tracks now, and is considered a sure 2:10 trotter, the prediction made by his breeder two years ago when this picture was taken is of more than ordinary interest at this time. Prof. Heald informs us that he owns several other foals from Adam G.'s dam, Nona Y., and that he believes each and every one of them will take a standard record, as every colt she has ever had has shown speed as soon as it is put to work. She is already the dam of four with records better than 2:19. Her dam, Black Flora was also a great producer, being the dam of four standard trotters, viz.: Huntress 2:28, Perihellon 2:25, Nona Y. 2:25 and Sister 2:19½, all full brothers and sisters, and the only standard trotters to the credit of Admiral. Sister was campaigned by the late John Goldsmith in 1886 and 1887 and won many races, being almost invincible. Black Flora was sired by Black Prince, a horse bred by the late Gen. John Bidwell of Chico, who imported his sire and dam from Kentucky, but who did not keep any record of their breeding.

A three-year-old that gives every promise of being a 2:12 trotter before the season is over is the brown colt Ambush that took a two-year-old record of 2:20 last season and reduced this to 2:17 at the Los Angeles meeting this year in a race against aged horses. Ambush is a son of Zoelock out of a mare by Silknot son of Silkwood 2:07. He started three times last year. His first start was at San Jose in the two-year-old trotting division of the Breeders Futurity. There were eight starters in this event, and Ambush earned third money, being 2-5-5 in the final summary. Two weeks later he started in a purse for two-year-olds at Santa Rosa, and was again third, Athasham being the winner in straight heats in 2:20½ and 2:20. At Sacramento the following week he started in the same field and after winning the first heat in 2:20, Bellemont beat him for first money in 2:20½ and 2:25. At the Los Angeles meeting he was started on Saturday in the 2:20 class trot, against such horses as Charlie T., Pat Rose that took a record of 2:12½ the first day of the meeting, and several other aged trotters. Charlie T. won the first heat in 2:14½ with Ambush close to him, and captured the second in slower time as the colt made a break. In the third heat Charlie T. finished in front on a break, but was set back and the heat given to Ambush whose time as second horse was 2:17. The race was then postponed until the next day, when Charlie T. won with the mile in 2:15 and Ambush a close second again. It was a great race for a three-year-old during the first week in July, and the son of Zoelock is looked upon to get a very low record before the year ends.

GREAT RACING AT FRESNO.

Breeders Meeting Opened Wednesday With Large Attendance and Ideal Weather.

Instead of the hot wave which many expected, there was ideal weather on Wednesday of this week when the Pacific Coast Trotting Horse Breeders Association opened its meeting at Fresno. The new palm grandstand seating 2000 people was comfortably filled and as every race was well contested the crowd enjoyed the afternoon to the utmost. The new judges stand which is undoubtedly the finest and best appointed in the State was occupied by President E. P. Heald, and Directors J. C. Kirkpatrick and T. J. Crowley as Judges, while Ed R. Smith of Los Angeles started the horses and got them off in good shape.

The first race was the 2:27 trot, which was won in straight heats by John Treadwell's Zombro gelding Charlie T. ably driven by Al McDonald. While Charlie T. won very handily there was a contest in each mile, Ray Bennett's bay gelding Oro Belmont driving him out in the first and third heats and Lute Lindsay's Oregon horse Sam Bowers making a hot race with him through the stretch in the second heat. In the first heat Charlie was forced to lower his Los Angeles record of 2:14½ to 2:13½, but he did it in a manner that makes him look like a 2:10 horse before the season is ended. There was a horse race in every heat of this event.

The Rulsin City Stake, \$1500 for 2:20 pacers, had six starters and was won by Virginia, the Bob Mason mare owned by Ben Davies of San Bernardino. Virginia reduced her Los Angeles record half a second and her mark is now 2:09½. Nellie R. took the first heat in 2:11 and was second in the next two heats, when having second money won and not being able to beat Virginia she finished fourth. In the last heat John R. Conway was the contending horse and was only beaten a short head in 2:10½. This was a great contest.

The road race for pacers driven by members of the Fresno Driving Club was one of the best races of the day, and went to the Hanford mare Lady R. by Col. K. R., driven by Pat Sweeney. She won in straight heats in 2:16½ and 2:12½, very fast time for a road horse. The summaries:

Visalla stakes, 2:27 class trotting, \$800.

SECOND DAY.

Thursday was a Zolock day at the Fresno track, and the handsome pacing son of McKinney covered himself with glory as a race horse and added to his youthful but brilliant reputation as a sire of early and extreme speed. He won both heats of the free-for-all pace in 2:05½, the fastest time made in the United States this year, lowering his own record of 2:06 made at Los Angeles a few days ago, and lowering the Fresno track record nearly two seconds. For this last performance he earned for his driver Henry Delaney, a \$50 bill generously offered by Mr. Fulton G. Berry for the horse that would break the track record of 2:07. After Zolock had paced the first heat in 2:05½ and won the \$50, Mr. Berry offered another bill of the same value if the 2:05½ was beaten, by any horse in the race. The time was the same. Director T. J. Crowley presented the \$50 check to Mr. Delaney in a neat speech. Starter Ed Smith who is one of the closest observers, sends us the following account of Thursday's races:

The great stallion from San Bernardino—Zolock—won the free-for-all pace in one of the hottest contests ever witnessed in this State. The first heat was a horse race from wire. They were off on the third score with Zolock on the pole, Daedalion second, in which positions they paced to the half-mile pole in 1:02, both lapped, with Edwin S. third by about four

lengths. At the head of the stretch Zolock was first in 1:35 with Edwin S. second by two lengths. Coming through the stretch Edwin S. was gaining a little at every stride and was beaten out but a short head in the greatest finish of the year in the fast time of 2:05½.

The second heat was won by Zolock in the same time 2:05½, being only about four lengths ahead of the other three, and every horse in the race paced better than 2:07, all fighting to better their positions.

In the three-year-old race that grand young stallion Ambush won in three straight heats after having a horse race every heat with Mr. Warlow's young stallion Athasham, who was the contender in every mile, forcing Ambush to trot the first heat in 2:14½, the second in 2:16½ and the third in 2:19. The four colts in this race are all very high class and any one of them will heat 2:15 easily at the meetings later on. The attendance was great and much larger than on the first day. The track is in first class condition and every thing is moving smoothly and great things are in store for the Light Harness Horse Brigade during the rest of this meeting and also at Santa Rosa and the State Fair. The summaries:

Geo. L. Warlow Stake, for three-year-old trotters, \$600.			
Ambush, br c by Zolock-dam by Silkwood... (Bonnell)	1	1	1
Athasham, br c by Athadon... (Walton)	2	2	2
Kenneth C., blk c by McKinney... (Trefry)	4	3	3
Elma S., b f by Nutwood Wilkes... (Chadbourne)	3	4	4

Time by quarters—

First heat....	34	1:07½	1:41	2:14½
Second heat....	34	1:07½	1:43	2:15½
Third heat....	35	1:09½	1:45	2:19

Pacing, free-for-all, two in three, \$600.

Zolock, br c by McKinney... (Delaney)	1	1
Edwin S., ch g by Dr. Hicks... (Chadbourne)	2	3
Kelly Briggs, br s by Bayswater Wilkes... (Wright)	4	2

Time by quarters—

First heat....	31	1:02	1:35	2:05½
Second heat....	32	1:03	1:35	2:05½

NOTES OF THE MEETING.

W. G. Durfee worked Petigru a half over the Fresno track last Wednesday in 1:03½ and sent him to the half in the next heat in 1:02½ and to the three-quarter pole in 1:34 and the next eighth in 15½ seconds. This is better than a 2:06 gait. He looks good enough to take to Memphis. Durfee has been saving Bellemont for the three-year-old trotting division at the Breeders \$6000 Futurity at Santa Rosa and the Occident Stake at the State Fair. She worked four heats the day of Petigru's sensational halves, doing the third and fourth heats in 2:18 and 2:17½ respectively, last quarters in 32 seconds—a 2:08 gait. There are a lot of good three-year-old trotters this year and the big colts stakes will be won in fast time.

The temporary grand stand erected for the Breeders meeting is all right. It is not particularly ornate architecturally, but commodious, cool and a credit to those who devised and built it. It was erected in less than a week and will seat 2000 people. Big fan palm leaves were used largely for the roof and back affording plenty of shade and a chance for the breeze.

Fulton G. Berry sails the "Nixie" on the high seas and when he isn't winning races on the briny deep he is running things in Fresno, and he keeps them going with free sheet and all sails set. It was his genius that invented the big bell made of electric lights with the pleasing legend, "Welcome Horsemen," that illuminates the principal corner in Fresno. It is about 20 feet high, 14 feet in diameter, of most graceful form and several hundred electric lights were used in its construction. In his home town he pervades everything and is largely due to his untiring efforts that the Breeders were enabled to go to Fresno. A. J. Hudson makes less fuss than Commodore Berry but he "gets there just the same." He knows what is wanted and goes ahead and does it. He is an enthusiastic horseman and to him and Geo. L. Warlow is the credit due that the track and buildings were ready in time for the meeting.

State Board of Agriculture.

The directors of the State Agricultural Society, at a meeting held last week canvassed the entries for the harness racing part of the program for the State Fair. The report of the Speed Committee, which was adopted as presented, provided sixteen harness races, and recommended the cancellation of three events wherein the required number of entries had not been received. A special resolution was carried, however, retaining as part of the program a free-for-all pace event for which a purse of \$600 will be offered. It was decided that there should be three running races each day, with a minimum purse of \$250, this being an increase over the size of last year's purses.

The annual election of officers was held. Benjamin F. Rush of Susan was re-elected president; James Whitaker of Galt received the vice-presidency; Thomas Fox was selected for superintendent of the fair grounds, and William Land as superintendent of the new pavilion. The new committees will be announced by the president at the next meeting, to be held on July 29th.

A general admission charge of 50 cents for adults

and 25 cents for children between the ages of 12 and 16 years will prevail at the next fair. Season tickets admitting all the members of one family will be sold for \$5. A charge of \$7.50 has usually been made for such tickets.

It was decided that the stock parade should be held on Wednesday, and the premium parade on the following day. The meeting was held late in the afternoon, an adjournment having been taken at 1:30 o'clock out of respect to the memory of the late Charles M. Ceglan.

An Opportunity to Get a Good One.

When the horses owned by the late J. Malcolm Forbes of Boston were sold in New York in 1903, Robert A. Smith purchased a colt that is now five years old and very handsome, that is about as well bred as any horse ever brought to this Coast. He is by that great trotter, Peter the Great 2:07½ (sire of Sadie Mac (3) 2:11½, etc.) by Pilot Medium, greatest son of Happy Medium. His dam is the producing mare Juanita 2:29 (dam of Sinaloa 2:25½) by Sultan, the sire of Stamboul 2:07½; his grandam is the great mare Beulah, dam of six in the list, including Beuzetta 2:06½ and Early Bird 2:10, and his great grandam is the mare Sally B. (dam of Maurine 2:13½ and two more in the list) by the thoroughbred horse Lever, a son of the great Lexington. This colt is fit to head any stock farm, and he is fast at either gait. He was worked a few weeks as a three-year-old and trotted a mile in 2:21, with the last half in 1:07. He was then sold and brought to California. This year Will Durfee worked him at the pace as he seemed rather inclined to that gait, and after a very little training reeled off a mile in 2:11½, with the last quarter in 30 seconds. A mild attack of distemper threw him out of training, but he is sound and all right now, and can show an intending purchaser a mile in 2:12 or very close to it. His owner, Robert A. Smith of Los Angeles, has no use for him and would like to sell. He will consider a trade for a first-class trotter. See his advertisement in this issue.

News From the North.

[Rural Spirit, Portland.]

Altacora 2:13 pacing, full sister to Chehalis 2:04½, will not be bred this year, but will be put in training as soon as her Joe Patchen filly is weaned, for a lower record next season.

John Sawyer and Doc Ward have moved their stables of harness horses to the state fair grounds from Irvington track, to make room for the hang-tails that are coming over from Seattle.

J. N. McKay, of Woodburn, has purchased the German Coach stallion, Pfiel, formerly owned by Duncan Scott, of Eugene. Pfiel has won prizes at the Oregon state fair the past two years in a class for German Coach stallions.

T. N. Davidson, Jr., of Salem, has leased the Ha stallion Hal D. from Homer Davenport and taken him to Salem for the balance of the season. Hal D. is one of the speediest green pacers in the state, and most likely he will be trained and raced during his stay in Oregon.

E. B. Tongue has brought his pacers, Byron Lace 2:14½ and Lord Lovelace home from California and placed them in the hand of J. B. Stetson to campaign. Mr. Stetson moved to the state fair ground track this week where will begin getting together a stable for the fall meetings. Byron Lace attracted quite a lot of attention in California by his easy, smooth way of going and he is looked by many as a sure two ten-er.

The Albany Driving Club presented an interesting and successful program at its meeting, July 7th. Track was fast, weather ideal and about a thousand people entered the gates or climbed over the fences. It is to be noted that Albany is showing an increased interest in the harness horse, and several campaigners, successful in their day, and still good for a brush or a matinee, have been added to the list of Linn county roadsters.

The races were called promptly at two, with W. W. Percival, president of the Independence Driving Club, Worth Huston and G. A. Westgate in the judge's stand. Sheriff White was a most satisfactory marshal and W. H. Sloan of Salem with A. L. Munkers regulated the chronometers and handed out the official time. Purses offered amounted to a few hundred dollars.

The program followed the advertised order as follows:

Free-for-all trot or pace,			
Ben Bolt, b g by Alexis... ..	1	1	
May Tilden, br m by Altamont... ..	2	2	
Pathmark, b h by Pathmont... ..	3	3	

Time—2:21, 2:25.

Road race, owners to drive,			
Dick K., blk h by Coeur d'Alene... ..	4	1	1
Teddy, br g by Holmdel... ..	1	3	2
Rosemond, b g by Rosemont... ..	3	2	3
Major, ch g by Multnomah... ..	3	4	4

Time—2:44½, 2:45½, 2:47.

The Horse's Pulse.

The veterinary editor of the London *Farm and Home* gives a valuable article that horsemen and stockmen should know about the pulsations of the horse, which is here reproduced:

What is the number of pulsations of the horse? suggests the holding of the popular notion that acceleration is taken into serious consideration when the indications of the pulse are considered as an aid to diagnosis in disease. The knowledge that in the horse, or, for the matter of that, any other domesticated animal, the pulsations in health average so many per minute is not likely to be very useful to the farmer or horse-owner—indeed it may lead the amateur veterinary surgeon astray, unless at the same time he appreciates the importance of character in the pulse. He may see the doctor lightly grasping the wrist of his patient with the finger of one hand, while holding his watch in his other, in his best bedside manner; or the veterinary surgeon standing on the near side of his patient with his left hand on the horse's nose, and pressing the sub-maxillary artery against the lower jawbone with the fingers of his right—looking very serious and very wise—and assume that they are counting all the time; but they are not. Each takes some note of number, but, at the same time, the manner in which the blood is propelled through the artery is receiving the more serious consideration.

There are several things that influence the number of pulsations, even in the healthy animal, including breed, age, pregnancy, warmth, plethora, etc., and thus there is a good deal of room for discrimination, even if there were anything in the popular notion that acceleration in speed is inseparably connected with disease. For example, if we take two horses, say a very common-bred carting animal and a well-bred hunter, it will be found that so far as the number of pulsations per minute is concerned, there may be a difference of eight or ten beats. At the same time the animal with the faster pulse may be in better health than the other. The same difference is to be observed in bovines as regards age, and between an early cow and a yearling heifer there may be a difference of ten to twenty pulsations—in fact, the pulse, as well as the respiration, is always faster in all young animals, while the internal temperature, as indicated by the clinical thermometer, is always higher. Nervous animals roughly handled show increased frequency, the excitement producing such an impression on the nervous system as to cause the action of the heart to be greatly quickened. The number of pulsations at any point of an artery simply represent the number of contractions of the left ventricle of the heart in a given time, and if mere number is all we want to know we need not trouble about taking the pulse at an artery at all. If the ear, or even the palm of the hand is placed against the chest on the near side, the number of heart beats can be correctly counted, and it will tell just as much as if pulsations are counted at a distant artery.

It is, of course, desirable to know that the pulse of the horse is normally 32 to 36, or 34 to 40 in well bred animals, that in the ox the average is 46, that it is faster during rumination (70 to 80) and faster in the young animal (55 to 65) than in the adult; that in the sheep it is from 60 to 90; in the pig 55 to 75 and in the dog 70 to 90; but when this has been learned we are only on the threshold of the subject, for it is on character that reliance has to be placed for the indications of disease. The different kinds of pulsations, or character of pulse, have received different names to distinguish them, and in technical pathological descriptions we meet with such terms as full, small, soft, hard, oppressed, unequal, confused, thready, imperceptible, intermittent, diastolic, cordy, wiry and several others, as applied to the state of the pulse. It is hardly to be expected that the amateur will be able to understand all the finer distinctions, but an appreciation of at least the more important of the characteristics is not difficult to acquire—indeed, is absolutely necessary to the proper understanding of the value of pulse indications in their relationship to departures from health. A slow pulse is when the number of beats is below the normal per minute, and it indicates defective nervous energy, such as would arise in certain brain troubles. A weak pulse denotes feeble heart action, and is expressive of debility. An irregular or intermittent pulse indicates heart disease, and is due to arrest of the heart's action at either regular or irregular intervals. A hard pulse is indicative of inflammation or fever, the hard, jerky pulse of inflammation of the bowels is an example. It is necessary also to be able to distinguish between frequency and quickness, since they are not by any means the same thing. A pulse may be described, say, as frequent, small and quick. This means a frequent beat of the heart, a quick contraction, and a small quantity of blood sent out at each beat. When the blood vessels are much distended we have the

oppressed pulse, in which the beat is prolonged and not very marked. This indicates congestion, say, of the lungs, and, owing to obstruction, the blood is with difficulty forced along.

Where to take the pulse is another common question, and one on which "Northern" requests information. From what has already been said, it will be understood that for indications other than that of number, which can be obtained by listening to the heart, it is necessary to take the pulse at an artery, the size and degree of contraction of which shows the hardness, softness, fulness, smallness, etc. With every beat of the heart the blood is propelled through the vessels called arteries, which have a degree of elasticity that enables them to adapt themselves to the volume of the stream. The force with which the blood is propelled from the heart diminishes as the distance from the center of circulation is increased, but is palpable to the remotest extremity. Owing to this diminution of the force it is desirable to select a vessel of considerable size, and as near to the heart as possible. It must be superficial, and so situated that it can be pressed against some hard body, such as a bone. There are several arteries that permit of this being done, and different vessels are utilized for taking the pulse in different animals by different practitioners. In the horse the sub maxillary artery is invariably employed. The vessel is situated at the lower jaw, and the method usually adopted is to take up a position quietly on the near side of the animal, and to soothe and pat it to allay any fear or excitement. Then place the left hand lightly on the nose, and find the artery with the fingers of the right, pressing the vessel gently against the jaw bone, so as to ascertain the manner in which the blood is flowing through it. The number of pulsations per minute are counted while their character is noted. There is no point at which the equine pulse can be taken so conveniently as at the jaw, although there are, of course, other vessels which can be employed. It is safest, as well as most convenient.

The Three-Quarter Shoe for Interfering Horses.

It matters not how perfect some horses may be, or how well they are shod, the very best of them will be found to interfere, writes a shoer in the *Horseshoer's Journal*. Of the causes we know much and yet when a case of interfering is brought to us we often become puzzled as to what the cause really is. Perhaps it is a renewed case, one that the same man has shod before many times and has effected a cure of the interfering, and going about the job full of confidence he uses the same shoe and dresses the foot in the same manner as he did before successfully, and yet the animal may return worse off than ever, and this is what sets the horseshoer thinking.

There are all kinds of shoes for the different kinds of interferers, and we all know that the same rule can not be applied in any two cases, so we must revert to some particular design of shoe, and some particular method of preparing the foot of a certain horse which is suitable to his particular case. It does not pay for a man in business to advise his patron to do something which will give him no return; a medical doctor or a lawyer are paid mostly for their advice; horseshoers should also be allowed something for theirs, and indeed if they set themselves up as entitled to it they would receive pay for the advice they give, because it must be understood that our patient, the horse, is out of our sight the better portion of the month and still we are held more or less responsible for his well being in travel. But, as I was going to say, to advise the removal of the hind shoes when a horse is found interfering in that part and to have him driven for two or three days, then brought back and shod with light shoes, the face of which should be rounded to compare with the wear of the hoof while the feet have been stripped, this is one of the surest and best methods to effect a cure of interfering that is possible to find.

I before said that it would not pay the horseshoer to recommend this to the horse owner, but it does pay far better to hold the patron's confidence than to discourage him by compelling the return of the horse two or three times during perhaps one week and still no cure. Now this method of producing a cure can be tried in a case of any horse used for light driving, especially if he is used on the roads or where the pavements are very level, or on the dry roads. Next to this method of producing a quick cure I want to recommend the three-quarter shoe; the three-quarter shoe is to be commended for more than one reason, but it cannot, unfortunately, be used on all cases for the reason that the leg structures are different and therefore it cannot be used in all cases. Take for instance, the foot which sets on a leg so as to bring its center far to the outside of the bones above; a three-quarter shoe on this kind of case would likely do more harm than good, but when the foot and leg are

on a true line one with the other then the three-quarter shoe should be applied whenever possible because it possesses more real virtue if rightly adjusted than any interfering shoe ever designed.

In preparing the foot for the three-quarter shoe, care should be taken to reduce all of that portion of the wall on which the shoe sets; the inside web of shoe should at its extreme end set into the hoof about half the thickness of the shoe and thus we get almost a perfectly level foot. The frog has its full play on the ground and the foot is brought as near to nature as any horseshoe can provide. There is a combination of virtues in the three-quarter shoe not the least of which is the additional weight given to the outside quarter, which assists in carrying the foot on a more straight line with the body and away from the opposite ankle. Again, in picking the foot up there is no metal to cut or bruise the opposite ankle as in the case of the full shoe. The three-quarter shoe allows more complete play on the inside quarter of hoof, and here again we have an advantage because the expanding process is consequently going on all to the relief of the foot. The animal that is built with feet pointing from his hips to the center of the body as they rest on the ground is most generally to be found interfering at some time in his life and on such a case the three-quarter shoe can be used with almost certain success.

Improvements at Lexington.

Box seats will be built in the grandstand at the Kentucky Trotting Horse Breeders' Association this summer. There will be about two hundred of them—one hundred seats in the grandstand proper and one hundred in the balcony. They will be completed before the great fall trots begin.

The trots have become one of the great social functions of the fall season. Lovers of the light harness horses come here from the evergreen shores of the Pacific, the busy cities of the Atlantic coast, the hustling towns of the North, and the sunny South. They meet here in the fall and attend the greatest meeting for harness horses given in the world.

It has been the object of the Kentucky Trotting Breeders' Association since the sport became popular here to give the visitors and the home people the best accommodations that money could supply. The directors of the association have personally investigated the conditions of the hotels, and urged the proprietors to make the rooms and quarters comfortable for the guests of the city at that time. Last year the management of the Phoenix Hotel added an extra story to the building in order to give the guests better accommodations.

There was but one thing left to be done, and that was to give the guests more privacy after the grounds had been reached. The only solution to this problem was the construction of box seats, and the Board of Directors decided to have them put in.

Secretary Horace Wilson has been receiving bids for the work for a week, and the contract will be closed in a short time. The seats will be sold to the highest bidders, and any person allowed in the grounds will be permitted to use them if the price is paid.

A new fence is replacing the old one around the track. Other improvements are contemplated, so that by the time of the fall trots the grounds and buildings will be in excellent condition.—*Kentucky Farmer and Breeder*.

What J. Crouch & Son Say.

Messrs. J. Crouch & Son of the Lafayette Stock Farm, the largest importers of German Coach, Belgian and Percheron stallions in the world, have this to say: "We have used your Craft's Distemper & Cough Cure almost continuously for the past twelve years, and consider it indispensable in the treatment of the various forms of distemper, coughs, colds, catarrhal and shipping fevers. It is the only remedy that can be relied upon at all times and under all circumstances. No horseman should ever be without the protection afforded by this great remedy. When shipping horses we invariably use Craft's as a preventive against shipping fever and other infectious diseases to which our horses are more or less exposed. We recommend it to all owners or handlers of horses."

See This.

Choice cattle and alfalfa ranch, 480 acres, 150 producing alfalfa; fine herd Jersey cows; dairy outfit; 150 hogs; two large electric pumping plants; nine million gallons water daily. Main line Santa Fe, close to Bakersfield. Easy terms. Will consider exchange. Address J. C. ARNOLD, Berkeley, Cal. *

The New York Driving Club has been holding some good matinees lately. The new rule pertaining to the classification of horses is a decided improvement; last year a horse winning a race was required to move up into a faster class, regardless as to whether he won by a length after a hard fought battle or by ten lengths after an easy race. This year the question of moving a winner up has been left to the discretion of the classification committee, and better and closer races will be the result.

Strike!—if they don't give you Jackson's Napa Soda when you ask for it.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

Coming Events.

Rod.

April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.
April 1-Sept. 15—Closed season for lobsters and crawfish.
April 1-Nov. 1—Trout season open.
June 1-Jan. 1—Open season for black bass.
July 8—Saturday Fly-Casting Contest No. 8. Stow lake, 2:30 p. m.
July 9—Sunday Fly Casting Contest No. 8. Stow lake, 10 a. m.
Sept. 10-Oct. 16—Close season in tidewater for steelhead.
Sept. 10-Oct. 16—Close season for catching salmon.
Oct. 16-Nov. 15—Close season for taking salmon above tide water.
Nov. 1-Sept. 1—Open season for crabs.
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

Feb. 15-Sept. 1—Closed season for mountain quail, grouse and sage hen.
Feb. 15-Oct. 15—Closed season for quail, ducks, etc.
April 1-Oct. 15—Close season for English snipe.
June 27, 30—The Interstate Association's Grand American Handicap Target tournament, Indianapolis, Ind.; \$1000 added money. Elmer E. Shaner, Secretary-Manager, Pittsburg, Pa.
July 1-Feb. 15—Dove season open.
July 23—Fish and Game Gun Club. Blue rocks. San Jose.
July 30—Millwood Gun Club. Blue rocks. Mill Valley Junction.
Aug. 1-Oct. 15—Deer season open.
Aug. 20—Union Gun Club. Blue rocks. Ingleside.
Aug. 6—Blue Rock Gun Club. High-street grounds, Alameda.
Aug. 6, 20—Mount View Gun Club. Blue rocks. Mount View, Cal.
Aug. 13—California Wing Club. Live pigeons. Ingleside.
Aug. 20—Union Gun Club. Blue rocks. Ingleside.
Aug. 29, 30—Interstate Association tournament. Blue rocks. Denver, Col.
Sept. 9, 10—Empire Gun Club. Merchandise shoot. Blue rocks. Alameda Junction.
Sept. 12, 13, 14—Interstate shoot. Blue rocks. Ingleside. Elmer E. Shaner, Manager. Pacific Coast Handicap under auspices of S. F. Trapsooting Ass'n., A. M. Shields, Secretary.
Sept. 30-Oct. 1—Two-day blue rock tournament. Biggs, Butte county. H. Haselbusch, manager.
Sept. 30-Oct. 1—Biggs Gun Club. Two-day blue rock tournament. Biggs, Cal.

Bench Shows.

Aug. 15, 18—Orange County Agricultural Society. Middletown, N. Y. D. A. Morrison, Secretary.
Aug. 23, 25—Rockland County Industrial Association. Bench show in New York City. A. A. Vanderbilt, Secretary.
Aug. 31-Sept. 2—Newport Dog Show. Newport, R. I. Francis M. Ware, Secretary.
Sept.—Stockton Kennel Club. F. A. Goisea, Secretary, Stockton, Cal.
Sept. 16—Englewood Kennel Club. Englewood, N. J. M. W. Robinson, Secretary.
Sept. 27, 28—Valley Fair Kennel Club. Brattleboro, Vt. Howard C. Rice, Secretary.
Oct. 3, 6—Danbury Agricultural Society, Danbury, Conn. G. M. Rundle, Secretary. Jas. Mortimer, Superintendent.
Nov. 15, 18—Boston Terrier Club Specialty Club. Boston. F. H. Osgood, Secretary.
Nov. 28-Dec. 1—Philadelphia Dog Show Association. Philadelphia. J. Sergeant Price, Secretary.

1906.

Feb. 12, 15—Westminster Kennel Club. New York. Robt. V. McKim, Secretary.
Feb. 20, 23—New England Kennel Club. Boston. Wm. B. Emery, Secretary.
March 7, 10—Duquesne Kennel Club. Pittsburg, Pa. F. S. Steadman, Secretary.

Field Trials.

Aug. 15—Iowa Field Trial Club. Geo. C. Cooper, Secretary, P. O. Box 55, Des Moines, Ia.
Aug. 23—North Dakota Field Trial Club. Inaugural trials Grand Forks, N. D. A. E. Palmer, Secretary, Grand Forks, N. D.
Sept. 4—Nebraska Field Trial Association. 4th annual trials. O'Neill, Neb. H. H. McCarthy, Secretary, O'Neill, Neb.
Sept. 6—Manitoba Field Trial Club, 19th annual trials. La Salle, Man. Eric Hamner, Secretary, Winnipeg, Man.
Sept. 21—British Columbia Field Trial Club, 3d annual trials. Ladner, B. C. H. S. Rolston, Secretary, Vancouver, B. C.
Oct. 12—Pacific Northwest Field Trial Club. La Conner Flats, Wash. Chas. L. Lundy, Secretary, Seattle, Wash.
Oct. 23—Ohio Field Trial Association. Washington Court House, O. C. T. Phillips, Secretary, Columbus, O.
Oct. 30—American Field Futurity Stake. For Pointers and Setters whelped on or after January 1, 1904, whose dams have been duly qualified. Robinson, Ill., entries closed July 1. Address Am. Field Publishing Co., Chicago.
Oct. 31—Connecticut Field Trial Club. Hampton, Conn. F. M. Chapin, Secretary, Pine Meadow, Conn.
Nov. 6—Independent Field Trial Association. Hutsonville, Ill. S. H. Socwell, Secretary, Indianapolis, Ind.
Nov. 13—Illinois Field Trial Association. Robinson, Ill. Wm. R. Green, Secretary, Marshall, Ill.
Nov.—Indiana Field Trial Club, (Week following Illinois Champion Stake). C. F. Young, Secretary, Clay City, Ind.
Nov. 21—International Field Trial Club. Rutbven, Ont. W. B. Wells, Honorary Secretary, Oatbarn, Ont.
Dec. 2—Continental Field Trial Club, 11th annual trials. John White, Secretary, Hempstead, Long Island.
Dec.—Pointer Club of America (following the Continental trials). Barber, N. C. C. F. Lewis, Secretary, 128 Maiden Lane, New York.
Dec. 12—Eastern Field Trial Club. Waynesboro, Ga. S. C. Bradley, Secretary, Fairfield, Conn.

1906.

Jan.—Pacific Coast Field Trials Club, 23d annual trials. Bakersfield, Cal. Albert Betz, Secretary, 201 Parrott Bldg., San Francisco.

FIELD DOGS NOW IN DEMAND.

Now that the fall hunting season is near at hand many sportsmen are looking around for a desirable dog to work to the gun. In this respect we know of nothing better on the Coast than a broken Pointer from the Stockdale Kennels at Bakersfield. Manager "Mace" Dodge is one of the best known and reputable trainers in the United States and a young dog turned out by him is a dog that a sportsman can rely on to be a valuable working field dog and thoroughly broken in every requisite.

Open and Close Season.

A practical and neat synopsis of the State game and fish laws, and also showing numerous changes in the State law—shortening the open season, by various county boards of supervisors, has been issued by Clahrough, Golcher & Company, 538 Market St., San Francisco.

In view of the near approach of the deer season and the fall shooting we take occasion to give the information in full, the county changes being of much interest to many sportsmen at this time, particularly so in respect to the open season on doves.

State Law, open season—

Deer, from Aug. 1st to Oct. 15th.

Doves, from July 1st to Feb. 15th.

Mountain quail, grouse, sage hen, Sept. 1st to Feb. 15th.

Valley quail, ducks, ibis, curlew, plover, rail, Oct. 15th to Feb. 15th.

Snipe, from Oct. 15th to March 31st.

Trout, from April 1st to Oct. 31st.

Steelhead trout, Oct. 16th to Jan. 31st. April 1st to Sept. 10th. Above tide water closed Nov. 1st to April 1st.

Salmon, Oct. 16th to Sept. 10th. Above tide-water close season extends to Nov. 15th.

Lobster or crawfish (not less than 9½ inches long) Sept. 15th to March 31st.

Black bass, June 1st to Dec. 31st.

Crah (not less than 6 inches across the back) Nov. 1st to Aug. 31st.

Bag Limit—Quail, doves, grouse, snipe, curlew, ibis, plover, rail, 25 in one day. Ducks, 50 in one day. Deer, male, 2 in one season. Trout, 25 lbs. weight or 50 fish in one day.

Open Season, county changes—

Contra Costa—Deer, Aug. 15th to Aug. 20th.

El Dorado—Deer, Sept. 1st to Oct. 15th.

Fresno—Doves, Aug. 15th to Feb. 1st; valley quail, Nov. 1st to Feb. 1st.

Glenn—Doves, Aug. 1st to Feb. 15th.

Los Angeles—Trout, May 1st to Aug. 1st; doves, Aug. 15th, one day only; deer, Aug. 15th to Oct. 1st; valley quail, Oct. 15th to Feb. 1st; mountain quail, Sept. 1st to Oct. 15th.

Madera—Deer, Sept. 1st to Oct. 15; valley quail, Nov. 1st to Feb. 1st; trout, six inches long, doves, Aug. 1st to Feb. 1st.

Merced—Doves, Aug. 15th to Feb. 15th.

Mono—Trout, July 1st to Nov. 1st.

Marin—Deer, Aug. 1st to Sept. 15th.

Placer—Doves, Aug. 15th to Feb. 15th; trout in Lake Tahoe and streams tributary thereto, June 1st to Nov. 1st.

Riverside—Deer season closed; trout, May 1st to July 1st.

Sacramento—Doves, July 15th to Feb. 15th.

San Luis Obispo—Deer, Aug. 1st to Sept. 15th.

Santa Barbara—Deer, Aug. 1st to Aug. 31st.

Santa Clara—Doves, Aug. 1st to Feb. 15th.

Santa Cruz—Rabbits, Oct. 15th to Feb. 15th; doves, prohibited; unlawful to trail deer with dogs at any time.

San Bernardino—Deer, Aug. 15th to Oct. 1st; doves, Aug. 15th, one day only; mountain quail, Sept. 1st to Oct. 15th; valley quail, Oct. 15th to Feb. 1st; trout, May 15th to Nov. 1st.

San Benito—Deer, Aug. 1st to Oct. 1st.

San Mateo—Cottontail or brush rabbits, July 1st to Feb. 1st; rail, Oct. 15th to Nov. 16th; deer, Aug. 1st to Oct. 1st.

Sutter—Doves, Aug. 1st to Feb. 15th.

San Joaquin—Doves, Aug. 1st to Feb. 15th.

Stanislaus—Doves, Aug. 1st to Feb. 15th.

Ventura—Deer, Aug. 1st to Sept. 1st; doves, Sept. 1st to Oct. 1st.

Yuba—Doves, Aug. 1st to Feb. 15th.

The State game and fish laws prevail unchanged in the following counties:

Amador, Alpine, Alameda, Colusa, Calaveras, Del Norte, Humboldt, Inyo, Kern, King, Lassen, Lake, Mendocino, Monterey, Modoc, Napa, Nevada, Plumas, Sonoma, Shasta, Siskiyou, Sierra, San Diego, Solano, Trinity, Tulare, Tehama, Tuolumne.

Advices have not yet been received from Butte, Mariposa, Orange or Yolo counties.

San Francisco, no changes have been made, an old county ordinance, however, makes it a misdemeanor to hunt game within the county limits.

What is always unlawful—To buy, sell, offer for sale, barter or trade, at any time, any quail, dove, pheasant, grouse, sage hen, snipe, ibis, plover, rail, or any deer meat or deer skins.

To have in possession doe or fawn skins.

To take or kill, at any time, does, fawns, elk, antelope, mountain sheep, or tree squirrels.

To take or kill pheasants, or any imported quail.

To run deer with dogs during the close season.

To shoot half hour before sunrise or half hour after sunset.

To trap protected game or birds of any kind without having first procured written authority from the Board of Fish Commissioners.

To take, possess, or destroy nests or eggs of any birds.

To ship game or fish in concealed packages, or without your name and address.

To buy or sell trout less than one pound in weight.

To take, at any time, sturgeon or female crabs.

To take red or green abalones less than 15 inches in circumference.

To take black abalones less than 12 inches in circumference.

To take trout, black bass, or steelhead, except with hook and line.

To take salmon, shad, or striped bass with a net less than 7½-inch mesh, or to use a set net.

To fish with boat and net without a license.

To fish for salmon, shad, or striped bass with nets Saturday and Sunday.

To take fish, in any manner, within 50 feet of a fishway.

To take, buy or sell stripped bass less than three pounds in weight.

To take or kill meadow larks, or any other wild birds, except bluejays, English sparrows, sharp-shinned hawk, Cooper's hawk, duck hawk, great horned owl, or California linnet.

To shoot on enclosed land without permission.

To export dried shrimp or shrimp shells.

Killing an elk, a felony—1 to two years imprisonment.

Fine for violation game laws, \$25 to \$500 and imprisonment.

Fine for violation of fish laws, \$20 to \$500 and imprisonment.

Smallest fine for using explosives to take any fish, \$250 and imprisonment.

Smallest fine for killing does, fawns, antelopes or mountain sheep, \$50.

DOINGS IN DOGDOM.

SANTA CRUZ KENNEL CLUB.

A practical outcome of the recent show at Santa Cruz has resulted in the organization of an enthusiastic kennel club. The new club starts off with a splendid list of membership, including some of the most prominent citizens of the county. It is proposed to hold a bench show in the Casino some time in September.

The membership roll and officers of the new club are the following:

President, Joseph O. Horne; first vice-president, Montroyd Sharpe; second vice-president, Warren R. Porter; secretary, F. J. Torchiana; treasurer, H. D. Fagen; directors, Joseph O. Horne, Montroyd Sharpe, T. W. Kelly, H. S. Wanzer, Fred W. Swanton; bench show committee, Joseph O. Horne, J. M. Walsh, J. J. C. Leonard, T. W. Kelly, F. J. Torchiana; members, J. O. Horne, G. H. Normand, Montroyd Sharpe, James Normand, Major F. McLaughlin, H. Willey, Warren R. Porter, Leo A. Dieter, F. J. Torchiana, J. M. Walsh, James G. Piratsky, J. J. C. Leonard, H. F. Anderson, H. D. Fagen, Fred R. Howe, W. C. Hoffman, Thomas K. Kelly, George Martin, Fred W. Swanton, Percy Morse, J. W. Forgeus, D. W. Johnston, Irving Townsend, G. W. Sill, Geo. C. Staffler, J. W. Baxter, F. O. Hahn, Fred R. Walti, H. S. Fletcher, W. E. Miller, Jr., H. S. Wanzer, N. J. Stewart, E. Kelly, J. G. Tanner, C. F. Fagen.

A SEATTLE DOG POISONING CASE.

The prosecution, that it is claimed would have resulted in a conviction, of a dog poisoner one Adam Hoenicke, was dropped by the Seattle Kennel Club for the reason that the defendant, a well to do farmer, was found dead in a field the night previous to his preliminary hearing on a charge of maliciously poisoning dogs with strychnine.

Hoenicke had been dead apparently a week or more when the body was discovered. He had not been seen since June 23d, and it was evident to callers, from appearances about his place, that he had been absent, a search of several days resulted in finding the remains. He was 73 years old, his death is supposed to have been due to heart ailments.

The crime for which the aged farmer was arrested by Humane Officer Clark, of Seattle, at the request of the Seattle Kennel Club, was the death by poisoning of three valuable dogs. J. W. Riplinger's English Setter Bracken O'Leck had a close call also. Capt. E. A. Swift's Pointer bitch, Kitsap Juno, winner at the recent Seattle show, and an English Setter owned by John W. Considine were two of the victims. Autopsies showed strychnine to have been the cause of death.

A number of witnesses were ready to prove that Hoenicke had openly expressed threats to kill all of the dogs in the kennels of S. Hanson at South Park, about five miles from Seattle. Hanson is a well known and popular trainer and had in charge a number of dogs for the coming Northwest field trials.

Dogs in Washington State are personal property and owners are protected by statute. Charles L. Lundy, a Seattle fancier, had been retained for the prosecution and would have, subsequent to the criminal trial, brought civil action for damages.

WORKING COLLIES.

Glen Tana Collie Kennels make a specialty of breeding the best working strains of Collies for sheepmen and sell them at reasonable prices. The G. T. Collies have made a clean sweep of the Pacific Coast shows, winning 168 first prizes, 18 seconds, 3 thirds and special cups for best Collie bitch and best Collie dog in 7 shows. The Spokane kennels also have the largest and best kennel of stud dogs on the Coast. A select lot of puppies are offered fanciers who are desirous of getting good stock. Orders for young or old dogs can be filled and purchasers can rely on the integrity of the kennel management.

It behooves the fancy to send for the recently issued circular listing a number of desirable dogs that are for sale. A request mailed to Thos. S. Griffith, P. O. Box No. 1907, Spokane, Wash., will receive prompt attention. In the list of dogs and bitches offered at stud and for sale will be found much information of value to Collie breeders.

We note in the classified "ads" on page 15, that Mr. D. E. Martin of Livermore has some desirable young Pointers for sale.

PUPPIES WITH OSTRICH APPETITES.

Joseph Graham, the well known authority on kennel matters, was recently asked for advice as to treating a young dog which has a habit of eating hard and indigestible substances. In reply he said: "The best advice is—get another dog. Once I thought this habit came from lack of bones or bone material in the food. My present notion is that it is a symptom of serious nervous disorder, and has no relation to the elements of food. Every young dog that has manifested this craving under my observation has had a derangement of the nervous system. One beautiful son of Cincinnatus' Pride in my kennel would make a meal on soft coal. He would chew bits of brick, pieces of wood—almost anything hard that was chewable at all. I put bone dust in his food and broke up soup bones. But it was soon apparent that he was suffering from a deep-seated nervous derangement. Any excitement or rapid exercise, after he was a year old, produced a convulsion. He died in a fit. What sort of nervous disorder is the cause of this particular habit I cannot say. Nerve symptoms are queer things, even for the specialists. A man may have terrific pains in his arm when the trouble lies somewhere in the base of his brain. He may have an irritable stomach from fatigue of the eyes. A horse may take to cribbing, because there is an itch in a nerve centre or an instinct artificially repressed. In a human being we try patiently to cure these nerve troubles."

With a dog, the case is just so much more baffling, we believe Mr. Graham gives the proper diagnosis and remedy.

AMERICAN FIELD FUTURITY.

The Coast is represented in the first American Field Futurity by three entries.

J. W. Flynn (San Francisco) nominates Senator and Senator's Don, two lemon and white Pointer dogs by Ch. Senator P. out of Flynn's Dolly Jingo, whelped May 13, 1904.

J. E. Lucas (San Rafael) nominates Uncle Dudley, black, white and tan English Setter dog by Count Whitestone out of Sport's May Belle, whelped May 17, 1904, bred by Peebles and White, Seattle, Wash. Both Senator's Don and Uncle Dudley are also entered in the Pacific Coast Derby.

British Columbia is represented by W. T. Hunter's (Greenwood) blue belton English Setter dog Tonaugh by Tony Boy-Sport's Estelle, whelped April 20, 1904.

The entries in the American Field Futurity number fifty-eight.

ISLAND BENCH SHOW.

There is strong probability of a bench show coming off at Honolulu in the near future. The proposed show will be held in conjunction with the annual poultry show. If the affair can be arranged, we are informed a large string of dogs will be sent there from this city and other points.

Among the recent happenings in local Collie circles we are informed of a whelping of 13 puppies (8 dogs) by J. Martin's Ormskirk Duchess to Presidio Conqueror on July 18th.

Presidio Lassie, a bitch owned by Hugh McCracken was served July 17th by Dr. W. P. Burnham's Brandane Wishaw Squire.

R. C. Hartman's Ellwyn Gay was served by Moreton Eclipse on the 16th inst.

The judges announced for the Independent Field Trials Club trials are: J. A. Graham, St. Louis; Dr. M. F. Rogers, New Albany, Miss., and Marsh Byers, Grand Rapids.

AT THE TRAPS.

Following the Interstate shoot—the Pacific Coast Handicap at Ingleside in September—it is planned by Medford, Or., sportsmen to give a big tournament with from \$500 to \$1000 in added money, enough at all events to induce a large attendance of shooters from all over the Coast and Northwest, including a majority of the Eastern cracks who will be here in September.

Although rather late in the day, we publish the following list of averages shot at the recent Northwest Tournament (June 22-3-4) and sent us by a Northern correspondent. It is record matter and many of our trap shooting readers will no doubt avail themselves of this opportunity to place the data of the 21st annual Sportsmen's Association tournament in their scrapbooks.

Average events counted up 580 targets—All of these races were unknown angles save—Multnomah medal, known angles, reversed pull, 25 targets; Brownlee trophy, unknown angles, reversed pull, 25 targets, both barrels; Walla Walla Brownlee medal, 20 targets, expert rules, indicator pull, known angles, four unknown and one known trap, one man up; Globe trophy, 50 targets, 10 known traps, unknown angles—10 known traps, unknown angles, reversed pull, use of both barrels—10 known traps, known angles—10 known traps, known angles, reversed pull—5 pairs, one man up; Individual Championship, 25 targets, known traps, known angles.

W. F. Sheard, of Tacoma, was high average with 90.6%, A. J. Webb, of San Francisco, was a close second with 89.8%, only .8 behind the winner, a very close margin. The following is the further list of general average prize winners:

Third, J. W. Bradrick, of San Francisco, 88.7; fourth, A. P. Bigelow, of Ogden, 88.03; fifth, G. W. Miller, Tacoma; E. G. Livingston, Montana; J. P. Holohan, Walla, Ida.; Dell Cooper, Bellingham, all 87.58 per cent; sixth, E. Schultz, San Francisco, 87.4; seventh, M. O. Feudner, San Francisco, 87.2; eighth, Harry Ellis, Portland, 87.05; ninth, J. Smalls, Walla Walla; E. J. Chingreen, Spokane, both 86.89; tenth, Wagner, Portland, 86.55; eleventh, J. W. Huse, Billings, Mont., 86.37; twelfth, W. A. Hills, Portland, 86.2; thirteenth, W. E. Carlon, Portland, 85.35; four-

teenth, J. E. Cullison, Portland, 85; fifteenth, Maurice Abrahams, Portland, 84.82; sixteenth, A. J. Winters, Portland, 84.4; seventeenth, L. A. Walker, Woodland, Cal., 83.7.

Following is a complete list of the 149 participants in the shoot, together with number of targets shot at and total percentage:

Name—	Shot at	Percent
H Eaton	175	74

A blue rock club was recently organized at Gardnerville, Nev.

The trap shooting function tomorrow that is of much interest to local sportsmen is the meeting under the auspices of the Vallejo Gun Club at the Flosden Station grounds near Vallejo. The feature of the day will be the five man team shoot by squads representing the Golden Gate, Union and Empire Gun Clubs of San Francisco, Santa Rosa Gun Club, Hercules Gun Club of Pineale, St. Helena and Vallejo Gun Clubs. The shoot will be for a trophy and is the initial meet of a series of shoots until the trophy has been won twice by a contending team—the schedule states "best two out of three wins." As there is no assurance that the same club will win twice out of three shoots, the chance for an extremely interesting series of shoots is a good one. There will be optional side pools, high guns, one money for each three entries. M. A. Clark of the Vallejo Gun Club will be Captain of the day and popular Thos. L. Lewis, Secretary of the Union Gun Club, will act as manager of the shoot. A large attendance is anticipated for the Vallejo sportsmen are good fellows and painstaking entertainers.

The Union Gun Club monthly shoot on the 16th inst. was well attended for a July shoot and good scores were the average. "Slade" being one of the participants to make excellent scores. Among the visitors were J. Ed Vaughan of Santa Ana who broke 23 and 20 targets from the 16 yard peg, W. A. Robertson 21, B. Baird 17 and Ed Schultz 23.

The unusual number of ties shot off is an indication of how keenly the different events were contested. The final race for the Phil B. Bekeart trophy was won by Otto Feudner. The summaries of scores follows:

Club match, members only, 25 targets, \$40 added (10 for each class, Rose system, 5-3-2), 16 yards:

Champion class—M. O. Feudner 24, E. L. Forster 23, L. Hawxhurst 23, C. A. Haight 20, F. Feudner 20, A. J. Webb 20, M. J. Iverson 16. Every shooter was in the money but Iverson.

First class—H. D. Swales 24, "Slade" 22, W. R. Murdock 21, W. A. Searles 21, Dr. Pittres 21, C. S. Fish 20, T. L. Lewis 20. Money won by all but the two 20 men.

Second class—W. Janssen 21, C. T. Mitchell 20, J. Pisani 19, A. M. Shields 19, C. Frankel 18, H. P. Jacobsen 18, F. Knick 18, E. Taylor 14, Janssen, Mitchell, Pisani and Shields won the class purse.

Third class—C. T. Harvey 22, W. Schneider 19, J. W. Biller 17, Dr. Finnie 17, F. W. Woods, Jr. 16, F. Turner 15, Dr. Bodkin 11, J. L. Dutton 11, B. Patrick 11. Harvey, Schneider, Biller and Finnie annexed the money.

Medal match, members only, 25 targets, 16 yards (previous winners 18 and 20 yards):

Champion class—Webb 22, Hawxhurst 22, E. L. Forster (20 yards) 22, M. O. Feudner 21, Haight 21, Iverson (18 yards) 19. Shoot-off, Webb 23, Forster 22, Hawxhurst 22, Webb won the class medal for the month.

First class—H. D. Swales 23, "Slade" 23, Searles (18 yards) 21, Pittres (18 yards) 19, Murdock 17. Swales was awarded the monthly medal, "Slade" did not shoot off with him.

Second class—Shields 19, Mitchell 19, Jacobsen 19, Janssen (20 yards) 18, Taylor 17, Frankel 14, Knick (18 yards) 14, Pisani 14. Shields won the shoot off for the medal, Shields 21, Mitchell 21, Jacobsen 17; Shields 19, Mitchell 17.

Third class—Woods, Jr., 19, Biller 16, Harvey 16, Turner 15, Dutton (20 yards) 13, Finnie 13, Patrick (18 yards) 12, Schneider 11, Bodkin 9. Woods was the medal winner.

Added money event, 15 singles 16 yards, 5 pairs 14 yards, class shooting, 3 moneys. \$5 added, open to all.

	Doubles	Singles	Total
Swales	6	13	19
Searles	6	10	16
Feudner, C.	9	11	20
Iverson	7	14	21
Knick	3	11	14
Schneider	5	4	9
Webb	8	13	21
Pittres	5	11	16
Jacobsen	3	12	15
Pisani	4	11	15
Haight	5	11	16
Mitchell	7	9	16
Hawxhurst	7	14	21
Harvey	5	12	17
Lewis	6	7	13
Schultz	9	13	22
Feudner, F.	5	12	17
Janssen	8	10	18

Secret handicap, serial race for Tuckey and Klein trophy, 25 targets limit, members only, 16 yards:

Schneider 23, Patrick 18, Taylor 23, Pittres 24, Woods 20, Dutton 21, Harvey 18, Janssen 23, Hawxhurst 21, "Slade" 25, O. Feudner 24, Turner 19, Shields 23, Haight 22, Baird 17, Robertson 21, Biller 19, Jacobsen 23, Frankel 18, Iverson 18, Haight 24, Schultz 23, Lewis 20.

Phil B. Bekeart perpetual challenge trophy race, 100 targets, 16 yards, entrance \$5:

	23	24	24	23-93
Feudner, M. O.	23	24	24	23-93
Webb	23	24	24	23-93
Schultz, E.	23	23	23	24-93
Hawxhurst	25	23	22	21-91
Haight	19	21	19	20-79

Shoot off at 50 targets—Feudner 22, 24-46; Schultz 23, 22-45; Webb 23, 19-42.

The Vallejo Gun Club shoot on the 9th inst. was well attended, a number of Napa shooters were present. Captain Chappell's team outshot Captain Drake's team twice. The scores in the club race at 25 targets were: Chappell 22, Beveridge 22, Comfort 21, O'Hara 21, Brown 20, Rohrer 19, Hirschle 18, Clarke 18, Morgan 18, Carter 18, S. Magistrali 18, Burnett 18, Drake 17, Mayfield 17, P. Magistrali 16, White 16, Elias 15, Fitzpatrick 14, Shouse 13.

The Napa Gun Club was organized July 7th at a meeting held in the office of Dr. Frank Rohrer. S. L. Mayfield was elected president of the club and team captain, Dr. Rohrer was elected secretary and Chas. Reams was made treasurer of the organization. The club intends to secure a shooting range in East Napa, and will hold blue rock and live pigeon shoots regularly. A number of Napa sportsmen are taking enthusiastic interest in the organization.

The Bakersfield Blue Rock Club shoot on the 9th inst. was slimly attended, warm weather and vacation time kept many members away. Gatchell came to the front with 87%, Stoner was second and Jewett third, all good averages as the following scores show:

	Shot at	Broke	Percent
Gatchell	110	96	87
Stoner	110	94	85
Jewett	110	86	78
Scotfield	110	82	74
Higgins	110	66	60
Ferguson	110	62	56
Oswald	70	38	54

There was a larger attendance than usual, July 2d, at the weekly shoot of the Blue Rock Club at their grounds near Recreation Park. The honors of the day were carried off by Mr. Scotfield, with Captain Shafter a close second and Tupman third.

Much improvement is noted in the shooting of a number of the members since the club was organized, as will be seen by the following score:

	Shot at	Broke	Percent
Scotfield	135	127	87
Shafter	95	82	86
Tupman	125	106	84
Gatchell	150	125	83
Oswald	160	126	78
Stoner	125	97	77
Jewett	125	96	75
Day	75	54	72
Nelson	135	97	71
Higgins	95	67	70
Courtwright	115	98	88
Packard	100	61	61
Hochheimer, M.	100	59	59
Hochheimer, L.	100	59	59

The Grants Pass Gun Club held a blue rock tournament July 4th and 5th. Every shooter in attendance spoke loud in praise of the hospitable entertainment received from the club members and management. Mr. Thos. Armstrong, late of Peoria, Ill., managed the tournament in a very satisfactory manner, every detail which tends to make a shoot run properly was looked after. Mr. Armstrong is an old live-bird shot and proved his skill by "going some" at the clay birds. "Dick" Reed made high average 93.5%. D. W. King, Jr., representative for Ballistite powder, made the longest run, 69 straight. First high amateur average was made by R. L. Bartlett 84.5%, second high amateur average, T. Armstrong 83.6%.

July Tribulation.

I jes' set here a-dreamin—
A-dreamin' every day,
Uv the sunshine that's a-gleamin'
On the rivers far away.
An' I kinder fall to wishin'
I wuz wher' the waters swish.
Fer if the Lord made fishin'
Why a feller oughter fish.
If I'm standin' or a-bikin'
'Bout the dusty, rusty town,
I allus feel the trout a-strikin'
I kin see the spoon spin round.
An' the sunshine seem's a-tanglin',
Uv the shadders cool and sweet
An' the mornin' glories are a-danglin'
Wher' the willers an' alders meet.
So I kick and git a-wishin'
I wuz wher' the waters swish,
Fer if the Lord made fishin'—
Why a feller oughter fish.

MARYSVILLE CAMP STEW.

At the recent annual camp stew of the Grass Valley Sportsmen's Club about 250 congenial spirits were present and drank, ate, made merry and had a jolly time all day such as only can be enjoyed at this time-honored and wholesouled yearly gathering of sportsmen.

With the faint streaks of morning showing in the eastern sky the faithful ones crawled out, started the fires and began preparations for breakfast. There was little time to wait. From Nevada City, Grass Valley, Auburn, Colfax, Spenceville, Smartsville and other places rigs began to arrive bearing hungry mortals whose appetites had been sharpened by the long ride in the crisp morning air. Then the cooks did a business which would shame any quick order house in the country. T. W. B. Golding, W. H. Smith and Elmer Roberts presided over the region of steaks and chops, bacon and liver and glorious rich, aromatic coffee that would have made any housewife jealous. Henry Campbell prepared the salad. Then with milk, bread and butter, the meal was complete. And eat! Every new arrival seemed hungrier than the one before. All were apparently hol'ow clear to their feet. It was a genuine pleasure to watch them devour the rich, juicy steaks and stow away vast quantities of other things. Joke and hearty laughter rang around the long tables, making the most confirmed dyspeptic forget his infirmity and do justice to a meal under the pines which would have astonished a section hand. Until 10 o'clock breakfast was served and the waiters were kept on the jump to the finish.

Up to noon the hunters came in from afield, but all had the same hard luck story—no doves. This had been expected, however, and ample provision made to substitute chickens. Instead of 1200 doves, the number brought in a year ago, 100 would cover the bag. Ward Mitchell bagged twenty two, the record of the day. The Marysville contingent brought two dozen tame ducks, and others provided rabbits and other game.

Then the arrangements began for the great and only stew. Captain George R. Tuttle, Gennett Opie, William Provis, W. J. Grenfell, J. C. Conaway, A. F. Brady, J. C. Tyrrell, James Lucas and others peeled spuds, while Dr. Grown, Wm Connors, A. J. Brockington, Con Sullivan, John Hammill, Lee Garthe, Superintendent of Schools O'Neill and Henry Posner removed the feathers from defunct birds. The cleaning department was conducted by Elmer Roberts and Ed. Paynter.

Maurice O'Connell, that king of camp stew chefs, took charge of the big affair, as in years past, and with James Phillips and the rest of his able assistants, soon had the kettles bubbling forth savory odors which told appetizingly of the feast to come.

During the preparatory stew period the time was spent in whole-souled fun. All dignity was cast aside and like big boys the men, young and old, many staid men of affairs, the big gathering laughed, frolicked, sang and made merry. Running, jumping and other sports, followed by songs, addresses and stories, whiled waiting appetites into patience and good humor. A quartette composed of Messrs. James and Archie Crase, Harry Morgan and Louis Hooper, rendered numerous selections. The young men have rare good voices and sang with great feeling old war songs, negro melodies and popular pieces.

If any set of men know how to have a good time, and at the same time induce everybody else to do the same, the Marysville visitors are that set. They came to the picnic in a carry-all and several carriages, with a choice stock of liquid refreshments, and kept open house all day.

The club, at its stand, dispensed cold refreshments from morn till night with lavish hand, free to all. A competent force of "mahogany artists" ladled out the wet goods.

At 4 o'clock the summons to the feast met with immediate response, and in a few minutes the three long tables were surrounded by as hungry a lot of mortals as had helped to demolish breakfast. O'Connell had the stew done to the second. Plenty of liquids and other good things accompanied the steaming, savory mess, adding zest to the feast.

Hon. J. R. Tywell presided as toastmaster with his usual genialty and graceful tact. Among the speakers who added their quota to the good things of the day were Superior Judge Nilon, who responded in a humorous and apt style to the toast "A True Sportsman." Dr. Taggart of Stockton related in a happy vein his "First Impression of a Camp Stew." Dr. Julian Dobbins rendered vocal selections, pleasing as ever. "Jack" Collins of Marysville said a few words about "The Tule Hunting Club." District Attorney Jones' theme was the "Vacant Chair," Uncle George Bromley was present and his remarks were listened to with rapt attention. Hon. J. V. Snyder responded to the toast, "Our Sister City, Nevada."

In the many years' history of the club never has it given its friends a more delightful day in the woods, nor one which will be recalled years hence with more pleasure. And yet to many a tinge of sadness crept into the day, as absent faces were pictured in memory—faces of men whose presence in past years has done much to enliven the day. Death has summoned genial "Tom" Sherwood and others, who, year after year attended with religious punctuality. H. T. Payne could not be present, nor could Captain J. K. Orr and Dr. Crawford of Berkeley, each of whom sent regrets.

A CAMP GRILL THAT COOKS.

A handy, convenient and properly working camp cook stove or cooking apparatus of any kind has been an object of long and persistent search by sportsmen and campers out for many a day. Many contraptions have been put on the market, most of them are cast aside with disgust after a short period of unsatisfactory usage.

The best thing in this line we have seen yet is a grill, designed somewhat after the U. S. Army company cooking stove or grill. A strong oblong iron frame is arranged for two-thirds of its length with transverse iron rods, the other third is crossed with heavy short iron slats, bent in the middle, transversely, at almost a right angle. Four flat iron uprights are made to hold the grill over the coals.

The whole apparatus is simple, handy and easy to pack. The arrangement of the cross rods and slats is such that one can do any kind of broiling, toasting, baking, cooking or stewing with a number of utensils all on at the same time and with less bother and better than any other contrivance offered for outdoor cooking. The range was designed by Mr. Chas. Rollo Peters, it is patented, and can be seen or bought at the store of Clabrough, Golcher & Co., 538 Market St., S. F.

TRADE NOTES.

AVERAGES REPORTED.

Chatham, Ont., June 1st and 2d, H. D. Bates of Ridgetown, Ont., first general average, 306 out of 335, shooting "Du Pont." H. Scane of Ridgetown, Ont., second general average, 305 out of 335, shooting "Du Pont." J. Oldershaw of Chatham, Ont., third general average, 296 out of 335, shooting "Du Pont."

Cedar Springs, Ohio, June 5th and 6th, R. L. Trimble, shooting "Infallible," and C. A. Young, shooting "Du Pont," tied for first general average, 298 out of 330. D. A. Upson of Cleveland, O., first amateur and second general average, 296 out of 330, shooting "Du Pont." R. O. Heikes, third general average, 293 out of 330, shooting "Du Pont." Frank Snow of Brooklyn, O., second amateur average, 292 out of 330, shooting "Du Pont." W. R. Randall of Mason, Ohio, third amateur average, 289 out of 330, shooting "Du Pont."

Lowell, Ind., June 7th and 8th, W. D. Stannard, first general average, 374 out of 400, shooting "Du Pont." J. B. Barto of Chicago, Ill., tied for first amateur and second general average, 369 out of 400, shooting "Du Pont." Hugh M. Clark of Wabash, Ind., second amateur and third general average, 367 out of 400, shooting "Du Pont."

Camden, Ark., June 7th and 8th, T. E. Hubby, first general average, 406 out of 420, shooting "Infallible." Joe Chatfield of Texarkana, Tex., first amateur and second general average, 393 out of 420, shooting "Infallible." Ed Brady of Memphis, Tenn., second amateur and third general average, 390 out of 420, shooting "Du Pont."

Waterbury, Conn., June 13th, Harold Money, first

general average, 180 out of 190, shooting "New E. C." (Improved). C. H. Finch of Thompkinsville, Conn., first amateur and second general average, 169 out of 190, shooting "Du Pont." H. Metcalf of Rockville, Conn., shooting "Infallible," and Dr. McElligott of Waterbury, Conn., shooting "New Schultze," tied for second amateur and third general average, 168 out of 190. Mr. Oxford, of New London, Conn., third amateur average, 167 out of 190, shooting "Infallible."

PETERS' POINTS.

The good work being done with Peters' factory loaded shells goes on without interruption. At the Grand American Handicap, June 27 to 30, there was much comment upon the very handsome appearance of these goods, and their perfect shooting qualities. They were used by fully 25% of the contestants, and in some of the matches by an even greater proportion. Many excellent and even phenomenal scores were made with them. The Consolation Handicap, one of the big events of the tournament, was won by Mr. James T. Atkinson, of New Castle, Pa., with Peters' Ideal shells. He stood at the 18-yard line, and broke 99 out of 100. One other contestant tied with Mr. Atkinson, but in the shoot-off, the latter won 18 to 17. In this match two scores of 98, five of 97, four of 96, and twenty-seven other scores of over 90% were made with these goods.

In the Preliminary Handicap, Mr. Wm. Veach, of Falls City, Neb., scored 97 out of 100 from the 18 yard mark. On the first day of the tournament Mr. L. H. Reid finished with 99 out of 100; and Mr. Luther Wade had a run of 113 straight to his credit. On practice day, June 26, Mr. Frank See tied for high average, 99 out of 100. All these gentlemen used Peters' regular factory loads. These and other equally notable performances at the famous Grand American Handicap showed that Peters' shells may be relied upon for perfect results, no matter how important the issue at stake.

At Binghamton, N. Y., June 20 and 21, Mr. Neaf Apgar won high average, breaking 380 out of 400. At the Rohrer's Island shoot, Dayton, Ohio, June 13, Mr. R. S. Rhoads was high gun with 187 out of 200. At St. Paris, Ohio, a few days later he won high average for both days, scoring 332 out of 350. At Converse, Ind., June 22 and 23, high average first day was won by Mr. Austin Flynn, and on the second day by Dr. M. Wilson, both using Peters shells.

GRAND AMERICAN HANDICAP.

The sixth Grand American Handicap at inanimate targets, held at Indianapolis, Ind., from June 27th to 30th, inclusive, under the auspices of the Indianapolis Gun Club, was indeed the largest and most successful meet of its kind ever held in America. Of the many successful ones who carried away honors we should mention R. R. Barber, of Paullina, Iowa, and W. R. Crosby, who won amateur and professional averages respectively. Mr. R. R. Barber, an amateur from Paullina, Iowa, won the big event at Indianapolis from a field of 335 of the best shots in America with a score of 99 out of 100, and the preliminary with a score of 98 out of 100. In the Consolation Handicap he scored 97 out of 100, and he also made a run of 157 straight. Mr. Barber's scores 99, 98 and 97 establish a new world's record for the three events. This new Togo of the shooting world; W. R. Crosby, who won the first professional average with a score of 298 out of 300; Fred Gilbert, who won second professional average with a score of 295 out of 300, and the winner of the high amateur average, all shot Winchester "Leader" shells, the reliable, the uniform, the winning kind—the only kind to shoot. Billy Crosby has held the world's long run record of 345 straight since March 31, 1901, and now makes another world's record of 419 straight, with Winchester "Leader" shells.

REMINGTON AUTOMATIC SHOTGUN.

Announcement is made that the Remington Improved Automatic will be ready for the trade on or about August 15th. The new model of the gun designed by John M. Browning has a number of improvements that will be acceptable to sportsmen. The take down action has been strengthened and simplified, the stock is improved in shape and made of an extra good selection of walnut. The breech is locked now with a double bolt. The fore-end screw is reinforced with a double collar and the head of the magazine cylinder has now a strong, square screw thus improving these particular parts of the magazine and spring mechanism to the desired extent of durability and perfect action. A noticeable change is the admirable balance of the new model which is designed to shoot six shots and is made in 7 grades ranging in price from \$30 to \$150, in 12-gauge only, 28 inches regular length of barrels. The higher grades are handsomely engraved, with plain or grip checkered stocks of the best walnuts procurable, and in every respect is a shotgun that will be a favorite with sportsmen.

Mr. Browning is the owner of the first gun turned out by the Remington works, President M. Hartly has gun No. 2 and Mr. E. E. Drake is the possessor of No. 3.

GOOD SHOOTING IN OREGON.

Selby Factory Loaded Shells are familiar to and used by the majority of the sportsmen of the Pacific Coast. At the recent tournament of the Grants Pass Gun Club, R. C. Reed shot high average, 93.5. R. L. Bartlett was first amateur average 84.5, and Thos. Armstrong 83.6%, second amateur average. D. W. King, Jr., made the best consecutive run, 69. These good scores were made with Selby Factory Loaded Shells—ammunition that is always ready and reliable.

EXCELLENT RESULTS.

A. J. Webb, who won the Northwest Individual Target Championship recently at Portland, Phil B. Bekeart challenge cup at Ingleside, also won the Empire Gun Club Championship, the Sweeney Record Medal and tied for club high average for 1905. Webb shoots an L. C. Smith hammerless and has done so for years past.

THE FARM.

To Preserve the Aroma of Butter.

One may delay the doing of many things without loss, but to put off churning when the cream is ripe, is not in the list. The mistake must not be made of thinking that butter is made by churning. It is being made from the time the milk is drawn until it is churned. No amount of doctoring will cure a poor quality of butter. It is of the utmost importance that the churn be scrupulously clean and sweet smelling before using. In order to have it so, it must be washed immediately after using, scalded and set where it will be thoroughly aired and dried, writes Mrs. A. C. McPherson in *Orange Judd Farmer*. Rinsing in lime water occasionally is of benefit and will remove the musty odors which sometime linger around churns. The putting of cold water into the churn after cleansing, as practiced by some dairymen, is not to be recommended, as a very unpleasant odor will be developed in a day or two, especially if the day is warm.

After scalding the churn, preparatory to using, it must be rinsed in cold water, or else a woody smell will be imparted to the cream. All wooden utensils used in dairy work should be washed in tepid water first, and afterward scalded, rinsed and dried. The dishcloth must never be used in dairy work. If a cloth is ever necessary, it must be for that one use. Woodenware can be cleansed more rapidly, neatly and satisfactorily with the aid of a brush; either rice straw or bristle brush should be kept for this purpose alone.

If a concussion churn is used, when the butter begins to come—when about the size of a grain of wheat—the churn should be stopped for five or more minutes, or until the granules rise to the top. The buttermilk must then be drained off and cold water added to work the butter in the churn. A skimmer may be used to remove the butter from the churn. This should be when it is firm and well rinsed. The butter now in the granular state must be drained and salted with the best dairy salt.

We prefer to salt butter after it is removed from the churn, rather than brine salt it. We salt at the rate of 1½ ounces salt per pound and think it adds to the keeping qualities of the butter, better than the ounce to the pound method. Patrons find no fault with our butter so prepared. We work lightly, just enough to incorporate the salt evenly, without mashing and smearing it. We press and touch it lightly and daintily, shape it, or

cut it into any desired form and pack it ready for market. The sooner it is delivered the better. The delicate aroma which all well-made butter has is very evanescent, and when made in rolls or packages, exposure to the air soon dissipates this delicate flavor. Cold storage does not help to retain this flavor. Packing in jars so as to exclude the air is the only way to retain it. The market value of butter depends upon its flavor more than any other quality. Appearance should be given due prominence, but flavor is paramount.

New Attack by Oleo.

The safety of pure butter from competition with oleomargarine is again menaced if certain reports from the East are correct. As all those identified with the butter industry of the country know, the protection that butter enjoys from its spurious competitor lies in the fact that butter producers have permission to color their product to a shade that suits the demand of the trade, whenever the color is lacking, which it is under certain conditions of feed, as governed by climate, seasons, certain conditions of soil and with the great majority of the cows of the country. In times past, butter was made mostly from natural pasturage which gives a rich, yellow shade to butter and in this way the public taste many years ago, was educated to demand a yellow shade in its butter. Now a-days we make butter in winter as well as in summer. The natural pastures of the Eastern states can produce only a small proportion of the country's butter supply, and the clover and alfalfa fields of the Western states must be drawn upon. Neither is it profitable to keep a cow in idleness when the pastures are not green. But the butter made under these conditions, while superior in every other respect to the old time Eastern butter, lacks the yellow color to make it acceptable to the average taste, and hence arose out of necessity the practice of coloring butter.

This may not be done with oleomargarine under the law of congress, and most of the states. This permission was denied to that product by law, because it was done for the purpose of fraud. It is this permission to color butter that stands in the way of the oleomargarine fraud. The oleomargarine interests tried by every device to prevent the anti-color bill from becoming a law. They tried to defeat it in the courts after it became a law, but signally failed.

Now they propose a new method of attack. Unfortunately they seem to have with them the chief chemist of the United States Department of Agriculture, Dr. H. I. Wiley, who, in the interest of purity in foods, is decrying artificial coloring. Of course this looks to the oleomargarine interests like things coming their way and they are keeping very quiet about it. If they have such a leader as Dr. Wiley to lend himself to their scheme we may rest assured they will see that sinews of war are not lacking. There is, and will be for many years to come, much legislation by congress on the food question. This will give them their opportunity to fight for legislation to prevent the coloring of butter under their pretended interests in pure foods. The same thing is being agitated in several states. If the oleomargarine people can have their way, they will either block all pure food legislation, or insist upon it including the prevention of coloring butter.

Eastern dairy organizations seem to be on the alert, however, and have entered the fight again in opposition to the schemes of the oleomargarine makers. It behooves every dairyman to watch closely developments along this line in the future.—*Dairy and Produce Review*.

Provide a creep for the lambs so they may get away from the ewes, and give them plenty of oats, bran and nuttall oil cake. Careful experiments have proved this method to be quite profitable.

No. 10—Arizona Yearlings, pacing, entrance money added	200

\$400 Purse will be opened later for 2:30, 2:25, 2:19, 2:15, Free-for-all, and Three-year-old Trotters; 2:28, 2:22, 2:13, 2:09, and Three-year-old Pacers
\$1200 will also be offered for Running Races to be announced later.

CONDITIONS GOVERNING HARNESS RACES.

Rules of the American Trotting Association to govern, except as otherwise provided
Six to enter and four to start.
Money divided 50, 25, 15 and 10 per cent.
Stakes Nos. 1, 2, 3, 4, 5 and 6 to be mile heats, best three in five.

No race longer than five heats. Money divided in accordance with summary at end of fifth heat.
Entrance fee to stakes Nos. 1, 2, 3, 4, 5 and 6, five per cent, with five per cent additional from money winners.

A horse distorting the field, or any part thereof, will be entitled to only one money.
One horse may be entered in two classes, and be held for but one entry, unless two starts are made; and a horse may be declared out on or before November 1 by filing written notice with the Secretary, and payment of three per cent of the stake.

Two horses may be entered in one class and be held only for the entry of the horse that starts; but if neither horse starts one entry fee will be required.

Program will be arranged so a horse can start in two races during the week
Phoenix has a new, modern \$50,000 plant, with both mile and half-mile tracks.
The finest climate in the world for winter and spring training.
The best of water. Choicest alfalfa, oat, wheat or barley hay \$8 per ton.
Special rates on horses over Santa Fe and Southern Pacific roads.
Horses unloaded at grounds over either road without charge or delay.
For entry blanks or further information, address

Entries to stakes Nos. 1, 2, 3, 4, 5 and 6 close Wednesday, November 1; but entries may be made at any time prior to that date in any stake to which a horse is eligible at the date of making entry, and no record obtained after date of making entry will be a bar. Entry fees to stakes Nos. 1, 2, 3, 4, 5 and 6, payable: \$15 at time of making entry; \$15 November 1st, \$2 the evening before the race.

Stakes Nos. 7 and 9 to be half-mile heats, best three in five.

Stakes Nos. 8 and 10 to be half mile beats, best two in three.

Entries to stakes Nos. 7, 8, 9 and 10 close August 1; entry fee \$25, payable: \$5 August 1; \$5 September 1; \$5 October 1; \$5 November 1, and \$5 the evening before the race.

Colts to be eligible to colt stakes must have been owned and kept in the Territory of Arizona at least six months prior to December 1, 1905.

Stalls free to entered horses during the meeting.

W. N. TIFFANY,

Secretary Arizona Fair Association, PHOENIX, ARIZONA.

Established Dairy Facts.

Ten or fifteen years ago the agricultural papers of the United States were actively engaged in discussing a number of mooted questions concerning the relation of the feed of cows to milk production. Prior to that time there was a very general conviction among farmers that both the quality and quantity of the milk could be improved by feeding.

The farmer who was selling milk for town consumption had the conviction that if he fed his cows bran he would not only get a great deal more milk, but less rich in butter fat; in other words, that he could adulterate the butter fat with slop feed or bran mash and get more money for it. He also believed that he could increase the butter fat by more concentrated food.

When this was fully thrashed out, the conclusion reached was that while more abundant feeding up to the capacity of the cow would increase the quantity of milk, the per cent of butter fat in the milk was determined by the idiosyncrasy of the cow, and that this could not be increased provided the cow was fed a normal ration; that is, if the cow was getting less feed, and feed of an inferior quality, and then was changed to a feed adapted to her, there would be an increase in her richness or butter fat in the milk, but beyond this point no increase was possible.

It was also discovered that there were changes in the percentage of butter fat in the milk from day to day for which no adequate reason could be discovered.

The British investigators took this up, and from one of our foreign exchanges we quote their conclusions, which are quite in line with the conclusions of the investigators on this side:

"That when a cow is in full milk and full flesh she will give her normal quality of milk for at least a limited time, even though the quality and quantity of food be very deficient.

"That when in good condition a cow will take off her body whatever is deficient in food in order to give her normal quality of milk.

"That an extra supply of nutritious food at all times increases the quantity of milk, but the percentage of fat is not in any way improved by it; if anything, the tendency being the other way.

"That an extra supply of nutritious food almost invariably very slightly increases the solids not fat of the milk. That a ration poor in food ingredients has a very slight tendency to reduce the solids not fat in milk, but has little appreciable effect on the fat.

"That with a poor ration a cow in full milk will lose carcass weight, while on a rich diet she will gain weight.

"That although the percentage of fat in a cow's milk may vary daily we at present seem unable to control these variations or to account for them.

"That for limited periods up to one month or thereabouts, all ordinary quantities and qualities of foods seem to have no material effect on the quality of the milk.

"That some feeds exercise a material effect in raising the melting point of butter.

"That the aim of all producers of milk, butter and cheese should be to feed what will give quantity in moderate amount and of a mixed nature, and then the produce will be the best that cow can give.

"That extra quality must be looked for by improving the breeds and judicious selection rather than by any special foods or methods of feeding.

"That the variations in the percentage of fat in a cow's milk are caused by something, but what that something is we at present do not know, though if we did we might be able to influence the quality.—*Exchange*

If you would create something you must be something.

California Cattle for Australia.

The repeal of the quarantine against American bred cattle and sheep, which has closed the ports of Australia to breeders and stockmen of this country, has resulted in a prompt and gratifying demand from the Australian ranchers for American stock.

C. E. Binnle, of Sydney, Australia, arrived in this city yesterday in company with J. H. Hoyt, sheep inspector of Solano county. Yesterday they visited the ranch of Henry Glide, south of this city, to arrange for the purchase of a number of registered French merino sheep to be used for breeding purposes in Australia. Mr. Binnle stated that the owners of finer stock were aggrieved at the action of the Government, since the superior value of the French merinos has been recognized ever since the first exportation from the Glide ranch. This was several years ago when Jas. F. Roberts, a rancher of Livermore, returned to Australia, taking with him a half dozen of the finest animals bred in this country. Mr. Binnle, it was stated, is also arranging for heavy purchases of registered cattle and will take to Australia the first steam harvester ever used on the island continent.

It is but a short time since Mr. Glide exported to South Africa sixty head of sheep which were purchased at Cape Town by the agent for General Cronje, one of the war heroes, who has abandoned the sword for the sickle, and is engaged in cattle raising on a large scale. Mr. Glide recently received a letter in the hand writing of General Cronje, expressing satisfaction with the results obtained.

Another large shipment will be made to Honolulu next week. Mr. Glide exports five hundred head of sheep annually to France, England, Germany, Africa and Australia.—*Sacramento Union*.

Age to Castrate Lambs.

In a recent article on the subject of castration of lambs, it was advised that the operation be performed when lambs are fifteen days old. This advice was based upon an extensive experience with the operation, but we have nothing to say against castrating lambs at five days old, provided those following the practice have good success. We have preferred fifteen days as the best time, thinking the lambs by that time would have become strong, in good health, over the troubles sometimes experienced from the first milk of the dam, and less liable to quit sucking as a result of the operation. In many instances lambs at five days old are weakly beasts not in a fit state to withstand shock of castration, so that it is better to wait until they gather strength and are thriving nicely. This is specially true when ewes have had a hard winter upon incomplete rations of hay and fodder without grain. When ewes are well fed and have thrived well during the winter, their lambs would be better able to stand the early operation. It is apparent, therefore, that good judgment should be used in deciding when to castrate, and we should always wait for good weather even were lambs to go longer than fifteen days uncut.—*A. S. Alexander, V. S.*

There seems to be an animal magnetism between men and cows which makes one milker more acceptable than another. It is unnecessary to say that it is unprofitable for anyone to attempt the care of cows who dislikes such work. There is such a thing as incompatibility of disposition between a cow and her keeper, which must be respected.

One advantage in spreading fine manure is that the coarser is much more injurious, if the season turns off dry.

The Crowley Stake No. 2

A SIDE STAKE FOR STARTERS IN THE THREE-YEAR-OLD DIVISIONS

—OF THE—

Pacific Breeders Futurity Stakes No. 5

(FOALS OF 1905—TO TAKE PLACE IN 1908)

Entries to Close Tuesday, August 1, '05

CONDITIONS.

A Side Stake of \$25 each for Trotting and Pacing Foals of 1905 that were entered or substituted and will start in the Three-Year-Old Divisions of the Breeders Futurity in 1908. All money paid in on trotting foals to be divided among those starting in the trotting division, and all money paid in on pacers to be divided among those that start in the pacing division. Money divided 75 and 25 per cent and to go to the first and second horses in this side stake, according to their positions in the final summary of each race. In case all those in the side stake should be distanced in the first heat of either of the regular events, they shall start in another race best two heats in three, on the same day, to decide the money winners. Entrance to the side stake \$25 each. The money to be deposited in some reputable bank, to remain at interest until the stake is trotted.

Entries Close Tuesday, August 1st, with F. W. KELLEY, Secretary P. C. T. H. B. A. 36 Geary St., San Francisco.

Water for Work Animals.

Remember that the stomach of the horse is small hence it should have frequent drinks of water in the day and especially in summer. Not only this, but the water should be fresh and cool and given from a clean receptacle. During the day, between meal, there is no reason why the horse should not have all the water it wants, provided it is doing only ordinary hard work.

There are other places for water also; when the horse comes in from the field remove the halter and head gear and with a large sponge go over the entire head and shoulders with the water, removing all the soil and perspiration; let the water be used freely about the ears, the nostrils and in the mouth. Then go over the rest of the body and wipe it thoroughly with the wet sponge. This sort of treatment will do the animal a world of good and it will eat better, sleep better and work better for this humane treatment.

In warm weather look out for tender spots on the horse where the harness chafes; be watchful that the harness fits in every part so that the work may be done without flinching. If the collar does not fit see that it is attended to at once for the harness maker's bill will be less than the value of the services of the horse if it is laid up for a week with a sore shoulder. Don't forget the nightly grooming and see that it is thoroughly done.

A Cream Cooling Device.

Now that the hot season is approaching, I desire to call attention of butter makers to the bad practice of putting ice into the cream for cooling purposes. If you will just allow some ice to melt in a pail, and notice the impurities left in the water, you will know why I say "bad practice." But the cream must be cooled and you are not so fixed that you can ice the water around the cream vat sufficiently to lower the temperature of the cream quite enough, and consequently you think that you are rather compelled to put ice into your cream. You are really not compelled to do any such thing. If you cannot cool your cream by icing the water outside the cream vat, try this plan:

Take two or three long pails—"shotgun cans" are the best. Clean them thoroughly on both outside and inside, fill them full of crushed ice and set them into the cream. Try this plan. I believe you will like it better than putting ice into the body of the cream.—*Creamery Journal*

FOR SALE.

"A STRATHWAY"

A Dapple Gray Gelding by Strathway out of a Thoroughbred Mare.

MR. FRISCO is 8 years old and SOUND; weighs 1050 lbs. He is one of the grandest road horses in America today. Fearless of all objects on road; a very fast walker; does not pull or lug on the bit; carries his head high; goes straight and never stumbles; will stand when tied and there is no road too long for him. He is a good feeder and a good looker at all times, either before or after driving. His speed qualities are phenomenal. He never saw a race track until last spring, when he was sent to Mr. McDonald at the track at Pleasanton, who drove him a mile in 2:22½, last half in 1:08½, with only thirty days' training. Mr. McDonald says he will trot a mile in 2:15 with three months' handling. The owner of this horse has to go East and has left the horse, buggy and harness in charge of Mr. Thomas Kinney at the Fashion Stables, who will show the horse or outfit.

THOMAS KINNEY,
Fashion Stables, Ellis St., S. F.

HIGH CLASS STALLION FOR SALE.

GREAT PETER BAY STALLION.

FIVE YEARS OLD
Sire, Peter the Great 2:07¼ by Pilot Medium.
First dam, Juanita 2:29 (dam of Sinaloa 2:25¼) by Sultan, sire of Stamboul 2:07¼, etc.
Second dam, Beulah (dam of Beuzetta 2:06¼, Early Bird 2:10 and four more in the list) by Harold, sire of Maud S. 2:08¼, etc.
Third dam, Sally B. (dam of Maurine 2:13¼ and two more in the list) by Lever, thoroughbred son of the great race horse Lexington.

GREAT PETER is a beautiful bay, 15.1 to 15.1½ hands high and one of the handsomest horses in California. He trotted a mile in 2:21 and half in 1:07 as a three-year-old. He was put to pacing with the straps this year, and in a few weeks paced a mile in 2:11¼ at Los Angeles, with a quarter right at 30 seconds. He was then let up on as he had an attack of distemper. Is sound and all right now, and can probably show a mile in 2:12 to an intending purchaser. Will sell at a reasonable price or will deal with him in trade for a first-class trotter. Address

THE CONSOLATION HANDICAP

—at the—
GRAND AMERICAN

Held at Indianapolis, June 27-30, 1905. was won by Mr. Jas. T. Atkinson of Newcastle, Pa., score 99 out of 100 from the 18-yard mark, using

PETERS FACTORY LOADED SHELLS

This was the Only Event During the Entire Grand American which was won from Behind the 16 yard Line. Many other Notable Scores were made with Peters Shells, among them the following:

1st on Practice Day, F. M. See (tie), 99 out of 100 1st on First Day, L. H. Reid (tie), 99 out of 100. 2d in Preliminary, Wm. Veach (tie), 97 out of 100. 3d in Grand American, M. Arle (tie), 97 out of 100. In the Consolation Handicap, 2 scores of 98, 5 of 97, 4 of 96 and 25 others above 90 were made with Peters Shells

All of which merely goes to prove that Peters Shells are WINNERS.

\$400 Purse will be opened later for 2:30, 2:25, 2:19, 2:15. Free-for-all, and Three-year-old Trotters; 2:28, 2:22, 2:13, 2:09, and Three-year-old Pacers
 \$1200 will also be offered for Running Races to be announced later.

CONDITIONS GOVERNING HARNESS RACES.

Rules of the American Trotting Association to govern, except as otherwise provided

Six to enter and four to start.

Money divided 50, 25, 15 and 10 per cent.

Stakes Nos. 1, 2, 3, 4, 5 and 6 to be mile heats, best three in five.

No race longer than five heats. Money divided in accordance with summary at end of fifth heat.

Entrance fee to stakes Nos. 1, 2, 3, 4, 5 and 6, five per cent, with five per cent additional from money winners.

A horse distancing the field, or any part thereof, will be entitled to only one money.

One horse may be entered in two classes, and be held for but one entry, unless two starts are made; and a horse may be declared out on or before November 1 by filing written notice with the Secretary, and payment of three per cent of the stake.

Two horses may be entered in one class and be held only for the entry of the horse that starts; but if neither horse starts one entry fee will be required.

Program will be arranged so a horse can start in two races during the week.

Phoenix has a new, modern \$50,000 plant, with both mile and half-mile tracks.

The finest climate in the world for winter and spring training.

The best of water. Choicest alfalfa, oat, wheat or barley hay \$8 per ton.

Special rates on horses over Santa Fe and Southern Pacific roads.

Horses unloaded at grounds over either road without change or delay.

For entry blanks or further information, address

Entries to stakes Nos. 1, 2, 3, 4, 5 and 6 close Wednesday, November 1; but entries may be made at any time prior to that date in any stake to which a horse is eligible at the date of making entry, and no record obtained after date of making entry will be a bar. Entry fees to stakes Nos. 1, 2, 3, 4, 5 and 6 payable: \$15 at time of making entry; \$15 November 1st, \$2 the evening before the race.

Stakes Nos. 7 and 9 to be half-mile heats, best three in five.

Stakes Nos. 8 and 10 to be half-mile heats, best two in three.

Entries to stakes Nos. 7, 8, 9 and 10 close August 1; entry fee \$25, payable: \$5 August 1; \$5 September 1; \$5 October 1; \$5 November 1, and \$5 the evening before the race.

Colts to be eligible to colt stakes must have been owned and kept in the Territory of Arizona at least six months prior to December 1, 1905.

Stalls free to entered horses during the meeting.

W. N. TIFFANY,

Secretary Arizona Fair Association, PHOENIX, ARIZONA

The Crowley Stake No. 2

A SIDE STAKE FOR STARTERS IN THE THREE-YEAR-OLD DIVISIONS

—OF THE—

Pacific Breeders Futurity Stakes No. 5

(FOALS OF 1905—TO TAKE PLACE IN 1908)

Entries to Close Tuesday, August 1, '05

CONDITIONS.

A Side Stake of \$25 each for Trotting and Pacing Foals of 1905 that were entered or substituted and will start in the Three-Year-Old Divisions of the Breeders Futurity in 1908. All money paid in on trotting foals to be divided among those starting in the trotting division, and all money paid in on pacers to be divided among those that start in the pacing division. Money divided 75 and 25 per cent and to go to the first and second horses in this side stake, according to their positions in the final summary of each race. In case all those in the side stake should be distanced in the first heat of either of the regular events, they shall start in another race best two heats in three, on the same day, to decide the money winners. Entrance to the side stake \$25 each. The money to be deposited in some reputable bank, to remain at interest until the stake is trotted.

Entries Close Tuesday, August 1st, with F. W. KELLEY, Secretary P. C. T. H. B. A.
 36 Geary St., San Francisco.

Wilcoxson's Perfection Liniment

The Greatest Remedy Ever Known For Bad Legs.

It penetrates to the seat of trouble at once. It allays fever from any cause. A Safe, Speedy and Positive Cure for Sprains, Cuts, Bruises, Thoroughpins, Sweeney, Capped Hocks, Wind Puffs and all Lameness from Sprains, Ringbone and other bony enlargements. On broken down, weak and injured tendons, ruptured ligaments its power is unerring. Permanently cures all broken down conditions of the Ankles, Hocks, Tendons or Ligaments, without loss of hair or an hour's let up on the horse.

PRICE \$2 PER BOTTLE Express charges prepaid on receipt of price. Every bottle guaranteed to give satisfaction or money refunded.

THE F. A. WILCOXSON REMEDY CO., TIMN O., U. S. A.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Cerise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

STRICTLY IN ADVANCE.

Money should be sent by postal order, draft or by registered letter addressed to F. W. KELLEY, 36 Geary St., San Francisco, Cal. Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

San Francisco, Saturday, July 29, 1905.

A SMALL ADVERTISEMENT is often far reaching. Some weeks ago Mr. Topham of Milpitas, Santa Clara county, used a small space in the BREEDER AND SPORTSMAN to state the fact that his stallion Peralta was for sale. Within a few days after the paper containing the advertisement reached its readers in New Zealand (who are quite numerous, by the way), came a cablegram addressed to the proprietor of this journal asking the price on this horse. The owner was communicated with, the price ascertained and cabled to the enquirer, Mr. H. J. Taska of Christchurch, New Zealand. That gentleman immediately cabled that the price was satisfactory and that he would take the horse, the money for which was sent by the next mail. Peralta will leave San Francisco on the steamer Sonoma of the Oceanic line which is advertised to sail for Auckland and Sydney, August 10th. Peralta is now at the Hulda Stables in this city and is a fine looking five-year-old stallion. His sire is that great producer of speed Nutwood Wilkes 2:16½, sire of John A. McKerron 2:04½, Tidal Wave 2:09, Who Is It 2:10½, Stanton Wilkes 2:10½ and many other fast ones, and his dam is Rose McKinney, daughter of the greatest of all sires McKinney 2:11½, and the dam of that never beaten colt Almaden, record 2:22½ as a two-year-old, winner of the Pacific Breeders Futurity in 1903 and the Occident Stake in 1904. Rose McKinney's dam is Queen Bee by Forest Clay 1934, next dam Lovelia by Almont Lightning 1023, sire of the dam of Zombro 2:11, and next dam Daisy by the great thoroughbred horse imported Yorkshire. Peralta is a bay horse, 16 hands high, weighs about 1100 pounds, and a very fine individual. The Nutwood Wilkes-McKinney cross has produced speed every time it has been tried, and while Peralta has never been trained, there is no doubt but he could get a low record if put in the hands of a trainer. He is the best bred and the best looking stallion that has been sent from America to New Zealand and will help improve the trotting breed of horses in that country. Since he was sold to Mr. Taska, there have been many inquiries about him, and those who have looked him over since he has been at the Hulda Stables have expressed surprise that such a horse was permitted to leave the country at the price Mr. Taska secured him for.

SANTA ROSA TRACK will be the centre of attraction for California admirers of the harness horse from now until the close of the Breeders meeting which opens there August 16th. A very large proportion of the horses named to race at the meeting are already at this track, which is in fine condition. The weather is excellent, not too hot for comfort, but balmy and warm, with just enough of the Coast breeze to invigorate men and horses. The Santa Rosa meeting will be one of the most important held on the Pacific Coast this year. The four divisions of the two futurity stakes to be decided will attract the attention of every harness horse breeder, and as the colts and fillies to start will not be named until August 7th, ten days before the meeting opens, there is much speculation whether or not from out 'the woods' may not come young trotters and pacers that may defeat the high class youngsters eligible to these stakes, that have already shown their speed and mettle at Los Angeles and Fresno. Some of the very fast ones, the pacer Rockaway for instance, are not in this stake, which should be a warning to every breeder to enter his colts in stakes and keep them there, as the earning capacity of a colt is very small unless he can start in stake races. The Santa Rosa meeting will be much benefitted this year by the new railroad lines that have been completed since last year. An electric line now runs from Petaluma to Santa Rosa, passing through

several small towns on the way, which will make the Santa Rosa track accessible to several thousand people at a very small cost, who have heretofore found it very inconvenient to visit meetings held there. The new line to Napa has also put that thriving city of 6000 inhabitants within two hours ride of Santa Rosa, and the meeting will doubtless draw quite a crowd from there. The races to be held promise even faster time than resulted at Los Angeles and Fresno. There is no faster track in California than the one at the county seat of Sonoma county and the people are enthusiastic admirers of the light harness horse, fully realizing the fact that the world's champion trotter was bred, foaled and first trained to trot at the Santa Rosa Stock Farm. There are glorious prospects for high class racing and record breaking at the Breeders meeting next month.

THE FOLLOWING TRIBUTE to the memory of the late Blaine S. McMahan was written by Dr. J. W. Neal, editor and manager of *The Western Horseman*, and printed in the issue of July 21st of that journal. After giving the facts of the young man's untimely death, the article says: "On Wednesday afternoon, July 20th, the remains reached Rushville, and Thursday forenoon all that is left of an idolized son and brother, a devoted and true friend and the emblem of noble young manhood was laid to rest. Peace to his ashes and heavenly repose to his ever noble, true, companionable and always well-meaning spirit. If ever a man lived to the age of twenty-five years without making a single enemy in the world that man was Blaine S. McMahan. By nature always good-humored, affable, pleasant and obliging, self-culture and innate regard for the finer feelings of others made Blaine S. McMahan a polished nobleman among 'young men of the world,' and really and truly none knew him only to love and respect him. He was the only son of Dr. S. W. McMahan, long a part owner and co-editor of *The Western Horseman*, and Blaine literally grew up in *The Western Horseman* office. Last November he went to California, and later connected himself with the BREEDER AND SPORTSMAN as associate editor and traveling business and news gatherer and at the time of his sad ending was acting also as assistant secretary of the Pacific Coast Trotting Horse Breeders' Association. He leaves behind a devoted mother, Mrs. Lydia McMahan, and a worshipful sister, Miss Anna, to whom will spontaneously go the sacred sympathy of hundreds, nay, thousands, of the readers of *The Western Horseman*. The editor of *The Western Horseman* knew Blaine as probably no one else ever knew him, and he mourns his loss as the loss of an own son."

MAKE YOUR STARTING PAYMENTS for the divisions of the Pacific Breeders Futurity in which you expect to start your colts this year. There are four events remember, one each for two and three year old trotters and pacers. These colt stakes are expected to furnish some of the best contests of the Santa Rosa meeting, and there will be no races on the program that will excite more interest. If you can win any part of any stake, or your colt can make a good showing in any one heat even, his value in case you want to sell, will be added to much more than the entrance and starting fees cost. The sums to be won in either division of these stakes are worth trying for. The three-year-old trotters have \$2000 to contest for, the two-year-old trotters \$1000. For the three-year-old pacers there is the neat sum of \$1250, and for the two-year-olds \$750. Then there is \$300 for the person who originally nominated the dam of the winner of any of these events, and \$100 to the owner of the sire of the winner of either of the three-year-old races. The Breeders Futurity is a stake in which the money is widely distributed and each prize well worth winning. The starting payments must be made on or before August 7th. See that you make payment on your colt in time.

THE FIRST RENEWAL of the Crowley Stake, which is a side stake for starters in the Pacific Breeders Futurity, will close for entries on Tuesday next, August 1st. Entries are already coming in and more than one owner of a foal of 1905 believes he will have the winner. This stake was inaugurated last year at the suggestion of Mr. T. J. Crowley, and received 27 entries at \$25 each, a total of \$675. There is only one payment to be made in this stake—the original one of \$25 on each entry. The first stake was for foals of 1905. The renewal is for foals of this year. The stake is like a side bet on the colts that are entered in it. The money paid in on the trotting colts will go to those that trot, and that paid in on pacers will go to those that pace. Every colt and filly that is now eligible to Breeders Futurity No. 5, for foals of 1905, is eligible to be entered in the Crowley Stake. Owners desiring to enter should read the conditions

of the stake printed in this issue of the BREEDER AND SPORTSMAN in the advertising columns, and send \$25 to Secretary F. W. Kelley on or before August 1st, with the description and breeding of the foal.

THE ARIZONA FAIR, to be held during the month of December, has attracted the attention of many California horsemen and several owners of fast trotters and pacers have been figuring on entering their horses in the \$1000 purses that have been offered. A fair and a race meeting in December is a novelty, but when held at Phoenix, Arizona, during that month, perfect weather and a fast track can be relied on. Note the advertisement in this issue, and write to the Secretary for further particulars. Entries do not close until November 1st, but if you enter now, records made after making the entry will not be a bar.

Successful Sale.

The sale of horses consigned to Fred H. Chaso & Co.'s auction ring by the Occidental Land and Improvement Company of Sharon, and Mr. C. E. Needham of Bellota, advertised for July 24th, was a very successful one. All the horses that were in good condition sold well. Many were not in the best salable shape and but a few were of standard breeding. The sale pavilion was crowded to its utmost capacity, the spectators encroaching on the ring, and making the work of the men handling the stock decidedly difficult. All the consignors were pleased with the result of the sale. The summary of the sales of \$100 or over follows:

CONSIGNMENT OF OCCIDENTAL L. & I. CO.

Dick, b g, 5, by Teheran 2:24, dam Stella, to James Bonney for \$120.

Stella II., b m, 3, by Ilderim, dam Stella, to V. Verhille for \$175.

Rose, b m, 6, by Ildorim-Rosie, to James Crichton for \$160.

Kate, b m, 5, by Ilderim-Kate, to James Crichton for \$140.

CONSIGNMENT OF C. E. NEEDHAM.

Caddie Whipple, b m, 12, by Steve Whipple 2:12, dam Caddie by Elect, to J. W. Henderson for \$115.

Little Bessie, ch m, 4, by Directed, dam Bessie Whipple, to F. Gomet for \$122.50.

Steve D, ch g, 3, by Directed-Daisy Whipple, to D Tassi for \$127.50.

Stub, b m, 9, by Directed, dam by Chieftain 721, to William Tooms for \$195.

Lady Curzon, b m, 3, by Guy McKinney, dam Stub by Directed, to W. F. Harris for \$177.50.

Mahdeen, br c, 2, by Guy McKinney, dam Stub, to W. Tegler for \$160.

Dock Booth, b c, 1, by Charles Derby, dam Stub, to W. Tooms for \$110.

CONSIGNMENT OF A. L. DOWLER.

Rialto, ch s by Silver Bow, dam Venturess by Arthurton, to P. Crowley for \$200.

A lot of draft stock was also offered the same evening and found ready sale at an average of \$131.50 per head.

Edith by Geo. Wilkes Is Dead.

Very few of the sons and daughters of that great sire Geo. Wilkes are living. One of the latest of his progeny to succumb to the inevitable is Edith, the dam of Idolita 2:09½, of Hummer sire of Bouncer 2:09 and many others. Edith was foaled in April, 1881, and bred by B. J. Treacy of Lexington, Kentucky. She was one of the mares selected by Senator Stanford to mate with Electioneer. Her first foal was Hummer that is now the sire of 15 trotters and 12 pacers with standard records, the fastest of which are Bouncer 2:09, Stately 2:11½, Spalpeen 2:12½ and Quickly 2:14½. Edith was not a regular breeder, but produced eight foals between 1886 and 1900 at Palo Alto Farm. Her only standard performer was Idolita 2:09½ by Mendocino. She was sold at one of the dispersal sales of Palo Alto Farm a few years ago, and was purchased by James Faris, Jr. of Sacramento, who took her to his farm near that city, where she died July 26th. She left a three months' old foal by Mr. Faris' son of Sable Wilkes. Edith was in color a rich brown mare. Her dam was Edith Carr, the dam of Campbell's Electioneer 2:17½, etc., by Clark Chief, second dam Easter Carr, by Carr's Edwin Forest, third dam by Imported Margravo.

OPENING OF GRAND CIRCUIT.

Chamber of Commerce Stake Won by Walter Direct and M. & M. by Angle.

Every beat a race was the plan of the first meeting on the Grand Circuit which opened at Detroit last Monday. After deducting ten per cent of the purse, which was to go to the winner of the most heats, the money was divided into three equal parts, and one of these parts was contested for by the horses in each heat, divided as follows into four moneys. For instance the Chamber of Commerce Stake \$5000, had \$500 deducted for the race winner. The \$4500 remaining was then divided into three equal parts, or \$1500 for each heat. Heat winners therefor got \$750, second horses \$375, third horses \$225, and horses that were fourth \$150. Walter Direct, driven by Ed Geers won every heat of the Chamber of Commerce and therefore earned \$2250, to which was added \$500 for standing heat in the final summary, making his total winnings \$2750, or \$250 more than he would have received by the old plan. Bonanza was second in every heat and won \$1125, as against \$1250 by the old style race, F. J. Park was 5-3-3 and was awarded \$450, instead of \$750 which he would have received as third horse under the former method of dividing the money, and the fourth horse in the summary, The Contractor, by standing 3-4-4 got \$525 or \$75 more than the third horse. Bonnie Wilkes by being fourth in the first heat won \$150, and although distanced in the second heat retained this money. Had the race been a split heat affair, that is had a different horse won each heat, the money would have been much more widely distributed, but the race would have ended at the close of the third heat just the same.

The Chamber of Commerce Stake was the feature event of the opening day of the twenty-second Blue Ribbon meeting of the Detroit Driving Club, which begins the Grand Circuit of 1905. Walter Direct was a heavy favorite, bringing \$50 in the pools, with the field at \$15.

Hal C. had the pole for the first heat of the Chamber of Commerce stakes, with Bonnie Wilkes and Walter Direct next in alignment. The horses scored several times before the word was given. At the first turn Walter Direct took the lead and held it into the turn and into the home stretch. Geers then made one of his famous drives and won the heat in record time 2:05 3-5. Bonanza, in the last 100 yards of the first heat, took second place from The Contractor by a fine burst of speed. In the next two heats Walter Direct was in front from the start. Col. J. C. Kirkpatrick's black pacer, Alhuta by Altivo, was a starter and was driven by Ben Walker, but after finishing sixth in the first heat caught the flag in the second. Bystander, the three-year-old Zolock colt, also started but was behind the red bunting the first time round.

The first heat of the 2:20 trot saw the field selling at \$45 to \$50 for Hardwood. Hardwood won the first heat handily, and the second saw Hardwood a favorite at \$50 to \$12 for the field. It was too simple for Hardwood. For the third heat there was no selling against Saunders' good gelding, and Saunders' being cure of first place, was satisfied to be last. Della McCarthy by McKinney was one of the starters but after being last in two heats was drawn.

The third race was split, as Geary, who sold for \$5 in pools of \$125, won the first heat hands down. The second heat saw Geary favorite, but James' gelding was not strong enough, and Miss Willmont had rather easy picking in the next two heats, finishing a length ahead. Ben F., driven by De Ryder, and Oregon Maid, piloted by Henry Helman, were sixth and seventh in the summary. Ben F. won \$45 by being fourth in one heat. The summaries:

Time—2:07½, 2:07½, 2:09.

SECOND DAY.

The Axtell mare Angle, driven by George Saunders, won the \$10,000 M. & M. state on Tuesday, the second day of the meeting, that is, she took the first and third heats and the biggest portion of the stake. She was unsteady in the second heat which went to Geer's mare Clarita W., that was favorite before the race. The time of the race was not specially fast, the heats being 2:12½, 2:10½ and 2:11. Angle earned \$4000, Clarita W. \$2250, Watson \$1800, Danube \$900, Emma Hoyt \$750 and Getaway \$300. Brilliant Girl, driven by Jack Curry, was a starter in this event but was drawn after being eighth in the first heat, and Mr. De La Montanya's other mare, Tuna, also driven by Curry, got the flag in the 2:08 trot, two heats of which were won by Tom Axworthy in 2:07½, 2:07½, and the last and final heat by Dr. Strong in 2:06.

A heavy shower fell while the first heat of the opening event in the day's card, the 2:14 pace, was being driven. The track was soaked, and it took an hour and a half's work with harrows to place it in condition for the first heat of the M. & M.

For the opening race, the 2:15 pace, Red Bud was an even-money favorite against the field, but Red Bud was no where and finished sixth, while Hazel Banks won easily. The second heat saw Hazel Banks a favorite at \$25 to \$10 for the field. Red Bud took the lead owing to Hazel's break and finished easily in

Trotting, 2:24 class, Merchants' & Manufacturers' Stake, \$10,000.

THIRD DAY.

An excellent track and fine weather was the order for the third day at Detroit, and the horses stepped fast in every event, but one heat being slower than 2:10 during the afternoon.

The 2:04 pace had but three starters, but it was a horse race with Locanda winner of the big end of the purse. This was a heavy betting race. Pools sold with Nathan Strauss \$400, King Direct \$200 and Locanda \$150. Snow took Locanda out in front, and after making the half in 1:02 had enough left to stand off Nathan Strauss in the stretch and win by half a length in 2:05. In the second mile Locanda came the last quarter in 0:29½, and again beat Nathan Strauss. Nathan Strauss set the pace in the third heat and led to the stretch, where Locanda passed him and in turn

EDWIN S. 2:03 BY DOCTOR HICKS

front. The third was a procession, Red Bud being in front all the way.

Before the Merchants and Manufacturers' Stake was called Clarita W., Geer's entry for the stake, was the favorite in the early pools, bringing \$125, with Angle at \$100, Danube \$75, Allie Jay \$25, Watson, Brilliant Girl and Boh Burdette \$20 each, and the other entries \$10.

When the word was given Allie Jay broke away in front, but soon collapsed and Angle went to the front and held it, with Brilliant Girl and Clarita W. as contenders. Angle won easily through the stretch and Clarita W. and Emma Hoyt fought it for second place. In the second heat Angle broke at the start and never had a chance to win. Clarita W. trotting down the homestretch with Watson at her shoulder. The third heat saw Clarita W. at \$50, with the field lively at \$40. Watson made the pace clear to the stretch and there Angle came fast and won out handily.

Tom Axworthy was favorite at \$150 to \$90 on the field in the 2:08 trot. He won the first heat easily, but in the second was pushed out by Dr. Strong. Dr. Strong went to the front at the quarter in the third heat and trotted home in easy style in 2:06, the fastest mile trotted this year. Summaries:

Pacing, 2:15 class, purse \$1500.	
Red Bud, b g by Redwing.....(Stokes)	6 1 1

Time—2:10½, 2:07½, 2:08½.	

was beaten out by Geers, with King Direct in a great finish.

The 2:12 trot resulted in one of the best races of the year with Sadie Mac winner of all three heats. Ed Geers' mare, Gold Dust Maid, drove her out the first heat in 2:06½, but Sadie was going easy at the finish and locked as if 2:03 would not stop her. Mack Mack was fourth in this heat, but in the next two heats which were in 2:08½ and 2:11, he was two, three, while Gold Dust Maid was distanced in the second heat. John Caldwell finished a good third in the first heat, but also got the flag in the second heat.

Bollvar got a heat and second position in the final summary of the 2:18 class pace, and his record is now 2:09½. He is Wayland W.'s first 2:10 performer. The summaries:

Last Two Days at Fresno.

Friday, the third day of the Breeders meeting at Fresno, saw an increased attendance and the racing was up to the standard, the winners of both harness races reducing their previous records.

The three-year-old pace brought together five fillies of great merit, and while Delilah by Zolock won rather easily in the first two heats, she made a break just after the word was given in the third heat and was over a distance out before getting on her stride. She paced the last three-quarters, however, in 1:36½, the last half in 1:03½ and the last quarter in 31 seconds and won the heat by two lengths. She is a great filly and gives every promise of pacing close to 2:10 this year. It will be remembered that she was the fastest two-year-old pacer in the United States last year, getting a record of 2:16½ when she won the pacing division of the Breeders Futurity at San Jose. She is by Zolock 2:05½, out of the great broodmare, Gipsev, the grandam of Zolock.

The 2:17 trot was won by the gray gelding What Is It, son of Direct 2:05½ and Lassie Jean, the dam of Who Is It 2:10½. He won in three straight heats. Cuate was the favorite in this race, but was drawn before getting the word in the first heat. After scoring the trotters for over half an hour, and being sent to the stables for being on the three-year-old pacers' time, the judges permitted Cuate to be withdrawn after two veterinary surgeons had examined him and given certificates that he was sick and un-

the four-year-old by Nutwood Wilkes owned by Mr. I. L. Borden of San Francisco, went out in front and won without being headed in 2:10½, although he was driven hard to keep Nellie R. from getting her head in front at the finish. The second heat resulted in a nose and nose finish between these two in 2:12½, and in the third heat Norda tried hard to head the Wilkes pacer but he was at the wire first in 2:16½. Miss Winn, Little Joe and Little Jib were distanced in the first heat and Norda and Econmlzer divided third and fourth moneys between them.

The 2:09 class pace saw eight out of the eleven original entries go to the post, and Zolock drew the pole. He could have taken the outside and beaten the others, and won the two heats as he pleased in 2:09½ and 2:08. He was barred in the pools and Kelly Briggs made favorite at \$10 to \$6 for the field consisting of Rita H., Jonesa Basler, Daedalion, Miss Idaho, Le Roi and Hassalo. Kelly Briggs got the pool money by coming 2-3 in the summary, Rita H. being given a ripping drive by Durfee in the second heat and finishing second to Zolock, who was shaken upsome by Delaney when he saw Rita's burst of speed, although the son of McKinney won easily in 2:08.

Will Durfee was asked to drive Oro Belmont in the last race, and that horse was made favorite in the 2:22 trot, which he won in straight heats, with Sam Bowers second and Lady Jones third. Wilmar was drawn after the first heat, owing to sickness. The summaries:

Benefit to Willard Zibbell.

On Monday at Fresno, the horsemen and the towns people tendered a benefit to Willard Zibbell, the popular young trainer who lost both hands and one foot in the recent railroad accident at that place. A good program of dash races was arranged, in which the horses were driven to the top of their speed, but no purses or prizes were contested for and no betting was done on the results. More than a thousand people attended, and \$700 was the amount realized and turned over to Mr. Zibbell. All the participants tendered their services free and everybody paid at the gate. The most remarkable thing in connection with the benefit was the fact that the beneficiary was able to be present. Although the accident occurred but ten days previous, and he had one leg, one arm and the other hand amputated, was bruised and lacerated about the body, and his remaining leg broken, yet he was able to be put into a large automobile by his physician and attendants and taken to the track where he was cheered by the crowd, and bowed his acknowledgements. Not one person in a hundred would have survived the shock and terrible injuries he received, yet his splendid physique, perfect health and fine condition enabled him to withstand it. He never even lost consciousness at the time of the accident, but mangled as he was managed to crawl out from under the car and talk to those who came to his aid, his principal thoughts being of his companion Blaine McMahan, who was killed. The wonderful grit and endurance of young Zibhell are a marvel to the physicians and everybody acquainted with his condition after the cars had run over him. He will be brought to his home in San Francisco in a few days.

When the races were called, Mr. C. A. Durfee was in the stand as starter, and the judges were George L. Warlow, M. L. Woy and E. P. Heald; the timers, J. R. Albertson, John Lane and James Irvin. All the events were single heats.

The first heat was between the pacers Miss Winn, Ring Rose, Loganette and Norda. The three first named finished noses apart in 2:12½.

Charlie T., Satin Royal, H. D. B. and Mabel C. made a nice contest. Satin Royal was far behind at the finish, while H. D. B. finished first, his head in front of Mabel C. who had her nose slightly in front of Charlie T. in 2:14½.

Oro Belmont finished a length in the lead of Wild Bell in the next contest, Dew Drop being the other starter. The time was 2:21.

Bellemont, the three-year-old filly by Zombro, and the three-year-old Ambush by Zolock worked a heat. It was very close to the stretch where Ambush broke and Bellemont was first to the wire in 2:20½.

Prince McKinney, the two-year-old in Al McDonald's string, trotted a very creditable mile in 2:29½ against F. E. Wright's Lijero that had the heat won but broke in the stretch.

Dr. W. and Bessie Barnes were the starters in the next race. Bessie Barnes made two breaks and Dr. W. finished the mile pulled up in 2:23.

The Donna, Marty McKay's mare, was driven an exhibition half in 1:02, and Petlgru trotted a quarter in 32 seconds.

Elmont, Selda and Lady R. trotted a mile and finished in the order named in 2:18½.

The mule races were the principal events of the day. The first was a match race between C. R. Cook's Maud and Dick Roberts' Bell. Cook won and was presented with a loving cup. It was about four feet in height, of tin, and contained an armful of hay. It was the only prize of the day.

There were five starters in the other mule race. "Sky" Hess won with his entry, Cook being second and Roberts third. There was lots of fun in this event.

A Shetland pony race of a quarter of a mile ended the program. Boh Kunde's two entries were in harness while Louis Bachant's "Bob" and Middleton's pony each carried a rider. The start was made on even terms, nevertheless, and to the surprise of the spectators one of the harness ponies finished ahead. It was Kunde's "Billy Koote." Bachant's pony came second and Middleton's third.

Among the horses trained in California last winter that took new records at the Windsor meeting last week were Josie by Glenelg (sister to Billy Red 2:10) who reduced her record to 2:09½ and won the 2:12 pace. Danube by Direcho, that won the 2:17 trot in straight heats and took a mark of 2:13½, and Bolivar by Wayland W. that won the 2:17 pace, getting a new record of 2:11½ in the second heat. All these horses are in the Butler string and were driven by Chas. De Ryder. The California bred mare, Zephyr 2:11 by Zombro, won the 2:11 trot in straight heats on the last day of the meeting, in the good time of 2:12½, 2:12½ and 2:12½, with Mack Mack second in each heat. Zephyr is in Ed Geer's string.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

DELILAH (3) 2:14½ BY ZOLOCK 2:05½

able to race. While the race was decided in three straight heats it was a hard contest for the gray horse and he had to trot his best every heat to beat Jupiter B. and The Commonwealth.

The automobile races proved very interesting contests although no records were smashed. The summaries:

Sunny Side Stakes, three-year-old pacers, \$800.

Delilah, b f by Zolock-Gipsev by Gen. Booth.....(Delaney)	1	1	1
Mono Wilkes, b f by Demonio.....(Chadbourne)	2	2	2
Memonio, b f by Demonio.....(Reams)	4	3	3
Devillette, b f by Diablo.....(Wright)	3	4	4
Roberta, blk f by Robert I.....(Albertson)	ds		

Time by quarters—

First heat.....:34	1:07	1:40	2:14½
Second heat.....:34½	1:06½	1:43½	2:14½
Third heat.....:34½	1:10	1:46	2:17

Hughes Hotel Stakes, 2:17 class trotters, \$800.

What Is It, gr g by Direct-Lassie Jean.....(Chadbourne)	1	1	1
Jupiter B., b g by Gen. Beverley.....(Erwin)	3	2	2
The Commonwealth, b s by Shadeland Onward (Lindsay)	2	4	ds
Zambra, b g by McKinney.....(Ward)	4	3	ds

Time by quarters—

First heat.....:34½	1:08½	1:42	2:14½
Second heat.....:34	1:07	1:42	2:14½
Third heat.....:34	1:07½	1:42	2:15

Cuate was drawn on account of sickness after scoring but before word was given in the first heat.

LAST DAY.

A large crowd that filled the grandstand and all the available standing room about it, saw three good races on the last day of the Breeders meeting at Fresno. The first race called was the 2:17 pace for a purse of \$800, in which seven horses scored for the word in the first heat. The talent had picked Nellie R. the mare owned by Joseph Long of Eureka, to win and she sold for \$10, against \$10 for the entire field. There was considerable scoring, Little Joe acting badly, but when they got the word Cresco Wilkes,

Pacing, 2:17 class, purse \$800.

Cresco Wilkes, b h by Nutwood Wilkes-Alfie Cresco	1	1	1
Nellie R., b m by Wayland W.....(Albertson)	2	2	4
Norda, b m by Mercury.....(Quinn)	3	4	2

Wilmar, b g by Wildnut.....(Quinn)	5	dr	

Time by quarters—

First heat.....:34	1:08	1:42½	2:18½
Second heat.....:31	1:09	1:44	2:16½
Third heat.....:34	1:08	1:44	2:17

John Shepard, Boston's oldest and most noted amateur reinsman, has agreed to take part in a special race at Syracuse during the State Fair with his trotter, Alto L. 2:09½, against the trotting mare Ida Highwood 2:09½, owned and driven by Nathan Straus, a noted amateur reinsman of New York. To the winner of the race will be presented a handsome silver trophy, and those who see the contest are likely to see one or both of the horses beat 2:10 to wagon.

Notes and News.

Entries close August 1st for the Crowley Stake No. 2, for foals of 1905.

The Breeders meeting will open at Santa Rosa, Wednesday, August 16th.

California has produced more 2:10 performers this year than any other State in the Union.

Little Squaw 2:04½, who is out as a trotter this season, has 101 winning heats to her credit.

Every horseman that has seen the new track at Sacramento, predicts it will be a fast one.

Five California horses started on the opening day of the Detroit meeting and none got any money. This is a record.

The fastest trotter of the year up to Thursday of this week is Dr. Strong 2:06, and Sadie Mac is only a fraction of a second behind him.

The horses of W. A. Clark, Jr., are at Readville, in charge of Trainer Ted Hayes, who is said to be quite seriously ill in a Boston hospital.

The will of the late C. F. Dunbar of Buffalo, N. Y., provides that his favorite driving horse, Volunteer Medium 2:14½, be pensioned for life.

The Grand Circuit racing will shift to Cleveland next Monday, and the following week they will be at Buffalo, where the \$10,000 2:10 trot will be decided.

W. J. Andrews has worked the trotting mare Nora McKinney by McKinney better than 2:14, with a half in 1:04½. She is sound and has a great flight of speed.

The address of Secretary E. D. Neff, of the Southern California Horse Show Association, is Pasadena, California, and not Riverside as has been erroneously stated.

Clarence Day, who has been at Concord all spring with his stallion, Dictatus 2:17, has returned to his home in Alameda. Dictatus made a good season at Concord.

Sister Colette has worked a mile in 2:12½, last half in 2:05½, last quarter in 31½ seconds. She is a sister to Charley Herr 2:07 and is in David Cahill's stable at Lexington.

The time by quarters in the race at Philadelphia, last week, when Ilvorton beat Sweet Marie, was as follows: First heat 30½, 1:02, 1:38, 2:10½. Second heat 31½, 1:03, 1:36, 2:07½.

The 2:17 trot at Fresno, won by What Is It, was the heaviest betting race the circuit has furnished thus far. Some three or four thousand dollars changed hands on the result.

Read the advertisement of the Arizona Territorial Fair and race meeting in our business columns. There are a number of \$1000 purses that should be easy money for California horses.

Mamie R. (2) 2:15½ is not doing as well as was expected when she was taken East. She was distanced in a heat in 2:13½ at Windsor, a rate of speed that would not have beaten her to the wire last year.

Mr. Billings drove Lou Dillon a mile in 2:06½ and Major Delmar a mile in 2:05½ at Cleveland a week ago last Saturday. Tom Axworthy stepped in 2:07½, Morning Star stepped in 2:06½. They were all to wagon.

The pacing race arranged some time ago between Auduhon Boy and Ecstatic will have an added starter in Belle Mac. The race is said to be for \$5000 a corner, winner takes all. The race will be paced August 18 at Readville.

Had some track owner been sufficiently enterprising to advertise a meeting at some convenient point between the close of the Fresno and the opening of the Santa Rosa meetings, he would have secured a good list of entries.

John Quinn and John Green were the first horsemen to reach Santa Rosa with their strings after the Fresno meeting, arriving there last Tuesday morning. By the last of this week the stalls will nearly all be full. The Santa Rosa track is in fine shape.

Every farmer and breeder should make an effort to visit the California State Fair this year. The display of live stock shown will be one of the best ever held, and will be exhibited to much better advantage than ever before. The fair will open September 2d.

We received a long communication from Pleasanton this week which we cannot publish as the name of the writer was not affixed. If "Railbird" will send us his name (not for publication but simply to show his good faith) we will be pleased to print the communication.

After Cuate 2:18 was withdrawn from the 2:17 trot at Fresno on account of sickness he became a very sick horse, suffering from impaction of the bowels, and on Tuesday last, the day his owner, C. A. Durfee, left Fresno he did not think the McKinney gelding would live.

Arner 2:17½ is back at Pleasanton after a prosperous and successful season at Chico. The full brother to Diahlo never looked better, and Barney Simpson may conclude to lower his record a little before the winter rains set in. A mark of 2:10 is not beyond Arner's capabilities.

Starting payments are due August 7th on the two-year-olds and three-year-olds that are to start this year in those divisions of the Pacific Breeders Futurity. See the advertisement. These stakes will be decided at the Santa Rosa meeting which opens August 16th.

The new record of 2:09½ made by the mare Josie at the Windsor meeting made her dam, Bunella by Ingraham, the dam of two 2:10 pacers, Billy Red 2:10 being a full brother to Josie. At Detroit on Thursday of this week Josie reduced her record to 2:08½ in the third heat.

A correspondent at Honolulu sends us an interesting letter but fails to sign his name. We would be pleased to publish the same, but cannot violate our rule in regard to unsigned communications. Will the writer please send us his name, not for publication, however, unless he so desires.

It is told in and about Pleasanton that the finest foal by Searchlight 2:03½ is the one following Captain Ford Thomas' McKinney mare. The mare herself is one of the handsomest animals in the State, and her colt by Searchlight is endowed with all the good looks of both its parents. This mare was bred to Strathway this year and is in foal.

Marty McKay's dun mare The Donna by Athadon worked a great mile at the Fresno track one morning during the meeting last week. She turned the track in 2:08, several watches catching the mile in 2:07½. The Donna paced this mile very handily and the opinion is general among horsemen that she will do to start in almost any class next year.

It was not Millard Sanders who drove Angle to victory in the M. & M. at Detroit but the well known Cleveland trainer, George Saunders, who purchased the mare for Mr. C. Morris of Cleveland and trained her for this big event. Angle is a mare of wonderful speed and worked a mile in 2:06½ last year behind a wind shield, but is somewhat flighty.

The three-year-old colt Bystander by Zolock was distanced in the first heat of the Chamber of Commerce Stake at Detroit, and met the same fate in the Consolation end of the stake. It is asking a little too much of a good three-year-old to expect him to win money in a stake that attracts such a class of aged horses as is always entered in the C. of C.

Cresco Wilkes, the very handsome colt by Nutwood Wilkes that won the 2:17 pace on the last day of the Fresno meeting, reducing his record to 2:10½, is owned by Director I. L. Borden of the P. C. T. H. B. A. and is out of his mare Allie Cresco 2:13½ by Cresco, son of Strathmore. Cresco Wilkes is a four-year-old. He took a record of 2:17 at the State Fair last year in the Occident Stanford pace.

The fifteen-year-old stallion Holly Woodnut 2:20½, owned by E. B. Long of the Harlem Valley Stock Farm, White Plains, N. Y., dropped dead from heart disease in a pasture on the farm one day last week. He was sired by Woodnut 2:16½, son of Nutwood 2:18½; dam Charm (dam of eight standard performers) by Santa Claus 2:17½, son of Strathmore. Holly Woodnut was the sire of one trotter, Ned H. Woodnut 2:18½.

Mr. A. B. Rodman, of Woodland, has purchased all the horses in training owned by the late R. H. Nason, who died recently at that place. The horses purchased are Tubelina, a four-year-old daughter of Tuherose; a two-year-old stallion by Diablo out of Mischief, the dam of Tuberoze; a two-year-old filly by Falrose, out of a mare by Tuherose, and Mischief 2:22½, dam of Tuberoze 2:25½, and other promising ones.

W. P. Murray's trotting mare Italia 2:23½ by Zombro, is working good. She is in Doc Tanner's stable and has been a mile in 2:16½. She acts better than she ever has and is about ready for a mile around 2:10. Those who have noticed her in her work are unanimous in the opinion that she is better now than at any time since Mr. Murray brought her from California. She will probably go into Vance Nuckols' stable to be raced later in the season.

Frank Turner stepped his young Sidney Dillons again at Santa Rosa last week and here are the results. Carlocita, three-year-old pacer, mile in 2:20½, half in 1:05½, quarter in 31½. Guy Dillon, three-year-old trotter, mile in 2:34, half in 1:15, quarter in 33. Carrie Dillon, two-year-old pacer, mile in 2:26, last quarter in 34 seconds. Kate Dillon, two-year-old pacer half in 1:08. Henry Parry beat 2:30 with his two-year-old Bravo Dillon, with the last half in 1:11 and the last quarter in 35 seconds.

The Hulda Stables on Fell street, opposite the Park pan handle, is now under the management of John Martin, who is making it the most popular boarding stable in the city. The location cannot be surpassed for those who indulge in park driving, as no car tracks have to be crossed to reach the park and ocean drives. Among the fast roadsters stabled there now are Eros-mont by Eros that has shown a mile in 2:15½, Mulcahy by Dexter Prince with a trial of 2:12½, John D., a green trotter, that has beaten 2:25 in his work and Billy G with a mark of 2:19½. The famous saddle horse Kentucky Prince, one of the best gaited horses on the Coast, is also stabled there. Mr. Martin takes a pride in keeping all the horses under his care in perfect order.

The Sonoma County Driving Club was permanently organized at Santa Rosa last week with 80 charter members. The officers are P. H. Quinn, president; W. H. Lumsden, vice-president; H. A. Carlton, secretary; L. W. Burris, treasurer. Board of Directors—P. H. Quinn, W. H. Lumsden, H. A. Carlton, L. W. Burris, T. L. Hehir, Frank S. Turner, Dr. J. T. O'Brien, G. W. Kingsbury, W. C. Nolan, Frank Burris, C. O. Dunbar. This club will hold matinee and regular race meetings and an active membership of 200 is predicted for it within a month.

Henry Delaney having decided not to enter Zolock 2:05½ in the free-for-all pace at the California State Fair meeting this year, that race should result in one of the greatest contests seen on this Coast for years. While Zolock outclasses the other pacers on the Coast, there are four or five that can beat 2:07 that will enter, and that are so evenly matched that the winner will be very hard to pick. The State Fair Directors are negotiating with Mr. Delaney for an exhibition mile by his great horse, and there will be a big crowd to see him start against time.

It is surmised that after the close of the Japanese-Russian war there may be quite a demand for American-bred general purpose horses in those two countries. The demand in Japan is likely to be for horses not above the medium in size, except, perhaps, such as the Japanese may want for breeding purposes. They are an enterprising, progressive class of people there, and close imitators of American methods, so that it is not improbable that they may engage quite extensively in the breeding of high-class trotting stock as well as that for cavalry and general purpose use.

The ranks of the sons of George Wilkes 2:22, are gradually depleting. The latest to join the great majority is Erie Wilkes, really one of the least successful of the get of his noted sire as a progenitor of speed. He is credited with only four standard performers, the fastest being Polar Wilkes, p, 2:11½, and Turco, p, 2:12. But two of his sons have sired speed, and two of his daughters have each produced one. It was not exactly lack of opportunity, either, which accounts for his poor showing, he was a member of the Jewett farm stallions for a number of years. He was 23 years old. George Wilkes was 25 years old when he got Erie Wilkes. Old age did not avail much in this case.

We regret to learn that Mr. T. J. Weeks, one of the pioneer residents and horse breeders of Santa Cruz, died a few weeks ago at his home there on the shores of the Pacific. Mr. Weeks bred and owned a number of good horses, among others that fast mare Ethel Downs 2:10, well known to all horsemen in this State. He was one of the earliest residents of the now thriving city of Santa Cruz, and owned a very handsome residence which occupied a commanding site on a hill close to the seashore and overlooking the city. He was a plain, unassuming gentleman, whose friends were as numerous as his acquaintances, and was highly respected and honored for his sterling virtues and upright life.

An eastern exchange says: "Mr. Geo. E. Lattimer, of Buffalo, owns a full brother to the Abbott 2:03½, ex-champion trotter. The name of the young trotter is The Mitre Beaver. Mr. Lattimer owns one of the most extensive private stables in Buffalo, and is classed among the crack amateur reinsmen of the country. He owns Charley Hayt 2:06½, Topsy 2:09½ and others. At the Buffalo track, one morning last week, Charley Hayt 2:06½ and Captain Derby 2:16½ worked a mile together in 2:14½, last half in 1:04½, covering the third quarter in 31 seconds. Charley Hayt gives every promise of getting into form to beat his record this year, and Captain Derby, unless all signs fail, will take a record around 2:07 if all goes well with him. He was bred at Oakwood Park Stock Farm and is by Charles Derby, out of Economy 2:30 by Echo."

The former Buffalo trainer, George Bodimer, who has been in Austria for several years, has opened the racing season there most successfully this year. He has captured the world's record for Austrian bred trotters with the filly Ama Z, and with the four-year-old colt Lord Revelstoke by Bingen, that he bought in this country last fall he won the great event of the Vienna spring meeting, the free-for-all heat race, reducing the chestnut colt's record from 2:12½ to 2:12½ in the first heat of his race and again to 2:12½ in the last heat. Lots of good judges thought Lord Revelstoke would never lower his record after his somewhat unsatisfactory campaign of last season. Ama Z, Bodimer's champion Austrian bred trotter, is from American bred parents, as she was sired by Cald 2:07½, dam Charmer, dam of Shadow Chimes 2:17½ by Mambelon King. Both her sire and dam are owned by Count Poticki, Bodimer's employer, and to the Buffalo boy belongs the credit of developing her.

The affection displayed for his owner by Willard Zihbell's horse, Adam G. 2:14½, was truly touching when the handsome trotter was led out for the maimed and crippled young man to look at on the day of the benefit tendered Mr. Zihbell at the Fresno track. As our readers know Willard lost both hands, an arm and a leg in the frightful accident at Fresno, July 12th, and his marvelous vitality enabled him to be taken to the track eleven days after, when the horsemen tendered him a benefit. He was conveyed to the track in Dr. Maupins' automobile, and his favorite horse was led out for his inspection. The young man spoke to him, when Adam G. immediately pricked up his ears, walked up to the vehicle and pressed his soft muzzle against his owner's cheek. It was an affecting scene, and the brave young man who never quailed at all the horrible mangle he had received, was visibly affected because he could not return the caress of his trotter with the pat of the hand that the horse evidently expected.

JOTTINGS.

THE RECORDS MADE on the California circuit thus far, have attracted the attention of horsemen all over the country, and one Eastern turf writer remarks that "the California owners who have been winning at Los Angeles and Fresno probably now wish they had entered on the Grand Circuit." This is a recognition of a fact which cannot be disputed, that many of the race winners on the Coast this season have shown sufficient calibre to warrant the belief that they could win in their classes anywhere. No pacer in the country has shown four such miles to this date as the 2:06 and 2:06½ at Los Angeles and two heats in 2:05½ at Fresno which were paced by Zolock. That this son of McKinney could get his share of the money in the big ring over East is not for one moment doubted by those who have seen him race this year, and a record of 2:02 or better is certainly within his reach. No stronger finisher ever raced to the wire, and he can go as many heats to his limit as the next horse.

While there is nothing but praise to be said of Zolock, the horse that drove him out in 2:05½ the first heat at Fresno is also worthy of a few lines of commendation. This horse was the chestnut gelding Edwin S. 2:08, owned by Mr. E. A. Servis of Durham, Butte county. In that memorable heat Edwin S. did not get off well and was interfered with at the first turn, which necessitated his being taken back and around the other horses. He had to take the overland route the first quarter of a mile, but by the time the half was reached he was straightened away and from the head of the stretch the struggle between him and Zolock will long be remembered by those who saw it. It was such an exciting finish that the crowd in the grand stand rose and cheered the contestants, and Edwin was only beaten a head in one of the closest and best contests ever seen. His mile was doubtless as good or better than 2:05, and many are of the opinion it was as good as 2:04½. It is a great pity the fastest class made for pacers at the Santa Rosa meeting was the 2:09 class, as that barred the entry of Edwin S., and he was the one that could doubtless have made Zolock lower his Fresno record to win.

In this connection it will be in order at this time to correct a slight mistake in the previous published accounts of the breeding of Edwin S. He is by the registered stallion Doctor Hicks 23103, son of Durfee 11256 and Gazelle by Buccaneer. His dam has heretofore been erroneously given us by La Harpe 2:17½, son of Egmont. She was by a horse called La Harpe, it is true, but the son of Egmont is not the one. La Harpe, sire of the dam of Edwin S., was bred by the late Dr. Hicks, and was a bronze bay horse, with two white stockings behind, and star, weighed close to 1200 pounds and stood 10 hands. He was foaled in 1879, and sired by Fame, a son of Belmont 64, the sire of Nutwood. La Harpe's dam was Prairie Bird 2:28½, the dam of Prompter, and was by Flaxtail.

If California had a circuit of eight or ten weeks harness racing every summer it would not be a year until 2:05 would be equalled or beaten every year in the pacing events, and three or four new 2:10 trotting records would be made annually. This would be of vast value to the breeding industry and add many dollars to the wealth of the State. Harness racing is the sport of the masses of horse owners and breeders. In spite of the fact that the speculative portion of the community prefers the runners, harness racing is as popular as ever. Meetings are well attended wherever they are given and if properly managed do not show a loss. In the Eastern and Middle states thousands of harness meetings are held annually. Last week's *Western Horseman*, published in Indianapolis, calls attention to the fact that the issue contains the advertisements of over one hundred and thirty harness race meetings. The popularity of the Grand Circuit is increasing every year, and a big profitable price can be obtained for a good trotter or pacer with race winning speed or first class road qualities. People who are always saying that harness racing is getting unpopular don't know what they are talking about. It is just as popular a sport and more so than it ever was. The lack of meetings is no evidence of its unpopularity, but only evidence that the owners of tracks are not enterprising.

The opening of the Grand Circuit at Detroit has been very successful, and some good racing has been done under the every-heat-a-race plan. Up to and including Thursday's races thirty-six heats had been trotted or paced in the twelve races decided, and not one heat was as slow as 2:15. No less than 26 of these heats were in 2:10 or better, the fastest pacing heat

being Locanda's 2:05 and the fastest trotting heat Dr. Strong's 2:06. The California horses have not been taking as many first moneys as usual, which is not surprising to horsemen here on the coast as the class of horses starting at the early meetings this year is not quite up to our usual consignment to the Grand Circuit opening. Later in the year we expect quite a number of new fast performers from California will be drawing down the big end of many Grand Circuit purses.

Windsor Results.

Here's a Chance for Rockaway.

Mr. R. A. Rouse of Danville, Illinois, and his trainer Geo. J. Foster, at the Indianapolis track, have authorized the statement that they desire to match the two-year-old chestnut pacing filly by John R. Gentry 2:00½, dam Onoqua 2:08½ by Keeler, against any pacing two-year-old in the world, either sex, mile heats, best two in three, for \$2500 a side, \$1000 a side to go up when match is made, \$1000 in thirty days thereafter, and \$500 the evening before the race, "play or pay," from start to finish, the race to take place over the Columbus or Cincinnati track, at the Grand Circuit meeting, or at Lexington or Memphis, during the fall trots, the accepting party to have the naming of which of these tracks. This announcement was made in the last issue of the *Western Horseman*. Here is a chance for the California pacer Rockaway that took a record of 2:15½ at Los Angeles recently to get a match, and if it were made considerable California money would be put up that he would win.

Racing at Hilo.

The Fourth of July was celebrated at Hilo, Hawaii, by a good program of racing, and although it rained and the track was very muddy the crowd was large and well pleased with the day's sport.

The main event on the program, which was a race at a mile and a quarter between The Fretter, Bruner and Merrills Force, had to be declared off on account of an accident to The Fretter, whose leg was injured so that he was very lame. The only harness event was won by the old pacer John D. that was racing ten or twelve years ago at San Jose under the name of Tony. The summary of the races is as follows:

One mile—Egyptian Princess won, G. H. R. second, Merrills Force third. Time, 1:54.

Six furlongs—Antidote won, If Not second, Why Not third. Time, 1:35.

Four and a half furlongs—Keanakolu won, Nigger second, Sweet Pea third. Time, :59½.

Four furlongs—G. H. R. won, Antidote second, If Not third. Time, :55½.

One mile—Egyptian Princess won, Bruner second, Dixie Land third. Time, 1:53.

Five and a half furlongs—Bruner won, Egyptian Princess second, So So third. Time, 1:22½.

Pacing, best two in three—John D. (formerly Tony) won first and third heats. Second heat was a dead heat between John D. and Ned McGowan. Nazon was distanced in first heat. Time—2:47, 2:58, 2:56.

Racing at Wailuku, Maui.

A very successful Fourth of July meeting was held at Wailuku which is on Maui, one of the Hawaiian Islands. The results were:

Half-mile dash—Racery, won; Geraldine S., second.

Trotting and pacing, free-for-all—Cyclone, won.

Mile dash—Racine Murphy, won; Notice, second.

Trotting and pacing, 2:15 class—Denny Healey, won.

Trotting and pacing, three-minute class—Silvertop, won.

Gentlemen's driving race—Abdine, won; McKinley, second.

Six furlongs dash—Racery, won; Racine Murphy second; Notice, third.

There will be another meeting at Wailuku on August 12.

George S. McKenzie, owner of Nullah, Oriana and others, is there on a visit and may buy Bruner and bring him to the Coast. The horse was shipped there with a consignment of hack horses and has won races at all kinds of distances.

Third Contest for the Cleveland Cup.

The Directors of the League of Amateur Driving Clubs have awarded to the Gentlemen's Driving Club of Cleveland the days of August 31st and September 1st on which to hold their Inter-City Matinee. At this time the third contest for the \$5000 Cleveland Gold Cup (Amateur Drivers' Challenge Trophy), will be held. The Cleveland Club has won this cup twice and should they win it again this year it will pass into their possession permanently. Any amateur club of recognized standing (not of necessity a member of the League) may challenge for this cup, and as many horses belonging to one club as is desired are eligible to start, though no owner may start more than one horse. Horses to be eligible to start for this cup must have started in at least two regular matinees during the year, and must not have participated in public racing for money for thirty days prior to the holding of this race. Entries for this cup race will close Monday, August 31st. The Cleveland Club will also offer a cup for free-to-all pacers, entries for which will close on the same day. There are no conditions governing entries for this cup except that it is open only for horses owned by members of those clubs in membership with the League of Amateur Driving Clubs.

That wonderful little mare, The Broncho, paced two great heats over the Chicago half-mile track, July 15. There was but one other starter in the free-for-all pace, the mare Citation. Owing to Citation being hitched too close to the suiky, which made her hit her hocks, she could not show any speed, so The Broncho won the first heat in a jog in 2:20½. Citation was hooked up all right in the next heat and The Broncho had to break the Illinois record to win. She paced the heat in 2:06½ and made the mile in the third heat in the same time. No other horse ever paced so fast over an Illinois half-mile track in a race, and Hetty G. is the only mare that has beaten the time on a track of that description.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

Coming Events.

Rod.

April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.
April 1-Sept. 15—Closed season for lobsters and crawfish.
April 1-Nov. 1—Trout season open.
June 1-Jan. 1—Open season for black bass.
July 29—Saturday Fly-Casting Contest No. 9. Stow lake, 2:30 p. m.
July 30—Sunday Fly Casting Contest No. 9. Stow lake, 10 a. m.
Sept. 10-Oct. 16—Close season in tidewater for steelhead.
Sept. 10-Oct. 16—Close season for catching salmon.
Oct. 16-Nov. 15—Close season for taking salmon above tide water.
Nov. 1-Sept. 1—Open season for crabs.
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

Feb. 15-Sept. 1—Closed season for mountain quail, grouse and sage hen.
Feb. 15-Oct. 15—Closed season for quail, ducks, etc.
April 1-Oct. 15—Close season for English snipe.
July 1-Feb. 15—Dove season open.
July 30—Santa Rosa Gun Club. Blue rock open-to-all tournament.
July 30—Millwood Gun Club. Blue rocks. Mill Valley Junction.
Aug. 1-Oct. 15—Deer season open.
Aug. —Sebastopol Gun Club. Blue rocks. Every Sunday.
Aug. 6—Golden Gate Gun Club. Blue rocks. Ingleside.
Aug. 6—Blue Rock Gun Club. High-street grounds, Alameda.
Aug. 6, 20—Petaluma Gun Club. Blue rocks. Kenilworth Park.
Aug. 6, 20—Mount View Gun Club. Blue rocks. Mount View, Cal.
Aug. 13—California Wing Club. Live pigeons. Ingleside.
Aug. 13, 27—Fish and Game Gun Club. Blue rocks. San Jose.
Aug. 13, 27—Santa Rosa Gun Club. Blue rocks.
Aug. 13, 27—Vallejo Gun Club. Blue rocks. Floden Station.
Aug. 20—Union Gun Club. Blue rocks. Ingleside.
Aug. 29, 30—Interstate Association tournament. Blue rocks Denver, Col.
Sept. 9, 10—Empire Gun Club. Merchandise shoot. Blue rocks Alameda Junction.
Sept. 12, 13, 14—Interstate shoot. Blue rocks. Ingleside. Elmer E. Shaner, Manager. Pacific Coast Handicap under auspices of S. F. Trapsooting Ass'n., A. M. Shields, Secretary.
Sept. 30-Oct. 1—Two-day blue rock tournament. Biggs, Butte county. H. Haselbusch, manager.
Sept. 30-Oct. 1—Biggs Gun Club. Two-day blue rock tournament. Biggs, Cal.

Bench Shows.

Aug. 15, 18—Orange County Agricultural Society. Middletown, N. Y. D. A. Morrison, Secretary.
Aug. 23, 25—Rockland County Industrial Association. Bench show in New York City. A. A. Vanderbilt, Secretary.
Aug. 31-Sept. 2—Newport Dog Show. Newport, R. I. Francis M. Ware, Secretary.
Sept. 8—San Mateo Kennel Club. 2nd annual show. One day.
Sept. —Santa Cruz Kennel Club. Inaugural show. Santa Cruz, Cal.
Oct. —Stockton Kennel Club. F. A. Gelsea, Secretary, Stockton, Cal.
Sept. 16—Englewood Kennel Club. Englewood, N. J. M. W. Robinson, Secretary.
Sept. 27, 28—Valley Fair Kennel Club. Brattleboro, Vt. Howard C. Rice, Secretary.
Oct. 3, 6—Danbury Agricultural Society, Danbury, Conn. G. M. Rundle, Secretary. Jas. Mortimer, Superintendent.
Nov. 15, 18—Boston Terrier Club Specialty Club. Boston. F. H. Osgood, Secretary.
Nov. 28-Dec. 1—Philadelphia Dog Show Association. Philadelphia. J. Sergeant Price, Secretary.

1906.

Feb. 12, 15—Westminster Kennel Club. New York. Robt. V. McKim, Secretary.
Feb. 20, 23—New England Kennel Club. Boston. Wm. B. Emery, Secretary.
March 7, 10—Duquesne Kennel Club. Pittsburg, Pa. F. S. Steadman, Secretary.

Field Trials.

Aug. 15—Iowa Field Trial Club. Geo. C. Cooper, Secretary, P. O. Box 55, Des Moines, Ia.
Aug. 23—North Dakota Field Trial Club. Inaugural trials Grand Forks, N. D. A. E. Palmer, Secretary, Grand Forks, N. D.
Sept. 4—Nebraska Field Trial Association. 4th annual trials. O'Neill, Neb. H. H. McCarthy, Secretary, O'Neill, Neb.
Sept. 6—Manitoba Field Trial Club. 19th annual trials. La Salle, Man. Eric Hamber, Secretary, Winnipeg, Man.
Sept. 21—British Columbia Field Trial Club. 3d annual trials. Ladner, B. C. H. S. Rolston, Secretary, Vancouver, B. C.
Oct. 12—Pacific Northwest Field Trial Club. La Conner Flats, Wash. Chas. L. Lundy, Secretary, Seattle, Wash.
Oct. 23—Ohio Field Trial Association. Washington Court House, O. C. T. Phillips, Secretary, Columbus, O.
Oct. 30—American Field Futurity Stake. For Pointers and Setters whelped on or after January 1, 1904, whose dams have been duly qualified. Robinson, Ill., entries closed July 1. Address Am. Field Publishing Co., Chicago.
Oct. 31—Connecticut Field Trial Club. Hampton, Conn. F. M. Chapin, Secretary, Pine Meadow, Conn.
Nov. 6—Independent Field Trial Association. Hutsonville, Ill. S. H. Socwell, Secretary, Indianapolis, Ind.
Nov. 13—Illinois Field Trial Association. Robinson, Ill. Wm. R. Green, Secretary, Marshall, Ill.
Nov. —Indiana Field Trial Club. (Week following Illinois Champion Stake). C. F. Young, Secretary, Clay City, Ind.
Nov. 21—International Field Trial Club. Rutven, Ont. W. B. Wells, Honorary Secretary, Chatham, Ont.
Dec. 2—Continental Field Trial Club. 11th annual trials. John White, Secretary, Hempstead, Long Island.
Dec. —Pointer Club of America (following the Continental trials). Barber, N. C. C. F. Lewis, Secretary, 126 Maiden Lane, New York.
Dec. 12—Eastern Field Trial Club. Waynesboro, Ga. S. C. Bradley, Secretary, Fairfield, Conn.

1906.

Jan —Pacific Coast Field Trials Club, 23d annual trials. Bakersfield, Cal. Albert Betz, Secretary, 201 Parrott Bldg., San Francisco.

The board of supervisors of San Benito county have passed Ordinance 87, repealing all game laws heretofore enacted in the county. This brings the county under the operation of the State law. The open season on deer in this district was, previous to the passing of the repealing law, from August 1 to October 1.

Pertinent Facts About Salmon.

[By J. P. Babcock.]

The sockeye salmon which are captured in Puget Sound are enroute from the Pacific ocean to the headwaters of the Fraser river, and do not enter any stream in the state of Washington which is tributary to Puget Sound, save those which enter the Skagit river, and those which enter that river appear to run earlier and independently of those that run to the Fraser river.

The sockeye which attempt to run through Puget Sound were propagated in the Fraser river, and are seeking to return for the purpose of propagation. They do not breed or feed in Puget Sound.

The run of sockeye of a given year in Puget Sound depends primarily upon the number which spawn in the Fraser river the preceding year. For the past three years the catch shows a steady and alarming decrease. This year's catch was the smallest in the history of the industry. The decrease is due to a failure of the fish to run as abundantly as formerly, and not to any fault or method or lack of effort to capture them.

The demand and the price paid for the fish during the past two years has been greater than ever before.

Every channel of Puget Sound through which the sockeye seek entrance to the Fraser river is lined with stationary traps. Every known contrivance by which salmon can be taken is permitted and used in Puget Sound. There are no limitations as to time or method in their taking. There are no closed seasons during any part of the time the sockeye run. No law has ever been passed by the state of Washington for the protection of the sockeye in Puget Sound. A greater proportion of the total number of sockeye which seek entrance to the Fraser river through Puget Sound are captured now than formerly. Those that do escape pass into British waters, and cannot enter the Fraser river without doing so.

In British waters they cannot be fished for previous to July 1. The law prohibits their being caught there between 6 a. m. of every Saturday and 6 p. m. of the following day, and during the past year they could not be fished for from August 25 to September 15. Traps have never been used in British waters tributary to Puget Sound for the capture of sockeye; only gill nets are permitted to be used. No traps, with the exception of those in Boundary Bay, have been permitted in British waters until this year, when two traps were placed on the south coast of Vancouver Island in the Straits of Juan de Fuca, and these traps could not and did not catch any fish which escaped capture in Puget Sound.

My inspection of the entire spawning grounds of the Fraser watershed in each of the last four seasons has been thorough and complete. In 1901, the year of the big run, great numbers of sockeye spawned in every section, with the exception of Quesnel Lake district, from which a large number were excluded by a dam, at the outlet of the lake, which was then provided with an effective fishway. In each of the last three years fully 75 per cent of the same spawning beds were almost barren of adult sockeye, and the remaining sections were not abundantly covered with them, and their numbers have been noticeably less each year. There has not been sufficient ova deposited in the Fraser river during the past three years to produce a number equal to the runs of those years.

There were two hatcheries located on the Fraser river prior to 1901 that had an egg capacity of twenty millions, and they were filled with eggs that year. In 1902, through a failure of the fish to reach the spawning grounds, the total collection of eggs for these two hatcheries was less than fourteen million.

In 1903 an additional hatchery of forty million egg capacity was constructed on the Fraser river, and yet the total number of eggs obtained at all three hatcheries that year was less than fourteen million.

This past year, although a new hatchery was established and operated, the total collection of eggs was 25 per cent less than last year.

There are hatcheries on the Fraser river that have a capacity of ninety millions of eggs. The failure to fill them was due to a scarcity of fish on the spawning beds, and not to any lack of intelligent effort to obtain eggs.

My field investigations on the Fraser river have satisfied me that an abundance of young sockeye, the product of the spawning of 1901, passed down the river to the sea in 1902 and 1903, and that the past season the same fyke nets which I placed in the river to trace this movement failed to catch enough young salmon to feed a bluejay, which I take to indicate that there was little or no seaward migration this year. The fyke nets which I had used in the Wannack river, at the head of Rivers Inlet, this year were set in the same manner as those in the Fraser river, and caught hundreds of young sockeye day after day for the three months they were used.

The decrease in the catch of sockeye in Puget Sound and the empty spawning grounds is attributable to excessive fishing in the past and at present. The decrease cannot be explained in any other reasonable way. The continuance of the present methods and seasons in Puget Sound and British Columbia will result in the extermination of the sockeye in the Fraser

river. It is not at all probable that the number of fish would have become so depleted if the State of Washington had given them the same measure of protection as that was afforded them in British waters. Many of the leading cannery companies on both sides of the line would not now be in the hands of receivers if the salmon had been better protected. All the canneries will be closed and the fishermen driven from these waters in the near future if the present excesses are continued. Such measures of protection as would have permitted an abundant number of sockeye to reach the spawning grounds of the Fraser before their numbers had become so depleted, will not be adequate now.

A sufficient number of sockeye reached the spawning grounds in 1901, notwithstanding the existing regulations in British Columbia, and without any regulation in Washington, because the fish ran in such vast numbers that the canneries could not handle all the fish that the traps and the fishermen caught in a few hours each day. Consequently, the channels of the Sound and the river were not blocked all the time. The canneries exhausted their supply of cans before the run was over, which put a stop to fishing, and permitted all the salmon that came afterwards to ascend the river. The reverse of these conditions have obtained for the last three years, which proves that regulations that are adequate for the year of the "big run" will be inadequate in the three following years of poor runs.

It is a matter of history that excessive fishing and inadequate regulations reduce the run of salmon in the Sacramento river. The canners and fishermen of the Sacramento by their protests and influence prevented the passage of adequate protective laws as long as they could make a living by catching the salmon in that river. The salmon were finally so nearly exterminated in the Sacramento river that the canneries were closed and a majority of the fishermen were driven from the river; and from excessive fishing the hatcheries were unable to obtain sufficient eggs and were closed for four years. An efficient protective law was passed in 1894 which closed the river to fishing during the height of the run, and hatching operations were resumed. The hatcheries produced fully 80 per cent more fry from the eggs obtained than would have resulted from natural methods of propagation. The run of salmon since the passage of wise laws and the resumption of hatchery operations, has gradually increased, slowly at first, but steadily, year after year, and is now as great as it ever was. Hatchery after hatchery has been established since 1894 and this year they were unable to handle all the eggs obtainable.

Mr. Alexander T. Vogelsang, a prominent attorney of San Francisco, who was for six years the president of the Board of Fish Commissioners of the State of California, wrote me on the 23d of last November concerning the situation on the Sacramento river as follows:

"I have read in the *Pacific Fisherman* for November the statement of the hatchery affairs under your jurisdiction on the Fraser river, and am sorry to learn that the results at the spawn-collecting stations are so meagre. I notice, too, that the take of eggs on the Columbia river is also very small. Of course, you can't obtain eggs if the fish are not permitted to ascend the river. Things are very different in California. Davis and Lambson think that never in the history of the white occupation of the State has the run of salmon been so large as this year. It has increased regularly every year for the past ten. I have just seen a letter from Lambson to the board in which he states he is forced to close the Mill Creek station on account of lack of room to hold eggs. He has taken thirty million there, and says he could have taken sixty million if he had ample accommodations.

The take of eggs at Battle Creek hatchery has passed the thirty million mark, and they will reach, if they do not pass, your own mark of forty-eight million, at that station. Although the capacity of the Sisson hatchery has been greatly enlarged, Mr. Shelby fears he cannot handle all the eggs obtainable. Baird hatchery has taken over eleven millions and was closed for lack of room. Contrast these conditions with the years when the latter was the only hatchery on the river and was closed for four years for lack of eggs. Undoubtedly this is the result of our efforts. Salmon are being shipped to the markets today from Clarksburg, and they are spawning on every riffle from Chico north. No one has ever seen them so large or so numerous as now. Breeding from large males only has wrought the former condition as we expected. The Oregon, Washington and British Columbia people should 'get next to themselves' and their fish, or else there will be a period of ten years or more of inactivity in their salmon business, as there was in ours."

These facts are worthy the careful consideration of every one interested in the salmon industry. What was accomplished on the Sacramento river can be duplicated on the Fraser by the adoption of the same means there adopted, to-wit, adequate protection of the fish on the fishing and spawning grounds, and honest and intelligent operation of the hatcheries. And it cannot be accomplished in any other way, and the sooner the fishery interests appreciate this the sooner they will cease operating at a loss, and place the industry on a profitable and lasting basis.

The Sacramento Board of Supervisors have instructed Game Warden Neale to have the fish in the Schultze pond, near the City Cemetery, seined out and placed in the river. The pond is full of black bass that are dying by thousands. It will cost more to bury the dead fish than it will to have them removed and placed in the Sacramento river. These bass, and plentiful and large they are, were left in the pond when the water lowered and could not get back to the stream.

Strikel—if they don't give you Jackson's Napa Soda when you ask for it.

AT THE TRAPS.

The Millwood Gun Club monthly shoot is the program tomorrow for local shotgun devotees.

A big shoot is on for Santa Rosa tomorrow. Several local sportsmen will attend. The Napa, Woodland, St. Helena, Sebastopol, Petaluma and Vallejo representation will be a large one. Among the features of the day will be an exhibition of rifle marksmanship by Frank L. Carter one of the most skillful rifle experts in the country.

The Lincoln Gun Club live bird shoot and picnic at Reclamation on August 24th will be well worth while attending. The main pigeon events will be a 12 bird shoot, entrance \$1.75, the price of the birds; side pool optional, and a team shoot, 12 birds per man, entrance \$1.75. Side pool.

The shoot will be under the supervision of Edgar L. Forster and this is a guarantee that the function will be a success in every way. Among other things there will be a good lunch spread, enough for all and free of expense to those present. The 8 or 9:30 a. m. boat via Cal. Northwestern Railway is the route. Teams will meet the shooters at Reclamation station.

An open to all blue rock tournament is scheduled for August 13th at the Hunter's Inn, San Leandro.

The majority of shooters will take the 9:40 Oakland boat, thence by electric cars to San Leandro where Mine Host Ravekes will meet the sportsmen and convey them to and from the grounds, free of charge. A good shooting program has been arranged.

A "clam bake," "barbecue" and "bull's head" breakfast is the appetizing combination which will be provided for the inner man and will be served free of charge to the visiting shooters and their friends. The Hunter's Inn is famous for its good cheer and hospitality and will on this occasion be well attended by a large contingent of sportsmen.

The inter-club shoot at Flosden Station, on the Vallejo Gun Club grounds, was attended by a large turnout of shooters, at least 75 guns taking part in the various events. San Francisco's representation was strong: being about 50% of the shooters participating.

The main event, a five man team shoot, brought ten teams on the firing line—Golden Gate, Vallejo, two teams each; Union, three teams; Empire, Santa Rosa and Napa Gun Clubs, one team each. The race was unfortunately delayed until rather late in the day, the electric car service being to blame for the delay. The result of the shoot was a tie between Golden Gate No. 1 and the Santa Rosa team—each squad scoring a total of 113, losing but 12 targets, a very clever showing. The Santa Rosa club shooters tied as strong a squad as could be sent to the traps in this city. It looked at one time as if the double G men would win.

Every man in the squad broke his last bird but Golcher, who dusted his 25th target, "Wilson" closed with a break. It was clearly a case of shooter's luck, the dusted target getting through the pattern. The Santa Rosa team shot remarkably well, Hesse, Guitman and Monroe are a hard trio to beat. Frank L. Carter shot in good form losing but one bird, the ninth. "Tom" Lewis is coming to the front rapidly, his string of 20 targets being well centered. The tie shoot off will probably take place some time in September.

Vallejo team No. 1 is a strong shooting squad and were but four birds behind the winning teams. The winners in the side pool, high guns, one money for each three entries were: "Wilson," Ed Schultz, W. Chappell, C. Drake, F. W. Hesse, Jr., and E. Klevesahl. The winners in a 25 target race were: George Sylvester, Len Hawxburst and C. T. Mitchell.

Too much cannot be said in praise of the Vallejo Gun Club members who strove in many ways to entertain and look after the many visitors, and their ladies, from San Francisco, Napa, Santa Rosa, St. Helena, Woodland and other points. The scores in the team event follow:

Five-man team trophy race, 25 targets per man; \$1 entrance per man, side pool optional; \$1 entrance, high guns; one money for each three entries; 16 yards:

Santa Rosa—

Merchandise race, 25 targets, \$1 entrance—G. Sylvester 23, L. Hawxburst 22, C. T. Mitchell 21, M. O. Feudner 22, J. V. O'Hara 22, W. Chappell 22, M. A. Clark 21, W. Janssen 21, C. Burfield 21, T. L. Lewis 20, D. Daniels 20, F. L. Carter 20, H. P. Jacobsen 19, S. Mayfield 19, Magistrini 19, W. J. Golcher 19, Beveridge 19, Morgan 19, Rooney 19, Dr. Rohrer 19, C. Reams 18, "Togo" Hirschle 18, P. Magistrini 17, A. M. Shields 17, Rose 16, J. W. Elias 13, B. Patrick 9.

Eureka Gun Club shooters participated in the regular club shoot July 16th. W. Parker and H. Kelly, 21 out of 25 each, tied in the club race for the diamond medal. Kelly won on the shoot off. Parker has won the medal twice, another win and the prize becomes his permanent property. Dr. Dungan won the second class gold medal and Henry Jones was the winner of the leather medal.

The scores made were as follows: Buhne 17, Parrott 19, Dungan 18, Clancey 12, F. Parker 18, W. Parker 21, H. Kelly 21, Jones 9, Loufborrow 17, Clanton 17.

The Napa Gun Club initial blue rock shoot took place on the 16th inst. The meet was well attended, among the visitors being fifteen members of the Vallejo Gun Club. The East Napa grounds are excellently located and conveniently fitted up. The Vallejoites Chappell, O'Hara, Beveridge and R. Coe and Dr. Doherty, S. Mayfield, C. Reams and Dr. Stice of Napa annexed the principal honors. Nearly 3000 targets were trapped. The scores were the following: Event 1, 25 targets—Chappell 20, O'Hara 17, Hirschle 22, Clark 24, S. Mayfield 16, Doherty 16.

Event 2, 10 targets—R. Coe 6, Rose 4, L. Shouse 4, Magistrini 6, Barnhardt 6, Doherty 7, Elias 6, Rogers 5, Reams 6, Litz 7, O'Hara 9.

Event 3, 25 targets—Chappell 13, Graig 12, S. Mayfield 15, Clarke 23, N. Coombs 8, Reams 12, Beveridge 19.

Event 4, 25 targets—Hirschle 22, O'Hara 16, Chappell 18, Clark 16, S. Mayfield 19, Doherty 14, Reams 14.

Event 5, 20 targets—Shouse 14, Hirschle 13, Elias 12, Rogers 13, Coe 13, O'Hara 14, Mayfield 14, Polski 0, Reams 16, N. Coombs 7, Magistrini 17, Amstutz 13.

Event 6, 20 targets—Shouse 13, Hirschle 17, Elias 6, Rogers 10, Graig 11, Magistrini 10, Coe 13, Comfort 12, Amstutz 7, Reams 11, S. Mayfield 16, Doherty 12.

Event 7, 25 targets—Chappell 21, Beveridge 20, Burnett 13, Mayfield 20, Reams 14, Doherty 13.

Event 8, 25 targets—Reams 10, Beveridge 13, Mayfield 17, Chappell 18, Comfort 11, C. Magistrini 17.

Event 9, 25 targets—Elias 7, Shouse 13, Barnhardt 13, Clark 19, Chappell 20, Doherty 15, Coe 16, O'Hara 21, Mayfield 19, Reams 22, Rogers 13.

Event 10, Team shoot, 25 targets per man—Napa team—Captain S. Mayfield 18, O'Hara 20, Reams 17, Coe 17, Valencia 14, F. Barnhardt 13, Rogers 15, Rose 14, I. Mayfield 6. Total 134.

Vallejo team—Captain Chappell 20, Clark 20, Beveridge 21, Magistrini 22, L. Shouse 17, Elias 17, Litz 13, Polski 4, Stice 12. Total 146

The sport of trap shooting, we are pleased to note, is being revived in Stockton, where the traps had become rusted after being unused for several seasons. The Stockton club for a long period had been a prominent organization at many tournaments. Unless we are greatly mistaken the tournament held at Stockton in 1897 is the record gathering of Coast trap shooters. On the 16th inst. the club's first live bird shoot for this season took place. A number of the old timers were on hand and had their "shooting eye" in good form.

In the preliminary blue rock events "Charlie" Merrill was high gun.

The live bird races were all six bird events, \$2 entrance, high guns, two moneys, 60% and 40%. Ties divided. The scores were:

First race—Johnson 6, Ellis 6, Denton 4, F. Merrill 4, Fuller 5.

Second race—Johnson 6, Ellis 5, F. Merrill 6, Lonjers 5, Clark 4.

Third race—Johnson 4, F. Merrill 6, Lonjers 6, Ellis 6, Clark 2.

Fourth race—John 6, Lonjers 4, F. Merrill 6, Ellis 6, Ralph 5.

Fifth race—Johnson 6, Lonjers 5, F. Merrill 6, Ellis 6.

Sixth race—Ellis 6, F. Merrill 4, Johnson 4.

WITH THE ANGLERS.

GREEKS WERE EXPERT ANGLERS.

Probably few fishermen are aware that fly-fishing dates back to classic times. A minute description of the artificial fly as used by Macedonian anglers is given by Aelian, a Greek writer of the third century A. D., as follows:

"Between Berca and Tbesalonica there flows a river, Astraeus by name, and there are in it fishes of a spotted color, but by what name people of those parts call them it is better to ask Macedonians. At any rate these fish live upon the native flies which fall into the river and are like no flies of any other part; one would neither call them wasp-like in appearance, nor would one reply to a question that this creature is formed like what we call the bumble bees, nor yet like the honey bees themselves. It has really the proper fashion of each of the above. In audacity it is like the fly, in size it might be called a bumble bee, in color it rivals the wasp and it buzzes like the honey bees. All common creatures of this sort are called horse tails. These pitch upon the stream to seek the food they effect, but cannot help being seen by the fish which swim underneath.

"So whenever one of them sees the fly floating he comes softly, swimming under the water, afraid of disturbing the surface and so scaring away his game. Then he comes near the shady side of the fly, gapes and sucks him in, just like a wolf snatching a sheep from the fold or an eagle a goose from the yard. This done, he disappears beneath the ripple. The fishermen understand these maneuvers, but they do not make any use of these flies for a bait for the fish, for if the human hand lays hold of them they lose their natural color, their wings fray and they become uneatable to the fish. So for this reason they make no use of them, disliking them because their nature forbids their capture.

"So with angling craft they outwit the fish, devising a sort of lure against them. They lap a lock of reddish wool around the hook, and to the wool two cock's feathers which grow under the wattles, and are brought to the proper color with wax. The rod is from 6 to 10 feet long and the horsehair line has the same length. They lower the lure. The fish is attracted by the color, excited, draws close and, judging from its beautiful appearance that it will obtain a marvelous banquet, forthwith opens its mouth, but is caught by the hook, and bitter indeed is the feast it has, inasmuch as it is captured."

SIERRA TROUTING.

A trip to the Sierra lake region at this time of the year is full of most enjoyable angling possibilities according to Mr. Al M. Cumming, who recently returned from that almost enchanted region after a visit of nearly four weeks during which trip he was accompanied by Mrs. Cumming.

Leaving this city on June 21st, they went first to Webber lake. From there trips were made to Fordyce lake, White Rock, Jackson and Webber creeks. In all of these waters the fishing was first class. The killing lures were: black bodied royal coachman, royal coachman, March brown, brown hackle, grizzly king, black and red ants, tied on Nos. 8 and 10 sproats. The spoon for that country is the brass and silver La Forge No. 1.

Recent reports are that the fish are taking the fly in Webber lake, Fordyce and White Rock creeks in fine style. Many large Lech Leven trout have been taken in Webber lake this season. These fish have to be worked for, however, for it is hard to get them to notice the usual lures, there being a most plentiful supply of minnow feed for the big trout in the lake.

From the Webber lake region the two anglers journeyed to Bassett's. Among the guests at the latter place they met Prof. Flagg of Berkeley, Mr. Flagg, Sr., Fred W. Koch and wife. From Bassett's they fished the north fork of the Yuba, Chapman, Lincoln, Packer and Salmon creeks, Upper Sardine lake, the three Salmon lakes, the three Bear lakes and Long lake, first class fly-fishing for rainbow trout was found everywhere. The fishing at and about Bassett's will continue good until ice gathers in the early Sierra winter.

In 20 days' fishing, Mr. Cumming missed the limit but twice, 20 boxes of fine trout sent out to friends attested the sport to be found with rod and line in this inviting mountain region.

Among other things Mr. Cummings noted that the mountain quail shooting season in that region should be excellent this year. A light winter was favorable to the breeding season and the birds were enabled to go to the higher places earlier than usual. The young were hatched and raised before the sheep got in this season and both old birds and their well grown broods went up to their regular feeding ground and are more plentiful this year than ever before.

The grouse of that region have about become exterminated, the bag limit of 25 is too strong for the visible supply. The work of the gun is helped by the sheep, who feed and trample over every square foot of the country in which the birds breed, and destroy many nests of eggs and young hatched birds.

The close season on snipe should be the salvation of the English snipe of that section, Sierra valley being a breeding ground for them. October 15th when the season opens is pretty late for good snipe shooting up there, in consequence the birds breed and propagate unmolested and find their way to lower shooting grounds in the open season.

MONTEREY BAY FISHING.

O. A. Hale, of San Jose, who has been making many records at the Santa Cruz fishing grounds this season, "out-fished Hale" on the 20th inst. by bringing in the finest catch that has been recorded since the salmon began to run this year. Twenty-seven salmon, three yellowtail and one rock cod was the result of a few hours' trolling in the morning. "The yellowtail," said Mr. Hale, "fought hard, the 20-pound one

putting up a tussle that would do credit to a 50-pound salmon."

The yellowtail are seldom caught at Santa Cruz, Catalina being more famous for this game fish than any place on the Coast.

George Owen of San Jose was with Mr. Hale and enjoyed the sport of seeing the yellowtail landed.

Nelson and Warren French on the same morning were trolling off Pacific Grove; one of the boys hooked a 35 pound halibut, which pulled so hard the boy though he had a shark on, and with considerable difficulty he finally landed the fish. A number of salmon were also caught.

ON THE TRUCKEE.

Fly-fishing on the Truckee, above Boca, is reported to be excellent at present and is being enjoyed by a number of anglers. Carlos G. Young, Mr. McNaughton, Achille Roos, Frank Lacoste, J. S. Turner and W. E. Murdock were among the recent visitors to that famous resort.

Col. Young states the blue upright was an exceedingly good fly while he was fishing there.

To get into good water the angler must go about four miles above Boca, for the Prosser creek dam is being cleaned out and the river below will probably be roily until the end of September.

BASS FISHING.

Striped bass fishing is remarkably backward this year, but few fish being landed at any of the favorite resorts. In fact, in some heretofore good fishing grounds there has not been a bass taken for a long time past. A report was current during the week that a few bass had been caught at San Quentin point, one being a 20-pounder.

Several large fish were taken in Lake Merritt during the week. One, a 12-pounder, was hooked by Chas. Breidenstein on Thursday night. Geo. Wentworth hooked a 12½-pound fish Friday night. Results generally, however, are not encouraging and the average run of fish landed are small ones.

A few bass have been recently taken at Baker's beach. The bass caught there are generally of fair size, a 12 pounder being the weight of a recent capture.

San Pablo bay is a lottery so far as striped bass is concerned. Some days the fish are running nicely, at other times they are non est. Some fair catches, among the fish taken being a few 6 and 7 pound bass, have rewarded recent trips of anglers to San Pablo.

NEW BLACK BASS RESORT.

Some four or five years ago Alta lake or rather reservoir, near Towles on the Southern Pacific line of road, in Placer county, was stocked with black bass fry. The lake has evidently proven a congenial habitat for the fish, for they have prospered and increased to a remarkable extent.

So well have the fish flourished that the lake was opened to anglers this season. Mr. Volberg, of this city, recently enjoyed some lively sport with the Alta lake bass. He found, when he was there, that the most effective lure was trolling a live grasshopper on a No. 6 hook. One fish he caught weighed 5½ pounds. He reports that the water is full of big black bass, and that he observed, near the sheltering fronds of the aquatic vegetation, thousands of young fry, shepherded by the old fish and guarded against the maws of outfish prowling about for black bass tidbits. From all indications, our anglers will in the near future have black bass fishing galore, for both the large and small-mouthed varieties seem to flourish in every water of the state where they have been placed.

Black bass fishing at many points on the Sacramento river is reported to be excellent. Not long ago a large mouth black bass weighing nearly five pounds was taken near Redding. Black bass are also plentiful in the river near Oroville, as are their cousins of the striped variety. In fact, both species of the bass family flourish in the Sacramento.

At the mouth of Mark West creek black bass are plentiful. A number of fair-sized fish have been caught recently.

A notable angling trip was that enjoyed early this month by Mr. Bruce Cornwall when he fished in the vicinity of Kamloops, B. C. A big 7 pound rainbow sent to this city, frozen in a huge block of ice, was a pleasing reminder to many anglers of good sport on the northern streams.

DOINGS IN DOGDOM.

SANTA CRUZ SHOW.

We are informed that the membership list of the recently organized Santa Cruz Kennel Club now reaches the seventy mark, comprised of the leading and most influential citizens of that delightful and popular seaside city. Further, that for the coming three-day show in September, the Casino management will donate \$1000 worth of cups and prizes, this generous contribution will be enhanced by a substantial recognition from the railroad.

An Eastern judge will be invited to come out here and judge the show, we were informed. Rumor, this week, well founded we are inclined to believe, gives out Harry W. Lacy, of Boston, as the judge selected. Mr. Lacy has judged here three times, twice anyhow, and has given satisfaction to exhibitors and spectators alike, and, being possessed of a pleasing and congenial personality, has made a number of friends. We believe the securing of Mr. Lacy to preside over the seaside ring will be a drawing card.

The fancy's interests in Santa Cruz county has taken a booming and upward tendency and we wish them every success and will second their efforts without stint.

OBITER DICTUM.

"The novice class shall be for American-bred dogs only, never having won a first prize at any recognized show, wins in the puppy class excepted." This simple announcement in the *American Kennel Gazette*, which

is the official organ of the American Kennel Club, is of far reaching importance, says the *Boston Herald*. The above ruling goes into effect on August 1, and it is generally agreed among members of the fancy that it is one of the best decisions ever made by the governing body of American dogdom. Its effect will be felt more particularly at the big show in Madison Square Garden, New York, Mechanics' building, Boston, and at the Chicago dog show, as it is at these shows that the foreign-bred cracks have hitherto made their annual appearance in America.

These foreign-bred dogs, imported at long prices, have as a rule won honors enough in England to entitle them to an American championship, yet they were allowed to enter in the novice with American-bred dogs that had never faced a judge.

While this was all very nice for the gentlemen who picked up easy money by selling imported dogs at fancy prices to American exhibitors, it was unjust to the American breeder to compel him to enter a novice against a famous English hench show winner.

It must be borne in mind that it is a much more difficult matter to obtain a championship in Great Britain than it is in the United States. Over here all that is necessary for a dog to become a champion is to have him win an aggregate of 10 points in competition in the winners' class at different shows. In England, however, a dog must win his full championship title by winning three championships under three different judges.

The *Herald's* kennel contributor also has the following pertinent matter. If the writer is the well known Boston kennel authority, whom we believe he is, we must congratulate him for having the courage of his convictions, for he strikes straight from the shoulder. But, really now, we never thought it would come that way, more's the value of it. He writes:

Trading in foreign-bred dogs has been a very profitable investment for some of the English judges, who come to America as guests of kennel clubs and incidentally as salesmen, for English judges have a jolly good time, socially and financially, out of American dog shows. They are looked upon as the fountain heads from which all knowledge flows in dogdom.

Every year before the New York dog show begins one hears of British dogs, mostly Fox Terriers or Bull-dogs, being imported at fabulous prices, and later on the English judges appear on the scene and make the awards. In the mean time the American breeder is doing his level best to breed true to the type, but, no matter how well he succeeds, the English judges come along, and, often complimenting the honest American fancier, will finally turn him down by saying "Your dog has very good conformation, but he is rather light in bone, and it is really too bad."

A young Yale student who was up against this kind of jollying for a number of years, finally decided to call the English bluff, and he has done it in a manner that has opened the eyes of more than one American breeder. Joseph B. Thomas, Jr., had a hobby for Russian Wolfhounds, and, after he had one or two gold bricks loaded on him from England, brought over the very best dogs that money could purchase, and he is now successfully breeding them.

Some day the fanciers in other breeds may wake up to the fact that they have been buncoed for years. There are various kinds of graft, but the smooth English judge has such a charming way of rubbing it in that his American customers feel that it is quite an honor to be done up brown. In the future, however, the imported dogs will not be especially favored, as they have been in the past, when they line up against American-bred bow-wows. In the novice classes the American breeds will now have a "square deal," but the foreign judges will still have ample opportunity to bestow favors on the imported article.

San Mateo Kennel Club's one day open air show on September 9th, Santa Cruz three days' show, then Stockton in October makes the outlook a pleasing one, and it is to be hoped is the clincher for an annual summer and fall circuit.

Another bit of gossip, on line with the other good tidings is that Oakland will show and that Charles Lyndon may judge at San Mateo.

Four coming shows this year should bring out a lot of good young ones. There will be strong inducements to put likely puppies on the sawdust.

One of our local Collie fanciers is having considerable trouble in getting a settlement from a Chicago breeder. He sent \$135 for a bitch several months ago, and despite repeated written requests, has been entirely ignored in every respect. The case evidently is one that should be made an example of.

Presidio Kennels has leased the Collie bitch Wellesbourne Coquette (Wellesbourne Conqueror-Red Hills Brandie). She was served by Dr. W. P. Burnham's Boardane Wishaw Squire (Ch. Balreggie Baronet-Troon Mayflower) last week.

D. P. Cresswell has recently received two very good Cocker puppies from the Portland Cocker Kennels. If they are, as we have been informed Portland Kid puppies, there is a promise of something good maturing.

TRADE NOTES.

AVERAGES REPORTED.

New London, Ia., Fred Gilbert, first general average, 575 out of 600, shooting "Du Pont." J. W. Garrett of Colorado Springs, Colo., first amateur and second general average, 567 out of 600, shooting "Du Pont." E. M. Klein of Spirit Lake, Ia., second amateur and third general average, 564 out of 600 shooting "Du Pont." H. G. Taylor of Meckling, S. Dak., third

amateur average, 561 out of 600, shooting "New E. C." (Improved). St. Louis, Mo., July 2d, 3d and 4th, Fred Gilbert, first general average, 589 out of 600, shooting "Du Pont." C. O. LeCompte, second general average, 561 out of 600, shooting "Infallible." F. P. Ford of St. Louis, first amateur average, 350 out of 400, shooting "Du Pont." Carlisle, Pa., July 3d and 5th, H. H. Stevens, first general average, 347 out of 380, shooting "Du Pont." H. B. Shoop of Harrisburg, Pa., first amateur average, 336 out of 380, shooting "Du Pont." A. C. Kreuger of Columbia, Pa., second amateur average, 332 out of 380, shooting "New Schultze." L. Wertz of Temple, Pa., third amateur average, 326 out of 380, shooting "Infallible." Thomasville, Ga., July 4th and 5th, Walter Huff, first general average, 291 out of 310, shooting "Du Pont." J. W. Hightower, second general average, 261 out of 310, shooting "Du Pont." Col. J. T. Anthony, third general average, 259 out of 310, shooting "Infallible." E. L. Marbury of Gordon, Ga., first amateur average, 250 out of 310, shooting "Du Pont." J. W. Huff of Walden, Ga., third amateur average, 245 out of 310, shooting "Du Pont." Scranton, Pa., July 6th and 7th, W. H. Stroh of Pottston, Pa., first amateur average, 288 out of 330, shooting "Du Pont." J. B. Mason of Scranton, Pa., shooting "New Schultze," and Thos. Murray of Minooka, Pa., shooting "Du Pont," tied for third amateur average, 282 out of 330.

FACTS ARE CONCLUSIVE ARGUMENTS.

While the echoes of the Grand American Handicap may have died away, Parker Bros. want to call the attention of the shooting fraternity to the performance of Mr. John A. Flick, of Ravenna, O., a one-armed shooter who scored with the Parker gun, 97 out of a possible 100, at this famous shoot. The Parker gun also made some other very good records at the shoot, winning the World's Team Race with a total of 474 out of 500, and four Parkers out of five shooters in this event. The Consolation Handicap was also won with the Parker gun in the hands of Mr. J. T. Atkinson, tying on 99, and shooting out his opponent.

At Waynesboro, Va., on July 4, Mr. C. H. Newcomb, of Philadelphia, strictly an amateur, won high amateur average, and at Richmond, Va., on Decoration Day, also won high amateur average. At New London, Ia., which is quite a shooting center, it may be interesting to sportsmen to know that the three handicap events held during their last tournament were all won with the Parker gun. Barton, of Chicago, and Gilbert and Garrett all tied on 50 straight, Barton breaking 100 straight to win the event. The second day handicap was won by John Burmeister, with 50 straight, and the third day handicap was won by Fred Gilbert with 50 straight. All of the handicap events were won with the "Old Reliable" Parker in the hands of amateurs in two cases. In three days' shooting, the "Old Reliable" Parker made scores of 200 straight, which is a remarkable performance and proves conclusively the reliability and effectiveness of the famous "Old Reliable."

READY FOR ANY DEMANDS.

A contract for 3,000,000 rounds of small arm cartridges was awarded on June 27th by the War Department to the Winchester Repeating Arms Co. The Chief of Ordnance, General Crozier, in making the award said, "Although the price offered is high, I, nevertheless, consider that private plants shall be prepared and have experience in the manufacture of government ammunition, which is needed so desperately and in such large quantities in time of war." In reading the General's remarks, one is strongly reminded of the French phrase "Pour vivre," it is to laugh. Instead of the Winchester Company being unprepared and having lack of experience, etc., as he hints, it doubtless occurs to the initiated that if our ordnance department were as well equipped and as ready to fill large orders as the Winchester people, it would not be necessary to advertise for bids on government ammunition. During the late Spanish-American War, the Winchester Co. supplied our Army with 100,000,000 rounds of ammunition, and our Navy with over 50,000,000 rounds of small and large caliber cartridges. A great percentage of the rapid fire gun ammunition used by Admiral Dewey and his fleet at that memorial battle of Manila Bay, and a large quantity of the ammunition used by Admiral Sampson's fleet at Santiago, was manufactured by the Winchester Repeating Arms Company, so it does not seem that this company is in need of much experience in making government ammunition.

PETERS' POINTS.

Mr. Neal Apgar, shooting at Towanda, Pa., on June 3, won high average over all contestants, scoring 180 out of 185, and making one run of 97 straight. Mr. Apgar won high average at Richmond, Va., on July 4, and on the same day Mr. E. H. Storr was high at Roanoke, Va.

On July 6, at De Soto, Ill., Peters' shells made a clean sweep. Mr. H. W. Cadwallader won high professional average, 95½%; Mr. E. Shanks high amateur, 91½%; and Mr. McMillan second amateur, 90½%.

At Spring Hill, Tenn., on July 4, Peters' shells were used by the winners of first, second and third averages, and the team loving cup. The attendance at this shoot exceeded expectations, as over sixty men faced the traps.

At Corsicana, Texas, July 4 and 5, Mr. L. I. Wade, Texas representative of the Peters Cartridge Company, won high average, missing only eight out of 350 targets. Mr. Wade is keeping up the fast pace which he set at Indianapolis, and attributes it to the perfect qualities of his Ideal load.

At Abilene, Texas, July 4, high average was won by Mr. W. W. Winniford with Peters' shells, also the live bird event, Mr. Winniford killing fifteen straight. The remarkable part about it was that he used his regular Ideal target load for live birds, and that did the work perfectly.

Stallions to Produce Carriage Horses.

In judging "trotting-bred stallions suited to produce carriage horses" for what are we going to look in order to frame decisions correctly and logically? The fast trotter and the heavy carriage horse differ radically in conformation. It is obvious that we cannot judge trotting-bred stallions in this ring as we would judge them in their own ring as sires of trotters. We must go outside all established lines. We must first look for the horse that possesses the heavy harness conformation and substance and action, and if we do not find one that fills this bill the prizes should be withheld, for a stallion cannot be expected to transmit qualities which he does not possess and which his immediate ancestors did not possess before him. We must remember, moreover, that the American trotter springing from Hambletonian 10 has a strain of hackney in him, for Hambletonian himself was out of the Charles Kent mare, daughter of imp. Bellfounder, which was an English-bred hackney and is numbered 55 in Vol. I of the Hackney Stud Book of Great Britain and Ireland. It is well known that certain of the Hambletonian strains show much more of the carriage type than others, and it is probably a fact, though one impossible of demonstration, that the most of the best heavy harness horses so far produced in the trotting breed have sprung from these tribes or from them in union with a few others that have become merged mostly in the Hambletonian, such tribes as the Royal Georges, Forests, Morgans and so forth. Undoubtedly stallions carrying such blood will be more likely to succeed in filling heavy harness acceptably than the others in whose lineage such lines are not found.

Two things then we must bear in mind when going into a ring to find the "trotting-bred stallion best fitted to produce carriage horses"—first, that we want a horse of carriage, not trotting, conformation; second, one in which the blood lines promise carriage excellence rather than extreme speed. In other words, while we desire to make use of that which generations of Yankee brains, skill and push have done for the trotter; while we want all the fire and vim and vigor of the race horse; while we want every particle of fineness the refining influence of the track has im-

parted; while we want this and perhaps more, we want it all so that we may be aided not combated by heredity. In fact, we want and must have the assistance of the carriage strains in the trotter. It stands well to the reason of any thinking man that if we have these aids we must have laid a good foundation for victory.

Plenty of men still think and some blatantly avow that the racing trotter is the only source from which to draw our heavy harness horses. Such men going into a ring to judge trotting stallions for the purposes under discussion will not advance the cause they champion so loudly. Under their mistaken rule we must remain exactly where we are now or retrograde. On the contrary, let the men who are chosen to pass on such classes set aside the strict trotting type altogether and select that which is wanted for heavy leather as nearly as possible, and with proper intelligent selection we shall have in time a carriage horse producing strain of the trotting breed. It may not be easy at the first to find specimens that just fill the bill; but if the judges of such classes will follow one rule they cannot go far wrong, and unless they do follow it they can do no good. Here is that rule: "Admit to the premium list only stallions which themselves possess the conformation, style, quality, substance and action required in heavy harness horses of the highest class." Adhere strictly to this rule and success must follow; depart from it and we must stand still or go back. The stallion which begets high-priced carriage horses with regularity must have all their attributes in marked degree. Long backs, ragged quarters, ewe-necks, light flanks, cat hame, narrowness, dragging hocks and a tendency to pace or shuffle when going slow must be barred.—*Breeders Gazette.*

News From the North.

[Rural Spirit, Portland.]

John Marble, of Los Angeles, owns the Oregon bred mare Altawood 2:20 by Altamont, out of Hollywood, and has two fillies one and two year olds out of her by Zombro.

J. C. Hinshaw, of Salem, Oregon, is breeding his mare Mary Bell Vernon the dam of the good two-year-

old Vernon Jones, back to Capt. Jones this year and is in hopes of getting another Vernon Jones.

J. A. Jones has purchased the broodmare Minmont, by Altamont dam Minnie M., (dam of Trumont 2:21, Satin Royal 2:19) by Rockwood, second dam Sally M. (dam of Pathmark 2:09, Altao 2:00) by Oregon Pathfinder, from P. J. Mann, and in return sold Mr. Mann Alice J., two-year-old, by Capt. Jones, dam Amy May, by Alexis 2:18 son of William L., dam Beulah, dam of Kinmont, etc., by Altamont and a full sister to Cheballs 2:04.

W. A. DeLashmut has sent his trotting mare Lennetta 2:25 to J. B. Stetson, at Salem, who will train and race her this season. She is considered a very promising mare. Last season she was started eight times on half mile tracks winning two first, four second moneys and was twice unplaced. She is by Norcatur, a son of Norval by Electioneer; first dam Arabella 2:26 by Arabesque, second dam a producing daughter of Hiatoga.

J. T. and J. H. Wilkinson of Chillwack, B. C., are breeding Hazel Kirk and Red Lea to Zombro 2:11 and Red Girl, the dam of Red Lea, to Hal B. 2:04. Hazel Kirk is an inbred Altamont being by Altamont 3600, dam Chemeketa by Altamont 3600. She is a good individual and just the caper for a good broodmare. Red Girl is by The Marquis, dam by Red Buck. She is the dam of Panama Maid 2:20 and Red Lea that can go in the list any time. Red Lea won the British Columbia Futurity for two-year-olds last year and will be given a record this fall.

Geo. T. Beckers, who is making a season with his stallion Zombro in this city, priced him last week to a Boston party at \$50,000. When Mr. Beckers received the letter asking for a price on this great young sire he advised with a number of prominent horsemen before fixing the price even at what may seem high to those who have not considered the question of value of a pronounced speed sire. When McKinney was sold for \$25,000 some people thought it a big price, but the man who bought him made \$30,000 on the deal. Zombro is a much younger horse than was McKinney and he promises to be just as good a sire. To a man who has a breeding farm \$50,000 is not too much for a young sire of Zombro's stamp.

The "Shrops."

The Shropshire breed of sheep stands unsurpassed as an all round farmers' sheep adapted to all conditions, writes a correspondent of *Shepherd's Criterion*. Not only is the Shropshire a farmer's sheep, but it is the rich man's sheep also. They keep them on their large farms because of their beauty and prolificacy. The Shropshire is the universal breed. It is found in large numbers in England, Ireland, Scotland, the United States, Canada and almost everywhere known to sheep growers.

Everywhere Shropshire rams are used to grade up the common class of ewes. And why is this so? It is because they have proved themselves to be the most profitable. Shropshires are also very profitable when raised in pure bred flocks. The ewes of this breed drop a large number of lambs and nurse them well, and as soon as the lambs are partly matured ready sale at good prices for them is immediately found. The ranchmen buy Shropshire rams by the carload, a very large majority of the smaller sheep growers use Shropshire rams and when you get the exceptionally good ones there are plenty of pure bred breeders willing to pay you well for your product.

The fleece of the Shropshire sells at a very high figure. The Shropshire produces the highest priced mutton that goes on the market. Time and time again have grade Shropshire lambs topped the Chicago and other leading markets. At the leading shows, such as the International, held at Chicago, Shropshire wethers have always carried away a large portion of the laurels for champion mutton, hence a very profitable sheep adapted to most all conditions and most all people.

Sober up on Jackson's Napa Soda.

Farm and Home Notes.

When corn has failed, it is a good plan to plant peas. Three pecks to the acre may be used.

It pays to have everything convenient. It saves in time and effort, and that really saves money.

It is no small art to be able to cut and dry hay just right. Some cut too late, and the hay is too woody.

The best time to cut alfalfa is when it is beginning to bloom. Fields are usually uniform and may be cut when about one tenth of the flowers are in bloom.

It pays to go to conventions. To hear a great man talk, or to talk with one for an hour, may lead to successful plans which will affect our whole lives.

When the crop has commenced to grow, shallow cultivation should be adopted, so as to kill the weeds and encourage moisture. This can hardly be overdone.

During the summer no one works harder than the farmer. He needs some recreation and should plan so that his evenings may be as long as possible and as free from care.

When ground has been packed by heavy rain, it is necessary to cultivate it a little deeper than usual, at first, so as to loosen the soil and vitalize by letting in the air. Late cultivation should always be shallow.

There is a general sentiment that if a man's horse or cow goes estray, his neighbor's shall help him to get it back. Should not this also apply to his son or daughter, if they are going wrong, friends and neighbors should help them get right.

The secret of shocking hay, or of stacking it, is to keep it highest in the middle. Let the first fork full be heaped up, and shock the hay on that. A good stack is built on the same principle. If the water soaks in a few inches it will drain and dry out.

While harvesting it pays to keep up with ones work. Hay should be cut down, dried and handled as little as possible. Rain, or dew spoils the color, and while a small amount does not effect the nutritious value, it spoils the color,

and the price. The mower should be started in the morning, the hay raked into windows and put into small shocks the same day, even if it is necessary to open them the next day.—*Texas Farmer*

Charcoal as a Food for Poultry.

Whenever the word charcoal appears one looks impulsively to the results obtained by its use. Charcoal is a cleaner and purifier. That has always been its chief qualification and its use among poultry will invariably be manifested in bright red combs and wattles, and a sprightly demeanor among the fowls. Utilized as a deodorizer its value cannot be overestimated.

Charcoal has been made use of for years with telling effect in the food for poultry. The commercial product may have some advantages in being scientifically prepared; but any one with a few ears of corn and a bed of hot coals in any kitchen stove can prepare a substitute product that will in every way fill the uses to which the commercial product may be put so far as poultry is concerned. The product will be eagerly consumed by the fowls and its influence on the system will be directly noticeable in the improved appearance of every fowl that has partaken of it.

For various disorders arising from improper digestion and assimilation of foods the use of powdered charcoal in the food rations will invariably prove beneficial. Sour crop will yield readily to the assistance of charcoal. As a tonic for sickly appearing fowls the use of charcoal is unsurpassed. Many unwittingly make the error of attempting to relieve these conditions of sick and deranged chicks and fowls by doping, which in the main tends only to make matters worse.

It pays to take a walk around the barns just before going to bed to see that the stock are all right. Such a practice will save lots of money in a lifetime.

Variety of foods for any class of stock helps health, gains and profit.

Ducks and Ducklings.

Broody ducks are almost a rarity. It is hard to fatten the laying duck. Steeped alfalfa is an excellent substitute for green food.

Ducklings usually start their molt when about eleven weeks old.

Soft shelled eggs come occasionally, but not as often as from hens.

It is nothing unusual to get eggs from ducks at five months of age.

It takes a duck about six weeks to molt and get in good condition again.

Four ducks laid 612 eggs last season from which were hatched 300 little ducks.

Cracked oyster shells are placed before the ducklings from the time they are placed in the brooders.

Duck eggs must be set as fresh as possible to secure a good hatch. They lose their fertility very quickly.

Fifty breeding ducks should keep three 200-egg incubators going and turn out between two and three thousand ducks in a season, giving one man all the employment he would want.

Ducks are not subject to disease, as a rule. They are not troubled with worms and do not have gapes. The lack of coarse sand in the food will give them indigestion, and damp quarters at night will cripple them with rheumatism.

Tree and Vine.

Profit can never be starved out of an animal. Neither is there any money made in keeping a beast on a ration that provides just enough to keep the body. Profit comes from the use of the feed that is consumed after all the normal wants of the body are taken care of. An animal can be likened to a machine in some things. If an engine was given just fuel enough to keep it running, and no more, an attempt to force it to run a feed grinder, or do any other work would shut it down. Profitable work can be secured only when suitable fuel is consumed to produce it. So it is with the animals. Gains can never be made until more feed is consumed than is needed to maintain the wear and tear of the system.

Milk and Its Care.

"Milk is responsible for the deaths of thousands of babies and old people every year in our cities." This is what one of the leading physicians of a large city said to me a few days ago in speaking of the difficulty of getting a pure milk supply. It had been very warm for a week and the mortality among the children had been unusually great. "This morning the milk which came to me was decidedly off," a gentleman added after the doctor had made this assertion. "It was not sour, but it smelled bad. There was a dead, shut-up odor that made me afraid to use it."

I know just what this smell was, for I had met in my own dairy sometimes, especially when the weather is hot and the air full of what the learned weather men call "humidity," writes E. L. Vincent in *Wisconsin Agriculturist*. And it is hard work to avoid these odors at the season of the year when heat is the prevailing condition of the atmosphere day after day.

Now, I have no doubt that the doctor was right in his assertion as to the excessive mortality among the little folks due to impure milk. Most of the bowel troubles which take the children away come from germ diseases, and germs are always present in impure milk.

I never was sicker in my life than once when away from home at a hotel I drank a glass of milk for supper. It was a very warm day but I did not notice anything whatever wrong with the milk I used. I had been feeling perfectly well, so that I am satisfied that what followed could be traced right back to the milk, for I had eaten nothing else which could account for it. I went to bed and fell asleep. About ten o'clock I woke feeling deathly sick. I vomited and had a terrible diarrhoea which rapidly took my strength. In less than two hours I was so sick that I could scarcely stand. Calling a physician after a time I succeeded in checking the trouble, but it was several days before I was as strong as before. Since then I have been more careful than ever about having the milk from my dairy just as pure and sweet as care can make it.

None of us would like to be told that we are partners with disease, and especially disease which attacks and has for its victims the helpless little ones. And yet, whenever we are not scrupulously careful about the condition our milk is in when it goes to the milk station or when it is changed into the form of cream or butter or cheese, we are at least accessories after the fact if someone dies of disease contracted through our carelessness or neglect. So it stands us in hand to work faithfully against such a charge. We have sins enough to answer for and the gray hairs will come fast enough

without our adding to the burden or inviting the white locks by sending out milk that is not strictly pure.

There are a number of devices now on the market for sending pure air through fresh milk, thus lessening the liability to the growth of germs. These all work on practically the same plan. The warm milk slowly passes through the aerator, bringing the little stream of liquid into contact with the air. Then it should be set away somewhere so that it may not attract to itself any odors from decaying or otherwise ill-smelling vegetables or fruits.

It seems sometimes as if the subject of washing dairy utensils clean has been spoken of so many times that nobody pays any attention to it. And yet, no subject is of more vital importance to the dairyman. Wash clean, men and brethren. Wash clean! This is our everlasting watchword. That is one thing we may all do. We may think we are not able to buy an aerator, but we can use a clean brush and plenty of hot water and elbow grease. These will count, particularly if we avail ourselves of the purifying help of the air and sunshine by placing all our utensils out of doors where these agencies can work upon them.

And right here is still another thing we can do. We can give our cans of milk a good thorough shaking up two or three times in the course of the evening, if we have no specially prepared aerator. After the milk is in the can all ready for shipment, take the can firmly by the top and whirl it round so as to throw the contents smartly from one side to the other, and keep this up until the milk has all been stirred from the bottom and brought in contact with the air. An hour or so later repeat this operation. On very warm nights it will pay to get out of bed and go out to the cans and repeat the operation.

If you can arrange it to bring a spring down to the house, so much the better. Rig up a trough and into this set the cans after the milk has been put into them. Even if the water be not very cold if it runs through the trough it will do much to cool and purify the milk. But whether you can do this or not, do not neglect shaking the cans and wherever possible leave the covers off. By building a little roof over the trough this will be easier. Smothered milk will sour much more quickly than that which has been well aerated.

There is a deep sense of satisfaction in thinking that so far as we are concerned we have done our best to give the city neighbors, pure, sweet milk and butter. The time is coming when our laws will be more stringent than they now are on this subject. The drift is that way, and that is as it should be. The man who will complain because he is required to keep his stables and all things connected therewith absolutely clean would find fault if he were to be asked to wear a clean shirt to church on Sunday. And it would be a pretty small specimen of a man that would do that.

Did you ever watch the actions of a horse when he is free to choose his own place to rest. He will select a level spot where his feet may have a flat surface to rest upon, says the *Maine Farmer*. Therefore, see to it that the stall where horses have to pass a large part of their time in winter, or in fact in any season, is well adapted to their comfort. Many a horse has contracted permanent injury simply because he was compelled to stand in a strained and unnatural position in his stall.

You can tell more about the mutton qualities and the general thrift and feeding ability of your sheep now after they are shorn and before the wool is grown out long again, than at any other time in the year. It is therefore a good time to do the culling of the ewe flock.

Sponges. S. Adderley, 307 Market St

Sustaining the Milk Flow in Dry Summers.

In this section of southwest Missouri drouth usually comes about three seasons out of five. I am obliged to make provision for the protection of summer pastures, writes W. N. Love in *Orange Judd Farmer*. Dairymen in general are prone to overstock pastures in the early part of the season and when drouth comes they are already short and consequently suffer greatly. After a hard winter I hire a summer pasture and leave the home supply more than ample for the dairy cows. The next provision is to see that the ample land is not used for pasture until late in the season, unless drouth makes it necessary. If the pasture is not overstocked and ordinary growth of mowed land untouched I am pretty safe until the middle of September for an ordinary herd of cattle.

The next provision I usually make is to sow some cow peas and plant some late corn of the early ripening variety, or of the evergreen sweet variety on wheat land, immediately after the wheat is cut. This ground is plowed or disked, if conditions for disking are proper, while I plant about two gallons of peas and one gallon of corn per acre in the row. If only peas are to be planted, I use about 20 pounds, or one third of a bushel to the acre, and go over the ground twice, making the rows about 22 inches apart. The only cultivation given this crop is one or two harrowings just after they have appeared above the ground.

Putting in this crop requires little extra labor, although it comes at a time when there is much other important work on the farm, but the results more than pay for the extra work, if the season proves to be very dry. In any case, we have an excellent amount of extra feed and have benefitted the soil.

If the mixed crop is not needed during a drouth period, then wait until they begin to ripen and shock for hay. A ton of this pea hay will be worth almost as much as a ton of wheat bran. I have grown cowpeas continuously for 16 years, and during this time I have experimented with millets, sorghum, Kaffir corn, etc., but have found nothing that equals an early variety of corn planted late with peas, peas alone as feed paying, to say nothing of the benefits to the soil.

I think however, that alfalfa is better than corn and peas to carry the dairy cows over the drouth period, without diminishing the flow of milk, but up to the present time my experience with alfalfa has been in learning how to sow it, though with the use of inoculating bacteria I hope to be able to have some suc-

cess. My experience has been that other grasses tend to crowd out alfalfa. In one case, with a heavy application of barnyard manure, I had as fine a pasture of timothy and red clover as I ever wish to see, and the alfalfa completely disappeared.

Silage will fully meet the emergency of a dry period, but hitherto I have never had enough to last until past the first of May, and but few dairy farms are equipped with large enough silos to be able to have this feed the year around. In conclusion will say that if no other provision has been made for the drouth period, it will pay to feed dairy cows bran or cottonseed meal and green corn from the field, in order to sustain the milk flow.

— o —

When you have plenty of farm machinery and horses, but are short on human help, try hitching a team with a harrow behind the plow. When you are through plowing you will have thoroughly prepared the piece with the harrow.

— o —

Weeds in a pasture, or anywhere else, are unsightly. Salting patches of weeds in a pasture often solves the problem of how to clean them up. By keeping at this policy week after week and year after year, results can be accomplished.

— o —

Never shoe a horse except when the work he must do will make shoeing necessary for the protection of the feet. There is a great deal of farm work at which the horse's feet are much better without shoes.

PRIVILEGES!
FOR SALE.

Pacific Coast Trotting Horse Breeders Association Race Meeting at
SANTA ROSA

AUGUST 16, 17, 18 and 19, 1905

BIDS FOR THE FOLLOWING PRIVILEGES will be received up to Monday noon, Aug. 7th:

BETTING (Auction and Mutuel or Totalization Pools)

FRUIT, CANDY, NUTS and ICE CREAM PROGRAMMES

A certified check for 50 per cent should accompany all bids. Right reserved to reject any or all bids.

MUSIC

Estimates will be received for furnishing Music—8 or 10 men to play one hour each day for four days in band wagon on street and from 2 to 4:30 o'clock at the track.

Address

F. W. KELLEY, Secretary,
36 Geary Street, San Francisco.

Starting Payments Due
AUGUST 7, 1905.

Gombault's
Caustic Balsam

Has Imitators But No Competitors.

A Safe, Speedy and Positive Cure for Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a Human Remedy for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

The Lawrence-Williams Co., Cleveland, O

Feeding Bran to Horses.

There is so much prejudice for and against certain feeds, time of watering, color of horses and fads, that it is well to have practical horsemen tell us the right and then throw our prejudice to the winds. The *English Farm and Home* publishes the following article on feeding bran, that explains from a veterinary point the value of bran when fed with grain and hay as a relish, much as some of our stock foods to maintain condition:

The feeding of dry bran is very often supposed to have a binding effect upon a horse's bowels, but there is no real reason why this frequently-expressed opinion should be held, as dry bran does not, as a matter of fact, possess any binding properties. It proves a perfectly wholesome food for horses and it is, as a general rule, much liked by them and eaten with great relish. Bran is not, of course, a food that will make muscle and give hard working condition, like corn, and it cannot in any way be regarded as a substitute for the latter despite the fact that the chemical composition of bran, as shown by the figures of an analysis, is much akin to that of oats or maize. Bran is a useful supplementary foodstuff for horse-feeding purposes, both on account of the nourishment which it contains and of its palatability to horses. In the case of horses which are poor feeders, the plan of mixing some bran instead of chaff with their corn often is successful in inducing them to consume their feed of corn with greater relish than they otherwise do. When a horse is a bad doer, and in consequence carries too little flesh on its ribs, the animal's bodily condition may not infrequently be improved by feeding a goodly daily allowance of bran—say, 4 to 5 pounds. The consumption of this large quantity of bran every day, in addition to the usual corn ration and hay allowance, often causes a horse to put on flesh and gain in weight and bodily condition. Bran is practically just as suitable as chaff or chop for the purpose of mixing with the feed of corn in order to make the horses chew and insalivate their corn in a thorough manner, and it is much more palatable to horses than chaff or chop.

Bran is a very useful food for such idle horses as may require an allowance of concentrated food in addition to their other diet. It contains an ample amount of nourishment, and is nitrogenous in character, and yet it is in no wise heating in its effects upon the horse's system—a fact which renders it pre-eminently suitable as a concentrated foodstuff for idle horses, and those that perform but very little work. Some bran is also a useful adjunct to the diet of heavy-in-foal mares and for mares with suckling foals at foot. Bran is very generally regarded as a milk-making food by horse breeders, and although there are no accurately carried out experiments in regard to this question on record which could be adduced in support of this opinion, it is supported by the fact that bran proves a good milk-producing food in the case of dairy cows, and it is pretty safe to assume that if bran has a stimulating effect on the flow of milk in cows, it has a similar effect in the case of suckling broodmares.

Bran is very suitable as a supplementary concentrated food for weaned foals and young horses. There is nothing better than a little bran for mixing with the crushed oats when foals are being brought on to solid food, bran being easily digested by a foal when the latter is able to deal with solid food. In the case of sick horses and those that are convalescent, the inclusion of some bran in their diet proves very beneficial. On account of its palatability, bran tempts the appetite of sick horses more easily than other dry foods.

Canary Hay Seed.

Major C. P. Braslan of the Braslan Seed Growers' Company has the following to say to a San Jose *Mercury* reporter in re-

gard to the growing of canary seed, which has been undertaken with great success this season in the San Juan valley.

"At our seed farm this year we planted canary seed in quantity, for the first time in this country. The planting was done merely for seed purposes. But as the plant developed, we began to realize that we had discovered something that promised to revolutionize hay growing.

"You are presumably aware this year wheat and barley have suffered much from rust. But this field was free from rust while wheat and barley, side by side with this field, were eaten up with rust. It seems to be rust proof.

"Cows and horses are so fond of it that they will pass by barley and wheat to get at the canary seed. And better still, they can't eat too much as it is harmless."

As to the productiveness, it grows over five feet high and will make five tons of hay to the acre. It is ready for cutting two or three weeks earlier than barley.

As a seed plant it produces about 1500 pounds of seed to the acre, and in planting about 30 pounds of seed should be drilled in.—*Hollister Advance*.

Shade is worth money to sows and little pigs now. Comfort and profit are closely allied in the hog business.

Tuttle's Elixir

is a quick and permanent cure for distemper, founder, lameness of all kinds, pneumonia, thrush, cuts, bruises, collar and saddle galls, colds, stiffness, etc. It is used and endorsed by the Adams Express Co. We offer

\$100 Reward

for any case of Colic, Curb, Contracted or Knotted Cords, Splints, recent Shoe Boils or Callous that it will not cure.

Tuttle's Family Elixir

is the best household remedy that can be used for Rheumatism, sprains and all other pains and aches. Saves doctor bills and stops pain instantly. Our 100-page book, "Veterinary Experience," free. Send for it. Tuttle's Elixir Co., 52 Beverly St., Boston, Mass. Buck & Co., Agents, 18-15 Fremont St., San Francisco, Cal. Beware of so-called Elixirs. Tuttle's only is genuine. Avoid all blisters; they are only temporary relief.

FOR SALE.

"A STRATHWAY"

A Dapple Gray Gelding by Strathway out of a Thoroughbred Mare.

MR. FRISCO is 8 years old and SOUND; weighs 1050 lbs. He is one of the grandest road horses in America today. Fearless of all objects on road; a very fast walker; does not pull or lug on the bit; carries his head high; goes straight and never stumbles; will stand when tied and there is no road too long for him. He is a good feeder and a good looker at all times, either before or after driving. His speed qualities are phenomenal. He never saw a race track until last spring, when he was sent to Mr. Al McDonald at the track at Pleasanton, who drove him a mile in 2:22 1/2, last half in 1:08 1/2, with only thirty days' training. Mr. McDonald says he will trot a mile in 2:15 with three months' handling. The owner of this horse has to go East and has left the horse, buggy and harness in charge of Mr. Thomas Kinney at the Fashion Stables, who will show the horse or outfit.

THOMAS KINNEY,
Fashion Stables, Ellis St., S. F.

Daedalion 2:10 For Sale.

Can Beat His Record Three Times in a Race.

Is entered at Fresno and ready to start. A high-class Race Horse and a Coming Sire.

Sire, DIABLO 2:09 1-4.

Dam GRACE (dam of DAEDALION 2:10, Creole 2:15, Eagle 2:19 1/2, etc.) by Buccaneer.

Owner's business will not permit him to devote any time to racing. For further particulars address
BREEDER AND SPORTSMAN.

PARK HORSE FOR SALE.

HIGH-CLASS ROADSTER, COAL BLACK, 15 1/2 hands, five years old, weighs 1000 pounds. Is a very handsome horse, a perfect beauty; fearless of all things on the road; has been driven by a lady. Has lots of speed, but never trained on a track. Sound and all right. Sire and dam both registered. Apply to

HIGH CLASS STALLION FOR SALE.

GREAT PETER BAY STALLION.

Sire, Peter the Great 2:07 1/4 by Pilot Medium. First dam, Juanita 2:29 (dam of Sinaloa 2:25 1/4) by Sultan, sire of Stamboul 2:07 1/4, etc. Second dam, Beulah (dam of Beuzetta 2:06 1/4) by Harold, sire of Maud S. 2:08 1/4, etc. Third dam, Sally B. (dam of Maurice 2:13 1/4 and two more in the list) by Lever, thoroughbred son of the great race horse Lexington.

GREAT PETER is a beautiful bay, 15.1 to 15.1 1/2 hands high and one of the handsomest horses in California. He trotted a mile in 2:21 and half in 1:07 as a three-year-old. He was put to pacing with the straps this year, and in a few weeks paced a mile in 2:11 1/4 at Los Angeles, with a quarter right at 30 seconds. He was then let up on as he had an attack of distemper. Is sound and all right now, and can probably show a mile in 2:12 to an intending purchaser. Will sell at a reasonable price or will deal with him in trade for a first-class trotter. Address

ROBT. A. SMITH,

2124 Park Grove Avenue, Los Angeles, Cal.

A GOOD FILLY FOR SALE.

HANDSOME TWO-YEAR-OLD FILLY by Lochinvar 2:20, he by Director H. 2:27 by Director 2:17; first dam Myrtle by Sterling 6:23; second dam Theresa by Prompter; third dam Empress by Flaxtail; fourth dam Lady Narley by Marlon, son of Mambrino Chief 11. This filly is well broken, perfectly sound, good gaited and a first-class prospect. For further particulars address

THE CONSOLATION HANDICAP

—at the—

GRAND AMERICAN

Held at Indianapolis, June 27-30, 1905. was won by Mr. Jas. T. Atkinson of Newcastle, Pa., score 99 out of 100 from the 18 yard mark, using

PETERS FACTORY LOADED SHELLS

This was the Only Event During the Entire Grand American which was won from Behind the 16 yard Line. Many other Notable Scores were made with Peters Shells, among them the following:

1st on Practice Day, F. M. See (tie), 99 out of 100. 1st on First Day, L. H. Reid (tie), 99 out of 100. 2d in Preliminary, Wm. Yeach (tie), 97 out of 100. 3d in Grand American, M. Arle (tie), 97 out of 100. In the Consolation Handicap, 2 scores of 98, 5 of 97, 4 of 96 and 25 others above 90 were made with Peters Shells.

All of which merely goes to prove that Peters Shells are WINNERS.

Quinn's Ointment

Will Make A Horse Over;

will put sound legs under him and will save him from the cheap hawker and trader. It is the standard cure for Spavins, Curbs, Splints, Windpuffs, and all the various lumps and bunches of like kind. Keep it always on hand and you will be prepared when trouble comes. Leading horsemen everywhere know it and use it.

Mr. H. H. Clark, Fredonia, N. Y., writes: "The bottle of Quinn's Ointment purchased from you about two years ago removed a curb and thoroughpin and did it for good. My horse's leg is as smooth as ever."

Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write for circulars, testimonials, etc.

San Francisco, Saturday, August 5, 1905

SANTA ROSA is now headquarters for all the trotters and pacers that are being raced on the California circuit. All the fast ones are there, including Zolock 2:05½, the fastest horse on the Pacific Coast. Probably the two hundred box stalls at Santa Rosa Stock Farm track are all filled by this time, as last Saturday but very few vacant ones were left. On Wednesday of next week the Sonoma Driving Club will give a benefit to Willard Zibbell, a good program of racing being promised for this the initial meeting of the new club. A more worthy cause could not be found for the first attempt of this club at giving a race meeting, and as tickets have been sold to a great many people there will be a large attendance. This benefit will whet the appetites of horsemen for the splendid program which the Pacific Coast Trotting Horse Breeders Association will open one week later. There has been no meeting held on this coast in years that has been looked forward to with as much interest as this one. The high class of the entries to the classevents, and the known and unknown qualities of the colts and fillies that will start in the four rich stakes are subjects of discussion wherever horsemen are assembled. People are coming from all parts of the State to attend this meeting at Santa Rosa, and they will not be disappointed, as the racing is bound to be good, the time fast, and the citizens of the town ready to give all visitors a most hospitable reception. Santa Rosa is growing very fast, new residences and business blocks being very numerous. The climate is one of Santa Rosa's proudest boasts and sunny days and cool nights are certain. The best vacation for a lover of horses to take is to visit Santa Rosa during the Breeders meeting which opens August 16th.

THE HORSES belonging to the estate of the late Michael Fox will be sold at private sale by the executor whose advertisement appears in another column of this issue. The list is headed by the well known Masedo, a winner of the majority of his starts both at New York and in California. Masedo was one of the sensational two-year olds of 1903 winning a good race and running Boxwood to a head in the Laureate Stake, five furlongs in :59½ and defeating Highball, Greencrest and other good ones. Reseda II the dam of Masedo will be sold in this lot. She is by Middleton from Marigold by Luke Blackburn and is in foal to Orsini a son of Ormonde and Jongleuse. The well known broodmare Fanny Louise by Darebin-Nellie Peyton will also be offered. Fanny Louise was a good race mare herself and is the dam of the well known stake winners Canmore, Andrisa and Sister Jeanie. She is a young mare and was bred to St. Carlo this year and has proved herself to be a producer of high class race horses.

There are two weanling fillies in the lot one by St. Carlo from Reseda II and the other by Orsini from Fanny Louise which should prove good prospects if looks and breeding count for anything. The yearlings are a bay colt by Kenilworth from Edna Rose a daughter of Reseda II and a bay filly by Orsini from Fanny Louise; and one in search of good racing prospects should not fail to make a bid on these foals as they are on looks and conformation the best lot that have been offered in the local market this season.

WESTCHESTER RACING ASSOCIATION announces in our business columns this week, many stakes to close August 15th for its Autumn Meeting. Belmont Park where these races will be run is the finest race course in America. The stakes announced are for two-year-olds, three-year-olds, two-year olds and upwards and three-year-olds and upwards, besides weight for age races and several steeple-chase events. In all the stakes the amount of

added money is large and the subscriptions very small. A full list of these stakes with conditions will be found in the advertisement. We would call the attention of all owners and breeders of thoroughbreds to the statement of the Westchester Racing Association that the fixed events for now yearlings, to run when two years old in 1906, when three years old in 1907, and for foals of 1905 to run in 1908 will be duly announced to close September 15th, 1905, viz: in 1906, The Juvenile, The Fashion, The Eclipse. 1907, The Withers, The Ladies, The 41st Belmont for now yearlings. 1908, The 42d Belmont for foals of 1905. The Tenth National Stallion Race of 1904 will close for stallions at the same time.

Starting payments are due

Next Monday, August 7th, 1905

In the Pacific Breeders' Futurity Stakes

For two and three year olds.

Willard Zibbell Is Married.

The following from the San Francisco *Call* of August 1st, will interest all of our readers who have read of the fearful accident at Fresno on July 12th.

OAKLAND, July 21—Out of the West there came today a modern Lochinvar to claim a bride. It was a twentieth century wedding with a vengeance that was celebrated this afternoon in Oakland when bride, groom, witnesses and the officiating knot-tier sallied forth in an automobile and celebrated the ceremony in the big touring car on the street corner. Willard Rush Zibbell and Georgie Kempfer were the contracting parties.

In the large machine with the "chug chug" of the wheels for accompaniment, Justice of the Peace W. R. Geary pronounced the words that united Zibbell and his bride. The witnesses who sat in the forward seat with a chauffeur were J. W. Zibbell and Mrs. Dora Zibbell, the groom's father and mother, and Miss Ena Zibbell, his sister. The groom is a horseman of some note, and is a member of the firm of Zibbell & Son, proprietors of the Zibbell stable, 672 Eleventh avenue, San Francisco. The bride is also a resident of the city across the bay, whence came the bridal party in the automobile today.

The wedding occurred at the corner of Sixth and Castro streets at 4:30 o'clock. Shortly before that time Justice Geary was summoned to the County Clerk's office by a message which announced that his services would be required at a marriage ceremony.

When the Justice arrived he was introduced to the automobile party, and was invited to jump in for a ride. It was explained to Judge Geary that the bride and groom did not desire to leave the machine, so a quick run was made to Sixth and Castro streets as a convenient and quiet spot for the ceremony. Quickly the event was concluded, and Justice Geary left the machine, waving adieu to the bridal party as the automobile faded away in the cloud of dust, headed back for San Francisco.

Around the unique wedding is a touch of unusual sentiment and pathos. On July 12th Zibbell was in Fresno with a friend. While walking across the railroad track one night they were struck by a train at the crossing. The friend was killed and Zibbell was crippled for life. His left arm was cut off, his right hand was severed and his left leg was cut off. He also suffered internal injuries which for many days left him hovering between life and death. The injured man was nursed back to life by careful and attentive effort.

The most anxious of all during this time was the young man's sweetheart, Mrs. Kempfer, to whom he was engaged to be married. Many days passed before word was at last given that Zibbell would live.

"Who," it was asked, "should have a better right to care for this unfortunate man than the woman who was to be his wife?"

It was all talked over among the Zibbells. The young man was sure he did not want his sweetheart to make the sacrifice. She, with a loyal heart and insistence that could not be broken, declared she must take her place at her lover's side as his wife. Only in that capacity could she be his helpmeet in his hour of sore need and trial.

So the arguments ran until the plucky woman, like most of her sisters, had her own way. Then it was a problem, in view of Zibbell's condition, to have the marriage celebrated without undue notice. They decided to come to Oakland, hoping that here it could be arranged quietly. The family desired to be present. A procession of hacks was not wanted, and Zibbell's condition was such that he could not travel in the ordinary way by boat and train. The automobile solved the case. A friend of Mr. Zibbell's kindly offered the use of his machine.

Without any publicity the Zibbells and the bride formed the party that headed for Oakland this after-

noon. Without delay the trip was made to the Hall of Records, where the necessary license and the equally necessary Justice of the Peace were brought into service. In the brief explanation that was made while the Justice was on the way to the rendezvous, he was told that owing to the groom's crippled condition he could not leave the machine. Judge Geary rapidly made a mental review of the law of the State of California on the subject of marriage. He could remember nothing that prevented him from officiating in an automobile, so long as the contracting parties were legally qualified. Without any ado he joined in the spirit of the occasion and sent away the happy couple with his judicial blessing.

Sonoma County Driving Club.

The new driving club organized by the horsemen of Sonoma county has started out right by joining the National Trotting Association and all matinee and other racing under the club's auspices will be according to rule.

At a meeting held the other evening at Santa Rosa it was decided to give a benefit on Wednesday of next week to Willard Zibbell, the unfortunate trainer who lost his limbs in the awful railroad accident at Fresno July 12th.

The benefit will take the form of a race meet and some of the best horses at the track will start on the occasion and it is hoped that a handsome sum will be realized for the benefit of the unfortunate young man.

A Committee on Speed Program was named consisting of F. Wright of Sacramento, John Albertson of Fresno and W. H. Lumsden of Santa Rosa.

The horsemen are all very enthusiastic over the meeting. They are all very anxious to do what they can for Zibbell, and they want the public to assist them and in return promise an excellent card. Zibbell is quite well known in Santa Rosa. He resided there once and so did his parents. The general spirit which moves the horsemen in this effort is a very worthy one. Henry Carlton, secretary of the Sonoma County Driving Club will take an active part in the arrangements.

Some twenty horses have already been entered to start. There will be two or three races between horses owned by members of the Sonoma Driving Club and all the fastest horses at the track will be driven exhibition, miles, halves or quarters.

The officers of the new club are P. H. Quinn, President; W. H. Lumsden, Vice-President; L. W. Burris, Treasurer, and H. A. Carlton, Secretary.

Club Racing at Albany, Oregon.

ALBANY, July 29, 1905.

The Independence Driving Club gave a successful program this afternoon at their half mile track just beyond the city limits. Attendance was satisfactory, weather pleasant and track good. The participants were mostly local owners and the interest manifested was on that account all the more keen. No records were smashed, but the entertainment offered satisfied the crowd. The harness races were half mile heats, three in five, with the exception of the "club race" which was two in three. Small purses, plus a proportion of the gate receipts, were offered. The program had provided an event for the gallopers, which, however, was not pulled off. The summaries.

2:30 class, trot or pace.
Del Wilkes, b h by Del Norte.....(Kirkland) 1 1 1
Zamora, b m by Zombro.....(Beinap) 2 2 2
Coma, t h by Caution.....(Scott) 3 3 3
Time—1:30, 1:30, 1:19½.

Club race, members named horses, three-year-olds.
Ted R., ch g by Lovelace.....(Ray) 1 1
Golden Boy, ch g by Coeur d'Alone.....(Wilkins) 2 2
Hanna, br m by Mark Hanna.....(Kirkland) 3 3
Golden Flyer, b h by Scarlet Letter.....(Taylor) 4 4
Time—1:36½, 1:35½.

Road horse race.
The Freak br g (unknown).....(Scott) 1 1 1
Blinger Herman, b g.....(Lovelace and Kirkland) 2 2 2
Neptune b h by Col. Gift.....(Beinap) 2 3 3
Time—1:25, 1:19½, 1:24.

Boys running race, for saddle ponies, Jay won, Hot Tamale second, Snowflake third; time 59 seconds.

The well known trainer, J. Stetson, with J. M. Kirkland of Independence and G. A. Westgate of Albany acted as judges, D. O. Woodworth and A. Staats holding the watches.

A three-year-old standard bred trotting colt is offered for sale by an advertiser this week that is worthy of especial mention, not alone on his individuality, which is superb, but on his pedigree which is unique inasmuch as he traces four times to that great thoroughbred mare Fanny G., by imported Margrave, twice through his sire Iran Alto 2:12½ and twice through his dam the registered mare Alma Wilke-wood by Alcantara. The second dam of this colt is the great broodmare Emma Nutwood dam of Lottery Ticket 2:19½ and Pilot Prince 2:23½ both 2:10 sires, the former being the sire of Mush 2:08½ and the latter sire of Nance O'Neil 2:09½. The colts third dam is that famous old mare Lady Emma, record 2:38 on a half mile track, sired by Black Hawk 767, his fourth dam is by the world's champion trotter at 30 miles, Gen. Taylor, and the fifth dam the mare Rosalie by Williamsen's Belmont. If there is a better bred son of Iran Alto 2:12½ than this one we have not heard of him. Hannibal, as the colt is called should make a great stock horse as he has the size and conformation and will sire speed to a certainty.

Notes and News.

Breeders meeting

Will open at Santa Rosa

One week from next Wednesday.

It will be the greatest meeting held in California this year.

A car load of new McMurray white enameled sulkies just received by the Kenney Manufacturing Company, 531 Valencia street.

A sale of big-class, standard-bred stallions, brood mares, geldings and fillies will be held at Colusa next Wednesday, August 9th.

Petlgru 2:10½ is going so well and showing such extreme speed that he may be taken East for the late fall meetings on the Grand Circuit.

Bids will be opened Monday next for the privileges of the Breeders meeting at Santa Rosa. The privileges to be let will be found advertised in our columns today.

Mart Rollin's good gelding Charley Belden by Lynwood W, dam by Silas Skinner, trotted a mile in 2:16 last Saturday at Santa Rosa and the last quarter was in 32 seconds.

The new 29-pound Flower City sulky which the San Francisco Wheel & Novelty Company has just received is a beauty. Get it to win a race with at Santa Rosa or the State Fair.

J. O. Gerrity has the string of trotters and pacers owned by W. A. Clark, Jr. and will drive them in their races at the New England meetings and later on the Grand Circuit.

The row of stalls filled with young Sidney Dillons which Frank Turner has at the Santa Rosa track attract the attention of all visitors to that speed centre. They are grand looking colts and fillies.

Zolock 2:05½ has been bred to about twenty mares since he started at Los Angeles. He is not only the fastest entire son of McKinney, but is considered by many students of pedigree and blood lines to be the best bred.

C. K. G. Billings drove his pacing team Hontas Crook and Prince Direct a quarter of a mile against time at Cleveland track last week and they covered the distance in 29½ seconds. This is the fastest quarter ever paced by a team.

The dam of Belle Mack 2:04½ has foaled a very handsome colt by Rey Direct 2:10. It is a natural pacer. This mare will be bred to Pilot Wilkes this season. Mr. Chas. Master, who owns her, recently lost a full brother to Belle Mack.

For a purse of \$400 offered for the free-for-all pacers at Titusville, Pa., last week, there were five starters. The track is a half mile oval, yet the time of Frank Yoakum, the winner, was 2:05½, 2:06½ and 2:12. The last heat was in the rain.

Colts and fillies entered in the Occident, Stanford and Breeders futurity stakes are to be sold at Colusa on the 9th of August, when Mr. E. C. Peart of that city disposes of his standard bred stallions, mares, geldings and fillies. Here is a chance to buy a future stake winner at your own price.

The Directors of the State Agricultural Society have decided to have all livestock to be entered or raced at the coming State Fair to be examined by Drs. Charles Keane, J. H. McLean, A. M. McCollum, C. L. Megowan and D. F. Fox before permitting them upon the Fair grounds.

Alta McDonald gave Excuse No. 69 from Murray Howe's Excuse Book to account for Sweet Marie's defeat at Philadelphia. This excuse reads "Track did not suit her." McDonald, however, overlooked Murray Howe's foot note which reads "Never use this one when all the heats are better than 2:12."

Fred H. Chase & Co. announce that on or about October 12, 1905, they will sell at auction at Sulsun, fifty head of registered Shortborn bulls and heifers from the prize winning Humboldt Herd, property of Rusb & Pierce. Write to their office, 1732 Market street, San Francisco, for particulars and catalogues.

The three-year-old trotters that start in the Breeders Futurity this year will contest for \$2300, divided 50, 25, 15 and 10 per cent. First money will be \$1150, and if the owner of the winner was the original nominator of the colt he will be paid \$200 additional. The owner of the stallion at the time the colt was bred will get \$100.

"Smoke Stack" won again with Golden Gate when he reached Fremont, Nebraska. The account of the race states that it was a 2:40 trot that he started in. Although the Bay Bird gelding has been pacing in his previous starts this year, he can go either gait and as the best time of the Fremont race was 2:25, the probability is that Brown is starting him in all races to which he is eligible and has a chance to win. Golden Gate's pacing record is 2:13½ made at Denver in June, this year.

"Young man, see what hard work will do. The boy that cared for the roan filly I raced at Gumbo Flats, July 4, has opened a public training stable at Pumpkinville Corners, and already has an even dozen horses in his string. Six weeks ago he didn't know what a 'quarter boot' looked like, but now he is the 'real thing.'—Columbus.

Electro, bay stallion by Sutter 29069, dam the thoroughbred mare Buchu by Buchanan, is a two-year-old of high form and great promise. He is owned by Mr. E. C. Peart of Colusa, is entered in the Stanford and Occident stakes of next year, and will be sold at auction at Colusa next Wednesday with the rest of Mr. Peart's stock.

Zolock will not be entered in the free-for-all pace at the State Fair. All the horsemen conceded it would be a walk over for the great son of McKinney and Henry Delaney shows that he is willing to let others have a chance by keeping Zolock out of the race. Zolock will be driven exhibition miles, however, so the public will have a chance to see him.

Ed Parker who marked Dictatress 2:08½, Rey Direct 2:10 and many other fast ones, has opened a public training stable at Pleasanton and desires a few more horses to train. Mr. Parker is one of the most careful men in the business, knows how to get speed out of colts and teaches them good manners as well as knowing how to gait and balance them. His advertisement appears in our business columns.

Bought a few years ago for \$5 and later sold for \$150, a "scrub" pony broke a world's record in Denver, July 29th, and now his owner would not take \$1500 for him. The world's half-mile mark for polo ponies was broken at the City Park track by Uncle Sam, owned by George C. Wood and ridden by Charles G. Sutton, who weighs 165 pounds. Uncle Sam's time was :52 2-5. The world's record was :52½.

The celebration to be made by the Native Sons at Sacramento during fair week will undoubtedly draw a very large crowd to the Capital City. The exhibit at the pavilion this year will be under the auspices of this order and will consist of displays of the products of the various counties in the State. The Agricultural Society offers \$500 for first prize. Admission to the pavilion will be free during the entire week.

Remember the sale of high-class standard bred stallions, broodmares, geldings and fillies that is to take place Wednesday, August 9th, at Colusa, California. These animals are consigned by Mr. E. C. Peart, the well known merchant and stock breeder of Colusa county, and some very choice young prospects are among them. A lot of sulkies, carts and harness are also to be sold at the same time and place.

Sales of horses in New York and Chicago thus far this year exceed those of the corresponding period last season by about 10,000 head in each city. The increase is remarkable in view of the immense pressure of vast capital to crowd horses out. Motor vehicles are being promoted as an enormous cost to the makers and users, yet opposition to horses only seems to emphasize their utility in all industry and commerce.

The New York Club is expending about \$250,000 in remodeling, or rather, rebuilding, its clubhouse in East Fifty-eighth street. The new riding ring when completed will be a trifle larger than any other in this country, with an area of 18,000 square feet. It is to be 173½ feet long and 104 feet wide. To make room for a high basement stable containing 400 stalls the level of the ring will be raised ten feet above the street.

The directors of the Kings County Agricultural Association held a meeting August 1st, and made many arrangements in regard to the Central California Fair to be held at Hanford in October. There is much enthusiasm in Kings county over the fair this year, and an effort will be made to make it the best fair yet held there. A number of handsome silver cups have already been donated for the live stock department.

The Kings county supervisors have made a valuable discovery in making new roads. After the roadway is thoroughly oiled they cover the oil with straw. This they claim prevents the oil from adhering to the wheels and horses' hoofs, but at the same time allows the vehicles and animals to thoroughly work the oil into the ground, thus making a smooth road way without the usual waste of oil by its being carried off on wheels and horses' hoofs.

Lou Milton, the dam of Lou Dillon 1:58½, etc., has a new representative in the list in her great granddaughter Sally Pointer 2:13½, owned by Mr. J. C. Adams of Phoenix, Arizona. Sally Pointer is by Sky Pointer, own brother to Star Pointer, and her dam is Sister, matinee record 2:20 by McKinney, second dam Aileen 2:26½ by Anteeo, third dam Lou Milton by Milton Medium. Sally Pointer stands 16.2, weighs 1320 pounds and is one of the largest mares on the turf.

John Phippen has a mare with a colt at her side that is a futurity candidate, bred well enough for and looking to have class enough to win first money. The mare is Athene by Dexter Prince, dam Athena by Electioneer, second dam Ashby by Gen. Benton, third dam the thoroughbred mare Ashland by Ashland. The colt was foaled in April this year and is by that great racehorse, Kinney Lou 2:07½, son of McKinney 2:11½. If there isn't race winning blood in this colt, there was never one foaled with it in his veins. McKinney, Dexter Prince, Electioneer and thoroughbred is the combination.

Eighteen horses won heats in 2:10 or better at the Detroit meeting, and still the racing was not considered sensational. The number of 2:10 performers is increasing so fast that unless a trotter or pacer shows he is likely to go two or three beats in that time he is not considered of class enough to race on the Grand Circuit.

The Sonoma County Driving Club has joined the National Trotting Association and will hold all its races according to rule. The first meeting of the new organization will be on Wednesday of next week when a benefit will be tendered to Willard Zibbell, the unfortunate young trainer, so terribly injured in the recent Fresno railroad accident.

The Occidental Hotel at Santa Rosa has been enlarged by a very handsome pressed brick addition containing 100 rooms ensuite and single. There is not an inside room in the building, and all are handsomely furnished, with bath, hot and cold water, electric lights, etc. Messrs. Bain and Quinn, the proprietors, have made The Occidental the finest hotel north of San Francisco. A new electric elevator of the most approved pattern has also been installed. The Occidental will be headquarters for horsemen during the meeting of the Breeders Association which opens August 16th.

Who will win the California Stake, \$2000, at the Breeders Meeting at Santa Rosa? There were 17 original entries, but probably not more than seven or eight will face the starter. On form thus far displayed the race looks to be between Charley T. by Zombro, Oro Belmont and Little Babe. There are several prospective starters, however, that have not made their appearance at the meetings up to this time, that may be "the goods." No one can tell just how fast the race will be trotted, but Morosco's mark of 2:12 last year will probably not be equalled. Field tickets should be in demand when the race is called.

Mr. Chas. Griffiths' great mare, Bon Bon 2:26, was about eighteen years old when she died at Pleasanton in 1903, but as Macbeth said of Lady Macbeth, "she should have died hereafter." Word comes from the East that Bon Bon's colt, Rector by Rect 2:16½, took a pacing record of 2:10½ at Saugus two weeks ago, giving her three standard performers, the other two being Bonnie Direct 2:05½ and Bonsilene 2:14½. Rector's sire, Rect, is by Direct 2:05½, out of Lilly Stanley 2:17½. Bonnie Steinway, son of Steinway and Bon Bon will be another 2:10 performer to be added to the list soon, as he worked a mile in 2:08 at Pleasanton a few weeks ago. Bon Bon's family is destined to be one of the great ones within a few years.

Mr. E. E. Smathers, who deserted the trotters a couple of seasons ago and put a great stable of running horses together, has made arrangements with the Fasig-Tipton company to dispose at public auction of his entire racing string. Mr. Smathers has been unfortunate in his running venture, it being said that he has lost during the past two seasons \$450,000, outside of the expense of the stable. Mr. Smathers does not say that he will again put together a stable of trotters, but says he will quit the runners for a time, anyway. When he went over to the runners he disposed of one of the greatest stables of light harness horse ever put together by an amateur driver. Among them was Major Delmar, the champion trotting gelding and winner of the famous Memphis Gold Cup.

A correspondent who was at the Alameda track last Sunday sends us the following account of a race held there that day. The race was a match for \$100 a side, made by the well-known and popular road drivers, W. Grondola and Louie Tesio, the former starting Lady May, and the latter Gypsy. The race was won by Lady May in straight beats after one of the best contested races ever seen in Alameda county. Great interest was taken in the race as the principals are both popular members of the Oakland Driving Club. A large crowd, estimated at 2000 people, saw the sport, many ladies being present. Much money changed hands, favoritism being evenly divided. The judges were the well-known and efficient horsemen, A. G. Andrews, Harold D. McGill and George Rafetta. L. Jackson, the old-time driver, acted as starter. The race was conducted in a most satisfactory manner, the heats being fairly and honestly trotted and the officials receiving high praise on their prompt and fair decisions.

Jos. Cuicello, the well-known trainer, was the victim of a peculiar accident last Tuesday evening while on the ferry steamer Tiburon as she was making her landing at Tiburon. The steamer was just rounding into the slip when her forward steering-rod broke. She was headed straight for the dolphin on the other side of the slip at the moment, and when the accident occurred continued her course and jammed her nose into the dolphin. The force of the impact snapped the flagpole on her forward end, and a piece fifteen feet long fell to the deck below. Cuicello and another passenger for Santa Rosa were struck down by the piece, and as a result will bear ugly scalp wounds for some time to come. Both men received immediate treatment at the hands of Army Surgeon Cummings, who is stationed at Angel Island, and who was on the boat at the time. While their injuries were being attended, both men missed the last train for their homes in Santa Rosa. President Foster stayed with them and offered to send them to Santa Rosa on a special train, but this offer was declined, the men saying that they were all right and could spend the evening in Tiburon as well as not. Cuicello might have escaped without injury, but he saw that a lady in front of him was directly in line of the descending flagpole, and jumped forward in an effort to keep it from hitting her.

May Earl, a handsome four-year-old mare is the most talked about animal at the Lexington track. The *Stock Farm* says she is a four-year-old bay mare by San Mateo 2:13½ (son of Simmons 2:28), dam Annie Earl by Earlmont. In her three-year-old form in 1904 she trotted a trial mile in 2:10½, caught by a dozen watches, and a few days ago stepped the full length of the Lexington fair grounds track in 2:09½, driven by Mike Bowerman. In working this mile May Earl trotted the last half in 1:04½, and the last quarter in 31½ seconds. Twenty minutes later she was driven a mile in about 2:12, it being her fourth mile that day. No other four-year-old trotter has ever equalled this work over the Lexington track in July. May Earl possesses a pure gait and trots on her own courage. She is owned by John B. Stewart, who also owns her two-year-old full sister, a good gaited filly that has already beaten 2:30 in her work.

Guy Fortune has been retired from the racing ranks and from now out he will shine in the show ring instead of on the trotting track, says an exchange. This handsome chestnut stallion has a trotting record of 2:11½, and Scott Hudson was of the opinion that he was destined for a record of 2:06. When Hudson broke up his racing stable Guy Fortune was sent to Ed Geers but the latter did not have a chance to get acquainted with the trotter before he was purchased by Lawrence Jones of Louisville. The latter thinks that Guy Fortune will make the fastest high stepper in the world. He has lots of action forward and back and he will need but a few lessons in order to shine in his new role. Guy Fortune is but another illustration of the fact that the American trotter is the greatest all-round trotter in the world. Many of the best blue ribbon winners in the high stepping show ring classes have been trotters with records. Unfortunately for the breeders these horses have too often lost their identity when converted into high steppers, and not infrequently the hackney has been accorded the credit which rightfully belonged to the trotter. Horse show enthusiasts when proclaiming that the trotter is merely a slashed speed marvel should be reminded of the facts in the case. Speed and beauty go hand and hand with the up-to-date breeder.

The very fast pacing mare, Little Squaw 2:04½, has joined the double-gaited record brigade. She started as a trotter recently at Nevada, Missouri, and won the race easily, getting a mark of 2:22½.

Dan Patch 1:56 has made his start as a sire. Sailor 2:17½, a winner in the Gas Belt Circuit, is by the champion.

On the opening day of the Windsor meeting, George Ketchum of Toledo, owner of Cresceus, purchased for George McMillan, Calgary, Northwest Territory, the sensational pacer Gallagher 2:03½, at a price reported to be in the neighborhood of \$10,000. Gallagher will be shipped to England, where he will be raced in the stable of Walter Winans.

The Canadian Ice Racing Circuit for next winter has been organized and an effort will be made to conduct the racing on the same lines as the regular summer meetings are conducted. The circuit members and dates are: Toronto, December 27th to 28th; Orillia, January 3d to 4th; Port Parry, January 9th to 10th; Lindsay, January 13th to 14th; Peterborough, January 19th to 20th; Port Hope, January 26th to 27th; Picton, January 31st to February 1st; Belleville, February 3d to 4th; Kingston, February 8th to 9th. Ottawa and Montreal will follow with meetings of longer duration.

Ellamore, three-year-old record 2:29½ by Baronmore, is one of the most attractive mares driven on the New York speedway, and at a matinee there last week trotted a heat in 2:22½. Her second dam is Echora 2:23½, the dam of Direct 2:05½.

"Marque" says a very curious feature of the three-heat plan in vogue at Detroit is the fact that a horse can win two heats of a race, thus getting two-thirds of first money and by being shut out in the third heat lose the race and with it the pool money. If a driver has an incentive to cheat this plan puts a marked pack of cards in his hands and encourages him to use it. It's a case of getting the money coming and going. For instance: A is sold favorite for the race and, after winning the first heat, is a more pronounced favorite than ever. His managers buy all the fields against him but play him in the books to win the second heat. He wins the second heat and then his managers find it possible to buy the field against him for a song. He makes a break and gets shut out in the third heat, thus making it impossible, under the conditions of the race, to win the money bet on the result of the race. The consequence is that he has won two-thirds of first money; won all the money bet on him to win the first and second heats and yet has lost the race.

Chas. C. Woodmansce, aged 30 years, son of the well-known Minneapolis horseman, Daniel W. Woodmansce, fell from a wharf at San Diego last Sunday while fishing, and was drowned.

Mr. A. B. Spreckols is in New York, where on the 30th inst. his annual consignment of thoroughbred yearlings from his Napa Stock Farm will be sold at public auction by the Fasig-Tipton Company. There are eighteen head in this consignment by imported Solitaire II and Marius II, and several others by imported Crighton, imported The Judge, imported St. Symphorien and the well known horse Libertine. While last year's consignment from this farm was an especially fine lot of yearlings, the youngsters that Superintendent Geo. W. Berry will take over this year are said by those who have seen them to be the best and highest class lot of yearlings ever bred on a California Stock Farm.

Angle, the winner of the Merchants' and Manufacturers' Stake at Detroit, was bred in Lexington by Dr. O. J. Phelps. Her wonderful performance again repudiates the often advanced theory that the first foal will be worthless. Angle is the first foal of Lena Rivers, by Gambonits, a son of Gambetta Wilkes. Lena Rivers did not race, but was one of the most beautiful show and buggy mares ever seen around Lexington. She also had a world of speed, for her owner, Dr. Phelps, has often been heard to say that Lena Rivers could step a mile to a buggy along the turnpike from 2:27 to 2:30. Angle is by Axtell, one of the highest priced trotting stallions ever sold. She was developed at the Kentucky Trotting Horse Breeders Association track in the hands of Mike and George Bowerman and later in the hands of W. F. Freeman. She was bought from Bowerman Bros. by Mr. Freeman the summer she was a three-year-old for a short price. Later in the year she worked a mile in 2:15, the half in 1:03½ and the quarter in 30½ seconds. As a four-year-old she worked a mile in 2:10 and behind the wind shield a mile in 2:06½. The fall Angle was a four-year-old Mr. Freeman sold her to Calvin Morris, of Cleveland, for \$15,000.—*Kentucky Farmer*.

There is sometimes a great difference between theory and fact. According to the trotting instinct theorists the world's record-breaking trotters of today should be those which inherit the most trotting instinct and the least running blood, through the near ancestors of both sire and dam. There are thousands of trotting stallions whose dams were much more strongly bred in trotting lines than was the dam of Sidney Dillon, yet he sired the world's champion trotter, Lou Dillon 1:58½. There were thousands whose dams had much more trotting inheritance than did the dam of Directum 2:05½, yet he holds the world's champion record for four-year-old trotters. Speed ability is just as essential to record-breaking trotters as is trotting instinct.—*American Horse Breeder*.

With the fad for automobiles at high-water mark it is rather surprising that the carriage builders of New York should be experiencing one of the best summer seasons they have known in five years. Such is the report from nearly every house in the trade, however. As showing the improvement in business since last year one of the oldest builders of high-grade work in New York says their deliveries to July 15 were only 12 short of the entire number of carriages sold by them in 1904. Not only is the demand for carriages healthy, but the sales of horses in New York and Chicago thus far this year exceed those of the corresponding period last season by about 10,000 head in each city. The increase is remarkable in view of the immense pressure of vast capital to crowd horses out. Motor vehicles are being promoted at enormous cost to the makers and users, yet opposition to horses only seems to emphasize their utility in all industry and commerce.—*New York Herald*.

One of the three-year-old trotters being talked about at Cleveland is Carrie McKerron, a daughter of John A. McKerron 2:04½ and Carrie Onward 2:14½.

The show horse and the speed horse are not so far apart as some imagine, especially if they are bred in trotting lines. Some time ago John Stewart, the dealer of Lexington, Ky., bought for show purposes a very handsome bay horse by Bow Bells 2:19½, dam Bolle Cassett 2:13½, and a few days ago it was discovered that in addition to being a show horse and a high actor he is also gifted with speed. The first time he was asked to trot a mile he turned the trick in 2:50; the second time in 2:40, and the third time he stepped the distance in 2:28½, the last quarter in 35 seconds.

The Japanese government, through B. Hirosawa and T. Hayashi of Tokio, and H. Mural of London, have closed a deal in this country for stock valued at \$110,000, and the horses will go forward on their long journey to the Island Empire about August 1st, starting from the Ideal Stock Farm at East Aurora, writes Frank B. Smith in *Horse World*. The purchase includes 17 thoroughbred racers, 11 trotting-bred stallions, 2 hackney fillies and 4 hackney stallions. The 34 animals thus averaged about \$3235 apiece, and the sale is regarded as one of the most important transactions in the history of the breeding industry. Superintendent John Bradburn of the Ideal Stock Farm conducted the negotiations for the sellers, while the Japanese had the invaluable experience of John Mackay, manager of the famous El Paso Stable of J. B. Haggin, in their selections, beside a veterinary surgeon. The animals will go from Buffalo to the Pacific Coast in three special cars on an express train schedule. Three careful trainers will be in charge and when the long voyage over the Pacific is begun, they will accompany the horses until they are delivered in Japan, when they will return home. Their expenses both ways and the usual rate of wages, will be paid by the Mikado's government, in order that the horses may arrive in their new homes in the best possible condition. The deal was facilitated by the fact that the Ideal Farm was formerly known as the Village Farm, and some four years ago the Hamlins sold the Japanese a carload of horses which proved so satisfactory that they sought another and a larger consignment from the same breeders. It is believed that when the price paid for the animals is added to the amounts expended in bringing them to Japan, and the disbursements for wages and expenses are also included, that the total cost of each animal will far exceed that of any other similar purchase ever made for a foreign government. Mr. Hirosawa, who has been in Buffalo for several weeks, is authority for the statement that the animals will be used solely to improve the breed of the native horses, and that there will be other purchases made in the United States, but no more in the vicinity of Buffalo. The three representatives of Japan will now journey to Europe, and attend the convention of veterinary surgeons held at Buda Pesth in August.

A Great Mile for Derbertha.

PLEASANTON, July 23, 1905.

One of the greatest miles ever seen at the Pleasanton race track was driven by Farmer Bunch behind Derbertha, full sister to Don Derby 2:04½, Diablo 2:09½, Oywho 2:09½, etc. The Farmer had noised it around that he could drive her a mile in 2:10 or better. There were a few that doubted it so the Farmer said he would show them, so quite a crowd assembled at the Judge's stand to watch the performance. I will give you the miles just as she paced them. The mare was brought on the track and warmed up a mile in 2:30, the second mile was in 2:24, last half in 1:08, the third mile was in 2:19, the last half in 1:04, last quarter in 30 seconds. The Farmer then told the boys he would be ready in twenty minutes to make the trial. A runner was brought out this time and after scoring three or four times they were given the word. Derbertha paced the first quarter in 33 seconds, the half in 1:05½ and the three-quarters in 1:38½. In coming in to the stretch she made a disastrous break and finished the mile in 2:12½. Every body thought Bunch wouldn't try again but the Farmer said he would be back in twenty minutes so all waited. Hardly any thought she would go in 2:10 let alone beating it. She scored two or three times and was given the word. She went the first quarter in 32 seconds, to the half in 1:04, three quarters in 1:36½ and the mile in 2:07½.

The mile was timed by Mr. Griffith, Dr. Boucher, George A. Kelley, Mr. Ronan, Billy De Ryder and several others, so there is no mistake but what the time is correct. Some had it a little faster. This equals the track record held by Anaconda and Searchlight. Searchlight was driven by the late Thomas Keating and Anaconda was driven by the late Johnny Blue, and both horses had records better than 2:05 when they did it, and it was done in the winter time, when the track is supposed to be faster than it is now. Last year on the 27th of July at our race meeting, Billy Red paced the fastest mile of the meeting 2:12½, and Tom Carneal took a record of 2:13. They went to Santa Rosa and Billy Red forced Tom Carneal to pace in 2:08½ his present record and Billy Red took a record of 2:10. So you see that the Pleasanton track is not the fastest track in the summer time. Everybody agreed that if Derbertha was taken to Santa Rosa and started that she would go a mile in 2:05 or better. Derbertha wears no rigging of any kind, goes with a low head, wears a 10-ounce shoe in front and 6½-ounces behind, a pair of heel boots in front and coronet boots behind. She is six years old and about 15.2 hands high, will weigh about 1075, in color is a dark chestnut. A lady can drive her any place. She is the property of Robert Niles, of Eureka, Humboldt county. She is the first purchase he ever made in the race horse line and he is to be congratulated on owning such a great mare. Mr. Niles also owns the dam of Lady Waldstein and she is the dam of that sensational pacing colt at Los Angeles which paced a mile in 2:07½ last year. He is by a son of Direct. I heard Mr. Salisbury say if they would drive him a mile that fast and let him time him, he would give \$10,000 for him. Mr. Niles owns a full sister and full brother to Lady Waldstein, and a filly by Lecco 2:09½ out of the old mare, so it looks like he was starting in the business in the right way. Mr. Niles expects to race Derbertha down the Grand Circuit next year and I hope she will be another Sweet Marie, and she surely looks it now. She will be given slow work for a while and then let up on until next winter when she will be prepared for the big events over East.

RAIL BIRD.

What They Think of the Breeders Ass'n.

The following is from an editorial in the *Fresno Democrat*: Fresno enjoyed last week four days of extraordinary and honest horse racing. That race meet of the Pacific Coast Trotting Horse Breeders' Association with its results attracted the notice of horsemen all over the country and therefore it proved one of the best advertisements that Fresno could possibly have had. But aside from this consideration, there was another feature which has not been given the public notice it deserves. That is that some of the best California bred race horses were assembled for the Fresno meet, that extraordinary good racing was the result with fast time and broken track records; that every horse entered in a race was run for all the speed that was in him and that the sport was conducted by gentlemen in a gentlemanly fashion for the entertainment of gentlemen and ladies and unattended by the gambling accompaniments, which unfortunately have done so much to bring the turf into disrepute. The Pacific Coast Trotting Horse Breeders' Association is one factor to elevate honest horse racing as a sport fit for kings and to Fresno, which last week it visited for the second time in its career, it will ever be welcome.

SWEET MARIE 2:04 3-4

Owned by Wm Garland of Los Angeles. Driven by Alta McDonald of New York.

Sweet Marie Beats Tiverton.

"Money makes the mare go," according to the old proverb, and perhaps Sweet Marie will not do her level best unless the money is at the wire. At Philadelphia two weeks ago when she and Tiverton met, they raced for a share of the gate receipts. There was not a very large crowd present and Sweet Marie refused to trot her best, making disastrous breaks in every heat. Like a petted prima donna that refuses to warble her best notes to a small house, Sweet Marie perhaps took a look at the grand stand and concluded that she would not show her fastest gait for such a small return, and let Tiverton walk away with the race while she indulged in a few "jimmies" and objected to being driven so hard for such a small sum.

There was \$5000 up at Readville Thursday, however, and McKinney's daughter shook her locks, cast her eye at the big bag of gold and says "Here's where I will show you whether Tiverton can beat me a two-in-three or any other old race." So she went at him the first heat and made his driver hustle to beat her half a length. In the second heat she began to trot her best a little sooner and when the stretch was reached she had Tiverton extended to his utmost and beat him a neck. He was tired then, and when she collared him on the third heat, Tiverton was game as a pebble but at the distance post was "all in" and she jogged to the wire a length in front of him. We will let the Associated Press tell the story of the race.

READVILLE, MASS., Aug. 3—California and New York met today at Readville track, and when the contest of the speed ended the honors were awarded to the Pacific slope. In one of the finest speed contests ever seen on any race course, Sweet Marie defeated Tiverton two out of three heats, thereby winning for her owner, William Garland, of Los Angeles, a purse of \$5000.

It was 2:30 when Alta McDonald, behind Sweet Marie, and John Howell with Tiverton, appeared for the first heat, the latter getting the pole on the toss. After two preliminary scores all was in readiness, and the first time down they got the word, with Tiverton a saddle length in the lead. This advantage he increased until he swung down the stretch for home, when Sweet Marie reached his wheel, but the gelding won handily by half a length. Sweet Marie was under a hard drive. The time 2:05½ was the trotting record of the year, beating that of Dr. Strong at Detroit last week by half a second.

In the second heat, McDonald had Sweet Marie right on her stride and went away with Tiverton at a whirlwind gait. For a few strides the mare showed in front and then the gelding forged ahead, leading at the quarter by a length. This time McDonald made his drive earlier, reaching Tiverton at the three-quarters. From there to the wire was witnessed one of the most desperate finishes ever seen on a track. The 6000 spectators in the grandstand were aroused to the highest pitch of excitement, and when Sweet Marie flashed under the wire a winner by a neck the applause was deafening and continued until the driver had dismounted and weighed in. Time—2:04½.

In the third and final heat Tiverton rushed to the front, but Sweet Marie yoked him on the lower turn Howell pushed Tiverton to the distance post. Then he realized that he was beaten and considerably eased his horse, the mare jogging home a winner by an open length. Time—2:06½.

The time of the three heats was, with the exception of the Cresceus-The Abbot race at Brighton Beach, the fastest ever trotted. In the opinion of experienced horsemen the time made today was superior, as The Abbot was withdrawn after the second heat and Cresceus went the mile accompanied by a runner for a pacemaker. Summary:

Match race, trotting, purse \$5000.				
Sweet Marie, b m by McKinney.....	(McDonald)	2	1	1
Tiverton, b g by Galileo Rex.....	(Howell)	1	2	2
Time by quarters—				
First heat.....	1:03¾	1:34¾	2:05¾	
Second heat.....	1:02¾	1:33¾	2:04¾	
Third heat.....	1:03¾	1:34¾	2:06¾	

How the Rivals Are Rigged.

Rigged for her races Sweet Marie will pull a 29-pound Flower City sulky painted white with gold stripes—the Garland colors. She will wear knee, shin and quarter boots front, shin and coronet scalpers behind, with eight-ounce shoes front and 4½ plates behind, with a two-ounce toe weight. All her traps are white-and-gold striped.

Tiverton wears nearly all the traps used for a trotter. On his front legs he is rigged with knee, front shin, arm and quarter boots, behind with shin, coronet, scalpers and hock boots. He wears nine-ounce shoes front, with a three-ounce toe weight and six-ounce shoe behind. He will pull a 32-pound Decker sulky. He is also rigged with a Tiverton rod and tongue strap.

Frank Upton, who went down the line with Major

Delmar 1:59½, has charge of Sweet Marie, assisted by Ed Brown, alias Tug Wilson. George Wenlock is looking after Tiverton. He formerly had charge of Louise Mc. 2:09½, Senator Mills 2:12½ and Eddie Lockwood's string.—*Horse Review*.

Winners of the Two Big Stakes.

George Saunders is the fifteenth driver to win the M. & M. The following is a complete list of the drivers who have won this classic in the order named:

H. A. Hills, with Hendryx 2:18½; Bob Stewart, with Walter E. 2:18½; George Spear, with Temple Bar 2:17½; John Pickett, with Nightingale 2:17½; John Goldsmith, with Siva 2:13½; Robert J. Brawley, with J. M. D. 2:15½; J. C. Chandler and Ed. F. Geers, with The Corporal 2:13½; Joe Rea, with Emma Offut 2:12½; W. O. Foote, with Rllma 2:11½; John Kelly, with Directum Kelly 2:11½; George Spear, with Royal Baron 2:10½; Ed. F. Geers, with Lady Geraldine 2:14½; Tom Marsh, with Eleata 2:08½; Scott Hudson, with Rhythmic 2:11½; Dick Wilson, with John Taylor 2:10½; Ed. F. Geers, with Stanley Dillon 2:11½; George Saunders, with Angle, best time, 2:10½; best time for winner, 2:11.

It will be seen by the above record, running from 1889 to include 1905, a period of sixteen years of marvelous speed development, that 2:10 has only been beaten once.

The following list of winners for the last ten years of the C. of C. may also be of interest:

George Starr, with Planet 2:12; D. Raybould, with Milton S. 2:08½; D. Wilson, with Split Silk 2:08½; H. Sanders, with Sbade On 2:09; M. E. McHenry, with Bonnie Direct 2:10½; Ed. Lockwood, with Star Pugh 2:09½; Ed. Geers, with Direct Hal 2:06½; John Hussey, Elastic Pointer 2:07½; Ed. Geers, with Baron Grattan 2:06½; Ed. Geers, with Walter Direct 2:05½.

How to Cure Distemper, Coughs, Etc.

Our readers who have ever had an epidemic of distemper among horses will realize that a remedy that both prevents and cures the disease is invaluable. The experience of thousands of practical horsemen has proved that there is such a remedy, and this is fortified by the positive guarantee of the manufacturers to refund the money if the remedy fails. We ask our readers to peruse the advertisement of Craft's Distemper and Cough Cure in this issue, not only because knowledge of the remedy may save their stock, but also because they ought to send for the pamphlet offered free, entitled "Veterinary Pointers." It gives valuable general information and explains how epidemic and catarrhal diseases of stock, etc., may be easily cured. Write the Walla Walla Medicine Co., 13 Third St., Lafayette, Ind., for it.

Jackson's Napa Soda does not tangle the feet.

GRAND CIRCUIT IN BAD SHAPE.

Rain Spoils Close of Detroit Meeting and Cleveland Declares Its Races Off.

The last two days of the Detroit Grand Circuit meeting gave promise of some very high-class racing, but a heavy rainstorm upset all calculations on Friday, necessitating the postponement of the finish of several events until Saturday, when a continuation of the downpour compelled the association to declare all races finished as they stood with the exception of the M. & M. Consolation Stake which was by unanimous consent postponed until Monday at the Cleveland track.

Just before the races were to begin at Cleveland, on Monday, Mayor Tom Johnson issued a proclamation stating that pool selling would not be permitted at the track. This announcement, coming at the last moment, created consternation among horsemen and the members of the Cleveland Driving Park Association. At the meeting of the Grand Circuit last year pool selling was prevented by the authorities at Glenville with a resulting great loss to the Driving Park Association. When Glenville was annexed to Cleveland it was hoped that pool selling would be permitted, although no announcement to that effect could be obtained from Mayor Johnson.

Early on Monday, Chief Kohler of the local Police Department, acting under direction of Mayor Johnson, called upon Secretary Dietrich of the Driving Park Association and informed him that pool selling would not be permitted. A meeting of the officers of

the pacer's position, being second in the two remaining heats.

The 2:11 pace was the last race of the day, first money going to the East View Farm mare Josie, who barely saved her distance in the first heat by phenomenal speed after making a bad break going round the first turn. The summaries:

Trotting, 2:15 class, purse \$1500.

Norman B., blk g by Phalias, dam by Swinger (McCarthy).....	3 1	
Brownie Wilton, b h.....	(Saunders)	2 3
Time—2:12, 2:12¼.		

Wild Horses May Be Shot in Colorado.

Stockmen of Routt and Rio Blanco counties, in the Western part of Colorado, for several years have been trying to get rid of a big band of wild horses that inhabit the extreme northwestern part of the State and are the cause of endless trouble, says the *Denver Record-Stockman*. It is claimed that there are at least 4000 head in the numerous bands that roam that section, and every horse that once gets loose adds to the number. It is claimed that mares often break away from fenced pastures when the call of the wild comes from the stallion leading one of these bands, and once they get in one of these wild bunches they are hopelessly lost and become as wild as the worst of them.

Efforts to round up these horses have resulted in a few hundred being captured, but it is claimed the herds are increasing notwithstanding these efforts. A number of big stockmen in the western part of the State have had so many losses that they are openly advocating that these wild horses be killed off and that a hunt be organized to have them shot, as the only practicable method of ridding that section of this constant menace. Indeed, it is claimed that several outfits have already instructed their men to shoot these horses wherever found. The new stock association organized at Hayden last week has under consideration the matter of asking the State board of stock inspection commissioners for permission to organize a general hunt to wage a war of extermination on these animals. Speaking of the matter, Mr. McCrillis, secretary of the board, said:

"While the board would be very glad to see these wild horses captured or destroyed, they would naturally hesitate about giving such a wild license to slaughter them for fear that it might be the cause of other horses being shot. There is one plan, however, that might produce results, and that is to kill off the stallions. These wild horses are divided into small bands of mares, each led by a stallion. If the stallions could be killed off I believe that the mares could be rounded up more readily and as breeding would thus be stopped to a large extent, there would be a chance to soon get rid of the nuisance. I believe the board would be willing to grant that much of authority at least."

It is probable that the matter will be brought to the official attention of the board very shortly.

Peter C. Kellogg Dead.

Peter C. Kellogg, known all over the United States as an auctioneer of trotting bred horses and Jersey cattle, and to every reader of journals devoted to live stock breeding by his *nom de plume* of "Hark Comstock," died at his summer home, Montclair, New Jersey, July 24th, aged 64 years. Peter C. Kellogg was one of the greatest writers on the breeding of harness horses that ever wielded a pen. He wrote common sense instead of theory and had the ability to "hold fast that which is good" and discard everything else in the way of evidence.

He was the originator of combination sales of fine horses, introducing the system among breeders in New York about thirty years ago, when he conducted an auction in which A. B. Darling, of the Fifth Avenue Hotel, received \$10,000 for the trotting stallion, Kentucky Prince. Mr. Kellogg in the ensuing fifteen years sold trotters aggregating in value several millions of dollars. He obtained from E. H. Harriman a bid of \$41,000 for Stamboul, from Marcus Daly a bid of \$26,000 for Mascot, an untired two-year-old trotter, and from J. H. Shultz a bid of \$8500 for Baron Rose, a yearling trotter. Commissions on his sales made Mr. Kellogg wealthy.

The death of Peter C. Kellogg is a distinct loss to the entire country and particularly to turf journalism,

ZEPHYR 2:11 by ZOMBRO

Winner at Windsor and Detroit

the association was immediately called, and it was decided to finish the Merchants and Manufacturers Consolation race, which was unfinished at Detroit, and then abandon the meeting. This was done and all gate admission fees were refunded, together with the entrance fees of horsemen. It was at first intended to transfer the races to Buffalo, but telegraph inquiry revealed the fact that Buffalo would not permit the transfer because of interference with the regular race week there. The horsemen, therefore, scattered, some of them going to Buffalo and elsewhere, and some of them remaining at Glenville to work out.

THURSDAY AT DETROIT.

The first race on the program was the 2:15 trot, for which eleven horses scored for the word. Glenwood M., a brown horse by Bobby Burns, was the favorite in this event, and won all the way in each of the three heats, although Geers made the hottest kind of a drive with Turley at the finish of every mile and was second in each heat. The time was fast, and the race stamps Glenwood M. as a good one that will be able to give some of the 2:06 trotters a race a little later in the season.

The Chamber of Commerce Consolation, with five starters, went to Hal C., who won the first two heats, Bonnie Wilkes getting the third. Ben Walker drove Albuta in the first heat of this race, but the judges did not like the way he handled the gelding and took him out the sulky, substituting Curry, who improved

shower prevented any more racing and the final heats of these races went over. Two of the fields were small but the 2:06 pace furnished excitement enough for two days' racing. In the opening heat of this race Hazel Patch piloted a bunch of fast ones to the distance stand, with Baron Gratton and Winfield Stratton alternating in forcing the pace. Right in front of the stand Hazel Patch swerved a little and Stratton won by inches only, with Baron almost even with Hazel. A bad drive of Lang, behind Ecstasies, called for the attention of the judges, and they declared all bets off. The second heat was a wonderful race all the way, heads separating the four in front. Baron Gratton won by one stride over Riley B., while the rest of the bunch were in almost a straight line across the track at Riley's neck. It was the best finish of the meeting.

The M. and M. Consolation saw Getaway, a bad performer, as favorite. He broke twice badly, but made a bruising finish with Miss-in-Law. In the second heat Miss-in-Law led all the way by an open length, Getaway breaking so badly that he narrowly escaped the flag.

The first heat of the 2:10 trot was easy for Zephyr, and the second heat was equally easy for Norman B., owing to Zephyr's bad break.

NO RACING SATURDAY.

Rain fell again on Saturday, preventing any racing whatever and the association decided to settle the 2:06 pace and 2:10 trot according to the standing of the horses the day before. The finish of the Consolation

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

Coming Events.

Rod.

April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.
April 1-Sept. 15—Closed season for lobsters and crawfish.
April 1-Nov. 1—Trout season open.
June 1-Jan. 1—Open season for black bass.
Aug. 26—Saturday Fly-Casting Contest No. 10. Stow lake, 2:30 p. m.
Aug. 27—Sunday Fly Casting Contest No. 10. Stow lake, 10 a. m.
Sept. 10-Oct. 16—Close season in tidewater for steelhead.
Sept. 10-Oct. 16—Close season for catching salmon.
Oct. 16-Nov. 15—Close season for taking salmon above tide water.
Nov. 1-Sept. 1—Open season for crabs.
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

Feb. 15-Sept. 1—Closed season for mountain quail, grouse and sage hen.
Feb. 15-Oct. 15—Closed season for quail, ducks, etc.
April 1-Oct. 15—Close season for English snipe.
July 1-Feb. 15—Dove season open.
Aug. 1-Oct. 15—Deer season open.
Aug. —Sebastopol Gun Club. Blue rocks. Every Sunday.

Dec. 12—Eastern Field Trial Club. Waynesboro, Ga. S. C. Bradley, Secretary, Fairfield, Conn.

1906.

Jan.—Pacific Coast Field Trials Club, 23d annual trials. Bakersfield, Cal. Albert Betz, Secretary, 201 Parrott Bldg., San Francisco.

Steelhead are about due in the Sequel and many anglers who have had the pleasure of fishing in that Santa Cruz stream know what is in store for them.

Ballard's lake black bass fishing is still worth a trip to Olivette.

San Francisco Fly-Casting Club.

Southwest wind and foggy weather conditions prevailed at Stow lake during the two days' fly-casting in contest No. 9 of the San Francisco Fly-Casting Club.

On Saturday the degree of skillful rod and line work resulting will be readily understood where the average percentage of every contestant save two—one of them a new member—was over 90 per cent in each event excepting long distance. In the long distance casting, while the results were excellent practically, the wind was a handicap on the usual long casts of from 100 to 120, or more feet. This event, while it is a great developer for work on a trout stream, is not of the importance of the accuracy and delicacy casting. In the latter events the rodsters vie with each other in placing the barbless red fly close to the anchored buoys gently and without splash of line or leader.

This is the work that tells on the stream when casting for a rise and strike by big trout. To place the artificial lure just over a likely place or near a fish, softly and without disturbing the surface of the water, and with line and leader straight and ready for proper work with the reel is the ultimate ambition of every trout angler.

In the lure casting event, where the rod wielders used a half-ounce rubber frog and cast at different buoys from sixty to one hundred feet distant, the contestants were in championship form. C. G. Young in five casts scored 98 1-15 per cent, Walter D. Mansfield and T. C. Kierulff 98 per cent each, and Colonel G. C. Edwards over 96 per cent. In back scores both Young and Kierulff exceeded the above percentages. This style of casting—halt casting it is—is in vogue for black bass fishing principally.

Sunday's long distance work, while not up to the average by reason of the wind, was better than on the preceding day. A remarkable improvement is noticeable in the accuracy casting of Mr. Kierulff, who scored 97 per cent. Messrs. Mansfield, C. R. Kenniff and Lane made top notch scores in the delicacy event. The showing of Mr. H. B. Sperry is almost phenomenal for a contestant of one season's experience at the lakeside.

SATURDAY CONTEST No. 9, Class Series. Stow Lake, July 29, 1905. Wind southwest. Weather, foggy. Judges, Mr. Geo. W. Lane and Mr. T. C. Kierulff; referee, Mr. F. H. Reed; clerk, Mr. A. Craig.

NOTE: Event 1—Distance Casting, feet. Event 2—Accuracy percentage. Event 3—Delicacy, (a) accuracy percentage (b) delicacy percentage; (c) net percentage. Event 4—Lure casting percentage.

The fractions in lure casting are 15ths.

An immense fish, resembling a monster rockcod in shape and darker in color, but many times as large, was caught in Monterey bay, near Santa Cruz, on Wednesday morning. The fish weighed 310 pounds and has a mouth large enough to swallow a good-sized boy. It was caught by Louis Beverino, an Italian fisherman. Local fishermen call it a jewfish, and say that it is many years since one of the species has been seen on that part of the Coast. This variety of fish is frequently caught at Catalina island. It was the center of many curious spectators on the beach where it was placed on exhibition.

Over five hundred salmon were landed one day recently by Santa Cruz fishing boats.

Santa Cruz Salmon Fishing.

Notwithstanding that the run of salmon up to the present time in Monterey bay has been phenomenal, and that excellent catches are being made every day, the San Jose dailies printed an article deprecating the salmon fishing near Santa Cruz that aroused the ire, and justly so, of public spirited Santa Cruz citizens.

In reply to the following paragraph, introductory to a letter from discouraged or unskillful fishermen: "Santa Cruz is undergoing a lull in the run of salmon. The fish have failed the angler pretty regularly for the past week, and local lovers of the sport, who are returning from the Surf City, bring rather discouraging reports."

The *Sentinel* states: One swallow does not make a summer, neither does the failure of the San Jose anglers to catch but one salmon warrant the *Mercury-Herald* in stating that "local lovers of the sport * * * bring rather discouraging reports."

Manager Fred W. Swanton of the Casino is indignant that such reports should be spread by such reputable papers as the *Mercury* and *Herald*. He said recently, "Why that is sheer nonsense. C. G. H. McBride, the San Jose capitalist, came in only this morning with 15 big salmon, a party of Denver ladies and gentlemen got 37 good ones, and Captain Jackson returned from the morning's outing with no less than 45. Uhden's launch got 42 and Miss Ethel Hsger of San Francisco got 20, one of them weighing 30 pounds, and—well, is that enough?" The *Sentinel* man thought it was plenty and suggested that perhaps Mr. Donnelly's launch got over among the sea orange groves, or the forest of horse's tails and sea ferns, which the glass bottomed boat has just discovered near Light-house point. Who knows? At any rate, it would be advisable for the San Jose men to see Mr. Swanton about the best fishing grounds, if they want to catch fish and not seaweed."

We learn from Dr. F. B. A. Lewis of San Jose, whose cottage is across the river at Santa Cruz and who goes out two or three times each week during the salmon season, that while the fish have been plentiful in the bay this year they have been unusually erratic. Generally, after a few days' skrimishing about, they settle in some one locality, where they may be found within certain limits and where the launches are able to find them each day. The season, thus far, has been somewhat different; they are in one place today and in another tomorrow. On the 5th of July Dr. Lewis, with the boatmen of a launch, in six hours landed 104 fine salmon, beside other fish. On the 7th the doctor got 20, and so this number is constantly changing, which accounts for the contradictory reports in the newspapers.

Without doubt the variations of temperature of the present season, together with the influences upon the constantly moving bait, regulate the catches of each day. One thing can be said and that is, there is no more royal sport for a rod and reel fisherman than in that vicinity, and at almost any time in the summer. One expert fisherman, who resides in Boston but tries the waters of all the States where good sport is to be had, said to Dr. Lewis, with whom he fished last season, that if Eastern men believed that such fishing for salmon in the open sea was to be had there, there would be scores who would cross the country to have a hand in it. Possibly people expect too much—a half-dozen fine salmon in a half day should suffice and are surely enough for any reasonable angler.

ILLEGAL FISHING NEAR STOCKTON.

Stockton anglers have until recently enjoyed excellent fishing in the slough and creeks nearby. But of late serious complaint is made that fish are getting scarcer day by day. This is but a reiteration of similar complaints from other localities. The cause for the growing scarcity of fish is the alleged prevailing evil—the illegal use of nets and the non observance of the law which prohibits net fishing with fixed nets, on Saturdays and Sundays, and the illegal netting of black bass.

Fishing not long ago was very good in North street canal, but of late very few bass have been caught in those waters. It is believed that unscrupulous fishermen have placed nets in front of the mouth and have stopped the fish from entering the canal.

It is said that of late many pounds of bass have been sold by peddlers in Stockton. The officers say there is only one way to prove that fish have been caught unlawfully and that is to catch the men at work.

Stockton sportsmen and those of the surrounding country who enjoy fishing are in sympathy with the efforts of the Sheriff's office in trying to apprehend illegal fishermen. The streams near that city were stocked some four or five years ago with black and striped bass, and at the present time the waters contain numerous fish. Those fishermen who have been successful in the past in catching the gamy fishes state that of late they have not been so successful. Something has interfered with the sport. It is not that the supply of fish has diminished on account of lawful fishing, but the real cause is the result of certain unlawful fishing that has prevailed lately.

According to the fish law, fishing with fastened nets is prohibited. A fisherman can fish with a net, providing he allows the net to float with the tide. He cannot even fasten a net to a boat. That those who have been breaking the law know the stand they have been taking is apparent by the manner in which they have been operating. Deputy Sheriff Edwards confiscated a net he found near the mouth of the North street canal, which had been fastened in such a manner as to hide it from view. A dozen or more nets have been found by the officers during the past month. As the nets range in value all the way from \$150 to \$300 the unlawful fishermen loses considerable, when an officer happens to fall upon one of them.

Strikel—if they don't give you Jackson's Napa Soda when you ask for it.

Poachers Punished.

Fish and game law violators have had a strenuous time recently for various infractions of the State law.

Deputy Fish Commissioner W. R. Welch on July 23rd arrested a young man from Berkeley, M. Goddard, who was exercising his skill as a marksman with a six-shooter at Independence Lake. He tried to organize a shooting match at Independence among the guests at the hotel but finally started out alone. As an evidence of his skill he brought in one wild duck that he had shot. Deputy Welch happening to be in that vicinity took Mr. Goddard and the duck in charge. He pleaded guilty before Justice Hill of Truckee who conferred upon him a medal and assessed him at the same time \$25 for his fun.

Early in the morning of July 24th Deputy Welch discovered John Summers at Truckee moving around in a suspicious manner with a creel full of trout. It being known to the Fish Commissioners that trout less than one pound in weight were being sold in Truckee, Mr. Welch was on the lookout for developments. Presently George D. Bertha, a Pullman conductor, and Summers were in close conversation. Welch saw seven small fish passed from Summers' basket to Bertha, and a half dollar being transferred from Bertha's pocket to Summers' pocket. He placed both men under arrest. Later in the day Bertha decided that the shortest way out of the difficulty was to plead guilty before Justice Hill, which he did and paid a fine of \$20. Summers wants to contest the law. A preliminary hearing was granted him and he was held to answer before the Superior Court at Nevada City, where his trial will take place.

Justice Clack of Visalia fined M. R. Demaree \$25 for killing wild ducks during the close season on July 25th. Demaree had eighteen ducks when arrested by Deputy Fish Commissioner M. F. Jones, which would make their cost about \$1.40 each, and the State confiscated the birds besides.

Chas. Sutro, prominent in sportsmen circles, confessed an error of judgment in shipping more than 25 pounds of trout in one day. Mr. Sutro had been at Lake Tahoe and wanted to remind his friends of that fact, but out of the goodness of his heart he ran against one of the laws and a deputy fish commissioner, who was watching affairs. While it was plainly evident that Mr. Sutro did not intend to be in conflict with the law, he realized his mistake and was too much of a gentleman and sportsman to avoid the consequences of his error, and cheerfully made of himself a martyr to the cause of fish and game preservation and contributed \$20 to the State Fish Commission Fund, before Justice Haley at Tahoe City last week.

In the court of Justice Atchinson of Santa Rosa, Chris M. Anderson, one of a gang of three who attacked Deputy Fish Commissioner Ralph, was on Thursday last fined \$100 on a charge of assault and \$25 for killing a quail during the close season. His partner in mischief, W. H. Nolan, is out of jail on \$1000 cash bail. The charge against him is for using a firearm in a threatening manner. The date of his trial has not been set. These men had been languishing in the county jail at Santa Rosa for the past three weeks, since July 5th, when in resisting arrest, for killing quail out of season, at the hands of Deputy Ralph, they caused a "rough house" on the train near Geyserville. One of the gang escaped by jumping from the train, and Anderson and Nolan were taken into custody only after a hard fight in which the officer was roughly handled. In the prosecution of these cases the officers of Sonoma county have spared no efforts in the work of punishing the guilty men.

Thomas Hill was fined \$40 by Justice Baldwin of Eureka for having deer hides in his possession, and E. A. Jenks paid \$25 fine in Justice Deighan's court at Rio Dell for a like offense. C. A. Divoll was fined \$25 at Sonoma for killing deer out of season.

TROUT ANGLING.

Mid-summer trout angling days are here and the knowing fishermen are taking advantage of the situation.

Reports from the various fishing resorts on the Upper Sacramento—Lemoine, Castella, Shasta, etc.—are to the effect that fly-fishing is at its best. Trout are more in evidence than they have been for years past, great sport has been had and splendid catches made. The weather has been favorable and the indications are for a continuance of good weather.

Floyd Judah was at Shasta Springs last week and made limit catches for several days. He says the killing flies are the royal governor, Yosemite, royal coachman and gray and brown hackles. The spoon may also be used there with good success.

On the Truckee the fly-fishing has been so good that anglers are jubilant over the great sport now to be had on that grand trouting water. A number of local rodsters have been stopping at Boca for the past few weeks. The best fishing is to be found about four miles up river, where the water is clear.

Striped bass angling is not what it was this time last year by any long odds. Fishermen who have repeatedly tried all of their favorite resorts and generally with but meagre results are gradually coming to the conclusion that the bass are getting scarcer and scarcer. In fact, some anglers contend that the fish are going as did the sturgeon and the shad. Open season all the year, incessant fishing by the net men and the wholesale taking of small and under-sized fish with illegal sized mesh nets and also set nets will in the near future make striped bass but a memory.

As an instance, there was about a dozen fishermen on San Antonio slough last Sunday, the fish caught did not average one to the rod. Al M. Cumming got one small fish on Sunday and nothing on Saturday. This creek was a splendid bass fishing resort four and five years ago, even up to two years ago, but the net men have about cleaned it out.

AT THE TRAPS.

The Golden Gate Gun Club shoot at Ingleside will be the local trap shooting feature tomorrow.

The Millwood Gun Club shoot at Mill Valley last Sunday was a notable meet in one respect and that was the shooting of Mr. Van Norden, who ran up a score of over 50 consecutive breaks and was high gun throughout the day. He started in by winning the opening event, a freeze out shoot, breaking 9 targets, Haas and Newlands broke 8 each. Event 2, the medal race, was won by R. Haas, who scored 20 breaks, Van Norden was a tie for second place in this race.

In the cup event Van Norden broke 23 out of 27 and won the race, Lockwood was second high gun. In event 4, sealed conditions, at 20 targets, he was tied by Price on 18 breaks. In the shoot off he won with a 10 straight. In the final race of the day, a continuous break shoot, he rolled up a run of 31 breaks. The prior score of Haas, 13 breaks, stood for all of the past season, and was believed would win out but the run of 31 eclipsed everything else and will no doubt remain unbeaten for the club season of 1905. Van also received the club cash prize of \$10 for a straight of 25 targets or better.

A summary of scores shot follows:

Medal event, 25 targets—R. Haas 20, R. Van Norden 18, W. Johnson 18, Mr. Lockwood 17, G. Collins, Sr. 15, B. Patrick 15, G. Collins, Jr. 14, C. Ashlin 12, G. T. Wayman 12, Mr. Mastick 12, H. Wagner 9.

Cup event, target handicap, 25 possible—Van Norden shot at 27, broke 23; Lockwood 30-21; Haas 27-19; Johnson 28-19; Collins, Sr. 28-17; Newlands 30-16; W. Price 25-16; Ashlin 25-15; Wayman 27-15; Wagner 28-15; Johns 25-15; Mastick 25-15; Patrick 25-13; Collins, Jr. 28-12.

Sealed conditions, 20 targets—Van Norden 18, Price 18, Collins, Jr. 17, Haas 16, Collins, Sr. 15, Lockwood 15, Ashlin 15, Johnson 14, Wagner 13, Wayman 9.

Sealed conditions, 10 targets—Johnson 8, Lockwood 8, Price 8, Van Norden 7, Wayman 7, Collins, Jr. 6, Wagner 6, Patrick 6, Mastick 4, Johns 4.

Cuff button event, continuous break—Van Norden 31, Haas 13, Ashlin 10, Price 9, Collins, Sr. 9, Johnson 8, Newlands 8, Lockwood 8, Collins, Jr. 8, Wayman 7, Wagner 7.

The Petaluma Blue Rock Gun Club held a shoot at Kenilworth Park on July 23d. The following scores at 20 targets were made: E. E. Drees 18, J. Doss 13, J. Lopus 12, J. Clark 1, T. Mego 17, Northrup 14, Dr. Hall 10, E. O. Webb 8, T. Jarvis 16, B. Chapman 13, Bert Ayers 9, Frank Doss 8, M. Frederickson 11, L. Solomani 8, A. Solamini 7, J. Stieger 11, Potter 7.

The open to all shoot at the Hunters' Inn near San Leandro on August 13th will probably draw a large attendance of shooters.

The merchandise shoot will be the main feature of the day. Shooters will be handicapped according to ability, limit 25 targets. High guns will take choice of prizes. One re-entry will be allowed, best score to count. In case of ties, shooters will shoot off at the original handicap for gun only, and if still tie, miss and out. All other ties will be decided by lot. Entrance \$1, including price of targets, 16 yards rise. Other events will be arranged. All targets will be trapped at one cent per target.

In the merchandise shoot the principal prize is a Remington hammerless shotgun. A variety of articles valued at over \$75 and about \$50 in cash will also be distributed among the winning guns.

Thos. L. Lewis, Secretary of the Union Gun Club will manage the shoot.

A. E. McKenzie, president of the Denver Gun Club and W. D. Burgess, a prominent trap shot of Omaha were in Salt Lake recently. When the two cracks got together they decided to have a little fun at the traps. Soon several congenial fellows were hunted up and the bunch adjourned to the trap grounds to shoot for the "championship of the universe."

McKenzie represented Colorado, Burgess, Nebraska; Jack Sharp, Nevada, and Uncle John Sharp, Utah. Here are the results:

Practice shoot, 25 targets—

John F. Sharp..... 11100 11111 11111 11111 11111—23
Swen..... 01011 00011 01111 11111 11111—19
Parker..... 11111 01110 11111 11101 11000—19
"Harry"..... 01010 01010 10000 00111 11011—12

Match shoot, 25 targets—

John N. Sharp, Jr..... 11110 11110 00111 11111 11011—20
McKenzie..... 11111 11101 01111 11111 11111—23
Burgess..... 11111 11111 00111 11111 11111—23
"Uncle John" Sharp..... 11001 11111 11111 11111 11111—23

Most of the shooters, and particularly the California contingent, who were present at the recent Northwest Tournament at Portland, Or., say many kind things about the members of the Multnomah Rod and Gun Club, and praise and commend their hospitality and good fellowship generally.

The efforts of a monthly publication to belittle the Portland shoot by imaginary and frivolous dialogue, attributed to several local sportsmen, are uncalled for and tend to place the alleged speakers in a false position.

Whatever the writer's opinion of affairs at Portland, he could have expressed the same legitimately without prejudice to third parties.

While it is conceded that there was a hitch, here and there, in the Portland shoot, the Webfooters more than made amends for a few drawbacks and these were not any greater than has been the experience of every trapshooter of several seasons attention to the sport.

The officers of the Grants Pass Gun Club are R. L. Bartlett, president; Thomas Harvey, secretary; A. C. Hough, treasurer and T. J. Armstrong, captain, and there is a membership of 20. The club has fine grounds leased in the Tufts grove, on which they have recently erected a comfortable club house 14x36

feet. A fine well of water is in the grove and it is a delightful place for an outing. The arrangement for trap shooting is perfect, with good light and background. The club intends to hold another big tournament on their grounds in October.

The Blue Rock Gun Club of Alameda will shoot on the High Street grounds to-morrow.

The last clay-pigeon match of the Honolulu Gun Club for the season was held June 25th at the gun club quarters in Manoa valley. A large crowd of gun enthusiasts was present and some fairly good shooting was done, so writes an Island sportsman.

At noon the order to cease firing was given by the general in command, or at least the board of strategy comprising H. E. Gares, K. B. Porter and Irwin Spalding, and an excellent lunch was partaken of. There was fine chowder, potato salad, ham, sausage, pickles, bread and butter and cold beer. Mrs. J. W. Harvey acted as hostess for the club.

Keen interest was displayed in all the events, and there was a prodigious amount of ammunition discharged at the targets, and much of it wasted. Even some of the best shots of the club were not at their best, failing to score when it was expected of them. There was one interesting shoot-off between W. E. Hall and H. E. Gares. They had tied in the general match and then decided to shoot off for five birds. Each broke four and tied again. The next five gave each three, the next two, the next one, and finally Mr. Wall made one bird after Mr. Gares had scored goose eggs in his five shots.

J. W. Harvey and K. B. Porter were, as usual, up toward the head. In fact, it is hard to beat Harvey. E. I. Spalding made some fine records, and Mr. Lanz, in spite of some waste of ammunition, did fine shooting at times.

On July 1, the dove season opened, and the members of the gun club will temporarily desert the traps for the keener sport of shooting at real birds on the wing. Large shooting parties were expected to hunt over the island on Saturday and Sunday, July 1st and 2nd.

Mrs. W. F. Sheard of Tacoma, won marked honors at the twenty-first annual tournament of the Sportsmen's Association of the Northwest. Mrs. Sheard was one of several lady shooters in the tournament, she won the women's championship of the association, defeating all competitors in her class. She also took the women's high average and by her performance is the champion feminine trap shot of the Northwest.

Mrs. Sheard shares with her husband his distinction as a champion shot. She is known as the best woman shot in the Northwest. She has participated in many tournaments throughout that territory and like Mr. Sheard is the holder of many medals.

There was not a very large attendance at the regular shoot of the Santa Rosa Gun Club held at Ledy station, July 30th. The Laffin & Rand cup event was won by Guiltman for the day as well as on a back score for July. The scores were as follows:

Laffin & Rand cup race, target handicap, 25 possible, 16 yards—Monroe, 28 targets, broke 19; Guiltman, 29-24; Elmonds, 28-15; Morrow, 28-19; Fehrman, 27-17; Hesse, 26-22. Back scores: Fehrman, 27-21; Guiltman, 30-23; Monroe, 28-19.

The medal shoot followed and was won by Hesse while Guiltman won for July 9 on a back score. The scores were:

Monroe, 18 yards, 28 targets, broke 18; Fehrman, 20 yards, 25-11; Monroe, 18 yards, 28-16; Hesse, 18 yards, 28-26. Back scores: Monroe, 16 yards, 30-22.

The Interstate shoot to be held at Ingleside, September 15, 16 and 17, it is safe to say, will be the biggest blue rock tournament ever held west of the Mississippi river.

The meeting will be under the auspices of the Interstate Association, of which Mr. Irby C. Bennett, a popular and prominent Eastern sportsman, is President. Elmer E. Shaner of Pittsburg, Pa., a gentleman of notable experience in trap shooting functions and esteemed by the Eastern shotgun fraternity for his genial personality and executive abilities will manage the shoot—and this selection argues a successfully conducted trap shoot that will be attended by 200 or more shooters.

The programmed events for each day will be open to amateurs only. About \$1500 added money has already been subscribed. The division of moneys will be determined by the number of entries. The regular events, will probably, be 15 and 20 target races. The Preliminary Handicap will be at 100 targets as will the Pacific Coast Handicap. The handicaps will be in yards and arranged by a committee, appointed by President Bennett, composed of: M. J. Iverson, San Francisco; Guy Lovelace, Los Angeles; W. H. Varlen, Pacific Grove; Maurice Abrahams, Portland and W. H. McBroom, Spokane.

The Preliminary Handicap trophy will be worth \$50, the Pacific Coast Handicap trophy is valued at \$100. The program is now with the printers and will probably be out and ready for distribution by the 14th inst.

Ingleside grounds will be arranged to accommodate as large a gathering of trap shooters as anticipated may attend. The Eastern representation will be a strong one, as will that from the Northwest, with a fair number from British Columbia.

Five sets of traps will be put in at Ingleside, including a straight bulkhead, and these will also be in readiness for the shooters. The regular events will be shot on the Sargeant system. Targets will cost 2½ cents each and will be deducted from the purses.

Arrangements have been made to have large and handsome electric cars ready for shooters each day at Market and Second streets. Cars will leave at 8, 8:30 and 9 a. m.; returning at intervals during the afternoon. Round trip tickets will be 25 cents. The trip of the shooters' cars to the grounds, or return, will take about 35 minutes.

Sportsmen intending to participate, we are in-

formed, can send, express prepaid, their guns and ammunition to either of the following sporting goods dealers—Clabrough, Golcher & Co., 538 Market street; Shreve, Barber Co., 739 Market street or the Olympic Arms Co., 801 Market street—who will send their guns, etc., to the trap grounds, free of charge.

This shoot, we feel assured will be one of the best ever arranged for a gathering of Coast trap shooters.

The Santa Clara County Fish and Game Protective Association trap shots closed the club season with their final shoot last Sunday morning. Owing to the nearness of the deer and dove season, the attendance was somewhat small. The shoot was held on the association grounds, Odd Fellow tract, at the mouth of Alum Rock Canyon.

Each entrant was privileged to shoot at 50 targets. Scores made at the eleven previous shoots were not taken into consideration in the prize awards as the scorers had lost track of several shoots. The six prizes competed for were won by V. H. Owen, W. L. B. Cushing, Joe Delmas, E. Klein, E. Wastie and A. A. Brown.

County Laws Knocked Out.

According to a decision handed down by the Court of Appeals July 29th, the sportsmen of Los Angeles county have won a sweeping victory over the county supervisors. The court has decided that all other laws than the State game laws are unconstitutional; in other words, that county supervisors have no right or authority to enact special laws to suit the local conditions, the State law being the only recognized law for every county of the State. Instead of having only one day for dove shooting, August 15th, according to an ordinance passed by the supervisors when the question of game laws came up for consideration several weeks ago, Los Angeles sportsmen will now be allowed to shoot doves from July 1st to February 15th. The open season of last year was from July 15th to October 1st.

The decision was the result of the Los Angeles Supervisors passing an ordinance limiting dove shooting to one day, August 15th. A test case was made of the matter and taken into court with the result that sportsmen will now have the full season.

The exact rights of County Supervisors in the matter of "monkeying" with the State game laws is now probably defined.

Last month Lyman D. Prindle of Los Angeles was arrested by Game Warden Morgan in the San Fernando valley and charged with having violated the county game law by shooting doves in the closed season. The State law opened up sport July 1st. He was convicted by a Justice of the Peace.

There has been much sentiment among southern sportsmen over the county game law changes, which have been characterized variously as ill-advised and unnecessary. As nearly every county in Southern California has a different set of laws, sportsmen are completely at sea, and in most cases cannot find out the law even by writing to the county officials, as a result of the frequent changes.

Believing, therefore, that only evil could come of a continuance of these periodical county game law changes, and feeling that the State has taken very good care of the game, the Los Angeles County Protective Association instructed its attorneys to defend Mr. Prindle as a legal form for establishing and defining the rights of the Supervisors to pass game laws. Convicted, Mr. Prindle's case came up before the District Court of Appeals in due course of law, and by habeas corpus proceedings it would have been brought to the immediate attention of the State Supreme Court, so that shooters might know their fate before the "sooners," of which there seems an abnormal crop, have killed off all the doves while the law-abiding sportsmen are sweltering in the city.

The Prindle case affects every county in California. There has always been much doubt in good lawyers' minds as to the validity of the county ordinances if vigorously fought by competent legal talent, and the Prindle case will now probably establish their status beyond further quibble.

The rather paradoxical spectacle of a game and fish protective association attacking a game law is explained by the belief of most conservative protectionists that incalculable harm has been done the cause by ill-advised and incompetent legislation, inflicting undeserved hardships on sportsmen in some sections, and placing a premium upon violations by keeping the law-abiding ones home when the country is full of sporting material as at present. One good game law, and that enforced, is the slogan of the protectionists.

Season Opens for Deer Hunters.

The open season for hunting and killing bucks began on Tuesday last. The outlook for a successful hunt in nearby hills was favorable, so far as the deer were concerned, for they were reported to be plentiful in Marin county. Weather conditions prevailed in that section, however, that were not conducive to success. On Tuesday and Wednesday a heavy fog hung over the Marin hills, on Thursday it rained. The coast fog made hunting both difficult and dangerous.

Results, however, were by no means nil. On the County Club preserve Mr. Van Sicklen dropped a buck that scaled 115 pounds dressed. He got the deer on the run with a long shot. Andrew Jackson bagged a buck that weighed 150 pounds, one of the finest shot on the preserve for years.

Sheriff Taylor two of his sons and three friends hunted over the Codoni, Cheda and Jewell ranches. They bagged a fine forked horn. The hunt was brought to a close when the dogs refused to run by reason of the bad weather. A two pointer was killed on the Point Reyes Sportsmen's Club preserve.

The turnout in Marin county will be a large one today and tomorrow many of the different club members having postponed their hunt from the first until today.

The deer season in Mendocino county closes September 15th.

New A. K. C. Rules.

On August 1st the following new A. K. C. rules and changes took effect and are now in force. They are of importance and in view of the coming Coast shows in the near future, we deem it of interest to the fancy to give them in this issue:

VI. If a dog has been entered without being identified, as directed in Rules IV. and V., it shall be disqualified and forfeit any prize which may be awarded to it, except in the case of technical errors where fraud is not shown, in which case the Secretary shall impose a fine of \$2 for each entry.

CLASSES.

2. The novice class shall be for Americanbred dogs only, never having won a first prize at any recognized show, wins in the puppy classes excepted.

5. The Winners' Class shall be open only to the winners of first prizes in any class at the show, giving at least three of the before-mentioned classes, one of which must be the Open Class. Winners' Classes can not be allowed where two or more breeds are combined. The judge shall withhold the award of "first" in this class should he be of the opinion that there is no dog of sufficient merit to justify such award, and the winner of ten points in this class, "under three different judges, excepting, however, at five-point shows, when two wins under different judges will be sufficient," will thereby become a champion of record, be so registered by the American Kennel Club, and if registered in the Stud Book will be entitled to an American Kennel Club champion medal. Duplicate medals for champions cannot be issued. Before awarding "reserve" in this class, the dog or dogs having been placed second to the winner in any of the classes must be brought before the judge for competition with the remaining dogs in said Winners' Class. No class winner can be withdrawn or withheld from competition in the Winners' Class, and no entry fee shall be charged for said competition in this class. A dog that, prior to June 1, 1904, may have won in the Winners' Class under the ten-point rule shall qualify as a champion upon the completion of ten points. The Winners' Class can be divided by sex, provided the required three classes announced in the premium list are also divided by sex.

XXIV. The Superintendent of any show cannot exhibit or officiate as a judge at that show.

NEW RULES AND CHANGES GOVERNING CLUBS HOLDING SHOWS.

XVI. The Secretary of the American Kennel Club must enforce the following penalties for violations of the foregoing rules, the same to be reserved from the deposit made with application for dates, after having satisfied himself that said violations were due to the carelessness or negligence of the managers of the show:

For accepting entries after the advertised date of the closing of entries—\$5 for each entry.

For accepting special or regular prizes from persons or clubs under suspension of disqualification—\$5.

For accepting entries for puppy classes under six months of age, or without date of birth, breeder, sire or dam—\$5 for each entry.

For accepting entries signed with the agent's name only—\$2.

For failure to file a copy of the premium list with the American Kennel Club as soon as published—\$1 for each day.

For failure to file a marked catalogue with the American Kennel Club, certified to by the Secretary or Superintendent, and making a return of all listings and fees for same within seven days after the closing of the show—\$1 for each day.

For transferring a dog, as published in the catalogue, that has been wrongly entered by the exhibitor—\$5.

For all errors in the entry forms at shows where fraud is not shown—\$2 for each entry.

Section 5—Any person or persons acting in any official capacity, paid or unpaid, including that of Judge, Secretary, Superintendent, Steward, Clerk of a show or as an officer or member of a Bench Show Committee of any Club holding a show in the United States of America, under any rules antagonistic to the American Kennel Club, shall be disqualified and debarred from all privileges of the American Kennel Club.

Section 6—With the exception of routine business, no matters shall be brought up for discussion at any meeting unless due notice has been given to the Secretary of the American Kennel Club and by him sent to each delegate at least twenty days prior to the said meeting or unless a majority of the delegates present at a meeting consent to the consideration of a new subject.

Section 7—That between the dates of December 1 and December 31 of each year, nominations for the offices of President and Vice-President and the Chairman of each standing committee of this Association may be filed with the Secretary of this Association by any delegate whose club is in good standing, and the said Secretary must publish said nominations for the above named offices in the January issue of the *American Kennel Gazette* of each year. And at each succeeding annual meeting only such names as may have been nominated and whose nominations have been published in the preceding January issue of the *American Kennel Gazette*, in the manner above set forth, can be nominated and no other nomination shall be permitted nor can any candidates other than such as have been announced be nominated.

Section 8—These By-Laws may be altered, amended or suspended without notice, at any regular meeting

of the Executive Committee, by two-thirds vote of the member present, or at any special meeting on notice. Provided, however, that Sections 3 and 4 can only be altered or amended after notice of such alteration or amendment has been published in the *Gazette* prior to being acted upon, and by a two-thirds vote of the members represented.

DOINGS IN DOGDOM.

STOCKTON SHOW.

A three day show for the Stockton Kennel Club and the dates the club will apply for are October 19th, 20th and 21st. It is safe to venture the statement that the Santa Cruz judge, Harry W. Lacy, we are told, will do most of the judging at Stockton. It is also within the possibilities that George A. Cranfield will judge Greyhounds. Mr. Cranfield judged the breed at the S. F. C. show 1902, when there was about 150 entries—the largest class of Greyhounds ever shown on this side of the Atlantic. Further there is a strong sentiment to have one breed judged by a lady "who is regarded as one of the experts of the Coast" in the particular breed, Cocker it is rumored.

The Stockton Club and the bench show proposition are getting along swimmingly. Letters have been received from many fanciers outside of Stockton and San Joaquin county. Entries are promised from Frisco, San Jose, Santa Cruz, Sacramento and other points.

A drawback, but only a temporary one it is to be hoped, is the lack of a suitable building or hall in Stockton at present. This problem may be solved by showing the dogs in a tent or under a canvass covered framework erected for the purpose. Whatever the difficulty for the present, it is an assurance that the Stockton fanciers will overcome it in a satisfactory manner.

George E. McLeod, who has done so much for the new club has resigned the club presidency. Absence from Stockton and urgent business affairs prompted a step that was not entertained favorably by the club members. Mr. F. N. Vail was selected to fill the office made vacant by Mr. McLeod. Mr. Vail is an enthusiastic fancier and a gentleman of strong executive abilities and is well able to pilot the club into smooth sailing waters.

The list of specials will be a large one, many handsome and valuable trophies having been already offered. The premium list is in the hands of the bench show committee and the prospect for a fine show at Stockton in October, we are pleased to state, is a most propitious one.

FRISCO SHOW CANCELLATIONS

The perusal of the following cancellations will demonstrate to the fancy the importance of adhering strictly to the new rules and changes. Technical errors and carelessness in making out entries are mainly responsible for the loss of wins at the May show.

The following awards have been cancelled and the following dogs moved up:

Class 15, Great Danes, Nero, not eligible, 1st limit, San Francisco, 1902; Rex takes 2d, Rex II, 3d.

Class 16 and 17, Great Danes, Ruy Blas, registered Cunningham's Ruy Blas.

Class 16, Nero takes 1st, Rex 2d.

Class 17, Nero takes 1st, Rex 2d.

Class 18, Prince F. takes 1st.

Classes 41, 42, 43, 44 and 47, Pointers, Oyama, Combination Boy, Cuba Jr and Stella entered in unregistered kennel name.

Class 41, Tick takes 1st, Dick A. 2d.

Class 43, Dictator takes 2d.

Class 47, Topsy II takes 1st, Sally Ewing 2d, Bee 3d.

Classes 65 and 66, Irish Setters, Mike Swiveller registered as Mike Swiveller T.; Toronto Pat takes 1st.

Class 103, Cocker Spaniels, Sosoma Girl, not eligible, 1st novice. San Francisco, 1904; Ramona takes 1st, Vi 2d, Buff Beauty 3d.

Class 110, Cocker Spaniels, Lansdown Ada H., not eligible, 4 limits; Little Maid takes 1st.

Class 123, Collies, Astrologer Grace, registered Ellwyn Astrologer Grace.

Classes 143, 144 and 145, Bulldogs, Eva, particulars not given; Queen II takes 3d.

Class 148, Bull Terriers, Edgecote Baron, registered number not given; Rex takes 1st, Edgecote Al 2d, Jasper 3d.

Classes 170 and 173, Boston Terriers, Glenwood Nancy, wrong pedigree.

Class 170, Cricket takes 1st.

Class 190, Fox Terriers, Norfolk Huntsman, not eligible, 4 limits; Tallac Chuck takes 1st.

Class 127, Irish Terriers, Edgecote Madge, not eligible, 1st novice, Seattle; Tyrone Lass takes 1st.

ENGLISH SETTER KENNELS.

The Grangers' Inn Kennels has been established at Crockett by John M. Golobek and Wm. Phillips. Mr. Golobek is the owner of that sterling good bench show and field Setter Ch. Cato, Jr., and his handsome winning son Cato's Judge, both dogs are not unfamiliar to the Setter fancy. The new kennels have been reinforced with several stylish and high class brood bitches. It is the purpose of the owners to breed and break high class dogs. Mr. Phillips is a thorough and competent trainer and has wonderful command over young dogs. We recommend the Grangers' Inn Kennels to the attention of sportsmen who desire well bred and properly broken field dogs.

W. W. Smith's Bull Terrier bitch Alameda (Newmarket Duke-Edgewood Jean) whelped eleven puppies (7 dogs), July 29th, to J. I. Sparrow's Croydon Czar (Woodcote Bersac-Brassie).

J. I. Sparrow's Silkwood Daisy Belle (Newmarket Duke II.-Woodcote Venus) whelped seven puppies (4 dogs), July 17th, to Croydon Czar.

TRADE NOTES.

AVERAGES REPORTED.

Eufaula, Ala., July 11th and 12th, Walter Huff, of Macon, Ga., first general average, 375 out of 400, shooting "DuPont." Harry N. Hall, second general average, 371 out of 400, shooting "DuPont." J. N. Hightower, third general average, 364 out of 400, shooting "DuPont." H. S. McClesky, of Americus, Ga., and E. J. Jones, of Eufaula, Ala., ties for first amateur average, 351 out of 400, shooting "DuPont." Gray Vaughn, of Selma, Ala., second amateur average, 344 out of 400, shooting "DuPont." J. W. Huff, of Walden, Ga., third amateur average, 340 out of 400, shooting "DuPont."

Betterton, Md., July 12, 13, 14, E. H. Storr, first general average, 480 out of 500, shooting "DuPont." L. S. German, of Aberdeen, Md., first amateur and second general average, 466 out of 500, shooting "DuPont." J. Mowell Hawkins, third general average, 463 out of 500, shooting "DuPont." W. M. Foord, of Wilmington, Del., second amateur average, 458 out of 500, shooting "DuPont."

Manning, Iowa, July 14th, H. G. Taylor, of Meckling, S. D., first general and first amateur averages, 391 out of 400, shooting "New E. C." (Improved) R. R. Barber, of Pauline, Iowa, second general and second amateur averages, 386 out of 400, shooting "DuPont." Russell Klein, of Spirit Lake, Ia., third amateur average, 370 out of 400, shooting "DuPont."

Menominee, Mich., July 12th and 13th, W. K. Crosby, shooting "New E. C." (Improved) and H. C. Hirschy, shooting "DuPont," first general average, 391 out of 400. C. Young, second general average, 387 out of 400, shooting "DuPont." Rilla Heik's, third general average, 386 out of 400, shooting "DuPont." G. Dering of Columbus, Wis., first amateur average, 380 out of 400, shooting "Schulize." W. H. Schulze, of Toma, Wis., second amateur average, 374 out of 400, shooting "DuPont." A. Molle of Antigo, Wis., third amateur average, 371 out of 400, shooting "Infallible." H. C. Hirschy, shooting "DuPont" had the long run of the tournament, 159 straight.

Milwaukee, Wis., July 16th, C. W. Budd, first general average, 186 out of 195, shooting "New Schulize." H. C. Hirschy, second general average, 184 out of 195, shooting "DuPont." W. D. Stannard third general average, 182 out of 195, shooting "DuPont." F. Kaufman of Two Rivers, Wis., first amateur average, 155 out of 170, shooting "DuPont." I. Halverson of Rio, Wis., second amateur average, 147 out of 170, shooting "DuPont." Fred Wolf (Capt. Jack) of Milwaukee, third amateur average, 146 out of 170, shooting "DuPont" and "Infallible." The professionals shot at 195, but the amateurs at 170, it being very late before they finished.

At Millwood Gun Club shoot Mill Valley, July 30th, R. Van Norden 50 straight; won cup race; won miss and out, 31 straight, won freeze-out 9 straight, won sealed condition race, 18 and tie, 10 straight and won shoot-off, using "New E. C."

PETERS' POINTS.

At Lonaconing, Md., July 4th and 5th, Mr. R. S. Denker of Ruffsdales, Pa., took first average, and Mr. Warren Smith of Osterburg, Pa., second average, both using Peters' Ideal factory loaded shells.

At Fort Worth, Texas, July 12th, 13th and 14th the majority of the 55 contestants including the winners of second and third professional averages, and second amateur average, used Peters' Loaded Shells. The Ithaca gun was won by Otto Seng, who broke 25 straight with Peters' Ideals. The Mitchell gold medal was won by M. E. Atchison, of Giddings, Texas, with a score of 50 straight. Mr. Atchison tied with three others on 25 straight, then shot 25 in the shoot-off, using Ideals. He also made a run of 112 straight on the last day of the tournament.

At Betterton, Md., July 12th, 13th and 14th, E. H. Storr, using Peters' Target Shells, won high average, breaking 480 out of 500 with a sliding handicap. Mr. Storr made a run of 97 straight, 89 from 20 yards and 8 from 19 yards. At Cambridge, Md., July 7th, Mr. Storr was high average losing only 3 targets out of 165. Peters' Target shells are well named, for they certainly do smash them up.

Mr. C. A. Young, representing the Peters' Cartridge Co., won high average in the shoot at Degraff, Ohio, July 20th, losing only 16 out of 275 targets. Mr. C. A. Young also won high average at Dayton, Ohio, July 22d, 97%, using Peters' Ideal shells.

High average at Decatur, Ill., shoot, July 18th and 19th, was won by H. W. Cadwalader, the Peters' Cartridge Company's representative; average 96%.

On July 21st, Mr. John M. Pemberton of Ashvale, Ark., holder of the Arkansas Flying Target Championship, successfully defended his title against Mr. S. M. Powell, of Little Rock, scoring 45 out of 50. Both contestants used Peters Premier shells.

GOOD TEAM WORK.

In a recent trip made by Fred Gilbert and C. W. Phellis, shooting as a team, the following scores were made with the Parker gun:

	GILBERT	PHELLIS
July 9—Grand Rapids	237 out of 250	239 out of 250
July 11—Mt. Clemens	147 " " 150	111 " " 150
July 14—Detroit (Winchester Gun Club)	147 " " 150	145 " " 150
July 15—Detroit (Grove Gun Club)	98 " " 100	97 " " 100
July 16—Detroit (Lakeside Gun Club)	97 " " 100	94 " " 100
	726 " " 716	714 " " 730

General averages—Gilbert 96.8%, Phellis 95.4%.

At the Woodmere Gun Club tournament, held at Woodmere, Mich., July 19th, C. W. Phellis won first average, with a score of 185 out of 200, at 20 yards. In this same shoot Mr. Phellis also made a score of 20 straight at 20 yards, winning a \$25 stein, for the only open event at 20 targets.

At a tournament held at Richmond, Va., July 4th, W. L. Boyd, shooting the Parker gun, won the amateur championship of Virginia, with a score of 98 out of 100, having made 77 straight.

All of this is excellent shooting and speaks volumes for the "Old Reliable" Parker gun.

A CONVINCING TESTIMONIAL.

The Ithaca Gun Company receives many communications from sportsmen who speak highly of the Ithaca gun. Here is a sample:

I beg to thank you for the beautiful and effective gun which you so kindly built to my particular specifications; it is indeed a triumph of the art of modern gun making. Have owned guns made by the best gun makers of the world which cost much more, but have never had one to suit me so well, and have yet to see a gun I would exchange it for.

W. B. MOORE, M. D., Kentville, N. S.

POWDERS AND THE G. A. H.

BROOKLYN, N. Y., July 21.
Editor Forest and Stream:—I have been reading the powder advertisements in this week's *Forest and Stream*, and am somewhat at sea. My perplexity is caused by conflicting claims of powder performances at the Grand American Handicap. I don't see how different powders could have won the same prizes as claimed, unless the prize winning shooters alternated their powders and used first one and then another in their shooting, or else mixed different powders when they loaded their shells. This is something I never knew a shooter to do willingly in shooting a match of any sort, and certainly I should not think it would have been done in a contest of such importance as the Grand American. At the same time I confess to a curiosity to know how we are to harmonize the conflicting statements about the records of the several powders. Are there any official records to throw light on this?

WILLIAM APPLEGATE.
[The matter of the winnings relatively of the Du Pont and Ballistite powders at the recent Grand American Handicap, June 27-30, has been called earnestly to our attention, particularly by the letter above. We have examined the Interstate Association official records of powders, guns, etc., pertaining to the point in question, and from them we extract the following statistical information: In the Grand American Handicap there were 73 men in the money, instead of 64, as has been represented. Of the 73 winners 40, used Du Pont powder, or nearly 55 per cent of the winners, and their total winnings were \$1710.50, or over 53 per cent of the purse, \$3200.20. Of the 73 winners, 13 used Ballistite, or nearly 18 per cent, and they won a total of \$619.95 out of the purse of \$3200.20, or a fraction over 19 per cent. Du Pont powder won the Preliminary Handicap, the Grand American Handicap, the Consolation Handicap and the five-man Stato championship, thus winning all the trophies. There is no such thing as a "prize" officially known in the Grand American Handicap at Targets. There are purses, money and trophies only. Of the total of 184 winners in three handicap events, Du Pont had about 100 and Ballistite had 26. The official records of the Interstate Association are the only authoritative record on this subject.]—*Forest and Stream.*

THE FARM.

Farm Boy Has Best Chance.

Boys who are growing up on a farm are very much given to envying the city boy the better chance that he is supposed to have for getting on in the world.

We have some evidence that such is not the case. We quote now from the *American Farmer* an editorial explaining the reasons and the conditions that give the farmer boy the best chance.

Indiana State Superintendent of Public Instruction, Fassett A. Cotton, addressing a gathering of teachers, recently, made the following sensible and well timed remarks:

"It is just in his ability to do things that the boy on the farm has a better chance to succeed than the town or city bred boy. And it is because the boy on the farm has work to do."

"The country boy is well trained in the expressive side of life. It is expression, too, that amounts to some thing and in it he gets the notion there is work to do in the world, that life is not all play. Now, if you can use these good qualities in your school work, well and good. And if you can use them, in building in the community a larger regard for labor and a supreme respect for the farm and its problems that will keep the boys in the country, it will be all the better for the boys and the nation in the years to come.

"Of course, if a young man really believes that he will have better opportunities for himself and for what he would do for humanity by going to the city, he should go. He can succeed, as scores who have preceded him are succeeding. But let him remember that farm work is as important, just as honorable, just as clean, that it requires just as much

ability and that it is just as remunerative as any work he will find to do."

The forcible point made that the farm boy has a better chance of success than the city bred youth, because of his ability to do things, is worth pondering over. "The boy on the farm has work to do," says Mr. Cotton, and he might have added that on the farm the boy is taught to respect labor. Too often the city boy is permitted to grow up into habits of indolence, if not of vice, having little regard for or knowledge of labor upon which he looks with a sort of disdain. Laboring not, he is incapable of taking a place among those who are to bear off the prizes of the earth. Neither is he capable of fully appreciating the joys of life, because of a surfeit of pleasure. He is, of all persons, most unhappy. Compare his state with that of the farm boy who labors and has his wholesome joys. His is a healthy body, his work is the noblest of all callings, and to his recreation he adds a knowledge that it has been earned. Self respect is the real secret of his joys. He eats no other's bread but his own, paid for by his own brawn, by his own sweat sweetened. He may look about him and reflect that knowing the purchasing power of honest labor, his may be the conquest of large things. Ambition is kindled, he enlarges his sphere, the world opens up before him and behold, soon, the boy becomes now the busy, successful man of action. Remember, boys, since the dawn of time the field of agriculture has ever been the cradle of the greatest men. How pleased you should be that it bred and nurtured you.—*Exchange*

Some of the best money-making farmers who have been in the business many years and are conceded to be successful by their neighbors, feed but very little to hogs or other stock on their farms besides that which they grow upon the farm.

To have your cows milk long, milk them clean.

The Missouri Mule.

A mule from Chulu brought \$450 on the St. Louis market a few months ago, says the Chulu, Mo., *News*. This mule from Chulu has as many ancestors as anybody, but from now on, as far as he is concerned, there is a full stop; the lid is on, as Mr. Folk would say, nothing doing. Of course, everybody knows that Missouri leads the world on mules, and Chulu town leads Missouri—that's why we talk. A mule colt will bring from \$75 to \$90 on the streets of Chulu, about \$1 a pound. They are seldom offered for sale, however, as a mule was never known to get old or sick. A mule is always worth his five-year-old price. He can always do anything he could ever do. At 35 he looks the same, acts the same, is the same and matches his five-year-old platonic thirty-second, twice removed accidental, half grandniece.

His noble ears and mealy nose,
His glistening coat and polished toes,
His fine straight legs and ribs of steel,
His muscles tense as when you feel
A monster warship's iron keel.
His tendons of the strength it brings
To twist a million catgut strings,
He drags the hattle engines forth
And proud to prove on field his worth,
He dies like one of noble birth,
A faith portrayed in form and face,
To divorce mountains from their base,
He dies at last a giant king
Of all the creatures earth can bring,
And leaves no child his praise to sing.

It don't pay to keep cows for a side issue. Get the best and make dairying a business just like any branch of farm work.

When the butter sticks to the worker, the latter was not scaled properly. Rub it with salt and scald again.

Uneven salting and working makes streaky butter.

Keep the farm separator clean, inside and outside.

With milk as a starter, pigs soon learn to eat slops made of mill feed.

The beds or sheds for young pigs should always be arranged so the pigs can have the full benefit of the sun's rays.

The health of the hog depends very largely on what is taken into the system through the nose and mouth.

Nothing tends to the thrift of a pig so much as to have him relish his feed at all times.

The pig multiplies so fast that under favorable circumstances a shortage cannot be depended upon for a very long time to keep up the price.

For Sale.

Brood Mares, Horses in Training and Yearlings, Belonging to the Estate of Michael Fox, Deceased.

NOTICE IS HEREBY GIVEN THAT THE undersigned executor of the will of Michael Fox, deceased, will sell on or after MONDAY, AUGUST 28, 1905, the following described brood mares, horses in training and yearlings, to wit:
Andalus (4) by St. Andrew-Fanny Louise.
Macedo (4) by Maxilo-Reseda II.
Ro Carlo (2) by St. Carlo-Reseda II.
Edna Rose (5) by Bassettlaw-Reseda II.
Kidnapper (1) by Keulworth-Edna Rose.

The above described animals are now at the Oakland Race Track.
Said executor will also sell on or after said date the following brood mares and fillies, now at McDonough's Ranch, San Mateo County, Cal.:
Fanny Louise (dam of Andalus, Canmore, Sister Jennie) by Darbio-Nellie Peyton.
Reseda II by Middleton-Margold.
One Bay Filly by Orsini out of Fanny Louise, foaled April 13, 1904.
One Bay Filly by Orsini out of Fanny Louise, foaled April 21, 1905.
One Chestnut Filly by St. Carlo out of Reseda II, foaled January 24, 1905.

Fanny Louise was bred to St. Carlo, 1905.
Reseda II was bred to Orsini, 1905.
Bids or offers for all of the above described stock, as a whole or separately, must be in writing and will be received any time after the first publication of this notice at the office of Sullivan & Sullivan, attorneys for said executor, Room 610, Parrott Building, San Francisco, California.
Terms—Cash in U. S. gold coin.

MATTHEW I. SULLIVAN,
Executor of the Will of Michael Fox, Deceased.

Common Goat is Sold as Lamb and Mutton.

Goat, says the Department of Agriculture, in a bulletin recently issued—goat, common garden goat, supplies a considerable part of the "lamb" and "mutton" handled by the great packing houses and sold by the wholesalers and retailers all over the country. Expert Thompson, who has conducted the goat investigation, reflects as follows in his report upon goat as a table delicacy:

It is generally agreed upon by those who speak from experience that the kids of all breeds of goats are a table delicacy. It is true that among the great masses of the people of this country there is a remarkable and well-grounded prejudice against anything bearing the name of goat.

Within the environments of the larger cities are found many kids, and it is evident that only a few of them ever grow to maturity. What becomes of the rest? Butchers and meat dealers answer this question by saying that they are sold as lamb. No meat dealer has ever heard a complaint against the quality of such lamb.

A considerable number of middle-aged and old mongrel goats are purchased by the packing-houses of the large cities. They are purchased as goat, but are sold as mutton, and many of those who so strenuously condemn goat have eaten it a score of times.

Mr. Thompson adds that the elderly goat is not as good as good mutton, but that it is not any worse than bad mutton. He insists that the prejudice against it would disappear if people would only make a test and eat goat as goat instead of as lamb. Life is not very hopeful, however, of such a result. He started upon his goat report with the purpose of answering the numerous inquiries which have reached the bureau as to the possibility of creating a goat industry in the United States. It was while incidentally remarking upon the present size of the industry that he made the startling statements which confound our morning lamb with goat chops.

Mr. Thompson says that the inquiries as to the possible creation of a new industry in the United States came principally from persons with considerable capital, a good deal of worthless land and plenty of time to think. He believes that when these people learn that the United States imports \$20,000,000 worth of goat skins annually and that conditions in this country are extremely favorable for goat-raising, they will surely sit up and take notice.

The bulletin devotes considerable space to explaining that the term "common goat" does not indicate any special breed and is not meant to be contemptuous, but that it covers all sorts of mongrel goats, without regard to size, confirmation, color or character. According to Mr. Thompson there are about 2,000,000 goats in the United States, 700,000 of which can recognize their parents. New York has 1316 within its borders, as compared with 700,000 for Texas. Rhode Island can boast of only 23. They are all common goats, but 22 of them Mr. Thompson says, have risen in the social scale and now furnish the motive power for a similar number of go-carts. The twenty-third has a bad reputation.

Mr. Thompson further reports that after an exhaustive study he is able to say that a common goat can eat as many different things within a given space of time as an Angora goat, and that it is certainly foolish to employ a force of men to clear a tract of land at a cost of from \$5 to \$40 an acre when a goat will do it for nothing and be glad of the chance. In regard to breeding, the Angora is given to triplets, while the common goat sticks to twins. The twins usually arrive a good deal oftener, however, and consequently the more common kids than the Angora or other registered stock enter the lamb and mutton markets every year.

Correct Way of Milking.

It would be better for the reputation of dairymen could the milkers be induced to milk with clean hands, declares H. O. Curtis in writing to the *Jersey Bulletin*. Sour and tainted milk is too common with us during the summer and autumn months, and it is a difficult task, under the most favorable conditions, to have the milk free from taint. Not only has the dairyman to combat taints from feeds in the fall, but the cows will get dirt on their udders and teats, and from these it gets into the milk pail because most men milk with wet hands. Whatever the milker has been handling before milking leaves a taint and bacteria on the hands, and, of course, it is washed off into the milk; the result is that one day's cream, or one day's churning, is different in bouquet and flavor from another.

The buttermaker will tell us he controls the flavor with another kind of bacteria, but there is something more potent than the buttermaker's special species of butter culture, and it is what gets into the milk ahead of the man at the churn. As already stated, it is the dirt on the cow's udder that is causing a riot among the different kinds of living organisms in the milk. When a scientific buttermaker gets on his ear about some taint that is puzzling him he makes a fermentation test and locates it nine times out of ten, but that is no reason why carelessness should be practiced all the time in milking. The consumer of milk in the city gets hold of some of this tainted and impure milk, and he blames the dairy from which it came. The city man does not care one iota whether the milk came from John, Jacob or Isaac, so long as it is good and rich. Put, what is "good and rich" milk? There is going to be a different definition as to what is "good" for the human family and what is not good, according to some modern medical authorities.

But, whatever that may amount to, it is not what we want. The crying need is plenty of clean, wholesome milk, and it cannot be had unless milkers milk with dry hands.

Poor Fowls Do Not Pay.

It does not pay to keep mongrel fowls. No one can afford to keep poor fowls when there are better ones to be had. The business in cost is a mere bagatelle when compared with the profits during the season. Some barnyard fowls are all right, but they are sadly in the minority.

One reason why the thoroughbreds pay so much better is that they are uniform. Their habits are similar and a flock may be treated more as a unit. To get the most from fowls it is necessary to study their individuality. This cannot be done with mongrels because each one is different, but it can be done easily in a collective manner with thoroughbred fowls because they feed alike and their habits are much in the same families, but the difference is along certain prescribed lines and easily adjusted.

There are three general classes of fowls. Asiatics are especially valuable for meat, they correspond with beef breeds of cattle for beef. For eggs the Mediterraneans are especially valuable for they have been bred along lines of production in this especial class, until their capacity for converting food into eggs is almost marvelous.

The American fowls fit in between the Mediterranean and Asiatics. The American breeds are good layers and they are all large enough to furnish suitable meat for the table. They are active in summer time and for this reason are classed among the most valuable fowls for the farm. They may be termed general purpose fowls and classed very much as general purpose cows. Under certain conditions they are more valuable than especial breeds that require careful looking after to develop their greatest production along prescribed lines.

For farmers' use probably one of the

American breeds of solid color gives the best general satisfaction. That is, on nine farms out of ten a good medium white hen will forage for herself and lay more eggs than a carefully bred laying strain. This does not necessarily mean that a thoroughbred American fowl will do well under a system of neglect, but she will give good results with less care than some of the great layers or great meat producers.

The Leghorns cannot be classed as general purpose fowls, because they do not hatch their own eggs. A general purpose fowl must be good for everything that is required of the hen. She must lay a goodly number of eggs, take on flesh when wanted for the proper season. In addition to this they are valuable when the motherly instinct prompts them to take good care of the small fry.—*Stockman Journal*.

Regulations for Shipping Live Stock.

WASHINGTON, July 28—Regulations for the shipment of live stock under the twenty-eight-hour law in the matter of feed and rest of stock in transit were completed today by the Department of Agriculture. The recommendations as to the department's attitude on the question were prepared by Dr. D. E. Salmon, chief of the Bureau of Animal Industry, and approved by Secretary Wilson, are as follows:

"The statute provides for the shipment of live stock without unloading en-route under certain conditions. I have investigated the subject and would respectfully recommend that the department approve as being in compliance with the statute all shipments of cattle in transit for more than twenty-eight consecutive hours made under the following conditions:

"First, that the cars containing the cattle shall be equipped with hay racks, each lineal foot of which shall have a capacity of not less than one cubic foot extending along the sides of the cars from the doors to the end, and that the cars shall be so arranged that the racks may be readily filled with hay through openings in the car roof.

"Second, that the cars shall be fitted with semi-cylindrical watering troughs of galvanized iron not less than fifteen inches deep by not less than twelve inches wide across the top, inside measurement, with the inner edge curved to retain the water and facilitate filling. The trough is to be placed in proper position along the side of the cars and extend from the doors to the end. All troughs are to be so arranged that they can be readily filled with water and emptied on the outside of the car, and the troughs be kept free from all litter and filth.

"Third, food and water to be supplied at intervals not exceeding twenty-eight hours, while the shipments are in transit, and in supplying water each car to be stopped for at least five minutes, during which time the troughs shall be kept filled with clear water, and all animals given an opportunity to drink.

"Fourth, in order that the cattle may have sufficient space and opportunity to rest the cars shall not be overloaded, and in all shipments there shall be room in each car for at least one-third of the cattle to lie down at the same time. The number of head of cattle that may be carried in a thirty-six-foot car is shown in the following table, according to the live weight:

Average live weight and head for thirty-six-foot car respectively: 700, 23; 800, 22; 900, 21; 1000, 20; 1100, 19; 1200, 18; 1300, 17; 1400, 16; 1500, 16; 1600, 14; 1700, 13; 1800, 12.

What Prime Butchers Are.

The term "prime" in a general way means the best of the class, but in a more specific way in stockyards vernacular it has a meaning of its own, says William Dietrich of the Illinois Experiment Station. To grade as prime a hog

must show marked evidence of ripeness and maturity. The two must go hand in hand. A hog may be mature without having being fed so as to show that bloom of condition that is necessary for a prime hog, or he may have been fed as well as possible and not be sufficiently mature. Maturity may be reached at different ages and weights.

The quality of a prime hog is indicated by a medium size, fine, clean cut head, without surplus fat or wrinkles of skin, medium sized ears of fine texture, hair that is fine, straight, silky, and lies close to body. Skin smooth, pliable and free from wrinkles. Smooth, nicely tapering tail, medium size. No undue coarseness at joints. The form should be broad across the back, wide and well filled hams and shoulders, short, heavy neck, heavy jowls and short legs. He must be symmetrical, smooth and compact.

He must be well covered with a thick layer of fat on the outside of the carcass, be well rounded out at the rump, thus making a socket in which the tail is set, be well filled out on the neck up to the face, have a broad, fat back, with much fat on sides and belly and be well filled in flanks and twist. He must, however, be free from flabbiness.

Breed to the Right Stallion.

Horses and mules of the right sort are bringing paying prices on the markets. The undersized, scrubby ones bring the bottom prices. Many farmers are disgusted with raising horses because they unfortunately pay little attention to breed or conformation of sire or dam, and the result is disappointment in nine cases out of ten. There has never been a much better demand for good shaped, active, fair-sized horses and mules. Breed the right sort and then let the colts have all the grain and bright hay they will eat up clean. Do not stint them. There is a great future for the judicious horse and mule breeder.

We hear a great deal now about breed type and characteristics, and it is right that breeders should pay attention to these things. But first and foremost the form and function that produces the most profit must be observed. We have seen breeders, in looking over pure bred animals—hogs for instance—when they would evidently entirely ignore a broad back, well-filled hams, good length of body and strong, clean bone, and talk long and loud against the animal because one hind foot was black when they would rather have had it white to conform to the ideal marking. We agree that for a pure bred animal it would have been a good thing to have had it just right, but of the two—a white foot or a profitable meat making form—we would certainly have greater admiration for the form. Usefulness must be the first requirement.

Warranted to Give Satisfaction.

Gombault's Caustic Balsam

Has Imitators But No Competitors.

A Safe, Speedy and Positive Cure for Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites. Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a Human Remedy for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address The Lawrence-Williams Co., Cleveland, O.

Choosing a Breed.

One of the most difficult questions to decide in the commencement of poultry keeping is the selection of a breed from which the best results can be obtained, says *American Poultry Advocate*. Many a beginner has spent money, labor and time trying different breeds before the one has been found that was best adapted to his situation and requirements.

It is known that certain breeds have qualities peculiar to themselves, as for instance Wyandottes excel as broilers; Leghorns as egg producers; Brahmas in flesh and weight; white Plymouth Rocks approach nearest to the best all purpose fowls, and so on. Besides this, however, it would appear that every man or woman who has a liking for poultry keeping has some one breed with which they would be more successful than with any other. They seem to understand this breed better, push it to the best advantage and from it obtain the best results. Even when two or more breeds are kept, one will usually be the favorite. There is little doubt that the poultry keepers who are making the most, and are the most successful are the ones that are specialists with one particular breed.

While the situation of the place on which poultry is to be kept should never be lost sight of by the beginner, its adaptability to certain requirements as to whether eggs, broilers or market poultry would bring the best results, still after all it is in perfecting a breed that the most money is made in the end, and therefore the taste and liking of a beginner in making a choice of a breed should play an important part.

In perfecting a breed and in its right care, banding and management so that stock and eggs can be sold to other fanciers, one is not brought into active competition with every farmer or keeper of a few hens, as is the case in the sale of eggs or market poultry. Therefore in the lines of this special endeavor better results can be obtained.

It would seem then that after the special requirements of the situation are taken into consideration, it would be best to choose that breed which one likes the best or those that approach nearest to these requirements.

Green Bone for Fowls.

As an egg producer green bone has no equal. Of course, it must be fed in moderation and in connection with a sufficient supply of everything else that a laying hen needs.

There is a great difference in green bone; some material from the meat markets is permitted to remain in the heat until it is unfit to feed to anything. Such stuff is objectionable in every way. A man that would feed decayed material to hens is not the kind of man to deal with. It is liable to lead to disease in the poultry and it is sure to impart a flavor to the eggs.

Clean cut bone varies in quality because sometimes there is much more meat scrap with it than at other times. The raw meat scrap probably is more valuable than the cut bone, but a reasonable mixture of the two should be secured if possible.

It is much better to have a bone cutter at the poultry house and to buy the green waste directly from the meat market as needed. If necessary, owing to distance, to keep a supply on hand, it should be kept in an icebox or a cool place as carefully as meat is kept for the table.—*New York Farmer*.

If you raise fifty pigs, the service fee for each one would be 50 cents, if you buy a pure-bred boar that costs \$25. That is a small cost price for the early maturity, symmetry and evenness a bunch of pigs by a good sire will have.

WESTCHESTER RACING ASSOCIATION

Under the Auspices of The Jockey Club and National Steeplechase and Hunt Association

RACE COURSE, BELMONT PARK
QUEENS, LONG ISLAND, N. Y.

OFFICE, 571 FIFTH AVE., NEW YORK
"THE WINDSOR ARCADE"

1906—1907—1908

SPECIAL NOTICE TO OWNERS AND TRAINERS

The fixed events for now yearlings, to run when two years old in 1906, when three years old in 1907, and for foals of 1905 to run in 1908 will be duly announced to close September 15, 1905, viz: in 1906, The Juvenile, The Fashion, The Eclipse. 1907, The Withers, The Ladies, The 41st Belmont for now yearlings. 1908, The 42d Belmont for foals of 1905. The Tenth National Stallion Race of 1901 will close for stallions at the same time.

AUTUMN MEETING, 1905.

The following events will close and name at midnight of Tuesday, August 15th, as by their several conditions

For Two-Year-Olds.

THE HURRICANA—\$1500 Added.

THE HURRICANA (selling), for two-year-olds, maidens at time of entry. By subscription of \$50 each, \$20 forfeit, to the winner, with \$1500 added, of which \$250 to the second, \$150 to the third. Five furlongs.

THE RANCHO DEL PASO—\$1500 Added.

THE RANCHO DEL PASO, for two-year-olds, non-winners of \$5000 at time of entry. By subscription of \$50 each, \$20 forfeit to the winner, with \$1500 added, of which \$250 to the second, \$150 to the third. Named weights. Six furlongs.

WHITE PLAINS HANDICAP—\$3000 Added.

THE WHITE PLAINS HANDICAP, for two-year-olds. By subscription of \$50 each, half forfeit, \$10 only if declared, with \$3000 added, of which \$400 to the second, \$200 to the third. Six furlongs.

For Three-Year-Olds.

THE HUNTER—\$1500 Added.

THE HUNTER HANDICAP, for fillies three years old. By subscription of \$50 each, half forfeit, \$10 only if declared, with \$1500 added, of which \$250 to the second, \$150 to the third. One mile.

THE FAIRVIEW—\$1500 Added.

THE FAIRVIEW (selling), for three-year-olds. By subscription of \$50 each, \$20 forfeit, with \$1500 added, of which \$250 to the second, \$150 to the third. One mile and a sixteenth.

THE DIXIANA—\$1500 Added.

THE DIXIANA, for three-year-olds, non-winners of \$5000 in 1905 at time of entry. By subscription of \$50 each, \$20 forfeit, with \$1500 added, of which \$250 to the second, \$150 to the third. Named weights. One mile.

THE RAMAPO HANDICAP—\$3000 Added.

THE RAMAPO HANDICAP, for three-year-olds. By subscription of \$20 each, \$10 only if declared. Starters to pay \$30 additional, with \$2000 added, of which \$250 to the second, \$150 to the third. Mile and a furlong.

For Two-Year-Olds and Upward.

THE MANHATTAN HANDICAP—\$1800 Added.

THE MANHATTAN HANDICAP, By subscription of \$20 each, \$10 only if declared. Starters to pay \$30 additional, with \$1800 added, of which \$250 to the second, \$150 to the third. Last six furlongs, Main Course.

AUTUMN HIGHWEIGHT SERIAL HANDICAPS—\$5000 Added.

By subscription of \$30 each, which shall entitle the entry to start in each of the three handicaps, viz: The Bronx, the Westchester and the Fordham Highweight Handicaps on payment of an additional starting fee of \$10 for each race. Also all entries shall be handicapped free for all over night handicaps during the meeting if duly entered, saving declaration fees.

CONDITIONS OF THE BRONX HIGHWEIGHT HANDICAP. \$10 additional for starters, with \$1500 added, of which \$300 to the second, \$200 to the third. Last six furlongs, Main Course.

CONDITIONS OF THE WESTCHESTER HIGHWEIGHT HANDICAP. \$10 additional for starters, with \$1700 added, of which \$300 to the second, \$200 to the third. Last six and a half furlongs, Main Course.

CONDITIONS OF THE FORDHAM HIGHWEIGHT HANDICAP. \$10 additional for starters, with \$1800 added, of which \$300 to the second, \$200 to the third. Last seven furlongs, Main Course.

For Three-Year-Olds and Upward

THE NEW ROCHELLE—\$1500 Added.

THE NEW ROCHELLE (selling) at 10 lbs. above the scale. By subscription of \$50 each \$20 forfeit with \$1500 added, of which \$250 to the second, \$150 to the third. One mile, Main Course.

Supplementary Entries for Autumn Meeting, 1905.

For Two-Year-Olds.

THE NURSERY HANDICAP—\$3000 Added.

THE NURSERY HANDICAP. Subscription of \$75 each, the only forfeit if declared by 2 P. M. of the day before the race. If left in after that time to pay \$150 each, with \$3000 added, of which \$500 to the second, \$100 to the third. Six furlongs.

NOTICE.—Entries for the above are received only under the conditions as printed and in all respects subject to and in accordance with the Rules of The Jockey Club and The National Steeplechase and Hunt Association. For entry blanks address

FOR SALE.

"A STRATHWAY"

A Dapple Gray Gelding by Strathway out of a Thoroughbred Mare.

MR. FRISCO is 8 years old and SOUND; weighs 1050 lbs. He is one of the grandest road horses in America today. Fearless of all objects on road; a very fast walker; does not pull or lug on the bit; carries his head high; goes straight and never stumbles; will stand when tied and there is no road too long for him. He is a good feeder and a good looker at all times, either before or after driving. His speed qualities are phenomenal. He never saw a race track until last spring, when he was sent to Mr. Al McDonald at the track at Pleasanton, who drove him a mile in 2:22½, last half in 1:08½, with only thirty days' training. Mr. McDonald says he will trot a mile in 2:15 with three months' handling. The owner of this horse has to go East and has left the horse, huggy and harness in charge of Mr. Thomas Kinney at the Fashion Stables, who will show the horse or outfit.

THOMAS KINNEY,
Fashion Stables, Ellis St., S. F.

Daedalion 2:10 For Sale.

Can Beat His Record Three Times in a Race.

Is entered at Fresno and ready to start. A high-class Race Horse and a Coming Sire.

Sire, DIABLO 2:09 1-4.

Dam GRACE (dam of DAEDALION 2:10, Crooke 2:15, Eagle 2:19½, etc.) by Buccaneer.

Owner's business will not permit him to devote any time to racing. For further particulars address

BREEDER AND SPORTSMAN.

PARK HORSE FOR SALE.

HIGH-CLASS ROADSTER, COAL BLACK, 15½ hands, five years old, weighs 1000 pounds. Is a very handsome horse, a perfect beauty; fearless of all things on the road; has been driven by a lady. Has lots of speed, but never trained on a track. Sound and all right. Sire and dam both registered. Apply to

E. A. GRIGSBY, Napa, Cal.

A GOOD FILLY FOR SALE.

HANDSOME TWO-YEAR-OLD FILLY BY Lochinvar 2:20, he by Director II. 2:27 by Director 2:17; first dam Myrtle by Sterling 6:23; second dam Theresa by Prompter; third dam Express by Flaxial; fourth dam Lady Narley by Marion, son of Mambrino Chief II. This filly is well broken, perfectly sound, good gaited and a first-class prospect. For further particulars address

Oleo Scandal Exposed.

Dairy and Food Commissioner Warren of Pennsylvania informs President Roosevelt that oleo colored with azo, a poisonous coal tar dye, has been sold for the best dairy butter to all the United States ships, the camp, marine barracks and hospital at League Island for many months. He also charged that the United States officers had knowledge of this oleo traffic as far back as March 25th. Two samples of supposed butter taken on board the receiving ship Lancaster, and one on the battleship Massachusetts were found to be colored oleomargarine, as also were the samples taken from the barracks and the gunboat Scorpion.

It is understood that the contract with the federal government, under which this oleomargarine is furnished, expressly stipulates for fresh butter, "extra creamery." If this is so the government is not getting under this contract what it has a right to get, and what the contractor agreed to furnish, but a much cheaper and inferior article, and is thus being defrauded. Not only that, but an unfair advantage is being taken of honest bidders for this contract.

Mr. Warren, in a detailed letter to the President, said: "Our department in this matter is acting with the single purpose of protecting the public from fraud, and to protect the dairy interests of the state, and we cannot proceed ourselves, as it is a violation of the United States statute, and the only effective way to accomplish the purpose we have in mind is through a prosecution by the federal government."

The President at once called a conference at which were Commissioner Warren and the attorney for the dairy and food commission of Pennsylvania. The meeting was presided over by President Roosevelt, who assured the dairymen that the matter would receive prompt consideration by the proper officials of the federal government, after which an order for a complete investigation by the navy department was made.—*Exchange.*

Quality in Native Steers.

The principal cause of lack of quality among home-bred steers is not due so much to lack of infusion of pure blood as to the indiscriminate admixture of the blood of breeds of both beef and fatty types.

The practice of shifting frequently from one line of meat production to another, or from meat making to dairying, with the ups and downs of the markets, has brought with it disastrous results. It is this practice which has led to more or less breeding back and forth of the same females to beef or dairy sires and the consequent production of mixed types. In shifting from one line of meat production to another while the few may make so-called lucky hits, in general the practice is disastrous, if we are to succeed we must adhere tenaciously to fixed lines of production.

The individual who can speedily and successfully adapt himself to radical changes is extremely rare. We desire to issue a word of warning concerning the purchase of young cattle for grazing or feeding from dealers who occasionally pick up so-called bargains in stock.

The Ideal Route for The Angler and Outing Trips

One day's ride from San Francisco will take you to some of the finest Trout Streams in the State. Along the line and within easy distance are many of the best Springs and Summer Resorts in the State. The Company maintains a Fish Hatchery and annually stocks the many streams reached by its road. One million Trout Fry were planted last year in these streams.

Black Bass Fishing can be enjoyed in Russian River near Guerneville, Guernewood Park and Camp Vacation, in season.

The best Striped Bass Fishing waters on the Coast reached by the Thuron Ferry.

VACATION FOR 1905

Issued annually by the Company, is now ready. This is the standard publication on the Coast for information regarding Mineral Springs, Resorts, Country Homes and Farms where summer boarders are taken, and Select Camping Spots.

Beautifully illustrated, 150 pp. and can be had in response to mail request or at ticket offices.

TICKET OFFICES—650 Market Street (Chronicle Bldg) and Thuron Ferry, foot of Market Street.

THE CONSOLATION HANDICAP

—at the—

GRAND AMERICAN

Held at Indianapolis, June 27-30, 1905. was won by Mr. Jas. T. Atkinson of Newcastle, Pa., score 99 out of 100 from the 18-yard mark, using

PETERS FACTORY LOADED SHELLS

This was the Only Event During the Entire Grand American which was won from Behind the 16-yard Line. Many other Notable Scores were made with Peters Shells, among them the following:

1st on Practice Day, F. M. See (tie), 99 out of 100. 1st on First Day, L. H. Reid (tie), 99 out of 100. 2d in Preliminary, Wm. Veach (tie), 97 out of 100. 3d in Grand American, M. Arle (tie), 97 out of 100. In the Consolation Handicap, 2 scores of 98, 5 of 97, 4 of 96 and 25 others above 90 were made with Peters Shells.

All of which merely goes to prove that Peters Shells are WINNERS.

No. 1 "Jersey" Cut-Under Truck

This Truck is the result of years of endeavor to produce a wagon that has great carrying capacity, ample strength without superfluous weight, low enough to the ground to minimize the labor of loading.

Can turn short among trees, and can be used on the roads as well as on the farm.

The "Jersey" is a pronounced success, not only for the transportation of fruit, but as a general purpose dray in villages and small cities.

Terms—One Year \$3, Six Months \$1.75, Three Months \$1
STRICTLY IN ADVANCE.

Money should be sent by postal order, draft or by registered letter addressed to F. W. KELLEY, 36 Geary St., San Francisco, Cal. Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

San Francisco, Saturday, August 12, 1905.

A RACING LAW is needed in California and the owners, breeders and trainers of harness horses should unite in an effort to have a reasonable statute governing racing passed at the next session of the Legislature. One has only to read the daily press to know that all over this country, except in those States where such laws are in force, the harness meetings are being interfered with, and will continue so to be, unless horsemen organize for the protection of their interests. It is perfectly plain to all that this fight against betting on speed contests was not inaugurated to suppress harness racing, but has been instigated on account of the long continued running meetings and the presence of pool rooms. Ohio, Illinois, Missouri, Indiana, New Jersey and many other States have laws prohibiting betting on horse races, and these laws were passed with the sole purpose of closing the pool rooms and stopping the running meetings which had fallen into the hands of, and were being conducted by race track gamblers. We do not believe there is a community in the United States where a week of clean racing would not be welcome, as nine-tenths of the people love good horses and enjoy seeing them race, but if the pool rooms and bookmakers' meetings can be suppressed in no other way than by prohibiting all betting, then these communities will willingly agree to such prohibition, as the sentiment of the majority of the people in this country is that race track gambling is an evil that must be checked. The time has passed for argument that betting on horse races is no greater evil than gambling in wheat or other futures. The thing for horse owners and breeders to do is to recognize the situation. A bill that would limit racing in any county in the State to thirty days in the year, and make auction and mutual pools the only system of betting, with a certain percentage on the amount wagered to go to charity or the support of agricultural fairs, would meet with favor among the people. There would be strong opposition to it in certain circles but with the united aid of the harness horsemen and others, there would be little trouble in making it a law.

THE DEATH of Hon. William Ellsworth Greene, Superior Judge of Alameda County, California, which occurred in this city early Monday evening of this week, has removed from this earthly sphere one of the leading jurists of California, and one who had devoted much time and thought to the breeding of the trotting horse, a love for that noble animal having been acquired by him when a boy in the State of Maine, of which he was a native. Judge Greene was Superior Judge of Alameda County at the time of his death and had occupied a place on the bench there for twenty-five years. He was born in Farmington, Me., November 14, 1836. He was educated in the public schools and was graduated from Bowdoin College, one of New England's famous institutions. In 1863 he came to California and taught in the public schools of Stockton for a short time, following that experience by entering the legal profession. During the Presidential campaign of 1864 Judge Greene took an active part in this State, touring San Joaquin County for the re-election of Abraham Lincoln. From the birth of the Republican party he was an ardent partisan, although his subsequent elevation to the bench precluded much further public effort in that direction. In 1865 he was elected to the Assembly from San Joaquin County and in the Legislature voted on the amendment to the constitution of the United States abolishing slavery. For two years afterward he practiced law and in 1863 took his seat on the

bench of San Joaquin County, where he served until 1874. Judge Greene resigned and went to Oakland in 1875, where he followed his profession until 1879, when he was elected Superior Judge. Election after election followed with Judge Greene always returned by a large vote. A year or so ago his health began to fail and he slowly declined. At times a serious throat trouble gave his family cause for grave alarm, but he resisted the encroachment of the disease with the strong will that was characteristic of the man. Judge Greene married Isabelle Webster in 1869. He lost his wife in 1893, and his high devotion to his family has been one of his chief characteristics. Four children survive him—Mrs. J. B. R. Cooper of Monterey, Mrs. Lathrop W. Jewett of San Francisco, Carlton W. Greene, also of this city, and Laurence L. Greene, deputy prosecuting attorney of Oakland.

Cherishing a great love for the trotting horse, Judge Greene had been a breeder of fine stock since his boyhood. He brought the stallion Winthrop 505 to this State in 1870, and always owned a few well bred trotting mares that he mated to the best stallions in the State. He was a close friend of the late Count Valensin and acted as one of the executors of that gentleman's estate, sending the stallion Sidney and a number of other horses from the Valensin farm to New York, where they were sold by the late Peter C. Kellogg. Among the horses bred by Judge Greene was that good winner and fast trotter Judge Greene 2:09 which East View Farm leased and raced, and was named by Monroe Salisbury for his owner when making the entries. Many other horses with records, and stallions and mares that have produced standard speed were bred by Judge Greene. He was a grand character—one of those straightforward, dignified, yet approachable, men who attracted men to him by his cordial manner, and commanded their respect by his unswerving rectitude. His death is a loss to California.

WHILE WE BELIEVE that wagering on speed contests is no crime, and when indulged in, as it is at county fairs and short meetings, is a clean, legitimate sport, we take no stock in the argument raised by some that harness racing cannot be conducted without it. For proof of this the following from that reliable journal, the Western Horseman, is good testimony:

"That one's loss is another's gain was never truer than is the case in the present situation in harness horse racing. The anti-pool selling crusade is hard on many trotting associations, but it will prove a harvest for the county, district and State fair associations, most of which never have pool selling in connection with their races. The inevitable effect of the interference with the strictly racing meetings will be a great rush of horses to the fair meetings at which good purses are offered in the speed department. This will draw greater crowds to the fairs, and hence greatly help the fair associations financially."

HORSES SHOULD BE EDUCATED to meet an automobile on the road or elsewhere without fright. The devil wagons have come to stay, and the horse owner who is wise will see that his horses are accustomed to the noise and smell of the machines, and does not fear them in the daylight or when they are approaching him at night with headlights looking like the glaring eyeballs of the fierce Numidian lion. The motors have come to stay and every intelligent horse breeder will recognize this fact and also the one that they have not nor will not lessen the demand for good horses. As horses in the city are of little value that are afraid of motor vehicles of any kind, so horses in the country will not find ready sale if they are afraid of steam or electric cars or the benzine buggies. Electricity is moving car lines all through the country where steam cars cannot go except at great expense, and the country horse, to be of value, must now be "city broke and fearless of all objects." The wise owner, who cares for his own safety and that of his family, or who expects to realize the worth of a horse when offering him for sale, will see that he is made familiar with automobiles in all their various speeds, colors and sizes, as well as odoriferous variety. It is the condition of their presence and not the theory of their being a nuisance that confronts the horse owner at the present time.

Ed Geers bred and still owns Walter Direct 2:05½, and he is thought to be faster than his famous sire, Direct Hal, which won more money in a single season than any harness horse that ever raced. Going slow, Walter has a rolling, tumbling, nodding way of going that makes one think he is lame; but such is not the case. Many of the best pacers have had the same characteristic. Joe Patchen, old Hal Pointer, Direct Hal and John M. were not the "oil-in-the-can" sort, going slow; but, oh my, when they got straightened out, how they could slip along!

HOOF BEATS

See Zolock page at Santa Rosa.

The meeting opens on Wednesday next.

The track record will surely be broken.

Railroad tickets can be had at reduced rates.

Winning speed is worth money. An offer of \$30,000 has been refused for Sadie Mac 2:06½.

Well, Brother Griffin, Sweet Marie "bears the banner of recuperation" all right, doesn't she?

Mr. Pickering of Pittsburg, owner of Dr. Strong 2:06 refused an offer of \$12,000 for him last week.

Trainer Stinson, who drives Sadie Mac 2:06¼ in all her races, is a brother of Dr. J. C. Stinson of this city.

A syndicate of Detroit horsemen made Ed Geers an offer of \$20,000 for Walter Direct, but the silent man declined the offer.

A finely matched pair of geldings 15.3 hands high is advertised for sale by T. C. Cabney. The advertisement appears in this issue.

Stiletto by Steinway, dam Nola by Nutwood, reduced his record to 2:14¼ in the second heat of a race which he won in straight heats at Readville, Mass., August 5th.

A. Mastin of Sacramento advertises two fine stallions for sale—John A. 2:12½ and Guy Carlton, one of the best bred colts in America and paid up in the Occident Stake.

A standard bred son of Mendocino is offered for sale at a reasonable figure. Weighs close to 1100 pounds and has trotted in 2:18¼. See M. M. Donnelly's ad in this issue.

A San Francisco man who owns a trotting mare has decided to call her Reciprocity. He says he has spent a lot of money to make her go, and she reciprocates by making his money go.

McKinney stallions are in demand more and more. A well-bred and fine individual by this great sire is advertised in our columns for sale at a low price by Dan Redmond at San Jose.

All the open classes advertised by the Readville association have been declared off, but the regular stakes already closed will be decided. The meeting will only last two days, as pool-selling is not to be permitted.

One of the big events of the season will be a match race between Dr. Strong 2:06 and Tom Axworthy 2:07¼ for \$5000 a side. The race is to take place at Pittsburg at a date to be set, and will be best three heats in five.

Nathan Straus of New York City has leased the property at Edgewood Park, Alexandria Bay, N. Y., formerly known as the Alexandria Bay Driving Park, from I. P. Lamson of Cleveland, O., for a series of years, and will immediately have it put in shape by a professional track builder, after which he will take his horses from Brooklyn there. Mr. Strauss will join the National Trotting Association, and will conduct a series of meetings during the summer.

Many temporary stalls are to be built at the new State Fair grounds at Sacramento to accommodate the live stock that will be exhibited during the fair, but these temporary quarters will be more comfortable and more sanitary than those which housed live stock at the old grounds.

The Eureka, Humboldt county, fair, will open September 13th and continue four days. A program of harness and running races has been provided, with purses ranging from \$100 to \$400. The Eureka Fair is one of the best attended fairs held in California. W. L. Lambert is secretary, and will be pleased to furnish any information to parties addressing him at Eureka.

All the Way From Pike.

Thousands of the best friends of Absorbine reside in the small towns and villages throughout this country. They are horsemen who lay claim to none of that superiority of knowledge concerning horse remedies that many of the residents of our large cities affect. They don't believe that every testimonial that appears in their favorite horse paper was purchased with a price. They know that the price of a bottle of Absorbine is no more than the veterinary would charge to just look at a horse and tell them what is the matter. They like to get the practical experience of curing the ailment themselves. They get the best results because they use the medicine with their own hands and they use it economically and follow directions faithfully. Here is a specimen letter from one of this class of people:

SOMERSET, Pike Co., Miss., July 3, 1902.

W. F. Young, Springfield, Mass.
Dear Sir:—I used your Absorbine about three years ago on my horse for bog spavin and found it did everything you claimed for it. I must admit that I was surprised at the results, as no one could ever tell now which leg was hurt. Yours truly,

J. H. RYAN.

Absorbine \$2 per bottle, express prepaid.
Address W. F. YOUNG, P. D. F., Springfield, Mass.

New Mexico Pleased With Caustic Balsam.

FARVIEW, N. M., Jan. 28, 1905.
The Lawrence-Williams Co., Cleveland, O.
Our Mr. Jacob M. Blun has used Gombault's Caustic Balsam on a horse that had sweeney of long standing, with excellent results.
BLUN BROS.

Notes and News.

They are already calling Sadie Mac the Sweet Marie of 1905.

An offer of \$15,000 is said to have been refused for Tom Axworthy 2:07 recently.

Ed Geer's horses won \$6425 at Detroit, he being the leading money winner of the meeting.

There will be one harness race and three running races each day at the Spokane, Wash., fair.

Burnut, a bay gelding by Neernut 2:12½, was second every heat in a race at Kalamazoo last week. The best time was 2:19.

Only two of the pacers starting in this year's Chamber of Commerce stake wore hoppers and both were outside the money.

Stanley Dillon 2:07½, winner of the 1904 M. & M., will be used for road driving in the future by his owner, J. H. Brown of Detroit.

Bonnie Russell 2:10¼ is good this year. He worked a mile at Readville two weeks ago in 2:10¼, the last quarter of the mile in 31¼ seconds.

Delilah 2:14 is the fastest three-year-old pacer, and Amhush 2:14¼ the fastest three-year-old trotter of the year. Both are by Zolock 2:05¼.

Sadie Mac 2:06½ is the fastest trotter ever bred by the late J. Malcom Forbes. She is by Peter the Great 2:07¼, dam Fanella 2:13, by Arion 2:07¼.

The practice is pretty general over east and through the middle west to give a horse that lowers the track record an extra prize of from \$25 to \$100.

Chas. DeRyder thinks Judge Green 2:09 will not be able to race again. Entirely sound, this horse should have trotted to a record of 2:06 or better.

Schwartz & Chase have secured the betting privileges for the Breeders' meeting at Santa Rosa. Only auction pools and mutual pools will be sold.

El Millagro 2:11¼ by McKinney, won the first heat of the 2:12 trot at Readville, August 2d, and was only beaten a head in 2:12¼ by Lady Gail Hamilton in the second heat.

Glenwood M. 2:08¼, a winner at Detroit, is described as a strikingly handsome horse of the coach type. He promises to be one of the sensational trotters of the year.

The gray gelding Jim Ferry was started at the driving club matinee at Denver July 22d against the track record for a half mile this year, which was 1:10. He made it in 1:03¾.

Bozeman opens first among the Montana meetings and a good meeting is promised. Reports from there say that a number of horses are in training and that everybody is feeling right for the fall contests.

The Great Western Circuit opened at Freeport, Ill., last week. Davenport, Iowa, comes next, and then the towns of Decatur, Galesburg, Hamline, Milwaukee, Libertyville and Springfield will follow in the order named.

Mr. Isaac Morehouse intends starting his fast trotter Silver Bow for a record during the Santa Rosa meeting. This horse should have had a record below 2:10, but a bad leg has made it impossible to race him this year.

Rey del Diablo has been racing way across the continent at Saugus, Mass. He started in the 2:12 pace there July 26th, and got fourth money. The race was won by Ginger in straight heats, the best time being 2:11¼.

The three-year-olds will furnish some great racing at Santa Rosa next week. The Breeders' Futurity is one of the big features of the California Circuit every summer and is looked forward to with great interest by the breeders of harness horses.

California should have two \$5000 stakes every year—one for trotters and one for pacers. If there were a good trotting track in San Francisco or Oakland, two such stakes could be given, and they would do much to keep up the interest in harness horses.

The Pacific Slope Stakes, \$1500 for 2:20 class pacers, will be the feature of the day at Santa Rosa next Wednesday, when the Breeders' meeting will open. The class of the race by this year's form are Glen, Nellie R., Fearnot, Bessie Barnes and Argyle.

A song of bygone generations reproached the French with calling their mothers "mares" and all their daughters "fillies," and it is easy to imagine that "filly" is connected with "fille." As a matter of fact, the word "filly" is of Scandinavian origin and is really a diminutive of "foal." Shakespeare makes Puck disguise himself in "likeness of a filly foal." "Mare" is the Anglo-Saxon "mere," feminine of "mearh," a horse, a trace of which remains in "marshal," which properly signifies master of the horse.

The Broncho, Charlie Dean's pacing mare by Storm-cliff, is hot stuff, and is winning very fast races on the half mile tracks this year for little money. Last week she won at Streator, Illinois, in straight heats in 2:06½, 2:07¼, and 2:07½. The purse was only \$300.

The well known drivers, Al Thomas, Ed Geers, W. L. Snow and Charley DeRyder, who raced at Detroit, all spoke in praise of the three-heat plan under which the races were contested. The old followers of the circuit who patronize the pool box did not like it, however.

Robert Lee, the Indiana pacer by Gene Lee, out of an untraced dam, took a record of 2:06½ in the fourth heat of a race at Kalamazoo, August 2d. Gene Lee is a son of Gambetta Wilkes, the son of George Wilkes that is putting so many new ones in the list in recent years.

Adam G 2:14¼ is entered in the 2:27 class trot at Santa Rosa, which is the first race on the program of Wednesday, the opening day of the meeting. He will be driven by J. W. Zibbell, father of Willard Zibbell, who trained the horse and drove him to his record at Los Angeles.

Racing associations in New York last year paid \$190,253 to the State, which is five per cent of the gross receipts during the season. In Illinois, Missouri, California and other states that have no law regulating betting, the State treasuries get nothing from the racing associations.

Directe, a brown three-year-old filly by Direct 2:05½ out of Bessie R. 2:25½ by France, recently trotted a mile over the Empire track, driven by John Duly, in 2:15½, the last half in 1:04½. This filly is owned by Mr. F. T. Steinway of New York, and is entered in the Kentucky Futurity.

Mack Mack beat 2:10 at Detroit in the second heat of the 2:12 trot won by Sadie Mac in 2:08½. The McKinney gelding was second in that heat, about three lengths back. The eastern horsemen say he will get a record of 2:10 or better the first time he wins a heat.

Mr. A. B. Gwathmey will match his gelding Tiverton 2:01½ against any trotter in the world for \$10,000 a side, and he don't bar Lou Dillon, Major Delmar or Sweet Marie. Mr. Gwathmey has a great trotter, one of the fastest ever hooked up, but the trotter's speed cannot equal his owner's faith and gameness.

The trotting stallion Starboul by Stamboul 2:07½, owned by C. W. H. Doubler, Warren, Ill., dropped dead recently from heart disease. He was bred by the late L. J. Rose and foaled the property of Owens Bros. of Fresno. His dam was Madam Harding by Overland, son of Bald Chief, second dam Kate Taber by Mambrino Messenger.

It is very likely that a fair and race meeting will be held during the latter part of September at the Concord, Contra Costa county, track. The parties who hold a mortgage on the property are negotiating for its purchase, and their intention is to make many improvements in the buildings, etc., should the grounds come into their possession.

Bert Horton, the brown pacing gelding owned by a man named Corbett, is racing through the North Dakota circuit under the name of Brett, and winning about everything he goes after. He was entered in some of the Montana races last year, but some of the boys got on to him and he was not started. It may be that Brett is the notorious Fred Wilton 2:09¾, mentioned elsewhere in this issue.

J. M. Herbert of Denver, owns a filly sired by Walter Direct 2:05¾, winner of this year's Chamber of Commerce stake. Walter Direct served a few mares before he was put in training and Mr. Herbert was one of the fortunate ones to send a mare to him. The mare is by Directly 2:03¼ and her dam by Star Pointer 1:59¼. The filly is pacing bred with a vengeance.

By winning the Chamber of Commerce Stakes with Walter Direct, Geers made a number of records. He is the only driver who has won the stake three times. Each time he won he made a new record for the stake. The record up to 1902 was 2:08¾; this he reduced to 2:06¾ when he won with Direct Hal, the sire of this year's winner. With Baron Grattan last year he reduced the record to 2:06¼, and on July 24 to 2:05¾ with Walter Direct.

Some months ago Sam Casto, the well-known Oregon trainer and horseman, sued Mrs. Emma Murray for the possession of the stallion Diablo 2:09¾, which he claimed he was entitled to under a lease. The County Court wherein the suit was commenced decided in favor of Mrs. Murray. Mr. Casto's lawyers took an appeal to the Supreme Court, which last month handed down a decision affirming the judgment of the lower tribunal. Diablo is now at Fresno.

It is proposed by the directors of the California State Agricultural Society to sow the infield at the track in alfalfa. If a good stand is secured next spring, the soft green of the clover will be very restful to the eye during the bright sunny afternoons of September when the races are held, and will add much to the attractiveness of the new fair grounds, as well as furnishing much feed for show stock.

Auget Baron, the very fast gelding by Baron Wilkes out of Lady Wilton, has been taken to the home of his owner, I. Morehouse of Milpitas, and turned out. This gelding trotted very fast in his work at San Jose this year, but received an injury in the way of a sprain or something similar, and will not start this year. Since Mr. Morehouse took him home he has been improving, and it is to be hoped he will entirely recover, as he is the promise of a 2:10 horse.

Vision 2:09, the bay gelding by Vanquish, whose picture adorns our title page this week, is an entry in the 2:13 class pace which is on the program for the opening day of the Breeders' meeting at Santa Rosa. His record of 2:09¼ was made at Los Angeles last month, where he won one race and was second in another. He is in Fred Ward's string and is the first 2:10 performer bred by the Witch Hazel Stock Farm, owned by Van De Lashmut of Portland, Ore.

The track at the new State Fair grounds at Sacramento has been completed. It was constructed under the supervision of A. M. Allen, who laid out the Tanforan, Oakland, Ingleside and Ascot Park tracks, and is considered the leading race track builder in America. William Fieldwick, superintendent of the California Jockey Club, will put the new track in shape for the races to be held fair week, which will begin September 2d. The soil of the track is yellow clay, the very best for the purpose, and trotters and pacers should go very fast over it if it is properly worked.

At the conclusion of the Chamber of Commerce Walter Direct was presented with a superb floral trophy by the Detroit Association, while both the horse and Geers received ovations from the crowd. The victory was especially popular on account of Walter Direct being the personal property of Geers himself. The "Silent Man" has now won the C. of C. in three of the last four renewals. Last year he piloted Baron Grattan, and in 1902 he was behind Direct Hal, who is the sire of Walter Direct. Direct Hal never lost a race that season, and it is predicted that the son will eclipse the record of the sire. Geers considers him a better horse, and so do all the critics.

Mrs. L. J. Hastings of Los Angeles offers her grandly bred stallion Sky Pointer Jr. for sale. This horse is by Sky Pointer, an own brother to the former champion Star Pointer 1:59¼, and his dam is the McKinney mare Juliet D. 2:13½, dam of last year's four-year-old champion, Irish 2:08½. Sky Pointer died while a young horse and left but few colts. One of his get, Sally Pointer, took a record of 2:13¼ recently on one of the eastern tracks and is expected to lower this mark several seconds before the year is out. Sky Pointer Jr. is a handsome stallion and his colts are a very promising lot. He will be sold reasonable. See advertisement.

The law which provided an appropriation for the California State Fair prohibits the directors from permitting betting or gambling of any kind on the State Fair grounds. It is said that parties have secured a place on the opposite side of the road from the main entrance and will sell pools and make books on the result of all the races. All the patrons of the fair who desire to bet will have to do will be to secure a return check and step across the street, where they can back the horses to their hearts' content. There are more ways than one to remove the external membranous integument from a feline.

Can any horse named in the 2:09 pace make Zolock beat his record of 2:05¼ to win at Santa Rosa? This question is asked every day where California horsemen meet. If Daedalion is all right, the first heat will be faster than 2:06, and Kelly Briggs is known to be able to beat 2:07 three times when he is fit. Rita H. can beat any horse that can't show better than 2:09 three times, while Miss Idaho must be reckoned with where the heats are around 2:08. It will be a horse race at all events, and with good day and track Zolock will have to stretch his neck to win. This race will be paced on Friday, the third day of the meeting.

The noted ringer Fred Wilton 2:09¾ that has performed and been expelled under the names of Ormus, Finley Ross, Frank Derby, Rock Wilkes, Brooklyn Boy, Noah R., Elzaged, Wilkes Jim, Combine, etc., tried to start at Salt Lake City recently under the name of Ben J., but was recognized by Magnus Flaws, who was acting as presiding judge. The horse was in charge of a driver by the name of Bob Crawford, who hails from Oklahoma, and they are supposed to be heading for the Pacific Coast. The noted ringer is a pacer, a bay or brown gelding, nine years old, stands about fifteen hands high, has no white marks, goes in hoppers, is smooth gaited, and can pace close to or better than his record; in summer bleaches out to a light bay. Horsemen and managers of meetings should keep their eyes open for this fellow.

There is a great deal of ink wasted every year over the suggestion of new plans on which to race harness horses, but the old three-in-five seems to best suit those who make entries, and it is the entrance money that makes harness racing go. Nearly all the associations comprising the Grand Circuit get more than enough entrance money to pay their purses, and the gate receipts and other resources are large enough to pay a profit to the promoters. It is all very well for those who are not horsemen to talk about shortening races, and giving the public quick action, but the man who puts up \$500 for the privilege of starting in a \$10,000 purse against a big field of horses, likes to have as many chances as possible to get some of the money, and naturally the entries fall off when any conditions are made that will lessen the number of heats to three in every race.

OTHER PEOPLE'S OPINIONS.

"Volunteer" in Horse Review: Four great trotters beat 2:10 at the meeting. Dr. Strong took a record of 2:06, Sadie Mac one of 2:06½, Tom Axworthy one of 2:07 and Glenwood M. one of 2:08¼. Among these it was the performance of Sadie Mac that was most impressive. She scored so fast that it was hard for the others to get up with her, and when the word was given she burst away at a 2:02 gait and took the track in an instant—and it was all over. She came home in 2:06½ with her head swinging and her ears pricked and it seemed impossible at first that the mile could be so fast so easily as it trotted. From her manner of finishing—she literally romped all the last eighth—it was not illogical to believe that a mile in 2:05 would not have been beyond her.

The five-year-old daughter of Peter the Great 2:07¼ is, veritably, a trotting wonder. Her unbeaten three-year-old career stamped her such, but she is today, aside from her maturity in point of speed, a far superior trotting machine. It must be placed unequivocally to Harry Stinson's credit that he has improved her in every way. As a three-year-old she had a sort of stubby-going gait that led more than one critic to say that she would not train on to the low notch that others predicted. Stinson has eradicated this. She is still low-headed and low-gaited—but there is, at the same time, a snap and elasticity about her action that is new. She also takes more interest in the game. She was as staid as a brood mare in former days. Now she is full of glimp, her eyes flash, her ears play back and forth in the liveliest possible fashion, she is not only willing, but eager. And bodily she looks good enough to eat. She was always robust, with a big place for her dinner. Now she carries a lot of flesh, but it is hard and firm, and she sweats out as clear as spring water. The good horsemen simply stared, open-mouthed, at that 2:06½ heat and remarked, with a sort of comical unanimity: "There is the Sweet Marie of 1905."

Ever since her owner, Miss Wilks of the Cruickston Park Farm, at Galt, Ont., began investing so liberally in trotters, two years ago, every one has been hoping to see her get a "crackerjack." In Sadie Mac she has surely got one.

H. M. Hanna, president of the Cleveland Driving Park Company, says: "About September 1, when I have returned from my vacation, I will call a meeting of the board of directors to discuss future plans. The situation will be carefully gone over, including the advisability of again asking the legislature for a law permitting pool selling for a few days of the year on the grounds of the racing track companies. Just what will be decided on I can not say, nor have I made up my mind yet as to just what will be best for the company to do; whatever is done will be submitted to the stockholders for a vote. If it is decided to ask for another pool selling law, the horsemen of the State will aid us in pushing the legislation. Governor Herrick, I believe, will be defeated this fall, not only through the influence of horsemen, but through the influence of other interests. The legislature will represent the people as it did two years ago. Then we had a two-to-one majority on the pool bill in the house, and a safe majority in the senate. John M. Patison, the Democratic candidate, who will be elected, I consider a safe man, and I do not think that he will veto any pool selling bill that can be gotten through the legislature, notwithstanding his alliance with the temperance people. As the people will demand a pool selling bill, and Patison will recognize the wishes of the people, there is still hope for us."

Spirit of the West: The horse "man's best friend" has been a great factor in the growth of civilization in all nations, as far back as the history of man can be traced. Likewise, the horse has always been the most important factor in the growth and development of commercial life in all countries. Many inventions the past half century, such as railroads and new and improved farm machinery, has not in the least diminished the necessity of increasing the horse product of the country. In fact, at no time within the past twenty-five years has the production of horses been as remunerative to the producer as at the present time. About fifteen years ago, when the bicycle manufacturers reaped a rich harvest, and, in due time, lost millions of dollars on account of the discarding of the bicycle, the daily newspapers and some of the leading magazines were filled with articles on the "passing of the horse." But the noble horse did not pass out of use. Instead, he continued to move in good society, wore tailor-made wearing apparel and dined on pedigreed oats, corn and hay. After the bicycle craze died away, the manufacturers of the lifeless two-wheeled vehicle turned their attention to the automobile, and, like the bicycle, they have spent millions in manufacturing and advertising and have succeeded in creating no small amount of enthusiasm and many sales. However, already in the want and for sale columns of all the leading daily papers may be found any day "ads" offering for sale \$750 autos at "half price," including a half barrel of gasoline, or a meal ticket to pay for three feeds at the nearest electric light plant where storage batteries are groomed for a forty-mile drive. When the bicycle craze was at its zenith city municipalities were obliged to pass stringent laws to govern the speed of the bicyclers and to protect the life of men, women and children. The same necessity obtains today in cities due to the reckless auto drivers. The auto has even invaded the rural districts and the farmers are crying for State legislation to regulate the machines upon the public

highways. Spirit of the West's candid opinion is that before the State has time to legislate the auto craze will have dropped out of sight just as the bicycle craze did. Old Dobbin need not fear that his usefulness is over, or that he will ever fall in disfavor or disuse. While the inventive genius of the bicycle and the auto have succeeded in producing machines that touch the fancy and the pocketbooks of a limited number of people, the producer of horses has kept right on improving the blood, the type, quality and class of his products, totally oblivious to the inroads of a few machines that in due time will augment heaps of scrap iron that line the byways in all cities and towns.

Trotter and Pacer: The need of a thoroughly well fused and disciplined organization of horsemen was probably never so keenly felt in this country as at the present time. A militant sentiment of opposition to the race tracks seems to be abroad, and it bids fair unless checked to place an interdiction upon the sport in every State in the Union. The suppression of the speculative feature of the sport is, of course, the thing aimed at, and it is of no consequence whatever to a class of narrow people whose own interests are not jeopardized to know that speculation is an indispensable adjunct of horse racing, without which it could not exist except in the limited connection with county fairs. A thousand good and enthusiastic horsemen have wished that horse racing might be maintained without betting and hardly any of them would hesitate to make the sacrifice so far as their own personal inclinations or desires are concerned, but there has never yet been a man of any sense who has stood up and maintained that horse racing, as an independent and exclusive diversion can be conducted without pool selling, except at a pecuniary sacrifice. This just as much applies to the operation of trotting as running tracks. So far as an utter dependence upon this auxiliary to the sport is concerned, the trotters are no better off than the thoroughbreds. The people who are willing to destroy the whole fabric of racing for the purpose of striking at a feature of it which under certain circumstances may be productive of evil, are very intolerant and entirely unamenable to reason. They are not to be denied the possession of a clean and lofty motive, but they are utterly without discretion or discrimination. They do not realize that their efforts, if successful, have a deeper significance than the mere closing of tracks. They imagine that the only serious consequence of closing the tracks will be to deprive a few trainers and drivers, with their stable dependents, of an occupation, while as a matter of truth that result would be only one of the least of the evils which would follow their action. The race tracks are the mainstay and support of the breeders of the United States, whose business represents an enormous investment, and whose efforts have given this country a distinction possessed by no other nation in the world. There is justification for the pool selling that is necessary to keep the tracks in operation, in the prosperity and continued growth of the vast breeding industry, and if the matter could be presented to the law-makers of every State in this light by an organization truly representative of the important interests behind it, and directed with moderation of demand and wisdom of counsel, there is little doubt that it would receive consideration. But such an organization is something that has never existed and probably never will. There are numbers and strength in the ranks of the horsemen, but there are no leaders capable of fusing the mass into a homogenous organization for concerted effort.

THE GAITS OF THE SADDLE HORSE.

Concerning the gaits there is much misunderstanding, and some dispute. All horsemen know the walk and the trot, but not all can differentiate a canter from a gallop. And when it comes to the rack and the slow gaits, most horsemen class them all as "easy gaits" and let it go at that. As in many other instances in live stock matters where a little learning is a dangerous thing, there is plenty of debate over the different gaits and we are sometimes asked to settle disputes concerning them. A bit of eye education is usually necessary; that is, an illustration of the gaits will give a clearer understanding than a description of them. Here is a sample call for information of this character:

"What are the different gaits of a saddle horse? Describe the movements of the feet, in rotation to each other, in the different gaits. Give some of the details in training a saddle horse such as bridle, bits, reins."

The natural gaits of a horse are the walk, trot and gallop or run. Artificially, that is by education, the gallop is made into a canter, which is a gait performed by practically the same movement of the legs, but slower, more restrained and easier to ride. We then have one kind of a saddle horse called the walk-trot-canter or plain-gaited horse. This horse suits a lot of people primarily because they do not know any other gait; secondarily because they are imitators of the English fashion of riding, and lastly, and leastly, because they do not like other educated gaits which are easier on the rider.

These easier gaits are the running walk and the rack. The latter is also called single-foot, inasmuch as in this gait each foot has a separate contact on the ground, no two of them striking it at the same time, as in the trot and pace. But the official name of this gait is the rack, and it should be used. The running walk is called a slow gait, and there are two other gaits allied to it, the slow pace and the fox-trot. The slow pace is also sometimes called the stepping pace.

The name running walk defines the gait accurately and at once identifies it to the understanding. It is faster than a flat-foot walk, and is produced by a

movement of the legs more rapid than in a walk but in about the same rhythm. That is, each foot strikes the ground independently of the other. Most horses going the running walk bob or nod their heads and some of them even flap their ears in rhythm with their footfalls. It is an all-day gait, easy alike to the horse and the rider, and it covers ground at an astonishing fashion for its apparent speed. It is taught by urging a horse out of the walk but restraining him from a trot. The slow pace is a somewhat similar movement but borders more on the sidewheel gait or lateral pace, in which the two feet on one side of a horse strike the ground at the same instant. The true pace, however, is in no sense a saddle gait. It is rough and uncomfortable. A rider can not rise to it and save himself, as in a trot, and it is positively the worst gait a saddle horse can possess. In the slow pace this sidewheel motion is slightly modified so that the impact on the ground of the two feet on a side is broken, thus avoiding the rolling motion of the harness pace. The slow pace is a very comfortable gait, and is very showy, especially when a horse throws just a bit of knee action into it. It has grown common in the show ring during recent years, as saddle horse trainers appreciate its catchy qualities and endeavor to teach their horses to go this gait. The best saddle horse men, however, do not look on it with favor as it is so easily corrupted into the abominable side-wheel pace, which ruins a saddle horse for comfortable and satisfactory work. Unless a rider is careful his mount may almost imperceptibly degenerate from a distinct and correct slow pace into a plainly-defined pace. The fox trot is a slow trot or a jog-trot. It is a rather peculiar gait and not so desirable as the running walk or the slow pace. Some horses can not acquire either of these two gaits and so their trainers pull them down into a very slow trot and seek to pass that gait off as a fox-trot. It is a broken-time gait in a measure, somewhat easier than a pure trot.

The trot is the diagonal gait. The off fore foot and the near hind foot strike the ground at the same instant and the horse bounds off them to hit the ground again with the near fore and the off hind. This gives a two-beat gait. The impact of the feet on the ground is one, two, one, two. The pace is the lateral gait. The off fore and off hind foot hit the ground at the same interval, and the other pair on the near side follow. This is also a two-beat gait. The rack is a four-beat gait. Each foot hits the ground at a separate interval in a one, two, three, four beat. The rack can be distinguished by ear as far as the footfalls of the horse may be heard; each foot rings clear its own note on the hard ground.

In teaching the rack the horse is forced forward by the spur and restrained by the curb. His diagonal gait is thereby broken up and he flies into a four-beat gait. The rack is easy for the rider, hard for the horse. It is a showy gait and is performed at great speed sometimes. The trainer who has a fast-racking horse will generally keep him on that gait in the show ring, hoping to dazzle the judge by the flashiness of the performance. Unfortunately this trick succeeds many times, as some judges are too ignorant or too unbalanced to demand the other requisites of a saddle horse. Many a horse has racked his way to fame through the complacency of half-baked judges who proceed in the apparent belief that the rack is the only accomplishment demanded of a saddle horse.

The five gaits recognized by the American Saddle Horse Breeders' Association are the walk, trot, canter, rack and the running walk, or slow pace, or fox-trot. Either one of these three slow gaits will answer. Some horses can go only one of them, some can show them all. When a horse can show these five gaits he is called a gaited horse.

Saddle horses are differentiated by their gaits into two classes—the walk-trot-canter horse and the gaited horse. The gaited horse can do all that the walk-trot horse can do and more. It is far easier to finish up a three-gaited horse than a five-gaited horse, and saddle horse educators have not been displeased at the growing demand for three-gaited horses, as it much cheaper to furnish them.

The mouth of a saddle horse should first be made on a snaffle bit. He will walk and trot on the snaffle, he will rack and canter on the curb. The gaited horse is usually ridden with curb bit and single-rein, and the walk-trot-canter horse is usually ridden with hit and bridoon—that is the double bit or curb and snaffle with a pair of reins for each bit. It is easier to communicate through a horse's mouth by the use of the curb and the snaffle and two pairs of reins—and communication with a saddle horse should largely be through the mouth, assisted by the leg and heel.—Breeders' Gazette.

At a meeting held at Columbia, Missouri, last month W. O. Foote was present with his string, and noticed in the printed list that his pacer Ed C. was not down in the printed list as being entered in the 2:35 pace. He stated the fact to the program man, and the latter printed Ed C.'s name on the program among the starters in the 2:35 class. The secretary did not notice it, and Foote started the horse and won in straight heats, getting a mark of 2:16¼ for him. After the race the driver of the second horse started an investigation with the result that it was ascertained Ed C. was not entered in the 2:35 but the 2:25 class. So the owner of the second horse got first money and no record for his horse, while Foote got no money but a record for his.

Admiral Dewey, the brown stallion by Bingen 2:06¼, dam the famous Nancy Hanks 2:04, surprised the horsemen at Readville the day that Sweet Marie beat Tiverton, by trotting to a record of 2:09¼ in a trial against time. Admiral Dewey took a record of 2:14¼ as a three-year-old in 1901. He was put in training again this year, but had been but one mile better than 2:20 prior to his Readville performance.

FAST RACING AT BUFFALO.

Grand Circuit Meeting Largely Attended and Many Records Lowered.

BUFFALO, August 7.—Grand Circuit racing started in here to-day after a week of idleness for the horses at Cleveland. The excellent laws of New York State, under which all race meetings are held here, have made harness racing very popular with the people and the attendance to-day was close to ten thousand.

The 2:08 pace, for a stake of \$5,000, was the opening race of the program and an even dozen horses scored for the word. Miss Willamont was the favorite, but the race went to Knapsack McCarthy's entry Ethel Mc., after the Canadian horse Geary had taken the first heat. The Pacific Coast horses Bolivar and Oregon Maid were starters in this race, but were back in the rack most of the time. Bob, a handsome little gelding by Allie Wilkes, dropped dead in the first heat.

The three-year-old trotters put up an excellent and a fast race for the \$1,000 Liquid Veneer stake. Susie N. by Moko won the second heat in 2:13½, and the first and third heats went to Katherine L. by Liberty Chimes in 2:14½ and 2:15. The Phantom, East View Farm's \$10,000 colt, was last the first heat and distanced in the second.

Angle, winner of the M. & M. at Detroit, was the favorite for the 2:17 trot at \$100 to \$70 for the field of ten horses in which were Geers' Clarita W., Swift B., Grattan Boy, Fred Direct, and other good ones. Angle was not steady and Clarita W. made it three straight, with but one heat faster than 2:10. Swift B. got second money by being second in the first two heats and third in the last. The fast but erratic Helen Norte was distanced in the first heat. The summaries:

Pacing, 2:08 class, purse \$5000.

Ethel Mc., ch. m., by Jersey Wilkes (McCarthy)	8	1	1
Geary, ch. h., by Five Points (James)	1	8	3
Donn Garr, blk. g., by (Clark)	2	6	2

Helen Norte, b. m., by (Rutherford)	d		
Missinlaw, br. m., by (Curry)	d		

Time—2:09½, 2:12½, 2:14.

Tuesday, Second Day.

The \$10,000 Empire State Stake for 2:10 trotters was the big feature of the second day, and Peter the Great's handsome daughter Sadie Mac won handily in three straight heats, all below 2:10, while the California bred mare Zephyr by Zombro out of Zolock's dam took second money and trotted all her heats in 2:10 or better. Next to Sadie Mac, Zephyr is doubtless the highest class mare that is starting in the 2:10 classes this year, and her record of 2:11 will be lowered two or three seconds before the season is over. Mamie R. and Morosco were starters in this race but were outside the money, but beat the fast mare Grace Bond at that. Bonnie Russell was up third in the last heat, and is due to lower his record of 2:10½ before long.

In the 2:09 pace there was a field of fast ones, the Allerton horse Allerton winning three heats in very fast time, the slowest mile being 2:06½. The Monterey horse Irish 2:08½ was third in the last heat of this race and Billy Red's sister Josie was third and fourth respectively in the other two, getting fourth money.

In the 2:24 class trot Getaway made a good showing, being second in one heat and earning third money. All the heats were under 2:15, the second being in 2:10½. Uncle Charley Cahill's mare Sister Colette, an own sister to Charley Herr 2:07, won second money and trotted a good game race. Brilliant Girl was distanced the first heat. The summaries:

Pacing, 2:09 class, purse \$1000.

Allerton, gr. h., by Allerton (Brady)	1	1	1
Directum Miller, br. h., by (Millan)	5	2	2

Brilliant Girl, b. m., by (Curry)	d		

Time—2:14, 2:10½, 2:12.

Wednesday—Third Day.

Four fine races were trotted and paced at Buffalo on the third day of the meeting, 2:10 being beaten in every event. Ed Geers had a close call in the 2:04 pace. When in the third heat at the head of the stretch King Direct, pacing strongly, struck his hoof through the wheel of Locanda's sulky. There was a tangle of horses, sulkies and drivers, almost immediately swallowed up in a cloud of dust. When the scene cleared up Geers was seen prostrate on the ground; Driver Snow was on his feet making his way to the judges' stand; Locanda had been safely caught, and King Direct had started on a wild runaway, dragging along a somewhat shattered sulky.

Soon stable hands and others, including a physician, were at Geers' side. It was found he had suffered a bad cut of his leg and was stunned, but he speedily recovered his breath, and his first words were: "Now don't make a hurrah of this thing and scare everybody to death for nothing."

To show he was all right, Geers then came out, and back of Turley in the 2:11 trot which followed, won the deciding heat, being given a tremendous ovation. Locanda had two heats in the 2:04 pace when the accident occurred, and as the judges found both drivers blameless, placed the horses in the final heat so the Allerton stallion got the race. Locanda was favorite at \$50 to \$10 on the field before the first heat, and ruled favorite throughout.

Snyder McGregor, the favorite in the 2:08 trot, reduced his record to 2:06½ in the first heat, but was beaten the second heat by Norman B. in 2:06½. Direct View trotted a good race, and Tuna, though last, saved here distance, showing that she is improving.

John Caldwell was a starter in the 2:11 trot and won the first heat in 2:09, but made a break in the second heat and was distanced. Nora McKinney finished in sixth position the first heat and got the flag in the next.

The 2:17 pace went to Bolivar, as he stood best in the summary, although winning but one heat. Captain Derby, son of Chas. Derby, was second. The heat won by Bolivar was in 2:08½. Albata was in the rack at the finish of each heat. The summaries:

Trotting, 2:08 class, purse \$1000.

Snyder McGregor, b. g., by Gilman's McGregor (Hogan)	1	2	1
Norman B., blk. g., by Phyllas (McCarthy)	2	1	2

Time—2:06½, 2:08½, 2:09½.

Thursday, Fourth Day.

Tiverton beat Sweet Marie in the first two heats of the free-for-all trot to-day, but the mare beat him in the third heat and convinced those who saw the race that in a three in five plan she could take his measure almost any day. George G. trotted a very high class race in this event, being timed in better than 2:07 in the first two heats. Sweet Marie was favorite before the race and the betting was quite heavy.

Starter Newton raised a howl when he sent the bunch away in the first heat with the favorite, Sweet Marie, two lengths behind. Despite this handicap, the mare trotted a good mile. George G. was only two lengths behind Tiverton under the wire, and Sweet Marie, in third place, was apparently doing her best. In the second heat the conditions were about the same, George G. giving Tiverton a good race throughout the stretch.

The third heat was decidedly the best contest of the meeting. Sweet Marie and Tiverton went off in front when they were given the word. Trotting side by side until three-quarters was reached, the animals showed wonderful speed. It looked as though Tiverton would make it three straight heats. In the struggle through the stretch Sweet Marie displayed remarkable gameness, and foot by foot pulled away from Tiverton, winning the heat by a length. After the race A. P. McDonald, who drove Sweet Marie, said that the mare was not in the best of condition, otherwise Tiverton would have been beaten. The summaries:

Pacing, 2:14 class, purse \$1000.

ZIBBELL BENEFIT AT SANTA ROSA.

Quite a crowd was present at the Santa Rosa track on Wednesday of this week, when a benefit was tendered Willard Zibbell, the young horseman who was so badly injured by being run over by three freight cars at Fresno.

A good program had been arranged by the Sonoma County Driving Club, consisting of seven events, and everything passed off pleasantly. The beneficiary was present with his wife and other relatives and saw his father drive his great horse Adam G. to easy victory in the fourth race.

Messrs. Springer, Sutherland and Dunbar acted as judges, and the timers were Messrs. Lumsden, Smith and Delaney. The starting was done by Schuyler Walton, and Walter Trefry acted as track marshal. The summary of the races follows:

First race, 2:12 pace.

Welladay, by Steinway (Cuicello)	1	1
Miss Winn, by Demonio (Reams)	2	2

Time—2:17½, 2:17½.

Second race, mixed.

Friskarina, by Bayswater Wilkes (Hoy)	1	1
Lijero (Wright)	2	2
McKinney colt (McDonald)	3	3

Time—2:20, 2:21½.

Third race, mixed.

Rita II, by McKinney, driven by Durfee, and Robizola, by Roblin, driven by Abels, made a dead heat in 2:12½.		
--	--	--

Fourth race, trotting.

Adam G., by McKinney (J. Zebbell)	1	
Oro Belmont, by Oro Wilkes (Reams)	2	
Pat Rose, by Falrose (Wright)	3	
Jupiter B., by Gen. Beverley (Durfee)	4	

Time—2:17½.

Fifth race, trotting.

F. S. Turner, by Vallota (Abels)	1	2	1
Clipper W., by Linwood W. (Cuicello)	2	1	2

Time—2:24, 2:26½, 2:25½.

Sixth race, trotting.

Dumont S., by Linwood W. (Quinn)	1	
Zambra, by McKinney (Ward)	2	

Time—2:23.

Seventh race, trotting.

Cassian, by Mendocino (Cuicello)	1	
Wild Bell, by Wildnut (Freeman)	2	

Time—2:29½.

ANSWERS TO CORRESPONDENTS.

H. G. HEWITT, Healdsburg—Morosco won the 2:19 class trot at Santa Rosa in 1904, in straight heats. The time was 2:12½, 2:12½ and 2:12.

JAMES CROSSLY, City—The pacing mare Much Better 2:07¼ made her record at Santa Rosa, August 27th, 1898. She started twice at that meeting, which was given by the Breeders' Association, and won both races in straight heats. The time of the miles in the first race, which was best three in five, was 2:10½ in every heat. The other race was best two in three. The time was 2:07¼ and 2:09. She was driven in this race by Farmer Bunch. Much Better was bred at Oakwood Park Stock Farm. She is now owned by James W. Rea of San Jose.

SUBSCRIBER, Portland—The free for all pace at the Portland, Oregon, meeting in June and July, 1894, was won by the California horse Plunkett. There were five heats, Del Norte taking the first two. The time was 2:17, 2:14½, 2:17½, 2:31 and 2:17½. The Lay gelding Cyrus by Captain Webster, was also a starter, but was distanced in the second heat. The time of the fourth heat was slow on account of the repeated breaking of Del Norte, the driver of Plunkett not trying to shut him out.

L. C. R., Sacramento—The mare Sally Pointer 2:13¼, of which mention was made last week, was, we think, bred by Ed. Allen of Los Angeles, and sold at the Potter sale there in 1901, the same time Sweet Marie was sold. She was catalogued as Sister's Baby and was then a two-year-old. It was stated in the catalogue that she had paced a quarter in 31 seconds that year.

Gazelle 2:11½ by Gossiper, the dam of Zolock 2:05½ and Zephyr 2:11 trotting is now owned by Mr. J. C. McKinney of Titusville, Pa. Gazelle was bred by Ben Davis of San Bernardino, and took her record in 1896 at Woodland, when she was five years old. Her dam Gipsy by Gen. Booth 2:03½, is also the dam of Delilah (3) 2:14½, and is out of Echo Belle, the granddam of Conn 2:15½, by Echo. Gen. Booth was by Geo. M. Patchen 30. The performances of Zolock and Zephyr this year have caused many inquiries to be made about Gazelle. Mr. Davies sold her, we believe, to Mr. Chas. Winship of Los Angeles, who in turn sold her to his cousin, A. H. Miller of Buffalo, who disposed of her to Mr. McKinney, her present owner.

A TRIBUTE TO JUDGE GREENE'S MEMORY.

OLEMA, August 8th, 1905.

Dear Breeder and Sportsman—I see by this morning's Call that Judge W. E. Greene has been called by the grim reaper who spares neither the young nor the old, the dullard or the wise and good. To the last-named class our dear Judge belonged. For, readers of the Breeder and Sportsman, he was "our Judge," he loved what we love, clean out-door sports, but especially did he love the light harness horse. Arm in arm with Monroe Salisbury, the iron man, or with Dr. Latham of honored memory, have I seen this grand old man going to worship St. Equus. Judge Greene was a close student of form and breeding. Early in the history of this State he imported from Maine to Stockton the stallion Winthrop 505. Association with Monroe Salisbury begot a love for the Director family in later years, so that the Judge bred and owned some fine Director, Direct and Directum colts. Before "the dreaded warrior in sombre harness mailed, surnamed of man the destroyer the rampart walls had scaled," the Judge had seen his namesake beat all four-year-olds of his year and retire a champion.

Last year at Santa Rosa, at the Breeders' meeting, Judge Greene, his son Carlton, and I met. Politics, horses and law were discussed alternately. The Judge insisted upon my dining with him. The meal was "a feast of reason and a flow of soul," as we two listened to the Judge as he presented his clear-cut views. I then heard much of the late Tom Reed, the great, perhaps the greatest Speaker of the House of Representatives the United States ever had. Reed and Judge Green were schoolmates in the State of Maine. Both became school teachers and both became great.

Before Judge Greene the lawyer or lawyers who tried to demur, object, delay or stay the hand of justice felt the majesty of the law. Six feet two inches in height, symmetrical, broad chested, dignified, just, learned, Judge Greene would turn to him who was trying to hoodwink the court or pervert the ends of justice, with: "Come to the point, sir—the issue at stake. Make a statement involving the issues; don't pettifog, sir! The court has no time to hear extraneous, outside matters discussed!"

Of course, "our Judge" had enemies. What strong man in power has not? But his enemies as a rule were those who desired to bolster up a weak case and lead blind Justice astray. The earnest lawyer and upright citizen respected and loved "our Judge." To them his memory will be ever green.

Judge Ogden recently said. "We" (referring to the Superior Court of Alameda county) "are carrying on Judge Greene's work, fervently hoping and anxiously expecting that our associate will get well."

Let us hope that the "Supreme Court"—the court of last appeal before which our friend has appeared, has said: "Well done, good and faithful servant."

"The crowned head and the lowly cowl, all must come to the narrow tomb. It is only the actions of the just that smell sweet and bloom in the dust."

Judge Greene was not only an upright judge, but a true American, who devotedly loved his country and her institutions. No applicant for citizenship could pass muster before him, whether his sponsors were Republicans or Democrats, unless knowing enough to be of value to our country and a support to her institutions in time of peace or war. The Superior Judges of Alameda county are all able, upright men, but they will sorely miss the dear Judge, the Nestor of their bench. When some new comer sits in Judge Greene's place, he shall often turn to his associates for advice and they will say: "Decide as Greene would have done, and in the decision the dead Judge will live again."

PAYNE SHAFTER.

GETTING READY FOR THE STATE FAIR.

SACRAMENTO, August 10.—The race track at the State Agricultural Society's new grounds is finished, and those who have seen it, declare it to be one of the finest in all the West. The soil is a reddish yellow clay, such as was used in the coating of the old State Fair course several years ago, and makes a course full of elasticity and springiness, and when it has been worked a little more it will be a remarkably fast track.

"Farmer" Bunch drove over the new track the other day and expressed great satisfaction with it. In fact, he became very enthusiastic over it, and predicted that at fair time it will be faster than either the San Jose or Santa Rosa tracks.

The work on the cottage stables for the running and trotting horses is nearly finished. These are handsome buildings, possessing considerable architectural beauty, and have been built with the idea of permanency above all else.

The several structures rest on massive concrete foundations and are quite a height above the ground. The floors are all of two-inch planking. Every stall is well lighted and ventilated, and particular attention has been paid to drainage in and about the stables.

Work is progressing on the temporary grandstand, and temporary quarters for some of the livestock will soon be provided. The directors found it impossible to erect all permanent buildings out of the comparatively small amount of money appropriated for this purpose, so have been obliged to erect temporary buildings for some of the horses and cattle.

The harness contingent will have a try at three rich stakes this year, and, strange to say, these events are all for three-year-olds.

The Occident Stake is worth \$3880, the Stanford \$1770, with another payment due, and the Stallion Stake, for foals of 1902, \$3300. As is generally understood, this stake is divided into two divisions, one for

trotters and the other for pacers. The trotting division will have 60 per cent of all moneys paid in, and the pacing division 40 per cent. The nonrunner of the winner of either division will receive \$250.

The society feels greatly encouraged with the outlook for a successful State Fair. All the harness events have filled well, and the running contingent will be represented by many of the horses now racing at Portland, as well as those which have had a good rest since the close of the winter meeting at Oakland.

A platform is being constructed a few yards from the back stretch, where all horses shipped to the new track can be unloaded from the cars. This will prove a great convenience to horsemen.

A suburban trolley extension has been constructed to carry lovers of racing to the park, which is situated a short distance from the city. A splendid trolley service is promised between the city and the park, and the local street railway company is planning to handle the traffic without discomfort or delay to patrons of the races.

An item of interest is the fact that the directors have decided to issue a family season ticket this year for \$5, which will admit an entire family to the park mornings and afternoons.

There will be no admission charge to the pavilion, the directors and the Native Sons of the Golden West, who are to celebrate the entire week, having joined hands in keeping "open house." The displays at the pavilion will be of varied character and high standard, and will embrace competitive county exhibits, a poultry show surpassing all former attempts in this line, agricultural, horticultural, dairy and industrial exhibits.

It has not yet been decided who will be engaged to judge the livestock. Professor W. L. Carlyle of Wisconsin has a prior engagement which precludes his accepting the post he has held so satisfactorily to California breeders for several years.

The directors of the fair are corresponding with several recognized authorities, and hope to announce at an early date that a selection has been made.

BREEDERS' MEETING AT SANTA ROSA.

Everything is in readiness for the big annual meeting of the Pacific Coast Trotting Horse Breeders' Association which will open at Santa Rosa on Wednesday next, August 16th.

The California and Northwestern Railway Company will run a special train each day from Tiburon, connecting with the ferry boat that leaves this city at 9 a. m. Returning the train will leave Santa Rosa at 7 p. m. The fare will be but one dollar for the round trip.

On Saturday, the last day of the meeting, a special excursion will be run from Ukiah to Santa Rosa and return, leaving Ukiah at 9 a. m. and leaving Santa Rosa on the return trip at 6.45 p. m.

The program of races is the best that has been offered in California for years, and the stakes are the largest offered for trotters and pacers on this coast. There is an excellent program for each day of the meeting. The 2:10 horses are numerous so that fast racing can be expected every day. The Santa Rosa track record is 2:06, which it is confidently expected will be lowered the day Zolock starts in the 2:09 class pace.

The program of each day's racing is here given, with the list of horses eligible to start in the different events:

Wednesday—First Day.

Trotting—2:27 class, \$800—Adam G., Frank O'Kane, Dewdrop, Oro Belmont, Don M., Connors, D. E. Knight, Wildbell, La Correcta, Alma, Leroy O., Charlie T., Suomi, Birdcatcher, Silver Bow Jr., Kinmont.

Pacing, 2:20 class, Pacific Slope Stakes, \$1500—Little Jib, Ruby H., Miss Winn, Welladay, Venus Derby, Farnot, Little Joe, Norda, Mildred O., Joe Robin, Uncle John, Pearl Sinclair, Doctor J., Flora G., Nellie R., Anna Turner, Argyle, Bessie Barnes, Si Perkins, Glen.

Pacing, 2:13 class, \$800—Inferno, Cresco Wilkes, Doctor W., Tidal Wave, Friskarina, Queen Bee, Vision.

Thursday—Second Day.

Trotting Division Breeders' Futurity for Two-Year-Olds, \$1450—Delta Derby.

Trotting, 2:17 class, \$800—Cuote, Hank, Marvin Wilkes, Milbrae, Zamhra, Talisman, Prince Ansel, What Is It, Oma A., Redskin, Jupiter B., Zombowette.

Pacing Division Breeders' Futurity for three-year-olds, \$1300—Roberta, Delilah, Mamonio, Mona Wilkes, Just It, Deviletta.

Friday—Third Day.

Pacing Division Breeders' Futurity for Two-Year-Olds, \$950—McFayden, Magladi.

Pacing, 2:09 class, \$1000—Queen Bee, Zolock, El Diablo, Tom Carneal, Alone, Rajah, Kelly Briggs, Billy Red or Miss Idaho, Reta H., Daedalion.

Trotting, 2:13 class, \$800—Lady Madison, Redskin, Dr. Hammond, Robizola, Liege, H. D. B., Walter Wilkes, Princess.

Saturday—Fourth Day.

Trotting Division Breeders' Futurity for Three-Year-Olds, \$2300—North Star, Ambush, Athasham, Bellemont, Still Better, Elma S., Kenneth C.

Trotting, 2:24 class, California Stake, \$2000—Sonoma Girl, Birdcatcher, Leroy O., Billy Dooley, D. E. Knight, Connors, Don M., Oro Belmont, Blanche T., Auger Baron, Little Babe, Homeway, The Bouquet, Charlie T., Modoc, Helen Dare.

Pacing, 2:17 class, \$800—Glen, Si Perkins or Queen Director, Pearl Sinclair, Cresco Wilkes, John R. Conway, Selda, Antonious, Little Jib, Miss Winn, Welladay, Mildred O., Joe Robin, Sweetheart, Penrose, Economizer, Argyle, Flora G., Prince Charles.

Jackson's Napa Soda does not tangle the feet

DEXTER PRINCE

HIGH CLASS BOARDING STABLE

VICTOR VERILHAC, Prop. JAMES M. McGRATH, Mgr.

WORTH OBER, Trainer.

1509 Grove Street, corner Baker Phone: Fell 5161.

Located one block from Panhandle of the Golden Gate Park Take Hayes, McAllister or Divisadero street cars.

Nothing succeeds like success is true of every enterprise, and Vic. Verilhac of the well known Dexter Prince stable, 1509 Grove street, San Francisco, has no reason to doubt the truth of this saying. Since his purchase of this stable the reputation he has earned for the manner in which he cares for all horses and vehicles in his charge has increased so that in order to meet requests of many horse owners he has been compelled to build an addition to his stable. He recently erected a large building and has put box stalls and single stalls therein besides a splendid dust-proof loft for vehicles. Electric lights have been installed and the greatest care has been taken in providing light and air for the horses. The sanitation in this large stable is perfect.

There are at present thirty-four box stalls and forty-five single stalls, nearly all filled by the best road horses in San Francisco.

There are twelve matinee racers being prepared by two special trainers from Pleasanton among them are Gertie A., second to Tom Carneal in 2:08½ in Santa Rosa in 1904. Also winner of many a hard fought race, and entered in the free-for-all on the 4th of September at Ingleside. Also King Cadenza 2:15½, Kitty D., winner of the two-mile free-for-all last Butchers' Day; Al Sandy, winner of the 2:20 class pace the same day; Harry Hurst, 2:14; Ruby L. and Laurelwood, the two best trotters that go through the Golden Gate Park. Either can step a mile in 2:15, with ease. Satinwood can show a mile any day in 2:10 pacing. Billy Humes and Cashmont the property of Max Levy, of Seattle, are both good ones, and when ready will be heard from. Silver Moon, the best bred stallion in California, can trot over the speed track in 2:20. Wallie, the handsomest road horse in San Francisco, with a record of 2:18 as a three-year-old, and a four-year-old chestnut. Derby, a full brother to Bain, and half-brother to King Cadenza and King V.; this is a promising young gelding with a world of speed. There are many others that will be heard about after the next matinee races on the 4th of September.

Mr. Verilhac has employed a very careful man to handle young colts. He has already three that were purchased at the last Chase sale, going along the park roads like old horses. He employs the best help and uses only the choicest of hay and grain. Being a hard worker he gives his personal attention to this thriving business.

EXCURSIONS TO BREEDERS' MEETING.

R. X. Ryan, General Passenger Agent of the California Northwestern Railway, has addressed the following letter to the editor of this journal:

"Dear Sir: For information, would advise that we will run on August 16th, 17th, 18th and 19th, a special train to Santa Rosa, leaving San Francisco at 9:00 a. m., and on the return leave Santa Rosa at 7:00 p. m. Fare for the round trip, \$1.00. This train will stop at Tiburon, San Rafael, Ignacio, Petaluma and Penn Grove. The fare from Tiburon, San Rafael and Ignacio will be \$1.00, and from Petaluma and Penn Grove 50 cents for the round trip.

"On Saturday, August 19th, we will run a special excursion from Ukiah, leaving Ukiah at 9:00 a. m., and on the return leave Santa Rosa at 6:45 p. m. Fare for the round trip will be \$1.00, and train will stop at all intermediate points. From intermediate points rates graduate under \$1.00.

DEATH OF ALEX. J. McKERRON.

We are pained to announce the death in this city on the 8th inst. of Alex. J. McKerron, beloved and only son of Mr. John A. McKerron, the well known manufacturer of fine harness. Alex McKerron was a most promising young man, aged 22 years, and since completing his education had been a trusted and greatly esteemed employee of the large lumber firm of Pope & Talbot of this city. About two weeks ago he was afflicted with appendicitis, for which an operation was necessary, but he did not survive the shock. The funeral took place on Thursday last, interment being at Holy Cross Cemetery. Mr. McKerron will have the sympathies of every horseman in California as well as hundreds of other warm friends in his bereavement.

Westchester Racing Association announces in our business columns this week, many stakes to close August 15th for its Autumn meeting. Belmont Park, where these races will be run, is the finest race course in America. The stakes announced are for two-year-olds, three-year-olds, two-year-olds and upwards and three-year-olds and upwards, besides weight for age races and several steeplechase events. In all the stakes the amount of added money is large and the subscriptions very small. A full list of these stakes with conditions will be found in the advertisement. We would call the attention of all owners and breeders of thoroughbreds to the statement of the Westchester Racing Association that the fixed events for now yearlings, to run when two-year-olds in 1906, when three-year-olds in 1907, and for foals of 1905 to run in 1908 will be duly announced to close September 15th, 1905, viz., in 1906, the Juvenile, the Fashion, the Eclipse; 1907, the Withers, the Ladies, the forty-first Belmont for now yearlings; 1908, the forty-second Belmont for foals of 1905. The tenth National Stallion race of 1904 will close for stallions at the same time.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

Coming Events.

Rod.

April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.
 April 1-Sept. 15—Closed season for lobsters and crawfish.
 April 1-Nov. 1—Trout season open.
 June 1-Jan. 1—Open season for black bass.
 Aug. 26—Saturday Fly-Casting Contest No. 10. Stow lake, 2:30 p. m.
 Aug. 27—Sunday Fly Casting Contest No. 10. Stow lake, 10 a. m.
 Sept. 10-Oct. 16—Close season in tidewater for steelhead.
 Sept. 10-Oct. 16—Close season for catching salmon.
 Oct. 16-Nov. 15—Close season for taking salmon above tide water.
 Nov. 1-Sept. 1—Open season for crabs.
 Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

Feb. 15-Sept. 1—Closed season for mountain quail, grouse and sage hen.
 Feb. 15-Oct. 15—Closed season for quail, ducks, etc.
 April 1-Oct. 15—Closed season for English snipe.
 July 1-Feb. 15—Dove season open.
 Aug. 1-Oct. 15—Deer season open.
 Aug. —Sebastopol Gun Club. Blue rocks. Every Sunday.
 Aug. —Napa Gun Club. Blue rocks. Every Sunday.

 Jan. —Pacific Coast Field Trials Club, 23d annual trials. Bakersfield, Cal. Albert Betz, Secretary, 201 Parrott Bldg., San Francisco.

FISH COMMISSIONER BERMINGHAM ON STRIPED BASS.

Editor Breeder and Sportsman—Dear Sir: In your issue of August 5th, I notice an article on striped bass and from the tenor of same the average person would judge that the striped bass are being wiped out in a similar manner to the sturgeon. I note that Mr. Al. M. Cumming states that fishing is now very poor at San Antonio Slough and am at a loss to understand how he can make this statement in view of the picture published in one of the weekly sporting periodicals which portrayed the catch of Mr. Kittle's one day's fishing on San Antonio Slough. In looking at the picture, to the best recollection of the writer, there were at least 25 bass, and some of them must have been at least two feet long. It is hardly fair to presume that Mr. Kittle, who is a well known sportsman, would publish a picture of this kind if he did not catch the fish himself. From this it would seem that either Mr. Kittle is a more experienced fisherman than Mr. Cumming and the others who were not so fortunate, or else he selected a better time for fishing than they did.

The fact of the matter is that the striped bass are increasing very rapidly and from the reports received by the Fish Commission, who keep a close watch on the amount of fish shipped to the San Francisco market as well as from their regular deputies at different portions of the bay frequented by the striped bass, it would appear that there is no danger of exterminating this popular fish. A great many of the sporting fraternity are prone to criticize the Fish Commission without justice in a good many instances and at other times because of the fact that they do not personally care for certain members of the Commission or its deputies. The writer has frequently seen anglers get on the train at San Pablo station, after a day's fishing near Point Richmond, with large strings of small striped bass. On one Sunday night, not long ago, the writer personally saw three anglers who had over 150 bass between them. Some of these bass would not weigh one-half a pound. The writer knows that these men were what is popularly termed "true sports," and yet they took under-weight bass in direct violation of the laws which they are so anxious to have the Fish Commission uphold.

The law in reference to striped bass was framed to prevent the bass from being depleted and if the anglers and market fishermen would both obey the law, there would be no chance of wiping out the bass. It has not been the intention of the Fish Commission to bother the rod fishermen in reference to the weight of striped bass, but the matter has become so serious and so much criticism has been made against the overlooking of this offense by the Commission that it is the intention from now on to arrest the rod fisherman who has under-weight striped bass in his possession in the same manner that it arrests the market fisherman. We have three deputies in San Francisco and almost all of their time is taken up on the striped bass violations. We have seized quantities of fish during the past month or six weeks and have obtained several convictions, and just as soon as our patrol boat, which has been undergoing repairs, is once more in commission, the Commission intends to look into the complaints received from the San Antonio slough and at other portions of the bay. The anglers should assist the Commission in the detection of violators of the striped bass law and the way to do this properly is to supply the Commission with such data as would enable it and its deputies, in the event of arrests, in getting a conviction. The trouble has been, heretofore, that complaints, both verbal and written, received by the Fish Commission, have in a great many instances been utterly without foundation and of such a nature as would make it impossible to obtain convictions after arrests. A great many people lose sight of the fact that the Commission is liable in a like manner to any citizen for false arrest and unless there is a strong probability to obtain conviction, our deputies are instructed not to make arrests. It is the duty of every citizen and more especially of every angler, to apprehend violators of the fish and game laws, and if such a course was followed out in relation to such matters, instead of criticisms and unfounded

complaints being sent to the Commission, it would materially assist the Commission in stamping out these violations. A great many anglers also lose sight of the fact that the Fish and Game Commission was not created for any one special set of men. The money obtained from the Legislature for the Fish and Game Commission work is out of public funds and we must treat everyone connected with the fish and game matters, whether he be an angler, a hunter or a market fisherman or hunter, with absolute equality, and in addition to this we must provide a food supply for the people of the State of California who are paying their share of the cost of operation of the Fish and Game Commission. Some of the radical fish and game protectionists desire to prevent the sale of all fish and game. To any fair-minded man this would not only be silly, but absolutely without reason. The Commission is only too glad, when conditions arise that make the prevention of sale of certain fish or game imperative to avoid the wiping out of such fish or game, to ask for legislation to prevent such loss, and on the other hand they are in a better position to judge such matters than the average sportsman.

As stated before, the Fish Commission was not created for any one special set of men. It is a public institution charged with the propagation of fish and game and the protection of same. It must be equitable in its dealings with the sportsmen and market fishermen and must treat all alike. The Commission derives some of its revenue from licenses collected from market fishermen and in return for such licenses the State is propagating and planting fish. Therefore the market fisherman has as much right to fish the waters of this State so long as these conditions prevail, as have the anglers from San Francisco and elsewhere. The Commission has only a limited amount of money with which to conduct its affairs and it must make this money go as far as possible. For this reason it is unable to place as many deputies in the field as the members of the Commission would like, and on this account it is prevented in a great many instances from apprehending violators of the fish and game laws.

There are very few sportsmen who realize the amount of work done by the Fish Commission deputies during the course of a year, nor do they realize the hardships and the disagreeable work that these deputies have to undergo while in the discharge of their duties. The Commission has often been criticized for not apprehending violators of the fish and game law by people well known among the anglers and sporting fraternity and this has been a source of deep regret to the Fish Commission. If the sporting fraternity would drop all selfish motives and work hand in hand with the Fish Commission they would find a great many facts that they are not now aware of and would then understand the difficulties which confront the Commission at all times. The Commission has all along courted such help from the sportsmen and until very lately they have not received any. If the sportsmen of San Francisco would take the trouble to go through the fish markets on a Thursday or Friday in San Francisco and see the countless number of poor people buying fish, they would readily understand that the community at large is being benefited by allowing the fish, such as striped bass, to be sold and would understand what a hardship it would be to these people if the sale of this fish, or any other fish popular with the anglers, was prevented.

JOHN BERMINGHAM, JR.

(Unless we are very much mistaken, and we do not believe we are, Fish Commissioner Bermingham is the victim of misplaced confidence in a monthly publication not noted for reliability. The picture he refers to in the above communication was taken about five years ago by Al. M. Cumming, when the ark Cuckoo was moored in San Antonio slough just below the Miramonte Club landing.)

The catch of striped bass shown in the picture was made by Mr. Cumming and the late Fred Bushnell. The big fish in the center is the record weight bass taken on rod and line.

We are not informed that Mr. Kittle caught one of the bass shown in the picture. He has taken many bass from the slough, however, and enjoyed many days' sport on that water. We have heard Mr. Kittle make the statement that the fishing there is not anywhere near what it was four and five years ago.

Striped bass fishing in the slough at the time the picture was snapped by Mr. Cumming was excellent and made that water the Mecca for striped bass anglers. At the present time, and for some time past, there has been no fishing in the slough to anywhere equal that of the period mentioned.

This is given, not in criticism, but merely as a statement of fact.

Following the Commissioner's introductory paragraph above, the communication is worthy of the careful attention of anglers and sportsmen, for there is plenty of material in it that is true and pertinent.—Ed.)

September is the ideal month for Rogue river fishing. Then the river is teeming with large steelhead and they will take spoon, fly or roe hungrily. Strong tackle and heavy rods are requisite for fishing in Rogue river.

Frank H. Smith of San Francisco caught four large sea bass, one yellowtail and a barracouta off Santa Cruz Lighthouse last Sunday. The yellowtail put up a good fight. The sea bass sulk and sound, hanging on with dead weight. The largest bass weighed thirty pounds.

James Lynch and J. M. Thomson fished the Paper Mill from Tozoloma down to Point Reyes station last Sunday. Several nice fish were taken, but neither one in basket was the equal to half a dozen beauties they saw in the stream but could not induce to take the lure.

LAW VIOLATORS PUNISHED.

Game Wardens and Deputy Fish Commissioners in different counties were on the qui vive, prior to the opening of the deer season for violators of the game law. Since the season opened a keen lookout has been kept for unprincipled hunters who kill does, as well as those who traffic in venison or hides.

On August 6th Thomas Cauckwell, Richard Fulkerson and Al Lang were arrested by Deputy Fish and Game Commissioners A. F. Lea and J. C. Ingalls at their camp in the hills west of Cloverdale.

They were taken before Justice Provines of Healdsburg and next day pleaded guilty to killing a doe. Cauckwell was fined \$50 and the other two \$25 each. The trio had been hunting since the 1st inst. and had bagged a doe. The deputies found the hide in their possession and took them into custody.

They claimed that while hunting they had separated, and that one of the men jumped a doe from the brush and called to his companions that a buck was coming toward them. The companions fired, killing the doe. The men were in jovial humor over their predicament, and declared that while their deer meat had come high, it was the best obtainable. Cauckwell stated that a man who would kill a doe should be fined on general principles.

Deputies Ingalls and Lea arrested Robert P. Poe in the hills of Mendocino county for killing deer during the close season. Justice Braden of Laytonville fined Poe \$25 for his offense. During the hearing Poe admitted that he had been hired by Miss F. Louise Shepard to supply her table with fresh venison. Miss Shepard, whose home is in Berkeley, conducts a summer camp in the Mendocino hills, and fresh venison was on her bill of fare each day to the delight of her patrons. Miss Shepard was at once taken into custody and brought before Justice Braden, who imposed a fine of \$50 upon her, in spite of her protestations.

Deputy Fish Commissioner A. E. Doney arrested four deer hunters in the Siskiyou mountains recently, after following them for over 100 miles through one of the roughest mountain regions in California. Three of the hunters, McCutcheon, Noyes and Chapman, are from Los Angeles. Scott Greening, their guide, who lives in Happy Camp, near the place of the arrest, was until recently a deputy fish commissioner. Justice Brown of Happy Camp fined each of the prisoners \$25 for killing deer during the close season, and Greening's deputyship was revoked. Deputy Doney also arrested Ah Him, a Chinese deer hunter, and one Indian Frank on the same day, and Justice Brown fined each \$25 for like offenses.

It is unlawful for one individual to kill more than two bucks in one hunting season. It is an offense to have the hide of a fawn or female deer in one's possession at any time, or a hide that does not show that it is the hide of a male deer. There should be no hides in any one's possession except male hides and those hides cannot be sold. The Board of Fish Commissioners have had perhaps twenty cases in the last year in which convictions were obtained for selling deer hides. In a good many of these convictions \$50 fines were paid, besides the confiscation of the hides.

C. Meredith, a Sacramento fish dealer, was fined \$20 by Justice March last week for having underweight striped bass in his possession. The complainant against him was Game Warden George Neale, who noticed three boxes of fish placed on the train at Giant, Contra Costa county. His suspicions being aroused he watched the boxes until they reached Sacramento, where the American Fish Company took the boxes containing striped bass to its place of business. Neale arrested Meredith, the manager of the company, who pleaded guilty of the offense. Deputies Davis and O'Connell traced the shipment back to Luke Petrich of Giant station, whom they arrested and took before Judge Enloe of Pinole. He paid \$30 fine.

George Johnson of Aracata also has contributed \$20 to the State for violating the fish law.

E. P. Lounibos of Kenwood was fined \$25 by Justice Gibson of Glen Ellen, for shipping doves. Lounibos made an ineffectual effort to conceal the nature of the contents of the box which he had marked merchandise, but Deputies Welch and Schaeffle investigated and found the forbidden birds, constituting the double offense of offering doves for sale and of concealing the contents of the package.

Fishing For Salmon.

Salmon fishing differs so much from trout fishing that it has been said an absolute beginner at fly-fishing will learn to take salmo salar more readily than will a trout fisherman who tries the nobler fish after years of practice with the smaller one. This I doubt, says a writer in Recreation, but I know that a very different style of fishing is needed. There is really no such thing as "striking" in salmon fishing, and if you keep a tight line and raise your rod as soon as you feel the "pluck" of the fish you will be doing your whole duty, and it will be up to the fish to do the rest. There is no occasion for the swift strike by which one hooks a shy trout inclined to rise a trifle short. The salmon is such a weighty fellow that when he turns to go down after taking the fly his momentum drives the hook above the barb with very little assistance on the part of the angler, provided the line be fairly taut.

"Laury" Adams, Jr., and angling companions fished for black bass in Sand lake, above Sacramento, last week. Prospect slough is the outlet from the lake to the Sacramento river. The water where Adams and his friends fished was alive with bass. The party took 160 fish, many of them four and five pounders. There are plenty of seven and eight-pound fish in the lake and slough.

DEER HUNTING NOTES.

For sportsmen who have a fancy for venison on the hoof the season has thus far afforded much sport, and numerous members of the pronged brotherhood have been bagged in the Coast hills and mountain ranges, north and south, where they were wont to range in security until the baying of hounds and the zip, zip, of 30-30 bullets on the 1st inst. apprised the cervus family that something was on tap that was decidedly unlucky for the male members.

The main body of hunters went out on Saturday and Sunday last. Reports from various sections denote that the combined results for that time were up to past seasons.

In Sonoma and Mendocino counties numerous hunting parties hunted the ranges and many bucks were garnered.

Dr. O. W. Jones and J. C. Nealon bagged two bucks near Novato on the 1st. A party composed of Hugh J. McIsaac, his brother and Bert Golcher of San Francisco were rewarded with two bucks, shot on the McIsaac ranch near Taylorville. "Ben" Harris, "Ed" Schneider and George Merchant hunted a day and a half about eighteen miles from Geyserville and bagged four bucks—one three-prong, two forked horns and a spike buck. They hunted over an exceedingly rough country and without dogs.

The Lucas Valley Club, composed of David Harefield, Wm. Tubbs, Fred Tallant, Armand De Courtie, of San Francisco, Wm. Barr, Dr. T. J. C. Barr, E. B. Martinelli of San Rafael, Alex. Young and Andrew Wilkie, had accounted for three bucks up to last Saturday.

A party composed of "Ben" Baum, Henry Collins of San Francisco, Salvador Pacheco, Thomas J. Fallon, M. Murray and Henry Martin of San Rafael, Leo de Sella of Sausalito and Victor Sartori—the Victor Gun Club—got four bucks on the club grounds back of San Rafael, towards Novato, on Tuesday and Wednesday. Collins had a narrow escape from an enraged buck, that after being wounded was brought to bay by the hounds. The animal charged Collins when he approached, and a lucky rifle shot averted impalement on the enraged animal's antlers.

The club holds the record in Marin county for the number of bucks brought down so far this year, and also the record for the largest buck reported up to date. This deer weighed, it is stated, 160 pounds, and was killed by County Treasurer Fallon, in Lucas canyon, at 200 yards range. The club grounds comprise 3200 acres in Lucas canyon.

Other San Rafael and Marin county sportsmen who were successful are: Supervisor G. Pacheco and friends, who killed three deer near Novato; Harry Obitz and party killed two on the Healion ranch, a few miles north of San Rafael. In the vicinity of Bolinas, Coroner Sawyer, J. Cotello, Edgar Nott and B. Briones all have a deer to their credit.

Early last week in Big Coyote canyon, near Sausalito, William Campbell and Isaac F. Heuston killed a deer between them. Antone Marshall killed a spike buck near Lake Lagunitas, and the son of C. A. Zinkand killed a deer a short distance from his residence in Ross Valley. Nicasio is credited with three-forked horns averaging a hundred pounds each, shot by Donald McIsaac, Frank Rodgers and W. T. Farley. Farley killed his deer as it was browsing in his cornfield.

In the vicinity of Tocaloma the hunting is reported good. Sheriff Taylor and his party had three bucks up to the 4th inst. The hunters expected to bag one or two more before coming in. Harry F. Bailey brought down a nice forked horn. It is reported that fourteen does were seen on the Lagunitas Club grounds, but not a buck to try the marksmanship of the club members.

On August 3rd four bucks were killed on the Jim Ward ranch about 18 miles from Cloverdale.

The indulgence in the sport of deer hunting is not entirely monopolized by the sterner sex, for Mrs. Jesse Z. Brunk of Santa Rosa killed a huge buck near Branscombe, Mendocino county, last week. The Supervisors of that county have recently shortened the deer season one month, the closing day being September 15th.

A report this week states that deer are plentiful in the vicinity of Mount Shasta and Mount Eddy and a number of fine bucks have been shot in those sections.

Hunting parties starting from Sisson, Siskiyou county, have been very successful in the quest for venison. As a rule, the bucks are very poor for this season of the year. Many theories are advanced as the cause, but the oldest hunters fail to account for the lean condition of deer meat at this time.

Sacramento sportsmen have found that the country around Polson, Michigan Bar and in the vicinity of Lincoln is worthy of attention for getting deer.

Deer hunting parties have been very successful in the vicinity of Halfmoon Bay, San Mateo county. One party returned with four bucks after an outing of less than three days. There are several large parties of San Francisco sportsmen hunting in that part of the county.

San Jose hunters are in distress over their exclusion this season from the best hunting grounds in that part of the State. Practically all the land owners in the Mount Hamilton section have combined and given notice that no hunting or camping will be permitted on their lands, this action being the result of the destructive fires that have been started there almost every summer by careless hunters.

In spite of a growing belief on the part of sportsmen that deer are becoming scarce in Santa Clara valley and vicinity some excellent results were had on Tuesday in that section. "Joe" and "Fred" Pinard of San Jose brought in the first buck for Santa Clara county, a two-pronger. They hunted near Madrone. This is the third consecutive year that the two came in with the initial buck of the season.

The first buck of the open season for San Benito county is attributed to A. Cowden of Hollister, who killed a large one in the Gabilans on Tuesday. Many Hollister sportsmen were out after deer in the Alvarado country last week.

The Lone Tree section of San Benito county is taboo at present for hunters. The ranchers have recently suffered severe losses by fire, started by campers. It is alleged. The result is that the Lone Tree community is up in arms against the invasion of deer or other hunting parties.

To Frank Tiernan, a cattleman of Hall's Valley, must go the distinction of having laid low the first magnificent full grown buck of the season for Santa Clara valley. The deer, a four-pronged beauty, was killed at 9 o'clock Tuesday morning on Mount Day, near the famous hunting ground of the Black Mountain. For over an hour the hunter lay in wait for his quarry in the latter's favorite stamping grounds, and was just preparing to leave when he saw his prey not 150 yards from him quietly grazing under a pine tree. The buck had probably been there all the time. Tiernan laid it low at the first shot with a 38-35 Winchester bullet. It dressed 175 pounds and is one of the finest specimens ever brought to earth in the county.

A four-pronged buck weighing 165 pounds arrived in San Jose Thursday from Kings City. The buck was shot by Howard Tierney five minutes after 12 o'clock on the opening day of the season. The party with whom Tierney was hunting is composed of the following: R. Greeninger, Ed Lynn, Dr. Sweigert and D. Ward. The party were hunting in the Jolon country, back of Kings City. The magnificent buck was shot by Tierney on the Pinal. Later in the day another one of the party brought down a smaller buck.

A party from Hacienda quicksilver mines and Dr. Jamison and B. I. Schwartz, of San Jose, hunted in the vicinity of the Hacienda on last Wednesday. Dr. Jamison gave proof of his marksmanship in securing a good-sized buck on Loma Prieta. The fog was so dense during the earlier part of the day that the hunters found the game difficult and dangerous.

In the Boulder Creek region of Santa Cruz county, it is reported, there are bucks in plenty. The sportsmen of the county have induced the repeal of the ordinance prohibiting the use of dogs in deer hunting.

Big Basin Guarded From Fire.

Sempervirens Park is at last to be protected from possible destruction from forest fires. Warden H. B. Pilkington, with the approval of State Forester Allen, has begun the construction of an elaborate system of fire trails in the Big Basin for the protection of the State park. The system, when completed, will comprise wide trails on top of all the ridges extending north and south through the park, with other wide trails extending east and west across the park so as to divide it into sections like a checker board.

The trails will be from 15 to 20 feet wide, and everything will be removed from these belts, or strips, through the park, with the exception of trees over three or four inches in diameter. These trails will not be confined entirely to the State park, but will extend across other lands as well, where satisfactory arrangements can be made with the owners, and it is thought desirable for the better protection of the State property.

The work was commenced the first of this week with a large crew of men on the top of the first divide, west of the Governor's Camp, and between the middle and west branches of the Waddell creek. This trail will be extended northward via the hollow-tree ridge to the top of the Butenow divide, and along this easterly to the end of the road known as the China grade. When completed the system of trails will not only greatly aid in protecting the whole of the Big Basin from ravage by fire, but also materially aid sightseers in exploring the park, as the fire trail can be used by explorers both on foot and on horseback, and parts of them will doubtless in time be converted into wagon roads. Members of the State Sempervirens Club now camping in the Big Basin are highly satisfied with the work thus far accomplished.

Fire Arms in the Yosemite.

Yosemite Valley is a favorite camping place for numerous outing parties every year. Many individuals take firearms along. These implements are not tolerated in the Valley. When camping or outing parties enter the Valley they are accosted by United States soldiers, who take their firearms away from them and give them receipts for the same. Those campers who go through the Valley are allowed to carry their guns after the soldiers have sealed them. The seals are broken by the soldiers at the other end of the Valley.

Careless Hunters.

While out hunting recently near Cloverdale, Chester Lawley had a very close call from death or serious wounding. Lawley became separated from his companions, who wandered away in different directions. Young Lawley was making his way through a thicket when one of his friends, mistaking the moving object for a buck, blazed away in the direction of the noise. The bullet struck Lawley's rifle and this saved him from serious injury. A portion of the lead struck his arm and became imbedded in the flesh, from which it was extracted by a surgeon.

DOINGS IN DOGDOM.

Field Trial Notes.

Reports from the field trial grounds, near Bakersfield, are encouraging for a successful running. Birds are plentiful and other conditions are most favorable.

Secretary Albert Betz is in communication with

some of the leading Eastern field trial judges in the endeavor to get a judge to officiate next January.

Both W. B. Coutts and J. E. Lucas have gone north with their strings of Setters and Pointers for the British Columbia and Pacific Northwest Trials. The latter meeting will be run at La Conner Flats, Wash., the former trials are scheduled for Ladner, near Vancouver, B. C. The dogs, both young and old, will be worked on Mongolian pheasants, for this grand game bird is the only variety available for the northern trials. The Chinamen are plentiful on the training fields and in the trial grounds.

James Cole of Kansas City, Mo., and W. D. Hardin will judge the Northwestern field trials at O'Neill, Neb., beginning September 11th.

The Derby purse for the Illinois Field Trial Association's meet will amount to \$500.

In Minnesota State, during the month of August, handlers are compelled by statute to lay their dogs off, for during this time dogs are not allowed to run at large in fields. Owners are liable to arrest for violation of the State game law and the dogs are classified as public nuisances and may be killed by any person, without recourse. This law was passed at the last session of the Legislature and is very specific. The game wardens do not now hear the explanation, "Why, I am just training my dogs," when confronting a suspicious individual on the fields a few days prior to the opening of the quail season.

W. W. Titus and Theodore Sturgis will judge Eastern Field Trials Club meeting in December at Waynesboro, Ga.

Between now and the middle of next December nineteen field trials are scheduled, with more to come.

Pacific Northwest Field Trial Club.

Secretary Chas. L. Lundy, writes from Seattle as follows: Referring to our field trial prospects, I have the honor to say that the Pacific Northwest Field Trial Club (of which the writer has the honor to be secretary-treasurer), will be run at LaConner Flats October 13 and 14, with J. M. Taylor, of New York, as judge on "Bob Whites."

We have a cracking nice little club up here, of which Hon. John Riplinger (owner of Ch. Stylish Sergeant, Ch. Bracken O'Leak and the Ch. bitches Pera and Ellore), is president, and among the other members are John W. Considine, whom the dog world knows as the owner of the greatest of all, the deceased Doc Hick, and that queen of matrons, Jessie Rodfield, besides a world of other possibly equally as good under similar circumstances; Mr. Yandell, sporting editor; Capt. A. E. Swift, proprietor of the LaConner line of steamers; N. A. Weeden, who is still wearing crepe for the loss of his celebrated Count Whitestone's Chief and Rhoda C, together with a promising derby prospect, all of which recently died because of that dastardly destroyer, the poison fiend.

We are sure of plenty of birds and certain of the very prettiest grounds—all oat fields of generally 500 acres.

The British Columbia field trials will be run just prior to ours, with an international stake which we, of course—as did all the other Americans who went over to compete with English subjects—hope to win out.

A Dog Is Always Honest.

"There is one peculiar thing about dogs," remarked a well-known local fancier and sportsman, "and that is you never saw one pant and wag his tail at the same time, for it is impossible for him to be mad at one end and glad at the other.

"If a dog is glad to see his master he will bark and wag his tail. If he wants to get into the house he will paw at the door, whine and wag his tail, but they are all symptoms of the same emotion. But if his master opens the door he will cease to show anxiety immediately by whining and will show pleasure only by the wagging of his tail.

"In order to get a man's temper one must watch his eyes, but for a dog's you have to watch his tail. The dog is likewise incapable of deceit, and hence he is nothing of a politician. He deceives no one, not even his master. If he is overjoyed every emotion is indicative of that fact, and his whole make-up gives ample testimony to it. If he is displeased or angered it is the same way."

SAN MATEO SHOW.

The premium list for the San Mateo one-day open air show on September 9th gives a full classification for nearly every breed.

Charles K. Harley will judge Fox Terriers. Mr. Chas. Lyndon of Menlo Park will judge St. Bernards, Mastiffs, Newfoundlands, Great Danes, all Hounds, all Spaniels, Welsh Terriers, Skye Terriers, Scottish Terriers, Pugs and Pomeranians. All other breeds will be looked after by dog handler Bradshaw.

The list of specials announced is an attractive one and they will be won outright by exhibitors. A complete list will appear in the show catalogue. The following cups are already offered:

Mr. W. W. Stetthelmer, for best St. Bernard; Mr. P. C. Meyer, for best Great Dane; Mr. Chas. K. Harley, for best Setter or Pointer; Mr. Irving C. Ackerman, for best Hound, any variety; Shreve & Co., for best Cocker Spaniel; San Mateo Kennel Club, for best Cocker Spaniel of opposite sex of winner of Shreve cup; Mr. Clarence Walters, for best Collie; Mr. Maurice Ballin, for best California bred Collie; Mr. L. E. Folk, for best Collie of opposite sex of winner of Walters cup; Mr. H. M. Papst, for best Bulldog; Mr. Norman J. Stewart, for best French Bulldog; Mr. Wm. Larsen, for best Bull Terrier; San Mateo Kennel Club, for best Bull Terrier of opposite sex winner of Larsen cup; Mr. Jos. O. Horne, (president of Santa Cruz Club), for best Boston Terrier bitch; San Mateo Kennel Club, for best Dachshunde; Mr. H. Eugene Kraus, for best Irish Terrier; the Bohm-Bristol Co., for best

smooth Fox Terrier; S. & G. Gump, for best wire Fox Terrier; Mr. J. P. Norman, for best Toy Dog, any variety; California Cocker Club, for best Cocker in show, to be competed for by members only.

The regular prizes will be ribbons, blue, red and white in the order named. The club trophy will be first prize in winners class.

The officers of the San Mateo Kennel Club are: Philip C. Meyer, president; Chas. K. Harley, first vice-president; W. W. Stetthelmer, second vice-president; D. J. Sinclair, secretary; Irving C. Ackerman, treasurer; Bench Show Committee: Philip C. Meyer, W. W. Stetthelmer, Irving C. Ackerman, K. O. Steers, veterinary surgeon.

Entries will close Friday, September 1st. The club's San Francisco office is at No. 710 Mission street, tel. Main 3187.

Mr. Leon Greenebaum has purchased a light brindle Bulldog from Mr. Thos. Ashton. Braemer Albert (Braemer Galtee More—Braemer Beatrice) is 14 months old and full of promise. Mr. Greenebaum did not receive the dog he originally bought from Mr. Ashton. The dog was smothered in an express car, in transit to this city. Braemer Albert was sent out instead and the Yorkshire man says he will go a bit.

VALIDITY OF COUNTY ORDINANCES.

It is possible that the courts will decide that special county ordinances restricting the open season allowed by the State law are invalid. The District Court of Appeals in Southern California decided recently that a one-day dove law passed by the Los Angeles supervisors was illegal. The opinion of the majority of the court held that the "police" function in regard to game, bestowed upon the Supervisors of each county in 1897, had been made invalid by a more recent amendment to the Constitution, known as Section 25½, Article IV, which reads as follows:

"The Legislature may provide for the division of the State into fish and game districts and may enact such laws for the protection of fish and game therein as they may deem appropriate."

In explanation of this section the following comment appears in the opinion of the court:

"We are unable to see any particular significance attaching to the manner in which the word 'may' shall be read in this constitutional amendment, inasmuch as its obvious intent was to confer upon the State Legislature alone authority to deal with the subject of fish and game, and in such legislation to relieve it from the necessity of enacting general laws applicable alike to the whole State, and the effect of which could only be to remove the necessity existing for delegation of power to local authorities.

"We are of the opinion, therefore, that any authority reposing in the Legislature to delegate legislative power to counties in reference to this subject was revoked by the amendment, Sec. 25½, Article IV, and the failure and neglect of the Legislature to obey the plain mandate of the constitution does not empower the board of supervisors to assume this duty reposing in the State alone."

This reasoning would, of course, knock out all of the special game laws passed by supervisors, but one of the District Justices refused to concur in the entire opinion, though he agreed the Los Angeles ordinance was illegal, holding that it was a virtual prohibition of dove shooting, instead of a regulation of it.

It is therefore uncertain how the other District Courts of Appeals will rule on this point, and, in view of diverse opinions, it is likely that the matter will be carried to the Supreme Court. If any San Francisco sportsman wishes to test the question, let him go over to Contra Costa county after August 20th and kill a huck—if he can find one.

In view of the fact that a recent decision of the appellate court virtually reverses a decision of the Supreme Court, there has arisen considerable discussion as to what the relation is between the Supreme Court and the District Courts of Appeal.

The appellate courts are entirely subordinate to the Supreme Court, which may, by its rules, virtually determine to what extent the appellate courts shall be the end of litigation, and it is gratifying to know that the Supreme Court is disposed to hear as few appeals as possible. There is a large class of cases in which, on appeal, the facts as developed in the trial courts come more or less under review. In such cases the Supreme Court will not entertain petitions for rehearing. The decision of the appellate courts shall be final. If this rule is rigidly adhered to, the Supreme Court will be able to devote its entire time to disputed questions of law, which, in cases with which the appellate courts deal, will not come before it until they have been thoroughly threshed out and the kernel separated from the chaff. As to these, also, the Supreme Court has full discretion whether to allow an appeal, and presumably will never do so except in cases of real uncertainty as to the law. That is as it should be. The judges of the appellate courts are always likely to be as able men as those on the supreme bench, and the intent of the constitutional amendment was to make these courts the final resort in the majority of cases coming before them. And the more closely that is adhered to, the better it will be for the litigants as well as the public.

Sportsmen generally are pleased with the decision made in Los Angeles. While it is true that a game law that works all right for Siskiyou county may be sadly out of gear for Los Angeles, the remedy for such a divergence is not a harmonious one—the result of a difference in the game laws of adjoining, or nearby, counties has been confusing and detrimental to game protection.

One law for the whole State, it is claimed, will do more good than many scattering laws.

Battle Creek Fish Hatchery.

Work on the new fish hatchery building at the Battle Creek sub-station of the United States salmon hatchery will be carried on as rapidly as possible.

The building at Battle Creek will be 50 by 120 feet in size, and will allow for an increased capacity of the hatchery to 100,000,000 eggs. Last year the take was 58,068,000, the scarcity of room preventing a bigger take.

When it is considered that the Battle Creek station is already the largest fish hatchery in the world, some idea can be had as to what the magnitude of the station will be when it is doubled in size.

A large force of carpenters will be put to work, the old building moved, and the new and modern one erected in time for the summer take of eggs.

A Bag of Wildcats.

Supervisor Charles Boxton, N. J. Frankenberg and N. C. Terwilliger of San Francisco, while hunting last week on the ranch of the Western Live Stock Company, one mile from Laytonville, in Mendocino county, came upon a bunch of five vicious wildcats. After a lively battle, which lasted half an hour, the party succeeded in killing all of the bobcats. The largest one measured three feet nine inches.

Seizure of Illegal Sized Fish. On Tuesday Game Warden George Neale seized 2250 pounds of underweight striped bass, on the arrival at Sacramento of the boxes of fish consigned to the American Fish Company. The fish were sent from Porta Costa by one Petrich, the same fisherman who sent the undersized bass to Sacramento last week, and for which both he and the fish company's manager paid fines, as is noted elsewhere.

Among the 2250 pounds of striped bass seized, but four fish were found that were over the weight required by law, three pounds. It was evident that the net fishermen had not made the slightest effort at compliance with the law. It is very probable that the shipper will be arrested again also. The limit fine for this offense is \$200 and it is to be hoped that the shipper will get the limit, the fine of \$30 last week seeming to have been of but little effect.

The American Fish Company declined to receive the underweight consignment and Mr. Neale confiscated the fish, all of which were packed in crates, each holding 250 pounds. Mr. Neale divided the fish around among the orphanages and charitable institutions of Sacramento.

"It is hard to make a case against the shipper of proscribed fish," said Mr. Neale. "The consignment I seized was shipped from Port Costa; the consignment I seized a week ago was shipped from Black Diamond. The shipper does not express the fish. As a rule he goes to a way station and puts the crates aboard a train with only a card marked with initials or letters of some kind to indicate the sender. It is presumed the consignee knows the name of the sender, but they usually are not anxious to tell what they know."

AT THE TRAPS.

Over thirty shooters attended the monthly shoot of the Golden Gate Gun Club at Ingleside last Sunday. The principal honors for the day fell to Otto Feudner, who was high gun in the club race at 100 targets. He also won the Phil B. Bekeart challenge cup with the excellent score of 92 out of 100 targets.

The purse winners in the club race were: Champion class—Feudner, Ed Schultz, M. J. Iverson, C. A. Haight and A. J. Webb, in the order named. First class—Wattles, Gamble, F. Schultz, Potter and Harpham. Second class—H. Klevesahl, Jacobsen, Burns and Knick. Third class—Harvey, Cuneo, Patrick and Johnson.

Club race, 100 targets (50 on the straight bulkhead, 50 Sergeant system) \$100 added—\$25 for each class.

Champion Class—				
Feudner, O.....	21	25	24	24-94
Schultz, E.....	23	21	23	21-88

Guests—Walker 70, Bishop 38, Brownell 31.

Phil B. Bekeart's perpetual challenge cup race, 100 targets, 16 yards, \$5 entrance.

Feudner.....	23	24	24	21-92
Holling.....	23	23	23	21-90
Webb.....	21	22	22	22-69
Varlen.....	21	22	25	21-69
Schultz.....	22	20	24	22-88

The California Wing Club monthly shoot tomorrow will have an added feature to the regular program.

An open-to-all race at 15 pigeons has been arranged. The trophy to be shot for is a valuable and handsome silver cup. The shooters will be handicapped in distance from 26 to 34 yards. The entrance will be \$5, birds included.

W. R. Shafter was high gun at the Bakersfield Blue Rock Club shoot July 23d. The scores made were the following:

	Shot at	Broke	Percent
Shafter.....	125	103	83
Stoner.....	175	131	75
Scottell.....	175	127	72
Getchell.....	175	123	70
Jewett.....	165	119	68
Nelson.....	75	50	67

Hochheimer.....	125	71	57
Nelson.....	100	56	56
Oswold.....	50	26	52
Tupman.....	100	63	40

The Napa Gun Club shoot, July 30th, was a target-smashing day for keeps; no less than 20 events were shot out. A number of the Vallejo shooters were in attendance. The scores made were the following:

Ten targets—Grant 8, Rohner 5, Mayfield 9, Slack 3, Amstutz 7, Reavis 5.

Fifteen targets—Reavis 6, Grant 11, Amstutz 8, Mayfield 11, Slack 8, Rohner 8.

Twenty-five targets—Rohner 12, Grant 17, Mayfield 8, Amstutz 11.

Twenty targets—Eustace 13, Grant 16, Reams 13, Rohner 14, Slack 8, Mayfield 11.

Twenty targets—Rohner 14, Reams 17, Eustace 14, Mayfield 12, Grant 15, Raney 11, Doherty 4.

Ten targets—Mayfield 7, Rohner 7, Grant 8, O'Hara 8, Coe 5, Mann 5, Shouse 4, Roney 7, Eustace 3, Reams 7.

Ten targets—Shouse 4, Coe 5, Doherty 4, Mayfield 5, Grant 8, Roney 8, Rohner 5, O'Hara 5, Mann 10, Hirschle 5, Reams 8.

Fifteen targets—Rohner 8, Grant 10, Reams 11, Shouse 6, O'Hara 9, Coe 6, Doherty 11, Mayfield 13, Roney 10, Mann 12, Hirschle 6.

Ten targets—Rohner 4, Doherty 4, O'Hara 9, Griffith 7, Roney 6, Hirschle 9, Mayfield 8, Reams 8, Clark 5, Arnold 5, Mann 7, Slack 2.

Twenty targets—Coombs 11, Reavis 10, Mann 12, Rohner 7, Roney 18, O'Hara 15, Hirschle 18, Arnold 14, Clark 7, Coe 10, Mayfield 14, Reams 15.

Fifteen targets—O'Hara 14, Roney 10, Hirschle 11, Reams 10, Mayfield 9, Arnold 7, Coe 11, Mann 10, Shouse 7.

Ten targets—Hirschle 8, O'Hara 8, Mayfield 7, Coe 4, Arnold 6, Roney 6, Shouse 6, Mann 2, Reams 6.

Twenty-five targets—Hirschle 18, Coe 17, Reams 15, O'Hara 21, Roney 18, Arnold 13, Mayfield 17.

Ten targets—Roney 7, Mann 7, O'Hara 6, Mayfield 3, Reavis 5, Coe 6, O'Hara 7, Reams 6, Roney 7, Coe 3, Rohner 1, Mayfield 6.

Ten targets—Mayfield 4, Coe 3, O'Hara 6, Roney 6, Reams 5.

Ten targets—Reams 4, Coe 2, O'Hara 6, Roney 9, Mayfield 6.

Ten targets—Coe 4, O'Hara 8, Mayfield 9, Reams 8, Roney 8.

Ten targets—Mayfield 5, O'Hara 7, Reams 7, Roney 8.

Ten targets—Roney 6, Reams 6, O'Hara 7, Mayfield 4.

Ten targets—Mayfield 6, Reams 7, Roney 7, O'Hara 6.

TRADE NOTES.

Averages Reported.

Decatur, Ill., July 18th and 19th, H. W. Cadwallader, first general average, 384 out of 400, shooting "Du Pont." F. C. Riehl, second general average, 381 out of 400, shooting "New E. C." (Improved).

Chicago, Ill., July 22d, first amateur average, A. A. Winesburg of Chicago, Ill., 181 out of 200, shooting "Du Pont." Second amateur average, J. B. Barto of Chicago, Ill., 178 out of 200, shooting "Du Pont." Third amateur average, George Roll of Blue Island, Ill., 177 out of 200, shooting "Du Pont."

Grouse Shooting.

"The Old Grouse of Willow Hollow" is the latest booklet of the series now being issued by the Hunter Arms Company of Fulton, N. Y. The story is well told, short and to the point. There are other matters of interest within the covers. Send for one.

The Leader Shells Lead.

It's hard to beat the "Leaders." This refers to those that lead in trap shooting, as well as to the Winchester "Leader" shells, which seem to be on the top all the time. From all points throughout the United States come reports of important winnings made with these shells, some of them being very nearly clean sweeps. For instance, the twelfth annual tournament of the Montana State Sportsmen's Association, held at Bozeman, Mont., resulted in every medal and trophy contested for, as well as all the amateur averages, being won by shooters that used the "Leader" shells. The exhibition shoot given by the professionals present at 25 targets, was also won with the "Leader" shells, the winners being Messrs. H. C. Hirschy, A. Grosebeck and Fred Gilbert. At the Texas State shoot the high professional, as well as the first and second high amateur averages, were

won by F. M. Faurote, I. A. Dryden and David Curran, respectively, all shooting the "Leader" shells. At the New York State shoot, held at Utica, the Dean Richmond trophy, valued at \$1500, which was by far the most important trophy contested for at this tournament, and which is emblematic of the two-man team championship, was captured by J. Warnick and Al. Green, both gentlemen using the "Leader" shells. At the tournament of the North Carolina Trap Shooting Association, held at Durham, Mr. G. M. Collins, an amateur, won the high general average, the second amateur average being captured by E. C. English. Both of the above shooters used "Leader" shells. At the Chef Menteur, La., tournament, Mr. R. E. Saudier, shooting the "Leader" shells, won for the second consecutive time the handsome Du Pont trophy on the splendid score of 49 out of the possible 50 from the 18-yard mark. The high professional, as well as the first three highest amateur averages at this tournament, were also won by shooters that used the time-tried Winchester "Leader" shells, namely: F. M. Faurote, high professional; R. E. Saudier, D. W. Breazeale and "Siligo," high amateur. Of course all the above shot the "Leader" shells. At the Canton, O., State shoot, the Sportsmen's Review cup, emblematic of the two-man team championship of the State of Ohio, was captured by Frank Hulshizer and Jesse Orr, both using the "Leader" shells. At the Capital City grounds at Little Rock, Ark., J. M. Pemberton again successfully defended the individual State championship in a shoot with S. M. Powell, beating him five targets. This makes the second time Mr. Pemberton has defeated Mr. Powell for this medal. The former gentleman used the "Leader" shells, the shells he always uses. At Brenham, Texas, Otto Sens won the high amateur average with the magnificent score of 387 out of the 400. Mr. Sens always uses the Winchester "Leader" shells. At the Jacks Creek, Tex., tournament, F. M. Faurote was again in evidence and captured the high professional average of 96 per cent, I. A. Dryden being the winner of the high amateur average at this tournament. Both of these gentlemen used the "Leader" shells. On the top of all this is the most wonderful straight run made by W. R. ("Billy") Crosby of 419 without a miss in a regular bonafide tournament. Mr. Crosby has held the world's long-run record of 345 straight since March 31, 1901, and now makes another world's record of 419. "Billy" Crosby, as well as Fred Gilbert, H. C. Hirschy, J. A. R. Elliott, Harold Money, F. M. Faurote, R. R. Barber, the winner of this year's Grand American Handicap, and any number of other famous trap shots swear by the Winchester "Leader" shells and have made all their records with these shells.

THE FARM.

HOW TO EXHIBIT.

It is well known that the different breeds and the herds are estimated by the numbers and quality and especially the quality of their exhibit, not only at the state fairs (for the mass of the people attend only the district and county fairs), but at smaller fairs as well. So if you wish to create a demand for your hogs, to give your herd prestige, and to do your share in keeping the Berkshire hog at the head of the list, show your Berkshires at every fair within your reach, writes E. Duncan in "Blooded Stock." Now, it does no herd any good to be represented by hogs of medium or low quality or even by fairly good hogs that are only in medium condition, but a pair of pigs or one boar and his get or sow and produce in prime condition, will attract more favorable attention than twenty or twenty-five head just run in out of the pasture in order to fill all the classes. The same attention on five or six head will probably do you more good than scanty attention and feed on three or four times as many. It is a good idea to let it be known that your hogs will be at certain fairs. This will benefit you and the breed. Why the breed? Because if known that a good herd will be on hand, it will stop the fellows that run in hogs out of the field expecting to carry off the prizes on account of no competition; second, it will help the breed because it will act as a stimulant on those who have good hogs and are preparing them to do their best, knowing that competition will be sharp. It will benefit you because parties at all interested in seeing your stock will make it a point to be there, besides all benefit to the breed is benefit to you. To accomplish this end let your personal acquaintances, and those to whom you are known by reputation, know by letter and by notice in the live stock and county papers, where your hogs can be seen on exhibition, and having good hogs as heretofore stated your herd and breed will have a splendid chance for favorable comparison. If you don't

have a catalogue of your hogs, have a neat, attractive circular setting forth the good points of your herd and breed. If you have no Berkshire classes, get the other breeds of Berkshires together, pick a judge and have him tie ribbons on the best recorded Berkshires.

When you are out at a fair do not fail to show your hogs and enthusiasm to all those interested enough to want to know more about "the best hog." Carry along your certificate of register, so if called on to do so you can show same to the judges, buyer or competitor.

And lastly, whether you beat the other fellow or he beats you, see that your treatment of the fair officials, judges, competitors, and the public is such as to gain their confidence and esteem.

SHIPPING POULTRY.

The shipping season for poultry is at hand. The demand for poultry is good now, and prices are high. Where only a small number of birds are to be sold it would probably be best to patronize a local firm, says an exchange, but if a large shipment is to be made it would pay the poultry raiser to handle his shipments through some reliable commission firm on the large markets. These firms will gladly furnish daily market quotations so that the shipper can keep in touch with the market each day, and, therefore, come pretty near knowing what poultry is worth.

It is often best for a number of neighbors to combine their interests and ship their poultry together, sending the shipment direct to the large commission houses and thereby avoid handling the sales through a third party.

In shipping live poultry it is a good plan to grade the shipment. Feed the fowls all they will eat just prior to shipping. We know of no better feed than good shelled corn or wheat. Give the birds plenty of water. One who shipped several thousand dollars' worth of poultry last winter to Chicago claims that 125 pounds of live poultry will consume eight pounds of shelled corn in the last feed just prior to shipment. He feeds shelled corn and gives the fowls all they will eat just before being placed on the cars. He says that by this method of feeding a shrinkage of one-tenth the total live weight is sustained. One of the

important things in shipping live poultry is to see that the stock is taken to market as quickly as possible.

STERILIZE MILK CANS.

An interesting test of the effect of cleaning milk cans, making them germ free by the use of steam before milk is poured into them, has been made in Germany. Some time during hot summer weather two milk cans were selected; one was thoroughly well cleaned in the ordinary way by scrubbing with hot water; the other was subjected to the action of steam for half an hour. In the first, the milk went sour in twenty-three hours; in the second, twenty-eight and one-half hours, and the contents of the first can were found to contain twenty-six times as many bacteria as the other. The same experiment repeated in the winter showed that the sterilized milk can will keep the milk sweet for nine hours longer than the other.

DAIRY NOTES.

Clean dairy utensils are half of the battle.

Never skim milk when it is over 36 hours old.

When the young heifer kicks give her a caress in return.

Good breeding and good feeding are the dairyman's long suit.

Some cows are naturally stubborn just as some horses race.

Thunder showers preceded by sultry weather make sour milk.

The dairy calf needs attention now as well as at any other time.

A cup, medium size, of salt is enough for five pounds of butter.

The milking stool is a dangerous weapon in the hands of a bad-tempered milker.

Thirty to forty pounds of cow peas will plant an acre in rows for cultivation. Good crop for Southern dairy farmers to raise.

Where mangles are fed to cows they may be fed quite freely, giving them from a peck to half a bushel per day with great benefit.

There are some cows which make white butter all the year around and three drops of coloring in a gallon jar will make it look more palatable.

Rancid butter is made from over-ripe cream and may taste when taken from the churn all right, but in a few hours it is the same old sour cream.

FOR SALE.

Fast Pacing Stallion JOHN A. 2:12 3/4 (three-year-old 2:14); sire Wuyland W. 2:12 1/2 by Arthur Wilkes; dam Lady Moor by Grand Moor. Wayland W. is the only stallion to put two in the 2:10 list this year up to August 1st. JOHN A. is a rich seal brown, stands 16.2, weighs 1255 lbs., is kind and gentle for a lady to drive. Is a very fine individual of strongest conformation, and as all of his colts are fine lookers he should make a great sire. His oldest colts are three years old; none have been worked. There were but three of them, as he was not regularly in the stud.

Three-year-old Trotter SIR CARLTON 36367 by Nutwood Wilkes 2:16 1/2; dam Lady Keating by Stam B. 2:11 1/2, second dam the dam of Diawood 2:11 and Abidine 2:17. SIR CARLTON is paid up in the Occident Stakes and ready to start. Should be not win any money this year, will make a great prospect in the green classes next year; as no gamer colt ever lived. He can trot the fifth heat the fastest. In another year he will be able, barring accidents, to trot in 2:13 or 2:14. Any horseman at the Woodland track will recommend him as a game colt and a good trotting prospect. He only wears a harness and a pair of quarter boots and does not need the latter. Weans 6 ounces in front and 5 behind.

I also have some good road horses and brood mares for sale. They can all be seen at State Fair Grounds, Sacramento. Address

A. E. MASTIN,
1016 Nineteenth St., Sacramento.

MATCHED TEAM FOR SALE.

A WELL MATCHED PAIR OF STANDARD bred Geldings, 15.3 hands high. Will weigh about 1100 pounds each; gentle and perfectly well broken. Not afraid of automobiles or cars. Can step a mile in 2:40. Stylish, sound and good lookers. Full brothers, sired by Senator L. Also two single horses desirable for gentlemen drivers. Can be seen at the I Direct Stables, 1308 Fulton St., San Francisco. Telephone Park 573.

T. C. CABNEY.

STANDARD BRED STALLION FOR SALE.

BY MENDOCINO 2:26 1/2; DAM PRINCESS BY Nutwood 6:00 About 6 years old, stands 15.3 hands and weighs close to 1100 pounds. Perfectly sound, and with about five months' training trotted a full mile in 2:18 1/2. This statement can be substantiated. Stallion can be seen at Hans Frelson's stables on Point Lobos ave., near 21st ave. For particulars address

M. M. DONNELLY,
1306 Grove St., San Francisco.

McKINNEY STALLION FOR SALE.

WILLEROO 2:20 1/2, BLACK STALLION, foaled March 18, 1893; height 16.2 hands, weight 1200 pounds. One of the best sons of McKinney. Handsome, stylish, finely proportioned and good dispositioned horse. Winner of three-year-old blue ribbon at the California State Fair as best standard trotter. As a two-year-old showed quarters in 33 seconds; as a three-year-old, miles in 2:17. Sired by McKinney; dam Junonies by Junius 5:38, second dam Lady Duroc by Iowa Duroc third dam Lady Green by Green's Bashaw, fourth dam Lady Cushman by Vermont Morgan. For particulars address

DAN REDMOND,
Care of Race Track, San Jose, Cal.

NORMANDY CATTLE.

I speak a few days not long since on Norman and Breton farms, and during the time learned something of the cattle.

In Normandy, two distinct varieties exist, the Cotentin and the Augeronne. The former are the more highly esteemed as dairy animals. They are big framed, unimpeccable in appearance with a long, heavy head, a large mouth, and white crumpled horns; the neck is strong, the shoulders heavy and muscular, and the chest deep. The body is long and angular, with wide, well-developed quarters and a finely formed milk parts, and they have every sign of being deep milkers, except that the skin looks thick and coarse. They have quiet dispositions and seem always contented; their color varies, the prevailing hues being brown, roan, red, and piebald, often with brown streaks, giving rise to the term brindle.

Cotentin cattle are to be found in all the best dairy districts, which extend from Cherbourg to Lisieux, including Valognes, Carentan, and Isigny, and are highly suitable for dairy purposes, being better adapted to the districts of which they are natives than any made breed. A cross between the Norman breed and others seems to improve them for beef making, but all crosses to improve their dairy qualities have failed. The Augeronne variety is found chiefly in the valley of the Auge, and is, as a rule, better adapted for slaughtering than for the dairy.

As to their milking qualities, the Norman will tell you that the Cotentin cow is the best milker in the world. It is incontestable that notwithstanding their plain looks they are admirable milkers, and many heifers are annually sent from Normandy to restock the cow sheds of Paris and its environs.

It would be of little practical value to give an account of the different milk records, or even an average of them, as I place but limited reliance on some of the figures, which represent, I believe, not more than a few weeks of the flush; while, on the other hand, some of the greatest yields were of the inferior quality. It was, however, proved to me beyond doubt that this breed, the Cotentin, will produce 40 pounds of butter a month during the greater portion of the period of lactation without any pampering in the way of food or treatment, the amount of artificial food fed them being very small.

The Brittany race occupies almost exclusively the five departments which comprise the ancient province of Bretagne, where it is very numerous and includes about 1,500,000 head, or one-eighth of all the cattle of France.

These animals present various characteristics, according to the fertility and cultivation of the soil where they are found. There are different opinions as to the origin of the breed, but the best authorities agree that it is Hollandaise, and that the race Bordelaise is nothing but the race Bretonne more developed by better climate and food. They are quick, active animals, of a mild, sociable disposition, and usually piebald or black, with a black or mottled muzzle. The head is short, fine and small, with bright eyes and small ears, while the horns are fairly fine, usually white at the base and black at the points. The color of the horns varies, however, to yellow or black throughout, the latter type being much prized if the horns are also short. The neck is small, the shoulders clean and light, with little or no dewlap, the legs very short, the back long and straight, and the quarters wide. The mamillary veins and milk vessels are wonderfully developed. The cattle are docile and hardy, and content themselves with little, while yielding high returns. The farmers assert that their cows give a pound of rich milk for every pound of good hay eaten. One farmer showed me animals which he said gave four, six and seven pounds of butter a week.

In grazing each cow is provided with a leather halter, to which is fastened a chain, varying in length from 20 to 30 feet, according to the quality of the land. At the end of the chain an iron stake is driven; cattle must be of a very peaceable disposition to thrive in this way; but when there are no fences, as in many parts of Normandy and Brittany, the system seems the best that could be adopted. It gives much labor in summer, when the cows graze night and day, and when water is distant. Many farms have large troughs, which are filled with water by carts. In such cases watering, milking, and changing to fresh pasture is generally

done three times a day during lactation.

Attending to the cows and milking is usually done by women, who go to the tethered cows at 5 or 6 o'clock in the morning, at noon and at 6 or 7 o'clock in the evening. When the days are too short the animals are brought to the sheds. A pony or donkey carries the milk jugs to and from the fields in summer by means of a yoked cart or a wooden frame fastened on the back. The system of tethering originated from necessity and has continued as a matter of economy. Owing to the small size of the holdings, which are often divided in still smaller ones on the death of the owner, each farmer needs to grow as much produce as possible for himself, his family, and his cattle. Thus the grass plot must be near the patches of wheat, mangold, beets, cabbages, etc., and to prevent these from being eaten up or spoiled by the cow she must be tethered. The Belgians, whose farms are also small, have met the difficulty by keeping their cows in sheds and carrying food and water to them.

The farmers in Normandy and Brittany claim for their system of tethering the following advantages:

Economy in feed as high as 50 per cent, the grass being eaten up clean, none left and none spoiled.

Regular feed, the cow not being pampered one day and starved the next, her appetite not being spoiled, and her digestion not being deranged.

Perfect command over the food supply by means of a long or short tether, a poor corner or a rich one.

No cost for fences.

Greater gentleness in the cow; her keeper is her good genius, on whom she is dependent for all wants, and docility necessarily follows.

More butter, as nothing is more destructive to animal fat in flesh or udder than too much exercise, and the farmer who fattens his bullocks in stalls and lets his cows run to grass stands in his own light.

It is evident, however, that unless a fairly mild climate prevails, with sufficient shade, the system would not do well. Further, it requires much labor at a season when labor is valuable, and cows thus treated must have a docile disposition.—Thornwell Haynes, Rouen, France.

SUMMER INDIGESTION IN COWS.

It is a common expression to speak of a cow as losing her cud when she stops ruminating. The trouble is due to indigestion wholly and may be easily remedied, in most cases, by a proper diet. Usually this trouble occurs most frequently in the winter when the cows are heavily grain fed, but sometimes occurs with cows in the summer who are on the range, but are receiving some grain. In such cases a good plan is to cut out the grain ration entirely for a few days, or until the cow again chews her cud. For a time after she resumes ruminating, feed her largely on the grass with some good hay and gradually get her on to the grain. A day or two after the grain ration has been cut off, the cow should have a single dose of one pound of epsom salts and two ounces of ground ginger root, mixed in two quarts of warm water. In the winter reduce the grain ration one-half, give her the medicine named above at the beginning of the treatment and make up the ration with roots or ensilage.

At all times cows should have free access to rock salt for it is a great digestive.

Reliable reports show that the Cubans have not many native cattle left. They had about 1,000,000 before the war, and all but about four per cent have vanished. They are shipping in from Texas, Venezuela and Colombia with some milk cattle from Florida. They do not care for fat cattle therefore they want the lean meat. The fat is cut away and is waste. All the cattle are full of ticks but they are immune. The ticks become so heavy on the cattle sometimes that they do not do well, but an effort is made to keep them washed off. The Colombia and Venezuelan cattle are big and seem to be what the Cubans want. They are sold at so much an animal and not by the pound except in the Havana market. All are sold for immediate slaughter to supply the daily trade in fresh meat. No effort has been made as yet to grow cattle for export.

The cream if just right will turn to butter after from 15 to 20 minutes' churning.

INOCULATING THE SOIL.

The new theory in regard to inoculating soil for the growth of certain plants has led to two difficulties. The first is the sufficient supply of the necessary bacteria and the second is in supplying the demand. Fungus and other diseases have been transported from one part of the country to another by the practice of buying bacteria inoculated soil.

Satisfactory crops of alfalfa have been grown by securing soil from a successful alfalfa field. The same may be said of cow peas and other legumes. But in several instances plant diseases, new to the country, have been directly traced to this manner of transferring soil from one farm to another. Some plant spores live in the soil and they may remain dormant for some time, but spring into active life when conditions are favorable. Cabbage disease, parasitical troubles in regard to tomato growing, and certain wilt diseases are readily transferred in this way. The probabilities are that many other plant diseases are likely to be carried in the soil. Almost every valuable agricultural plant has its natural enemies. By a good system of rotation and careful farming they may be kept under subjection when their habits are known, but when transported to other sections of the country they often produce more worry than destruction because farmers are not up in methods of fighting them.

Haphazard methods of buying inoculated soil are dangerous. If a farmer is inclined to experiment in this way it is a good plan to visit the farm, study the crops grown and ascertain if trouble has been experienced from any fungus or parasitic diseases.

Besides the danger of imparting plant diseases the ungerminated seeds of noxious weeds also may be brought home in this way. It is a common practice to take alfalfa subsoil for the purpose of inoculating other fields intended for this crop. Certain noxious weed seeds lie dormant in the under soil when covered too deep for germination. This under soil when spread on the surface and mixed with the warm upper earth furnishes the exact conditions necessary to sprout these seeds. Great benefits may be derived from inoculating certain soils but before taking the risk it is better to study the problem thoroughly.

PRESERVING EGGS FOR WINTER.

Next to cold storage, water glass is the best preservative for eggs. But temperature has much to do with the keeping of eggs.

The first essential in all methods of egg preservation is in starting with eggs that are perfectly fresh. The commercial name for water glass is soda silicate. It is used extensively by soap makers and it is sold by the barrel. It is cheap stuff, selling generally at from one to two cents a pound, according to quantity.

In making the solution boiled water is best because the impurities are destroyed by boiling and the air is forced out of the water. One secret in keeping eggs is to keep them away from the atmosphere. The ordinary well water contains some air. A hot 10 per cent solution of water glass is used and the liquid is kept in a cool cellar. Eggs carefully preserved in this way will keep six months and are just as good for cooking purposes as fresh eggs.

The story comes up that the great ranges of the staked plains of western Texas and lopping well over into eastern New Mexico are becoming unmercifully overstocked with sheep. This is causing some uneasiness among owners who are wondering what is to be done with all the woolies. A movement is on foot on the part of land owners in old Mexico, especially in the great foothill regions of that country, to transform some of the big cattle ranches into sheep ranges and in fact contracts are already being made with this end in view. The manager of the Hearst ranch in Chihuahua has bought 20,000 American sheep and is ready to take some more to eat the fine grass with which that country is blessed this year.

It is a great mistake to stable dairy cows so that they will stand face to face. It makes them restless and nervous and often serious fights break out.

PROFIT IN COWS.

Many figures have been published during the past year to prove that high-priced cows return the biggest profits. The manager of one well-known farm claims a profit of \$175.40 as an average per cow for last year. The figures do not take into account the milk fed to young stock on the farm. The same man says he is trying for a profit of \$200 per cow this year.

There is no reason to doubt these figures; they come from a source that is above reproach, but they are well calculated to set the average dairy farmer thinking. One hundred and seventy-five dollars for the milk, cream and butter sold is fully three times as much as the average cow brings. This much money is never made by poor or even medium cows. They must all be of the best.

It costs more money to get a valuable cow and it requires brains to take care of her after she is bought and paid for. It would do a farmer no good to pay \$200 for a thoroughbred cow of large milking capacity unless he has the knowledge necessary to take proper care of her and the stable, feed, market and other facilities to carry on the business.

The best cows may be easily made into scrubs by giving them scrub treatment. It is not advisable to invest two or three hundred dollars for an extra valuable cow unless the farmer has had some experience with well-bred stock. It would be much better to pay that much money for a good hull and grade up from common cows for a few years; then work into high-priced animals as experience suggests.

A great deal of money has been lost by farmers because of undertaking what they did not thoroughly understand. Good grades require different treatment from common hardy scrubs. The breeding and care of grades fits a man for the finer and more scientific management of thoroughbreds.

One who knows from experience says: The man who sells milk around town as a business has to consider a good many little things which has a great influence on his success. One of the first requisites is to have a clean looking wagon, with the inside so arranged that customers will be given the impression that everything is looked after in the most careful manner. We have known a good customer to be lost just because a driver had a piece of dirty carpet in the bottom of the wagon to keep his feet warm in winter time. The measures must be kept scoured and bright and it pays to buy new dishes often just for the influence they have in quieting the fears of customers as to dirt. The milk cans too should be scoured and kept bright for the same reason. The driver's hands must be kept very clean and there is no danger of being too dudsish to suit the customers. The wagon itself should never be allowed to become old in looks. A coat of varnish now and then will help matters very materially besides putting a polish on the anticipations of the man who pays the freight.

Sponges S. Adderley, 307 Market St

Warranted to Give Satisfaction.

Gombault's
Caustic Balsam

Has Imitators But No Competitors.

A Safe, Speedy and Positive Cure for Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lamenesses from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a Human Remedy for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. For descriptive circulars, testimonials, etc. Address

The Lawrence-Williams Co., Cleveland, O

EYE DISEASE OF CATTLE.

So-called pink-eye—properly termed contagious ophthalmia—presents the following effects:

Symptoms—Adult, young cattle and calves first show swelling of the eyelids accompanied by weeping. Redness of membranes of eyelids and "haw" becomes apparent, creamy discharge follows and in three or four days a clouded spot shows in center of eye and gradually spreads until sight of eye becomes milk-colored. Changing from milk-color to pearl tint the eye may become yellow, bulge, show bloodshot streaks, form an abscess and burst, leaving a ragged ulcer, or commence to clear up and finally recover. Slight ulcers may heal by granulation, but extensive ruptures and ulcers often lead to loss of sight. Fever and some loss of appetite are present, especially in young cattle, for a week or more from time of first attack and dairy cows may shrink in milk production.

Treatment—The disease being "catching" and doubtless due to a germ which leads to its spread from one animal to another, affected cattle should be separated from unaffected. The eyes of the latter should be washed once or twice a week with a solution of two drams of boracic acid in a pint of water as a possible preventive, and pastures bordering on rivers, ponds and sloughs should be abandoned as the disease seems most liable to attack cattle grazing on such low wet ground.

Place affected cattle in a darkened shed or stable. Give each adult animal a one-pound dose of epsom salts with one ounce of salt-peter and one ounce of ground ginger root in two quarts of warm water as one dose and follow with a tablespoonful of salt-peter twice daily in drinking water or soft food. Younger cattle should have the same medicine in smaller doses according to age and size. While under treatment do not feed grain but give soft and green food; allow all the cold water animals will take.

At the commencement of an attack puff between eyelids by means of a clean insect powder bellows a mixture of equal parts of finely powdered calomel and boracic acid; or cover eyes with soft cloth to be kept wet with a 1-2000 solution of bichloride of mercury (corrosive sublimate). This treatment may prove sufficient in a majority of cases, but should the disease persist and aggravate, substitute for above lotion one consisting of a dram each of sulphate of zinc and fluid extract of belladonna leaves, with 20 drops of carbolic acid in a quart of clean, soft water with which to keep cloth over eyes continually wet.

When inflammation subsides should the eye remain milky-appearing paint once daily with 1-1000 solution of bichloride of mercury or 3 per cent solution of boracic acid. In bad cases which are tardy in responding to treatment give (except to pregnant cows) one dram of iodide of potash twice daily for adult animal and from ten to twenty grains for calves and yearlings, continuing its use for one week. Ragged ulcers may with benefit be painted with a solution of three grains of nitrate of silver in an ounce of distilled water two or three times a week. Lastly, quarantine animals bought at stockyards shipped in or from infected herds.

COWS AND THEIR FEED.

It takes a large quantity of feed to make a large quantity of milk. The time and attention necessary to properly care for cows is about the same with the best as it is the medium or poor ones. There is no profit until the product obtained is sufficient to pay all expenses.

Many cows that might properly come under the head of medium, just about reach the dividing point between expense and profit. Valuing feed at market prices the average cost of keeping a cow a year is in the neighborhood of \$30. Until the product of a cow reaches \$30 there can be no profit. Some cows make \$30, others make \$60. One returns no profit, the other returns a profit of \$30. The cost is the same, except in feeding the better cow in almost every instance will consume more food. In looking for profit the greatest eaters should be chosen because no cow can manufacture milk without sufficient capacity. A cow is in one sense like a factory machine, the more raw ma-

terial it chews up the greater the output and the greater the profit. Some machines are worth more than others because their capacity is greater. But the attendant must know how to feed it. With both the cow and the factory machine the right kind of raw material must be fed in just the right proportions. The feeding must be regular and crowding, if attempted at all, must be done in a very gentle way.

But the cow is unlike a machine after feeding has been stinted; a machine may run light or empty and resume work again at its normal capacity—not so with the cow. When by neglect or improper feeding the milk flow is reduced, the most skillful feeder is unable to bring it back during the lactation period.

BARN COMFORTS FOR HORSES.

It is a good plan to give the horse in the stable all the fresh air possible and some stables are arranged so that a window is in front of the horses. This is an excellent plan, for by arranging such a window the horse may have plenty of fresh air day and night. Here is the way to do it:

Have a sliding sash and also a sliding screen which may be put in place when desired. Have this screen of fine mesh wire, of the regulation size used for windows of houses. Then, on the outside construct a sloping roof over the window held in place by corner posts resting on a board shelf which in turn is held in place by braces from its bottom to the side of the barn. On all suitable occasions have the windows open so that the horse may get its head out. The roof will shade its head from the sun yet the opening will be large enough so that it will get plenty of air. During the night the screen may be placed over the opening to shut out insects and in the event of a heavy storm the glass sash may be pulled in place wholly or in part.

The cost of such an arrangement is comparatively small, but it will add much to the comfort of the horse, particularly if other windows in the barn are so arranged that there is plenty of ventilation, even when it is necessary to close the window in front of him.

A large sum of money will be won at the American Royal Live Stock Show at Kansas City, Oct. 9 to 14 this year. The official premium list has been received. A perusal of the book shows what a truly marvelous advance this show has made. In the classes for Short-horns there are eight moneys, as many in those for Herefords, six in those for Galloways and eight in those for the Angus. In addition pure-bred and grade fat and feeding cattle singly and in carlots are provided for in the most ample manner. The draft and coach horse show this season promises much, a goodly sum having been offered for the Percherons, Belgians, Shires and Clydesdales and the French and German Coachers. T. J. Wornall, Liberty, Mo., is the secretary and C. R. Thomas, Kansas City, general manager. Application for the premium list should be made to Mr. Thomas.

The demand for men with technical education as foresters seems to be growing more rapidly than the supply. We are informed by the Forest Service at Washington, D. C., that a number of positions with substantial emoluments are opened to trained foresters. One result of this demand likely will be the establishment of chairs of forestry in our leading agricultural colleges. At present only a few of these institutions give instruction in forestry.

An Inflamed Tendon
NEEDS COOLING
Absorbine

Will do it and restore the circulation, assist nature to repair strained, ruptured ligaments more successfully than Firing. No blister; no hair gone; and you can use the horse, \$2.00 per bottle delivered. Book 2-B Free.

Brood Mares, Horses in Training and Yearlings, Belonging to the Estate of Michael Fox, Deceased.

NOTICE IS HEREBY GIVEN THAT THE undersigned executor of the will of Michael Fox, deceased, will sell on or after MONDAY, AUGUST 28, 1905, the following described brood mares, horses in training and yearlings, to wit:

Audinas (4) by St. Andrew-Fanny Louise.
Masado (4) by Maslo-Reseda II.
Re Carlo (2) by St. Carlo-Reseda II.
Edna Rose (5) by Bassettlaw-Reseda II.
Kidnapper (1) by Kentworth-Edna Rose.

The above described animals are now at the Oakland Race Track.

Said executor will also sell on or after said date the following brood mares and fillies, now at McDonough's Ranch, San Mateo County, Cal.:

Fanny Louise (dam of Andrla, Camoro, Sister Jeanne) by Dorella-Nellie Peyton.

Reseda II by Midlothian-Margold.

One Bay Filly by Orsini out of Fanny Louise,

foaled April 13, 1904.

One Bay Filly by Orsini out of Fanny Louise,

foaled April 21, 1905.

One Chestnut Filly by St. Carlo out of Reseda II, foaled January 24, 1905.

Fanny Louise was bred to St. Carlo, 1905.

Reseda II was bred to Orsini, 1905.

Bids or offers for all of the above described stock, as a whole or separately, must be in writing and will be received any time after the first publication of this notice at the office of Sullivan & Sullivan, attorneys for said executor, Room 610, Parrott Building, San Francisco, California. Terms—Cash in U. S. gold coin.

MATTHEW I. SULLIVAN,

Executor of the Will of Michael Fox, Deceased

FOR SALE.

"A STRATHWAY"

A Dapple Gray Gelding by Strathway out of a Thoroughbred Mare.

MR FRISCO is 8 years old and SOUND; weighs 1050 lbs. He is one of the grandest road horses in America today. Fearless of all objects on road; a very fast walker; does not pull or lug on the bit; carries his head high; goes straight and never stumbles; will stand when tied and there is no road too long for him. He is a good feeder and a good looker at all times, either before or after driving. His speed qualities are phenomenal. He never saw a race track until last spring, when he was sent to Mr. Al McDonald at the track at Pleasanton, who drove him a mile in 2:23 1/2, last half in 1:08 1/2, with only thirty days' training. Mr. McDonald says he will trot a mile in 2:15 with three months' handling. The owner of this horse has to go East and has left the horse, buggy and harness in charge of Mr. Thomas Kinney at the Fashion Stables, who will show the horse or outfit.

THOMAS KINNEY,

Fashion Stables, Ellis St., S. F.

FUTURITY CANDIDATE FOR SALE.

THE CONSOLATION HANDICAP

—at the—

GRAND AMERICAN

Held at Indianapolis, June 27-30, 1905. was won by Mr. Jas. T. Atkinson of Newcastle, Pa., score 99 out of 100 from the 18-yard mark, using

PETERS FACTORY LOADED SHELLS

This was the Only Event During the Entire Grand American which was won from Behind the 16-yard Line. Many other Notable Scores were made with Peters Shells, among them the following:

1st on Practice Day, F. M. See (tie), 99 out of 100. 1st on First Day, L. H. Reid (tie), 99 out of 100. 2d in Preliminary, Wm. Veach (tie), 97 out of 100. 3d in Grand American, M. Arle (tie), 97 out of 100. In the Consolation Handicap, 2 scores of 98, 5 of 97, 4 of 96 and 25 others above 90 were made with Peters Shells.

All of which merely goes to prove that Peters Shells are WINNERS.

SPAVIN CURE

"Save-the-Horse" is no untried or uncertain remedy. Its marvelous power and possibilities have been proven absolutely and positively. No man will fire, blister or treat his horse with anything else if he will investigate and read our booklet and the letters from bankers, trainers and horsemen on every kind of case. Send for them; also copy of guarantee.

THE NEWCOMB LIVERY

GEORGE W. OSGOOD, Proprietor.
Livery, Boarding and Sale Stables
120 122 South Fourth Street.

QUINCY, ILL., May 12, 1905.

Some twelve months ago I owned a horse which was practically worthless, due to a very bad Bone Spavin on his right hind leg.

I tried various remedies without success, finally purchasing from the Miller & Arthur Drug Co. of this city a bottle of "Save-the-Horse." After using one-half the contents of the bottle, according to instructions, the horse has never taken a lame step. I would gladly have sold him for twenty-five dollars before using "Save-the-Horse." I have sold him since for ninety dollars, and would not be without "Save-the-Horse" at double the cost.

GEORGE W. OSGOOD.

POSITIVELY AND PERMANENTLY CURES Bone and Bog Spavin, Ringbone (except Low Ringbone), Curb, Thoroughpin, Splint, Capped Hock, Shoe Boli, Windpuff, Weak and Sprained Tendons and all Lameness.

\$5.00 per bottle. Written guarantee—as binding to protect you as the best legal talent could make it. Send for a copy and booklet.

At Druggists and Dealers or Express paid.

ST. CHARLES, MICH., Feb. 28, 1905.

A year ago we had a valuable horse go lame with hog spavin. Seeing your advertisement in the Michigan Farmer, we tried "Save-the-Horse" under your guarantee, and he is completely cured. Waited a year to see if cure was permanent and now recommend it to anyone in need of such a liniment.

H. H. SANDERSON.

EAST SPRINGFIELD, PA., 2-22-'05.

I wish to carry your "Save-the-Horse" and "Ointment" in stock. What will you furnish same to me for? I used it on a bad curb and used horse every day in my practice. He is entirely well and sound.

Yours truly,
DR. C. W. HOTCHKISS.

"SAVE-THE-HORSE"

Is indicated for an enlargement caused by an injury which leaves a thickened condition of the tissues or skin.

Horse can be worked with either shin or ankle boots, as no harm can possibly come by either destruction of hair or scalding of the limb. "Save-the-Horse" can be applied in all conditions and extremes of weather.

San Francisco, Saturday, August 19, 1905

COLT STAKES are the very life of the harness horse business and without them standard bred stallions would not be patronized as heavily as they now are. There is a fascination about breeding a stake winner that takes hold of nearly every person that owns a well bred or fast mare, and the desire to win a stake with an animal of one's own breeding is almost universal among horse breeders. If it were not for the colt stakes which give the three-year-olds a large earning capacity, many breeders would soon fall into the habit of sending their mares to stallions of the draft or coach breeds in the hope of getting a foal large enough to sell in the city horse marts for draft or express purposes. The love of the handsome and fast light harness horse is very strong in many men, but there are a much larger number whose love of the money hung up in stakes vastly exceeds their love for the colt that can win it, and when they see stakes advertised in which the winner will be paid a large sum, they send their favorite mares to the stallion which in their opinion will be most likely to sire the speed required to win. For these reasons it behooves every stallion owner to do his utmost toward making the stakes successful. In this State we have the Breeders' Futurity, the Occident and the Stanford Stakes, and each and every one should have twice the entries it receives. While these stakes are successful and worth from \$2000 to \$3000 to the winner, if the stallion owners would do a little missionary work each year among the patrons of their horse, they would be worth not less than \$5000 each to the winner, and this would lead to the breeding of twice as many mares each year. There is a third payment on the foals of this year in Breeders' Futurity No. 5, which will be due and payable September 1st. The guaranteed value of this stake is \$7000, and if all foals on which second payment was made have this third payment made on them the stake will exceed its guarantee. We ask every stallion owner whose horse is represented in this stake by a mare bred to him last year, to use his influence to have the foal kept in the stake. It will benefit them and all interested in the breeding of trotters and pacers.

SECRETARY A. W. BRUNER, of the Los Angeles Horse Association in connection with the Directors of that organization, is hard at work on the program for a big fall meeting to be given at the Los Angeles track in November. The purses to be given will be liberal enough to attract horses from all over the Coast, and a strong effort is to be made to bring some of the fastest and most prominent of the Grand Circuit performers to the Coast to compete for big purses that will be hung up for them in races and also in record-breaking trials. It is thought that a Southern California Fall Circuit can be arranged, with meetings at Los Angeles, San Diego, Santa Ana, San Bernardino and Santa Barbara, and if this is accomplished it will be well into November before the last races are trotted in California this year. One thing is certain, if the lethargy which now prevails at Pleasanton and San Jose continues, this southern circuit will induce many trainers to do their winter and spring training at the Los Angeles track, as with the closing meeting of this and the opening meeting of next season located there, the inducement to remain in the southern metropolis all winter will be very strong.

ANOTHER California horse breeder has "crossed the divide." Last Monday afternoon Mr. Juan Gallegos, a resident of Mission San Jose in Alameda county, died as the result of falling down the stairs at his

home the day previous. Mr. Gallegos was 72 years old and came to California from Central America in 1880. He purchased a large tract of land at Mission San Jose and entered largely into the cultivation of grapes, and other fruits, making a great success of his venture. He also bred a number of harness horses; being the breeder of Diablotto 2:08½ by Diablo and of Trilby Direct 2:08¼ by Direct, besides a number of others. Mr. Gallegos was a highly educated gentleman, and a citizen who had the respect and esteem of a very large circle of acquaintances. He leaves a wife, two sons and six daughters to mourn his demise.

IT SEEMS all the members of the Cleveland Driving Club were not in favor of declaring off the meeting there at the last moment, several of the directors expressing themselves as willing to go down into their pockets to make up any deficiency that might result from the loss incurred by having no betting on the races. This was very commendable on their part, and evidence that they were game sportsmen who, having induced the horsemen to incur great expense in coming to Cleveland, did not propose to disappoint them. It is to be regretted that the entire board of directors did not look at the matter in the same way. Perhaps the deficiency would not have been so large after all, and it is more than probable that every owner who won any part of the money would have consented to a reduction of his purse, "pro rata," in order to save the driving club from loss.

THE TIME TO SELL is when a fair price is offered for a horse, no matter whether he is a world beater or a plug. This of course applies to breeders and owners who are in moderate circumstances and who desire to sell. The wealthy man who owns horses for pleasure can afford to refuse any offer; others cannot. Many a man refuses \$1000 for a horse when that amount of money would mean a profit to him on his investment and afterwards sells for \$1200 or \$1500 at a loss. It is easy to sell a second horse to the man who has made a good profit on the first one he bought from you, but it is very hard work to sell one to the person who lost on his first purchase.

THE FASIG-TIPTON COMPANY announces the annual Old Glory horse auction at Madison Square Garden, November 20th to December 1st, 1905, two weeks, days and evenings, following the National Horse Show. California breeders and owners who have horses to sell should communicate with this company immediately.

STATE FAIR DIRECTORS ARE JUBILANT.

SACRAMENTO, August 17.—The advent of another week sees the odds and ends in the preparation for the coming State Fair being rapidly whipped into shape, and the directors are jubilant in consequence. As the work of putting the race course and exhibition livestock grounds in condition progresses, it becomes more and more apparent that the State will have the best equipped and finest racing ground in the West.

The track is already in fine condition, under the direction of John Haybut, William Fieldwick's assistant, and it is probable horses will be permitted to work over the new course by next Monday. Haybut has a number of men working under him, and there is a continuous procession of watering carts, harrows and drags making the circuit day and night.

The inner and outer fences around the track will be finished in a few days, probably by Saturday night. It has all the appearance of a "dead fast track," as an enthusiast expressed it yesterday.

Although the grandstand is to be only temporary, it is quite a pretentious structure, after all. Particular attention has been given to making it strong and safe. It is stoutly supported and braced. The reason so much attention has been given to this important detail is because the public is usually wary of a temporary structure. There is no cause for fear in this case. Director Thomas Fox, in speaking of the grandstand said he, as superintendent of the park, would rather have it strong and safe than to have a covering over it, if any sacrifice in its construction had to be made. However, the covering will not be sacrificed.

At one end of the grandstand there will be a room for the directors, and there will also be a ladies' retiring room. There will be direct telegraphic and telephonic communication, and a large dining hall will be located under the stand. The kitchen will be at a sufficient distance from the dining room to insure the absence of the odor of cookery.

Work has been commenced on a new stable with forty box stalls for horses, such as have already been built. Additional cattle stalls are being erected also.

Although there will be a very large number of horses on the grounds, Director Fox said there would be no scarcity of stall room for them. Of course, some of them will have to be quartered in temporary stalls, but they will be commodious and properly roofed. A great many of the horses now racing at Portland will be shipped here for the State Fair, and with the very excellent trotting program, which has

been published, there will be plenty of sport.

The directors are making a great feature of Nevada Day, which will be Monday, September 4th. This is also Labor Day, and the two big events will be held jointly. The people of Nevada, particularly those in the western part of the State, are enthusiastic over the prospect, and promise to come several hundred strong. Excursion trains will be run from Reno, a round trip rate of \$5, good for six days, having been made for this particular occasion.

Three hundred Indians have been engaged to take part in the big demonstration, and at the park there will be horse races and foot races arranged expressly for them, and in addition there will be a cowboy fiesta in which broncho busting, roping and tying steers, riding wild steers and other features of the life of the plains will be shown.

Several Eastern breeders of fine horses and cattle who are booked to show at the Lewis and Clark Exposition have engaged stall accommodations at the park, and will vie with California breeders for premiums in their respective classes. Among the Easterners are McLaughlin Bros. of Kansas City, the LaFayette Stock Farm of LaFayette, Ind., and Crouch & Son.

It is no mere prediction—it is a certainty—that the pavilion will make a better showing than it has in a double decade. The Native Sons hold their celebration in connection with the State Fair, and they have taken an active interest in securing county displays.

The poultry show will be the biggest ever made under the State's patronage, no less than 1500 entries of fine fowl being assured at the present time. Henry Berrar, of San Jose, will be the judge in this department, a guarantee of fair and impartial treatment of all exhibitors.

Final payments have just been made in the Occident Stake, which is this year worth \$3880, as follows:

Alex. Brown's b. c. El Ray, by Nushagak-Pioche.
A. E. Mastin's b. c. Sir Carlton by Nutwood Wilkes-Lady Keating.
Martin Carter's b. f. Elma S., by Nutwood Wilkes-Bessie C.
Mrs. L. J. H. Hastings' b. f. Princess Louise, by Coronado—dam by Woolsey.
J. B. Iverson's b. c. North Star, by Nutwood Wilkes-Ivoneer.
J. A. Jones' b. f. Bellemont, by Zombro-Daisy Q. Hill.
Geo. W. Kingsbury's ch. f. Della K., by Silver Bow-Elina.
S. K. Trefry's bl. c. Kenneth C., by McKinney-Mountain Maid.
Vendome Stock Farm's b. f. Still Better, by Iran Alto-Much Better.

In the Harness Stallion Stake for 1905, final payments have been made as follows:

Trotting Division.

Alex Brown's b. c. El Ray, by Nushagak-Pioche
M. E. Delano's b. f. Ramona B., by Stam B.—dam by Albert W.
Mrs. C. F. Bunch's b. g. Alto Downs, by Iran Alto-Daisy S.
N. M. Strong's br. c. Ambush, by Zolock-May McKinney.
Vendome Stock Farm's b. f. Still Better, by Iran Alto-Much Better.

Pacing Division.

Ben Davies' b. f. Delilah, by Zolock-Gypsy.
F. E. Wright's b. f. Deviletta, by Diablo-Clara H.

NO RACING AT HONOLULU.

Breeder and Sportsman: Racing in Honolulu is as dead as a doornail. For the first time in over a quarter of a century, June 11th, the great Hawaiian holiday was suffered to pass without a meeting. The local Jockey Club is in a moribund condition, and the race-track has been allowed to go to rack and ruin. The adjacent stabling has all been torn down.

Just how long this condition of things will be allowed to prevail is uncertain. There are plenty of horses hereabouts but no one to keep racing enthusiasm to the point necessary to produce good racing. A reorganization of the Jockey Club and the appointing of energetic men as officers as well as men who know something of the racing game as carried on in enlightened communities, would probably prove the salvation of the sport on this island where racing, both running and to harness, has flourished from time immemorial.

There is some talk of the building of a new half-mile track on the outskirts of the city, but no definite move has been made in the matter as yet.

At Hilo on the contrary the sport thrives and the Hilo Jockey Club has just been successfully incorporated. They held a meeting on July Fourth in which many of the equine stars of the islands participated. The Fretter was entered but broke down. He may never race again. Old Antidote, by Senator Stanford-Poison, and the equine idol of the territory, won a six-furlong race. The winner is nineteen years old and won races here in the days of the monarchy.

J. MELTON AYERS.

The celebration to be held at Sacramento during fair week by the Native Sons of the Golden West, is meeting with hearty support. Fifteen counties have already appropriated money for an exhibit of their resources at the Pavilion. These exhibits will be under the management of the Native Sons from the respective counties, and as a \$500 prize is to be awarded the best exhibit, keen rivalry has already developed and a splendid showing of the State's products is assured.

JOTTINGS.

CALIFORNIA HORSEMEN have for the past few years been bewailing the fact that so few race meetings are held in this State that they hardly rise to the dignity of a circuit, but when they read of the blue laws in force over East by which several of the Grand Circuit meetings have of necessity been declared off they will take heart of grace and come to the conclusion that the situation in California is not half as bad as it might be. There is no State law here which prohibits betting on speed contests, except at the State Fairs, and the probability is this exception will be repealed at the next session of the Legislature. There was a time when thirty or forty of the half a hundred agricultural districts into which this State is divided could be depended upon to give a fair every year and at these fairs a program of harness racing was always provided for the amusement of the public, and the encouragement of harness horse breeding. When, in an effort to reduce expenses, a couple of our governors in recent years refused to affix their signatures to the bills appropriating money for these district fairs, they struck a blow at the breeding and racing of harness horses in California which has been felt from one end of the State to the other. The blow was an unfair one, delivered below the belt, but it did not have sufficient force to knock harness racing out completely, and there have been quite a number of good meetings held here each year since without the aid of fairs or State appropriations. The only real danger to harness racing in California at the present time is the apathy of breeders and owners. They are the ones to organize and see that meetings are given, as they are the persons who profit most by them. As has been stated before in this department there is nothing to prevent a first-class circuit being held in California every year except the lethargy of those most interested.

The three-year-old race at Santa Rosa to-day, in which the three-year-old trotters will compete for the big end of the Breeders' Futurity Stake, should prove a high class contest, as the four money winners will, after the race is over, be ranked with the best three-year-old trotters of the year in the entire country. Starting payments were made on seven, and of these two are by Nutwood Wilkes 2:16½, and one each by Zolock 2:05¼, Zombro 2:11, McKinney 2:11¼, Iran Alto 2:12¼ and Athadon 2:27. All these sires are producers of extreme trotting speed. Nutwood Wilkes sired John A. McKerron 2:04¼, McKinney sired Sweet Marie 2:04¼, Zombro is the sire of Zephyr 2:11, Zolock is the sire of Amhush, whose three-year-old record is 2:14¼, Athadon sired Athadon 2:10, and Iran Alto is the sire of two in the 2:15 list. All of these stallions, with the exception of McKinney, are still owned in California, and Zolock and Zombro are the sons of that great sire. So it will be seen that on their sires' side the three-year-olds to start in this stake are about as richly bred as colts to be found anywhere, while the pedigrees of the dams are first class in every case. Ambush, whose record of 2:14¼, made this year, has put him in the lime light, will probably start favorite, but the race is not his until he wins it and several horsemen who are good patrons of the pool box will be there to back other starters against him singly or in "the field." It is said that Mr. J. B. Iverson's good colt North Star, that won the first heat of the two-year-old division last year in 2:24, is showing wonderful speed this year, and last week worked a heat in 2:15 at Santa Rosa, and after the usual twenty minutes' rest, trotted the next mile in 2:13½. Bellemont 2:20½, the Zombro filly that won the two-year-old event in 1904, is working nicely and will carry a good deal of money in spite of the fast work that has been done by North Star and Ambush, while Kenneth C., with a record of 2:17 made at Los Angeles last month, and Elma S., who was a good third when Ambush trotted in 2:14¼, are both said to be ready to trot a good hard race for first money with a good chance of getting some part of the stake. Still Better is an unknown quantity so far, and while she has great speed inheritance, being by Iran Alto 2:12¼, out of Much Better 2:04¼, she will not be favorite, although she may fool the talent when the word is given. As a matter of interest at this time I give below the summary of the two-year-old division of this stake as it was trotted last year at San Jose:

Belle Mont, b. f., by Zombro.....	4	1	1
North Star, b. c., by Nutwood Wilkes.....	1	2	2
Ambush, b. c., by Zolock.....	2	5	5
Athasham, b. c., by Athadon.....	3	3	3
Gluck, b. f., by Zombro.....	8	4	4
El Rey, b. c., by Nushagak.....	5	6	7
Mamono, b. f., by Demonio.....	6	7	6
Elma S, b. f., by Nutwood Wilkes.....	7	8	8
Time—2:24 2:22½ 2:21¼			

A friend of mine who is a pretty close observer made the statement the other day that the enforcement of the laws against betting on the Eastern trotting tracks this year will cause an entire rearrangement of the Grand Circuit for 1906, and that while Readville, Cleveland, Cincinnati and Memphis will be off the map, there will be other places step in to fill up the vacancies made by the inability of those places to hold meetings, just as Poughkeepsie took Empire City Track's date this year. The Grand Circuit will not die even though some of the leading associations are compelled to close their gates. It will probably not be long however until the vast interests of harness horse breeders are recognized in every intelligent community and laws passed by the majority of State Legislatures that will permit the

harmless sport of wagering on the result of races during certain weeks of the year. That long continued meetings are detrimental to any sport cannot be denied, but because a few act the glutton is no reason why all should be made to abstain entirely. If the Grand Circuit continues and vacancies are filled by associations that keep up the tone and class which has been given racing in those towns where wagers on results have been made unlawful, the loss caused by the blue laws of Ohio, Massachusetts and other States will not fall on horsemen in general, but only upon those mentioned and people engaged in the breeding and racing of trotters will simply have to change their habitation, or organize to have these puritanical laws repealed. A horseman's love of home is as strong as the next man's and therefore the probability is that a united effort will be made this winter to legalize speed contests and the betting thereon by such wise and rational laws as will meet the approbation of everybody except the alleged purists and the professional gamblers. As it is these two classes are the upper and nether mill stones under which the horse breeding industry and the sport of harness racing are being crushed.

BIG STOCK SHOW IN SEPTEMBER.

PORTLAND, Aug. 17.—"You can say without hesitation that the stock show at the Lewis and Clark Exposition will be a good one," is the way M. D. Wisdom, superintendent of livestock for the Western World's Fair, explains the situation with regard to his department. "It will be the biggest show ever held in the West," Mr. Wisdom adds, "and will compare favorably with the other big shows of the kind which have been held in connection with expositions."

The stock show dates are from September 19 to 29, inclusive. In the neighborhood of \$50,000 in prize money is now available as an incentive to stockmen to attend the show and exhibit their stock at the Exposition, but this, according to Mr. Wisdom, is not responsible for the very unusual interest which breeders and dealers all over the United States have taken in it. The big dealers are going to exhibit at Portland because they believe that the stock business in the Pacific Northwest has a great future, and that no better opportunity than the Lewis and Clark Exposition could be found for introducing their breeds to the western market. Several firms are making arrangements to open branch houses in the Pacific Northwest, and already one, McLoughlin Brothers of Kansas City, Mo., and Columbia, O., has decided to establish a branch in Portland.

McLoughlin Brothers have written Mr. Wisdom that the showing of horses which they will make will be the finest ever made by any firm anywhere. They have purchased fifty head of French Percherons and Coach horses from the continental prize-winners, and these are now en route. These horses have never been exhibited before. They will be exhibited at the International Stock Show in Chicago and the American Royal Stock Show at Kansas City before being brought on to Portland. J. Crouch & Sons of Lafayette, Ind., will enter fifty horses to compete with those of McLoughlin Brothers.

Galbreth Brothers of Janesville, Wis., have on the way an importation of thirty head of Clydesdale and Suffolk Punch horses, never before exhibited, and A. C. Ruby & Co. of Pendleton, Or., have imported a lot for exhibition at the fair. Luke M. Emerson of Bowling Green, Mo., who is the biggest breeder of fine jacks in the world, will bring thirty big jacks to Portland. Included in this number are two which stand seventeen hands high and weigh more than a ton each.

Fine Cattle Coming.

W. S. Skinner, superintendent of the National Live Stock Show in Chicago, is getting together a trainload of Shorthorns, Herefords, Pole Angus and Gallo-way breeds for exhibition at the fair. The cattle will be shown at the Minnesota Fair, held at Hamline, and will stop en route for short visits at such points as Helena, Mont., and Spokane, Wash. The State of Missouri has appropriated \$5000 for special premiums to be awarded the Missouri stock making the best showing at the fair, and other influences assure the success of this department.

Of the Shorthorn stock exhibitors, several are from the West. These include Howell W. Peele of Spokane, whose herd won on the North Pacific circuit last year; Jay Greaves of the same place, who will show two herds; W. O. Miner of Heppner, Or., and Charles E. Ladd of Portland, whose herd won first prize at the St. Louis show last year. J. H. Glide & Son of Sacramento, who bought the famous Ohio herd of D. R. Hannah, will exhibit two herds, and Rush & Pierce of Suisun, Cal., have entered a herd purchased in the East. E. D. Mitchell of Clinton, Mo., owner of the famous Tebo herd, with Choice Good at the head, also has applied for stall room. E. W. Bowen of Delphi, Ind., has entered seven head which includes Fair Queen, the champion of all fairs.

Some Oregon Exhibitors.

Of the owners of dairy breeds, W. D. Ladd of Portland, owner of the Hazel Fern herd, will be an important contestant. Mr. Ladd's Loretta D. took first prize in the dairy class at St. Louis. Other Oregon exhibitors of Jerseys who are entered are D. H. Looney of Jefferson, Harry West of Scappoose, Atkinson Bros. of Newberg, and E. C. Martin of Elgin. General William R. Shafter of San Francisco has also entered his Jerseys.

Charles E. Pierce of Stockton, Cal., who owns by far the finest herd of Holsteins in the world, will show forty head which he has imported direct from Holland. R. M. Hotelling of San Francisco also has entered two herds of Holsteins, and P. A. Frakes of Scappoose is fitting up two herds. J. L. Smith of the Hazel wood Company, Spokane, Wash., will exhibit two herds from the seventy head of cattle which he

imported from the East for show purposes. Mrs. William D. Honeyman will exhibit her Kelbin Grove herd of Ayrshires, one of the finest in America. Canadian stockmen have taken a lively interest in the stock show of the Lewis and Clark Exposition and both beef and dairy breeds from various Canadian points will be represented.

The American Goat Association, which for several years has held its exhibitions in Kansas City, will hold the first goat show ever conducted in the West, and prospects are that it will be superior in every way to former exhibitions at the American Royal Show in Kansas City. Eastern sheepraisers are expected to enter for prizes, and several prominent Western owners already have listed their stock. Among the latter are the Baldwin Sheep & Land Company of Hay Creek, Or.; R. A. Jackson, Dayton, Wash.; John B. Stump and J. H. Hawley, Monmouth, Or.; Richard Scott, Milwaukie, Or.; Charles E. Ladd, North Yamhill, Or., and Thomas W. Brunk of Salem, Or.

THE E. C. PEART SALE.

The following account of the auction sale last week of horses owned by E. C. Peart of Colusa is from the Herald of that city:

E. C. Peart's stock sale on Wednesday was not a success from a financial point of view. Only three of the blooded animals were sold, and they brought ridiculously low prices.

Diawood, the famous pacing stallion, with a record of 2:11, was started at \$500, but there was no raise and he was not sold.

Electro, a two-year-old stallion, and Buster Brown, a three-year-old gelding were started at \$400 and \$300 respectively, but there was no raise and they were not sold.

Dialto, a two-year-old filly, was sold to C. A. Averdson for \$100, but after the sale Mr. Peart bought her back for \$110, Averdson making \$10 on the transaction.

Chief, a bay two-year-old gelding, was started at \$150, but as there was no raise, he was not sold.

Trilby, a sorrel three-year-old mare, was sold to D. B. George, of Grimes, for \$135, and Sutterett, a bay yearling gelding, was sold to George L. Saunders, of Grand Island for \$77.50.

Fuchu, a chestnut mare, bred in old Kentucky, was sold to C. E. King, of Venado, for \$95 and bought back by Mr. Peart for \$110, leaving Mr. King \$15 to the good.

W. R. Merrill bought White Stocking for \$100 and sold her back to Mr. Peart for \$105. Mr. Merrill also bought a sucking colt and sold it back at a premium.

E. A. Williams, of Colusa, bought a sucking colt for \$32, and W. Jeffrey bought a high wheel suiky for \$16.

GRAND CIRCUIT RACING.

The excellent mile track at Hudson River Driving Park, Poughkeepsie, has been the scene of Grand Circuit racing this week, the Poughkeepsie association taking the date made vacant by Empire Track at New York dropping out. The three heat plan was adopted here, and the racing of the first day was very satisfactory.

The track trotting record in a race of 2:16¼, which was held by Little Dick, was beaten in the first heat of the 2:10 trot by Kid Shay, who made the mile in 2:09¼. The two succeeding heats in this event were taken by Kid Shay in 2:10¼ and 2:09½. These make the three fastest heats in a race ever trotted here. Helen Norte was second in the first two heats of this race, showing much improvement in form over her earlier starts this season and a record below 2:10 is expected for her later.

The 2:10 trot went to the bay mare Deleree in straight heats, the first of which was in 2:09½, giving the stallion Del March his first 2:10 trotter.

Allerson was picked by the talent to win the 2:08 pace, but after taking the first heat by beating Miss Willamont by half a head after an inspiring struggle for 300 yards down to the wire, finishing the mile in 2:06, he was unable to repeat the performance. Two succeeding heats were won by Ethel Mc in slower time, after a whirlwind finish. Henry Helman managed to land Oregon Maid second in the second heat, thereby getting a share of the money, and the California bred pacer Irish 2:08¼ by Monterey, also won a small slice by finishing third in the last heat. The summaries:

Trotting, 2:12 class, purse \$1000.

Kid Shay, b. g. by Nitrogen.....(Rossmire)	1	1	1
Helen Norte, b. m.(Rutherford)	2	2	6
Turley, br. g.(Geers)	6	5	2
Miss Gay, b. m.(McDonald)	3	3	4
Morn, ch. g.(Brinkerhoff)	4	4	3
Major Geer, ch. g.(McCarthy)	5	6	5
Lady Gail Hamilton, blk. m.(Howell)	d		
Time—2:09¼, 2:10¼, 2:09½.			

Trotting, 2:21 class, purse \$1000.

Deleree, b. m. by Del March.....(Loney)	1	1	1
Leonardo, r. g.(Dickerson)	4	2	2
Boreazelle, br. s.(Demarest)	2	3	3
Lee Wickliffe, b. g.(Nichols)	3	5	4
Edna O., b. m.(Wilson)	5	4	5
Sister Collette, b. m.(Walters)	d		
Time—2:09½, 2:12, 2:11¼.			

Pacing, 2:08 class, purse \$1000.

Ethel Mc., ch. m. by Jersey Wilkes (McCarthy)	5	1	1
Allerson, g. s.(Brady)	1	3	2
Oregon Maid, br. m.(Helman)	6	2	5
Maud Keswick, b. m.(James)	3	4	4
Edwin C., b. g.(Laird)	4	5	6
Irish, ch. s.(Thomas)	7	6	3
Miss Willamont, b. m.(Snow)	2	d	
Bald Hornet, ch. g.(Jolly)	d		
Time—2:06, 2:07¼, 2:08¼.			

Rain prevented racing at Poughkeepsie on Tuesday and Wednesday, and further report of the meeting will necessarily go over to our next week's issue.

OTHER PEOPLE'S OPINIONS.

Western Horseman: The trotting horse business of the United States is certainly of some importance, with more than fifty million dollars invested, and thousands of the best men in the country interested. The business is on a "safe and sane" basis, and there is every reason to believe that it will continue to prosper and grow. The men connected with the industry are the men who "do things," not only in the horse business, but in all lines of human endeavor. The business is a clean and respectable one, and is conducted along decent and honorable lines, and it should receive fair treatment at the hands of both the state and national governments. If the mayor of any city or the governor of any state would attempt to belittle any manufacturing or business industry, and besmirch the good name and character of the men engaged in these industries, the men engaged in those particular industries would rebel and refuse to support the official so offending. The public would applaud such action and regard it as justifiable and right.

Through ignorance or prejudice, it is hard to tell which, there has grown up a feeling among a certain class that horse racing is a very evil thing, and that the men engaged in it are of bad character. The Western Horseman has grown tired of answering these attacks. They are so uncalled for, untruthful and malicious that they fall flat of their own weight. The trotting horsemen of this country need no defense, in so far as their moral character is concerned. If the names of the men engaged in the trotting horse business in the United States were published the so-called reformers would, no doubt, be amazed to learn the class of men they have been habitually abusing and misrepresenting. We do not all think and believe alike, and half the pleasure of living would be taken away if we did, but no one class of people will ever be allowed to force their opinion on all of the others. One of the most sacred of all human rights is the right to our individual opinions, but we have no right to denounce and persecute our fellows because they differ in opinion with us. Many thousands of good citizens believe that they have a right to race horses and bet on them, too, and if by racing horses and wagering money on them they do not scandalize the community or interfere with the rights of their neighbors, they should be allowed to do so. There are certain religious bodies who practice certain rites and preach certain doctrines that we do not believe in, but that is no reason why we should interfere or attempt to stop them. No man has a right to stand his neighbor up in a corner and ram his particular ideas regarding politics, temperance, religion or any other thing down his throat. Yet that is just exactly what a lot of people are trying to do with the trotting horse people, and when they object to the dose they are told that it is the law, and they must submit.

The trotting horsemen of this country are law-abiding citizens, and will abide by the law always, but if the laws are unjust and unreasonable they must and will demand their repeal. Nothing will bring about the repeal of unjust and bad laws quicker than an attempt to enforce them. There are a lot of public officials who seem to think that to be good officials they must pose as sort of police officials. They spend all of their time spying around trying to catch some poor devil taking a drink after midnight or fishing on Sunday. This kind of officials class the racing of trotters as a great evil, and will listen only to one side of the question.

What is needed in this country is officials big enough and broad enough to investigate the trotting horse business in all of its branches; officials who will not condemn the trotting horse and the men who are racing him on the testimony of people who are blinded by prejudice and ignorant of the aims and objects of the trotting horsemen; officials who are liberal-minded enough to see that all of the decency and morality in the world is not centered in the pulpit; officials fair-minded enough to know that there are good men in the pulpit, on the race track, in fact, in all walks of life. With this class of officials in office the trotting horse people will have nothing to fear, and when the books are balanced the horsemen will be able to show as clean a page as the men in any other walk of life. Trotting horse people only ask for a square deal at the hands of public officials, and some day they will demand it. Trotting horsemen do not ask for special privileges; they only ask that they be not condemned on the testimony of fanatics and prejudiced persons. The aim and object of the trotting horse people has been to elevate the sport of racing horses and provide entertainment clean and wholesome enough to attract and please the best class of people in each community.

W. L. Duntley in American Horse Breeder. That arch enemy of honest government, "petty politics," blighted the enthusiasm of grand circuit horsemen and local habitues on Monday, when Mayor Tom Johnson issued his now nationally known edict against pool selling at the Glenville track. The political aspects of the situation have been so freely discussed in the press, that the matter has worn itself out, and long ere this is read the Phenix-like horsemen are battling for supremacy on another race course.

There is one phase of the action of the Cleveland Driving Park Company, however, which has not been presented and that is the situation from the view point of the owner and trainer. When the Cleveland management declared the meeting off, it was publicly announced that they did not feel like incurring the

necessary loss incidental to a meeting devoid of speculation. Admitting for sake of argument that they would have lost as they estimated, \$7500, is not the total loss to owners and trainers, aggregating some \$50,000, to be considered? Is not the good-will of horsemen and the confidence in an association to fulfil its contracts an asset of value?

No association has the moral right, nor the legal right, to break its contracts and screen itself behind the plea of unfortunate and untimely police interference. When an owner or trainer enters a horse to compete, he enters him to race and the compact entered into between horsemen and track managers does not recognize the possibility or impossibility of pool selling. One of the most clever and widely known track managers in America, in conversation with me to-day said that, being on the ground, and having estimated the cost of the Cleveland meeting, exclusive of track work and the salary of the secretary, he could not see wherein the meeting could not have been given without incurring a loss of more than \$1000.

The classes were large, privileges well disposed of and local interest in the light-harness racing at its highest pitch, after an interim of a year. But there are so many "wheels within wheels" here in Ohio that one is bewildered in the political "maze." It is said on fairly good authority that a pretty play of politics was averted only by Mayor Johnson's action, for had he allowed the pool selling, Governor Herrick, who allows gambling at seventy-seven other tracks in Ohio, would have removed Mayor Johnson under a statutory law which vests the power of removal in the governor in case of neglect of duty. That, as a sample of inconsistent and debased politics, would sicken one of the whole matter.

Trotter and Pacer: There is only one chance for an argument as to the decision of the judges at Saugus who sent a horse to the stable last week on account of fouling another horse, and that is upon the question of the driver's guilt or innocence. If it is clear that the driver was culpable he was not too severely penalized, and if it can be shown that his offense was intentional, he did not receive one-half what he deserved. There is nothing in the whole scale of turf misdemeanors, from "ringing" to laying up heats, that is so detestable as foul driving. There are not many drivers, we are glad to believe, who will resort to the practice purposely or vindictively, but there is a large class who are so money crazy—so madly imbued with the idea, apparently, that their very existence depends upon the heat they are trying to win—that they scruple at nothing to get ahead, even to the point of running over anybody who is in front of them. Many a driver has sacrificed his life or has endured long and painful confinement at the hands of these reckless hotheads, and no penalty that will stop them can be said to be too severe. There are some well-known drivers who are incorrigible in this respect, for whom a few years' suspension might be salutary, as well as a wise precaution for the safety of those who are compelled to drive against them.

Harness Gazette: Within the past 30 days some information has been received going to show that the carriage industry is enjoying its full quota of prosperity. The manufacturers are preparing to show their new designs during the autumn exhibits. They have been stimulated by liberal sales to develop new features of attraction and novelties in construction which the users of carriages are constantly calling for. The trend in the carriage industry now is in the direction of building lighter work though none the less durable and serviceable. The time has largely gone by for the old style heavy carriages though there is a certain reviving demand for coaches of the tally-ho order. At the same time the drift is in the direction of light, cheap, attractive and slightly vehicles which can be sold at a price within the reach of the average buyer. The carriage plants of the country have been pretty busily employed during the past season, and notwithstanding there have been advances in most materials out of which vehicles are made, there has been no apparent reduction in the volume of business. This is saying a good deal considering the extraordinary inroads that have been made by the automobile. The reason for the slight damage done is that many of those who use automobiles also use carriages. Another reason is that the cheapness of light carriages has broadened the demand for them. The evidence of this is seen in the expansion of capacity of many of the larger carriage building plants. The opening up of so much new territory by reason of railroad construction is stimulating agriculture and inducing the building up of towns and villages in countries which have heretofore offered very little if any attraction. All these things point to a healthy growth not only in the carriage industry but in many lines which find vitality in the stream of wealth produced by agriculture. The industry is expanding into the westward and southward but the encouragement is not very strong because of the facilities afforded to eastern manufacturers to ship carloads and trainloads of vehicles at a comparatively low cost into all sections.

Ed Geers in his book relates the following about Ella Brown, dam of this year's Chamber of Commerce winner, Walter Direct: "I once had a very remarkable incident in horse training occur. A gentleman by the name of Brown, living near Lynnville, Tenn., owned the bay mare Ella Brown. About the 1st of March, 1890, he sent her to me to be trained. She had the reputation of being quite speedy and much was expected of her. I worked faithfully with her from the time she was first brought to me until about the first of June, and the best I could do with her was to drive her a mile in about 2:45. As that was not fast enough to compete with horses she

would have to meet, I wrote Mr. Brown that I did not think she had speed enough to make a first-class race horse, and I would not advise him to spend any more money on her, and that he had better come and take her home, and if he would let me know when he would come I would save her and work her in his presence. He notified me of the time he would call and at the appointed time he came, and I had her hitched up, shod and harnessed in exactly the same way she had always been during the several months I had been training her. After warming her up I commenced to show her speed to Mr. Brown. She seemed to take in the situation at once and instead of pacing along at a 2:45 gait, as she had always done before, she just let herself out and paced a quarter at a 2:20 gait; and when she showed this burst of speed I was so astonished that I nearly fell out of the sulky, and Mr. Brown returned home without her. I am not much of a believer in telepathy, but it has always seemed to me that in some way she knew that if she did not make a satisfactory showing that morning she would probably spend her life working on the farm instead of in the glamor of the race track. She kept improving and finally took a record of 2:11½, and was a successful race mare."

Western Horseman: Let not our esteemed contemporary, The American Sportsman, grow too indignant over the action of Mayor Tom Johnson. It is well to bear in mind that Mayor Tom is not the only Cleveland man to make a "show" of himself. Several days before the opening of the Cleveland meeting the president of the Cleveland association came out with a long interview in a leading Cleveland daily publicly gloating over the fact, as he claimed, that Mayor Johnson had pledged himself to violate his oath of office, set aside the law and see that pool selling ad libitum should be permitted at the Cleveland meeting. What was this but ruthlessly putting the mayor in the "hole?" Without this public announcement the mayor could have kept quiet, been "busy with other matters" and overlooked the law violation. But under these circumstances what could any self-respecting man do but dig out of the "hole" in which he had been openly and publicly placed? Good or bad, law is law, and public officials are sworn to enforce the law, and, to say the least, it is in bad taste to parade before the public the fact that law is not only going to be violated, but that the public official charged with law enforcement in the particular case has pledged himself to see that violation is permitted. However much trotting horsemen believe in pool selling at trotting meetings, it is just as well, and a great deal better, that they be not offensively bold in their declarations and actions. No man, be he a trotting horseman even, or an officer in a trotting association, should fail to be considerate of the feelings and position of others.

Breeders' Gazette: Owing to the refusal of the authorities to permit poolselling and bookmaking at the Glenville track the Cleveland Grand Circuit meeting was declared off. It seems to have been a sort of eleventh hour declaration on the part of the municipal officials and the natural consequence was that much loss, annoyance and genuine destruction of confidence ensued. It stands to reason that the men who have made the Cleveland association what it is today fully understand their business, and if they had not been given some sort of assurances that the speculation would be allowed they would not have gone to the trouble and expense of opening stakes and purses and getting ready to hold the meeting. With a Grand Circuit gathering of the first class this cannot be done short of several thousand dollars, which in the event of the meet not being held is so much dead loss. At the same time it is strange that such wise heads as those on the shoulders of the men who manage the Glenville race track should have determined to take chances in face of the knowledge that a strong element desired the stopping of the betting, indeed of the entire meeting itself for that matter. It is most unfortunate that Cleveland should have to go without its Grand Circuit meeting year after year, but so long as the law is as it is in Ohio there seems no help for it, and it would perhaps be better for all hands if no further attempt would be made to evade that law. The best way to obtain the repeal or amendment of an obnoxious law is to see to its strict enforcement, and if the people of the Buckeye State find it to be so they have the remedy in their own hands. Nothing can ever be done by conspiring with municipal officials to infringe the law.

George Spear offered Harry Stinson, trainer and driver of Sadie Mac, 2:06½, winner of the 2:12 trot at Detroit, \$30,000 for the fast daughter of Peter the Great at Detroit last week which offer was promptly refused. While Spear would not say for whom he was acting, it is almost certain that he was acting for E. E. Smathers, former owner of the mare. The important news feature in connection with this offer is that it would indicate that Mr. Smathers intends to return to the sport of light harness racing, he having a few days since announced that he would retire from the running turf and that his entire stable of runners would be sold at New York at an early date. Mr. Spear also, presumably for the same party, offered \$8,000 for the pony pacer Bonanza, that finished second to Walter Direct in the Chamber of Commerce and was timed separately in 2:06, this offer also being refused.

The well known Ohio trotting stallion Green Wilson 2:14¼ has been sold for export to Russia, where he will be mated with Orloff mares. He was bought on his conformation rather than his breeding. He is by Eugene Wilson 5293 (a son of Louis Napoleon 207 out of a mare by Indianapolis 207) and his dam is Flora Greenbacks 2:24¼ by Greenbacks 2480.

NOTES AND NEWS.

State Fair races will come next.

Santa Rosa meeting closes to-day.

The fair will open Saturday, September 2d.

Secretary Al Lindley is putting in lots of hard work for the success of the State Fair this year.

Two harness and three running races each day will be the program for the State Fair this year.

Anteros, son of Electioneer and Columbine, is now owned by Rev. J. W. Keefer of Astoria, Illinois.

Here is speed in a straight line: Director 2:17, Direct 2:05½, Direct Hal 2:04¼, Walter Direct 2:05¾.

The Inter-City matinee and race for the Gold Challenge Cup will be held at the Washington Park track, Chicago.

The Sweet Marie-Tiverton race at Readville on August 3 stands as a world's record for three heats, averaging 2:05 2-3.

The lid was off at Santa Rosa during the night of the opening day of the Breeders' Meeting, but the officials put it on again and sat on it.

Ben Chaboya won third money with Rey del Diablo in a race at Dover, New Hampshire, August 11th. The time was 2:11 or better each heat.

The Nutwood Wilkes pacer, Mixer, owned by George Alego of Oakland, worked a mile in 2:15 at the Alameda track one day last week, driven by his owner.

It is said Admiral Dewey 2:09¼ is the first 2:10 trotter whose sire and dam were both 2:10 trotters. Bingen 2:06¼ and Nancy Hanks 2:04 are his parents.

Work on the new speed track in Golden Gate Park is progressing very well, and the oval is beginning to assume shape. Progress seems slow but the work is stupendous.

A pair of nicely matched pacers that can step together in 2:46 is offered for sale by Mr. E. G. Pierce, manager of the Nevada Stables, Market street. See advertisement.

It was reported in one of the San Jose papers last week that Highfly, the speedy three-year-old pacer by Nearest 2:22 was driven a half mile in 1:00½ at the San Jose track.

Seven colts and fillies have been paid up on in the Harness Stallion Stake for three-year-olds to be decided at the State Fair this year. Five are trotters and two pacers.

Four days of racing will be held at the Hollister track, commencing September 27th. Twelve hundred dollars in purses will be distributed among the trotters and pacers.

Nine colts and fillies have had starting payments made on them in the Occident Stake. The stake is worth \$3880 this year, of which 60 per cent, or \$2328, will go to the winner.

Don't forget that the third payment of \$5 each on foals of 1905 entered in the Breeders' Futurity No. 5, must be paid on or before September 1st. This stake has a guaranteed value of \$7000.

The free-for-all pace at the State Fair failed to fill. The directors have tried again and now offer \$600 for a 2:08 pace. Entries will close September 1st, the day before the fair opens.

Don't ever think because Adam G. was beaten the other day that he is not a stayer. He is as game as the gamest, but like Sweet Marie when she met Tiverton at Buffalo, he had a lot of bad luck.

W. H. Lumsden's three-year-old filly Bonalet by Bonnie Direct 2:05¼, dam Roblet 2:12 by Robin, paced a mile in 2:11¼ at the Cleveland track week before last, driven by her trainer Ed Benyon.

George G. trotted a great race when he finished second to Tiverton and beat Sweet Marie in two heats of the free-for-all at Buffalo. About 2:04 will be opposite his name by the close of the season.

Walter Direct 2:05¾ is on the retired list for a while owing to an injury to one of his hind legs received while he was in his stall. Mr. Geers thinks he will be all right with a few weeks' rest.

This journal is constantly in receipt of inquiries in regard to companies that insure horses. There are, we believe, companies in the Eastern States that are engaged in this business, but none here that we know of.

Perennial Dan Patch is in good shape as usual and will soon be showing his speed at the county fairs. He worked a mile in 2:04 the other day, and will start to lower his record at the big Hamline fair, September 4th.

One of the timers used in the stand when Robert Lee broke the track record at Kalamazoo, on Wednesday, was used when Flora Temple broke the world's record forty-six years ago, on the same track.

Some of the trainers and owners who have horses entered in the races for the last day of the State Fair are wishing they were twins so they could be in two places at once. The Britt-Nelson fight comes off at Colma on that day.

September 4th is Labor Day and the San Francisco Driving Club will hold a day's racing at Ingleside that day. Both harness and running events will be on the program with purses consisting of entrance money at \$10 each with \$100 added.

Another McKinney in the 2:20 list. At the matinee of the Syracuse Driving Club, held August 4th, Electro Mack, sold to eastern parties last winter by Mr. Byron Erkenbrecher of Los Angeles, won his race in two straight heats, the time being 2:23 and 2:17½ in the last heat.

There will be no regular racing program at the California State Fair on Monday, September 4th, but the day will be turned over to Indian pony races and broncho busting at the track. About 300 Piutes and Shoshones from Nevada are expected to take part in the show.

Golden Gate, William Brown's Bay Bird gelding, paces in hoppers, but trots without them. His record this year at the trotting gait is 2:25 and at the pacing gait is 2:13¼. He is probably the only horse that was ever entered in both pacing and trotting events the same year.

Quite a number of the horses at Santa Rosa took severe colds on arriving at the track owing to the sudden change from the hot climate of the San Joaquin valley to the cool weather of the Sonoma valley. Small fields have been the result in many of the races this week.

Between rain and the blue laws, the promoters of harness racing are having a hard time over East. The difference between track managers there and in California is that the Easterners want to give race meetings and can't while out here they can give them but will not.

Adam G.'s record is now 2:11¼, and he is headed for the 2:10 list. If all the trotters by McKinney that have the ability to trot in 2:10 were sent for a record this year, that stallion would have a lead as a sire of 2:10 trotters that no other stallion could catch up with in years.

Perhaps those turf writers who have been preaching the religion of short races have had their arguments listened to by the officials of Ohio and Massachusetts. At any rate the races have been mighty short in those States this season, and the grass is also very short there for harness horses.

Mr. C. K. G. Billings will sell every horse in his training stable now except Hontas Crook 2:07½, Major Delmar and Lou Dillon. The pacing stallion Hontas Crook 2:07½ goes down in the country where he will be used in the stud. Mr. Billings is very much attached to Hontas Crook and will perhaps never part with him.

The first trotter to cover a mile in 2:16 was Joe Elliott, and he was owned at the time by Robert Bonner. The time was made on Mystic Park track and Jock Bowen drove the horse. When Bowen dismounted Mr. Bonner placed a \$500 bill in his hand. Trainers nowadays would consider the millenium had arrived were they to get half of \$500 for driving a horse in 2:16.

The Jester, son of Stam B., is starting at meetings through Iowa and Michigan, and while he has not been able to win first money there, has trotted some good races. At Grand Rapids, August 11th, he was a good third every heat in the 2:35 class trot, which was won by Allie V., a daughter of Directum in 2:15½, 2:16 and 2:16¼.

Nearly every day an owner makes the statement while trying to sell a horse that the animal actually won a heat in certain time but the timers at his request hung out a few seconds slower to keep the horse in a certain class. And in nine cases out of ten the sale is not made because the owner's statement is not believed, but would have been made if the horse had the record.

Jacob Brolihar, who drives the two-year-old pacer Rockaway 2:15¼, has written to the Western Horseman that although the distance is great he believes the owner of the colt will send him to Indiana to meet the John R. Gentry filly in that proposed match race, providing the stake money is raised to \$5000 a side. Mr. Rouse, owner of the filly, has wired the editor of the Western Horseman that his \$5000 is ready. It is now "up to Jacob."

Max Berlin of Livermore last week purchased from Thomas Davin, California representative of the Willemoor Stock Farm of Illinois, the imported German coach stallion Willy, and the imported Belgian stallion Bernum de Leindette. It is the general opinion of all horsemen who have seen these stallions that they are as good as any ever brought to this State, and the horse interests of Livermore Valley will certainly be benefited by Mr. Berlin's purchase.

The Fasig-Tipton Company, New York, has announced dates for its 1905-1906 season of great trotting horse sales, as follows: The Old Glory, Madison Square Garden, New York, Nov. 20 to Dec. 1; the Midwinter Auction, Madison Square Garden, Jan. 30 to Feb. 2; the Blue Ribbon Sale, Cleveland, O., in May—exact dates given later; the Down East Auction, Boston, Mass., in May—exact dates later.

Chicago will have some real trotting races in the near future. Washington Park will, on August 31 and September 1, be the scene of the greatest harness matinee ever held in that city. Fred G. Hartwell, secretary of the Gentlemen's Driving Club, has received word from Harry Devereux of the Gentlemen's Driving Club of Cleveland that it had been voted to transfer the "Cup Day" matinee to Chicago.

The mare Directum Lass that took a trotting record of 2:09¾ at Readville recently is by Directum 2:05¼ and is his third 2:10 performer. She is out of the made Madera by Dexter Prince that Sam Gamble took to the Fasig Tipton sale in New York in December, 1898, for Harry E. Wise of this city. Mr. Wise catalogued Madera as by Dexter Prince, dam by Peerless, a son of Gen. Knox 140, and with a bar of 2:18¼, which she got by winning a match race over the Petaluma track.

If all the horses entered in the free-for-all trot at the State Fair should start, it will prove one of the greatest races of the California circuit this year. Those entered are Charlie T. 2:14¼, What Is It 2:14¼, Llege 2:12½, Princess 2:14, Dr. Hammond 2:12¾, Petigru 2:10½, Pat Rose 2:12¼, H. D. B. 2:13, and Adam G. 2:14¼. This field of trotters is a high class one, and there are several of them that 2:10 will not stop even though three heats should be trotted that fast. Such a field of horses at the State Fair twenty years ago would have caused pools to be sold like hot cakes at \$250 for choice.

North Star 2:24, whose record was made last year when he won the first heat of the two-year-old trotting division of the Breeders' Futurity at San Jose, will be a starter in the three-year-old division which will be decided today at Santa Rosa. North Star worked a heat in 2:15 last week over the Santa Rosa track, and came back the next one in 2:13½, so he must be reckoned with in today's race, even though Ambush 2:14¼, Bellemont, Athasham and several other good ones are in the race. North Star is by Nutwood Wilkes 2:16½, his dam is by Eugeneer 20,450, and his grandam produced Dictatress 2:08¾ and several other fast ones. He is owned by Mr. J. B. Iverson of Salinas.

To modest John Howell, trainer and driver of Tiverton, is due the credit of making the great gelding what he is, says an Eastern exchange. Mr. A. D. Gwathmay, his present owner, bought Tiverton five years ago for a pole mate to another horse that he had. That season he allowed Charley Thompson to start him in a couple of races at Empire track, and in one he got third money, and in the other he finished behind the money. He got a record of 2:23¼ in the only other race in which he started that season. He got to carrying his head around to one side and acting altogether so badly that it looked at one time as though he would be a hopeless case. Howell took him in hand, invented the rig that he now carries on his head, got him hung up right, with the result that everybody can now see. Howell is a very modest, unpretentious, most likable fellow, and he is withal a hard worker and conscientious. While, of course, he idolizes his gelding, he has nothing but words of praise for Sweet Marie, and freely accords her the first place among great trotters. Though chagrined at the defeat of his gelding, he was the first to congratulate McDonald on his victory.

NEVADA COUNTY HORSE NEWS.

Nevada county was poorly off for a good trotting stallion this year, there not being one within its boundaries with a record. Although one man represented his horse as having a record of 2:14½, I proved by your valuable paper that he had no record at all.

H. J. Wright has in my stable a three-year-old stallion, a son of McNeer out of the dam of Lochniv 2:20, that is large and very handsome.

Thomas Mulcahy owns a two-year-old stallion by Billups 2:20½ out of a Wilkes mare that stands 153 and is almost the counterpart of his good sire.

Dr. Bowman is the owner of a two-year-old stallion by Diablo out of an inbred Wilkes mare, that is also in my stable. This colt is now 152 and a fine looker.

Our genial County Clerk has a Billups three-year-old filly that can trot a 2:30 shot and is almost untrained at that.

John Irving owns a three-year-old filly by Billups out of Inez 2:33 by Sable Wilkes that trots very fast for the few times driven on the track.

Atherton Lord has a Billups three-year-old that can fairly fly at the squarrest of trots.

So you see we have quite a number of promising youngsters up here.

Are there any more sons of Electioneer in California at the present time than Alta Vela 2:11¼, Azmoor 2:20 and Mendocino 2:19½? If so, please name them.

PHILIP C. BYRNE.

[We are not able to give the information desired by Mr. Byrne. Will our readers who know of any Electioneer stallions in California please notify us, that we may print the list? There are several that we know of, but we would like to make the list complete.—Ed.]

BREEDERS MEETING BIG SUCCESS.

Large Attendance and Fast Racing---Mona Wilkes Takes Three-Year-Old Record of 2:11 1-2.

The famous Santa Rosa Stock Farm track was never in better shape nor presented a neater appearance than it did one Wednesday of this week when the first race of the Pacific Coast Trotting Horse Breeders' Association's annual fall meeting was called. The grand stand was filled, there were several hundred vehicles lined up along the rail on the inside track, and the lawn in front of the stand contained nearly every trotting enthusiast in the State, and some from all points on the Coast from Victoria to San Diego. The weather was ideal—just warm enough for fast time, but not too warm for the comfort of those who were in the shade. All the arrangements were complete in every detail when the opening race was called.

In the judges' stand, Col. J. C. Kirkpatrick and Mr. Frank H. Burke of San Francisco, and Mr. Robert Brown of Petaluma, all directors of the association, were seated. Ed R. Smith of Los Angeles occupied the starter's box and Geo. B. Kelley of San Francisco attended to the many duties devolving upon the clerk of the course. The timers were Messrs. John A. McKerron, Chas. A. Durfee and A. J. Molera.

When the first race was called but four of the original seventeen trotters entered came out for the word. The purse was \$800, divided into four moneys, and was for the 2:27 class. Adam G., Willard Zibbell's fast McKinney trotter that won so impressively at Los Angeles in his only previous start this year, was installed the favorite at \$10, with the Zombro gelding Charlie T., Wildbell, a son of Wildnut, and Oro Belmont by Oro Wilkes, in the field at \$9. Schwartz & Chase sold quite a number of pools at these figures, and the sympathies of the crowd were with the favorite as he was owned by the unfortunate young man who was recently so terribly maimed in the railroad accident at Fresno. Adam G. was driven by J. W. Zibbell, father of Willard; Charlie T. was piloted by Al McDonald, one of the coolest drivers and best finishers on the circuit; "Prof." Freeman held the reins over Wildbell, and Mammie Reams of Mamie R. fame was up behind Oro Belmont.

With but little scoring they were off to a good start, and Adam G. trotted like the great horse he undoubtedly is and won the heat in 2:11½, the fastest mile trotted on the Coast this year, and a reduction of his previous record by three full seconds. The announcement of the time was received with applause, and the crowd settled down to the belief that the race was to be decided in straight heats. Young Zibbell, with his devoted wife, viewed the race from a carriage in the infield.

In the second heat the favorite cast a shoe and tore off a quarter boot, making a bad break, and finishing last. The heat went to Charlie T. in 2:14½, Oro Belmont being second and Wildbell third. The fact that Adam G. had lost a heat made Charlie T. favorite in the pools as the talent knew McDonald's ability as a driver and felt that it would take two more heats faster than 2:14 to beat him.

When the word was given for the third heat Adam G. and Charlie T. made a dash for the lead and there was a very close race to the half, but here the McKinney gelding out-trotted McDonald's horse and won rather easily in 2:14½, with Wildbell in second position and Charlie T. third. There was considerable pool selling after this heat with favoritism alternating between the two heat winners.

In the fourth heat Zibbell took his horse to the front at the first turn with the other three close to him. Up the back stretch he kept in the lead, but when Charlie T. came at him at the far turn he broke, but his driver got him squared away again without losing very much ground, although Charlie T. had assumed the lead. In a rush to close the gap Zibbell allowed his horse to again break and as the leader swung into the stretch Adam G. was at least six lengths behind him. Zibbell gathered Adam for a final effort and knowing the horse's great speed let him "step to town." Foot by foot he gained on the leader and showed his rare gameness and determination. At the distance flag his head was at Charlie T.'s saddle and twenty yards further at his throat latch, but McDonald brought his whip into play and the Zombro gelding had another link to let out and he crossed the wire winner by a head amid great enthusiasm and cheers for both horses from the grand stand. The time was 2:14½ and Adam G. trotted the last quarter at a 2:06 gait. Again did their backers surround the pool box and backed the two horses at even money.

In the fifth heat Adam G. again made a break that cost him the heat and the race, Charlie T. winning in 2:16, Wildbell being second. It was a great race and even the owner, driver and all who had pools on the Zombro gelding would not have felt badly had Adam G. won as their sympathy was with his unfortunate young owner and former trainer, as well as with Zibbell senior, who tried very hard but found luck was against him on that day. Adam G. is a great trotter and will yet demonstrate this fact. Three heats in 2:10 or better are not beyond his reach when in condition and many who have seen him at work think a record of 2:05 is not too fast to expect from him in the future.

Charlie T. is a high class horse and has the racing instinct as well as extreme gameness. Wildbell and Oro Belmont both trotted good races but were a little outclassed by the two heat winners.

The Pacific Slope stake of \$1500 for 2:20 class pacers went to the Humboldt county mare Nellie R. owned by Joseph Long in straight heats, and had the time required of her to win been a couple of seconds

faster in each heat she would undoubtedly have raked in first money just the same. Earnout paced an excellent race and earned second money. Glen was not up to his Los Angeles form. Welladay, the Steinway mare owned by James Collin, paced a better race than was expected of her and won fourth money. Norda, Miss Winn and Mildred O. all caught the flag at different stages of the race.

There were but three starters in the 2:13 class pace and they paced four heats trying to beat one another without success and the finish went over until Thursday. The time ranged from 2:11 in the first heat to 2:21 in the fourth and in this heat Cresco Wilkes, winner of the first heat, was distanced. Friskarina had the second and third heat to her credit, and Vision won the fourth heat. These two will race it out for first money on Thursday. The summaries:

Trotting, 2:27 class, purse \$800.
 Charlie T., blk. g. by Zombro-Sarah Benton (McDonald) 2 1 3 1 1
 Adam G., b. g. by McKinney-Nona Y (Zibbell) 1 4 1 2 4
 Wildbell, br. g. by Wildnut-Bell Bird (Freeman) 3 3 2 3 2
 Oro Belmont, blk. g. by Oro Wilkes-Mus-covia (Reams) 1 2 4 4 3
 Time—2:11½, 2:14½, 2:14½, 2:14½, 2:16.

Pacing, Pacific Slope Stake, 2:20 class, purse \$1500.
 Nellie R., b. m. by Wayland W.-Topsy (Quinn) 1 1 1
 Earnout, b. h. by Lynmount (Stewart) 2 2 1
 Glen, ch. g. by Glenwood (Pounder) 3 5 2
 Welladay, br. m. by Steinway (Cuicello) 4 4 3
 Norda, b. m. by Mercury (Bonnell) 6 3 d
 Miss Winn, ch. m. by Demonio (W. Durfee) 5 d
 Mildred O., rn. m. by Secretary (Bunch) 7 d
 Time—2:13, 2:10½, 2:11.

Thursday, Second Day.

A large crowd was not expected on the second day of the Breeders' meeting, as small fields were the order in every race, but the grand stand filled up and the record for second day crowds was broken. While the fields were small the contests were close, the time very fast and split heats were the rule. Betting was very lively, reminding the regulars of old times.

The first event on the card was the finish of the 2:13 pace. As Friskarina had won two heats the previous day, and Vision but one, the bettors made the Bayswater Wilkes mare favorite, but Vision showed that he was a reality Thursday and took the two heats necessary to earn first money in 2:11½ and 2:14½.

There were but three starters in the 2:17 trot, the Direct gelding What Is It being favorite at \$20 against \$10 for Jupiter B. and Zambra in the field. Five heats were required to decide the winner, although Zambra was distanced in the first. McDonald and Will Durfee did some great teaming in the first heat, McDonald winning by a short head in 2:11, a new mark for What Is It. The race was a see-saw from this on, but the Los Angeles reinsman finally won the victory which was deservedly his.

The two year-old trotting division of the Breeders' Futurity was in great contrast to the same event last year, when eight high-class youngsters contested every foot of a four-heat race, with the time from 2:24 to 2:21½. There were but two starters Thursday and standard time was not required of Prince McKinney to win, although he could have trotted faster. This colt is owned by F. Gomet of San Francisco.

There were five three-year-olds in the pacing division of Futurity No. 2, and it was a horse race from start to finish. Fred Chadbourne won the race after five heats with the filly Mona Wilkes, owned by J. W. Marshall of Dixon. She took a record of 2:11½ in the first heat, paced the second in 2:13, and was beaten the third and fourth by Mamonio in 2:14½ and 2:17, but came back the last in 2:15½, showing her great gameness. She made a disastrous break in the third heat and had to be driven very hard to get inside the flag, and Reams, the driver of Mamonio, insisted that the judges should distance her for running. He made his protest so emphatic that he was fined \$50. Just it, a filly credited with a half in 1:00½ last week at San Jose, got third money in the race, and Roberta and Deviletta were distanced. Mona Wilkes is by Demonio 2:11½ and her dam is a daughter of Nutwood Wilkes. The summaries:

Pacing, 2:13 class, purse \$800.
 Vision, b. g. by Vanquish (Ward) 3 2 2 1 1 1
 Friskarina, br. m. by Bays Water Wilkes (Hoy) 2 1 1 2 2 2
 Cresco Wilkes, b. h. by Nutwood Wilkes (Albertson) 1 3 3 d
 Time—2:11, 2:13½, 2:15, 2:21, 2:11½, 2:11½.

Trotting, 2:17 class, purse \$800.
 Jupiter B., b. g. by General Beverly-Little Agnes (Durfee) 2 1 2 1 1
 What Is It, gr. g. by Direct (McDonald) 1 2 1 2 2
 Zambra, b. g. by McKinney (Ward) d
 Time—2:11, 2:12, 2:15, 2:15, 2:20.

Pacific Breeders' Futurity, trotting, two-year-olds, value \$1200.
 Prince McKinney, b. c. by McKinney-Zorella (McDonald) 1 1
 Della Derby, b. f. by Charles Derby (Whitehead) 2 2
 Time—2:40½, 2:33½.

Pacing, three-year-old division of the Breeders' Futurity, value \$1849.
 Mona Wilkes, b. f. by Demonio-Trix by Nutwood Wilkes (Chadbourne) 1 1 3 3 1
 Mamonio, b. f. by Demonio (Reams) 2 2 1 1 2
 Just It, b. f. by Nearest (Barstow) 3 3 2 2 3
 Roberta, b. f. by Robert I. (Albertson) d
 Deviletta, b. f. by Diablo (Wright) d
 Time—2:11½, 2:13, 2:14½, 2:17, 2:15½.

At Salt Lake City, July 20th, in a mixed race for trotters and pacers, for a purse of \$500, the gelding Dr. Frasse by Iran Alto won trotting the fastest heat of the race in 2:15. Osmont, the pacer by Altamont, was third in each heat. Later in the week Dr. Frasse started to beat the Salt Lake track record of 2:14 for trotters, but his time was 2:16½.

RAISING HORSES AMONG THE REDWOODS.

Breeder and Sportsman: It may be news to the outside world to know that we are raising standard bred colts back here in the redwoods. I recently sent down eight head of yearlings to be worked by W. Johnson at the Rohnerville track, who is trainer for Mr. H. Brace. The colts are all by Mr. Brace's stallion Greco, son of McKinney and out of the great brood mare Alien 2:26 by Anteco, second dam Lou Milton, the dam of Lou Dillon. Greco, I think, will prove a greater sire than the old horse. Mr. Johnson drove one of the colts, which was only put in harness three weeks ago, an eighth in 18 seconds. The colt I am referring to is only fourteen months old. We have a full brother to him on the ranch that is only three months old that will show as good as a forty gait now.

We have brood mares on the ranch in foal to Greco. They are the pick of Humboldt county. Among them are Belle King, the dam of Bolivar 2:08½, Daisy Hayward, the dam of Iora 2:11½, the pacing mare Ruby M. 2:12½ and several others that have already produced or have fast records.

We have four stallions. Greco, Ansel B., Quintellas and Buster the First. The mountain air and spring water, with the finest of pasture lands, make this an ideal place for maturing good colts.

J. H. HESTER.

[Mr. Hester was for eighteen years connected with the San Francisco Report newspaper, and while living here had several horses in training at Alameda track under care of James Hurd. Mr. Hester is now superintendent of Mr. H. Brace's stock ranch at Dyer-ville, Humboldt county, and resides there with his family. His many friends in San Francisco will be glad to hear he is so pleasantly and profitably located, and will look for him to come down "out of the woods" in a couple of years with a Futurity winner by Greco.—Ed.]

CLOSE OF BUFFALO MEETING.

Rain interfered with the racing on Friday at Buffalo, and the races were postponed until the following day. The track was slow from the rain of the previous day and fast time was not the rule. The results:

Trotting, 2:10 class, purse \$2000.
 Gray Gem, r. g. by Dan Court (McDonald) 1 1 1
 Mamie R., b. m. (DeRyder) 2 2 2
 Morosco, br. g. (Hollman) 3 3 3
 Time—2:20, 2:19½, 2:20½.

Pacing, 2:06 class, purse \$1000.
 Riley B., blk. g. by Happy Riley (Snow) 4 1 2
 Charley Hayt, b. s. (Lattimer) 5 2 1
 Winfield Stratton, b. h. (McGuire) 1 3 4
 Baron Grattan, b. g. (Geers) 2 4 3
 Ecstacy, b. m. (Lang) 3 5 5
 Time—2:09, 2:08, 2:09.

Trotting, 2:20 class, purse \$1000.
 Minter, b. m. by Expedition (DeRyder) 1 1 1
 Martha B., b. m. (W. Laird) 2 2 2
 Ora Wilkes Jr., b. s. (James) d
 Time—2:15½, 2:16, 2:22.

Pacing, 2:08 class, purse \$1000.
 Bolivar, b. g. by Wayland (DeRyder) 1 1 2
 Elmwood, br. g. (H. Snyder) 5 4 1
 Oregon Maid, br. m. (Hollman) 6 3 3
 Jubilee, blk. g. (McCan & Snow) 2 2 4
 Baron Rogers, br. g. (Valentine) 3 6 5
 Bald Hornet, s. g. (Jolly) 4 5 6
 Time—2:11, 2:11½, 2:10½.

Tiverton has three crosses to George Wilkes on his sire's side and three to Alexander's Abdallah on his dam's side, which, with two other crosses through other sources, make him eight times inbred to Rysdyk's Hambletonian. To Mambrino Chief he traces three times, through Mambrino Star 2:28½, Mambrino Patchen and Blandina; through his sire he also gets two Morgan crosses, to Daniel Lambert and to old Lady Franklin 2:29½, and he also carries the blood of Governor Sprague 2:20½; of Alexander Norman, through Swigert; of Alexander's Edwin Forest, through Abe Downing 2:20½, and of Goldust 150, where enters the Morgan element again.

A SPORTSMAN ON PHENOL SODIQUE.

"In my laboratory there always stands on the washstand a tumbler which generally contains a remedy which should be known to everyone and especially to sportsmen. I know that many owners of horses, dogs, cattle, sheep and poultry are averse without it. For more than twenty years I have seldom been without it an hour. In the family it is invaluable, and many a physician's bill has been saved by its use. My children have become so accustomed to it that when their winter romps develop a little soreness of the throat, a visit to the Phenol Sodique and a good gargle before retiring brings them around all right next morning. A cut, a burn, a bad scratch, a bite or sting of any venomous insect is instantly relieved and speedily cured by an application of Phenol. In fact, the Phenol bottle seems to be constantly in demand. Belong haemostatic, antiseptic and disinfectant it beats anything I ever came across for galls, ulcers and eruptions on horses and dogs. Are your dogs' ears raw and bleeding from fly bites? Pour a few drops of Phenol on them and as fly will light there, and they will rapidly heal. Diluted, it is an excellent disinfectant for the kennel and an excellent remedy for mange. Sportsmen who use Phenol will never be without it, as nothing is more soothing to a wounded or abraded surface. More than once when an attack of acute pharyngitis threatened to keep me from the field I have put a small bottle of Phenol in my pocket and, using it several times as a gargle during the day, have returned at night better than when I left in the morning. Try it, brother sportsman, and I am sure you will appreciate it as I do."—Dr. Edward P. Kremer, Lebaosa, Pa., in American Field.

RINGBONE CURED.

James C. Trainor, prominent blacksmith at St. John, N. B., writes as follows: "Enclosed please find one dollar for another bottle of Quila's Ointment. It is a wonderful remedy and will do all you claim for it. The last bottle I used on a ringbone and it did the work to perfection." This is the general verdict of leading horsemen all over the country. For curbs, splints, spavins, windpuffs and all bunches there is nothing better. Price one dollar per bottle. Satisfaction guaranteed. Address W. B. Eddy & Co., Whitehall, N. Y., if you cannot obtain from druggist.

Strike!—if they don't give you Jackson's Napa Soda when you ask for it.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

Coming Events.

Rod.

April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.
April 1-Sept. 15—Closed season for lobsters and crawfish.
April 1-Nov. 1—Trout season open.
June 1-Jan. 1—Open season for black bass.
Aug. 26—Saturday Fly-Casting Contest No. 10. Stow lake, 2:30 p. m.
Aug. 27—Sunday Fly Casting Contest No. 10. Stow lake, 10 a. m.
Sept. 10-Oct. 16—Close season in tidewater for steelhead.
Sept. 10-Oct. 16—Close season for catching salmon.
Oct. 16-Nov. 15—Close season for taking salmon above tide water.
Nov. 1-Sept. 1—Open season for crabs.
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

Feb. 15-Sept. 1—Closed season for mountain quail, grouse and sage hen.
Feb. 15-Oct. 15—Closed season for quail, ducks, etc.
April 1-Oct. 15—Closed season for English snipe.
July 1-Feb. 15—Dove season open.
Aug. 1-Oct. 15—Deer season open.
Aug. —Sebastopol Gun Club. Blue rocks. Every Sunday.
Aug. —Napa Gun Club. Blue rocks. Every Sunday.
Aug. 6, 20—Petaluma Gun Club. Blue rocks. Kenilworth Park.
Aug. 6, 20—Mount View Gun Club. Blue rocks. Mount View. Cal.
Aug. 20—Union Gun Club. Blue rocks. Ingleside.
Aug. 27—Santa Rosa Gun Club. Blue rocks.
Aug. 27—Vallejo Gun Club. Blue rocks. Florsden Station.
Aug. 27—Millwood Gun Club. Blue rocks. Mill Valley Junction.
Aug. 27—Lincoln Gun Club. Live birds. Reclamation Station.
Aug. 29, 30—Interstate Association tournament. Blue rocks Denver, Col.
Sept. 3—Golden Gate Gun Club. Blue rocks. Ingleside.
Sept. 3—Blue Rock Gun Club. High-street grounds, Alameda.
Sept. 4—California Wing Club. Live pigeons. Ingleside.
Sept. 9, 10—Empire Gun Club. Merchandise shoot. Blue rocks Alameda Junction.
Sept. 15, 16, 17—Interstate shoot. Blue rocks. Ingleside. Elmer E. Sbaner, Manager. Pacific Coast Handicap under auspices of S. F. Trapshooting Ass'n., A. M. Shields, Secretary.
Sept. 30-Oct. 1—Two-day blue rock tournament. Biggs Gun Club. Biggs, Butte county. H. Haselbusch, manager.

Bench Shows.

Aug. 15, 18—Orange County Agricultural Society. Middletown. N. Y. D. A. Morrison, Secretary.
Aug. 18, 19—Lynn Kennel Club. Point of Pines, Revere, Mass. W. H. Niximes, Secretary.
Aug. 23, 25—Rockland County Industrial Association. Bench show in New York City, N. Y. A. A. Vanderblit, Secretary.
Sept. 4—Long Island Kennel Club. Brighton Beach, L. I. Jos. M. Dale, Secretary.
Sept. 4—Rhode Island Kennel Club. Crescent Park, East Providence, R. I. H. M. French, Secretary.
Sept. 4, 5—Miller's River Kennel Club. Athol Mass. Wm. W. Sutton, Secretary.
Sept. 9—San Mateo Kennel Club. 2nd annual open air show. Burlingame. Irving C. Ackerman, Secretary.
Sept. 9—Cedarhurst Kennel Club. Lawrence, L. I. John G. Bates, Secretary.
Sept. 11, 13—Newport Dog Show. Newport, R. I. Francis M. Ward, Secretary.
Sept. —Santa Cruz Kennel Club. Inaugural show. Santa Cruz, Cal. Warren H. Porter, Secretary.
Sept. 16—Englewood Kennel Club. Englewood, N. J. M. W. Robinson, Secretary.
Sept. 18, 21—Genesee County Agricultural Society Kennel Club. Batavia, N. Y. A. E. Brown, Secretary.
Sept. 23—Madison Athletic Association. Madison, N. J. E. L. Jones, Secretary.
Sept. 25, 26—Miami Valley Kennel Club. Piqua, Ohio. Edwin A. Hiatt, Secretary.
Sept. 27, 28—Valley Fair Kennel Club. Brattleboro, Vt. Howard C. Rice, Secretary.
Sept. 30—Bryn Mawr Kennel Club. Haverford, Pa. Henry D. Riley, Secretary.
Oct. 3, 6—Texas Kennel Club. Dallas, Tex. W. H. Ordway, Secretary.
Oct. 3, 6—Danbury Agricultural Society, Danbury, Conn. G. M. Rundle, Secretary. Jas. Mortimer, Superintendent.
Oct. 11, 14—Spokane Kennel Club. Spokane, Wash. A. B. Jackson, Secretary.
Oct. 17, 20—Frederick Agricultural Society. Frederick, Md. J. Roger McSherry, Secretary.
Oct. 19, 21—Stockton Kennel Club. F. A. Geisea, Secretary, Stockton, Cal.
Nov. 15, 18—Boston Terrier Club Specialty Club. Boston. F. H. Osgood, Secretary.
Nov. 28-Dec. 1—Philadelphia Dog Show Association. Philadelphia. J. Sergeant Price Jr., Secretary.
1906.
Feb. 12, 15—Westminster Kennel Club. New York. Robt. V. McKim, Secretary.
Feb. 20, 23—New England Kennel Club. Boston. Wm. B. Emery, Secretary.
Feb. 24-March 3—Washington Kennel Club. Washington, Pa. F. C. Thomas, Secretary.
March 7, 10—Duquesne Kennel Club. Pittsburg, Pa. F. S. Steadman, Secretary.

Field Trials.

Aug. 15—Iowa Field Trial Club. Geo. C. Cooper, Secretary, P. O. Box 55, Des Moines, Ia.
Aug. 23—North Dakota Field Trial Club. Inaugural trials Grand Forks, N. D. A. E. Palmer, Secretary, Grand Forks, N. D.
Sept. 4—Nebraska Field Trial Association. 4th annual trials. O'Neill, Neb. H. H. McCarthy, Secretary, O'Neill, Neb.
Sept. 6—Manitoba Field Trial Club. 19th annual trials. La Salle, Man. Eric Hamber, Secretary, Winnipeg Man.
Sept. 11—Northwestern Field Trial Association. Inaugural trials. O'Neill, Neb. C. W. Butties, Secretary, Kansas City, Mo.
Sept. 21—British Columbia Field Trial Club. 3d annual trials. Ladner, B. C. H. S. Rolston, Secretary, Vancouver, B. C.
Oct. 12—Pacific Northwest Field Trial Club. La Conner Flats, Wash. Chas. L. Lundy, Secretary, Seattle, Wash.
Oct. 23—Ohio Field Trial Association. Washington Court House, O. C. T. Phillips, Secretary, Columbus, O.
Oct. 30—American Field Futurity Stake. For Pointers and Setters whelped on or after January 1, 1904, whose dams have been duly qualified. Robinson, Ill., entries closed July 1. Address Am. Field Publishing Co., Chicago.
Oct. 31—Connecticut Field Trial Club. Hampton, Conn. F. M. Chapin, Secretary, Pine Meadow, Conn.

Nov. 6—Independent Field Trial Association. Huntsville, Ill. S. H. Socwell, Secretary, Indianapolis, Ind.
Nov. 8—Dayton Pointer Club. Dayton, O. John Rothm, Secretary, Dayton, O.
Nov. 13—Illinois Field Trial Association. Robinson, Ill. Wm. R. Green, Secretary, Marshall, Ill.
Nov. —Indiana Field Trial Club. (Week following Illinois Champion Stake) C. F. Young, Secretary, Clay City, Ind.
Nov. 21—International Field Trial Club. Ruthven, Ont. W. B. Wells, Honorary Secretary, Chatham, Ont.
Nov. 28—Virginia Field Trial Association. Martinsville, Va. Chas. B. Cooke, Secretary, Richmond, Va.
Dec. 2—Continental Field Trial Club, 11th annual trials, John White, Secretary, Hempstead, Long Island.
Dec. —Pointer Club of America (following the Continental trials). Barber, N. C. C. F. Lewis, Secretary, 136 Malden Lane, New York.

THE FEAST OF ST. DOVE.

Uncase the trusty twelve-bore,
"To heck," bid old dog Tray—
No more the law enthalls us
And we will shoot today.

Full anxiously we've waited
The dawning of the First—
For fresh, green fields en-hungered,
For liberty a-thirst.

For liberty to wander,
The good dog by our side—
By field and fell and hedgerow,
And wait what e'er betide.

A whir of rapid pinions,
A hurtling blur of gray—
"Bang!" speaks the good breech-loader,
For we may shoot today.

The air sets blood a-coursing
Through veins—like rare, old wine,
The scent of nature's posies
Brings cheer without repine.

The partridge and the plover,
The wild-geese and the quail—
Have each their own enchantments,
Worked out by hill and dale.

For me the pleasant tramping,
For me the windward way—
That follows in the dove's flight,
From dawn 'till close of day.

Unbox the Number Sevens,
Unlash old faithful Tray,
And we will trail unhindered,
The little bird in gray.

Honolulu, T. H.

H. MELTON AYRES.

DOVES ARE SCARCE.

Reports from many heretofore good dove hunting districts are all of the same unsatisfactory coloring. Doves are very scarce this year. They have been getting noticeably fewer season after season.

A San Joaquin farmer advances the following unique theory to account for the conditions in his district:

"It's the game law that's responsible," he remarked. "Before doves were included among protected birds, hardly anybody hunted them. Occasionally some farm boy might go out and get a mess, but there was not the unanimous rush of sportsmen that you see now when the dove season opens.

"It is human nature to covet something that is prohibited. We are a good deal like Nasby's goat, which wouldn't stay in the yard where he ought to be; he'd jump the fence into the next yard, where he wasn't wanted, and the only cure was to put him in there and then let him jump back; then that goat was satisfied. Just as soon as you class any bird as game and fix a season for it, you start people to hunting who would have considered it beneath their dignity to kill such birds before. Mud hens would be in high demand if they were only included in the game law. I hope the legislators won't put blackbirds in the list; because if they do, the birds, which are useful to farmers, as they kill bugs and grubs, will soon be exterminated."

About Marysville, which section had the reputation of affording enjoyable dove shooting, last week, few if any hunters were successful in getting the limit of twenty-five birds. Some of the hunters say they never knew doves to be so scarce as this season. Judging by the bags brought in the shooting on the opening day was better in Sutter county than in Yuba. The best bag was made by George McCoy and Dan Bryant, who brought in forty-seven doves from Sutter county. J. W. Steward, R. F. White, G. W. Hall and Herman Berg tried their luck in Sutter and got nearly one hundred birds.

Henry Stelling of San Francisco, one of the crack trap shots of the State, went to Marysville to enjoy the opening day's sport. He got but twelve birds and says that was about all he saw. He went out with J. W. Giguere of Yuba City.

The conditions in Santa Clara valley seem to be much better, for reports of limit bags are numerous at San Jose. J. Delmas and M. Lacy shot 19 between them on the Calaveras; George Anderson, Charles Gerrage and Thad Hobson, 21 in party shooting at Madrone; Charles Mule, 16 from Madrone; P. F. Brott and Forest Wheeler, limit bags from Coyote; Phillip Strickler, 10 from Coyote; J. Cadwallader, 5 at Almaden; George Delwig, 15 near Hollister; James McKiernan, Ed Rhoads, limit bags at Madrone; Fred Barry, 12 at Silver Creek; F. A. Sangster, limit bag by the Uvas.

Doves are also said to be plentiful near Rocklin, Placer county.

SALMON FISHING IN THE DANUBE RIVER.

In these days of rising salmon-fishing rents and ever decreasing supply of fish, no apology is offered for attracting the notice of anglers to a variety in their pastime, which, it is correct to say, but few of them can have tasted. Yet the locality where it may be participated in is no further removed from London than the remoter of the Highland fishings; it comes into being each year precisely at the time when much of the salmon angling and all of the trout fishing goes out of season, says a writer in the *Asian*, and it is well worthy the attention of those who love a sport none the less for the difficulties which stand in the way of success in its pursuit.

Amongst the idiosyncrasies of the mighty Danube is the possession of a salmon all to itself. This is the huchen, the *Salmo hucho* of the naturalist, whose normal habitat is the Danube. But, just as *Salmo salar* leaves the sea and ascends rivers, so does the huchen wander up the affluents of the Danube, the purpose of each fish being the same, viz., to spawn. Formerly it was thought that the huchen found its way to the Black Sea, but this opinion appears to have been formed more upon inference than upon observation. Other species of salmon descend to the sea; the Danube empties itself into the Black Sea; ergo, the huchen goes there too. Except that the way is clear enough for the fish to enter the Black Sea, as it listed, it might serve as the European type of the land-locked salmon of North America. The flesh of the huchen, palatable as it is, and acceptable to a land-locked people, carries with it no suggestion of the creamy richness of its sea-fed congener, and the accepted theory is that its home is the Danube, with that river's glacier-fed tributaries as its nurseries.

Like the trout, the huchen selects the winter as the most suitable season for spawning, and towards the end of September the fish commences to work its way into the rushing rivers whose pale green waters are typical of glacier-fed streams. There is no unseemly rush for the best places; and it is to be noted that the farther one ascends one of these huchen-haunted tributaries the smaller do the fish average. The big waters hold the big fish. From bridges and other coigns of vantage they may be seen lying in favorite runs, dark-backed and never pale like our own salmon. Anyone thus looking at a huchen for the first time would be at a loss to classify it, for there is a pike-like viciousness in its attitude as it lies, as though keenly on the look-out for prey, and not at all after the manner of a salmon waiting to get up. Whilst the adipose fin betrays the salmonoid, the head seen alone from the front would present a puzzle, for in breadth it is that of the chub, the big mouth having even a suggestion of the cat-fish about it. It is a terrible looking mouth, and the crushing power of the jaws is tremendous, greater than that of the pike. When hooked the huchen may be relied upon to give a long pull and a strong pull, and in the region it inhabits is deservedly regarded as the angler's doughtiest quarry.

A typical huchen-river is the Iller, rising in the Bavarian Highlands and falling into the Danube at Ulm. At that point there is not much to choose between the two rivers in the matter of volume, for, no great distance away, the Danube is a really beautiful and blue stream flowing amongst a profusion of white granite rocks. The Iller is a considerable river, swiftly flowing for the greater part and plentifully supplied with tumultuous rapids, down which, however, picturesque raftsmen glide and rock fearlessly. At the rate the Iller flows a trip made on an arrangement of twenty or thirty fir logs must be an exhilarating one, and suggestive of a new sensation to most of us. Starting from Ulm upwards two principal towns are reached, Memmingen and Kempten. About and above Memmingen the largest fish are met with, the higher waters of Kempten holding the smaller fish only.

If the angler visits this region before autumn has changed to winter he will gain in the beauty of the surroundings, but sacrifices some sport. Nothing can be much more lovely than the country at the time the second crop of hay is being got in. At this period the visitors may not unwarrantably think the land depopulated unless he should happen upon the people at work in the fields. There he will find entire families, from grandfather down to the youngest, capable of rendering assistance, busily occupied in converting what is literally a carpet of flowers into hay. Once more does the Englishman find himself in a merry hay-making time, a thing of the past in his own country. He will be a very non-impressionable person if he fails to notice the dainty prettiness of the girls, who lose nothing by being barefooted. But the time for dallying, watching happy people who make pleasure of their work in what, with us, is an old-world fashion, is not the best for huchen fishing. Later on, when the snow lies a foot deep on the ground, then are the large fish to be found in the greatest number. When the rigors of winter set in in earnest then huchen fishing is at its best; and herein will at once be perceived a protective measure that will prevent the fishing from the likelihood of being overdone, for winter fishing under the conditions that prevail in this part of Bavaria is not likely to find favor with any but the most ardent.

The manner of catching the huchen with rod, line and hook is twofold, viz., with the fly and with the spinning bait. With the fly none but small fish—up to seven pounds or so—are caught, whereas the angler need not despair of meeting with a forty-pounder. He will not get one of these with the fly, so he is recommended to spin. He need be under no qualms of conscience that he will not thoroughly

earn every fish he catches by this method. For the most part these rivers run through gorges of greater or less depth with or without foreshore. Where there is foreshore there is a belt of trees, so, in each and every case the angler must take himself to the river and wade. There is no walking from pool to pool and casting from the bank, in the approved fashion of many Scotch and Norwegian salmon rivers. Here and there a gravel slope will slant into the water at an easy gradient, but at such places there are no huchen—only grayling, of which more anon.

In order to arrive at the huchen's lair with the spinning-bait, the angler must be in the water, and nothing less than full waders will be of use. In most cases he will have to pass through the wooded fringe, rod and other paraphernalia in hand. It is more than likely that he will already have come a few miles over rough country attired in waders, and should this be in September or October the sun will have to be reckoned with. The huchen does not lie in places which are the recognized holes for salmon. The eddy below certain rocks he has a predilection for, but more often it is to be found in the strongest runs where the stream rushes on in big undulations.

To reach these the angler must often wade far; and these river have none too reliable bottoms, treacherous shingle, which flies down stream when disturbed, alternating with slippery clayey patches. At the moment when he is exercised to the utmost to retain a foothold he has to do the casting, and, maybe, strike and hold his fish.

The tackle to be used may be based upon what would be used for pike, but a somewhat pliant rod is recommended. A hundred and twenty yards of stout spinning line may be attached to either class of reel. The man accustomed to the Nottingham reel will not feel inclined to relinquish it, but it is the custom with the most skillful anglers in the Iller to spin with the hand-drawn line. The problem of dealing with the slack is most ingeniously dealt with by means of a semi-circular network attached to the waist. When not in use this is shut up fan-fashion and allowed to hang at the side; in use it is extended in front of the angler. The device answers perfectly; and the fact that the curled-up line is frequently afloat is no hindrance. The tremendous crushing power of the huchen's jaw renders the use of the strongest hooks imperative, and for the purpose nothing is better than mahseer hooks. These can be made up into any shape the angler fancies; the writer found the ordinary Thames cast quite effective. Treble gut is advisable for both cast and spinning leaders.

The best bait for the purpose is a small grayling, a fish that is extremely plentiful in the river. Like the big brown trout of the Scotch and Irish lakes, the huchen can be taken with the artificial lure, but just as a small trout is the most deadly with his over grown fellows so is the grayling with the huchen. Each is the "natural" bait of its particular water. But in these days no angler would start upon such an expedition unprovided with a supply of dead bait preserved in formalin. The angler, it will be perceived, is fishing under conditions that are as novel to him as the country he is visiting for the first time. His experiences when he comes to actual fishing will be in line with this. With his bait spinning rapidly across the stream he may well wonder what is going to happen. His recollection of other modes of angling scarcely prepare him for seeing a reddish back which gives to the huchen the locally universally applied title of "red-fish," curl over at the surface porpoise-like. Just when he is wondering what this portends, he feels a slight tug. He strikes instinctively, but it is too late; the huchen has already let go. That curling over of the reddish back was the equivalent of the leap of the loch trout clear of the water, with the fly in its mouth. Next time the angler will strike more quickly in case the huchen has not hooked itself—a contingency that must not be relied upon.

The first rush of the huchen is tremendous, and the fish always has a very strong stream to help it. It is the first rush of the chub multiplied by three. At first the ultimate landing of a big fish seems a hopeless task, but the angler's chances are improved if the rod be powerful yet pliant, a quality that is found in rods made of greenherat or lance wood. The rest remains with the angler.

A day's fishing would begin with the light fly-rod on the grayling ground, for a bait. The same locality in the evening provides a very pleasant change from the heavier work. Two-pound grayling are common enough, and no matter where one has previously angled for this fish, the sport cannot be surpassed. The first cast I made for grayling realized a fish of two pounds and a quarter, and this and each of the several that followed it gave the most extraordinary salutatory performance, jumping clean out half a dozen times. One was never sure of a fish until it was in the net. In this particular river trout are very rarely met with, grayling, some coarse fish and huchen being the inhabitants. The country is rich with streams, large and small, in which trout and grayling abound, and we have here a land awaiting the enterprising angler when the Norway agent has gone too far in his rent-raising schemes and netting and pollutions have depleted our own rivers. Of course every inch of the fishing is in private hands, but arrangements are to be made with lessees, many of whom rent the fishings for the profit to be got out of them. Every huchen caught represents so many marks value; and some Bavarian lessees have no objection to the fish being caught with rod and line, especially when the angler pays for the privilege.

As hinted at in a previous issue, the steelhead trout are now in evidence in the lower waters of the Soquel. A few fish were taken last week, possibly the scouts ahead of the run of steelhead which is about due to make an appearance.

Anglers' Smoker.

The California Anglers' Association will be entertained at the club's initial smoker to come off Wednesday evening, August 23rd.

The affair will take place in the club's elegant rooms. A number of well known local anglers are billed for talks on congenial subjects anent the sport of angling and also on matters that will be of general interest for the good of the fraternity.

Striped Bass Angling.

Within the past ten days several encouraging catches of striped bass have been taken. One expert bass angler is enthusiastic enough over the indications to predict that the fish taken are the advance guard of a bass run coming from the ocean waters and that it is more than likely that the anticipated visit of the fish will be one in which large fish will be fairly numerous. At all events, the consensus of opinion among "clam casters" and "spoon trollers" is that most of the big fellows are taking things leisurely at present in the waters' depths beyond the Golden Gate.

San Antonio slough, much to the delight of a few lucky fishermen, did not declare a blank drawing in the bass lottery last week, for on Friday, Al M. Cumming landed five fish that were induced to grab the clam baits. The largest fish scaled 15½ pounds, the other four 11, 9½, 4 and 3½ pounds respectively. Pleased with the indications on fish-day, Mr. Cumming fished on Saturday but could only land an 8-pounder, and that with a spoon, despite his strict attention to rod and line work during the forenoon. These fish were all taken on an ebb tide.

R. W. McFarland fished on both days, but with little success. When "Mac" goes after bass he generally makes a showing if the fish are about.

On last Sunday Mr. Bliss had the good fortune to land seven fish from the slough. The largest turned the scales at 12 pounds. Bliss is the present holder of the San Francisco Striped Bass Club high hook medal. He has held the trophy for some time past with first a 5, then a 7 and now his latest 12-pound

Crockett Kennels' Ch. Cato Jr.

catch.

Mr. Bliss recently had some fair sport in San Leandro bay. "Locals" landed a number of bass at the same time. The fishing in that water is reported by Mr. Bliss to have improved recently.

The report that a 15-pound striped bass was taken in Lake Merritt one night this week is a reliable one. John Fatjo and several other anglers have taken a number of bass during the week, at night.

The second shark recorded as captured in Lake Merritt was taken by a bass angler one day this week. It was a small leopard shark, not over 3½ feet long.

The avowed intention of the Fish Commission to enforce the law regarding the taking of small sized bass by the rod and line men is looked upon by the majority of anglers as a move in the right direction. The matter has grown into an abuse of a tolerated privilege, for the law applies to all. The net men justly claim that they have as much right (?) to net small sized bass as the rod, and also the set line men. At all events, the net fellows cannot now say that there is any partiality shown sportsmen.

Another opinion that is gaining ground daily is that if there were a close season on striped bass it would be of great benefit.

Salmon in the Bay.

There is evidently a fair run of salmon on in the "straits" at present. Last week a 15-pound fish was hooked off Bluff Point. It is also reported that four small salmon, the largest about 8 pounds in weight, were taken off California City on Sunday last.

The taking of these fish by casual anglers has aroused the interest of the local angling talent to a degree. To-morrow a number of the experts propose to prospect Raccoon Straits with the object in view of hooking a salmon on the trolling spoons. The Tiburon, Angel Island and "straits" waters have been barren of striped bass results recently and the salmon trolling flotilla will also keep a lookout for bass.

Reports from Grant's Pass, Oregon, give an enticing account of the splendid fishing to be enjoyed at present in Rogue river. If the annual program of the steelhead is not decidedly changed the fishing will be worth attending in September.

A BULL TERRIER'S SOLILOQUY.

They call me Mike. I'm a thoroughbred, from nose-end to tail-tip, and master says I know so much about dogs and men that I ought to tell a thing or two. So I'm going to.

For instance, if you were taking care of someone's property and a bad looking man came along, you'd ask what he wanted, wouldn't you? Well, if a dog does just that same thing in the best and only way he knows how, everybody says he is savage and dangerous. Now, if a stranger who smells evil (we dogs tell good from evil by our noses, not by our eyes), I growl to see if it scares him. If it does, I just let him see that I am on to him, and he'd better keep out of the yard. If he keeps right on and speaks to me and goes to the door like an honest man, I bark and wag my tail to let him know it is all right.

Some fool men think that if a dog barks loud at them that they are dangerous. They don't know enough to look to see if he is wagging his tail. No dog ever bites a person at whom he wags his tail, but if I stick my nose and tail out on a line with my back it is about time to get over the fence. When a dog does that he means business.

A neighbor's dog was telling me how a friend of his master's could understand just what dogs mean by their bark, growl or actions. "He came into my yard," said the other dog, "and into the barn I was taking care of, to get something. I jumped at him, but all he did was to say: 'What's the matter with you? Go back in your box, quick, or I'll pull all your teeth out.' Now if he had stopped or looked scared, I'd have had a piece of his leg before he could wink."

Lots of people make a mistake by patting a strange dog on the top of the head. The way to make up to a strange dog is to stoop down, stick out your hand, palm up, and pat him on the chest between the front legs, or on the throat. A dog loves that. But before you touch him at all let him smell your hand for a moment. If the dog growls when he smells your hand let him alone; if he licks it he is your friend. You see it is this way: when a man wants to cuff a dog he does it on the top of the head or on the ears, with the back of his hand up. If your palm is up and under his jaw he knows you do not mean to cuff him. While the dog may not make friends, he will not bite you. No dog will ever bite a person who is stooping over or sitting on the heels. No matter how savage he is, he won't bite.

There are lots of fool persons in this world. Just because I am a Bull Terrier they think I am dangerous. My master has a small boss about five years old. I guess she's what they call his daughter, but he calls her "sweetheart." When she was a baby I was a puppy. We're true friends. Well, there is nothing she likes better than when I am gnawing a bone to put one of her fat arms around my neck and take the bone away from me with the other hand. I have heard some women who live near say, when they saw it, "How dare you let that child touch that horrid Bulldog when he's eating?" Now, wouldn't that make you bark? Why, when she puts her arms about my neck and kisses my ear and says, "Me loves oo Mity," I tremble all over, and feel just like I do when I smell beefsteak cooking. You humans don't know how a dog longs to make you understand what he feels and means, and when a dog finds someone like my master and my master's little boss, who understands him to the least cock of the ear, he is just simply happy.

English Setter Kennels.

The establishment of the Crockett Kennels by J. M. Golobock and Wm. Phillips will be appreciated by sportsmen who want none but a properly broken high class dog to work to the gun.

Champion Cato Jr. is not only a stylish bench winning dog but he is, as well, a grand performer in the field. He is bred in the purple and is the sire of a number of grand puppies. Cato Jr.'s grandam and sire are Mercury and Johanna. The progeny of this brace has proven worthy performers at field trials and in the hunting field. Ch. Maggie F., his dam, has been a consist winner at the field trials as well as on the bench. Lady Rod's Chaff (Rod's Chaff-Cressida), the dam of Maggie F. and Ch. Count Gladstone IV., her sire represent English setter performances that are an essential part of the history of the breed and its high development in the past two decades.

The brood bitches that will be installed in the kennels will be none the less high class than the stud dogs.

Manager Phillips, as a trainer of hunting dogs, has an enviable reputation for thoroughness and reliability. He states that he will guarantee every dog turned over to the owner to do the work required and for which he was trained faultlessly, or the fees will be refunded; in fact, he proposes to break his dogs properly before accepting a particle of compensation.

Irish Water Spaniel Puppies.

Attention is called to the offer, on page 15, of the chance to procure some excellent Irish water spaniels. This breed is a favorite one with duck hunters—in fact just the dog for work on our marshes and in the tule sections. Now is an excellent time to take a young dog for preparatory work before the open season begins.

San Mateo Show.

The entrance fee will be \$1.00 for each dog in each class. Entries close September 1st. Entry blanks and further information may be had by addressing Secretary D. J. Sinclair, 710 Mission street, San Francisco. Telephone Main 3187.

Entries will also be received at the Baskette Drug

Company, San Mateo, Cal.

If desired, with each entry, the exhibitor may state the price for which he will sell the dog entered. A prohibitory price will be permitted in the catalogue, but if exhibitors put a price on a dog he should be subject to claim during the show at the figure named. The superintendent, unless requested, will not interfere nor assume any responsibility in the matter.

The show will be open from 9 a. m. to 5 p. m. on Saturday, September 9, 1905 (Admission Day).

Judging will commence promptly at 11:30 a. m. and continue without intermission to its completion.

During the hours of judging, no dog shall be taken from its stall, not even by its owner; and if any dog is not found in its stall when called for by the judge, the judging will proceed without it. This rule will be rigidly enforced, that the judging may not be retarded. Owners are requested to be near their dogs, and when the class is called, to bring their animals into the judging ring. In the absence of the owner, attendants will take the dog into the ring.

Exhibitors can send dogs by express upon prepayment of the express company's rates. Boxes must be addressed to the Superintendent of the Dog Show, San Mateo, Cal. A return label should be attached to the box with the name and address of the exhibitor; also the name of the express company by which the box should be returned as requested.

All charges on dogs sent by express must be prepaid or the dogs will not be received.

Treatment After Whelping.

After whelping, bitches do not properly clean up where a bloody discharge is noticeable, and unless prompt attention is given, the loss of the litter will result. Nature will correct this matter by absorption, it is true, but the poison being absorbed into the system affects the milk, which produces bowel trouble for the puppies, usually followed by death.

The proper treatment is an antiseptic wash. Creolin answers the purpose very well. Dilute with water, as per directions on package or given by druggist, and with a syringe thoroughly wash the parts twice a day until the discharge ceases. A few doses of bicarbonate of soda in half teaspoonful doses, morning and night, will keep the milk in proper condition. The soda may be continued for a few days, until the discharge stops. The antiseptic washing should be commenced about forty-eight hours after whelping, whilst a dose or so of soda will not be amiss earlier.

TRAPS.

The Union Gun Club shoot for August is the card at Ingleside tomorrow.

The final club shoot for 1905 of the California Wing Club will take place at Ingleside on Monday, September 4th, instead of the 10th. The wind-up race will be at 20 live birds, the added club purse will be \$150. This shoot will decide the ownership of the four handsome club medals for this year.

Besides the regular club match at 20 pigeons there was the added feature of a 15-bird race for a cup trophy. In the club shoot "Slade" was the only shooter to score straight. Ed Schultz and Ed Donohoe each lost one bird. Six men grassed 18 birds. The purse of \$150 (six moneys) was divided between the above shooters last Sunday.

P. J. Walsh was the winner of the cup race on a straight score. The high guns in both matches were two of the oldest members of the club. The birds trapped during the shoot were as lively a lot as have been trapped at Ingleside for some time past. The scores made in both events follow:

Club race, 20 pigeons, \$150 added, 6 moneys, distance handicap—Yards.

The regular weekly shoot of the Bakersfield Gun Club on the 6th inst. brought Capt. Shafter and Mr. Oswald to the front with the top scores for the day.

A new feature at trap shooting was the "snipe shoot." This event is a test of a shooter's skill in the field. In snipe shooting the shooter, instead of standing behind the traps, gets out in front and is required to keep on the move. He is not allowed to have his gun to his shoulder and is not supposed to know when the bird is to be trapped or what angle it is to be thrown. Mr. Stoner and Capt. Shafter were the top notchers in the snipe hunt.

The scores for the day were: Shafter, shot at 100, broke 82; Oswald 100-80, Getchell 100-77, Cartwright 100-74, Ferguson 50-34, Jewett 75-46, Stoner 100-58.

Two yards handicap 25 targets—Shafter 17, 68 per cent; Getchell 15, 60 per cent; Shafter 23, 94 per cent;

Cartwright 12, 48 per cent.

Snipe shoot—Stoner, shot at 60, broke 41, 66 per cent; Shafter 15-9, 60 per cent; Jewett 50-29, 58 per cent; Getchell 50-21, 42 per cent; Cartwright 10-3, 33 per cent.

The scores made by the Petaluma Gun Club members on the 6th inst. in the club shoot at 20 targets were the following: Frank L. Carter 20, Pete Murphy 17, Klondyke 16, G. A. Drees 14, Dr. Hall and Joseph Steiger, 13 each; F. Doss 12, Bert Ayers, Joseph Clark, Keegan and F. Salimnia 10 each, and Roy Hooper and A. Salimnia 7 each.

Pool and practice shoots were participated in by 30 shooters.

The Watsonville Rod and Gun Club held the club initial shoot for 1905 at the club grounds on the 6th inst.

The meeting was so successful that another shoot will be arranged to take place in the near future, when it is hoped Work and Varen, the crack shots of Monterey and Pacific Grove, will be present.

The Gun Club is in a flourishing condition, and its members are looking forward with pleasure and anticipation to the open season for ducks and quail.

The features of the occasion were the performances of Barker, Brewington and Green shooting at double targets. A number of interested spectators were present.

The main event at 20 targets shows the following results: "Doc" A. M. Barker, San Jose, 20; Pearson, Salinas, 20; B. Freitas, Salinas, 20; W. H. Greene, Pacific Grove, 19; Brewington, Watsonville, 19; Alford, Watsonville, 19; Baxter, Watsonville, 19; Matthews, Watsonville, 18; La Motte, San Jose, 18; Holmes, San Jose, 18; Albright, Watsonville, 17; Bixby, Watsonville, 15.

The gathering of target smashers at Ravekes' roadhouse, The Hunter's Inn, near San Leandro, last Sunday, was a representative one. The main event of the day was a merchandise shoot, entrance \$1.00, shooters having the privilege of entering as often as they wished, best scores to count, 25 possible being the limit on target handicap allowance.

The main prize, a Remington gun, was won eventually by Fred Schultz. Knick, Pisani and Schultz each scored 25 targets. The former shot at 27 and Schultz at 26. In the shooting off Schultz broke 25 and carried off the shooting-iron. The other winners of prizes, of value in the order named, were: F. Knick, J. Pisani, L. W. Harpham, L. Hawxhurst, Lovenson, G. Sylvester, D. Daniels, Dr. Hutton, A. J. Webb, Lowmy, M. J. Iverson, J. B. McCutchan, Woods Jr., Schneider, Schnipper, Sandidge, Burston, Chevalier, Harvey, Lewis and Potter.

The scores and handicaps, 25 possible, were: F. Schultz shot at 26, broke 25; Pisani 28-25, Knick 27-25; Daniels 26-24, Harpham 26-24, G. Sylvester 25-24, G. Sylvester 25-25, Lorensen 28-24, Harpham 26-24, Lorensen 27-24, Daniels 26-23, Hutton 28-23, Iverson 23-23, Lowry 29-23, Wood Jr. 27-22, McCutcheon 25-22, Schneider 28-22, F. Fendner 25-22, F. Schultz 26-22, McCutchan 28-22, Iverson 25-22, Masterson 22-22, Webb 25-22, Pisani 28-22, Sandidge 30-21, Sears 25-21, Harvey 26-21, Schneider 28-21, Schnipper 28-21, Burston 28-21, Harvey 28-21, F. Fendner 25-21, Chevalier 28-21, Potter 27-21, Lewis 25-21, Burfeind 28-20, Best 27-20, Barber 28-20, Burfeind 27-20, Best 27-19, Knick 27-19, Hawxhurst 25-18, Burns 28-18, Patrick 28-18, Wood Jr. 27-18, Hawxhurst 25-18, Patrick 27-17, Sandidge 30-17, Lewis 27-16, Masterson 27-16, Hoyt 25-14, W. Lynch 28-14, Tiller 28-13, Mastick 30-8, Soden 30-7, J. Lynch 30-1.

A glance over the foregoing scores will make apparent that the handicaps were well made as a rule, for it appears in several instances that a shooter duplicated his first score on the re-entry. It is also noticeable that not a single 15 score was shot.

W. S. Wattles received the initial copy of the Interstate program for the big tournament at Ingleside next month.

The copy, we regret to say, was not available early enough for review in this column.

The program for the Empire Gun Club shoot on September 9th and 10th was to be issued today. The prizes for the merchandise shoots are numerous and embrace a variety of valuable and useful articles.

C. C. Rubel of Marysville was the medal winner at a blue rock shoot which took place at the recent outing of the Ripario Gun Club, an organization composed of Sutter county sportsmen, whose headquarters are at Marysville.

A special feature of the Union Gun Club shoot tomorrow will be the 100 target contest for the Phil B. Bekeart perpetual challenge cup.

Pheasants in Calaveras County.

About five years ago several pairs of Mongolian pheasants were turned loose in Calaveras county for the purpose of propagation. For the last three years nothing has been heard of them until one day last week when a prospector by the name of Edmonds, who lives in a cabin near the Easy Bird mine, discovered a couple of strange birds in a small pine tree near his house. When he came in town he told of the circumstance, when it was at once known that they were pheasants. The birds are still staying in that locality, and have become quite tame, even eating wheat and crumbs of bread off the cabin back porch.

Clarence Ashlin, "Rube" Haas and S. A. Wells propose to start from San Francisco early next month for Gold Hill, a point on Rogue river, where the fishing is said to be first-class.

DEER HUNTING NOTES.

Returns from many hunting sections indicate that deer hunters are having much sport and getting a fair quota of bucks.

About Ukiah and vicinity deer hunting is particularly good. It is reported that there are more deer this season than have been seen for the last four years. The following is only a partial list of deer killed near Ukiah within the last four days: J. F. Bond, Capt. W. P. Empey, Bob Hutchinson, Frank Patton, M. A. Powell, Jesse Porterfield, Harry Malpas, Wm. Eldred, Paul Anderson, Freeman Parker, Wm. Hildreth, Ben Milton, Walter Ackerman and Sam Leese have each secured a buck apiece; Cox, Halliday and party got seven bucks; Dr. Dutton and son and Victor McClure each shot two.

Several deer have been seen in the vicinity of Guerneville. A few days ago a party composed of Messrs. Klein, Hetzel and Monticelli Sr. and Jr. bagged a forked horn on Smith Creek, near Guerneville, weighing 132 pounds, dressed.

Four bucks were jumped on the Country Club preserve this week. One of the bucks was chased for some distance, finally attempting to cut across an arm of Tomales bay. The deer got mired in the tenacious mud, the tide being out, and before the hunters could get near and bag the buck, a passerby, who saw the animal's predicament, waded out and killed it with a revolver. The stranger carried the carcass away in triumph, much to the chagrin of the hunters.

Mr. Louis Ditzer, who has been stopping at Monte Rio, on Russian river, states that two dogs have been running deer, almost daily, in the ranges nearby. The dogs seem to be either lost or running wild, at all events all efforts to locate their owners have been unavailing. A buck, hard run by these dogs, dropped from exhaustion on the county road one day last week. The animal fell almost in front of a passing fruit peddler's wagon. The driver immediately jumped down and pre-empted the venison with a large jack-knife.

Two weeks ago a couple of hunters near Monte Rio jumped a buck. The deer led them a merry chase and finally was brought to bay in Bohemian Grove, much to the astonishment of Van Stow and several other Bohemians. The chef, taking in the situation, sallied forth from the camp kitchen, put the deer out of existence and then promoted the venison to the camp larder. Breveted on the field, as it were.

The Point Reyes Sportsmen's Club have accounted for seven bucks, so far this season.

Santa Clara Valley sportsmen have not lost many deer, if reports from San Jose and other points are reliable.

Many of the hundreds of sportsmen who left San Jose the first week of the season in quest of deer have returned. Most of them were laden with spoils of the chase and bring favorable reports of present conditions and number of deer in the stamping grounds of Santa Clara county. Forty-one fine bucks have been laid low during the past few days by San Jose hunters at the Burn Hills, Pine Ridge, Mount Hamilton, Slate Springs, Monterey county, Madrone Springs, Black Mountain, Santa Ysabel, San Antonio, Almaden, Llagas, Guadalupe, Loma Prieta, Los Gatos, Blue Ridge, Coyote, Uvas, Smith's Creek and Saratoga.

The hunters have all returned within the last few days, and venison is on the bill of fare for their friends. There are numberless hunters still ranging the hills while only a few have returned empty-handed. Frank Tiernan's 175-pound buck remains the largest killed so far and will in all probability be the only buck of that size shot this season in this vicinity.

Parties of sportsmen are leaving for the mountains every day. They will not be heard from for some time, as they expect to be absent from one to two weeks. Those who have not yet gone and who are looking for good hunting can do no better than go to Madrone Springs, as it is conceded to be one of the best deer grounds in Santa Clara county. For a guide and a hospitable host they will find J. D. Arnold, who is able to direct parties to the favorite hunting ground.

Theodore Hartman and S. Thompson brought back three fine bucks, a spike and a two and a four-pointer. Jack Condon killed a fine buck in the Burnt Hills last week. Jack Doble, Melville Hall, Lee Ridley and Charles Smith are still hunting in the Burnt Hills. Lee Ridley has sent in a four-pointer and Melville Hall a two-pointer.

John Hudner returned from Slate Springs, Monterey county, this week, with two large bucks. Frank Bradford, Sam Young, Herbert Bradford, William Salazar and George Stillwell killed a spike, a two-pointer and a three-pointer at Madrone Springs. George Cozzens, F. Fisher and Chester Fisher killed three four-point bucks at Bull Heads, Canteen Springs. A two-pointer and a spike were killed near Los Gatos by a local party of hunters during the past week.

Many local sportsmen wish to know at various times what is doing in the deer line. An additional list of bucks killed during the first week, with their respective weights, as near as a veteran deer hunter can estimate, is as follows, for Santa Clara county.

J. Beuck, Black Mountain, three-pointer, 135 pounds; Frank Tiernan, Black Mountain, four-pointer, 175 pounds; Paul Soto, Mount Hamilton, two-pointer, 110 pounds; Melville Hall, San Ysabel, two-pointer, 110 pounds; Lee Ridley, San Antonio, four-pointer, 140 pounds; Theodore Hartman, Burnt Hills, spike, 75 pounds; Sam Thompson, Burnt Hills, forked horn, 115 pounds; George Barker, Madrone Springs, spike back, 90 pounds; George Doll, Madrone Springs, spike-buck, 90 pounds; Dr. Jamison, Almaden, freak three-spike, 110 pounds; Joe Pinard, Llagas, two-pointer, 110 pounds; Bart Lorrigan, Guadalupe, spike, 60 pounds; Frank Bradford, Madrone Springs, spike, 75

pounds; George Stillwell, Sam Young, H. Bradford and William Salazar, Madrone Springs, two-pointer, 120 pounds, and three-pointer, 130 pounds; Frank Matty and party, Loma Prieta, two spike bucks, 90 pounds each, two-pointer, 110 pounds, and a three-pointer, 120 pounds; Ramon Cecina, Blue Ridge, four-pointer, 130 pounds; George Turner, two-pointer, back of Morgan Hill, weight 115 pounds; Manuel Lopez, Uvas, spike buck, 85 pounds; Bud Cox, back of Saratoga, spike buck, 76 pounds; Will Dixon, Smith's Creek, spike buck, 90 pounds.

MIXED PICKLES.

Immense Schools of Fish have been seen during the past week in the ocean waters off the Golden Gate and the adjacent near-by shores, north and south. Captains of coast craft state that not in years have they seen so many fish of different varieties off the "heads." Barracouta, bonita, hake, yellowtail, quite a few salmon, and many other varieties that are found near the surface. The bottom fish—rock cod, flounders, sea bass, king-fish, etc., are equally numerous. It has been no effort at all to take big catches of fish with hand lines put overboard from vessels inbound.

The fishing tugs and net men have made prodigious hauls of the funny denizens of the deep.

What has caused this unprecedented congregation of fishes in the locality mentioned is a puzzler to those who have observed the phenomena.

Whilst the fishes are frequenting one place in big schools, it is noticed that they are absent from other localities. For instance, last year, at this time, salt water fish, yellowtail, striped bass, barracouta, salmon and other varieties, with an occasionally steelhead, were taken plentifully at Moss Landing, at the mouth of the Salinas river; at this present time the fish are so scarce at that point as to excite notice and comment.

Bay fishing, especially for smelts, has been excellent during the week. Last Sunday Wm. Bay and Mrs. Bay, in a very short time, landed at the Tiburon wharf 70 smelt, most of them large sized fish. They used light split bamboo rods and had great sport in landing the big fellows. Bay tried flies for a time, but had to finally resort to spile worm baits.

A Battle With a Buck last Monday morning came very near resulting seriously for W. F. Farley, who is a rancher near Novato. He discovered the buck indulging in a hearty morning breakfast of young corn. A rifle shot dropped the marauder. Farley, believing the deer was dead, dropped his gun and went to gather in his prize. While he was standing over and looking at what he thought was the carcass of a nice buck, the animal suddenly jumped to its feet. Farley, on the impulse of the moment, grasped the buck by the horns and then a lively struggle took place. The now maddened buck jumped about and gave the old man (for Farley is 60 odd years of age) all he could do to remain on his feet. Finally, Farley, who was almost exhausted, managed to draw his hunting knife, which he luckily had with him, and driving the blade home in the proper spot, he soon ended what might have resulted in a death struggle for him. Farley was afterwards found in an exhausted condition and conveyed to his home. He was resting easily at last accounts and no serious results from the encounter are anticipated.

Chicago Fly-Casting Tournament. Yesterday and today the Chicago Fly-Casting Club's fourth annual tournament is the attraction at the north lagoon in Garfield Park. The program embraced six events.

August 18th, 10 a. m., long distance fly-casting. At 1:30 p. m., distance and accuracy fly-casting. At 4 p. m. dry-fly accuracy and delicacy fly-casting. A diamond trophy and five merchandise prizes will be awarded to the winning rods in the first event. In the second event the prizes are a diamond trophy and six merchandise prizes. A diamond trophy and four merchandise prizes are the awards in the third event.

Today three events will be called at the same hours as on yesterday. The first contest is delicacy and accuracy bait casting with one-quarter ounce weights. A diamond trophy and seven merchandise prizes are hung up for the winners in this event. The next scheduled event in distance and accuracy bait casting with one-half ounce weights. A diamond trophy and nine merchandise articles are the prizes. The closing event will be long distance bait casting with

half ounce weights for a diamond trophy and four merchandise prizes. A special prize, a Bristol steel rod, will be given to the contestant in this event who shall make the longest cast, regardless of his average.

Team events, as may be found feasible and desirable, will be arranged by the tournament committee during the time of the tournament. A salmon fly-casting event is also contemplated.

The contests are open to all and for world's championships.

Santa Cruz Rod and Gun Club, recently organized by Surf City sportsmen, is now permanently organized with the following lists of officers: President, Robert Kelly; vice-president, H. D. Fagan; secretary, Dr. E. B. Philbrook; treasurer, G. A. Dieter; executive committee, M. Finch, A. A. Jones, George Helm and Fred Kober.

The Bald Knob Gun Club has been organized by San Mateo county sportsmen, with headquarters at Halfmoon Bay. Among the members are many business men and prominent citizens of that section. The new club has leased what is known as the Bald Knob country, seven miles south of Halfmoon Bay, comprising over 1000 acres, and it is the intention to keep the reserve for hunting purposes for the members. The county leased is well stocked with game and much good sport is looked forward to by members of the club.

The Barbecue Near Truckee on the 6th inst. was an enjoyable outing of the Truckee River Fish and Game Protective Association, held at Truckee Mineral Springs, five miles from there. The object was to interest sportsmen of California in the protection of fish and game. Deputy Fish Commissioner W. R. Welsh and Game Warden George Neal of Sacramento county presided over the barbecue. Speeches were made during the afternoon.

Those who attended were: Louis Wamser, E. and A. Rosenlund, Mark Lane, Dr. I. Grant, A. Christensen, C. C. Moorehouse, C. L. Beck, W. L. Guff, P. H. Murphy, W. Heldt, T. Offerman, J. Knaeiss, G. A. Franklin of San Francisco, and C. B. Keyes of Oakland; E. W. Hunt, Fish Commissioner at Lake Tahoe; W. S. Rollison, F. M. Rutherford, Amos Fender, G. A. Kuntz, M. T. Burke, J. Sherkoof, W. O'Neal, E. J. Campbell, Fritz Ohland, W. E. Larsen, H. Milmoth and William McDougald of Truckee.

The Ripario Gun Club members and invited guests met recently at Berg Grove in Sutter county, the occasion being the club's annual dove stew. President Wm. A. O'Brien of Smartsville was the chef. The affair was voted the most enjoyable stew the club has ever held.

The annual election of officers resulted as follows: Mr. O'Brien was chosen to succeed himself as president. The other officers were W. P. Cramsie, secretary; W. M. Strief, treasurer; C. C. Rubel, Herman Berg, Dr. J. L. Sullivan, Dan Sharp and Duzen Niemeyer, directors.

Anaconda Anglers Will Take Steps to organize an anglers' club. The purpose of the club being the protection of fish in the nearby lakes and streams and the stocking of the same with trout fry.

A good deal of work has been done in that respect this summer by individuals, but it is seen that with an organization of sportsmen much more could have been accomplished.

Lost Creek, Mill Creek, Willow Creek and Warm Springs Creek will receive a new stock of trout next year and with proper care these streams ought to be made the best fishing places in Montana. Trout fry which have been placed in the streams this year will be large enough to catch next season. The size of the fish depends a good deal upon feed which they are able to get. In Silver Lake, or Echo Lake, a trout fry will weigh two pounds in two years.

The San Francisco Fly-Casting Club, it is rumored, is contemplating the acquisition of a fishing preserve on the Truckee river. A section of that grand trout-stream between Martis creek and the "meadow pool," a half mile, or so to the east of Burkhalter station, is looked upon as a desirable location.

Trout Fry for Tulare.

Sixty thousand Eastern brook trout fry were received at Porterville early this month. The young trout will be distributed in the streams of eastern

and southern Tulare county. H. E. Ford, representing the Tulare River Fishing and Shooting Association, took charge of 15,000 fry which were subsequently placed in the Middle Tule, above the clubhouse. N. M. Barnes received 20,000, which he took to the reservation, and had them placed in South Tule; J. Danner received 20,000, which were duly deposited in Deer Creek in the neighborhood of Hot Springs and Lee Gill 5,000, which he placed in Bear Creek on North Tule.

Through the efforts of the Tulare River Fishing and Shooting Association and others, the streams of eastern and northern Tulare county have been well stocked with trout, several thousands annually for the last five or six years having been distributed in the different streams.

The result has greatly improved trout fishing, and which will soon make that section of Tulare county the ideal spot for the lover of fly fishing.

TRADE NOTES.

Averages Reported.

At Fort Worth, Tex., Otto Sens, of Houston, Tex., won the hammerless gun put up by the Fort Worth Gun Club, breaking 25 straight, shooting "Dupont"; V. A. Kinney of Fort Worth, Tex., won the trophy known as the "Tommy's Cup," with 20 out of 25, shooting "Dupont"; J. E. Mitchell gold medal was won by M. E. Atchinson of Giddings, Tex., who tied with 25 straight with Chas. Tietzsch of Waxahachie, Tex., V. C. Dargen of Dallas, Tex., and J. A. Dryden of Waco, Tex. Mr. Atchinson broke 50 straight in the shoot-off. All used "DuPont" except J. A. Dryden, who shot "Infallible."

At New Haven, Conn., July 18th, W. H. Heer won first general average, 186 breaks out of 190, shooting "New C. E." (Improved); J. M. Hawkins won second general average, 174 out of 190, shooting "Infallible"; J. S. Fanning won third general average, 174 out of 190, shooting "Infallible"; F. LeNoir of Springfield, Mass., won first amateur average, 167 out of 190, shooting "DuPont"; L. H. Schortemeler of New York City won second amateur average, 166 out of 190, shooting "New C. E." (Improved); G. Finch of Windsor Lock, Conn., won third amateur average, 160 out of 190, shooting "DuPont."

At Mosinee, Wis., July 27th, W. D. Sannard won first general average, 121 out of 125, shooting "DuPont"; A. H. Wright of Merrill, Wis., won second amateur and third general average, 106 out of 125, shooting "Infallible"; W. A. VanBerg of Mosinee, Wis., won third amateur average, 102 out of 125, shooting "Infallible."

At Pine Bluff, Ark., July 26th and 27th, W. H. Joyner of Memphis, Tenn., won first average, 444 out of 500, shooting "DuPont"; J. D. Proctor of Junction City, Ark., won second average, 438 out of 500, shooting "DuPont."

U. M. C. On Top.

Out of 37 shooters who were present at the San Leandro shoot last Sunday, 30 used U. M. C. ammunition. Two of the shooters who broke the possible 25 used U. M. C. shells and Remington hammerless. Mr. Lon Hawxhurst, with a Remington gun and U. M. C. ammunition scored a possible 25 twice.

Recent Winchester Wins.

Ever hear of D. Wit Baker? Well, every trap shooter ought to know him, as a man that can shoot as well as he can is worth listening to. At the Tarentum (Pa.) Gun Club shoot, July 4th, he won high general average, and at Ligonier, Pa., July 11 and 12, broke 355 targets out of 380 for the two days, an average of 93 per cent. In defense of this high score he says proudly that he used Winchester factory loaded shells and a Winchester repeating shotgun.

At Betterton, Md., July 12-14, L. German and W. M. Ford won first and second amateur averages respectively, both using Winchester factory loaded shells.

A Popular Rifle.

The famous Savage rifles are popular in every section of the United States. These rifles fire rapidly, and the prices are moderate, especially the little Savage 22-caliber Hammerless Repeater, which sells at \$14.00, and the Savage Junior, 22-caliber single-shot rifle, price \$5.00. These rifles are for sale by sporting goods dealers generally, and catalogue may be obtained by addressing the Savage Arms Company, 32 Turner street, Utica, N. Y.

STOCK NOTES.

Most diseases of stock are contagious, therefore it is a good plan to separate the sick from the well to keep disease from spreading.

Probably the most profitable animal to raise is the hog. The litter is large, they are ready for market early and are usually of ready sale.

It is not wise to discard a sow because she is old, if she is doing well, unless her place can be supplied by one which is sure to do better.

Appearances pay. The sleek, well-proportioned animal of any kind, sells mostly readily and brings the best price. It even pays the owner to silk up a little.

A scrub may look pretty well, but it is only a scrub, and when compared with a thoroughbred, and what feed will do with a thoroughbred, he cannot stand the test. It don't pay, therefore, to handle grades.

Slow growth is what makes stock

raising too slow for some. They cannot get their returns soon enough. It is not the largest, nor the fattest, but the animals that have put it on the quickest, that yield the largest profits.

The runt seldom, if ever, pays. The animal that pays is the one that gets a good start in the world and keeps it. It may pay to raise the runt if feed is no item. If feed is bought, the owner is better off if he is in the other man's pen.

Fences should be kept in good condition. Many a rogue has been made by having poor fences. There are times when every animal is restless. If they escape once, they are much more difficult to control, and to confine than before.

Hogs need fresh, clear water, even when they are fed slop.

Clabber is not as good for growing pigs as buttermilk, or sweet milk.

Whole oats are regarded by some as an ideal feed for swine. They waste less when whole than when ground.

THOMAS W. LAWSON'S FARM.

For boldness of conception and rapidity of creation, few, if any, farms equal Dreamwold, the country-seat of Thomas W. Lawson. Situated about two hours by rail from his beautiful home in Boston, on the southern shore of Massachusetts Bay, at a point called Egypt, it comprised until a short time ago some of the most rugged and bleak of New England ground. Covered with boulders and loose stone of all shapes and sizes is characteristic of the land thereabouts, and Dreamwold in its original form contained them to such a degree that scarcely a patch of any dimensions would admit of plowing. Briars constituted the chief vegetation.

All these have recently disappeared, and in their place there is now a flourishing farm of more than five hundred acres. Truth to tell, it is like a paradise dropped there by some propitious divinity. From afar its numerous white buildings, compared with the neighboring scenery, look as pure as ivory, and between and beyond them on every side are miles of fences overgrown with (in summer) blooming roses. These, together with shrubs and vines of all kinds, give the impression of a well kept park. Closer inspection, however, reveals the practical combined with the artistic, and so amply that the whole forms almost an independent township.

The meadows grow nothing but the purest green grass or whatever other crops they are devoted to, and in the paddocks and pastures graze herds of the best horses and cattle that money and scientific breeding can procure. The poultry runs contain the finest strains that can be found, and there are three thousand chickens of all varieties.

Dovecotes have been constructed, in which coo the sleekest of doves, and on the ponds swim fat geese and ducks. Scores of dogs of high pedigree fill the kennels, and at the head of each department is a skillful manager, the farm buildings being arranged upon a scale of such amplitude as to afford abundant working space for the carrying out of every detail. Among their equipment for facilitating work water is piped to each of them from an immense tower built for the purpose, and they are also provided with a sewerage system, said to be the most elaborate of the kind outside of those controlled by municipalities.

Warm water is employed altogether for heating the buildings, and connected with the stables are bright, clean, comfortable sleeping apartments and separate kitchens for the men. A watch-clock system requires the watchman to make the rounds of stables, and there is a fire department, with engine, hook and ladder, hose reel and fire squad. Light is supplied by electricity, the wires for which, including those of a telephone system and the electric clock, are buried in lead conduits. Nowhere on the farm stand any unsightly poles. True, the standards for the electric lights are cedar-tree trunks, with the limbs lopped about a foot from the trunk, but on these the wires are so strung as to be unobservable, while over them and the tree trunks ivy and roses clamber in wild profusion.

Certainly Dreamwold, therefore, is an appropriate name for the place, the more because it is the realization of an ambition felt by its owner when he was a poor boy. Its location might have been elsewhere, however, if he had not, while driving with his wife along the old Egypt road, come across an ancient farm house, from whose porch the grandeur of the view took such a strong hold upon Mrs. Lawson that she wanted a home built upon its site. Simultaneously with the expression of his wife's admiration for the place, there came into Mr. Lawson's mind his juvenile dream of a farm. What if the soil comprising this old homestead was not of the arable, grass-producing sort, such as exists, for instance, in the blue-grass region in Kentucky, with which he was familiar? There was one thing in its favor. It was near enough to Boston so that he could make it his home during certain seasons of the year, or all the year round, if he chose, and on his way to or from the train have time to pat the horses or whistle to the dogs. Indeed, this privilege was one of the most vital parts of his dream. Why, then, not buy this place? His wife wanted it, and here, even if it should cost a little extra, he could carry out his long-cherished project. He did pur-

chase the tract, despite its sterility and uninviting appearance, and everything adjoining it.

Forthwith he got together contractors, architects and landscape gardeners, and while these performed the technical part, he furnished the ideas. In a short time a thousand laborers, with one-fifth their number of horses, were put to work, and just to clear those five hundred acres of rocks cost upwards of \$200,000. A large portion of them went into the construction of macadamized roads, driveways and lanes, and a wonderfully elaborate drainage system; the cobbles of certain sizes were used for gutter paving. The aim was to have all the work proceed in unison without necessitating rehandling, and so well was this carried out that at the end of a little more than two years from the commencement of operations Dreamwold Farm made its appearance practically as it stands today, at the cost of over a million dollars. A half million more has since been added in ornamenting the estate here and there and in stocking it with horses, cattle, dogs, fowls, pigeons and the like.

The largest building on the place is the training stable. It has a frontage of eight hundred feet, with accommodations for one hundred horses, and was completed in seventy-two working days. Another large structure is the riding academy or exercise ring. This was built in fifty-six days. Seventy-five days were required to finish three stables devoted to brood mares, and ninety days to erect and polish off eight other stables. Connected with these there is a mile race track, a training track and a polo field.

At the head of the breeding stud is the magnificent black stallion Dare Devil (2:09). It is claimed that Mr. Lawson paid C. J. Hamlin \$50,000 for him. Likewise did he pay \$7500 for Flying Fox, which is the record price for a Jersey bull, although there are others that have sold much higher privately. Some promising specimens of Jerseys have already been obtained by mating this animal with the choice cows on the farm, and especially with Figgis, which won the grand championship for aged cows at the St. Louis Exposition last year.

Unlike most of her companions, Figgis is American bred. She was dropped May 9, 1891, her sire being Sophy's Tormentor (No. 20883), and her dam Birdseye Surprise (No. 48326), whose record was 141-8 pounds of butter. In six months after dropping her second calf Figgis gave 7442 pounds 8 ounces of milk, equivalent to 448 pounds of butter. She subsequently gave fifty pounds 7 ounces of milk in one day, and in seven days 329 pounds 4 ounces, which tested 19 pounds 15 ounces of butter. Her milk record for one year is an ounce of 7444 pounds, or 472.95 pounds of butter. In four years she produced 25,172 pounds 3 ounces of milk, or 1,593.30 pounds of butter. She is kept under the same conditions and treated exactly in the same way as the other cows on Dreamwold Farm.

The sanitary conditions of their quarters, of course, are of the very best, the presence of running water and arrangements for washing and flushing making it possible for cleanliness always to be observed. The cows are never forced, however, it being preferable to have a fair production and good health than high milk and butter records and ruined constitutions.

Their grain ration consists of a mixture of bran, ground oats and oil meal. They get corn ensilage once a day, and are fed fine English hay or clover hay, whichever happens to be in stock. Every day they are turned out for exercise, but in the coldest weather no longer than is essential for good health and condition.

Activity in the stock market brings with it the schemers connected with the business. The old games of selling cheap stock at high prices is being practiced. Some unknown party will appear bringing handsome males, and produce a long pedigree and demand for a fancy price. Too often he gets it. The only safe way to buy a good animal is to get a good judge of the kind wanted to go to a reliable breeder who has a reputation to make or to keep, and buy what is wanted. The purchaser would better go with the expert.

When rearing a calf it should be remembered that it is to occupy the position of a money-maker after a while, and should be so treated that it may make as much for us as possible.

CLEAN FOOD FOR THE HOGS.

In the last issue of The Journal we spoke of the necessity of clean water for the hogs, and in this we will treat on the advantages of clean food.

Because a hog will eat almost anything that is given him when he is hungry is hardly a sufficient reason why he should be given filthy food. It is too often the case that what is not considered fit food for any other class of stock on the farm is given to the hogs in order to save it. And not only is it often the case that the food given is filthy, but it is given under filthy conditions. The feeding troughs and places are allowed to accumulate filth, and if the hog stands it well and good; if he succumbs to it and dies, bad luck is the cause and a new start of hogs is made, but it is only in exceptional cases that an improvement is made in the treatment. Filth breeds disease, and in a majority of cases the man who keeps his hogs healthy keeps them clean first, and feeds them clean food. One item in supplying clean food is to have the troughs and feeding floors clean. In many cases a good scrubbing will be necessary, while in others a good sweeping will answer. A sprinkle of lime or air-slacked lime into which a small quantity of carbolic acid has been mixed will help purifying the feeding floors and troughs.

If slop is fed care should be taken to feed it clean, and to keep the vessels clean. Clean slop is a healthy, nutritious food, and can always be fed to growing pigs to advantage. But slop is too often considered all the waste about the house and barn. If there is only mouldy oats or bran, partly-rotted corn or decaying vegetables, they are thrown to the hogs or made into slop.

Instead of hogs being made the scavengers of the farm they should be gleaners. Whatever is not fit to be converted into human food through the hog should be buried or turned into the compost heap, and if this plan is followed much better health will be readily maintained. But the cleanliness must not only apply to food, but to the quarters, also, if the best health is to be maintained and the best quality of product secured.

To some extent, at least, the quality of the meat is affected by what the animals eat, and to secure the best health and at the same time the best quality of meat, the food must be wholesome, clean and nutritious, and in many cases a little more care in this respect would not only lessen the losses, but improve the breed.

TO PRODUCE BUFF COLOR.

It is safe to presume that there is no color of a fowl so hard to produce and maintain as the buff color. There is but one true buff color. Lemon shade is not buff; a red or cinnamon color is not buff; neither is a reddish brown a buff; the true shade is "golden buff." The term used for standard buff color is "one even shade of rich, golden buff, free from shaftings or mealy appearance." This is simply a true rich buff of golden hue. Many produce a thin, uneven shade of lemon yellow and call it buff, while others favor a deep orange buff or cinnamon color and present it as the true shade for buff. These are not the true golden buff.

The proper shade or buff, say, is a mixture of yellow, red, and white, or a combination of yellow and pink. This is absolutely true when mixing colors on the palette, but many years of experience have proved that it is far more difficult to control the color of plumage than to properly mix the paints. It is easy to say: Keep out the black or drive out the white. But it appears when least expected. Buff is a made color—it is not natural color—and there is but one rule for its certain production, and that is the union of the truest color possible to obtain, year after year, until a strain is established that will breed true to color.

A continued system of inbreeding for good, sound plumage color has many drawbacks. Reduction of size and loss of form are the most serious. To obviate this, new blood must be introduced from time to time, the admission of which brings with it more or less disturbance of color lines, causing a continual oscillation between good color and good form. One of the principal assurances of good color is the proper undercolor and color of shafting or quills—all of which should be buff to the skin and of a shade somewhat lighter than surface color. Whatever the shade of buff may be, let it

be even and true all over and through and through.

It is not advisable to mate light and dark specimens; the result will be a meanness in plumage of chicks. The very best selection is of females having the true golden buff, and of males whose breast color is one or two shades darker than the females, all to be very even in color and free from any shade other than the buff. Black and white should be avoided. If white is present, it is quite likely to show in undercolor and on wings of the offspring. Black will show in the wings and tail. Both are equally objectionable.

POULTRY NOTES.

Ten hens will eat an ounce of bone daily.

Medicine is seldom necessary for fowls that are properly cared for.

Air slaked lime is valuable in many ways in the poultry house as a disinfectant.

It is almost impossible to keep more than one breed on a farm without getting mixed.

Fowls of all classes enjoy a meal early in the morning. If delayed, they become restless.

The farmer has the largest profit in poultry raising, because he has the least outlay for food.

Parched corn is the best form in which to give charcoal to poultry. It is far better than charcoal alone.

A few fowls well fed, and well housed will give better satisfaction if well cared for than twice the number.

The tendency of most poultry keepers is to make the roosts too high. They should be from eighteen inches to two feet high, and about three or four inches wide.

The fowls and animals have sense enough to recognize good treatment from bad. They reason, and their dispositions are such that a little persuasion will go farther than violence, in accomplishing good results.

Usually male birds are not as good about dusting themselves as the hens, and need to be looked after more closely. Free access to a good dust bath will usually control the lice on the hens, and in the henhouse.

A writer says: "I fully believe that a large per cent of breeders who quit the business with the conclusion that there is nothing in it, or those who make an absolute failure of it entirely, can turn back, if they would, and point to overcrowding as their main cause of defeat. It is impossible to get fertile eggs from stock kept under such circumstances."

Milk shipping and cheese making are regarded as less fruitful to a farm than butter making, because in this way the entire milk product is taken off the farm. In butter making the skim milk, with its products, are fed to stock on the farm, and thus it is returned to the soil.

When a farmer rears a heifer and sells her for \$12 to \$15 when she is six months old, he feels very much like he has had a "pick up" because he has fed her principally upon skim milk and light feed.

Warranted to Give Satisfaction.

Gombault's
Caustic Balsam

Has Imitators But No Competitors.

A Safe, Speedy and Positive Cure for Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses, or Cattle.

As a Human Remedy for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

The Lawrence-Williams Co., Cleveland, O.

THE PRICE OF WOOL.

The newspapers of the country are discussing the price of wool and trying to find out why our people are getting such good prices. We can assign but one reason, the demand in the world's markets. Writers assign various reasons for this. M. M. Price, commercial agent at Jares del la Frontera, Spain, writes to the consular department at Washington as follows:

"The attention of European sheep breeders is being called to the present condition of the wool market. For 35 or 40 years the price of wool had continually fallen so that from 1895 to 1900 it had decreased 50 per cent below that of 1870 and 1875. Recently a rise in price has taken place in the world's market. The fall in price was attributed principally to the extraordinary development of wool production in Australia, Cape of Good Hope, Argentina and Uruguay. These countries produced about 197,000,000 pound in 1870, 253,000,000 in 1880, and 360,000,000 pounds in 1889. This rapid increase of production enormously augmented importation into industrial countries.

"Some years ago there began a progressive decrease of the flocks in European nations. In 30 years there had been a decrease of 34,000,000 sheep in the flocks of England, France, Germany, Austria-Hungary and Spain. The sheep in Australia decreased from 108,000,000 in 1870 to 74,000,000 in 1898. The importation of wool into Europe from Australia, Cape of Good Hope, Argentina and Uruguay amounted to 2,783,000 bales, 2,494,000 bales, 2,445,000 bales, 2,245,000 bales and 2,045,000 bales in 1895, 1901, 1902, 1903 and 1904 respectively. The price of wool has steadily risen since 1901, and in the case of wool called "cruzados" or "crossed" the price has increased 100 per cent in the London market. This rise is due to the diminished production.

"From 1840 to 1892 the number of sheep bred in Australia, Tasmania and New Zealand increased with extraordinary rapidity, their numbers then began to shrink, and from 1898 to 1904 the decrease has been enormous. The Australian flocks decreased from 125,000,000 in 1892 to 111,000,000 in 1897, 103,000,000 in 1898, 92,000,000 in 1902 and 73,000,000 in 1902. The frequent drouths were the principal cause of this decrease of 50,000,000 sheep from 1892 to 1903. On account of this fact it is probable that the rise in price of wool will continue. Thirty years ago the countries named bred only Merino sheep for fine wool, but afterward the growers crossed the breed with English sheep of long, coarse wool, until now the proportion of mixed wool exceeds 50 per cent of the whole. Hence Merino wool is scarcer than ever, and the caprice of fashion may increase the price far beyond what its quality merits."

HANDLING THE CREAM SEPARATOR.

We have several times published instructions in regard to cleaning and handling cream separators, which have come into general use in farm dairying. It is an important matter, and we give the following on the subject from the Journal and Creamery Reporter, which says:

If the mechanical care of a separator is important as affecting its durability, the sanitary care of the machine is doubly so, as affecting the purity of the produce which passes through it. Milk—one of the best and purest of human foods—is one of the quickest to become unfit for food if it is not kept clean and handled in clean vessels. While the purchaser of a separator has been again and again impressed with the idea that it must be kept in perfect order, the same agent has told him that the parts which come in contact with the milk did not need to be washed oftener than once a day and that the cream would be delivered once a week.

It is right here that the advantage of the hand separator to the farmer may turn to naught unless cleanliness, which is so essential to purity of product and to profit in business, is thoroughly impressed upon the user. It is not enough to rinse the machine out with a little warm water and let it stand until next time, for the slime and solid particles of unclean matter in the milk that are caught and held in the bowl are at just the right temperature to decay, and an evil smell soon develops. The machine must be well

DON'T FORFEIT, BUT PAY UP.

F. W. KELLEY, Secretary, 36 Geary Street, San Francisco.

washed after every separation of milk.

There are some things about washing vessels which come in contact with milk that the average housewife needs to learn.

The dishcloth as found in the average kitchen should never be used on dairy utensils. It is the exception where one will be found to smell sweetly an hour after it has been used; and yet milk utensils are often washed with it and wiped with a towel that has done duty on all of the china and glassware of the household, and, possibly, the pots and kettles, before the tinware of the separator is touched. Discard the dishcloth and the dish towel while milk utensils are being washed. Wash them in warm water first, with plenty of some washing compound, and use a brush to do the work, but never a rag. Get into every part of them, after which rinse off with clean, warm water, and then either put them in boiling water or pour boiling water over them. Stand the parts up so that they will drain, and use no cloth to wipe them. The hot surface will dry them quickly, and they will be clean. Leave the parts in a sunny place if possible. This may seem to be putting too much stress on the case, but evidence gathered in the field shows the need of some vigorous words along this line. The outside of the frame, which does not come in contact with the milk, also needs scrupulous care. Cases have been noted where the color of the machine could scarcely be distinguished because of the grease and dirt or dried milk covering the paint. Pure cream could hardly be expected to come from such a place. It is pleasant to know that at more than three-fourths of the farms visited the separators were well kept and the people were trying to do the best they knew how. There was, however, a great lack of knowledge.

It is the blood that tells, whether it be in a cow, a horse, a sheep or a hog. Predisposition shows itself all the way through. If there is one, not up to the others in some desirable quality, that is an indication that that one should not be saved for breeding.

No feed is fed to greater advantage than full rations to any animal that may be raising its young. She may eat twice as much, and may seem always to be hungry, still give her all she will consume, and the returns and her well-raised young will yield ample returns.

It has been demonstrated that the fall of the year is the best in which to have cows come fresh. It is then that they are receiving the best of attention and that they have a season exempt from the trying nuisance of flies, which probably reduces the flow of milk as much as one thing could.

The ordinary way of doing things is not so very good for those who wish to have extraordinary results. It takes the extraordinary methods to accomplish extraordinary results.

Rice polish has a higher feeding value than corn or oats. It contains more protein and more fat, less water and less crude fiber.—Rice Journal.

Young cows do not always pay the first time they are fresh. But as their habits as milk cows are being established, they should be milked as long as possible. Whatever they are taught to do during their first year they will probably do during the succeeding years of their milk life.

Usually the young cow is not through growing during her first milking period, and should have plenty of good, suitable food, that her frame may continue its growth.

Sponges. S. Adderley, 307 Market St.

FOR SALE. IRISH WATER SPANIELS

BOTH SIRE AND DAM IMPORTED. THEY are all beauties, just right for this winter's shooting.

GEO. B. M. GRAY,
319 Twelfth Street, Oakland.

Fast Team of Pacers

FOR SALE—SEVEN AND EIGHT YEARS old, stand 16 hands; bays, good manes and tails; well matched; gentle; used to the city. Will pace better than 2:40. Sound and stylish. Can be seen at the Nevada Stables, 1350 Market street. Apply or address

Or E. K. TAYLOR, Attorney,
Park Row, Alameda.

SKY POINTER Jr FOR SALE.

THE STALLION SKY POINTER JR., SON of Sky Pointer, own brother to Star Pointer 1:53½; dam Juliet D. 2:13½ (dam of Irish (4) 2:08½) by the great McKinney. Sky Pointer is the sire of the fast mare Sally Pointer 2:13½, now racing on the Eastern circuit.

SKY POINTER JR. has shown a mile in 2:10, and is a very handsome, finely finished horse. His colts are extra fine individuals and very promising. This stallion can be seen at the Santa Rosa track during the Breeders meeting next week, where parties desiring a big bred stallion at a reasonable figure are invited to inspect him.

MRS. L. J. H. HASTINGS,
4336 Vermont Ave., Los Angeles.

Brood Mares, Horses in Training and Yearlings, Belonging to the Estate of Michael Fox, Deceased

NOTICE IS HEREBY GIVEN THAT THE undersigned executor of the will of Michael Fox, deceased, will sell on or after MONDAY AUGUST 28, 1905, the following described brood mares, horses in training and yearlings, to wit:

Aodinas (4) by St. Andrew-Fanny Louise.
Masado (1) by Maxio-Reseda II.
Re Carlo (2) by St. Carlo-Reseda II.
Edna Rose (5) by Bassettlaw-Reseda II.
Kidnapper (1) by Keelworth-Edna Rose.

The above described animals are now at the Oakland Race Track.

Said executor will also sell on or after said date the following brood mares and fillies, now at McDonough's Ranch, San Mateo County, Cal.:

Fanny Louise (dam of Andrisa, Cammore, Sister Jeannie) by Dardle-Nellie Peyton.

Reseda II by Midlothian-Margold.

Ooe Bay Filly by Orsini out of Fanny Louise, foaled April 13, 1904.

Ooe Bay Filly by Orsini out of Fanny Louise, foaled April 21, 1905.

One Chestnut Filly by St. Carlo out of Reseda II, foaled January 24, 1905.

Fanny Louise was bred to St. Carlo, 1905.

Reseda II was bred to Orsini, 1905.

Bids or offers for all of the above described stock, as a whole or separately, must be in writing and will be received any time after the first publication of this notice at the office of Sullivan & Sullivan, attorneys for said executor, Room 610, Parrott Building, San Francisco, California.

Terms—Cash in U. S. gold coin.

MATTHEW I. SULLIVAN.

Executor of the Will of Michael Fox, Deceased

FOR SALE.

Fast Pacing Stallion JOHN A 2:12 3/4 (three-year-old 2:14); sire Wayland W. 2:12 3/4 by Arthur Wilkes; dam Lady Moor by Grand Moor. Wayland W. is the only stallion to put two in the 2:10 list this year up to August 1st. JOHN A. is a rich seal brown, stands 16.2, weighs 1255 lbs. Is kind and gentle for a lady to drive. Is a very fine individual of strong conformation, and as all of his colts are fine lookers he should make a great sire. His oldest colts are three years old; none have been worked. There were but three of them, as he was not regularly in the stud.

Three-year-old Trotter SIR CARLTON 3:36 1/2 by Nutwood Wilkes 2:16 3/4; dam Lady Keating by Stam B. 2:11 3/4, second dam the dam of Diawood 2:11 and Abbie 2:17. SIR CARLTON is paid up in the Occident Stake and ready to start. Should be not win any money this year, will make a great prospect in the green classes next year; as no gamer colt ever lived. He can trot the fifth heat the fastest. In another year he will be able, barring accidents, to trot in 2:13 or 2:14. Any horseman at the Woodland track will recommend him as a game colt and a good trotting prospect. He only wears a harness and a pair of quarter boots and does not need the latter. Wears 6 ounces in front and 5 behind.

I also have some good road horses and brood mares for sale. They can all be seen at State Fair Grounds, Sacramento. Address

A. E. MASTIN,
1016 Nineteenth St., Sacramento.

FOR SALE.

SIDNEY DILLON GELDING BUENA, FIVE years old; a perfect beauty without fault or blemish; bay with black points; weighs about 1050 to 1100; can be driven by a child; an elegant road or track horse; trials in 2:17; \$750.

ALSO

The celebrated DOC WILKES, a road horse; you need not take the dust of any. Record 2:12 3/4. A beautiful mahogany bay, black points; weight 1000. No one need look at him unless they want to pay me \$500 for him. A baby can drive him. Both sold for want of use.

G. B. M. GRAY,
319 Twelfth St., Oakland.

McKinney Stallion for Sale.

WILLEROO 28021, BLACK STALLION, foaled March 18, 1893; height 16.2 hands, weight 1200 pounds. One of the best sons of McKinney. Handsome, stylish, finely proportioned and good dispositioned horse. Winner of three year-old blue ribbon at the California State Fair as best standard trotter. As a two-year-old showed quarters in 33 seconds; as a three-year-old, miles in 2:17. Sired by McKinney; dam Junonies by Junius 5338, second dam Lady Duroe by Iowa Duroe third dam Lady Green by Green's Mashaw, fourth dam Lady Cushman by Vermont Morgan. For particulars address

DAN REDMOND,
Care of Race Track, San Jose, Cal.

STANDARD BRED STALLION FOR SALE.

BY MENDOCINO 22607; DAM PRINCESS BY Nutwood 600. About 6 years old, stands 15.3 hands and weighs close to 1100 pounds. Perfectly sound, and with about five months' training trotted a full mile in 2:18 3/4. This statement can be substantiated. Stallion can be seen at Hans Freilson's stables on Point Lobos ave., near 21st ave. For particulars address

M. M. DONNELLY,
1306 Grove St., San Francisco.

THE CONSOLATION HANDICAP

—at the—
GRAND AMERICAN

Held at Indianapolis, June 27-30, 1905. was won by Mr. Jas. T. Atkinson of Newcastle, Pa., score 99 out of 100 from the 18-yard mark using

PETERS FACTORY LOADED SHELLS

This was the Only Event During the Entire Grand American which was won from Behind the 16-yard Line. Many other Notable Scores were made with Peters Shells, among them the following:

1st on Practice Day, F. M. See (tie), 99 out of 100. 1st on First Day, L. H. Reid (tie), 99 out of 100. 3d in Preliminary, Wm Veach (tie), 97 out of 100. 3d in Grand American, M. Arle (tie), 97 out of 100. In the Consolation Handicap, 2 scores of 98, 5 of 97, 4 of 96 and 25 others above 90 were made with Peters Shells.

All of which merely goes to prove that Peters Shells are WINNERS.

THREE DOLLARS A YEAR

TIVERTON 2:04 1-2

Driven by His Owner, Mr. A. B. Gwathmey of New York

PHOTOGRAPH OF DAN PATCH 1:56 IN ONE OF HIS WONDERFUL MILES

This Engraving was made from a Photograph taken of Dan Patch in one of his Marvelous Speed Exhibitions. It shows Dan Flying Through The Air with every foot off of the ground, and is as natural and life-like as if you saw him in one of his sensational miles. You will notice that Dan Patch is pacing in his smooth and majestic manner, while the three runners are urged on by voice and whip in their tremendous efforts necessary to keep up with Dan in his record-breaking miles. This picture shows exactly the way Dan makes his exhibition miles. The runners are used to stimulate Dan to greater efforts, because he goes faster when he has a horse to beat. Dan wants and enjoys a close and exciting race, and he will not pace his fastest clip unless he is in company. No trotter or pacer can go fast enough so we use high bred running horses. **Watch For Dan's Exhibition Dates This Fall. He Is Faster Than Ever.**

DO YOU WANT MORE SPEED?

Dan Patch Made Eight World Records After Eating "International Stock Food" Six Months. It Always Gives A Good Appetite, Extra Strength, Endurance, Courage And Nerve Force Which Is Sure To Give Your Horse More Speed. You Cannot Afford To Start Your Race Horse This Year Without Feeding "International Stock Food" Every Day.

DAN PATCH 1:56 **EATS**

"INTERNATIONAL STOCK FOOD"

3 FEEDS FOR ONE CENT

We feed "INTERNATIONAL STOCK FOOD" every day to our stallions DAN PATCH 1:56...DIRECTUM 2:05¼...ARION 2:07¼...ROY WILKES 2:06½...BUTTONWOOD 2:17...DIRECTUM JR. Also to our One Hundred Brood Mares and to all of their colts because it gives them better digestion and assimilation, keeps the blood pure and rich and thoroughly strengthens the entire system and prevents disease. Signed by M. W. SAVAGE, Proprietor of "INTERNATIONAL STOCK FOOD FARM" and also of "INTERNATIONAL STOCK FOOD CO."

WYOMING, R. I.

International Stock Food Co.

GENTLEMEN:—I have used your "International Stock Food" for the past three years and have found it to be just as represented. Have taken great pleasure in recommending it to friends and it has a good sale here.

Very truly,

WENDALL PHILLIPS.

A TRAINER FINDS IT INDISPENSABLE.

R. F. D. No. 3, GREENVILLE, PA.

International Stock Food Co.

GENTLEMEN:—I am employed by P. Dinehart as driver and trainer of his stable which contains seven horses with records ranging from 2:15 to 2:22½. Your "International Stock Food" is always found in our stable; in fact, we can't get along without it. It is good goods and deserves the highest praise. Yours respectfully, E. COATS.

30 CENTS WORTH WILL OFTEN MAKE YOU \$50.00

It is nothing uncommon for a months use of "International Stock Food" to add \$50.00 to \$100.00 to the selling price of a colt or horse. Its use will always make you big money.

"International Stock Food" with the World Famous Line—3 FEEDS FOR ONE CENT—is known everywhere. It is prepared from high class powdered Roots, Herbs, Seeds and Barks and Purifies the Blood, Tones Up and permanently Strengthens the Entire System, Cures and Prevents Disease and is a remarkable aid to Digestion and Assimilation so that each animal will obtain 20 to 25 per cent. more nutrition from all grain eaten. We positively guarantee that one ton of "International Stock Food" will make you \$360 net profit, over its cost in growing colts or in strengthening the system and saving grain for older horses. The use of 100 lbs. will make you a net profit of \$15.00 in a saving of grain in your regular feeding. It keeps horses strong and vigorous and gives them more nerve power, which produces more speed. It will make your stallions surer foal getters and cause brood mares to raise better colts because it increases the flow of healthful milk. "International Stock Food" is splendid for all breeding animals and is Equally Good For Horses and Colts and all other kinds of stock. It is perfectly harmless even if taken into the human system.

The use of "International Stock Food" for 30 days will often increase the selling price of a colt or horse \$50 to \$100. Be sure and test it before sending your horse to the sale ring or before a buyer comes to your barn. Its use will make you more money than anything you ever fed your horses. It is especially valuable to a horse with a "poor appetite" or in a run down condition. It will quickly strengthen and fatten the poorest horse on earth.

"International Stock Food" is universally acknowledged as the leading High Class Medicated Stock Food of the world, to be fed in small amounts as an addition to grain in order to give better digestion and more vitality. It is endorsed by over Two Million Horse Owners and One Hundred Thousand Dealers who always sell it on a "Spot Cash Guarantee" to Refund Your Money if it ever fails for any recommended use. We guarantee "International Stock Food" to Save 3 Quarts of Oats Every Day for Each Work, Carriage or Driving Horse and to keep them healthy, strong and glossy, because it greatly helps digestion and assimilation. A practical test on your horses will prove every claim we make. Ask Your Dealer.

Terms—One Year \$3, Six Months \$1.75 Three Months \$1
STRICTLY IN ADVANCE.

Money should be sent by postal order, draft or by registered letter addressed to F. W. KELLEY, 36 Geary St., San Francisco, California. Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

San Francisco, Saturday, August 26, 1905.

THE SECOND BREEDERS' FUTURITY, which was for foals of 1902, all the divisions of which have now been decided, developed two noteworthy features. The entries and payments were so numerous that the stake exceeded its guaranteed valuation of \$6000 by over \$1500, after all expenses of advertising, etc., were paid, and it brought out the grandest lot of trotting and pacing youngsters seen in California for years. At San Jose last year the two-year-old divisions were trotted and paced. The pacing division had three starters, Delilah by Zolock, Mona Wilkes by Demonio, and Roberta by Robert I. Delilah won and took a record of 2:16½ in the second heat. This was the fastest heat paced by a two-year-old in 1904. Mona Wilkes took a record of 2:17½ later in the year, and Roberta one of 2:19½. The trotting division had eight starters. It was a fast race for colts and fillies of that age. North Star by Nutwood Wilkes won the first heat in 2:24 and got second money, Bellemont by Zombro won the next two in 2:22½ and 2:21¼ and took first money, Ambush by Zolock got third money and Alhasham by Athadon fourth money. Gluck by Zombro, El Rey by Nushagak, Mamonio by Demonio and Elma S. by Nutwood Wilkes finished in the order named, and none were outside the flag. At the close of the season the records of these two-year-olds were as follows: Bellemont, 2:20½; North Star, 2:24; Ambush, 2:20; Athasham, 2:20, and the others had worked heats around 2:20, but failed to get records. This year the three-year-olds of this stake came out for the money. The result of the stake events at Santa Rosa, where the Breeders' meeting was held, appear in the columns of this journal. There were five starters in the pacing division. Mona Wilkes, second in the two-year-old pace last year, won this year and took a record of 2:11½. Mamonio that started as a trotter last year and failed to get any money, was shifted to the lateral gait this season, won two heats and second money and took a record of 2:14½. Just It, a very fast colt, was third. The race took five heats to decide. The three-year-old trot is fully described in another part of this issue. Five of the eight that started last year were again competitors and Kenneth C., a non-starter of last year, was added to them, making a field of six. Again was the time fast, and the Nutwood Wilkes colt North Star won in straight heats in the fastest time ever trotted in a stake race in California—2:13½, 2:13½ and 2:16. As in the two-year-old trot, not a colt was behind the flag. The Pacific Breeders' Futurity has been a great thing for California breeders, and it will grow greater as the years go by.

THE STATE FAIR will open Saturday next, and what a change there is in the sentiment of the people of the State of California toward the association under whose auspices it is given from that of last year. Then it was the opinion of many that no more State Fairs would be held, but there was too much of good about the time-honored institution to allow a year or two of bad luck and mistakes to kill it, so the Legislature permitted the State Agricultural Society to sell the old grounds, which were too small, and to purchase other and more spacious grounds further out from the business center of Sacramento. The sale of the old track, and a generous appropriation by the Legislature has put the society entirely out of debt and paid for many new and substantial buildings on the new grounds, which are planned to be the best appointed fair grounds in the United States. Instead of any ill feeling being felt against the directorate every taxpayer and breeder in California interested in fairs is now speaking a good word for that body and is doing all he can to help make the

fair of 1905 a success in every way. The cattle and horse breeders of the Coast will make the finest and largest exhibit of fine cattle and draft horses ever seen this side the Rocky Mountains. The pavilion exhibit will be something different than ever before, nearly twenty counties of the State making extensive exhibits of their products under the auspices of the order of Native Sons, for four grand prizes offered by the Society. These prizes are \$500 for first, \$250 for second, \$150 for third and \$100 for fourth. Admission to the pavilion will be free. There will be but one admission at the track, which will enable all to see the races and the stock parades for one fee. It will be the greatest fair that has been held on the Coast for many years. Don't miss it, and be there Saturday, September 2d, the opening day to see the Occident Stake trotting.

AMONG THE FOALS of 1905 there will be several with speed enough at two and three years of age to win a lot of money if they are eligible to start in any of the divisions of the Breeders' Futurity for foals of this year. There is a third payment of \$5 due next Friday, September 1st, on foals entered in this stake. If you have an entry see that it is paid up on, as there is no possible chance to win any part of the money unless payments are all made. If you have no entry, but own a foal of this year that you would like to name in this stake, send in an application to Secretary Kelley at this office immediately as there are a few nominators whose foals have died, or whose mares failed to produce, that will be willing to sell their nominations. The great ambition of every breeder should be to own a stake winner, as nothing adds to the reputation and value of stallions and brood mares like the winning of prominent stakes by their produce. There are many colts trained every year in California and elsewhere whose owners would willingly pay five times the amount of the entrance money could they by so doing make their colts eligible to start in the Breeders' Futurity, but because they failed to enter originally or to keep up their payments their colts are barred from winning anything but a few paltry purses. The payments on the Futurity for foals of this year are small and not numerous. The stake is guaranteed to be worth \$7000. It will not be worth a cent less, and it may, like the stake decided this year, be worth a thousand or two more than the guaranteed amount. Breeders should not permit their payments to lapse, and those who failed to enter should apply for nominations immediately. Don't let the date of payment, Friday, September 1st, slip your memory.

THOSE WHO DID NOT make an original entry in the Pacific Breeders' Futurity Stakes No. 5 for foals born this year, can purchase from nominators whose mares failed to foal or whose foals died, an entry in this rich stake, and \$12, which is the amount of the previous payments and the payment due on September 1st, will buy the entry and keep the colt in to February 1st, 1906. Send the entry, giving color and sex of the foal with name of sire and dam to F. W. Kelley, secretary, 36 Geary street, San Francisco. As there are but a few nominations for sale and it's "first come, first served," those who wish to take advantage of this opportunity should do so at once.

READVILLE RACES.

The Grand Circuit meeting of the New England Trotting Horse Breeders' Association cut down from five to two days on account of the law prohibiting betting on the events, opened on Tuesday of this week with beautiful weather and the track exceptionally fast. As the races were all for the stakes which closed early, the number of starters was not any smaller on account of the prohibition of pool selling, and about five thousand people attended.

The real race of the afternoon was in the 2:14 trot, known as "The Ponkapoag." Another feature was the fast mile paced by Audubon Boy in exhibition.

This pacer was scheduled for a three-cornered match race with Ecstatic and Belle Mc, but the owners of the latter horses failed to post their stakes and so the event was called off. On this account Audubon Boy was brought out and stepped a mile in 2:01 4-5, the fastest mile of this season. The fractional time of the mile was 0:31¼, 1:03¼, 1:33¼, 2:01 4-5, making the last half in 0:58½ and the last quarter in 0:28¼. There is no doubt as to the stallion's ability to pace a mile in two minutes.

Deleree was favorite for the "Blue Hill" and the mare took the race in straight heats in a field of twelve starters. There was an upset in "The Ponkapoag" when Glenwood M., the selection of the regular followers of the circuit, was beaten by Ethel's Pride, four heats being necessary. Glenwood M. won the first heat in a close finish with Turley, a quarter of a second being clipped off his record. Ethel's Pride won the second heat in a drive in the fast time of 2:07½. The mare continued her good work in the

next two heats, winning them both very handily.

The American Horse Breeder's Futurity for two-year-old trotters, went to Noma, a filly by Walnut Hall, her miles being trotted in 2:19 and 2:20¼.

Admiral Dewey son of Bingen and Nancy Hanks, was driven by his owner, Dr. McCoy, against his record of 2:09¼. The handsome young horse trotted the mile in 2:06¾ and it is thought he will shade 2:05 before the season is ended.

The summaries:

Trotting, Blue Hill stake, 2:30 class, purse \$5000.	
Deleree, b. m. by Delmarch, (Murphy)	1 1 1
Albert C., g. h. by Delmarch, (Dickerson)	6 2 2
Grattan Boy Jr., b. h. by Delmarch, (Clark)	2 4 5
Dodie K., blk. m. by Delmarch, (Crout)	3 7 3
Boreazelle, ch. h. by Delmarch, (Demarest)	4 7 7
Miss In Law, b. m. by Delmarch, (Thomas)	9 9 4
Angle, b. m. by Delmarch, (Saunders)	5 5 6
Fred Direct, blk. m. by Delmarch, (De Ryder)	8 6 8
Emma Hoyt, b. m. by Delmarch, (Stimson)	7 8 9
Queen Belle, b. m. by Delmarch, (Ford)	d
Sporty, b. m. by Delmarch, (Biller)	d
Lord Roberts, b. h. by Delmarch, (Tilley)	d

Time—2:10¼, 2:09¼, 2:09¾.

Trotting, Ponkapoag, 2:11 class, purse \$3000.	
Ethel's Pride, br. m. by Directum (Andrews)	3 1 1
Glenwood M., br. h. by Directum (Gahagan)	1 2 2
Turley, br. g. by Directum (Geers)	2 3 3
Thorn Boy, g. g. by Directum (Patterson)	7 1 4
Helen Norte, b. m. by Directum (Rutherford)	5 5 7 ro
Betty Brook, b. m. by Directum (Tiller)	8 8 5 ro
Mamie R., b. m. by Directum (De Ryder)	9 7 6 ro
Swift R., b. g. by Directum (McDonald)	1 9 dr
Harry J., blk. g. by Directum (Laird)	6 8 d
Tempest Grattan, b. m. by Directum (Coxe)	d

Time—2:08¼, 2:07½, 2:07¾, 2:10¾.

Trotting, American Horse Breeders' Futurity, foals of 1903, purse \$2000.	
Noma, b. f. by Walnut Hall, (Brady)	1 1
Quisetta, b. f. by Walnut Hall, (Nolan)	2 2
Cochato, b. g. by Walnut Hall, (Drinkwater)	3 3
Suzette, b. f. by Walnut Hall, (Gilbert)	1 4
Lady Imogene, b. f. by Walnut Hall, (Ecker)	5 dr

Time—2:19, 2:20¼.

Trotting, against time, to beat 2:09¾.	
Admiral Dewey, b. h. by Bingen, (Dr. McCoy)	1

Time—2:06¾.

On the second and last day of the New England Breeders' meeting at Readville big fields and fast records were the rule. Katherine L., the bay filly by Liberty Chimes, trotted the fastest three-year-old race of the year and won in straight heats in the remarkable time of 2:12½ and 2:12¼. Miss Adbell was second in the first heat and Charley De Ryder landed The Phantom second in the last heat.

A six heat race resulted in the 2:08 class pacing stake of \$5000. After Geary, Walter Direct and Directum Miller had each taken a heat, the gray horse Allerson outgamed them and won the next three heats in slower time. He was not laid up, either, as he was only beaten a nose by Directum Miller in 2:05¼, the fastest heat of the race.

The Massachusetts \$10,000 stake for 2:10 trotters had nine starters. Sadie Mac, the favorite, won the event and lowered her record to 2:05 in the fourth and final heat. She lost the second through a break in the stretch. The Zombro mare Zephyr took fourth money and was a good third in the two fastest heats, which were in 2:06¼ and 2:05. John Caldwell was behind the money.

The other races are sufficiently described in the summaries:

Trotting, "The Tyro," foals of 1902, purse \$3000.	
Katherine L., b. f. by Liberty-Chimes, (Stinson)	1 1
Miss Adbell, b. f. by Liberty-Chimes, (McDonald)	2 3
The Phantom, b. c. by Liberty-Chimes, (De Ryder)	6 2
Rosabel, br. f. by Liberty-Chimes, (Kenney)	3 9
Bervado, b. c. by Liberty-Chimes, (Andrews)	5 4
Governor Crane, b. c. by Liberty-Chimes, (Mahoney)	4 7
Kalkar, b. c. by Liberty-Chimes, (Young)	10 5
Priores, b. f. by Liberty-Chimes, (Paige)	9 6
Silence, b. c. by Liberty-Chimes, (Thomas)	7 8
The Minute Man, b. c. by Liberty-Chimes, (Proctor)	8 10
Ponetta, b. f. by Liberty-Chimes, (Titer)	11 12
Silver Wings, b. c. by Liberty-Chimes, (Eckers)	12 11

Time—2:12¼, 2:12¼.

Pacing, the Neponset, 2:08 class, purse \$5000.	
Allerson, g. h. by Allerton, (Brady)	7 3 2 1 1 1
Walter Direct, b. h. by Allerton, (Geers)	9 1 7 3 2 2
Geary, ch. g. by Allerton, (James)	1 6 6 2 3 3
Directum Miller, br. h. by Allerton, (Andrews)	2 10 1 dr
Don Carr, blk. g. by Allerton, (Clark)	10 2 4 ro
Bolivar, b. g. by Allerton, (De Ryder)	3 4 3 ro
Edwin C., b. g. by Allerton, (Laird)	5 7 5 ro
Bonnie Wilkes, ch. m. by Allerton, (Howard)	8 9 7 ro
Miss Willimont, b. m. by Allerton, (Snow)	4 8 d
Oregon Maid, br. m. by Allerton, (Helman)	6 5 d

Time—2:07¼, 2:06½, 2:05¼, 2:08¾, 2:10, 2:13.

Trotting, the Massachusetts, 2:10 class, purse \$10,000.	
Sadie Mac, b. m. by Peter the Great, (Stinson)	1 9 1 1
Kid Shay, b. g. by Peter the Great, (Rosemer)	2 1 2 2
Grace Kellar, b. m. by Peter the Great, (Cox)	8 2 3 4
Zephyr, b. m. by Peter the Great, (Geers)	3 8 4 3
Robert Mc, b. g. by Peter the Great, (Jolly)	7 3 7 ro
Lady Gail Hamilton, blk. m. by Peter the Great, (Howell)	5 1 6 ro
Norman B., blk. g. by Peter the Great, (McCarthy)	4 6 2 ro
John Caldwell, b. g. by Peter the Great, (Thompson)	6 5 5 ro
Gray Gem, g. g. by Peter the Great, (Shaw and McDonald)	9 7 8 ro

Time—2:06¼, 2:08¼, 2:08¾, 2:05.

Trotting, 2:15 class, to wagon, prize silver cup.	
Baroness, ch. m. by Baronet, (Arnold Lawson)	1 1
Colonel Wallace, b. g. by Baronet, (F. C. Hall)	2 2

Time—2:16½, 2:17¾.

Trotting, 2:10 class, to wagon, prize silver cup.	
Chime Bells, b. m. by Chimes, (G. F. Leonard)	1 1
Belgard, b. m. by Chimes, (G. R. Hall)	3 2
Dash, b. g. by Chimes, (T. W. Rogers)	2 4
Maid O'Dreamworld, b. m. by Chimes, (Arnold Lawson)	4 3

Time—2:15¾, 2:11¼.

Against time for record—Eagle Belle, b. m. by Eagle-lite, Time—2:24¼.	
Against time to beat 2:11, trotting—Filipino, blk. g. by Bellini, Time—2:10¾.	

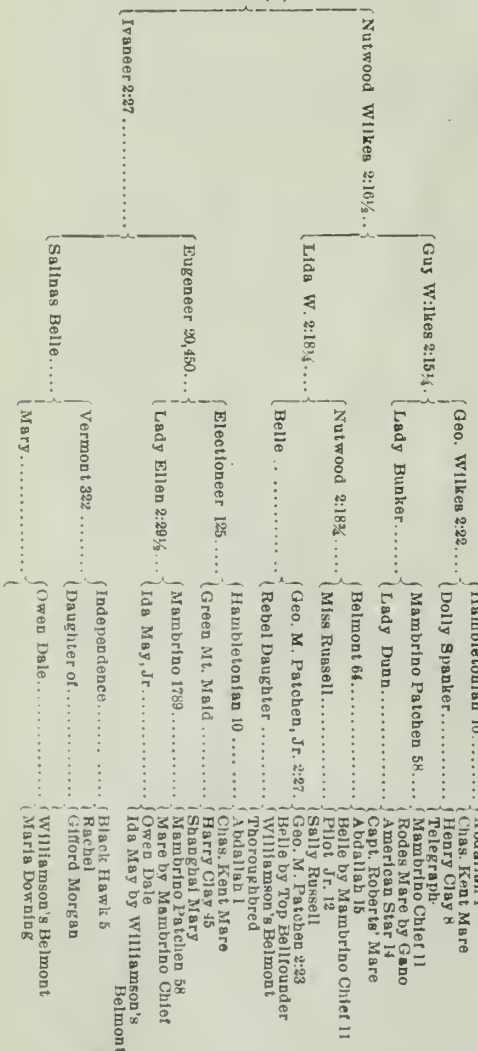

PINKEYE OR EPIZOOTIC.

A mild form of this disease seems to be prevalent at some tracks in California this year, and a number of horses have been down with it and unable to fulfill their racing engagements. The characteristic symptoms are an inflamed and red condition of the eyes, high fever, slight running at the nose and a delirious condition. The most popular remedy for this disease is Calt's Distemper Cure, advertised in another part of this paper. It has been in use for twenty years and is warranted to effect a cure. This remedy is manufactured by the Wells Medicine Co. of Lafayette, Ind.; is sold by all dealers, and D. E. Nowell of 510 Mission street, San Francisco, is general agent for this Coast.

JOTTINGS.

When Mr. J. B. Iverson's three-year-old colt North Star by Nutwood Wilkes won the three-year-old trotting division of the Pacific Breeders' Futurity at Santa Rosa last Saturday, trotting the first and second heats in 2:13½ handily and the next heat two and a half seconds slower because there was no other of his competitors with speed enough to make him go faster, the horsemen suddenly awakened to the fact that California had produced another phenomenal three-year-old trotter, and began wondering how fast the big fellow could go were he to be fitted and driven for one mile at the limit of his speed. It was evident, from the way he carried himself all through the race, that 2:10 would not stop him, and there was more than one ready to predict that with special preparation North Star can trot a mile very close to Fantasy's record of 2:08¾. The account of his race will be found on another page in the report of the last two days of racing at Santa Rosa and it is only my purpose here to call attention to North Star's breeding, which is unique, as while he is a representative of the Wilkes-Electioneer cross he carries four crosses of Williamson's Belmont, often referred to as the Mambrino Patchen of California, although Belmont was a registered thoroughbred, while Mambrino Patchen had in his veins blood that was but three-quarters thoroughbred. North Star gets one cross of Williamson's Belmont through Nutwood Wilkes, whose third dam, Rebel Daughter, was by that horse, and ran and won many races in California "in the old days." Ivoneer 2:27, the dam of North Star, is a daughter of Eugeneer, a son of Electioneer that was out of the famous brood mare Lady Ellen 2:29½ by Carr's Mambrino, sire of the dam of Sweet Marie 2:04¾. Lady Ellen's dam was Ida May Jr., an inbred Belmont mare by Owen Dale (son of Belmont) out of Ida May, a daughter of Belmont. The second dam of North Star is Salinas Belle, dam of five or six in the list, among them Dictatress 2:08¾, Diablla 2:15¼, etc. Salinas Belle was by Vermont 322, that sired the second dam of Sweet Marie, and out of Mary by Owen Dale, son of Williamson's Belmont. Owen Dale sired the fourth dam of Sweet Marie, so it will be seen that North Star's breeding is in very similar lines to that of the great race mare whose performances last year and this made her the star of the harness racing game. The sires of both are grandsons of Geo. Wilkes and their dams have crosses of Carr's Mambrino, Vermont and Williamson's Belmont.

NORTH STAR (3) 2:13 1-2

OTHER PEOPLE'S OPINIONS.

Too many people have lost sight of the sport

Chicago Horseman: Continuous racing can be held responsible for the evil days on which racing has fallen. Continuous racing and the making of the speculative feature of the sport the main one. Too many people have lost sight of the sport and look upon racing merely as a game, a game for high stakes. The sensational press has helped things along with startling stories of money gained and lost, with two pages of form charts, previous performances and possible winners and two column editorials in denunciation of the very features they have fostered and which were never heard of until the advent of the "yellow" press. A remedy must be found and it will not do to look for it from the hands of those who have brought about this woeful state of affairs. The proprietors of running tracks in the West having killed the sport in some sections and blighted it in others still continue the warfare which will result in the suppression of racing in other sections. While this is going on the trotting men are doing a lot of talking but are taking no concerted action. The only remedy will be for those interested in racing in every State to take steps for securing reasonable legislation. In order to do away with continuous racing limit each meeting to not more than fifteen days. This would be fair to the owners of running tracks and would seldom be taken advantage of by trotting track managers. Even in so large a city as Chicago this would be plenty and would furnish sixty days of sport. Longer meetings drag before the close. This has been noted even at Washington Park, where the attendance has materially decreased at the end of the meeting. Steps should be taken to forbid the construction of new tracks except in instances where a need for them is absolutely proven. With less racing the speculative features would not be so prominent, certainly not if the track owners would follow the example of Eastern managers and divorce the speculative and racing features. There is only one way to place racing on a proper basis and that is by means of legislation. The public looks upon racing as racing and because of that fact the managers of all tracks and all who are interested in racing and breeding should work together. In the past those who were not disturbed in holding their meetings were too content to let things drift along. What happened to their brother did not concern them until at last their fingers were jammed in the same door. As the pinch has been pretty general up to date it is high time that a united effort was made to put the sport on its proper basis.

Kentucky Stock Farm: It is not the least surprising that the practice so long in vogue of waiting until midsummer before getting their horses ready for racing has at last brought upon the trainers, remarks the Kentucky Stock Farm, who are largely responsible for this condition of affairs, the unfavorable comment that has lately been heard. Just why the drivers who so completely dictate the policies of harness racing should absolutely refuse to get ready before the last week in July is a difficult question to answer, unless, of course, it is from a desire on their part to extend the period of training as long as possible and to have as many pay days come around as they can before their charges are found wanting. Under the present condition a trainer finds it impossible to put off the evil hour when an owner makes up his mind that his horse is not possessed of capacity enough to justify a further expenditure of money, and he therefore fattens on the misfortune of the man who pays the bill. He can by his dilatory methods and under the present conditions so train his horses that their owners are buoyed with the hope that at some future date they will be allowed to witness speed to justify a continuance of their trainings. The failure to bring off successfully early meetings can as a rule be laid at the door of the trainer himself, for the majority of the owners would much prefer that their horses be ready either to win a portion of the money expended on them, or to clearly establish their want of capacity. So completely, however, do the trainers dominate the affairs of light harness racing that by adhering to the present tactics of procrastination they have been able to fix the date of the beginning of active racing at mid-summer. That horses can be got ready much earlier than the earlier part of July has frequently been proved, and it needs no other example of this fact than the condition of the horses in Ed Geers' charge, and the time made at the few earlier meetings that have been held. Geers could have begun his campaign, if it had been necessary, on the first of July, and while it may be said that his case is an exceptional one, from the fact that he has wintered in the South, the work done already by the trotters and pacers which have been trained in New England, as well as the condition of many others being prepared in climates more severe than the one at Memphis, is evidence enough, if any one need it, that if the Grand Circuit began on the first day of July, the condition of the horses would be fully as far advanced as under the present arrangement. If a yearling can be prepared for a quarter in thirty-five seconds, surely a matured horse can be got ready for something like his best efforts by that time. The chief reason why light harness racing should begin much earlier than it does now lies in the fact that the public becomes impatient first, then may look to some other form of pastime, for it must be remembered that all who attend trotting meetings are not horse enthusiasts, experts or turf followers, but are indeed to a very great extent, pleasure-seekers. One reason why trotting meetings fail to attract a large propor-

tion of the so-called fashionable element is because they are held at a season of the year when there is an exodus to the many summer resorts, and it is on this account that the running meetings in the vicinity of New York City are so scheduled that they profit by the presence of the element in question, being held before and after the pleasure-seekers take their summer vacations. It may be said by a few who have contempt for the so-called fashionable element of society that their presence is not essential to the best interests of the sport, yet this view is, we think, a narrow one, for that very element can not only afford to patronize a sport, but its presence adds greatly to the standing the pastime has and certainly gives it a prestige that is lacking if that element is conspicuous by its absence. In view of the fact that the racing public is eager for light harness racing to begin long before the first important meeting is held, that the average owner would be only too glad of an opportunity to reimburse himself, something should be done to bring about a radical change from existing methods. Doubtless there are some cities where a meeting of more than six days' duration could be given successfully, and if this is found to be the case, a great boon would be conferred on owners of racing stables, who under the present arrangement, suffer greatly as a result of frequent changes of base. The fact that there are some trainers able to prepare their horses by the first of July, no matter in what zone their training operations are held, contradicts the assertion so frequently made by other trainers that it is impossible to get ready before the latter part of the same month, and if the stewards of the Grand Circuit could see their way clear to begin the Grand Circuit three or four weeks earlier than they now do, extend the meetings in some cities, if necessary, or add other cities to the present list, the business end of light harness racing would be greatly improved and the racing public pleased beyond expression.

Horse Show Monthly: In justice to themselves, to their horses and to the breeders who produce these horses, owners of successful trotting-bred show animals should, as far as possible, ascertain and give publicity to the pedigrees of their blue-ribbon winners. This should be done in order that men who wish to breed heavy-harness horses from trotting sires may be guided in their selection of a stallion.

The Horse Show Monthly has recently been in receipt of many inquiries from owners of mares as to where they could secure service from a trotting horse who had distinguished himself by siring horse-show winners.

Owners of horses like Newsboy, Polly Prim, Whirl of the Town, Coxey, Petroleum, Sporting Life, Prince of Orange, Maid of Athens, Lucille and Lord Brilliant should, as far as possible, ascertain and give publicity to the pedigree of the horses. Owners of stallions which have sired prize winners are doing themselves a great financial injury when they neglect to advertise the achievements of their sires.

Since the United States Government determined to establish a breed of heavy-harness horses from trotting sources, a great impetus has been given to this special line of equine production. Many breeders who were in a quandary about what course to pursue have come to the conclusion that they cannot do better than follow the intelligent lead of the Government. The scarcity of good heavy-harness and saddle horses has been given such extensive publicity that producers are sure to attempt to supply the demand. This being the case, the trotting-bred horse who has proven his prepotency by siring show-ring winners is certainly sure of extensive patronage next year.

The pedigree of the hackney winners is carefully kept and extensively exploited. It is only justice to the trotting horse that his friends see that he is given publicity equal to that accorded the hackney.

Mr. D. J. Campau, who runs the Blue Ribbon meeting at Detroit, and is also proprietor of the Chicago Horseman, prints the following editorial in the last issue of his journal:

The Grand Circuit had a glorious opening at the Gross Point track, Detroit, last week. The attendance was all that could be desired. On M. & M. day the crowd was larger than on the previous year and on that day a record was made. The track itself was in excellent condition, the time made amply evidencing that fact. Both the starting and the judging were excellent and all in all there was nothing to mar the week's entertainment save the unfortunate shower on Tuesday and the rain on Friday, one necessitating a delay of nearly two hours while the other caused the last day's card to be curtailed after two heats in each of the three races had been trotted or paced. A great deal of interest centered in the fact that the entire card was raced off on the three heat, every heat a race plan. For the public this plan is a great improvement over the old as it enables the patrons to see all and return home at a seasonable hour. Owing to the fact that the race is practically over if a horse wins the first two heats, the third heat leaves a loophole for dishonest practices. Because of this a first-class judges' stand is absolutely essential, but such is the case under any plan if the racing is to be first class. Fortunately the judges at Detroit met all requirements and there was little chance for criticism, the only really suspicious looking heat being the second one in the 2:04 pace when the time was but 2:08½ and the announcement from the stand that the last quarter was in 29½ seconds was evidently in the nature of an apology. The fact that Geers was third in that heat and won the next in 2:06 showed that probably more than one driver made a mistake in estimating the capacity of his horse for a race early in the season. But taken right straight through the three-heat system

provides excellent sport from start to finish with the horses trying each heat. Spectators used to the system which allows them to bet that a dozen horses will beat the favorite may not be so well satisfied as in order to win they have to pick a winner more frequently than was the case in the three in five. The books receive a big play, several times larger than was formerly the case, while the auctions do not do so much business. That the general public likes the new system was demonstrated by the way it turned out after the two big stake races had been decided. When once the public understands that it can go to the races at a reasonable hour; see every race decided and be able to return home in time for dinner, then the gate receipts will increase in a noticeable manner, and it is about time that the general public should be catered to instead of a few score of the regulars.

The question as to whether harness racing can be successfully conducted without the adjunct of pool-selling would seem to have never had a better chance to be determined than on the occasion of the mid-summer meeting of the New England Breeders' Association at Readville last week. Trotting has for many years had a vogue in Boston which has perhaps been shared by no other community in the United States. Thoroughbred racing in the vicinity has never existed to distract the attention or alienate the interest of the public from the other sport. Great breeding farms have been reared in New England, producing horses that have achieved world-wide celebrity, thereby whetting the local appetite for sulky racing, until trotting has come to be regarded at Boston as a synonym for all that is popular in sport. Under these circumstances it might be presumed that if the pastime could maintain its fascination as a pastime merely, without regard to or consideration of its speculative feature, in any place in the country, it could do so at Boston. The meeting itself last week was calculated to insure, if possible, a favorable solution of the question. Better racing has not been seen at any track this season. The contests were clean and sharp and the time fast. Four trotters were added to the 2:10 list, an achievement vouchsafed by no other meeting this year. There was from first to last nothing about the meeting which should fail to conduce to the presence of large crowds every day—except the absence of pool-selling. What was the result? A frost. The Boston Globe tells the story briefly but forcefully:

"The racing failed to produce any excitement, and the attendance on the last two days was so small that it did not deserve the name of a crowd. Never was better racing seen than on Wednesday and Thursday, but outside the Sweet Marie-Tiverton race it was hardly commented on. There is no use mincing matters. The sport has been sapped of its very life. It is one of those unexplainable things, but a fact nevertheless, that even the followers of racing who never make a wager of any sort, women as well as men, lose all interest when present conditions prevail."

This is the truth in a nutshell. Singular as it may appear it is true that even the people who never bet lose their interest in racing on which betting is not conducted. The fate of the Readville meeting will be the fate of every association that attempts to conduct trotting without pool-selling under present methods, no matter how much we may wish that it were other otherwise. It may be possible to devise a method by which the interest of the public can be held by the mere spectacular phase of the sport, but it has not been discovered, and the individual who can demonstrate it will be hailed by all horsemen as the greatest philanthropist of the times.—Trotter and Pacer.

SPOKANE INTER-STATE FAIR.

Three of the largest fairs in the Pacific Northwest close the week before the Spokane Interstate Fair opens. This means there will be all manner of good attractions at the Spokane Fair this year. It opens October 9—the week following the Montana State Fair at Helena, the Washington State Fair at North Yakima, and the big Provincial Fair at New Westminster, B. C. The appropriations for this latter amount to \$75,000 this year.

The Lewis and Clark Exposition will also be drawing to a close at this time and many attractions will go from there to Spokane.

This means the racing program should be filled with many entries and that the tried and best horses will be on the Spokane track, where final scores for the season will be settled. These other fairs, including the Portland Fair, will be a help to Spokane, rather than otherwise. The midway at Spokane should be crowded with more attractions and better and more novel sights than ever before.

Gil Curry says that he would not like anything better than to get the Readville track and give a 60 days' meeting for the harness horses, every race to be on the dash system. He would have entrance free, and the purses for \$500 each, divided three ways, \$400 to first, \$75 to second and \$25 to the third horse. He thinks that every horseman in the country would come with their stables, thus saving the shipping expenses of traveling all around to the many tracks, as at present, besides the money they would save in entrance fees. His method of betting would be by the Paris mutual system, claiming it is the fairest ever invented for the matter of speculation on races.

Admiral Dewey, son of Bingen 2:06½ and Nancy Hanks 2:04, trotted to a record of 2:06½ at Readville last Tuesday in a trial against time.

FINE RACING AT SANTA ROSA.

Breeders Meeting Last Week One of the Most Successful in the Association's History.

Friday, August 18th, was Zolock day at the Breeders' Meeting and fully three thousand people were out to see the great California pacer win the 2:09 class purse of \$800, and while the son of McKinney did not have to pace as fast as the track record, or come within two seconds of his own mark, he won handily in each of the three heats, after three different horses had taken a crack at him to test his speed. He was too much for them all, however, and it was like breaking sticks for him to win in 2:07½, 2:08 and 2:10. Kelly Briggs was second the first heat, Daedalion occupied that position in the second heat, and Miss Idaho finished next to the winner in the final mile.

The best features of the day's races were the two-year-old pace and the 2:13 trot. In the first mentioned, which was a division of the Breeders' Futurity, McFadyen, a colt by Diablo 2:09½ out of the great brood mare Bee by Sterling, owned by Mr. E. D. Dudley of Dixon, and trained and driven by S. H. Hoy of Winters, won easily from the Del Norte filly Magladi, owned by Judge Brents of Walla Walla, in straight heats in the remarkable time of 2:15½ and 2:16½. McFadyen wears nothing but his harness and is one of the greatest prospects in California. In the second heat he made a break and was more than a distance out at the first quarter, but settled down and paced the middle half in 1:05. Magladi is a high-class filly but McFadyen is a wonder.

The 2:13 trot was a betting race and a splendid contest. The Santa Rosa contingent thought Robizola could win and made her favorite at \$20 to \$15 for the field. When Dr. Hammond took the first heat in 2:11½, a new record for him, he was hacked at \$8 to \$10 for the field. Dr. Hammond looked to be the winner of the second heat, but broke in the

with such ease that he finished every mile easily. Chas. Whitehead of Salinas handled the reins over the son of Nutwood Wilkes and drove a perfect race. The Los Angeles horsemen were so confident that the Zombro filly Bellemont would win that they made her favorite before the race at \$20, Ambush 2:14½, selling at \$16, and the field consisting of Athasham, Kenneth C. and Elma S., at \$10. Athasham had the pole, Elma S. in second place, Ambush next, Kenneth C. in fourth position, Bellemont in fifth and North Star on the outside.

There were a half dozen scores before they got the word and Athasham went to the front, closely followed by Ambush, North Star in third place. They went to the half in 1:07 and at the head of the stretch Ambush was leading. Here Whitehead called on North Star and he responded with a burst of speed that made the spectators marvel. Trotting as steady as a clock, acting like an old campaigner, he passed both the leaders and won by a length. Athasham was second, Ambush third, Kenneth C. fourth, Elma S. fifth and Bellemont, who was driven an easy heat, sixth.

The backers of Bellemont reckoned that the time had cooked the tall awkward gelding, and put their money into the pool box again on the Los Angeles filly at \$20 against \$10 for Ambush and \$10 for the field.

In the second heat Athasham and Ambush led around the first turn, with Bellemont and North Star trailing in good positions. Ambush broke along the back stretch. Athasham led into the stretch, pressed by Bellemont with North Star coming as before from third position and repeating his performance of the previous heat as to the time for the mile, 2:13½, though the last quarter was a little slower for him. Athasham was again second, and demonstrated that with the phenomenal North Star out of the race, he could have beaten all the others.

Two heats in 2:13½ by a three-year-old in his first start this year did not look as though he was much of a "stopper," but while he was installed favorite before the third heat, the backers of Bellemont, Ambush and Athasham had so much confidence that the

NORTH STAR 2:13½ WINNING FIRST HEAT OF BREEDERS FUTURITY

stretch and Mr. J. B. Iverson's mare Princess took the heat and a new record of 2:13½. The third and fourth heats went to the Doctor, the time being 2:13 in both miles. Dr. Hammond is owned by Capt. J. H. Bennett of San Francisco and was splendidly handled by Fred Chadbourne, one of the coming reinsmen of California. Robizola was second in three heats, but Dr. Hammond out-trotted her. H. D. B. and Liege did not have speed enough to make the issue a debatable one as to second money, though they trotted their miles in 2:15 or better each heat. Lady Madison made a bad break in the first heat and caught the flag. The summaries:

Pacing Pacific Breeders Futurity, two year olds, value \$750.
McFadyen, ch. c. by Diablo-Bee by Sterling (Hoy) 1 1
Magladi, b. f. by Del Norte (Delaney) 2 2
Time—2:15½, 2:16½.

Pacing, 2:09 class, purse \$1000.
Zolock, b. s. by McKinney-Gazelle by Gossiper (Delaney) 1 1 1
Miss Idaho, ch. m. by Nutwood Wilkes (Springer) 4 3 2
Daedalion, br. h. by Diablo (H. Ward) 3 2 4

Lady Madison, b. m. by James Madison (F. Ward) d
Time—2:11½, 2:13½, 2:13, 2:13.

Saturday saw the banner crowd of the meeting at the track. The main event of the day was the Futurity stake and the best field of three-year-old trotters since Zombro's year was ready to start for the rich prize. There were six of them, and they made a race that was worth going miles to see, even though it was won in straight heats by a gelding that out-classed the others in speed that day. North Star was the winner in the fastest time made by a three-year-old trotter this year. He trotted the first heat in 2:13½, with the last half in 1:05½ and the last quarter in 31 seconds, laying third until the last quarter was reached and then trotting around the leaders

bush and Athasham had so much confidence that the money played on them and the field made it possible for the backers of North Star to get even money for all they played on the gelding.

When they got the word for the third heat it was seen that Durfee was making as desperate an effort as ever in his life to beat the Nutwood Wilkes three-year-old if Bellemont had it in her to do it. The two young trotters made a great struggle up the back stretch, but North Star's speed was too great for her and the filly broke. North Star took the heat and the race eased up to a jog in 2:16 amid the cheers of the crowd, who realized they had seen in the winner the best three-year-old produced in the United States this year. Athasham won second money, Bellemont third and Ambush fourth.

The \$2000 trot for horses of the 2:24 class resulted in a rather cheap race. Of the sixteen original entries but four started. Charlie T. won after dropping a heat, and the best time was 2:16. There was but little speculation on the event as it was clear that Charlie T. would win from the first.

The 2:17 pace, which closed the day's sport, was a well contested event between eight hopped pacers. John R. Conway by Diablo was the winner. He made a tangled break at the start of the first heat and finished fourth in 2:15½. Miss Winn, a daughter of Diablo's brother, Demonio, taking the heat in 2:15½. John R. Conway won the next three handily, pacing the fourth and final heat in 2:12½, an excellent performance. The summaries:

Trotting, Pacific Breeders' Futurity, three year olds, value \$3099.
North Star, b. c. by Nutwood Wilkes-Ivaneer (Whitehead) 1 1 1
Athasham, b. c. by Athadon (Walton) 2 2 4

Time—2:29½, 2:24½.

LAST TWO DAYS AT POUGHKEEPSIE.

POUGHKEEPSIE, August 18.—Fast time was the rule at the Hudson River Driving Park today. In the 2:06 class pace, which Baron Grattan won after losing the second heat to Frank Yokum, the time of three heats was the fastest trotted or paced on the Grand Circuit this year—2:04½, 2:04½, 2:04½.

Tiverton won the free-for-all trotting event with ease. Sweet Marie lost her chance in the first heat by a break near the half-mile post and again in the second heat by breaking twice badly, once on the last turn and again in the stretch. She finished fourth in each heat.

Pacing, 2:06 class, purse \$1000.

Baron Grattan, b. g. by Grattan (Geers) 1 2 1
Frank Yokum, b. g. by Grattan (McGrath) 2 1 2
Ecstacy, b. m. (Lang) 3 3 3
Black Hal, blk. g. (Snow) d
Time—2:04½, 2:04½, 2:04½.

Trotting, 2:08 class, purse \$1000.

Choir Boy, g. g. by Graydon (Geers) 1 1 1
Lizzie C., blk. m. (McDonald) 2 2 2
Pat T., b. g. (Patterson) 3 3 3
Martha B., b. m. (Laird) 4 5 4
Belladi, b. m. (Rutherford) 5 4 d
Time—2:15½, 2:12½, 2:10½.

Trotting, 2:24 class, purse \$1000.

Albert C., g. g. by Bellini (Dickerson) 2 2 1 1 1

Trotting, free for all, two in three, purse \$1500.

Tiverton, b. g. by Galileo Rex (Howell) 1 1
George G., b. g. (McGrath) 2 2
McKinley, b. g. (Benyon) 3 3
Sweet Marie, b. m. (McDonald) 4 4
Time—2:07½, 2:06½.

August 19.—The Grand Circuit harness races closed here today with a good attendance. It was an off day for the favorites. Peruna, in the 2:10 pace, was the only horse picked to win who did win. Because Swago, in the 2:15 trot, was not doing as well as the judges thought he could, McBride was taken from behind him after the first heat and Benyon substituted. Swago did not do as well after the change as before. Swift B., son of Stam B., won the 2:15 trot in straight heats, reducing his record to 2:12½. He trotted like a high class horse.

The surprise of the day developed in the 2:10 trot, which was won by Jim Ferry, entered by W. J. Briggs of Denver and driven by Franks. Ferry was not thought of until after the second heat. Clarita W. sold in the opening pools at \$50, Topsy \$15, Robert Mc. \$15, Bonnie Russell \$5, and the field, including Jim Ferry and the California horse, The Roman, at \$10. The first heat was taken by The Roman, second by Robert Mc., then Jim Ferry took two heats and the race. Summaries.

Pacing, 2:10 class, purse \$1000.

Peruna, b. g. by Norbell (L. Murphy) 1 1 1
Owyho, ch. s. (Davis) 2 2 4
Stein, b. g. (Schaffer) 6 3 2

CRAFT'S DISTEMPER CURE.

A horse represents an investment which it would pay the owner to care for. Many valuable horses are lost because of ignorance and careless neglect. Distemper is a loathsome disease and somewhat dangerous, but there is a sure preventive and cure for it. Modern science and practical experience has evolved a treatment which is a success. This Craft's Liquid Distemper Cure. Veterinary surgeons and practical horsemen endorse it. It is a specific that acts both on the glands and the blood. It is a sure preventive as well as a sure cure. It may be used for sheep and dogs as well as horses. The manufacturers agree to refund the price if it fails to cure. Our readers interested should write for new 32-page booklet, "Veterinary Pointers," free, to the Wells Medicine Co., 13 Third street, Lafayette, Ind.

NOTES AND NEWS.

California State Fair opens next Saturday.

Don't miss seeing the Occident Stake trotted that day.

The Southern California trotting circuit will open in October. There will be five or six meetings.

North Star won the neat sum of \$1750 for his owner, J. B. Iverson of Salinas, when he won the Breeders' Futurity last Saturday.

Bystander by Zolock won two heats and second money at Decatur, Illinois, August 16th. His two heats were in 2:14 $\frac{1}{4}$ and 2:15. Harry B. won the race and took a record of 2:13 $\frac{3}{4}$.

Deloree 2:09 $\frac{1}{4}$ is a royally bred trotter and looks to be one of the best ones out this year. She is by Delmarch 2:11 $\frac{1}{2}$, dam Hindoe by Allerton 2:09 $\frac{1}{4}$, second dam Ellore 2:08 $\frac{1}{2}$ by Axtell 2:12.

Swift B. 2:12 $\frac{1}{2}$, whose record was made in a winning race, is showing something of the form that was expected of him two years ago. Look out for a mile below 2:10 by him before the season is over.

Get a new Flower City sulky from the San Francisco Wheel and Novelty Company and you will not lose the race because your horse had to pull a hard-running sulky.

Nell by Estell Eric is now the dam of eleven standard performers, and four of them are in the 2:10 list. These are Vassar 2:07, Susie T. 2:09 $\frac{3}{4}$, both pacers, and the trotters Belle Vara 2:08 $\frac{3}{4}$ and Tom Axworthy 2:07. Nell is the greatest of brood mares.

Della McCarthy by McKinney started in the 2:21 class trot at Saginaw, Michigan, last week but finished outside the money. Her best heat was the second, when she finished third. This heat was in 2:18 $\frac{1}{4}$. She was not better than sixth in any other heat.

Lena N. 2:05 $\frac{1}{4}$ has a bay filly at foot by Directly 2:03 $\frac{1}{4}$. This should be a pacer of the two minute class.

Strathway 2:19 is now the sire of two 2:10 trotters—Toggles 2:08 $\frac{1}{2}$ and John Caldwell 2:09. Both are geldings.

If you failed to enter that well bred foal of 1905 in the \$7000 Breeders' Futurity put in your application to Secretary Kelley for a nomination. There are few mares that failed to foal and a few more whose foals died. You may be able to get one of these at the cost of same to date. You will have to apply quickly, however, if you want to get in.

Nutwood Wilkes has now sired three trotters that have taken records better than 2:14 in their three-year-old form. They are Who Is It 2:12, John A. McKerron 2:12 $\frac{1}{4}$ and North Star 2:13 $\frac{1}{2}$. As a sire of early and extreme speed Nutwood Wilkes is certainly "the goods," and one of his sons, John A. McKerron 2:04 $\frac{1}{2}$, is the fastest trotting stallion of all the Wilkes trihe.

Fanny G. by imported Margrave was one of the great thoroughbred mares whose blood has helped to make the fastest trotters. She was the grandam of Alma Mater, dam of eight in the list, and of such great sires as Alcione, Alcantara, Allendorf, Alfonso, etc. Fanny G. was also the grandam of that great thoroughbred mare Dame Winnie that produced Palo Alto 2:08 $\frac{3}{4}$, Altivo 2:18 $\frac{1}{2}$ and three others with standard records. Now a colt that is bred from the very best trotting strains that traces to old Fanny G. on both sides of his pedigree and is a fine individual should make a great stock horse. Such a colt is Hannibal, son of Iran Alto 2:12 $\frac{1}{4}$ and Alma Wilkswood by Alcantara, second dam Emma Nutwood, a great brood mare by Nutwood, third dam by Black Hawk 767, fourth dam by old 30-mile champion Gen. Taylor, and fifth dam by Williamson's Belmont. Hannibal is advertised for sale in this issue. If you want a good one, inquire more about him, and then you'll want to buy him.

Bolivar 2:08 $\frac{1}{2}$ started three times at Buffalo and won twice.

Miss Georgie by Nutwood Wilkes reduced her record in the third heat of the 2:12 pace at Dover, New Hampshire on Thursday of last week. She won the race very handily in straight heats in 2:11 $\frac{1}{2}$, 2:12 $\frac{1}{4}$ and 2:10 $\frac{1}{4}$. Miss Georgie is owned by W. A. Clark Jr. and was bred by Martin Carter of Irvington, Cal. Rey del Diablo started in the same race but was behind the money.

Make your payment, the third one of \$5, on your foal of 1905, entered in the Pacific Breeders' Futurity. This payment must be made on or before September 1st, which is next Friday. Any division of this \$8000 guaranteed stake is worth winning.

Demand continues very active in the City of Mexico for high-class carriage horses from the United States. Of late several loads have been sent on to the Mexican capital from Chicago, the cost being about \$300 to \$350 each. Bay is the favorite color.

Bonnie Mac, the three-year-old filly by Bonnie Direct 2:05 $\frac{1}{4}$, dam Myrtle 2:13 $\frac{1}{2}$, owned by W. H. Lumsden of Santa Rosa, is keeping in good form and working nicely for Ed Benyon, who is preparing her for the Kentucky Futurity. She recently trotted a mile in 2:14 $\frac{1}{2}$, last half in 1:05, and it did not seem to bother her. She will be in hot company in that big stake, as Susie N. 2:13 $\frac{1}{2}$ and Katherine L. 2:14 $\frac{1}{4}$, that took their records at Buffalo two weeks ago, are both in this stake.

The mother of the well known trainer and driver, John Dickerson, died at Greensburgh, Illinois, week before last.

East View Farm does not seem to be winning many purses this year. Bolivar 2:08 $\frac{1}{2}$ has been feeding the other horses in the string thus far.

C. C. Crippen of Mayfield tells the following story: In the only race in which North Star, winner of this year's Breeders' Futurity for three year olds, started last year, he won the first heat in 2:24. It was at San Jose in the two-year-old division of the same stake. In the second heat Will Durfee turned the filly Bellemont loose. When he had collared North Star and felt sure that Bellemont had him at her mercy he said to Whitehead, "How do you like her?" Well, of course Whitehead had to like her, as she won that heat, the next and the race. In the third heat of last Saturday's race at Santa Rosa, Durfee did what the public expected him to do—made a desperate effort to win. He got on even terms with North Star on the back stretch, and for a ways the gelding and the filly trotted like a double team. Just at the half Whitehead turned on a little more steam and at the same time said to Durfee, "How do you like him?" "I can't beat you," Billy responded. Bellemont evidently thought so, too, as she immediately made a break which lost her all chance of victory over the colt she vanquished a year ago. There is no doubt that it did Charley Whitehead as much good to ask Will Durfee that question as it did Mr. Iverson, owner of North Star, to win the big end of the stake.

T. W. Barstow's filly Just It paced a splendid race in the three-year-old division of the Breeders' Futurity at Santa Rosa and won third money. In last week's Breeder it was stated that Just It had paced a half in 1:00 $\frac{1}{2}$ at San Jose. This is a mistake. It was Mr. Barstow's three-year-old colt High Fly that paced that phenomenal half.

W. H. Williams at the San Jose track advertises a five-year-old sorrel gelding for sale that will make a fine driving horse for a gentleman. The gelding can step a quarter in 37 seconds and is perfectly sound and gentle.

Owyho 2:09 $\frac{1}{4}$, son of Owyee and Bertha, dam of Diablo 2:09 $\frac{1}{4}$, Don Derby 2:04 $\frac{1}{4}$, etc., paced a great race at Poughkeepsie when he finished a close second to Peruna in two heats in 2:06 $\frac{3}{4}$. Great is the family of Bertha.

It is said that Dan Mahoney of White Plains, New York, sold Deloree, winner of the Blue Hill Stake, for \$18,500 a week before the race. Mahoney bought her for \$500.

The Tulare Fair Association will hold a fair and race meeting at Tulare from the 16th to the 21st of October. The purses will be \$400 and \$500, with entrance five per cent. The track, which is a fast one, will be in first class condition. Secretary Ingwersen announces that the program will be ready for publication about the first of September. For any information or particulars address him at Tulare.

In the published lists of three year olds on which starting payment was made in the Harness Stallion Stake to be trotted at the State Fair this year, the name of Thos. Smith's filly Vallejo Girl has been inadvertently omitted. Mr. Smith's filly had all the payments made on her and will start in the race.

Will Durfee, who looked over the new State Fair track at Sacramento last Monday, said: "The condition of the track is excellent. The width, the soil and the grading are all that could be desired, and I believe it will be very fast. In my opinion it is the best laid track in California, which is saying a good deal. The stable accommodations are such as to delight the heart of every careful trainer and owner."

The Tulare race track and grounds are offered for sale for \$7000. There is a fast mile track, 60 box stalls, 300 feet of open stalls, a 3000 gallon tank with engine and pump complete. The grand stand will seat 2000 people. There is a six room cottage on the grounds also. Ten acres are in alfalfa and the place can be made to pay a handsome profit on the investment. The price asked for the entire plant is only \$7000. As there are 90 acres of land this is a rare bargain. If you are interested write to the Breeder and Sportsman for terms.

Winfield Stratton, son of Chas. Derby's brother, Saraway, has reduced his record a half second and it is now 2:05 $\frac{1}{4}$.

The three quarter mile track at Davisville, Yolo county, is not yet completed, but will be before the 1906 training season opens. The new track was laid out in an old vineyard and a great deal of work is required to put it in shape. The survey was made, the old vines pulled up, and the track graded, but it has been decided to defer the working of the surface into shape until after the fall rains. A number of trainers have signified their intention of locating there when the track is finished and stalls built.

Adam G. and Charley T. are both entered for the 2:15 class trot which is down for decision on the opening day of the State Fair. Those who saw the spilt heat fast race at Santa Rosa on the opening day in the race where these two were contenders will not be surprised to see another just such race when they meet at the new Sacramento track.

Palmer Clark says there is a prevalent opinion, on account of her name, that The Broncho is not well bred, but the opinion is all wrong. She was bred by her present owner, R. D. Adams, Dixon, Ill., and is now seven years old. Her sire, Stormcliff, was by Wycliffe and he by George Wilkes, out of a Mambrino Patchen mare. Stormcliff's dam was Happy Princess, record 2:23, by Happy Medium and out of a great brood mare by a son of George M. Patchen, while the dam of The Broncho was also by a grandson of George M. Patchen. Her grandam was by Lakeland Abdallah, a full brother to Harold, sire of Maud S. She got her name through her unruly disposition when she was broken, and that she should have proved such a speedy and ideal mannered mare is certainly greatly to the credit of her trainer and driver, Charles Dean.

The 2:09 class pace on the opening day of the California State fair should prove a great contest. Zolock is not in this race, but there is a great bunch of fast ones. Those entered are Daedalion 2:10, Nellie R. 2:10, Miss Idaho 2:10 $\frac{1}{2}$, Nance O'Neill 2:09 $\frac{3}{4}$, Alone 2:09 $\frac{3}{4}$, Vision 2:09 $\frac{1}{4}$, Jonesa Basler 2:11 $\frac{1}{4}$, Kelly Briggs 2:09 $\frac{1}{4}$, Tidal Wave 2:09, Rita H. 2:11 $\frac{1}{4}$, Le Roi 2:10 $\frac{1}{4}$, and Hassalo 2:11.

Arroyo Grande, in San Luis Obispo county, is arranging for a race meeting to take place in November. The meeting will probably extend over three days. Many local horses are being prepared for the events.

Washington Park, Chicago, where the amateur cup races are to be held this year, is a very slow track for trotters and fast time need not be expected. Major Delmar and Lou Dillon will both go exhibition miles, but will not come within seconds of their records owing to the soft track which, while ideal for runners, is not suited for harness horses.

Mr. J. B. Iverson of Salinas, breeder and owner of North Star 2:13 $\frac{1}{2}$, has not been a very extensive breeder, but so far as quality is concerned he has made a commendable showing. Among the record horses bred by him are Dictatress 2:08 $\frac{3}{4}$, North Star (3) 2:13 $\frac{1}{2}$, Princess 2:13 $\frac{3}{4}$, Prince Gift 2:12, Diabilla 2:15 $\frac{1}{4}$, the first and last named being pacers, the others all trotters. Mr. Iverson has bred many others with records, but the above are a few which we recall from memory.

The death of Gen. A. W. Barrett of Los Angeles was announced last week. Gen. Barrett was at one time a Director of the California State Agricultural Society and often acted as one of the judges during the races held at the annual State Fair. He was also Bank Commissioner under Governor Budd. He rendered brilliant service in the army during the Civil War, and was honorably discharged in 1865. Gen. Barrett was held in great esteem by all who knew him.

S. E. Kent of Los Angeles should have the honor of making a new 2:10 performer this year. He drove Bonnie Ailsie to her record of 2:08 $\frac{1}{2}$ at the Los Angeles meeting in July.

Los Angeles and Sonoma counties were both benefited by an exchange of horses that was effected at Santa Rosa last week during the Breeders' meeting. Frank S. Turner, lessee of the Santa Rosa Stock Farm, sold two splendidly bred Sidney Dillon two-year-olds to Mrs. L. J. H. Hastings of Los Angeles, and purchased from that lady the well bred stallion Sky Pointer Jr., son of Sky Pointer and Juliet D. 2:13 $\frac{1}{2}$ by McKinney. The Sidney Dillon youngsters secured by Mrs. Hastings were Judge Dillon, a grand looking two-year-old colt whose dam is that great brood mare Eveline, dam of Ole 2:10 $\frac{1}{4}$, Roblet 2:12, Tictam 2:19, etc., by Nutwood, and Rapidan Dillon, that is out of the famous \$10,000 mare By By by Nutwood. By By is the dam of Morengo King that worked a mile in 2:13 $\frac{1}{4}$ and of L. W. Russell, sire of live or six in the list. It is stated that Sky Pointer Jr. was traded even for Rapidan Dillon, and that Mrs. Hastings paid \$2500 for the colt Judge Dillon.

It is said that no less than one thousand horses and mules are at work on the Moulton levee in Colusa county at the present time. This levee, when completed, will reclaim thousands of acres of rich land, and protect many thousand more from overflow from the waters of the Sacramento River during the rainy seasons.

When praising the colt that won the Breeders' Futurity for three-year-olds, trotting two heats in 2:13 $\frac{1}{2}$, don't forget to say a good word or two for Athasham, Mr. George Warlow's good colt by Athadon, that was a good second in both those heats. Athasham trotted better than 2:15 twice in the race.

A small boy and his father were on the special returning from Santa Rosa last Saturday evening. The "kid" after looking out the window for a long time, gazing at the heavens, said, "Say, pop, how does the north star stay in the same place all the time." Pater familias looked at his hopeful with a look of disgust for a moment, and tearing up a bunch of tickets on Bellemont he had taken from his pocket, replied, "Because he's too damn fast for the others to get up to him."

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

Coming Events.

Rod.

April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.
April 1-Sept. 15—Closed season for lobsters and crawfish.
April 1-Nov. 1—Trout season open.
June 1-Jan. 1—Open season for black bass.
Aug. 26—Saturday Fly-Casting Contest No. 10. Stow lake, 2:30 p. m.
Aug. 27—Sunday Fly Casting Contest No. 10. Stow lake, 10 a. m.
Sept. 10-Oct. 16—Close season in tidewater for steelhead.
Sept. 10-Oct. 16—Close season for catching salmon.
Oct. 16-Nov. 15—Close season for taking salmon above tide water.
Nov. 1-Sept. 1—Open season for crabs.
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

Feb. 15-Sept. 1—Closed season for mountain quail, grouse and sage hen.
Feb. 15-Oct. 15—Closed season for quail, ducks, etc.
April 1-Oct. 15—Closed season for English snipe.
July 1-Feb. 15—Dove season open.
Aug 1-Oct. 15—Deer season open.
Aug. —Sebastopol Gun Club. Blue rocks. Every Sunday.
Aug. —Napa Gun Club. Blue rocks. Every Sunday.
Aug. 20—Petaluma Gun Club. Blue rocks. Kenilworth Park.
Aug. 20—Mount View Gun Club. Blue rocks. Mount View, Cal.
Aug. 27—California Wing Club. Live pigeons. Ingleside.
Aug. 27—Santa Rosa Gun Club. Blue rocks.
Aug. 27—Vallejo Gun Club. Blue rocks. Floden Station.
Aug. 27—Millwood Gun Club. Blue rocks. Mill Valley Junction.
Aug. 27—Lincoln Gun Club. Live birds. Reclamation Station.
Aug. 29 30—Interstate Association tournament. Blue rocks. Denver, Col.
Sept. 3—Golden Gate Gun Club. Blue rocks. Ingleside.
Sept. 3—Blue Rock Gun Club. High-street grounds, Alameda.
Sept. 9, 10—Empire Gun Club. Merchandise shoot. Blue rocks Alameda Junction.
Sept. 15, 16, 17—Interstate shoot. Blue rocks. Ingleside. Elmer E. Shaner, Manager. Pacific Coast Handicap under auspices of S. F. Trapshooting Ass'n., A. M. Shields, Secretary.
Sept. 17—Union Gun Club. Blue rocks. Ingleside.
Sept. 30-Oct. 1—Two-day blue rock tournament. Biggs Gun Club. Biggs, Butte county. H. Haselbusch, manager.
Oct. 1—Pacific Coast Trap Shooters' Association. Merchandise shoot. Blue rocks. Empire Club grounds, Alameda Junction.

Bench Shows.

Aug. 15, 18—Orange County Agricultural Society. Middletown, N. Y. D. A. Morrison, Secretary.
Aug. 18 19—Lynn Kennel Club. Point of Pines, Revere, Mass. W. H. Ximenes, Secretary.
Aug. 23, 25—Rockland County Industrial Association. Bench show in New York City, N. Y. A. A. Vanderbilt, Secretary.
Sept. 4—Long Island Kennel Club. Brighton Beach, L. I. Jos. M. Dale, Secretary.
Sept. 4—Rhode Island Kennel Club. Crescent Park, East Providence, R. I. H. M. French, Secretary.
Sept. 4, 5—Miller's River Kennel Club. Athol Mass. Wm. W. Sutton, Secretary.
Sept. 9—San Mateo Kennel Club. 2nd annual open air show. Burlingame. D. J. Sinclair, Secretary.
Sept. 9—Cedarhurst Kennel Club. Lawrence, L. I. John G. Bates, Secretary.
Sept. 11, 13—Newport Dog Show. Newport, R. I. Francis M. Ware, Secretary.
Sept. 16—Englewood Kennel Club. Englewood, N. J. M. W. Robinson, Secretary.
Sept. 18, 21—Genesee County Agricultural Society Kennel Club. Batavia, N. Y. A. E. Brown, Secretary.
Sept. 23—Madison Athletic Association. Madison, N. J. E. L. Jones, Secretary.
Sept. 25, 26—Miami Valley Kennel Club. Piqua, Ohio. Edwin A. Hiatt, Secretary.
Sept. 27, 28—Valley Fair Kennel Club. Brattleboro, Vt. Howard C. Rice, Secretary.
Sept. 30—Bryn Mawr Kennel Club. Haverford, Pa. Henry D. Riley, Secretary.
Oct. 3, 6—Texas Kennel Club. Dallas, Tex. W. H. Ordway, Secretary.
Oct. 3, 6—Danbury Agricultural Society, Danbury, Conn. G. M. Rundle, Secretary. Jas. Mortimer, Superintendent.
Oct. 11, 14—Spokane Kennel Club. Spokane, Wash. A. B. Jackson, Secretary.
Oct. 17, 20—Frederick Agricultural Society. Frederick, Md. J. Roger McSherry, Secretary.
Sept. 28, 29, 30—Stockton Kennel Club. F. A. Gelsea, Secretary, Stockton, Cal. D. J. Sinclair, Superintendent.
Nov. 15, 18—Boston Terrier Club Specialty Club. Boston. F. H. Osgood, Secretary.
Nov. 28-Dec. 1—Philadelphia Dog Show Association. Philadelphia. J. Sergeant Price Jr., Secretary.

1906.

Feb. 12, 15—Westminster Kennel Club. New York. Robt. V. McKim, Secretary.
Feb. 20, 23—New England Kennel Club. Boston. Wm. B. Emery, Secretary.
Feb. 28-March 3—Washington Kennel Club. Washington, Pa. F. C. Thomas, Secretary.
March 7, 10—Duquesne Kennel Club. Pittsburg, Pa. F. S. Steadman, Secretary.

Field Trials.

Aug. 15—Iowa Field Trial Club. Geo. C. Cooper, Secretary, P. O. Box 55, Des Moines, Ia.
Aug. 23—North Dakota Field Trial Club. Inaugural trials Grand Forks. N. D. A. E. Palmer, Secretary. Grand Forks, N. D.
Sept. 4—Nebraska Field Trial Association 4th annual trials. O'Neill, Neb. H. H. McCarthy, Secretary. O'Neill, Neb.
Sept. 6—Manitoba Field Trial Club, 19th annual trials. La Salle Man. Eric Hamber, Secretary Winnipeg Man.
Sept. 11—Northwestern Field Trial Association. Inaugural trials. O'Neill, Neb. C. W. Rutledge, Secretary, Kansas City, Mo.
Sept. 21—British Columbia Field Trial Club, 3d annual trials. Ladner B. C. H. S. Rolston, Secretary. Vancouver B. C.
Oct. 12—Pacific Northwest Field Trial Club. La Conner Flats, Wash. Chas. L. Lundv. Secretary. Seattle, Wash.
Oct. 23—Ohio Field Trial Association. Washington Court House, O. C. T. Phillips, Secretary. Columbus O.
Oct. 30—American Field Futurity Stake. For Pointers and Setters whelped on or after January 1, 1904 whose dams have been duly qualified. Robinson, Ill., entries closed July 1. Address Am. Field Publishing Co., Chicago.
Oct. 31—Connecticut Field Trial Club. Hampton, Conn. F. M. Chapin, Secretary, Pine Meadow, Conn.

Nov. 6—Independent Field Trial Association. Huntsville Ill. S. H. Soewell, Secretary, Indianapolis, Ind.
Nov. 8—Dayton Pointer Club. Dayton, O. John Roehm, Secretary. Dayton, O.
Nov. 13—Illinois Field Trial Association. Robinson, Ill. Wm. R. Green, Secretary, Marshall, Ill.
Nov. —Indiana Field Trial Club, (Week following Illinois Champion Stake) C. F. Young, Secretary, Clay City, Ind.
Nov. 21—International Field Trial Club. Ruthven, Ont. W. B. Wells, Honorary Secretary, Chatham, Ont.
Nov. 28—Virginia Field Trial Association. Martinsville, Va. Chas. B. Cooke, Secretary, Richmond, Va.
Dec. 2—Continental Field Trial Club, 11th annual trials, John White, Secretary, Hempstead, Long Island.
Dec. —Pointer Club of America (following the Continental trials). Barber, N. C. C. F. Lewis, Secretary, 126 Malden Lane, New York.
Dec. 12—Eastern Field Trial Club. Waynesboro, Ga. S. C. Bradley, Secretary, Fairfield, Conn.

1906.

Jan. 8—Georgia Field Trial Association. Waynesboro, Ga. P. M. Essig, Secretary, Atlanta, Ga.
Jan. —Pacific Coast Field Trials Club, 23d annual trials Bakersfield, Cal. Albert Betz, Secretary, 201 Parrott Bldg., San Francisco.

AT THE TRAPS.

The California Wing Club, it has been decided, will close the live bird season with the final club shoot tomorrow at Ingleside. The race will be at 20 pigeons—making 100 birds for each member to shoot at the seven regular shoots for 1905. A purse amounting to \$150 will be divided among the high guns. The money division has generally been one money for each three entries.

The Lincoln Gun Club live bird shoot and outing at Reclamation tomorrow promises to draw a big attendance of shooters. The club in its day was a popular organization, until it was absorbed by the Golden Gate Gun Club. Edgar L. Foster will act as Captain of the day.

The Empire Gun Club merchandise shoot on September 9th and 10th will be a "corker." The program of events will be practically the same as at the shoot last year. A large and varied list of prizes has been donated by friends of the club. President James P. Sweeney and Secretary J. B. Hauer are to be congratulated on the auspicious outlook for a big shoot. The general committee is composed of Edgar Forster, Golden Gate Club; H. Rickleson of the Blue Rock Gun Club; Robert Van Norden of the Millwood Gun Club; J. P. Sweeney, Empire Gun Club; J. W. Jeffreys of the Antler Gun Club; J. W. Elias of the Vallejo Gun Club; F. W. Hesse Jr. of the Santa Rosa Gun Club; William Hansen of the Hercules Gun Club; W. Sink of the St. Helena Gun Club; Dr. A. M. Barker of the San Jose Gun Club; Charles Reams of the Napa Gun Club, and C. F. Whalen of the Mountain View Gun Club.

The Santa Rosa Gun Club shoot on the 13th inst. was not as well attended as usual. The result of the medal shoot was in favor of Slusser, the score being: Morrow, 18 yards, 28 targets shot at, broke 15; Slusser, 20, 25—19; Resse, 20, 25—17; Mead, 18, 28—10. The absent members will shoot off the match later.

The tie of the last shoot for the Laffin & Rand cup between Mead and Guiltan was shot off at 15 targets and was won by the former by a score of 11 to 10. The shoot for the cup Sunday left Hesse in the lead, the score being: Mead, 16 yards, 29 targets shot at, broke 18; Slusser, 18, 25—20; Guiltan, 18, 28—15; Morrow, 16, 28—17; Hesse, 16, 26—23. Other members will shoot off the match later.

Sixty targets was the allotment for each member of the Petaluma Gun Club who competed in the club program on the 13th inst. This shoot was the second of the club prize series. J. Lopus is high gun in this race at present.

Following are the scores of those who have already completed their 60 target allowance: J. Lopus 50, P. L. Murphy 47, T. Mego 46, F. Carter, 45, Summerfield 45, J. Steiger 43, E. E. Drees 41, Dr. W. Hall 41, Joe Clark 35.

A large delegation of members of the Eureka Gun Club August 13th responded to the invitation of the Trinidad Gun Club and were royally entertained through the day by the trapshooters of the old Klamath county seat by the sea. The day was passed with shooting, feasting, a little more shooting and a little more feasting. The menu, of course, included the clams and mussels for which the ocean beach in the vicinity of Trinidad is famous, but there were many other good things supplied for the delectation of the visiting Eurekians. The shooting between teams from the two clubs was one of the interesting features of the day. Each year the Eureka shooters pay a visit to Trinidad and the trip is ever anticipated with pleasure.

The Pacific Coast Trap Shooters' Association announce an open to all merchandise prize shoot for Sunday, October 1st, on the Empire Club grounds, Alameda Junction.

Trap shooters of the Coast are looking forward to the Interstate shoot as the coming great event in the annals of sport on the Pacific Coast.
Los Angeles shooters, and there are some cracks

down south, are getting ready for the blue rock foray. Ten past masters of the modern art of saucer smashing, who are to represent the Los Angeles Gun Club at the big interstate shoot in San Francisco next month have been assiduously practicing at the Sherman grounds.

One by one the scatter-gunners have come forward until from two or three, the club is now assured of two full squads at the blue-ribbon event of the year in trap-shooting circles. Ten of the best shots in Southern California will turn loose on the firing line for some of that \$1500 added money which Elmer Shaner and his associates have succeeded in getting together out of the Interstate Association.

Charles Van Valkenburg, Guy Lovelace, C. D. Hagerman, R. H. Bungay, S. R. Smith, Fred Gilbert, J. F. Gibson, Gus Knight, Jr., C. L. Julian of San Diego, Hip Justins and H. P. Densel are already in line with a prospect of A. W. Bruner and some others of the former greats stepping to the score when the proper time comes.

In all probability some sort of Pacific Coast trap shooters' association will be formed at the big shoot, as representatives of all the big gun clubs from San Diego to Seattle will be hobnobbing with each other in one big sportsman's reunion. There has long been felt a need for something of the sort.

The Los Angeles Gun Club has received its Dickey Bird trap, and will have the new machine installed as an aid to the Leggett.

The aim of the Interstate Association, an organization that was formed and incorporated for the encouragement of trap shooting, in giving tournaments is to foster a sport that is deservedly popular; to bring together experts, semi-experts and novices; to safeguard the interests of both and to illustrate how a large trap shooting event should be run.

In this laudable interest for trap shooting at large the association has accomplished much. Seven big tournaments have been successfully run so far this season. Next week the Interstate shoot at Colorado Springs will take place, shortly followed by the Ingleside tournament, which will complete the itinerary for the year.

The magnitude of the work accomplished and contemplated is shown in the following list of shoots of the Interstate Association for the season's circuit of 1905:

Augusta, Ga., April 5 and 6. Under auspices of the Augusta Gun Club.

Hopkinsville, Ky., April 26 and 27. Under auspices of the Hopkinsville Gun Club.

Owensboro, Ky., May 17 and 18. Under auspices of the Daviess County Gun Club.

Sixth Grand American Handicap at Targets, June 27 to 30. Under auspices of the Interstate Association.

Menominee, Mich., July 12 and 13. Under auspices of the Menominee Gun Club.

Albert Lea, Minn., August 2, 3 and 4. Under auspices of the O. K. Gun Club.

Kansas City, Mo., August 16, 17 and 18. Under auspices of the O. K. Gun Club.

Colorado Springs, Colo., August 29, 30 and 31. Under auspices of the Colorado Springs Gun Club.

San Francisco, Cal., September 15, 16 and 17. Pacific Coast Handicap at targets, under auspices of the San Francisco Trap Shooting Association.

Communications relating to tournaments should be sent to Elmer E. Shaner, secretary-manager, 219 Coltart square, Pittsburg, Pa.

Following the Interstate Association's shoot at Colorado Springs, comes the Grand Western Handicap at Trinidad, Colo., Sept. 4, 5 and 6. For the first and second days at the latter shoot there is scheduled a daily program of 200 targets, full entrance \$20, with \$200 in added money. Everybody will shoot from 16 yards. For high professional average each day \$20 in cash will be given. For high amateur \$20, for second high \$10. This average, of course, is based on the full 200-target program; money divided in case of ties.

On the final day a free-for-all handicap of 100 targets is scheduled, entrance \$10, \$100 added. Six moneys, 10, 8, 7, 6, 5 and 4. To the winner a trophy worth \$65 will be given. Event two is at 100 targets, entrance \$10. This is the Denver Post trophy event and carries \$150 in added money. Club traps and "blackbirds" will be used. Frank B. Cunningham of St. Joseph, Mo., will be identified with the management of the shoot and the Trinidad membership promises "fair field and no favor" to all. This tournament deserves well at the hands of the territorial shooting fraternity and no doubt the expectation of the managing club will be realized.

That there is a decided boom in Coast trap shooting has been strongly in evidence this season. The big tournaments at Ingleside, Los Angeles, San Diego, Sacramento, Gridley, Portland, Vancouver, B. C., and many smaller, but none the less enthusiastic shoots, at many other points in California, Washington and Oregon, have started what will probably be a lively trap season all round for next year.

The Medford Gun Club announces a two day tournament for September 22nd and 23rd. It is expected that a number of shooters attending at Ingleside will journey to Oregon to join issue with the northern shooters.

Ten events are scheduled for each day; entrance for each day \$20, added money for each day \$225. The opening race each day is at 15 targets, two special open-to-all events at 25 targets, and the balance at 20 targets.

Added money \$450, general average for men shooters, \$100; for lady shooters, \$50; total \$600. The purse division will be 30, 25, 15, 15 and 15 per cent.

The grounds will be open for practice two days before the tournament. There will be three sets of traps, Sergeant system, and one extra set for novelty shooting. Targets will cost 3 cents. All shooting will be in squads, rapid fire, 16 yards rise. Professionals and manufacturers' agents will shoot for targets only, except in special events 6 and 16, nor can the trade representatives compete for general average moneys.

It is announced that all shooters who can come a few days prior to the shoot, or who may remain over, will be taken, if it is so wished, for fishing trips to the Rogue river, the most famous trout river on the Coast. This in itself is a strong inducement to bring shooters to Medford.

Oregon hospitality and good fellowship is extended sportsmen in the following congenial greeting: "We trust our program will please you and hope to see as many lovers of trap shooting as possibly can attend. Try and strain a point and be with us, and we will assure you a good time, besides giving you a well manager shoot."

For further particulars write or wire J. E. Enyart, Medford, Oregon.

The usual strong turnout of shooters was present at the Union Gun Club shoot at Ingleside on the 20th inst. In the club match every shooter in the first class was in the money division. Otto Feudner, who has been shooting up to his former gait, was high gun in the class. Every man, excepting Murdock, cut in on the first class purse, Daniels being the high gun. Three of four shooters in the second class received the best money awards in the match. Jacobsen shot into first place. Harvey Schneider, Woods Jr., Dr. Finnie and Leary were the winners, in the order given, among the third class contestants.

The medal race brought a series of well fought contests in each of the four classes of shooters. Otto Feudner scored a straight and won the monthly medal hung up for the champions. Dr. Pitres (18 yards) tied Murdock for the first class medal and won out in the shoot off. Shields won the second class medal for the second time; he stood at the 18 yard peg. Schneider annexed the third class medal. It will be noticed in going over the scores of the race that most of the previous winners evidently found the 18 and 20 yard handicap a bit too strong to maintain their supremacy. This is what gives the medal shoot an added charm—the prizes are evidently not mortgaged to any individual shooters.

The mixed race, at singles and doubles, was won by Haight and Schneider; Wilson, O. Feudner, Jacobsen, Swales were also in the money.

The Phil E. Beakeart challenge cup race brought out four contestants, Otto Feudner winning the shoot in a score of 91 out of 100 targets. Daniels and Schultz also competed. The scores made in the three club events follow:

Club match, members only, 25 targets, \$40 added (\$10 for each class, Rose system, 5-3-2), 16 yards:

Champion class—M. O. Feudner 22, M. J. Iverson 22, F. Feudner 21, E. Holling 21, E. L. Forster 20, C. A. Haight 20, G. Sylvester 20.

First class—D. Daniels 22, T. L. Lewis 20, Dr. Pitres 20, H. D. Swales 20, W. A. Searles 20, Lon Hawkhurst 19, "Slade" 19.

Second class—H. P. Jacobsen 21, Jos. Burns 20, A. M. Shields 18, F. Knick 17.

Third class—C. F. Harvey 20, W. Schneider 18, F. N. Woods Jr. 18, Dr. Finnie 16, Scott Leary 16, Geo. Barber 13, B. Patrick 12, J. L. Dutton 12, Dr. Bodkin 7, W. Schroeder 7.

Medal match, members only, 25 targets, 16 yards (previous winners 18 and 20 yards):

Champion class—Otto Feudner 25, Holling 24, Forster 20 yards) 21, Haight 19, Iverson 19, Sylvester 17, Fred Feudner 23.

First class—Murdock 20, Dr. Pitres (18 yards) 20, Daniels (20 yards) 19, Swales 19, Lewis 18, "Slade" 18, Searles (18 yards) 14.

Second class—Shields (18 yards) 22, Jacobsen 18, Knick (18 yards) 13, Burns 11.

Third class—W. Schneider 20, Harvey 18, Patrick (18 yards) 17, Leary (18 yards) 16, Woods Jr. (18 yards) 14, Barber 12, Dutton 11, Schroeder 11, Dr. Bodkin 7.

Added money event, 15 singles, 16 yards; 5 pairs, 14 yards; class shooting, \$5 added, 50, 30, 20 per cent, open to all: Haight broke 8 at doubles, 15 singles—23; Schneider 6-14-23, "Wilson" 7-15-22, O. Feudner 9-13-22, Jacobsen 8-13-21, Swales 7-13-21, Sylvester 7-13-20, Dr. Pitres 8-12-20, Iverson 8-11-19, Holling 6-13-19, Ed Schultz 7-11-18, Hawkhurst 5-11-18, Schnipper 6-12-18, Schneider 6-11-17, "Slade" 4-12-16, Knick 2-14-16, Searles 4-12-16, F. Feudner 4-11-15, Burns 3-8-11.

May They Be Less.

It has been noticed this summer that not as many "greenhorns" are sallying forth into the mountains armed with the latest design of high-powered 33, 35 or 40 caliber smokeless rifles that will shoot one or two miles and kill what they hit. This class never does much damage to the deer, but they usually manage to get somebody's cow, or even worse, make a mistake and plug an unfortunate brother hunter. Some riflemen vowed that if the exodus of amateurs this year was up to that of last, they would buy red caps and hunt in nothing else, whether the deer liked the gory headpieces or not. "Better to lose a chance shot at some buck than your life," is the way one man put it.

Dove hunting in the vicinity of Merced is reported good, birds are plentiful and limit bags are in vogue.

Jackson's Napa Soda does not tangle the feet

INITIAL COAST INTERSTATE ASSOCIATION TOURNAMENT.

The Interstate Association program for the initial Coast tournament next month is the following:

First day, September 15th.

Event No. 1—15 targets, \$40 added, entrance \$1.50.
Event No. 2—15 targets, \$40 added, entrance \$1.50.
Event No. 3—20 targets, \$60 added, entrance \$2.
Event No. 4—15 targets, \$40 added, entrance \$1.50.
Event No. 5—15 targets, \$40 added, entrance \$1.50.
Event No. 6—20 targets, \$60 added, entrance \$2.
Event No. 7—15 targets, \$40 added, entrance \$1.50.
Event No. 8—15 targets, \$40 added, entrance \$1.50.
Event No. 9—20 targets, \$60 added, entrance \$2.

All events at unknown angles. No handicaps. Manufacturers' agents, paid representatives, etc., may shoot in the above and all succeeding events for targets only.

Second day, September 16th.

Event No. 1—15 targets, \$40 added, entrance \$1.50.
Event No. 2—15 targets, \$40 added, entrance \$1.50.
Event No. 3—20 targets, \$60 added, entrance \$2.

Event No. 4—Preliminary handicap, open to amateurs only. 100 targets, unknown angles, \$7 entrance—targets included, handicaps 14 to 22 yards, high guns—not class shooting, \$250 added to the purse. The number of moneys into which the purse will be divided will be determined by the number of entries received. In addition to first money, the winner will receive a trophy, presented by the Interstate Association.

Regular entries must be made at the cashier's office before 6 p. m., September 15th. Penalty entries may be made after September 15th, up to the commencement of the event, by paying \$10 entrance—targets included. Entries are not transferable and entrance money cannot be withdrawn after handicaps have been allotted.

Third day, September 17th.

Event No. 1—15 targets, \$40 added, entrance \$1.50.
Event No. 2—15 targets, \$40 added, entrance \$1.50.
Event No. 3—20 targets, \$60 added, entrance \$2.

Event No. 4—Pacific Coast handicap at targets, open to amateurs only. 100 targets, unknown angles, \$10 entrance—targets included, handicaps 14 to 22 yards, high guns—not class shooting, \$400 added to the purse. The number of moneys into which the purse will be divided will be determined by the number of entries received. In addition to first money the winner will receive a trophy, presented by the Interstate Association.

Regular entries must be made at the cashier's office before 6 p. m., September 16th. Penalty entries may be made after September 16th, up to the commencement of the event, by paying \$15 entrance—targets included. Entries are not transferable, and entrance money cannot be withdrawn after handicaps have been allotted.

The division of moneys in the Preliminary Handicap and Pacific Coast Handicap will be awarded high guns—two places are created for each ten entries, or fraction thereof, up to 250 entries.

Shooters will be handicapped in distance, 14 to 22 yards.

The purses in all events except the two handicaps will be divided according to the Rose system at ratio of 9-5-2 for 15-target events, and at a ratio of 12-9-5 for 20-target events.

In the handicap events ties that are shot off will be at 20 targets per man, and the original distances contestants stand at will govern.

The handicap committee is composed of M. J. Iverson, San Francisco; W. H. Varlen, Pacific Grove; M. Abrahams, Portland; Guy Lovelace, Los Angeles, and F. K. McBroom, Spokane. The committee will meet at the Palace Hotel on the evenings of September 15th and 16th to award handicaps for the Preliminary and the Coast Handicaps respectively.

The grounds will be open for practice and sweepstakes on the afternoon of September 14th. Practice targets will cost 2 cents each. The price of targets during the tournament will be 2½ cents. "Shooting names" will not be countenanced. Shooting "for targets only" is open to manufacturers' agents solely; all other contestants must make entry for the purses.

There will be no practice shooting allowed, or preliminary events shot, prior to the commencing of the regular events scheduled for the day. Contestants are requested to make entries for the entire program each day. Money will be refunded in all uncontested events, except the two handicaps, and the contestant has but to notify the cashier of his intention to withdraw.

In case entries are so numerous that events cannot be finished until late any day—thus keeping the compiler of scores back with his work—a branch of both the cashier's and compiler of scores' offices will be opened that night in the Palace Hotel, where winners of money can secure the amounts due them or they can obtain same at the shooting grounds the next day.

The Interstate Association and the San Francisco Trap Shooting Association adds \$1,500, of which amount \$150 is reserved to purchase trophies—\$100 for a trophy for the winner of first money in the Pacific Coast Handicap, and \$50 for a trophy for the winner of first money in the Preliminary Handicap.

Guns, ammunition, etc., forwarded by express must be prepaid and sent to one of the following sporting goods houses: Clabrough, Golcher & Co., 538 Market street, San Francisco, Cal.; Shreve & Barber Co., 739 Market street, San Francisco, Cal.; Olympic Arms Co., 801 Market street, San Francisco, Cal. Mark your own name on the box that goods are shipped in and it will be delivered to the shooting grounds free of charge.

The Interstate Association will have its headquarters at the Palace Hotel, one of the largest and best equipped hotels in the world. Sportsmen can also secure accommodations at the Grand Hotel adjoining and which is operated under the same management.

No expense will be spared to make the tournament run smoothly. The most expert and competent help will be secured, and the office force will be large and capable. Special attention is called to the schedule of events arranged for each day. The conditions of the handicap events merit—and will, of course, receive—more careful study than usual.

Further information relative to the tournament will be cheerfully furnished by A. M. Shields, Secretary, San Francisco Trap Shooting Association, Crocker building, San Francisco, Cal., or by Elmer E. Shaner, Secretary-Manager, The Interstate Association, 219 Coltart Square, Pittsburg, Pa.

During the tournament it is proposed to have a team race for a valuable trophy—practically the East against the West. As many teams as wish to enter can go into the contest. Throughout the tournament targets will be thrown about 50 yards. The shooting will commence at 9 a. m. sharp each day.

The County Game Law Decision.

For the benefit of sportsmen, generally, Judge M. T. Allen, who recently wrote the decision of the Appellate Court at Los Angeles on the county game law case, consented last week, in an interview, to explain it, and clear up some of the present muddle.

The decision is very generally misunderstood, both in Los Angeles county and elsewhere.

Judge Allen states that the various dove ordinances of all the counties of the southern district were knocked out by the court on the ground of unreasonableness, only two of the judges concurring that they were unconstitutional. Three are necessary before a law can be rendered invalid, and Judge Smith, while concurring with his fellow-judges upon the unreasonableness of the law, did not pass upon the constitutionality phase of the case.

It will be remembered Henry T. Gage "buted in" on the proceedings at the eleventh hour, as a friend of the court, "amicus curiae," to use a legal term, and introduced the element of reasonableness into the controversy—an element which the sportsmen and other interests who were testing the law most desired kept out of the issue. They wished to settle once for all the status of the detested county laws. This new element in the argument made possible a sort of compromise settlement.

As to the deer law and other county ordinances, Judge Allen would not care to express an opinion, other than another test case upon some ordinance which was conceded to be not unreasonable would be needed to completely clear the situation.

The dove law, however, is held by that decision to be invalid, and not only Los Angeles, but every other county in the southern district at least, if not throughout the state, is bound by it. In other words, the State dove law alone governs Southern California.

As to deer, and other game, there may be some question. Judge Allen and Judge Gray concurred in adjudging the county ordinances unconstitutional; what ruling Judge Smith would make on the matter can only be told by another case, as he neither in public nor in private has expressed an opinion.

It is too bad that the matter could not have been adjudicated fully and to everybody's satisfaction in the case referred to. It is the opinion of well informed attorneys that the county ordinances are all in the same boat and incapable of enforcement, but some of them are still on the books, and convictions probably could be had under them if they were not fought vigorously.

The case is now before the Supreme Court, for final adjudication.

Dove Shooting in Fresno County.

The bang, bang of shotguns sounded the death knell for many a dove in Fresno county on the 15th inst. Similar bang, bangs had been sounding similar death knells for several days prior because a number of local sportsmen had seen in the newspapers that the Appellate Court of this State sitting in Los Angeles had decided that where county and State game laws were in conflict with the State law was to have precedent and should be followed.

The State law allows the killing of the cooing dove after July 15th. Fresno county desired that the doves thereabouts should continue living undisturbed by fine shot until August 15th, and so the county law was made to read that dealing death to doves before that date should be classed as a misdemeanor.

However, that date was in reality the opening of the dove season in Fresno county and many local sportsmen were out in the early morning and the late evening bagging the dove as their skill with the gun and their luck at finding the bird permitted. All of those who were out reported dove plentiful. Among those who got the limit were Charles Burleigh, Fred Nanec, James Cronkhite and Ed Hamilton.

Truckee River Pollution.

The paper mill at Floriston, on the Truckee river, in Nevada State, has been anathemized by anglers who have fished that section of the river. The refuse from the mill, it has been claimed, was not only deleterious to fish life, but as a pollution of drinking water it became consequently a menace to health, for the city of Reno depends upon the Truckee river for its water supply.

Anglers, for one class, and particularly the large body of sportsmen who are wont to enjoy trout fishing in the Truckee, below Floriston, will be pleased to hear that legal action has been brought by the State of Nevada to restrain the Floriston Pulp and Paper Company from running or dumping the alleged fouling matter into the river. An imposing array of legal talent is lined up on both sides in the suit and a hard fought battle is looked for.

TUNA FISHING IS EXCITING.

During the past winter a tourist started up a conversation on the beach at Avalon with a bronzed man in a brown homespun suit who seemed to know all the boatmen. During the course of conversation the bronzed man vouchsafed the information that his name was Manning—Thomas S. Manning of Philadelphia.

"My home is in Philadelphia, too," said the tourist. "How long have you been here?"

"Three years," replied Mr. Manning. "I came out here three years ago for the tuna fishing, and I've been here ever since."

"How long do you expect to stay?"

The expatriated Philadelphian scratched his head reflectively.

"I really don't know," he said, slowly. "It depends. I may get the record catch this season, and then maybe I'll be satisfied. But I don't know. You can't tell."

And Mr. Manning's attitude is characteristic of the confirmed tuna fisherman. Few of them have the leisure to wait three years, but all have the inclination.

Each spring hundreds of fishermen all over the country turn longing eyes toward Santa Catalina Island, off the Southern California coast. From May 1 to October 1 they arrive from the North, East, South and West—from London, from Paris, from other points of Europe. It is even said that a Russian grand duke will this year join the tuna squad at Catalina if Providence or a bomb doesn't interfere. All the tuna experts of the island have predicted that this will be a good year for the big fish. Col. C. P. Morehouse of Pasadena, Cal., holds the tuna record—251 pounds. He has held the record since 1900.

When the members of the Tuna Club meet for their annual banquet and election of officers at the Hotel Metropole, at Avalon, in June, there is usually such a gathering of piscatorial experts as would make dear old Izaak Walton turn in his grave from sheer excess of envy. Avalon is the only town on the island, and it is from here that the devotees of the sport start out in quest of the gamest fish taken in any waters with rod and reel.

To land a tuna is the ambition of every fisherman who has ever trolled the Catalina waters. It is the easiest thing in the world to hook a tuna on days when they are biting freely, but to land one is quite another matter. Probably not one fish in a hundred that strikes is captured. And then it's a case of new tackle.

But once you have captured a tuna weighing at least 100 pounds—it must be 100 pounds to entitle you to admission into the Tuna Club—you feel like Alexander the Great who wept because there were no more worlds to conquer. Once you catch a tuna it spoils you for any other sort of fishing. Your whole ambition is then centered in catching another and a bigger one.

To realize the true significance of the Tuna Club it must be shown that nowhere except in the waters adjacent to Santa Catalina Island is this prince of fish taken with rod and reel. While this is true, generally speaking, exceptions are the rule at times. This year several tuna were taken in Monterey Bay by net fishermen. They were not very large fish, however, but big enough to play hob with the netting gear. Tuna have been also seen at times in the Santa Barbara channel. Tuna are also caught in the Mediterranean. When they get tangled up in the nets of the fishermen who supply the markets they create such havoc that they are gladly liberated with as little damage as possible. But in the clear waters of the Pacific, in that marvelously clear channel between Catalina Island and San Pedro, on the mainland, they come every summer to disport themselves and to feed upon the flying fish, for which they leap into the air with all the zest of the chase. Although for years they had been caught spasmodically, it was not until 1899 that several devotees of the sport conceived the idea of organizing a club on competitive lines.

The member who caught the largest fish during the season, from May 1 to October 1, was to become president of the club and to receive a medal setting forth that honor. Professor Charles Frederick Holder, the naturalist and author, carried off the prize that year, his fish weighing 183 pounds. The next year Colonel Moorehouse landed his 251-pounder, entitling him to the presidency and establishing a record that has never been broken, a record that every member of the club secretly dreams of some day shattering.

Then the plans of the club broadened, and as the membership increased it was feared that Colonel Moorehouse might hold the presidency indefinitely, so it was decided to hold annual meetings, at which an election of officers should figure. This is now done, and a cup is presented to the member who makes the largest catch of the season.

Since the organization of the club the honors have gone as follows: Season of 1899, Professor Holder, Pasadena, Cal., 183 pounds; season of 1901, Colonel Moorehouse, Pasadena, Cal., 251 pounds; season of 1901, F. S. Schenck, Brooklyn, and F. V. Rider, Avalon, tied at 158 pounds; season of 1902, John E. Sterns, Los Angeles, 197 pounds; season of 1903, H. E. Smith, New York, and B. F. Alden, New York, tied at 94 pounds; season of 1904, General A. W. Barrett, San Francisco, 131 pounds.

The largest fish ever captured by a woman under the rules and regulations of the club was caught in 1900 by Mrs. E. N. Dickerson of New York. It tipped the scales at 216 pounds, but, unfortunately for Mrs. Dickerson, it was during the same season as Colonel Moorehouse's big catch.

The annual tournaments of the club are open to all comers, but the club's rules must be strictly complied with. Rods and reels must be used and rods must not be less than 6 feet 9 inches in length. The tip must not weigh more than 16 ounces. Parenthetically

it may be remarked that the rods in use are all of one piece, and by "tip" is meant all that portion of the rod from the reel seat to the end of the rod. The line must not contain more than 24 threads or strands, and be capable of sustaining not more than 48 pounds in dead weight. The angler must bring his fish to gaff unaided, and the fish must be reeled in. A broken rod, either before or after gaffing, disqualifies the angler.

The tournament is open to amateurs only, the professional boatmen of the island being barred. Only one rod can be used by each angler. All the catches made with a view of competing for prizes must be reported at once to some member of the weighing committee, and weighed in his presence. "No allowance will be made for shrinkage" is one of the rules.

Trolling for tuna is done entirely from power launches. Live bait is used, preferably flying fish. Good catches have been made with large-sized sardines, which fairly swarm in the Catalina waters. The hook used is about twice the size of the ordinary tarpon hook, and the reel is literally a burden—until a fish is hooked. Then, z-z-z-z-zip! Unless one is prepared, and gives the signal at once to reverse the engine and back the boat, the 900 feet of line is gone in a jiffy, and it's either let go of the rod or have the line break off while you hold it. That is where the novice loses his fish. That first rush is fatal unless the boat goes back at once in the direction the tuna is taking. If the angler is fortunate enough to combat that first mad dash through the water, his fun begins.

But it is not necessarily certain that he is going to bring his capture to gaff. "There's many a slip between the hook and the gaff," is an old saying among tuna fishermen. There is no harder fighter than this big mackerel—for the tuna is the largest of the mackerel family, to which also belong the albicore, the bonita and the skipjack, the latter three varieties, although smaller, affording good winter sport when the tuna are feeding on the bottom in water over a thousand feet deep. Once hooked, the tuna is up to all sorts of tricks, and not even his smaller but almost equally resourceful rival in gaminess, the black bass of fresh water, can give him any points on how to circumvent the fellow at the other end of the line. The Catalina boatmen will tell you of experienced fishermen who have played a tuna all day, only to lose him at last. Plenty of strength, lots of endurance, and iron nerve are essential to the sport.

The tuna is called the king of game fish. There are larger fish caught at Catalina, but none that causes the angler such a thrill. The Tuna Club offers prizes for the largest fish of other varieties taken, notably the yellowtail and the black sea bass, or jewfish, but although the latter often weigh over 300 pounds, they have not the fighting qualities of the lithe, slender tuna, with his slashing tail, his tremendous strength, and his indomitable pluck. The record for black sea bass is 425 pounds, but a 100-pound tuna will put up much more of a fight.

Chicago Fly-Casting Tournament.

H. G. Hascall broke all records in distance and accuracy fly-casting at the fourth tournament of the Chicago Fly Casting Club at Garfield Park on the 18th inst. Hascall made 99.2-3 points out of a possible 100, which is said to be the best performance ever made in a casting tournament.

The first day of the tournament was marked by excellent work, there being a goodly number of contestants in the various events.

In long distance casting, the winning score was 120 feet, made by E. J. Mills of New York. A perusal of the winning scores will show that the Stow Lake contingent should cast rings around the Garfield Park fly-casters. Harry C. Golcher, Walter D. Mansfield, J. B. Kenniff, Ed. Everett, T. W. Brotherton and other good 'uns still have their records on the right side of the ledger.

The final event for the first day was won by F. N. Peet, whose score is a top-notch. The other winning scores in the event would put the Chicago men in the lead anywhere.

A special cup was put up by the Chicago club for the best salmon cast, and was won by Reuben Leonard of New York, with the splendid cast of 141 feet. The Easterners were too good for the local men in the distance trials, but the Chicago casters were evident in the events that required skill and accuracy.

Harry Hascall, F. N. Peet and John Waddell will be remembered by local rodsters as a trio of congenial sportsmen who took part in the world's tournament at Stow Lake two years ago.

A summary of winning scores for the first day of the Chicago tournament Friday, August 18th, is the following:

Long distance fly-casting—E. J. Mills, New York, 120 feet; Reuben Leonard, New York, 118; F. N. Peet, Chicago, 108; John Waddell, Grand Rapids, Mich., 107; H. G. Hascall and A. C. Smith, Chicago, tied at 104.

Distance and accuracy casting—H. G. Hascall, Chicago, 99.10-15 per cent; F. N. Peet, Chicago, 99 per cent; R. Leonard, New York, 98.11-15 per cent; J. H. Bellows, Chicago, 98.7-15 per cent; E. J. Mills, New York, 98.3-15 per cent; E. R. Letterman, Chicago, 97.13-15 per cent.

Accuracy and delicacy casting—F. N. Peet, Chicago, 99.5-30 per cent; A. C. Smith, Chicago, 98.23-30 per cent; H. G. Hascall, Chicago, 98.23-30 per cent; J. H. Bellows, Chicago, 98.10-30 per cent; John Waddell, Grand Rapids, Mich., 97.12-30 per cent.

Salmon casting for championship cup—Won by Reuben Leonard, New York, with a cast of 141 feet.

Last Saturday's program included bait casting contests in which it was believed the Michigan rodster would annex the principal honors.

Pheasants for Sonoma County.

C. N. Carrington of Santa Rosa, who is an enthusiast on Mongolian pheasants, will endeavor to introduce the birds into the woods of Sonoma county. A

pair of the handsome and game birds were recently received by him from Portland, Or. With these as the nucleus he hopes to accomplish what has heretofore been a failure in that line.

Several years ago a number of the birds were liberated near Santa Rosa and at Skaggs' Springs. Immediately every person who owned or could hire or borrow a shotgun took a hand in exterminating them. The quick result was no more pheasants.

Mr. Carrington intends to set loose, here and there, pairs of young pheasants where they will be rendered reasonable protection. The birds will be turned out in wild places, away from the summer resorts—where the guests, as a rule, make the destruction of valued and scarce game a pastime.

Pheasants are under perpetual close season in this State, but for all that there are comparatively few districts that are congenial habitats for the bird. It is indispensable for their propagation, that there is plenty of low, dense cover adjacent to open feeding ground, preferably stubble fields or cultivated ground with nearby springs or running water. Even such breeding grounds, under the best conditions, is not enough, should there be ground vermin about plentiful enough to get at the nests, or after the old birds. For such reason, the hopes of more than one pheasant introducer throughout this State have been shattered.

It is to be hoped that Mr. Carrington will be successful in his laudable endeavors and that the forests and fields of Sonoma county will be populated with this handsome and game species of the feathered kingdom.

A Peculiar Accident, the result of somebody's carelessness evidently, happened in the baggage room at the ferry building one evening this week.

Thomas Nolan, a baggage-man employed by the California Northwestern Railway Company at the Tiburon ferry baggage-room, was unloading a crib full of inbound baggage that had just come in from the hunting camps up state. Most of it consisted of rolls of blankets tied with a rope or bags of hunting outfits. As he was taken the baggage from the crib there was an explosion and he felt a sharp pain in his shoulder, where a bullet from a bundle of baggage had struck. He was taken to the Harbor Hospital where it was found that the bullet had penetrated his upper left arm and shoulder. The wound is not a dangerous one, and after it had been dressed Nolan was taken to his home.

It was evident to Nolan and his fellow employees that the wound was due to the accidental explosion of some weapon in a bundle of baggage, but it was not possible for them to say from which bundle the shot had come, so an examination of several bundles was necessary. While it was found impossible to locate the exact bundle wanted, it was found on examination that several contained firearms, knives and cartridges of different caliber, mixed indiscriminately with soiled clothing and the various articles that lie loose around a camp.

In one case a .44 cartridge was found in a bag, with only a single thickness of canvas between it and anything that might have been bumped against it in transportation. A hunting belt full of loaded cartridges and loaded magazines was found jammed loosely in a wad of light cotton clothing. A rifle at full cock was found in another bundle. All these bundles were either canvas bags or rolls of blankets. As such baggage is ordinarily subject to much less careful handling than trunks and cases, the danger from it to travelers on station platforms or to baggage-men is obvious.

Such carelessness as is shown here is practically criminal. It is singular that people who handle firearms and ammunition can be so regardless of the danger their carelessness occasions.

Stockton Show Next Month.

The recently organized Stockton Kennel Club will, so we have been informed, hold the club's initial show September 28, 29 and 30. It was originally intended to engage the services of an Eastern judge, which plan has been changed and Coast talent in separating the canine wheat and tares will preside in the sawdust ring. Fred P. Butler of this city, the secretary of the San Francisco Kennel Club, it is rumored, will judge Setter dogs. This selection is conceded to be an excellent one and meets the approval of sportsmen who fancy the bird dogs. Mr. Butler is a skilled wing shot and knows what a Setter should be like if anyone does, for he has bred and broken dogs for his own recreation in the field for a number of years.

The Stockton club has also secured the services of Mr. D. J. Sinclair as superintendent. Mr. Sinclair has been a prominent factor at bench shows for more than a decade past and is one of the most competent and experienced bench show managers on the Coast to-day.

The Stockton Kennel Club has a large membership list, upon which is enrolled the names of some of the leading and most influential citizens of that city. Much enthusiasm is shown in the coming show and a large entry of dogs will be secured, as the club will offer an inducing number of valuable and handsome special prizes.

Surf City Show Postponed.

The Santa Cruz show, we are advised, has been definitely postponed until next July.

President J. O. Horne and Mr. F. W. Swanton are going East next month and Mr. Harry W. Lacy, whom the club had invited to judge, could not visit the Coast in September, are the two principal reasons for the postponement.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

FISHIN'!

Don't keer fer the city life—
Folks up thar air wishin'
They wuz at a river bank
Fishin', fishin', fishin'!

The August breezes is in play—
Willer branches swishin';
Wouldn't yer like a holiday
Fishin', fishin', fishin'!

Don't keer whut the people say;
Taint fer wealth I'm wishin';
I kin dream the world away
Fishin', fishin', fishin'!

Bass in Merced River.

Black bass angling in the Merced river, near Merced, is said to be excellent, a party of three last Sunday caught 20 fine fish. The small ones taken were returned to the water; only the big fellows, all fish over one pound in weight, were kept.

TRADE NOTES.

Averages Reported.

Wabash, Ind., August 2d and 3d, R. O. Heikes, first general average, 377 out of 400, shooting "Infallible." W. R. Clark of New Paris, Ohio, second amateur and third general average, 353 out of 400, shooting "DuPont." H. M. Clark of Wabash, Ind., third amateur average, 352 out of 400, shooting "DuPont."

Albert Lea, Minn., August 2d and 3d, Fred Gilbert, first general average, 462 out of 480, shooting "DuPont." W. R. Crosby, second general average, 461 out of 480, shooting "New E. C." (Improved). H. C. Hirschy, third general average, 457 out of 480, shooting "DuPont." H. G. Taylor of Meckling, S. D., first amateur average, 451 out of 480, shooting "New Schultze." R. R. Barber of Paullina, Ia., second amateur average, 436 out of 480, shooting "DuPont." G. Evander of Wheaton, Minn., third amateur average, 435 out of 480, shooting "DuPont." Neustadt, Ont., August 4th, H. A. Mallory of Dayton, Ont., first amateur and first general average, 142 out of 155, shooting "DuPont." F. H. Conover, second general average, 141 out of 155, shooting "DuPont." George M. Dunk of Toronto, Ont., second amateur and third general average, 140 out of 155, shooting "DuPont."

Wilkesbarre, Pa., August 4th, J. D. Mason of Scranton, Pa., first general average, 195 out of 250, shooting

"New Schultze." Harry Hess of Nanticoke, Pa., second general average, 190 out of 205, shooting "DuPont" and "New Schultze." W. H. Stroh, Pittston, Pa., third general average, 187 out of 205, shooting "DuPont." Janesville, Wis., August 6th and 7th, W. D. Stannard, first general average, 343 out of 360, shooting "DuPont." T. J. Malany of Rockford, Ill., first amateur and second general average, 342 out of 360, shooting "Infallible." W. Schultze of Tana, Wis., second amateur and third general average, 341 out of 360, shooting "DuPont." F. Pierstorff of Middleton, Wis., third amateur average, 340 out of 360, shooting "DuPont." Hartford, Conn., August 8th, C. C. Finch of Thompsonville, Conn., first general average, 175 out of 190, shooting "Infallible."

Wilson, N. C., August 8th, J. M. Hawkins, first general average, 196 out of 200, shooting "DuPont." Wm. Walls of Wilson, N. C., first amateur and second general average, 187 out of 200, shooting "DuPont." Walter Huff, third general average, 186 out of 200, shooting "DuPont." George L. Lyon of Durham, N. C., second amateur average, 185 out of 200, shooting "New Schultze." John W. Todd of Charlotte, N. C., third amateur average, 178 out of 200, shooting "DuPont."

Peters' Points.

On July 28th, at Plant City, Fla., Mr. Percy C. Logan of Bartow, Fla., broke 100 straight targets, regulation distance, using Peters' factory loaded shells.

At the annual meeting of the Ohio State Rifle Association, and Ohio National Guards, held at Newark, Ohio, July 24th, to 29th, many of the best scores were made with Peters' factory loaded ammunition. The score made by Lieut. Benedict, who won the skirmish run, 96 out of 100, has never been equaled. Another remarkable score was that made by Private Bradshaw, who won the individual skirmish and the Peters' trophy with a score of 95 out of 100, distance 1000 yards. All of the revolver matches were captured with Peters' cartridges, and in the Sixth Infantry match Col. E. T. Miller, Adjutant General, although not posing or claiming to be an expert, made the excellent score of 50 out of a possible 50 at 500 yards. Col. Miller's sighting shots included a 5 which gave him 11 straight bull's eyes.

Peters' cartridges also maintained their excellent reputation at the tournament of the State Rifle Association, Creedmoor, N. Y., July 26th to August 1st. The winners of the All Comers' Short Range, All Comers' Mid Range, All Comers' Long Range, Thurston,

Re-entry Revolver, and Rapid Fire Re-entry Revolver, all used Peters' cartridges. In the Mid Range match Lieut. Casey made a run of 17 consecutive bulls. It was demonstrated anew that Peters' 30-Government, .22 Long Rifle, and .38 S. & W. Special Smokeless cartridges possess in a higher degree than any other make the essential qualities of uniformity, high velocity, and properly designed bullet.

At Framingham, Mass., July 4th, high average was won by Mr. Geo. C. Finch, an amateur, with 90.6 per cent. At Bangor, Maine, July 10th, Mr. George E. Barker was high, 96 per cent. At Manchester, N. H., July 22d, Mr. Elmer E. Reed won the State Championship trophy with 94 per cent. At Springfield, Mass., July 25th, Mr. J. S. Fanning won high average, 95 per cent, which is the record for the Springfield grounds. At Concord, N. H., July 21st, first average was won by Mr. G. M. Wheeler. All these shooters used Peters' factory loaded shells. At Mt. Olive, Ill., Aug. 12th and 13th, Mr. H. W. Cadwallader, shooting Peters' Ideal shells, won high average with 94 per cent.

Again It's U. M. C.

At the Union Gun Club shoot, Ingleside, August 20, the only three 25 straights made during the day were shot with U. M. C. ammunition—Dan Danels, Otto Feudner and Lon Hawxhurst, the latter shooting a Remington hammerless gun.

Three of the four medal winners—M. O. Feudner, A. M. Shields and W. Schneider each shot U. M. C. ammunition.

Growing in Popularity.

Ballistite is rapidly becoming recognized by many Coast shooters as a powder that is accurate and reliable. Among the regular shooters of Ballistite may be mentioned "Slade," one of the charter members of the California Wing Club, a trap shooter of skill and experience. At the last live bird shoot of the club, he was the only contestant to score a straight twenty birds in the club match.

Ballistite will be put on the market in October in the form of a bulk powder. The new powder has been thoroughly and scientifically tested by the leading ammunition manufacturers of the United States. The consensus of opinion was that this favorite powder in bulk form is highly satisfactory in every respect. In fact, it proved to be just as effective and high grade in bulk form as in the dense Ballistite—which has won a high regard in the consideration of sportsmen throughout America.

ENGLAND'S WOOL SUPPLY.

The following facts from the Yorkshire Post, about the situation as to the wool supply in England will be of interest to American farmers and manufacturers:

We face a new wool season with lighter stocks in the country than we have ever seen. It has been a very common thing for a farmer to put away two to five years' shearing because he could not get what he considered a reasonable price, but during the past year the high prices ruling have been a sufficient temptation to induce everyone to sell. The shipments of English wool to America last year exceed all records except 1897, when large anticipatory shipments were made in view of the imposition of a duty on raw wools.

Commenting on the Australasian supply, the Post said:

It is estimated that of the increased exports of wool from Australasia at the end of the present season New South Wales will have contributed no less than 140,000 bales, valued at over \$7,500,000. In the same state, it is also to be noted, the stock returns to the end of December shows nearly 6,000,000 sheep have been added to the flocks in that part, bringing the total up to 34,531,000 head, an increase roughly valued at \$15,000,000.

The most conservative estimates are that during the season of 1905-6 the New South Wales clip will show an increase of no less than that in 1904-5, thus bringing the production of the state up to 790,000 bales, or about equal to the output in the wool year 1900-1901, and, assuming that growers are so fortunate as to make such prices as prevail today, this will mean to them an increase in money value of \$15,000,000, to compare with the season just closing. It is further estimated that at the close of 1905 the flocks in New South Wales will stand at 40,000,000 head, a figure not reached since 1901, the lowest being 1902, when the official stock returns put the sheep at 26,649,000. It is also to be remembered in reading these statistics that the season is already so far advanced as to make it highly improbable that the most adverse conditions will seriously affect the situation.

Latest statistics show that there were in Queensland at the end of 1904, 11,191,938 sheep, as against 8,392,044 at the end of 1903, demonstrating that there has been a substantial movement in the right direction. There has also just come to hand from Victoria the

census of sheep in that part of the colony, not previously taken since 1901. In the latter year there were 10,842,000 sheep in this part. Then came the depletion by the drought, and it was estimated that by the end of 1903 there were only 8,774,731 sheep. Now the official figures give the number at the end of last year as 10,168,000, and though the whole of the loss compared with 1901 has not been regained, the recovery has been no less wonderful than in other parts.

Stocks of wool are low, as also are stocks of finished materials, but no one dreams of replacing the latter on today's basis of values, especially as we do not seem to be far removed from a time of reasonable prices to be brought about by a much more plentiful supply.

STABLE VENTILATION.

The old-fashioned fireplace with its big chimney was one of the best ventilators ever placed in the house, because it removed the heavy, foul air from near the floor. In stable ventilation Prof. King's system takes advantage of the same principle by removing the heavy, foul air from the lower part of the stable through a flue that extends above the highest part of the roof.

In the stable fresh air is admitted through smaller flues from one or two sides of the building in such manner as to permit the cold fresh air to mingle with the warmer air at the ceiling. In this way fresh air is admitted to the upper part of the room while the inside atmosphere that has been loaded with impurities until it settles is drawn off from near the floor. To prevent drafts and also to prevent the warm air from passing out through the intake the flues are turned down at the outside or built in the side of the building.

Air in circulation naturally goes up when warm, because warm air is lighter, but unless it is then cooled it is not easy to drive it down.

The heights of the stable ceiling has little to do with ventilation. A ceiling that is high enough to stand up under is high enough for a cow stable. Cows may be crowded close together in a stable with a low ceiling, but a circulation of air must be maintained. The old-fashioned idea of providing a great deal of cubic air space in a cow stable was all wrong; it is quality of air we want, not quantity.

A great deal of disease has resulted from stabling cows in expensive, airtight stables without adequate provision for changing the air.

Cows are warmer in a stable than is a little too small and ventilation is easier managed under these conditions, because the body heat of animals causes a rise in temperature and circulation is easily maintained. There are two things absolutely necessary to the success of winter dairying; a warm stable and a well ventilated stable.

RINGING HOGS.

We have long been of the opinion that many farmers lose a good deal of money by the practice of ringing hogs during the spring and summer season. The object, of course, is to save money. That is, to keep their pastures and meadows from being rooted up and apparently destroyed. The real loss, however, is not in the time expended in ringing them and the cost of the rings and pincers, but in the injury done to the hogs. It is not possible to ring hogs without giving them sore noses, without putting them back or at least delaying their development more or less. Occasionally the ring is put in improperly and quite serious damage results.

We don't see any good reason for all this. It is quite true that especially in the spring of the year hogs, and particularly brood sows, will do more or less rooting. Occasionally they will root an old grass pasture all summer. They seldom, however, attack any piece of well drained land unless there is something to root for. This is usually the larvae of the June bug and other moths. In destroying these they really benefit the pasture. They are quite certain to root along sloughs, and particularly where these sloughs have been recently drained, and the roots of slough grass, rushes, etc., are in the process of decay and contain more or less animal food. Neither do we regard this as being any damage.

Sometimes they root on comparatively well drained spots, but in these cases it will be found that there is something in the soil of which they are fond, and while it may make the spot unsightly, the loss of the stand of pastures that grows on such places is more than compensated for by the advantage to the hogs from rooting. We are well aware that there is sometimes strong provocation to compel the old sow to keep her nose out of the ground; but if the farmer will simply let her root all she has a mind to and then follow it with a scedding tame grass and the harrow, he will find in the end that rooting is more beneficial than otherwise.—Wallace's Farmer.

SHETLAND THE PERFECT PET.

The cry of the children is for a perfect pet. What the rattle and the doll are to the earliest years of us, that the Shetland pony is fated to become for older childhood. This animal is the only pet that won't at some time or other make reprisal on the hand that nags. The dog—every dog—will bite when the child becomes too familiar. There are elements in a cat's nature that puzzle and repulse the child, a something that makes it walk 'by its wild lone.' The goat is inadequate. We could analyze a Noah's ark of animals in this way only to find that the one satisfying safe living pet is the Shetland pony. If more than eight children ride on his back he will shake himself like a wet Newfoundland and then stand motionless, while they pick themselves up and out from his four hoofs. A large and more highly nerved grade of horse would trample the children that were tripping him.—Country Life in America.

The world's production of meat has increased 57 per cent since 1840.

Warranted to Give Satisfaction.

per bottle. Sold by druggists, or sent by ex-
press, charges paid, with full directions for
its use. **Send for descriptive circulars,**
testimonials, etc. Address
The Lawrence-Williams Co., Cleveland, O.

LESS COWS AND BETTER ONES.

What is the matter with the average dairy farmer? To many poor cows. Why does he keep poor cows? Really, because he does not make any effort to know what his cows are. He is not paying a business man's attention to his business. What can be expected under such circumstances but poor cows?

The New York Farmer hits the nail on the head when it says:

The substitution of high-class cows for low-class ones is one of the tasks facing the American farmers. Each farmer must perform his part of the great task for himself. The man who is losing money regularly on his dairy of twenty or thirty scrub cows can begin to breed up his herd now. In a year or two he can get a start at little or no extra expense. In three or four years his improved young stock will give him more income. In eight or ten years he can reduce his twenty scrub cows to ten cows above the average. He will then spend one-half as much for feed and work, and he will get 50 to 100 per cent more milk. In other words, he will have cut his costs of production in two, and he can sell his milk at a profit even at the low rates that prevail in the glutted markets.

This is what is being done by the milk producers who are called "model producers" or "model farmers." There is not a thing done by these men that cannot be done by any man who can weigh a can of milk. There is no mystery at all in the work. The steps are short, plain and easy. The high-class cow is the only cow that can make money for her owner.

Now a practical word or two as to what should be done.

1. The farmer must make up his mind to read more and know more than he has known about the true meaning of this business.

2. He must breed better; stop buying poor, cheap bulls and the production of poor cows. The fountain head of better quality in the cow is the character of the sire.

3. Create better conditions in the stable. Give the cow better air to breathe, better food to eat, good water to drink and cleaner conditions to live in.

4. Weed out the poor cows vigorously. Don't be slow about it. Dry them off and sell them to the butcher. Buy the best heifers of the best cows you can find and start the making of a good cow on your farm.

5. Don't think fifty or sixty dollars is too much to pay for a first-class cow, provided always you are sure she is healthy. The men who come around to buy your good cows pay these prices, and ten to one if they don't get them away from you. A cow that will earn in gross \$50 a year, pays big interest on her cost above the cost of keep. It amounts to 33 per cent if you pay \$60, assuming she costs \$30 to keep her, and it can be done for that easily if you have a silo and will grow alfalfa.

In all these matters touching cows we are constantly impressed with the wide-spread lack of good judgment on the many vital questions that affect her.

It means a good deal more than many farmers suppose to understand a good cow. They ought to know a poor cow by virtue of long experience with her.

DEVON CATTLE NOT MILKERS.

The breeders of Devon cattle, like all of the other "dual-purpose" breeders, claim their cattle to be a profitable dairy breed. Some of the Devon cows are profitable, others are not. That is true even with the best and most pronounced dairy breeds. But the breeders of dairy cattle are not going along breeding as far away from the dairy conformation and form as they can, building up the beef form and carcass, establishing beef heredity, in short, doing all in their power to eradicate the milking quality, by trying to make a cow as wholly unfitted for dairy work as she can be.

They try at least to breed towards the construction of a dairy cow. The Devon scale of points calls for "an under line as nearly as possible parallel with the line of the back." In other words, a blocky beef form, as near as possible; this is the form they breed for. It is the old beef form, pure and simple, and the breeders of these cattle tell us that they are breeding for milk, are producing desirable milch cattle, and "want the dairy world to believe they are on the

lines of dairy development.

As with the Short-horns, every cow that shows decided talent for milk production stands in marked contradiction in form and outline to the acknowledged standard they are breeding for. These things cause men to inquire if everything isn't fish that comes to the dual-purpose net.—Hoard's Dairyman.

There is no country which affords a better opportunity for dairying than the South. Milk and butter are imported in large quantities, which gives ample opportunity to the home producer to find a good market at a fair price for all he produces.

Some have adopted the plan of having a sign board at their front gate, on which they write the things they want to buy or sell.

Experience, energy, ability and square dealing make a man strong in the stock business, or in anything else.

For Sale.

Brood Mares, Horses in Training and Yearlings, Belonging to the Estate of Michael Fox, Deceased

NOTICE IS HEREBY GIVEN THAT THE undersigned executor of the will of Michael Fox, deceased, will sell on or after MONDAY, AUGUST 28, 1905, the following described brood mares, horses in training and yearlings, to wit: Andinas (4) by St. Andrew-Fanny Louise. Masedo (4) by Mario-Reseda II. Re Carlo (2) by St. Carlo-Reseda II. Edna Rose (5) by Bassettlaw-Reseda II. Kidnapper (1) by Kenilworth-Edna Rose.

The above described animals are now at the Oakland Race Track. Said executor will also sell on or after said date the following brood mares and fillies, now at McDonough's Ranch, San Mateo County, Cal.: Fanny Louise (dam of Andrina, Canmore, Sister Jeannie) by Dorella-Nellie Peyton. Reseda II by Midlothian-Marigold. One Bay Filly by Orsini out of Fanny Louise, foaled April 13, 1904. One Bay Filly by Orsini out of Fanny Louise, foaled April 21, 1905. One Chestnut Filly by St. Carlo out of Reseda II, foaled January 24, 1905. Fanny Louise was bred to St. Carlo, 1905. Reseda II was bred to Orsini, 1905. Bids or offers for all of the above described stock, as a whole or separately, must be in writing and will be received any time after the first publication of this notice at the office of Sullivan & Sullivan, attorneys for said executor, Room 110, Parrott Building, San Francisco, California. Terms—Cash in U. S. gold coin.

MATTHEW I SULLIVAN, Executor of the Will of Michael Fox, Deceased

FOR SALE.

Fast Pacing Stallion JOHN A 2:12 3-4 three-year-old 2:14; sire Wayland W. 2:12 1/4 by Arthur Wilkes; dam Lady Moor by Grand Moor. Wayland W. is the only stallion to put two in the 2:10 list this year up to August 1st. JOHN A. is a rich seal brown, stands 16.2, weighs 125 lbs., is kind and gentle for a lady to drive. Is a very fine individual of strongest conformation, and as all of his colts are fine lookers he should make a great sire. His oldest colts are three years old; none have been worked. There were but three of them, as he was not regularly in the stud.

Three-year-old Trotter SIR CARLTON 16367 by Nutwood Wilkes 2:16 1/4; dam Lady Keating by Stam B. 2:11 1/4, second dam the dam of Diawood 2:11 and Abdine 2:17. SIR CARLTON spald up in the Occident Stake and ready to start. Should be not win any money this year, will make a great prospect in the green classes next year; as no gamer colt ever lived. He can trot the fifth heat the fastest. In another year he will be able, harring accidents, to trot in 2:13 or 2:14. Any horseman at the Woodland track will recommend him as a game colt and a good trotting prospect. He only wears a harness and a pair of quarter boots and does not need the latter. Wears 6 ounces in front and 5 behind.

I also have some good road horses and brood mares for sale. They can all be seen at State Fair Grounds, Sacramento. Address

A. E. MASTIN, 1016 Nineteenth St., Sacramento.

Daedalion 2:10 For Sale.

Can Beat His Record Three Times in a Race.

A high-class Race Horse and a Coming Sire.

Sire, DIABLO 2:09 1-4.

Dam GRACE (dam of DAEDALION 2:10, Creole 2:15, Eagle 2:19 1/2, etc.) by Buccaneer.

Owner's business will not permit him to devote any time to racing. For further particulars address

BREEDER AND SPORTSMAN.

FOR SALE.

KIDNEY DILLON GELDING BUENA; FIVE years old; a perfect beauty without fault or blemish; bay with black points; weighs about 1050 to 1100; can be driven by a child; an elegant road or track horse; trials in 2:17; \$750.

ALSO The celebrated DOC WILKES, a road horse; you need not take the dust of any. Record 2:12 1/4. A beautiful mahogany bay, black points; weight 1000. No one need look at him unless they want to pay me \$500 for him. A baby can drive him. Both sold for want of use.

G. B. M. GRAY, 319 Twelfth St., Oakland.

Fast Team of Pacers

FOR SALE—SEVEN AND EIGHT YEARS old, stand 16 hands; bays, good manes and tails; well matched; gentle; used to the city. Will pace better than 2:40. Sound and stylish. Can be seen at the Nevada Stables, 1350 Market Street. Apply or address

E. G. PIERCE, Nevada Stables, San Francisco.

FUTURITY CANDIDATE FOR SALE.

VITA OIL COMPANY, Makers, SAN FRANCISCO

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Cerise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

Not One

Case of

Distemper.

No case of Distemper, Epizootic, Pink-eye need prove serious, and the spread of these and similar ailments can absolutely be prevented by use of Craft's Distemper and Cough Cure. Results are prompt and positive; no cost if the remedy fails. If your druggist hasn't it, we will supply it direct, prepaid—50c and \$1. Send for "Veterinary Pointers," a free booklet by an expert, that may be worth hundreds of dollars to you.

"SAVE-THE-HORSE" SPAVIN CURE

Registered Trade Mark

"Save-the-Horse" is no untried or uncertain remedy. Its marvelous power and possibilities have been proven absolutely and positively. No man will fire, blister or treat his horse with anything else if he will investigate and read our booklet and the letters from bankers, trainers and horsemen on every kind of case. Send for them; also copy of guarantee.

THE NEWCOMB LIVERY

GEORGE W. OSGOOD, Proprietor.

Livery, Boarding and Sale Stables
120 122 South Fourth Street.

QUINCY, ILL., May 12, 1905.

Some twelve months ago I owned a horse which was practically worthless, due to a very bad Bone Spavin on his right hind leg.

I tried various remedies without success, finally purchasing from the Miller & Arthur Drug Co. of this city a bottle of "Save-the-Horse". After using one-half the contents of the bottle, according to instructions, the horse has never taken a lame step. I would gladly have sold him for twenty-five dollars before using "Save-the-Horse". I have sold him since for ninety dollars, and would not be without "Save-the-Horse" at double the cost.

GEORGE W. OSGOOD.

POSITIVELY AND PERMANENTLY CURES Bone and Bog Spavin, Ringbone (except Low Ringbone), Curb, Thoroughpin, Splint, Capped Hock, Shoe Bill, Windpuff, Weak and Sprained Tendons and all Lameness.

\$5.00 per bottle. Written guarantee—as binding to protect you as the best legal talent could make it. Send for a copy and booklet.

At Druggists and Dealers or Express paid.

ST. CHARLES, MICH., Feb 28 1905.

A year ago we had a valuable horse go lame with hog spavin. Seeing your advertisement in the Michigan Farmer, we tried "Save-the-Horse" under your guarantee, and he is completely cured. Waited a year to see if cure was permanent and now recommend it to any one in need of such a liniment.

H. H. SANDERSON.

EAST SPRINGFIELD, PA., 2-22-'05.

I wish to carry your "Save-the-Horse" and "Ointment" in stock. What will you furnish same to me for? I used it on a bad curb and used horse every day in my practice. He is entirely well and sound.

Yours truly,
DR. C. W. HOTCHKISS.

"SAVE-THE-HORSE"

Is indicated for an enlargement caused by an injury which leaves a thickened condition of the tissues or skin.

Horse can be worked with either shin or ankle boots, as no harm can possibly come by either destruction of hair or sealing of the limb. "Save-the-Horse" can be applied in all conditions and extremes of weather.

Three-Legged Horses

Are not curiosities by any means. The country is full of them. The fourth leg is there all right but it is not worth anything because of a curb, splint, spavin or other like bunch. You can cure the horse of any of these ailments and put another sound leg under him by the use of

Quinn's Ointment.

It is time tried and reliable. When a horse is cured with Quinn's Ointment he stays cured. Mr. E. F. Burke of Springfield, Mo., writes as follows: "I have been using Quinn's Ointment for several years and have effected many marvelous cures; it will go deeper and cause less pain than any blister I ever used. Thought it my duty for the benefit of horses to recommend your Ointment. I am never without it." This is the general verdict by all who give Quinn's Ointment a trial. For curbs, splints, spavins, windpuffs, and all bunches it is unequalled. Price \$1 per bottle at all druggists or sent by mail. Send for circulars, testimonials, etc. W. B. Eddy & Co., Whitehall, N. Y.

Wilcoxson's Perfection Liniment

The Greatest Remedy Ever Known For Bad Legs.

It penetrates to the seat of trouble at once. It allays fever from any cause. A Safe, Speedy and Positive Cure for Splints, Curbs, Thoroughpins, Sweeney, Capped Hocks, Wind Puffs and all Lamenesses from Sprains, Ringbone and other bony enlargements. On broken down, weak and injured tendons, ruptured ligaments its power is unfailing. Permanently cures all broken down conditions of the Ankle, Hocks, Tendons or Ligaments, without loss of hair or an hour's let up on the horse.

PRICE \$2 PER BOTTLE. Express charges prepaid on receipt of price. Every bottle guaranteed to give satisfaction or money refunded.

—at the—

GRAND AMERICAN

Held at Indianapolis, June 27-30, 1905. was won by Mr. Jas. T. Atkinson of Newcastle, Pa., score 99 out of 100 from the 18-yard mark, using

PETERS FACTORY LOADED SHELLS

This was the Only Event During the Entire Grand American which was won from Behind the 16-yard Line. Many other Notable Scores were made with Peters Shells, among them the following:

1st on Practice Day, F. M. See (tie), 99 out of 100. 1st on First Day, L. H. Reid (tie), 99 out of 100. 2d in Preliminary, Wm. Veach (tie), 97 out of 100. 3d in Grand American, M. Arle (tie), 97 out of 100. In the Consolation Handicap, 2 scores of 98, 5 of 97, 4 of 96 and 25 others above 90 were made with Peters Shells

All of which merely goes to prove that Peters Shells are WINNERS.

Los Angeles Harness Horse Association, Nov. 20 to 25.

THE WOODLAND DRIVING CLUB has been organized and will hold a harness meeting during the week of September 18th. On Monday and Tuesday automobile and local races will be held, the regular trotting and pacing program beginning Wednesday, September 20th. The program, which appears on the opposite page, is an excellent one, and affords an opportunity for all the horses now in training in California. \$5500 has been hung up for the different classes in \$500 and \$400 purses. The Woodland track has always been one of the most popular in California, and as it has been greatly improved since Mr. Alex. Brown purchased it and established thereon the Woodland Stock Farm, harness horse owners and trainers will find that there is a better track and better accommodations than ever. Over \$1000 has been raised by subscription among the citizens of Woodland to aid the Woodland Driving Club to give this meeting and all that is required now to make it a complete success is a good liberal entry list. We hope every owner who possibly can will enter his horses at this meeting. There are so few meetings held in California that every association advertising a program of harness racing should be encouraged by large entry lists and general attendance of the horsemen. Entries to the races advertised will close Monday next, September 4th, but records made on or after Saturday, September 2d, will be no bar. Send your entries to Frank Brown, secretary, Woodland, Cal., and be sure that your get them mailed in time. The Woodland track is one of the fastest on the Coast and there will be many new records made there during the meeting.

TEN OR TWELVE WEEKS of harness racing, where purses range from \$500 up, will have been had in California this year by the time the Los Angeles November meeting is over. This will make quite a respectable circuit, but owing to the fact that there was no unity of action among the associations giving these meetings, and a great delay in claiming dates and announcing purses and classes, the entry lists have not been very large, although some excellent racing has resulted. Could these associations have made their announcements early in the year and arranged a circuit, one of the most successful seasons would have resulted. Many horses not now in training would have been raced, and many that are now touring the eastern tracks with poor results would have been kept at home and raced. There is nothing that helps to boom the harness horse business like the early claiming of racing dates and announcement of programs. Every association should resolve to "get a move on" early in 1906, and join a circuit that will include all the principal tracks in the State.

SEVERAL CAPITALISTS, who have been compelled to retire from the racing business in Missouri, Illinois and Ohio, have sent a representative to Havana, Cuba, to look over the situation, and report on the advisability of establishing a big plant where winter racing can be held. Of course this enterprise is for the purpose of improving the breed of thoroughbred horses, and bookmaking on results will only be a side issue of minor importance.

TROTTING ASSOCIATIONS in the Eastern States are just beginning to realize that the laws against betting on races which have been placed on the statutes of so many States, were not adopted because the legislatures considered country fairs and trotting meetings as detrimental to the public welfare, but because there was a demand that poolrooms and long continued running meetings be closed. When the harness horsemen unite and agree upon some plan that will permit an occasional week of racing to be held in every community, but prohibit continuous racing and poolrooms, there will not be much trouble in getting a law passed that will allow betting on the tracks when these short meetings are held.

SEVERAL LATE MEETINGS have been advertised to be held in Southern California in November, with the wind-up at Los Angeles, where \$1000 purses are to be given. Already we hear of trainers in this section of the State who have avowed their intention of not only racing at the late meetings but remaining at Los Angeles track during the winter and spring months to train their horses. The enterprise of these Southern California track managers may result in stall rent coming down a little at some of the tracks in the central part of California. Horsemen like to train where there is a certainty of late and early racing, as it effects a great saving in railroad fares and freights.

ORMONDALE won the Future at Sheephead Bay last Saturday, and his owner, W. O'B. Macdonough, is receiving the congratulations of his many friends. Ormondale is a son of Ormonde, for which Mr. Macdonough paid \$150,000, and out of Santa Bella, a bay mare by St. Serf that he imported at the same time he purchased Ormonde. Mr. Macdonough enjoys the distinction of being the only California breeder who ever won the Futurity. The value of the stake to the winner was \$33,680.

THE SPRECKELS YEARLINGS from the Napa Stock Farm were sold at New York on Wednesday of this week. The bay colt by Solitaire II., dam Carnation II., brought \$4000 and the chestnut colt by the same sire out of Break o' Day sold for \$4000. Several others brought over \$1000 and the sale was a great success.

STATE FAIR PROGRAM.

Saturday, September 2d.

Occident Stake—North Star, Belmont, El Rey, Elma S., Princess Louise, Kenneth C., Sir Carlton, Della K, Still Better.

Pacing, 2:09 Class—Daedalion, Nellie R., Miss Idaho, Nance O'Neill, Alone, Vision, Jonesa Basler, Hassalo, Le Roi, Rita H., Kelly Briggs, Tidal Wave.

Trotting, 2:15 Class—Zambra, Adam G., Charlie T., Lady Jones, Birdcatcher, Wild Bell, Satin Royal, Cuate, Oma A.

Monday, September 4th.

Indian races, broncho busting, etc.

Tuesday, September 5th.

Harness Stallion Stake, trotting division—El Rey, Ramona R., Alto Downs, Ambush, Still Better, Vallejo Girl.

Pacing, 2:13 Class—John A., Friskarina, Core Cread, Cresco Wilkes, Argyle, Hattie Croner, John R. Conway, Fearnot, Queen B.

Trotting, 2:12 Class—What Is It, Lady Madison, Liege, Princess, Dr. Hammond, The Commonwealth, Jupiter B., Pat Rose, Red Skin, H. D. B., Walter Wilkes.

Wednesday, September 6th.

Pacing, 2:20 Class—Miss Winn, Eagle Pilot, Lady Shamrock, Instructor, Clara L., Joe Robin, Flora G., Little Jib, Mildred O., Loganette, Fearnot, Bessie Barnes, Dot, Little Joe.

Trotting, 2:30 Class—Oro Belmont, Dew Drop, La Correcta, Wilmar, Birdcatcher, Sam Bowers.

Thursday, September 7th.

Occident-Stanford Pace—Just It.

Trotting, 2:18 Class—Old Hickory, Wild Bell, Hank, Lady Jones, Cuate, Little Babe.

Friday, September 8th.

Stanford Stake—Starting payments made Aug. 22.

Pacing, 2:18 Class—Clara L., Joe Robin, El Morino, Penrose, Sweet Heart.

Trotting, Free for All—Charlie T., What Is It, Liege, Princess, Dr. Hammond, Petigru, Pat Rose, H. D. B., Adam G.

Saturday, September 9th.

Pacing, 2:25 Class—Miss Winn, Eagle Pilot, Lady Shamrock, Mixer, Argyle, Little Jib, Hattie Croner, Dr. J., Loganette, Fearnot, Arthur F., Little Joe, Bessie Barnes.

Trotting, 2:24 Class—Oro Belmont, Ramona B., Lady Jones, Wilmar, Birdcatcher, Billy Dooley, Sam Bowers, Little Babe.

Pacing, 2:08 Class—Closed September 1st.

In addition to the above there will be three or more running races each day. Entries will be made over night.

A very handsome four-year-old stallion by Diablo 2:09½ is advertised for sale in this issue by Mr. W. R. Jacobs of Stockton. The blood lines are Diablo and Director—a great combination surely. Mr. Jacobs will have this colt for sale at the race track, Sacramento, during fair week.

NEW DRIVING CLUB ORGANIZED.

A number of lovers of the light harness horse met at Oak Park, a suburb of Sacramento, one evening recently and organized the Oak Park Driving Club. Mr. Ira Woodworth, who called the meeting to order, spoke of the advantages of having the new State Fair grounds at the very doors of the people of Oak Park, and of the pleasure and benefit to be derived from a well organized club. It was decided to organize at once and the following officers were elected:

President, Ira Woodworth; vice-president, L. Daly; secretary-treasurer, A. K. Kerr; sergeant-at-arms, G. Gillespie; executive committee, W. A. Gilbert, L. Daly, Oscar Wilbur, Judge Allen and J. Hudson.

The following is a list of the members and their horses.

Ira Woodworth, Baby Knight by Knight.
E. Daly, Cella by Knight.
Chas. Lewis, Prince L. by son of Don Marvin.
Gillespie Bros., Duke Gillespie, a Palo Alto bred gelding.

W. McGee, filly by Rosemond.
J. Hudson, Chicken by Knight.
H. Raynsford, filly by Silver Bow.
Oscar Wilbur, Starling by Glen Wilkes.
Judge Allen, gelding by Daedalion.
W. A. Gilbert, C. C. by son of Sidney.
J. Snook, mare by Ouboul.
Howard Kerr, Twinkle by Zombro.
A. K. Kerr, Amber by Glen Wilkes.

J. W. Lowell and John Daly, horses not reported.
Quite a number of others have signified their intention of joining the club at its next meeting and there is every prospect of an excellent organization here.

On the evening just before the club was organized, and for the purpose of getting a little inspiration, a couple of the enthusiastic promoters jogged over to the new track and there in the dim twilight imagined they saw the shades of Nutwood, Electioneer, Geo. Wilkes, Hambletonian 10 and others holding a meeting and passing a resolution to the effect that the State Fair track shall and of right ought to be the fastest mile track in all the West. The two enthusiasts were awakened out of their dream by the foreman warning them off until further notice, but the resolution goes just the same.

The first meeting of the new club will be held September 17th, of which a report will be sent you.

A. K. KERR.

NEW RACE TRACK AT PHOENIX.

Breeder and Sportsman—They are making good headway at the new race track here where the Arizona Territorial Fair is to be held. Three large barns are already finished, the grand stand is under way, and the mile and half-mile tracks both nearing completion.

Among the recent arrivals at the track is J. A. Cody of Santa Barbara, who has opened a public training stable here and should do well. He has Peggy Arnett by Sidney Arnett, and several yearlings by Senator L. that are entered in the yearling trot here. Cody has trained several good ones, among them Briney K. 2:11, Almonada 2:18½, H. M. Stanley 2:17½, Flora 2:20 and many others. Mr. Cody does not claim to have given all these horses their records, but he gave them a great deal of their early training and is a good man with colts and young horses.

There are 22 yearlings entered in the Arizona Stake for two-year-olds that closed August 1st. The stake will be worth close to \$1000. No less than nine of these yearlings are by the California bred horse Senator L. 2:23¼ by Dexter Prince, dam Fanny Bayswater, dam also of Bayswater Wilkes 2:25½, sire of Kelly Briggs 2:09¼, etc. Senator L. holds the four mile trotting record of 10:12 made eleven years ago. He is a fine large stallion and is deservedly popular in Arizona. He is owned by Chas. A. Smith of Phoenix.

Mr. J. C. Adams, who is one of the leading breeders of the Territory has a fine lot of broodmares and young stallions, he having been a buyer at the sales from California's best breeding farms during recent years.

Pacing colts do not seem to be very numerous in Arizona this year as the two-year-old and yearling pacing stakes failed to fill and were reopened to close September 1st.

Phoenix, August 27th, 1905.

TERRY TORY.

ANSWERS TO CORRESPONDENTS.

R. M. JOHNSON, Bisbee, Arizona.—Countess Knight 2:18½, chestnut mare by Knight, dam Pocahontas 2:22½ by Little Washington, grandam by St. Clair 16675, took her record at Sandwich, Illinois, September 13th, 1899. The rules for laying out a half mile track are as follows: Draw two parallel lines 600 feet long and 452 feet 5 inches apart. Halfway between the extreme ends of the two parallel lines drive a stake. Loop a wire around the stake long enough to reach either side. Then make a true curve with the wire, putting down a stake as often as a fence post is needed. When this operation is finished at both ends, the track is laid out. The inside fence will rest exactly on the lines drawn, and the track will measure a half mile three feet from the fence. The turns should be thrown up an inch to the foot.

FERNDAL.—We do not know the mare you describe. There is no mare named Bessie Wilkes by Secretary that has a record. A gray mare named Bessie Wilkes by General Wilkes took a pacing record of 2:24 in Indiana in 1903, but we do not know whether she was ever brought to California.

W. T. MORTON, Oakland.—Flora Wilkes by Geo. Wilkes, dam by American Star, had no standard record, neither has Wyoming Chief.

NOTES AND NEWS.

Occident Stake to-day.

It is worth nearly \$4000.

North Star 2:13½ should win it.

Southern California has organized a fall circuit.

Woodland entries will close Monday next, September 4th. Good purses are offered.

The Los Angeles Harness Horse Association is trying to arrange for a three cornered race between Sweet Marie, Tiverton and Lou Dillon at the meeting to be held there in November.

The Jester, by Stam B., took a record of 2:19¼ in the second heat of a race at Dubuque, Iowa, August 22d. This was the fastest heat of the race.

The Sonoma County Driving Club will hold several matinees during the fall months at the Santa Rosa Stock Farm track.

Great preparations are being made by the Eureka Fair Association for the annual Humboldt County fair, which will open there two weeks hence.

The Bank of Concord has foreclosed its mortgage on the Contra Costa Driving Club's property. The judgment was for \$4500 principal and costs.

The estate of the late C. J. Hamlin has been appraised at a little over a million and a half dollars.

Sunol, 2:08¾, by Electioneer, has a fine looking chestnut colt at foot by Axworthy, 2:15½.

John Sawyer, of Salem, Oregon, offers to match the three-year-old trotter Lonzo by Zombro, owned by Mr. P. J. Mann, against any three-year-old trotter in the Willamette Valley for from \$500 to \$1000 a side. Lonzo won the two-year-old stake at the Oregon State Fair last year and took a record of 2:31½.

Mr. L. C. Crellin, of Pleasanton, has purchased a nomination in Pacific Breeders' Futurity No. 5 for his filly by Searchlight 2:03¼, dam the great brood mare Bertha, dam of Don Derby, 2:04½, Diablo, 2:09¼, Owyho, 2:09¼, etc. Mr. Crellin has a two-year-old full sister to Owyho that has great natural speed. She is next year's Breeders' Futurity.

On Sunday, August 27th, there was a match race at the Alameda track for \$25 a side between Mr. Tesio's Gypsy and Mr. Frank Prettias' Old Folks. The race was won by the latter in straight heats, after a close contest. A large crowd was present. The judges were Ed Prather, R. Brown and A. G. Andrews. P. Patrey did the starting.

Woodland entries close Monday, September 4th. Entries made at the State Fair on Saturday, September 2d, will be no bar.

The San Francisco Driving Club will give an afternoon of racing at Ingleside next Monday—Labor Day. Both harness and running events will be on the program.

The judging of the Shorthorn cattle at the State Fair at Sacramento will begin at 10 o'clock next Monday morning, September 4th. Prof. John Craig of the Texas University will judge all beef breeds, and there should be a large attendance, as this is not only one of the most interesting but most instructive proceedings of the entire fair. The display of Shorthorns will be especially fine this year.

In the two heats at Poughkeepsie which were won by Tiverton in 2:07¼ and 2:06¼, the California trotter George G. 2:06¼ was second both heats, beaten but a length and a half the first heat, and two lengths the second heat.

On one of the New York trotting tracks they do not fine a driver for being late with his horse when the race is called, but send him to the stable and do not permit him to start. There hasn't been a man late since the rule was put in force.

The Decatur, Illinois, meeting had an average of twenty entries to each of its fourteen races. As it only takes sixteen entries to pay a purse in full, it is evident that the Decatur association was on velvet.

At the City Park matinee in Denver Saturday, August 19th, two State records were broken for amateur going. Rosalind, in the second heat of the 2:21 trot, lowered the time to 2:18¾, which is the fastest time ever made on a half-mile track in Colorado. In the first heat of the free-for-all pace, Joe Younger broke the State record of 2:14¼, made two years ago by George E. Ady's Miss Williams, lowering it to 2:14¼. Both horses are owned and were driven in the races by George S. Newman.

Sales of horses in New York and Chicago thus far this year exceed those of the corresponding period last season by about 10,000 head in each city. The increase is remarkable in view of the immense pressure of vast capital to crowd horses out. Motor vehicles are being promoted at enormous cost to the makers and users, yet opposition to horses only seems to emphasize their utility in all industry and commerce.

Getaway's record is now 2:12¼ and he is getting steadier as he goes along. Henry Hellman has improved him a great deal and will make him a good winner before the season is ended.

Horsemen have received the announcement of the Southern California Circuit with many expressions of approval. Many of those who are now at Sacramento will ship south after the Woodland meeting.

Floreen Russell won two heats and second money and reduced her record to 2:22¼ in a five-heat trotting race at Springfield, Illinois, August 23d. She was bred at Santa Rosa Stock Farm and is by L. W. Russell, dam Flora Allen by Mambrino Wilkes.

Burnut by Neernut won a five-heat race at Bay City, Michigan, August 23d. He took a trotting record of 2:24¼ in this race. He was bred by Geo. W. Ford of Santa Ana.

The record of 2:29½ made by El Pajaro at Santa Rosa puts his dam, John Kalar's mare Kate by Carr's Mambrino in the great brood mare list, as she is also the dam of Valentine, 2:19¼, a full brother to El Pajaro, both being by Boodle, 2:12½.

If Helen Norte were a little steadier she would get a record of 2:10 or better with little trouble. She was a good second to Kid Shea in 2:09¼ at Poughkeepsie.

Six two-year-olds by Baronmore were put into the list at Davenport, Iowa, last month. The records made ranged from 2:19¼ to 2:29½.

Ed Patch, son of Dan Patch, has taken a winning race record of 2:10½.

Dan Patch, 1:56, starts to beat his record next Monday at Hamline.

J. F. Ferguson, who is training Inferno, 2:15, for the Hollister races this month, believes the son of Diablo is capable of reducing his record this year.

Grattan 2:13, has four performers of sensational speed out this season: Baron Grattan, 2:05¼; Nutwood Grattan, 2:07¼; Doris B., 2:07¼, and Clarita W., 2:09¼. And there are others to be heard from.

The well-known Denver pacing mare Daisy Field, 2:08¼, was discovered down in Ohio last month masquerading as Ada M. At Dayton, Ohio, on August 2d this mare won the 2:27 pace. Daisy Field was formerly owned by J. Fred Roberts of Denver, who sold her two years ago to a man in Wisconsin. Daisy Field, alias Ada M., together with Harry Snyder, who entered her, and Harry H. Bonslough of Mendota, Illinois, have been suspended by the American Trotting Association.

About fifty horses are being worked at the State Fair grounds, Salem, Oregon. Nearly all will take part in the races on the North Pacific Circuit.

Sam Casto, of Salem, is thinking of bringing a string of eight or ten trotters and paces to either Pleasanton or Los Angeles this fall, to prepare for the circuit of 1906.

The Broncho 2:03¼ is less than fifteen hands high. "Marque" expects her to get a record below 2:02 in a race.

Miss Reese, a pacing mare by Hal K., started in a race at Chanute, Kansas, during the month of July this year, and three days after foaled a filly. The owners of Miss Reese did not know she had been bred. The foal is exceptionally well proportioned and strong. It is being raised on cow's milk.

Golden Gate by Bay Bird, has another win to his credit. He won the 2:40 trot at York, Nebraska, August 6th, and did not have to trot better than 2:35.

Direct Wood, the four-year-old gelding by Direct, that has been winning pacing events in the Middle West this year, was bred by A. F. Stice when he was in California, but was foaled at his farm at Monmouth, Illinois. She took a record of 2:18¼ as a three-year-old, which she has reduced to 2:08½ this year. Her dam is Dolly Fort, 2:28½, by Lee Wood, son of Nutwood.

The latest news from Sacramento is that the directors will take no cognizance of the betting that is to be carried on outside the fair grounds on private property. The usual custom of no return checks will be continued and if anyone wants to go outside the grounds to place a bet on a horse, he will have to pay another fare to re-enter. It is probable that the bookmakers will buy whole bunches of tickets to give their patrons. It will be interesting to see how the new plan works.

According to the Trotting World of London, Prince Alert has been taken to Austria by Eddie Mitchell to compete against time for cups offered by the tracks there. Pacers and geldings are barred in Austria, but the authorities realized that Prince Alert in special against time would be a great attraction and arranged with Louis Winans to send his great pacer across the channel for that purpose.

Boston is to have an Inter-city matinee at Readville September 17-20. The Billings horse will be the star attraction, with several flyers from Pittsburg, Cleveland, New York and Syracuse.

Ethel's Pride 2:07½, by Directum, is a worthy daughter of a worthy sire.

The Eastern races close at Memphis October 26th. If our California horses don't hurry up and win a few more races their owners will think railroad fares and freights are mighty high. It makes a big difference with an owner whether his horse has been winning, when it comes to paying the freight.

A match race was decided last Sunday at the San Jose track between Chas. De Courtloux's pacer, Charlie J., and H. Liebe's trotter Vic Schiller 2:11¼. The race was for \$500 a side and was won by Charlie J. in straight heats in 2:17 and 2:16¼. The first heat was won by a head and the second by a length. Considerable money changed hands on the result of race and a return match may be made.

The fast gelding Lisonjero, 2:08¼, after being laid up for three weeks with lameness behind, is taking his work again and his trainer, W. D. Howard, hopes to have him in shape for the Columbus Grand Circuit meeting.

Even in England some of the turf journals are advocating the prohibition of bookmaking at race tracks, all betting to be done by the pari-mutual system. They all argue that the bookmakers are killing the game. New York turf journals are also printing articles in the same strain. France and Austria are far ahead of England and the United States in this matter. They have nothing but the mutual pools and the government derives a large revenue from them, while the racing is kept cleaner.

Mr. R. C. Estill, president of the Kentucky Trotting Horse Breeders' Association and proprietor of Elmhurst Stock Farm, Lexington, offers a season to Todd, 2:14½, for the best yearling colt or filly by Todd exhibited at the Kentucky State Fair.

After her race at Buffalo, in which she was distanced, it was found that Miss-in-Law's jaws had been locked by being twisted to one side so her teeth failed to mesh. It required a lot of force to put them back into place.

At the Gentlemen's Driving Club matinee held at Washington Park, Chicago, Mr. Billings drove the pacer, Morning Star 2:04¾, a mile to wagon in 2:06, and Angus Pointer one in 2:06¼. He gave Lou Dillon five heats in the morning in 2:30, 2:26, 2:16, 2:11½ and 2:10¾.

James Y. Gatcomb, one of the many horse owners who resented the action of the Cleveland Driving Park Company in declaring off its Grand Circuit trotting meeting, has instituted proceedings against the organization asking that its directors and officers be suspended by the National Trotting Association for failing to live up to their agreements with the horsemen, says an Eastern dispatch.

If you desire to have something easy to ride in, and comfortable for both you and your horse, call on the Kenney Manufacturing Company, 531 Valencia street, and get one of those McMurray carts. A carload of carts and bikes just received.

A telegram from Cleveland says. As a direct result of the agitation against pool-selling in Ohio, creating a dearth of demand for horses, the famous Two-Minute stock farm, including Star Pointer, 1:59¼, and many other well known horses, will be sold at public sale or in private this fall. This announcement was made by Will B. White, manager of the farm. Among the matrons at the farm are Minetto 2:10¼; Alice M. 2:10, and Javelin 2:08¼.

A dispatch from Chicago states that E. M. Hanna, president of the Cleveland Driving Club, offered C. K. G. Billings \$30,000 for the champion trotting gelding Major Delmar 1:59¾ one day this week, that the offer was refused and then raised to \$50,000, which offer Mr. Billings took under consideration.

Albuta, Col. J. C. Kirkpatrick's gelding by Altivo, took a record of 2:11¼ at Providence on Wednesday of this week.

The Sonoma County Driving Club will hold an afternoon of racing on Saturday, October 14th. A large number of entries are expected, and great interest is taken in the new club by the horsemen of Sonoma county. The meeting will be held at the popular Santa Rosa Stock Farm track.

LABOR DAY SPORT AT INGLESIDE.

On Monday next, September 4th, the San Francisco Driving Club will hold a meeting at Ingleside track. For the five harness events the following entries have been made:

Free for all—Max Levy's Harry Hurst, A. Hoffman's Kitty D., V. Verillhae's Gertie A., M. Donnelly's Flora G., J. Green's Vic Schiller, J. O'Kane's King V., C. Lercare's Charley J.

2:25 Class—Jos. Ryan's Al Sandy, Max Levy's Cash, O. Taylor's Bill Ellsworth, D. Roberts' Eden Vale, E. Cereat's King Cadenza, G. Algeo's Mixer, F. Goumet's Verona, J. Culicello's Rose, R. Adams' Lady Jeffries.

2:30 Class—F. Dickey's Rayo, H. Schottler's Dynamite, J. Paulsen's Moffit D., J. Lawlor's Grace McKinney, P. Pennell's Lucky Prince, T. Cabney's Dick.

2:35 Class—C. Becker's Dan Alden, W. Pease's Monkey, J. Finch's Edward, J. Paulsen's Schilling's Best.

2:45 Class—W. O'Kane's Bay Ike, H. Schottler's Lula E., W. Ferchert's Little Dick, W. Murray's Grlie, J. McTigue's Joe Mc., P. Cheli's Cassie W., D. Selbert's Ed Rea, F. Del Carlo's Nellie B., C. Fulkerson's Dexter Wilkes.

GOOD RACING AT PROVIDENCE.

Sadie Mac Wins Roger Williams \$10,000 Stake.
Bolivar Gets Record of 2:07 1-4.

Grand Circuit racing shifted to Providence, Rhode Island, this week, opening Monday with an attendance of thirty-five hundred. Three good races were decided, fast time being made in the pacing events.

In the first race, the 2:08 pace, Don Carr, owned by Tobias Burke of Providence, was favorite, selling at \$100, with the field at \$60. The big black pacer took the first heat, but dropped the second one to Maud Keswick by a head. In the third heat, however, Clark took his horse out around Keswick on the backstretch, and taking the pole, came down under the wire a winner by at least ten lengths. The California pacer Irish by Monterey out of Juliet D. by McKinney was a starter in this race and earned third money. All his miles were in 2:08 or better. Ben F. was also a starter, but was last in the summary.

Bolivar, the Wayland W. gelding, was favorite for the 2:18 class pace, for which a purse of \$2000 was given. The California horse won the first heat and reduced his record to 2:07 1/4, but the effort was too much for him, and he did not finish better than fourth in the next three heats, which were won rather easily by Doris B., a daughter of Grattan. Stiletto, by Steinway, started, but was last.

The 2:19 class trot was won by the black gelding Marone, owned by W. A. Clark Jr., and driven by Gerrity. Morone wintered at Pleasanton, and his heats in this race, which were all under 2:15, show that he is getting into form again. The summaries:

Trotting, 2:20 class, purse \$2000.

Time—2:09 1/2 2:07 1/4 2:06 1/2

The attendance was largely increased at Providence the second day, the Park Brew \$5000 stake for 2:09 class pacers being the drawing card. After six hard fought heats the finish had to be carried over until Wednesday, with Allerson and Edwin C. each winner of two heats and Walter Direct also winner of two heats drawn on account of lameness.

Harrison Wilkes beat the high-priced Deleree in the 2:20 class trot, and Lizzie G. won the 2:13 class trotting event. In this race the California horse Danube by Direcho, won second money and Helen Norte was third. Lady Sealskin paced a great race in the 2:13 class purse, getting a record of 2:06 1/2 in the final heat. The summaries:

Pacing, 2:08; purse \$1000.

A heavy rainstorm stopped racing at Providence at 4 o'clock Wednesday afternoon.

The principal event of the day, the Roger Williams \$5000 stake, went in straight heats to Sadie Mac, who was a strong favorite. The whole fight in the race was for second place, Lady Gail Hamilton, taking second money, Turley third and Morn fourth.

The unfinished Park Brew carried over from Tuesday brought a surprise. Allerson opened at \$100, and Edwin C. sold for \$30. At the first turn on the get-away Allerson went to a bad break, the first that the gray horse had made in seven heats, and the race was all over, Edwin C. coming in several lengths ahead and winning first money.

Peruna, favorite in the 2:10 pace, won in straight heats. In the second heat, for repeatedly heading the pole horse, Tyson, driving Caffeno, McEwen driving Texas Roker and Brady driving Geers, were fined \$25 each by Starting Judge Newton. On the next trial Starter Newton called the drivers up again and fined

the same drivers \$50 apiece, making a total of \$75, also \$50 for Davis, who drove Owyho.

In the unfinished 2:25 pace Intercean acted badly and dropped the first two heats to Albuta, winning the third, however, after a great drive.

Pacing—The Park Brew stakes; 2:09 class, \$5,000.

THE BRONCHO PACES TO A WORLD'S RECORD.

At Decatur, Illinois, on Thursday of last week, The Broncho, a daughter of Stormcliff, set the world's record for pacing mares in a race at 2:03 1/4 and won the fastest four-heat race ever paced by one of her sex. There were five starters in the race, which was a free-for-all, with a purse of \$500. They were The Broncho, Hazel Patch, Eleanor, Fantine and Nonamie. The whole town shut down and went out to the track almost 15,000 strong, and they were rewarded by seeing the greatest performance in recent years. In the first heat the horses scored away at better than a two minute clip and Dean, taking the mare back, threw her to a break. Hazel Patch and Eleanor went on and raced it out to the time of 2:06 1/4.

After that The Broncho was never headed, and in the third heat she took a mark of 2:04 1/4, putting her out of the 2:06 class. Dean turned her loose for the world's record in the fourth heat, which she took handsly without trouble in 0:29 1/4, 1:01 1/2, 1:32 1/4, and 2:03 1/4.

The stallion Hazel Patch, with his veteran driver, J. W. Flack, never gave up gamely trying, but he could not reach the fleet mare. The summary of the race is as follows:

Pacing, free-for-all, purse \$500.

The Broncho, b. m. by Stormcliff..... (Dean)	4	1	1	1	
Hazel Patch, blk. g. by Hard Patch..... (Flack)	1	2	2	2	
Eleanor, ch. m. by Waltz..... (Johnson)	2	3	3	3	
Fantine..... (Jones)	3	4	4	4	
Nonamie..... (Loomis)	4	5	5	dr	

Time—2:06 1/4, 2:05 1/4, 2:04 1/4, 2:03 1/4.

BLOOD WILL TELL.

The blood of Happy Medium and Geo. M. Patchen 30, by force of merit has given these stallions enduring fame. Among all the sons of Hambletonian that have appeared in this country either in earlier or later times probably no son of that dead hero has ever proved superior as a transmitter of a high rate of speed than Happy Medium. He sired Nancy Hanks 2:04 and such speed has been characteristic of all his generations. His sons have sired extreme speed and one sired the dam of Lou Dillon 1:58 1/2. His grandsons have sired extreme speed as shown by Sadie Mac 2:05, and his daughters have produced extreme speed, as for instance Admiral Dewey 2:06 1/4, and dam of the sire of The Broncho 2:03 1/4, champion pacing race mare. His blood has swelled the honor roll until breeders have come to know his race as one that breeds on through both male and female lines, and produces extreme speed and campaigners. It seemed for a while that Happy Medium was to live in the opinion of many chiefly through Hambletonian, but it seems now that his blood has founded a family differing widely from other sons of Hambletonian, and equally great in quality to any. His blood is like good wine, it needs no bush, and to not know its greatness means to be unlearned in the science of breeding of the speedy harness. Giving all due credit to other great sons of Hambletonian, Nancy Hanks, Lou Dillon, The Broncho and Sadie Mac would alone be a sufficient monument to his blood's worth. His blood is now in great demand, but it should be borne in mind that its value is greater or less in proportion to the quantity and quality of the strains with which it is commingled. To estimate this value correctly we should weigh the evidence in the true balance—the 2:10 list. This shows that the blood of Happy Medium is there mingled with that of Dictator, Edwin Forrest, Arion, Geo. Wilkes, Electioneer, Sidney, American Star, Mambrino Chief, Williamson's Belmont, John Nelson, Director, Pilot Jr., Clay, Blackbird and Geo. M. Patchen 30. Such are the blood lines that have produced Lou Dillon, Nancy Hanks, Sadie Mac, The Broncho, Admiral Dewey and others, and has proved wonderfully potent and a great combination.

I can also see that the blood of Geo. M. Patchen 30, once champion of his sex, is proving through Lou Dillon, The Broncho, Zoelock, Stamboul, John A. McKerron, North Star, Monroe and others that it needs no bush, and to estimate its value correctly we should hold the blood of Geo. M. Patchen in the highest esteem.

SAMUEL GAMBLE.

San Francisco, August 27th, 1905.

STANFORD STAKE OF 1907.

Sixty-seven foals of 1904 were entered in the Stanford Stake of 1907, which closed with Secretary Al. Lindley of the California State Agricultural Society, June 1st, this year. The list of entries is as follows:

Clem R. Arque's Dixielight, br. c. by Searchlight-Dixie.

Clem R. Arque's Sprylight, blk. c. by Searchlight-Boodle.

John Arnett's Chas. Schweizer, b. c., by Sidney Arnett-Miss Brunner.

W. A. Barstow's b. f. Miss Luther, by Nearest-Lenore.

Mrs. S. V. Barstow's br. f. Miss Allright by Greco-Maud J.

T. W. Bartow's br. c. T. W. B. by Nearest-Bessie S.

W. O. Bowers, ch. c. W. O. B. by Silver Bee-Sadie Benton.

I. L. Borden's ch. f. Cresco Belle by Cresco Wilkes-Alice Bell.

Thos. H. Brents' b. f. Reina del Norte by Del Norte-Laurelia.

Alex. Brown's br. f. Nocha by Nushagak-Ploche.

Alex. Brown's br. c. Nusadi by Nushagak-Addie B. Flower.

Alex. Brown's br. f. The Bloom by Nushagak-Red Lottie.

Martin Carter's b. f. by Nutwood Wilkes-Lew G.

Jno. A. Cole's b. f. Lady LeRoy by Petigru-Belle Raymon.

S. Christenson's br. f. by Bonnie Direct-Perza.

C. L. Crellin's b. c. The Limit by Searchlight-Bertha.

Chas. R. Detrick's br. c. by Searchlight-Juanita.

Mrs. L. J. H. Hastings' blk. f. Lady H. by Coronado-Lady Gossie.

W. G. Durfee's blk. c. by Coronado.

W. G. Durfee's b. c. by Petigru-Ida Direct.

W. G. Durfee's ch. f. by Petigru-Joannah Treat.

Dr. J. P. Dunn's b. f. Stambia by Stam B.-Mora Mae.

Robt. Elwert's b. c. Monte McKinney by Monterey-Dot McKinney.

C. E. Farnum's ch. c. by Cupid Hock-Flossie.

E. A. Gammon's b. c. Ed Geers by Bayswater Wilkes-Urana.

E. A. Gammon's, by Bayswater Wilkes-Cleo G.

Carlton M. Greene's b. c. Alesandro by Bonnie Direct-Alix B.

Matt Harris' ch. f. Dorothy Searchlight by Searchlight-Velma.

Mrs. L. J. H. Hastings' b. c. Alone Hastings by Petigru-Juliet D.

F. Hahn's blk. f. by Chas. Derby-Nellie Emaline.

E. P. Heald's blk. c. Tom Murphy by Monterey-Honor.

H. S. Hogoboom's ch. f. Alice Ely by Iran Alto-Azore.

J. B. Iverson's b. c. Baron Wilhelm by Barondale-Wilhelmine H.

J. B. Iverson's blk. c. Iverno by Robin-Ivoneer.

J. A. Jones' blk. c. Chehalem by Capt. Jones-Daisy Q. Hilli.

J. A. Jones' br. c. by Capt. Jones-Maggie Caution.

J. A. Jones' blk. f. Chehalem Maid by Capt. Jones-Amy May.

La Siesta Ranch's Siesta b. c. by Iran Alto-Wanda.

M. L. Lusk's b. c. Zeloso by Zombro-Sallie Brooks.

D. S. Matthews' b. f. Valentine B. by Edward B.-Rhoney G.

W. W. Mendenhall's b. f. Maytime by Stam B.-Elsie Downs.

W. J. Miller's br. f. Ellen M. by Guy McKinney-Kit.

W. A. Murphy's b. f. by Zombro-Maid of Monterey.

W. A. Murphy's b. f. by Zombro-Nellie Bly.

R. O. Newman's br. g. Aloha by Robt. Direct-Peerless Maid.

H. T. Owen's b. f. Irene Ayres by Iris-Babe.

M. J. Reams' b. f. Rosie R. by Demonio-Rosebud.

A. B. Rodman's b. f. by Merry Mac-Grit.

A. B. Rodman's br. c. by Merry Mac-Italka.

Rose Dale Stock Farm's b. c. by Wash McKinney-Daly.

Rose Dale Stock Farm's b. c. by Wash McKinney-St. Whips.

Thomas Smith's b. f. by Nutwood Wilkes-Daisy S.

Jas. J. Summerfield's b. c. Lord Dillon by Sidney Dillon-Rohlet.

Tuttle Bros' b. f. by Suomi-Bell Carter.

Walter Tryon's b. f. by Azmoor-Annie Murray.

L. H. Todhunter's br. c. by Zombro-The Silver Bell.

L. H. Todhunter's b. f. by Azmoor-Bestella.

Valencia Stock Farm's b. c. by Direct Heir-Rose-drop.

Geo. L. Warlow's b. c. by Athablo-Lustrine.

Geo. L. Warlow's b. c. Nogi by Athablo-Cora Wick-ersham.

Geo. L. Warlow's br. c. McKinsky by McKinney Jr.-Donna Trinne.

Geo. L. Warlow's b. f. Soisette by Guy McKinney-Narcula.

Schuler C. Walton's br. c. Athol R. by Athablo-Edith R.

J. W. Zibbell's Teddy Mc., br. c. by Tom Smith-Kate Lumry.

Alfred Solano's Lady Jane Jr., blk. f. by Petigru-Lady Jane.

DOES ALL THAT IS CLAIMED.

Mr. G. E. King of Wingham, Ont., writes as follows: "I had a very valuable mare badly oaped on both hocks. A bottle of Quin's Ointment made her as clean as any horse. It does its work painlessly and I have every reason to believe it will do in any case all that is claimed for it." This is the general verdict of leading horsemen all over the country who are using Quin's Ointment. For curbs, splints, spavins, windpuffs and all bunches try this wonderful remedy. Price one dollar per bottle. Satisfaction guaranteed. Address W. B. EDDY & CO., Whitehall, N. Y., if you cannot obtain from druggist.

Jackson's Napa Soda does not tangle the feet.

OTHER PEOPLE'S OPINIONS.

Kentucky Stock Farm: The chances are that if there is another challenge cup offered by Cleveland for matinee trotters it will not be open to the free-for-alls, as has been the custom in the past. Mr. H. K. Devereux, president of the American League of Amateur Driving Clubs, believes that the proper idea would be to have the event open to 2:10 trotters. If that were the case the entry list would be a large one each year, and all matinee drivers would be encouraged to purchase or breed horses that would be able to trot in that company. This year a lot of amateurs were scared out by the belief that either Lou Dillon or Major Delmar would be starters. Only millionaires can afford to own such horses, and the average amateur driver is really barred out. It is almost as bad with Tom Axworthy and Doctor Strong starting, for there are only a few horses owned by amateurs that are capable of holding their own with either of this famous pair of campaigners. Thus it was two years ago when John A. McKerron, Lord Derby and The Monk were the only starters. All the others were scared out.

Mr. Devereux believes that this race does not properly represent the strength of the matinee sport. "It is now a two or three-horse race," says Mr. Devereux, "when it is within the power of the clubs to make it a ten-horse race. Suppose it was open merely to 2:10 trotters this year. Cleveland would have Aerolite or Leola, Jack Wilkes, Italia, Harry McKerron and Allie Jay that would stand a chance of winning, in addition to whatever horse Mr. Billings would enter. Pittsburg would have three or four eligible and Capable, while Syracuse, New York, Boston, Memphis, Chicago and Columbus would also enter several. In fact, it might be necessary to split the field, whereas now only three or four are liable to start. Cleveland may start Aerolite, but what chance does he stand against Tom Axworthy and Doctor Strong?"

Mr. Billings feels the same in regard to this subject as does Mr. Devereux, and should the challenge cup remain in Chicago the chances are that Chicago will make the event eligible to the 2:10 class next year. Although owning the fastest trotters in the world, Mr. Billings is a man that is most considerate toward his fellow drivers, and he feels that under the present conditions the ownership of a cup racer is something that is restricted to only a few. That he wants to give the owners of slower classes a chance was shown by the fact that he allowed the Cleveland Club to decide which horse he should start in the coming matinee. The members to a man were in favor of one of his slower horses. By that vote they have stretched the race from a two-horse affair to one in which four or five horses may start.

Breeders Gazette: It is said that not so long ago the presence of a famous trainer and his horses spoiled an entire four-day meeting. The other trainers did not care to start against him. There is a lesson in this that might well be taken to heart by all breeders of horses in this day and age. It is the best that gets the money. It makes no difference where, when or how the trial comes, be it in the market place or the race track, superlative excellence draws the money. The American horse market has reached a stage where the wisest critics known to the trade say there will never be any material lowering of prices for good horses of any real commercial class—the heavy drafter and the carriage horse for instance—for the reason that conditions requiring their use have become so firmly fixed. Times may change, but the cities have grown so large and the country so populous that the merchants must have the drafters, and if those do profitable work they want the carriage horses for purposes of recreation. It seems to be a sort of a reciprocal arrangement. But the point is to get into the business right. We see, especially at this time of the year, thousands of nondescript horses auctioned off in the great marts, many times at less than country cost, but let a good horse, suppose he is only a good "wagon" horse, be led in and the bidding springs into liveliness at once.

Spirit of the West: There appears to be greater interest manifested in the county and district fairs this year than for several years past. It is an indication that farmers and business men in the county seat towns appreciate the value of holding fairs. A well managed county fair will greatly benefit the farmers and live stock producers; it will also help the merchants and the business interests of the county. Successful county fairs means more improved live stock, more money to the producer and farmer, and counties that do not hold fairs are not up to date either in stock raising or farming. Imagine the increase in wealth to each county, by the reason of holding a good county fair each year, that from one to ten dollars per head is added to the value of swine, sheep, cattle and horses by improving the breed. Every farmer and business man, property owner as well as renter, is interested. The general benefit to the county helps every resident of the county, and every one should take an interest and give their county fair loyal support.

American Horse Breeder: When the plan now famous as the Buffalo plan was promulgated by its author, it was with the idea that it would prove beneficial to campaigning horsemen at large and prevent the laying up of heats, which was all very good as a theory, but which has proven the exact reverse when put in actual practice, as will be seen by a glance at the table of the money winners at Buffalo, published in our last issue, for where a horse was benefited by

the rule, it was only at the expense of the others in the race.

Take, for example, the Empire State purse of \$10,000, won by Sadie Mae, in which but \$8000 was raced for, the other \$2000 being held over for a consolation race. Under the new plan, Sadie Mae won \$4400, or \$400 more than she would receive, had the usual method of dividing the money been in force, whereas in the cases of Zephyr, Miss Gay and Brownie Wilton, each received respectively \$80, \$480, and \$320 less, while Bonnie Russell for finishing third (after laying up the first two heats, for he finished ninth and eighth in them) gets \$480, which really came out of the pockets of the other three, as did the \$400 extra won by Sadie Mae.

Take another race, that won by Hardwood. The latter was benefited, as were both Getaway and Belle Isle, but at the expense of Sister Collette, who stood second in the summary, and would have received second money under the usual plan, whereas under this new method, she gave the fourth horse \$50, the third \$15 and \$5 to the winner.

These two are merely examples cited to show the unfairness of dividing the money in this manner, for in no case was a money winner benefited unless it was at the expense of some other horse, and it is safe to say that what with the exhibition made at Detroit, where this rule was also in force, this method of dividing the money will not be popular with the horse owners in general and it will probably be relegated to where "the woodbine twineth," for it not only has not prevented that for which it was intended, viz., the laying up of heats, but has also proved a detriment to the "honest horse."

HORSEBACK RIDING FOR WOMEN.

Horseback riding is a means of pleasure and exercise, which is of course limited to the lucky girls whose indulgent "poppers" have bank accounts with money in them—not the kind of bank accounts that most of us have—the sort that leaks at the corners and run dry just at the moment when we need them most. But for the girl who is looking for an excuse for spending money, horseback riding is about the sanest, most beneficial and delightful fad that she can find in a long, long search.

A graceful woman who understands "form"—which is merely another way of saying that she understands how to sit, hold the reins and manage her mount—makes a very charming picture cantering through the soft bridle paths of the city parks. If she fails to receive the keenest kind of enjoyment from this extremely healthy sport it is because her heart possesses little of the effervescent yeast of human delight. There is wholesome exhilaration about the fun that puts golf, tennis and all the rest far back into the shadows.

Naturally the first thing a woman thinks of is her habit, which style of riding gown will prove most becoming. The second thought is that of getting a good horse of which she may be proud. Neither one idea nor the other should be first, or even second.

It is safe to say that there is absolutely no such thing as a sure, reliable horse that will never run or shy, unless one picks out a weary old nag whose fire and spirit departed many years ago. However, no woman who rides horseback should risk her life with a horse that is really extremely high-spirited. The sidesaddle and her long skirts, to say nothing of her lack of strength, scarcely put her in a position to save herself in moments of emergency and danger.

The selection of a good horse, one that is tractable, neither slow nor too fast, is the paramount necessity. A good, strong saddle is the next consideration.

Before attempting to ride, a woman should make friends with the horse. She should visit him at the stable, feeding him oats or sugar from the hand, petting him, overcoming any natural timidity she may have, and thus permitting him to become acquainted with her. The theory of the management of a horse should be explained to the amateur. She must be made to understand the necessity of riding from balance instead of pulling herself up by the horse's mouth, and be shown the action of the curb chain on the chin so that she may know just why the snaffle should be used for ordinary purposes, so that in cases of emergency she may have the curb to fall back upon.

It should also be explained to her that if she pulls against him the horse will invariably pull against her and that therefore she must not keep a dead bearing on his mouth. The reins require delicate manipulation, and a horse can be kept collected and in order by a light felling on the curb and a very light touch of the whip.

The riding master will teach her many things before she even attempts to get on the horse's back.

He will tell her the folly of trying to make the horse trot by attempting to rise. Unless the animal is trotting squarely she must sit close to the saddle instead of bobbing up and down like a shuttle. He is quite sure to jog or go unevenly at first. All that is necessary to start the horse into a canter is to elevate the hands a trifle and touch the horse lightly on the shoulder with the whip.

The favorite manner of many horseback riders is to tug at the reins, dig the animal in the ribs and keep up an everlasting clucking. This causes a nervous horse to become confused and excited, and it should be the one thought always of the rider to keep her steady quiet and in good temper. She not only annoys her own horse by elucking and fussing, but she is likely to cause annoyance to other riders whose horses do not know whether or not the signals are for them.

At the beginning of the first lesson the pupil is placed in the saddle, not allowed to touch the reins, and the horse is led at a slow walk, so that the proper positions are explained. It is impressed over and

over upon her mind that she must not depend upon the horse's mouth or the reins for balance, but rather by the correct position, a firm seat and absolute balance above the waist.

During this lesson she is told to sit close to the saddle, although the horse is touched up to a slow trot and a quiet canter follows. If she is particularly quick to grasp the ideas, she is then allowed to rise to the trot, and after the motion of the horse is once caught she will have little difficulty in rising regularly with the action of the horse's forelegs.

At this point she is given the reins, which she holds in both hands, which habit will be less likely to cause her to sit askew. The experienced horseback rider can of course carry the reins in the left hand, with the short whip in the right. The instructor will show her how the left snaffle rein goes outside of her little finger, the left curb between the little and third finger, while the right curb is placed between the second and third fingers and the right snaffle between the first and second fingers.

The correct position for riding is an erect body, the shoulders set squarely to the front and thrown back well, the head up high, the chin set back firmly and the arms hanging free and loose to the elbow. Let the hands be close together and held low, and the right knee always immovable, for she must not rise from that part of the body. The ball of the left foot rests in the stirrup, while the left leg must be held quiet, the heel being away from the horse.

When Mr. Horse stumbles the rider must sit well back and pull up his head. If he rears, the reins must be left loose and the body thrown forward. The habit of suddenly backing must be corrected by a sharp little crack of the whip. When the horse shys or becomes skittish the thing is to sit close. In case of a runaway, no good is to be accomplished by jumping, and there is always a possibility of the gown or foot catching—and, in that event, all sorts of trouble will ensue. All the unfortunate woman can do is to sit close, try to guide the animal and trust to luck or a policeman.

To come to the question of costume, it is a foregone conclusion that the divided skirt is the most sensible thing yet devised. Whether or not a woman selects this kind of a garment depends upon her own ideas concerning the fitness and modesty of such radical dress. Certainly it is her privilege to clothe herself as she pleases. It is a question of greater comfort and safety and that alone is sufficient excuse for divided skirts.—Mime. Qui Vive, in Record-Herald.

BEHIND THE TIMES.

A New York paper which pays attention to matters pertaining to autoists as well as to those of interest to horsemen tells some plain truths about the advertising methods of the men interested in the two branches of sport as follows: "Lovers of the horse and manufacturers of vehicles, harness and other accessories should take heed of the enterprising methods of the automobile's producers and users in advancing their respective claims to recognition. By comparison the 'hoss fellers' have been away behind the times, we regret to say, not only in their advertising methods, which are too skimpy, but by their lack of public spirit in promoting and fostering institutions that labor in the field for their benefit. It is distasteful to these interests to admit it, but the fact cannot be denied that more advancement has been made in many directions, say, for example, in the improvement of roads, since the advent of the bicycle and the automobile than had been accomplished in decades of years before. Of course, the automobile users have been almost entirely recruited from the higher ranks of the horsemen, and, therefore, the credit for what they have done is to be equally divided. But it is not to the amateur patron of either the horse or the machine that we are addressing these remarks; they apply more particularly to the professional elements in each case, as they are supposed to take the initiative and their patrons afterwards, when shown the way, set the liberal pace." It is a fact that, as a rule, the industries allied with the horse are about the poorest advertised of any of the trades which depend so largely on a floating trade as they do. One-half the money that was spent in advertising automobiles last year, intelligently spent in informing the public of the great enjoyment to be gotten from the use of horses in the various ways they may be used, would have added so largely to the ranks of those who do use them as to have increased the trade in driving and riding equipments to an extent that would have been vastly pleasing to the manufacturers and dealers in goods of that kind. There is no use in talking, advertising is the power which has done so much to increase the sales of automobiles and the lack of its use by those interested in the horse and his equipment is responsible largely for his not being in greater use than he is as a means of pleasurable recreation.—Horse World.

There is no telling just how much difference there is between racing over a half-mile and a mile track. Opinions vary as to the difference in time, some claiming that not more than three seconds mark the actual handicap of racing over a two-lap track. At Colorado Springs the chestnut gelding Dewey, who gained a record of 2:13½ at Denver, was beaten in 2:20 in the first heat of the 2:14 trot, while four days later he was beaten in 2:21½ over the same track.

Cresceus 2:02¼, the champion trotting stallion, will be sold at auction at the Fasig-Tipton Old Glory sale in November. He is already a 2:10 sire and should bring quite a sum of money as he would be a very profitable horse to stand for public service at \$100 the season. It ought to be easy to clear \$5000 a year with him.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

Coming Events.

Rod.

April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steel-head in tidewater.
April 1-Sept. 15—Closed season for lobsters and crawfish.
April 1-Nov. 1—Trout season open.
June 1-Jan. 1—Open season for black bass.
Aug. 26—Saturday Fly-Casting Contest No. 10. Stow lake, 2:30 p. m.
Aug. 27—Sunday Fly Casting Contest No. 10. Stow lake, 10 a. m.
Sept. 10-Oct. 16—Close season in tidewater for steelhead.
Sept. 10-Oct. 16—Close season for catching salmon.
Oct. 16-Nov. 15—Close season for taking salmon above tide water.
Nov. 1-Sept. 1—Open season for crabs.
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

Feb. 15-Sept. 1—Closed season for mountain quail, grouse and sage hen.
Feb. 15-Oct. 15—Closed season for quail, ducks, etc.
April 1-Oct. 15—Closed season for English snipe.
July 1-Feb. 15—Love season open.
Aug. 1-Oct. 15—Deer season open.
Aug. 20—Mount View Gun Club. Blue rocks. Mount View, Cal.
Aug. 27—Millwood Gun Club. Blue rocks. Mill Valley Junction.
Aug. 29, 30—Interstate Association tournament. Blue rocks. Denver, Col.
Sept.—Sebastopol Gun Club. Blue rocks. Every Sunday.
Sept.—Napa Gun Club. Blue rocks. Every Sunday.
Sept. 3—Golden Gate Gun Club. Blue rocks. Ingleside.
Sept. 3—Blue Rock Gun Club. High-street grounds, Alameda.
Sept. 9, 10—Empire Gun Club. Merchandise shoot. Blue rocks. Alameda Junction.
Sept. 1, 17—Petaluma Gun Club. Blue rocks. Kenilworth Park.
Sept. 15, 16, 17—Interstate shoot. Blue rocks. Ingleside. Elmer E. Shaner, Manager. Pacific Coast Handicap under auspices of S. F. Trapshooting Ass'n., A. M. Shields, Secretary.
Sept. 17—Union Gun Club. Blue rocks. Ingleside.
Sept. 10, 24—Santa Rosa Gun Club. Blue rocks.
Sept. 10, 24—Vallejo Gun Club. Blue rocks. Floden Station.
Sept. 30-Oct. 1—Two-day blue rock tournament. Biggs Gun Club. Biggs, Butte county. H. Haselbusch, manager.
Oct. 1—Pacific Coast Trap Shooters' Association. Merchandise shoot. Blue rock. Empire Club grounds, Alameda Junction.

Bench Shows.

Sept. 4—Long Island Kennel Club. Brighton Beach, L. I. Jos. M. Dale, Secretary.
Sept. 4—Rhode Island Kennel Club. Crescent Park, East Providence, R. I. H. M. French, Secretary.
Sept. 4, 5—Miller's River Kennel Club. Athol Mass. Wm. W. Sutton, Secretary.
Sept. 9—San Mateo Kennel Club. 2nd annual open air show. Burlingame. D. J. Sinclair, Secretary.
Sept. 9—Cedarhurst Kennel Club. Lawrence, L. I. John G. Bates, Secretary.
Sept. 11, 13—Newport Dog Show. Newport, R. I. Francis M. Ware, Secretary.
Sept. 16—Englewood Kennel Club. Englewood, N. J. M. W. Robinson, Secretary.
Sept. 18, 21—Genesee County Agricultural Society Kennel Club. Batavia, N. Y. A. E. Brown, Secretary.
Sept. 23—Madison Athletic Association. Madison, N. J. E. L. Jones, Secretary.
Sept. 25, 26—Miami Valley Kennel Club. Piqua, Ohio. Edwin A. Hiatt, Secretary.
Sept. 27, 28—Valley Fair Kennel Club. Brattleboro, Vt. Howard C. Rice, Secretary.
Sept. 30—Bryn Mawr Kennel Club. Haverford, Pa. Henry D. Riley, Secretary.
Oct. 3, 6—Texas Kennel Club. Dallas, Tex. W. H. Ordway, Secretary.
Oct. 3, 6—Danbury Agricultural Society, Danbury, Conn. G. M. Rundle, Secretary. Jas. Mortimer, Superintendent.
Oct. 11, 14—Spokane Kennel Club. Spokane, Wash. A. B. Jackson, Secretary.
Oct. 17, 20—Frederick Agricultural Society. Frederick, Md. J. Roger McSherry, Secretary.
Sept. 28, 29, 30—Stockton Kennel Club. F. A. Geisea, Secretary. Stockton, Cal. D. J. Sinclair, Superintendent.
Nov. 15, 18—Boston Terrier Club Specialty Club. Boston. F. H. Osgood, Secretary.
Nov. 28-Dec. 1—Philadelphia Dog Show Association. Philadelphia. J. Sergeant Price Jr., Secretary.

1906.

Feb. 12, 15—Westminster Kennel Club. New York. Robt. V. McKim, Secretary.
Feb. 20, 23—New England Kennel Club. Boston. Wm. B. Emery, Secretary.
Feb. 28-March 3—Washington Kennel Club. Washington, Pa. F. C. Thomas, Secretary.
March 7, 10—Duquesne Kennel Club. Pittsburgh, Pa. F. S. Steadman, Secretary.

Field Trials.

Aug. 23—North Dakota Field Trial Club. Inaugural trials. Grand Forks, N. D. A. E. Palmer, Secretary. Grand Forks, N. D.
Sept. 4—Nebraska Field Trial Association 4th annual trials. O'Neill, Neb. H. H. McCarthy, Secretary. O'Neill, Neb.
Sept. 6—Manitoba Field Trial Club, 19th annual trials. La Salle, Man. Eric Hamber, Secretary. Winnipeg Man.
Sept. 11—Northwestern Field Trial Association. Inaugural trials. O'Neill, Neb. C. W. Huttles, Secretary. Kansas City, Mo.
Sept. 21—British Columbia Field Trial Club. 3d annual trials. Ladner, B. C. H. S. Rolston, Secretary. Vancouver B. C.
Oct. 12—Pacific Northwest Field Trial Club. La Conner Flats, Wash. Chas. L. Lundy, Secretary. Seattle, Wash.
Oct. 23—Ohio Field Trial Association. Washington Court House, O. C. T. Phillips, Secretary. Columbus O.
Oct. 30—American Field Futurity Stake. For Pointers and Setters whelped on or after January 1, 1904. whose dams have been duly qualified. Robinson, Ill., entries closed July 1. Address Am. Field Publishing Co., Chicago.
Oct. 31—Connecticut Field Trial Club. Hampton, Conn. F. M. Chapin, Secretary. Pine Meadow, Conn.
Nov. 6—Independent Field Trial Association. Huntsville, Ill. S. H. Socwell, Secretary. Indianapolis, Ind.
Nov. 8—Dayton Pointer Club. Dayton, O. John Roehm, Secretary. Dayton, O.
Nov. 13—Illinois Field Trial Association. Robinson, Ill. Wm. R. Green, Secretary. Marshall, Ill.
Nov.—Indiana Field Trial Club, (Week following Illinois Champion Stake). C. F. Young, Secretary. Clay City, Ind.
Nov. 21—International Field Trial Club. Ruthven, Ont. W. B. Wells, Honorary Secretary. Chatham, Ont.

Nov. 28—Virginia Field Trial Association. Martinsville, Va. Chas. B. Cooke, Secretary. Richmond, Va.

Dec. 2—Continental Field Trial Club, 11th annual trials, John White, Secretary, Hempstead, Long Island.

Dec. —Pointer Club of America (following the Continental trials). Barber, N. C. C. F. Lewis, Secretary, 136 Maiden Lane, New York.

Dec. 12—Eastern Field Trial Club. Waynesboro, Ga. S. C. Bradley, Secretary, Fairfield, Conn.

1906.

Jan. 8—Georgia Field Trial Association. Waynesboro, Ga. P. M. Essig, Secretary, Atlanta, Ga.

San Francisco Fly-Casting Club.

The fractions in lure casting are 15ths.

TWENTY YEARS' SNIPE SHOOTING.

There was printed a remarkable book with the above title in 1899, at the Knickerbocker Press, New York. As it was published for private circulation only, and no copies apparently were sent out for review, it has escaped the notice of the critics, and is probably known to few readers beyond the immediate circle of the writer's own friends, amongst whom the book was distributed.

It is a volume of some 300 pages, consisting of extracts from the journals of the late Mr. J. J. Pringle, a noted Southern snipe shooter, and is illustrated with twenty-four photographs. The scene is laid at Oaklawn, Bayou Teche, in southwest Louisiana, where for twenty seasons Mr. Pringle enjoyed some of the finest snipe shooting in the world. It has been generally believed that the largest bags of snipe made by a single gun have been obtained in India, Ceylon and Egypt, and the remarkable bags made in Ireland by Colonel John Peyton, as recorded by Sir R. Payne Gallwey in his "Fowler in Ireland," should not be overlooked, but all these are put completely in the shade by the results obtained in Louisiana by Mr. Pringle between the years 1867-1887, when the country over which he sported was a perfect paradise for the snipe shooter. The ground over which he shot is thus described:

"A few miles from Berwick's Bay there enters from the west the Bayou Teche, loveliest of Southern streams, navigable for more than 100 miles, preserving at all seasons an equal depth and breadth; so gentle is its flow that it might be taken for a canal, did not the charming and graceful curves by which it separates the undulating prairies of Attakapas from the alluvium of the Atchafalaya mark it as a work of nature. The Teche waters the parishes of St. Mary, New Iberia, St. Martin, Lafayette and St. Landry—the Attakapas home of the Acadians."

Such was the condition of the country as Mr. Pringle found it in 1867, and as it continued for the first fifteen or sixteen years of his shooting. It was, however, quite changed in later years by the extension of the New Orleans and Opelousas Railway, now part of the Southern Pacific system, from Berwick's Bay, its then terminus, to Franklin, eight miles from his shooting shack (which he called "The

Snipery") and afterwards to San Francisco. Then the prairies and marshes which previously had been grazed over by herds of cattle, affording excellent feeding ground for snipe were gradually fenced, drained and tilled, and the snipe grounds over which he used to shoot were gradually curtailed, and eventually entirely destroyed.

His favorite ground consisted of low lying marshes, with a green aquatic weed, which he called blue iris, bearing a beautiful blue flower in spring, and other water weeds and grasses affording excellent cover for the birds. Adjacent to these lower marshes, which he called the lower grounds, about fifteen to thirty inches above their level, sloping down to them with a gradual and almost imperceptible descent, was a low undulating prairie, which he called the upper grounds, in the depressions of which also grew the blue iris and various water grasses. The birds were generally found on the lower ground in dry weather, or when there had not been rain enough to submerge them; but in wet weather, when these lower marshes were too much flooded, they resorted to the upper grounds.

The walking, as snipe shooting goes, was uncommonly good, so that one could get over the ground at a good pace, which in a measure accounts for the large bags that were made, although, of course, the good shooting must be taken into account.

When snipe were abundant Mr. Pringle kept his dog—either Setter or Pointer—at heel, and only used him to "seek dead," not to retrieve; for a dog sent out to retrieve would have put up many birds which would have gone off, some of them unshot at. So that by walking to the dead birds and picking them up himself he got many more shots. This, of course, gave more walking, but more shooting. He had an old negro attendant who was a wonderful marker, and it was his business when birds were rising fast and the shooting was rapid to mark down and keep count of the dead birds, and then report the number down. Standing quite still and indicating the spots one after another, Mr. Pringle would walk to the dead birds and pick them up. When snipe were numerous he would sometimes have ten or a dozen down at the same time, and by pursuing this plan in going from one to another, by the time he had gathered these he would perhaps kill several more, the majority of which would have escaped unshot at if he had sent the colored man or dog for them.

Mr. Pringle's method is so instructive to snipe shooters that it deserves to be quoted at length:

"On reaching the ground and getting out of the wagon, I would station it on a ridge, with orders to keep within signalling distance, and when I required more shells, or my men had as many birds as they could well carry, I would signal, and it would come to me as fast as possible. When birds were abundant I never allowed the dog to range, for a snipe is a very wild bird, with but little scent and a dog, however good and careful, would flush out of distance many more birds than he would point.

When practicable I shot down wind, with a marker or beater walking abreast of me about fifteen yards off; with two beaters, one on each side of me, I would have the wagon meet me to leeward, and when I got to the end of the beat I would drive over the ground I had just beaten, so as not to disturb the rest of it, and take another parallel beat down wind, and so on until I had shot all that ground out. Oftener, however, I would begin on the weather side of the ground, and beat across wind. My beaters, if I had more than one, were then both to leeward of me, the one next to me about fifteen yards off and somewhat behind me, the other the same distance from the first and a little behind him. So, as snipe on raising generally fly to windward, I got shots at the birds rising, not only before me, but before my beaters. This would give me longer shots, but more of them. In shooting up wind—which, from the lay of the ground, I sometimes found it convenient to do—my marker would walk on a parallel line with me, about fifteen yards off and well behind—the wilder the birds the farther behind; with two beaters, one on each side of me, I walked well ahead. Indeed, I reduced the shooting of these grounds to a system (to which, to a certain extent, was due my large bags), so as to get each day as many birds as possible in as short a time as possible."

What these bags were like may be seen from the following extracts from the journal which was carefully posted up each day on his return from shooting; the season commencing on November 1st and ending about the middle of March.

The best six consecutive shooting days, with a rest between, were experienced in November, 1874. Thus: 19th November, 207; 21st November, 214; 23d November, 228; 25th November, 301; 27th November, 208; 30th November, 256; total for the six days, 1,414. In seven days in December, 1887, the bags were 270, 255, 366, 271, 286, 233 and 262; total, 1,943.

Over 300 a day were killed on certain occasions, making 972 in the three days. Over 200 a day were killed on twenty-six days, making in all 6,378, and 100 and upwards were bagged on 285 days, giving a total of 40,367 snipe. During the twenty seasons' snipe shooting, from 1867 to 1887, the following extraordinary result was obtained.

Season.	Shooting days.	Snipe.	Season.	Shooting days.	Snipe.
1867-68	24	1,861	1878-79	29	3,085
1868-69	38	3,645	1879-80	31	2,434
1869-70	40	4,091	1880-81	47	3,493
1870-71	30	3,412	1881-82	39	3,238
1871-72	37	4,142	1882-83	41	2,521
1872-73	23	2,006	1883-84	49	3,734
1873-74	32	3,100	1884-85	27	2,403
1874-75	42	6,615	1885-86	48	3,744
1875-76	42	5,048	1886-87	26	2,085
1876-77	28	3,116			
1877-78	38	5,314	20 seasons, 711 days,		69,087

It only remains to add a few of Mr. Pringle's remarks on the guns used, powder and shot.

"For a few seasons I shot with guns of Lang, Purdey, and Grant; afterwards altogether with Purdey's hammer cylinder; then (when they came in) with a Remington hammerless choked—the perfection of guns, in my opinion—they shot so hard, wore so well, and handled so beautifully as to leave nothing to be desired, weighing 6 lb. 10 oz. As to shot. No. 9 chilled shot was used, sometimes No. 8 for the left barrel; I stuck to black powder for a long time, for I always had a feeling that it shot stronger. Eventually, however, I used Schultz, though to the end I occasionally used black for the second barrel. I shot with only one gun at a time, and had no loader. From much practice I became very expert and quick in loading. Keeping the shells loose in an open pocket, I could slip them in with great rapidity."

Though much exposed to wet and cold, this incessant snipe shooter was never prevented from shooting by ailment of any kind, except once, in the season of 1878-1879, when he had a severe attack of rheumatic gout, complicated with malaria, but that did not prevent his killing that season 3,085 snipe in twenty-nine days.

Mr. Pringle's journal is a book for Sacramento county snipe hunters to gloat over, and snipe shooters into whose hands it may chance to fall will do well to peruse it, and profit to a limited extent by the writer's experience, though they can never hope to meet with his success, and it is to be sincerely wished they do not, nor that they have the opportunity so to do.

INTERSTATE ASSOCIATION.

1905 Pacific Coast Handicap at Targets.

The largest blue rock tournament that has ever been held on the Pacific Coast will take place at the Ingleside grounds, in San Francisco, September 15th to 17th inclusive, under the management of the Interstate Association, with Mr. Elmer E. Shaner at the helm. Mr. Shaner is so well known among the shooting fraternity that the success of the undertaking is assured.

There will be ten or twelve of the greatest experts from the East in attendance, as we have assurance

R. O. HEIKES

that Gilbert, Crosby, Hirschy, Heikes and Fanning are scheduled for the San Francisco event. As these men are all experts and manufacturers' representatives, they will not be allowed to compete for any of the prizes or purses, but will shoot in the events for exhibition purposes only.

The events for three days consist of ten fifteen-bird races, five twenty-bird races, and two handicap races of 100 birds each, one to be known as the "Preliminary Handicap," and the other as the "Pacific Coast Handicap." The winner of either of these events will receive a beautiful silver cup, emblematic of his winning. The cups are the product of the factory of Shreve & Co., San Francisco.

A handicap committee has been appointed, consisting of the following well-known shooters, who are thoroughly capable of placing each shooter at his proper distance, in these events: M. J. Iversen, San Francisco; W. H. Varien, Pacific Grove; M. Abrahams, Portland; Guy Lovelace, Los Angeles, and F. K. McBroom, of Spokane.

All events (except the two handicaps mentioned above) will be shot from the 16-yard mark.

The development of the sport of trap shooting during the past ten years has been really phenomenal. Gun clubs are now numbered by the thousands, and there are but few of the many thriving cities and villages on the Coast that do not have organizations devoted to the sport of shooting at the traps. America is far ahead of any other nation, in fact surpasses all other nations combined, in respect to the number of clubs of this description. Other countries—particularly Great Britain—have perhaps as large, if not a larger, percentage of sportsmen fond of recreation with shot gun and rifle, but trap shooting, and especially the use of flying targets, seems to be almost a distinctively American pastime, and one which may before many years vie in popular interest with the national game of base ball. It is, of course, a pastime so entirely different from base ball that comparison can only be made as to their respective popularity, and it would seem safe to prophesy that if gun clubs increase in number as rapidly in the next ten years as during the past decade the trap shooters of America will far outnumber the active base ball players.

The reason of this remarkable development of shooting at the traps is largely the influence of the sportsmen's press. Surprising as it may seem the daily press, although keenly alive to the importance of recording in detail the news connected with almost every other branch of sport, has given comparatively little attention to trap shooting except where large tournaments are held attracting prominent sportsmen from various localities. A few sportsmen's journals, however, of national circulation and powerful influence among devotees of field sports, have constantly and consistently advocated the advantages that are to be found in this line of recreation, so well adapted to the wants of those desirous of enjoying frequent outings within convenient distance of city or town as a recreation and relaxation from business cares. That this line of out door sport is conducive to health may be best attested by the physical vigor of a vast majority of those who participate in frequent club shoots.

Through the rapid increase in numbers of trap shooting enthusiasts there has been a corresponding increase in the demand for guns, ammunition, traps, targets, etc. So great has been the increased sales of these appliances that trap shooting may be regarded as an important factor when considering the causes which have necessitated enlarging the facilities of the various mills and manufacturing factories devoted to the production of sportsmen's supplies. If it be true that he who causes two trees to grow where but one grew before is a public benefactor, it is not unreasonable to affirm that the periodicals devoted to healthful open air sports are doing commendable work, and are therefore entitled to the friendly consideration of those who derive benefit from the practice of these invigorating pursuits.

Although the development of the sport of trap shooting has been almost phenomenal during the past decade, there is still opportunity for further popularizing this branch of outdoor sport to a remarkable degree. Thousands of gun clubs are now in existence where only a few hundred clubs existed twenty years ago, but with the proper spirit of progressiveness in the sport in every section of the country doubtless the number of gun clubs in the United States could be readily doubled. Much of the present popularity of shooting at the traps is due also to the work of the Interstate Association, and the well directed efforts of trade representatives.

The great necessity at the present time is to stimulate and retain the active interest of the inexperienced shooters, those who can never hope under equal conditions to share in division of prize money. This is a phase of the sport recognized in a practical way by the majority of trade representatives and by the Interstate Association, as the experts in the majority of the tournaments shoot for targets only, receiving no share of the prize money except in general averages. Of course, many who shoot at the traps belong to that class known as "cheerful contributors." They shoot purely for sport, and they have no expectation of winning prize money, but as a matter of fairness and for the purpose of retaining the co-operation of this very desirable class of gentlemen sportsmen there should be such provision made when the club engages in sweepstake shooting that this is optional, so that the burden of expense falls upon those who have a reasonable fair chance of sharing in the purses. The system of handicaps can to some extent equalize the chances of the poorer shooter as compared with the expert, but no system yet devised has fully met the expectations of all classes of shooters. It is taken for granted that a large majority of those who shoot at the traps do so for love of the sport, and not for the desire or expectation of winning money, therefore everything that tends to stimulate this love of recreation for the sport itself is to be highly commended. Club medals and trophies, even though of small value, would be prized more highly by the amateur shooter than any prize money.

To preserve harmony and insure the co-operation of all club members there should be an active interest on the part of all, so that the work should not fall almost entirely upon the secretary and one or two other officials. This unequal division of work and time becomes monotonous even to the most enthusiastic, and the fall of many small gun clubs may be traced to this source. In nearly every large city of the United States gun clubs exist of correspondingly large membership, but the great chance for the development of the sport of trap shooting is in the smaller towns. In many of these no gun clubs exist, and there is a good field for promoting an interest on the part of sportsmen in such localities.

Well regulated gun clubs not only develop accuracy of aim in shooting, but carefulness in the handling of guns as well. In fact, there could be no better primary school for the beginner than the practice at the traps. Here the club rules compel observance of necessary plans of caution, and when these are thoroughly learned the shooter will never, under any circumstances, endanger the life of any one by careless shooting. Many other considerations might be mentioned to show the value of trap shooting as a form of outdoor recreation. For example, thousands of men in cities who can readily spare a half day each week to enjoy sport of this kind, which may be had in the immediate vicinity, could not well devote the time required for a trip to distant game fields, and hosts of enthusiastic young shooters take delight in their Saturday's half holiday, or as in vogue on the Pacific Coast, Sundays, at the traps—a healthy form of diversion at moderate expense.

Practical men have given much thought and careful consideration to the matter of handicapping shooters equitably in target shooting. The system of handicapping by fixing the number of yards at which each contestant shall stand, from the traps, can be made to equalize the chances of the expert and skillful amateur to a reasonable degree, and many gun clubs have adopted this with general satisfaction.

Basing the handicap of each shooter upon his previous record the system appears to be a fair one to all concerned. The primary purpose, of course, is to so equalize the shooters that none shall have an obvious advantage, and a careful analysis of scores should show when this object has been gained.

If, at the close of a large tournament, or, preferably—for a more conclusive test—a series of tournaments, the majority of leading prize winners under any given system of handicapping prove to be the experts, then the natural presumption is that the expert class has not been handicapped heavily enough. On the other hand, if the amateurs win nearly all the prizes there is good reason for believing that the expert has been too severely handicapped, and a readjustment on the basis of equalizing chances of all concerned will afford more uniform satisfaction. The amateur requires every encouragement consistent with justice, to insure the permanency of trap shooting, yet the majority of amateur trap-shooters would not desire handicaps which would practically exclude the experts from any wins, when the latter are welcomed in open competition. At the G. A. U. in 1903, for example, the scores of the big event indicated that the experts were too severely handicapped.

At nearly all the tournaments, it is believed, the handicapping committee keeps in mind the motto—"a fair field, and no favor," and if, in some instances and apparent advantage seems to be in favor of the expert, or of the amateur, as the case may be, there should be no occasion to cast reflections or accusations. A readjustment for the future, in such cases, will serve a better purpose than kicking.

AT THE TRAPS.

The Golden Gate Gun Club shoot at Ingleside tomorrow will wind up a successful trap shoot program for 1905. During the past six months the club members have received \$600 in cash prize moneys. The final club purse tomorrow will be \$100—\$25 for each class.

The club membership is large and the organization is growing in popularity with the shotgun fraternity. Motions for next season are strong for an increase in members, double the present number.

The ownership of the high average trophy donated by Mr. A. M. Shields will be determined tomorrow. The leading contestants are M. O. Feudner and A. J. Webb, 540 each out of 600. Ed Schultz is next man

TOM A. MARSHALL

up. W. H. Varien, who has a back score to shoot, stands a strong chance to tie the leaders. At all events the race will be one worth seeing.

The Vallejo Gun Club offers, as an attraction for the attention of shooters of Napa Valley and vicinity, a big merchandise shoot to come off tomorrow at the Florsden station trap ground. The Vallejoans are a jovial and hospitable bunch of sportsmen and it is safe to say that there will be a full complement of saucer smashers on the firing line tomorrow.

A small, but select, assembly of shooters on the Watsonville Rod and Gun Club grounds on the 20th inst. kept the traps going for a while.

Among those who shot in two 20-target events were: W. H. Varien, Pacific Grove, 16-20; H. M. Greene, Pacific Grove, 15-16; "Pop" Carr, Pacific Grove, 17-18; Dr. A. M. Barker, San Jose, 20-17; Mr. Gammond, Pacific Grove, 17-16, and Tom Work, Pacific Grove, 16-18.

The Petaluma Blue Rock Club held the third and final prize shoot on the 20th inst. J. Lopus won the gold medal, scoring 50 out of 75 in three shoots. T. Mego won third prize with a score of 46.

The Santa Rosa Gun Club has planned a big trophy shoot for September 20.

At a recent trap shoot held at Trinidad shooters from Eureka, Blue Lake, Arcata and other points participated. The occasion was the regular monthly shoot of the Trinidad Gun Club—with a clam chowder outing on the side.

S. P. Cummings won the club gold medal, 19 out of 25. The scores in two events were:

First event, 25 targets—Dr. Dungan, 14; F. Robinson, 11; S. Clanton, 17; Holmes, 19; H. Buhne, 33; Clancy, 16; Dean, 16; E. Beach, 11; G. Pinkham, 16; F. Walte, 14; H. Kelly, 19; E. Sammons, 15; F. Parker, 20; Tom Tighe, 10; S. P. Cummins, 19; W. Parker, 22; A. Skero, 8; Louis Everding, 17; W. Beach, 16; Gus Perigol, 5; G. S. Wolff, 8; C. J. Mc-

Connaha, 17; F. Miller, 17; Charles Kressman, 8; Tom Barter, 16.

Second event, 50 targets—Holmes, 39; Claton, 34; Buhne, 44; W. Beach, 32; Kelly, 36; F. Parker, 43; Dr. Dungan, 37; Robinson, 24; Sammons, 26; W. Parker, 42; F. Waite, 23; Tom Barter, 30; Ferrill, 23; Dean, 21; G. Pinkham, 35; F. Beach, 28; F. Miller, 30; McConnaha, 32; Everding, 42.

The Napa Gun Club shoot on the 20th inst. was well attended, the Vallejo contingent getting away with the up-valley shooters in the long run.

The first event was the "Charles Reams" Assembly Trophy Shoot, with two bottles of champagne up as the winner's end. It was won by Mayfield of Napa. The scores were: Mayfield, 22 out of 25; Chappel 18, Reams 19, O'Hara 18, Coe 14, Mann 16.

In the double shoot, five pairs, the scores were: Chappel 9, Reams 6, O'Hara 5, Mann 5, Mayfield 3. In a second double shoot, five pairs, Mayfield broke 9, Chappel 9, O'Hara 8, Coe 8, Reams 7, Mann 5.

In the 20-target shoot the scores were: Coe 12, O'Hara 14, Reams 15, Mayfield 15. In a 15-target shoot O'Hara got 9, Mayfield 9, Reams 11, Coe 12.

The big event of the day was the three-man team shoot between Vallejo and Napa. The Napa team was composed of Mayfield, Mann and Reams, and they scored 36. The Vallejo team was composed of Elias, Chappel and O'Hara, and broke 33. The total scores were: Vallejo—34, 36, 31 and 35. Napa made 35, 29, 37 and 35, which concluded the 15-target team shoots with honors even. Ten birds were next shot off with a score of 23 for each team. Finally a 25-target shoot was arranged to settle the event and Vallejo won by a score of 61 to 56.

The Millwood Gun Club shoot for August did not have as large an attendance of members as usual. In the second event, R. Van Norden won for the month with 21 out of 25 targets. W. Price won the third race after shooting off a tie with Collins Sr. and Collins Jr. The latter shooter was the winner of the freeze-out shoot. The final club shoot for this season will take place September 24th. The leading guns are: Cup race and continuous break shoot, R. Van Norden; medal match, R. Haas. The winners in the sealed condition events will be announced next month.

The scores for the August shoot were: Freeze-out shoot: Collins Jr. 8, Patrick 7, Van Norden 7, Collins Sr. 7, Price 6, Lockwood 6, Johnson 6, Lueffs 5, Magnin 5.

Second event, 25 targets—Price 22, Van Norden 21, Collins Jr. 18, Collins Sr. 18, Lueffs 18, Lockwood 17, Patrick 17, Johnson 13, Magnin 13.

Third event, 25 targets—Price 22, Collins Sr. 22, Collins Jr. 22, Van Norden 19, Johnson 19, Patrick 13, Lockwood 15, Magnin 13.

Fourth event, 20 targets—Van Norden 16, Collins Jr. 10, Collins Sr. 10, Johnson 10, Lueffs 10, Price 9, Lockwood 6, Magnin 9.

Fifth event, 10 targets—Collins Sr. 9, Lockwood 3, Van Norden 8, Collins Jr. 6, Price 6, Lueffs 6, Patrick 5, Johnson 5, Magnin 4.

R. Van Norden, the winner of the trophy cuff buttons, has put the prize up for a shoot by his fellow club members to take place next month. The race will be a handicap, 20 targets being possible. The handicaps are: Price scratch, Collins Sr. 1 target, Haas 1, Ashlin 2, Lockwood 4, Brown 4, Johnson 4, Shreve 4, Wayman 6, Collins Jr. 6, Newlands 6, Kewell 6, Turpin 8, Wagner 8, White 10 and Faulknerstein 10.

The California Wing Club final shoot for 1905 on the 27th inst. was notable for the general excellence of scores shot at a lively lot of pigeons trapped.

This shoot also determined the ownership of four handsome silver cup prizes hung up for the season's quartet of high guns. The opening shot was made by P. J. Walsh, who scored, he missed his second and seventh birds and lost the fourteenth dead out. Dr. Barker of San Jose also lost three birds, his total score for the seven shoots was 92; two more pigeons would have put him tie with three cup winners. "Slade," who missed one shoot, also lost three pigeons. Nauman, 33 yards, shot in old time form, and scored a straight string; this gave him a total of 94 birds and put him in the cup winning squad. Ed Donohoe, 33 yards, who has been shooting consistently and well all the year, lost his seventh pigeon, but at that his total of 95 placed him club high gun for 1905, a position won by hard work and skillful shooting. Dr. McConnell, who had lost seven birds in the prior shoots, failed to connect with four birds, but was out of the prize contest even had he scored clean. Clarence Haight lost but one bird, the sixth, and shot a strong gait throughout the day, winding up with 92 kills to his credit, a loss of five birds early in the season was the handicap that he could not overcome.

W. J. Golcher also failed to connect with No. 7 pigeon, a bird hard hit, but strong enough to pack away plenty of lead. His season's total of 94 entitled him to a cup, however, being Feudner and Nauman for the series—a fact which proves that he has been a good performer this season. M. O. Feudner, with a straight of 20 clean kills, landed in the cup winners' class. He has been shooting in great fettle recently, at both five birds and blue rocks.

Ed Klevesahl's eighth and fifteenth pigeons were unlucky and the score of eighteen kills just landed him in the 93 hole, a peg below the cup look-in. Ed. Schultz found his twelfth pigeon a lost bird and, although shooting in good shape, could not score straight. Losses of pigeons early in the season put his gun out of the trophy hunters' squad. Frank Turner, a comparatively new shooter at pigeons, although missing No. 3 shot himself into the club purse division with the 19 men. Billy Murdock's gun has had "glass arm" evidently, for his score of 18 and total of 89 is hardly up to his average of past years. A. M. Shields at 31 yards had to contend

against a handicap that kept down his score, notwithstanding that he was shooting in good form.

The club purse of \$100 was divided between Nauman and Feudner, who scored straight, for first and second moneys. The five nineteneers divided the balance. Following the club shoot six bird pools, as usual, wound up the shoot. The scores were as follows:

Final monthly club match, 1905, 20 pigeons, \$100 added, five moneys, high guns, distance handicap—

	Yds.	Total
Feudner, M. O.	32-22122 21222 22222 21222-20	
Nauman	33-12211 22111 12122 22212-30

The Lincoln Gun Club reunion at Reclamation station last Sunday was attended by over 100 outing seekers. Live bird shooting was the trap diversion and a number of twelve-bird contests were shot up. The entrance was nominal, the purses were cut up into three moneys for high guns. The winners were: H. Klevesahl, R. Haas, E. Holling, Lee Harpham, E. Gamble, D. W. Harvey, E. L. Forster, C. Ashlin, "Wilson" and L. Cuneo. Geo. Sylvester and J. Doss divided in the first miss and out, and "Wilson" took the money in the two final freeze-outs.

Edgar L. Forster managed the outing; shooters and visitors, ladies and their escorts, and all were royally entertained, the trip being fully up to the Lincoln's style of doing things in good form. The scores shot were:

Practice warm-up, birds \$1.75, 50 yards rise—			
Gamble	11221	21121	12-12
Cuneo	11222	21211	11-12
Detjen	12222	20111	21-11

Miss and out, \$1.50 entrance, 30 yards rise—

"Wilson"	11111-5	Doss	12210-5
Holling	12212-5		

The following list showing the standing of each shooter in the Golden Gate Gun Club up to the final shoot to-morrow was compiled by Edgar L. Forster:

M. O. Feudner 90, Webb 90, Varlen 89 2-5; E. Schultz 89 1-6, Reed 88½, Holling 87 4-5, Forster 87½, Bradrick 86, Haight 85 2-3, Sears 85½, Golcher 85½.

Iverson 84 1-3, E. Klevesahl 84, Green 83½, H. Klevesahl 81 1-6, Gamble 81½, Decker 80, Harpham 79 2-5, F. Schultz 79 1-6, Lalng 79, Nauman 78 3-5, Wattles 78½.

Donohoe 78½, Murdock 77 1-6, Dr. Payne 76, Slade 75 2-5, King 75 1-3, Shields 75, Hoffman 74 2-3, Jacobson 74½, McElwain 74 1-3, Potter 71 4-5, Burns 71½.

Krick 71 1-3, Harvey 70½, Ashlin 70, Cuneo 67 2-5, Lewis 67 1-3, Johnson 65½, Dr. Sylvester 64, Patrick 64, Turner 61, Taylor 58½, Bowen 57 1-5, Burton 55.

The leading guns of the Union Gun Club shooters are: Champion class, E. L. Forster, R. C. Reed, M. O. Feudner, M. J. Iverson and A. J. Webb; first class, D. Daniels, Dr. Pitres, W. A. Searles and H. D. Swales; second class, W. Janssen, A. M. Shields, F. Knick and McElwain; third class, J. L. Dutton, Scott Leary, W. Schneider, Bert Patrick and F. N. Woods Jr.

Forster, Shields, Dr. Pitres and Dutton have each won the monthly medal shoots twice. The club shoot on September 17th will fix the ownership of four club medals and the silver cup trophy shot for under a "secret handicap."

The Empire program for the 9th and 10th is a "come one, come all" proposition. Six events are scheduled for each day—including two big and two smaller merchandise prize events. A mention of the long array of articles secured for prize distribution would look like the inventory of a wholesale general store. This shoot will no doubt draw a large gathering of shooters.

Salmon in Raccoon Straits.

The present run of salmon has enabled a number of anglers to enjoy rare sport trolling Raccoon straits and vicinity. Not only have the bay anglers taken a number of fine fish, but adventurous anglers have gone outside the "heads" in power launches and tackled Prof. Quimnat in the waters of the Pacific. Who knows but by dint of persevering in prospecting the outside water, that fishing on par with the sport in Monterey bay and Santa Barbara channel may be duplicated. There are not a few anglers who have long contended that the game is outside awaiting development. The small number of sportsmen who do fish outside the Golden Gate rarely return empty handed and are persistent in reiterating stories of the splendid sport to be had outside.

Billy Mersfelder and a party landed six fine salmon outside on last Sunday. Two other fish were taken by fishers off Sausalito.

Between Belvedere Point and Bluff Point, off Tiburon, a number of fish have been taken within the past ten days. Members of the Pacific Striped Bass Club accounted for a dozen fish. A salmon caught last Sunday off Belvedere Point is said to be have turned the scale at 35 pounds, a pretty good fish, that.

Charles Kewell and Sam Wells had a try after salmon on Wednesday, but were unsuccessful. Mr. Ammet, a local angler, caught a 12-pounder on Sunday. Mr. Paynter, who went out early this week with Capt. Ehrke, hooked eleven fish, one weighing 23 pounds.

Tomorrow there will be a large fleet of trolling boats out. The fish have been taken with both sardine baits and trolling spoons, the sardine, it is claimed, being the better lure. A number of salmon trollers have been "cleaned out" by salmon hooked in the straits.

Striped Bass Notes.

The thoughts of the striped bass fishers are directed to Russian river near Duncan's, these days, for several large bass have been taken out of the river during the past two weeks. L. Bouteiller, of this city, it seems, is the lucky angler. Early last week a 26-pound bass was caught in the river, but this week Bouteiller landed the Coast record rod and line striped bass—a fine fish that weighed 45 pounds. Early this year he caught a bass, in Russian river, that weighed 38 pounds cleaned; thus twice in one year beating the record of the late Fred H. Bushnell, that of a 29-pounder, taken in San Antonio slough three or four years ago.

The lure for striped bass in Russian river is a five minnow and the big fish have been found principally in the well known pool near Freeze-out creek.

San Antonio slough was visited by a large number of bass anglers last Sunday. Most of the visitors drew blanks. J. G. Bliss was high hook with an 8-pounder. W. S. Kittle caught a small fish. In fact not a half dozen bass were taken between twenty-five fishermen.

Striped bass are in evidence at Vallejo, a number having been caught during the week in the "channel." San Leandro bay and vicinity is turning out only small bass at present.

A combination of clam shells and a rubber boot leg was a device used to fool the slough contingent, it is said, by a fisherman who caught very small fish in San Antonio slough recently. Instead of throwing back the little fish, the fish were slyly stowed away in a rubber hoot in the boat and a clam shell tossed overboard to make it appear that the fish was thrown back. The game was too gauzy for those who happened to be near and the laugh is on a certain local angler.

Black bass fishing near Sebastopol, in the Big Lagoon, is first class. The fish are large, game, and in splendid condition. Frank Marcus, Harry Leap and Jules Bruns caught a big string of fine fish in that water last Sunday. Marcus is enthusiastic in extolling the black bass angling of this resort.

W. W. Richards, who is enjoying the angling possibilities in and about Santa Cruz, recently wrote to a friend in this city:

"We are catching a few salmon again now. For a month past the yellowtail and skip-jacks (bonita) have held possession of the bay and they keep the salmon from coming in. Last year it was the same way. Although we had no yellowtail then (nor had we any for ten years previous) the skip-jacks come in about August and stayed several weeks, then went away and the salmon returned. We look for fine salmon fishing in a few days, as most everyone out yesterday got one.

"Trout fishing is fine and with my 4 1/4-ounce rods I can get the same play and sport with a 7 or 8-inch coast stream trout that the man with the ordinary 6-ounce rod gets out of fish weighing half a pound and over. My salmon rod is 11-ounce and with a 12-thread line it makes a great set-to with fish averaging 12 and 15 pounds.

"Large caliber shotguns in the field and base ball bats for rods should be relegated to ancient history when so much sport can be had with lighter outfits. The steel-heads are running up the streams here now and catches of a dozen or fifteen averaging a half and three-quarter pound are made every evening in the streams around Santa Cruz."

DEER HUNTING NOTES.

The largest buck reported this season is the one bagged by Mr. Phil S. Driver of Sacramento. The animal weighed 206 pounds dressed and was shot near Klamath Hot Springs. It is said to be the largest buck killed in Klamath county for many years.

Country Club members have had some excellent sport recently. On the 24th inst. Mr. F. W. Van Sieklen and Mr. Geo. Boyd were out deer hunting, with their sons, youths in their teens. Young Van Sieklen dropped a 102-pound buck.

One day this week Mr. J. Downey Harvey, accompanied by the Misses Harvey and Miss Crocker, were out deer hunting on the club preserve. The young ladies had the good luck to jump two bucks, both of which were bagged by the unerring rifles used by the fair Dianas.

A recent report from Santa Clara county states: Pronged deer are many, but wary, these days, say the hunters of the county, who have spent days in the stamping grounds of the valley, some with excellent luck, others with but fair and not a few with an absence of good fortune that is exasperating.

The sport this year has been unexpectedly good. Loma Prieta has furnished twelve fat bucks. Black Mountain has yielded seven and dozens of others have been dropped on the headwaters of the Coyote and around through the Santa Cruz mountains.

Deer hunters this season are more numerous than usual and in consequence many more monarchs of the forest have been brought in than usual. While no great number of deer have been killed in any one place, the hunters as a rule have met with good success in all parts of the county. The hunters from Los Gatos have got five in the vicinity of Alma, two have been killed at Vic Ponelet's on the Llagas, two by the sportsmen from Almaden, four at Morgan Hill, two at Madrone Springs, seven back of Mount Hamilton, two at Harney's summer resort on the Santa Ysabel, one at Smith's Creek, two at Black Mountain, three south of Calaveras, one back of Alum Rock, three on the Arroyo Honda ridge, three back of Saratoga, one at Hall's Valley.

The prospects for fall shooting are very good.

Some of the great cattle companies in the West have embarked in the sheep business, partly to protect their range, and partly because sheep are now the more profitable stock. Sheep are surely spreading on the range, and as sheep increase cattle must decrease. The same thing is true on the farms. As flocks are built up, herds will shrink in numbers. It is a physical impossibility to maintain one and increase another class of grazing animals to any great extent. If these premises are correct cattle are on the down grade as to numbers, because sheep are certainly increasing. Everything favors this movement. The range is largely a natural sheep country. Wool and mutton have been profitable for several years and cattle have not, a statement which applies to both farm and range. Nothing is more natural for men to drop something that has not paid well and take up something that has paid, and they are doing it all over the country. More calves are coming to market this year than ever before. Ewe lambs are scarce, being kept at home to build up the flocks. What is going to be the result of the present tendency? It is certain if continued to bring about a scarcity of cattle. They are in ample supply now and it may take several years to bring numbers

down below the point of sufficiency, but while the herds are being reduced, the country is growing and some day it will be confronted with a cattle shortage. Neither the range nor the farm is going out of the cattle, but enough men on both are doing so to make a big difference in a few years unless the tendency is checked. For the man who has the pluck to hold on and the skill to improve his herd the future of the cattle business is bright.

The agricultural fair season for the holding of fairs offers unexcelled opportunities for the study of animal types and the intelligent selection of the breeding animals required on the farm. Every farmer who handles stock must certainly understand the importance of owning the well bred animal, and that the secret of success in the breeding effort is in the proper selection and purchase of breeding stock. The agricultural fair, as it is conducted at the present time, in the interest of live stock breeding and improved live stock interests, offers the best advantages for bringing the buyer and breeder together upon an independent, unconstrained basis for trade. At no other place and on no other occasion can the prospective buyer have the advantage of so large a number of animals to select from.

Sponges. S. Adderley, 307 Market St.

Sportsmen who have looked over many favorite quail grounds recently state that birds are plentiful and the young well grown. The season has been a good one for the birds.

Ducks are exceedingly plentiful in the marsh land and tule sections. Teal and mallard have bred numerous this season and sprig are seen in great numbers in many places, particularly on the "White tract" of the Petaluma marshes.

Should the rains hold off until after the middle of October duck shooting will be excellent in the nearby shooting resorts.

TRADE NOTES.

Game Laws.

The Union Metallic Cartridge Company has issued a digest of the Game Laws of the United States and Canada, together with a list of some of the licensed Guides with their addresses. Game Laws are subject to frequent change and shooters are oftentimes caused a great deal of inconvenience, although they are innocent of any intention of breaking the law.

The U. M. C. Game Laws and Guide Directory is a booklet of convenient size so as to be easily carried in the pocket. It may be obtained free of charge by writing The Union Metallic Cartridge Co., Bridgeport, Conn. Agency, 313 Broadway, New York City; Depot, First Street, San Francisco, Cal.

Averages Reported.

At Ocean City, Md., July 25th to 28th, J. M. Hawkins won first general average, 761 out of 800, shooting "DuPont"; W. M. Foord of Wilmington, Del., won first amateur and second general average, 750 out of 800, shooting "DuPont"; L. S. German of Aberdeen, Md., won second amateur and third general average, 744 out of 800, shooting "DuPont."

Fort Dodge, Ia., July 27th and 28th, Fred Gilbert won first general average, 391 out of 400, shooting "DuPont"; R. R. Barber of Paullina, Ia., won first amateur and second general average, 389 out of 400, shooting "DuPont"; H. G. Taylor of Meckling, S. D., won second amateur and third general average, 382 out of 400, shooting "New E. C." (Improved).

Newport, R. I., July 28th and 29th, W. H. Heer won first general average, 309 out of 325, shooting "New E. C." (Improved); E. C. Griffith of Pascoag, R. I., won first amateur and second general average, 307 out of 325, shooting "Infallible"; Jno. McArdle of Narragansett Pier, R. I., won second amateur average, 292 out of 325, shooting "Infallible"; W. Hughes of Newport, R. I., won third amateur average, 277 out of 325, shooting "New Schultze."

In the 5 bird race for the Laffin & Rand trophy on the second day of the tournament Mr. F. R. Patch of Hartley, Ia., won over a field of 21 with 47 breaks, shooting "DuPont."

Ballistite Briefs.

The fact that Ballistite is growing fast in popularity and favor is shown by the following popular wins:

At Gridley, Cal., June 10 and 11, D. W. King, Jr., and "Ballistite" tied for high general average.

J. H. Hazelbush won high amateur average at the same shoot, and shot Ballistite.

At the Montana State shoot held at Bozeman, Mont., June 9, 10 and 11, C. D. Plank won high general average, breaking 259 out of 265, or 97.8 per cent; also a run of 139 consecutive breaks. Mr. Plank also won first expert average at the Northwest Sportsmen's Association shoot at Portland, Ore., June 22, 23 and 24, using Ballistite in all his shooting.

At the same shoot J. W. Bradrick won the Anaconda Cup, breaking 25 straight, the only clean score made in this event. He also won third amateur average. He shoots Ballistite.

At the shoot of the Grant's Pass Gun Club at Grant's Pass, Ore., July 4 and 5, R. C. Reed won high general and expert average, making 93.5 per cent, shoot-

ing Ballistite.

R. C. Bartlett won first amateur average, and T. J. Armstrong second amateur average, both shooting Ballistite.

It was also a notable fact that every contestant at this shoot used Ballistite the second day.

Going Some.

Ninety-seven and one-half per cent for 1600 targets is high class shooting. This is the shooting done by Charles G. Spencer in a series of shoots from July 25th to August 9th. He made two scores of 220 out of 225, one of 228 out of 235, and one clean score of 165 straight in this series of shoots. As would be naturally presumed from this, he used the far famed and popular Winchester "Leader" shells, the shells that make and break world's records. Mr. Spencer uses the "Leader" shell exclusively in all his shooting, both at the traps and in the field.

At the tournament at Mason City, Ia., on the 1st and 2nd inst., out of 400 targets shot at, W. D. Stannard, Fred Gilbert and H. C. Hirschy broke 384, 383 and 381 respectively, and R. R. Barber, an amateur, broke 378, winning the high amateur average for the tournament. All the above, of course, used Winchester "Leader" shells. At Pine Bluff, Ark., July 30th and 31st, W. H. Joyner, J. D. Proctor and J. M. Pennington won the three high amateur averages, all using the "Leader" shells, the first and last also using Winchester "Pump" guns. At the Crockett, Texas, tournament F. M. Faurete captured the high professional average, with the splendid score of 387 out of the possible 400 targets, using a Winchester "Pump" gun and the "Leader" shells, the combination he always uses.

At the tournament of the Harvard Gun Club, San Antonio, Texas, Mrs. Ad. Toepperwein, the wife of Ad. Toepperwein, the world's greatest rifle shot on flying objects, gave a demonstration of what she could do with a Winchester "Pump" gun and the Winchester "Repeater" shells on "blue rocks." Mrs. Toepperwein led the entire field and captured the high possible 215. Out of the regular program events she broke 94 out of 100 and made a run of 63 straight without a miss.

Peters Points.

At Centralia, Ill., August 15, W. D. Stannard was high professional, H. W. Cadwallader second high professional, Mr. Shanks of Centralia high amateur, and Mr. P. Neal third high amateur; all using Peters' factory loaded shells.

At San Marcos, Texas, August 14 and 15, M. E. Atchison was high amateur and C. F. Gilstrap second amateur. Wallace R. Miller was high professional on the second day, and Ivey Johnson of San Marcos won the Peters' cup with 45 out of 50, breaking his last 25 straight. All these gentlemen used Peters' factory loads.

Mr. A. W. Kirby of Greenville, Ohio, in a series of contests, ending August 14, cleaned up about all the prizes in sight, winning first prize, the Tunter Arms Co. trophy, and the Peters' medal. Mr. Kirby used Peters' Ideal shells exclusively, and in this contest scored 632 out of a possible 750 from the 20-yard mark.

At the Interstate shoot, Kansas City, Mo., August 16, 17 and 18, the high general average for the first day, and the high amateur average for three days was won by Mr. William Veach of Falls City, Neb. Mr. Veach was third in the general averages and Mr. E. W. Arnold of Larned, Kas., landed the third amateur average. Both gentlemen used Peters' shells. August 16, William Veach won high average over all amateurs and professionals, with a score of 192 out of 200, using Peters' factory loaded shells.

Mr. J. E. Vaughan, representing the Peters' Cartridge Company in Southern California, recently made a very excellent record, shooting at 650 targets in five different towns and breaking 96.1 per cent. Mr. VFaughan is demonstrating to the sportsmen of California the superior qualities of Peters' factory loaded shells.

SAVAGE

SELF FEEDER

THE only rifle of its kind that feeds continually with hand-work. Has every feature of repeating rifle, without magazine. Feeds itself, ejects automatically, cocks automatically. Has a solid American walnut stock. When it comes to rifles, the Savage is different.

"No Savage beast would dare to trifle With a man who shoots a Savage Rifle."

Savage-Junior Single-shot Rifle, \$5.00

Shoots short, long and long-rifle cartridges.

Savage-Junior .22-caliber "Special" \$7.00

Made similar to regular "Junior," but fancier.

Handsome Savage Indian Watch Fob sent on receipt of 15c

If your dealer won't accommodate you, we will. Either rifle delivered, charges prepaid, on receipt of price. Try your dealer first; but send to-day for catalogue.

SAVAGE ARMS CO., 10 Turner St., Utica, N.Y., U.S.A.

Pedigrees Tabulated and type written ready for framing
Write for prices. BREEDER AND SPORTSMAN, 36 Geary Street, San Francisco, Cal.

STANDARD VARIETIES.

There are eighty-seven standard and a large number of promiscuous varieties of chickens raised in this country. The standard varieties are divided as follows:

(1) American Class.—Barred, Buff, Pea comb Barred, and White Plymouth Rocks; Silver, Golden, White, Buff and Black Wyandottes; Black, Mottled and White Javas; American Dominiques and Jersey Blues.

(2) Asiatic Class.—Light and Dark Brahmas; Buff, Partridge, White, and Black Cochins; Black and White Langshans.

(3) Mediterranean Class.—Brown, Rose-comb Brown, Black, Dominique, Buff and Silver Duckwing Leghorns; Black and White Minorcas; Andalusians and Black Spanish.

(4) Polish Class.—White-crested Black, Golden, Silver, White, Bearded Golden, Bearded Silver, Bearded White, and Buff Lace.

(5) Hamburg Class.—Golden-spangled, Golden-penciled, Silver-penciled, White and Black Hamburgs; Redcaps; Silver and Golden Campines.

(6) French Class.—Houdans, Crevecœurs and La Fleche.

(7) English Class.—White, Silver Gray, and Colored Dorkings.

(8) Game and Game Bantam Class.—Black-breasted Red, Brown Red, Golden Duckwing, Silver Duckwing, Red Pyle, White, Black and Birchen Games; the same varieties for Game Bantams, Cornish and White Indian Games; Malays and Black Sumatra Games.

(9) Bantam Class other than Game. Golden and Silver Sebrights; White and Black Rose-comb; Booted White; Buff Partridge, White and Black Cochins; Black-tailed, White and Black Japanese and White-crested White Polish.

(10) Miscellaneous Class.—Russians, Silkies, Sultans, Frizzles and Rumpless.

For practical purposes the above ten classes may be grouped into four general classes, as follows:

(1) The general-purposes breeds: The American class.

(2) The meat or table breeds: The Asiatic class.

(3) The egg breeds: The Mediterranean class.

(4) The ornamental breeds: The Polish, Exhibition Games, Miscellaneous and Bantam classes.

ROYAL STUDS IN SWEDEN.

There are three royal studs for the propagation and improvement of the breed of horses in Sweden. They are very ancient establishments, and documents are in existence which prove that they were in a well-organized condition as far back as 1694.

The breeding stud of Stromsholm consisted some few years ago, of forty brood mares, their descendants up to the age of three or four years, and of fifty stallions. At one time the stud at Flynge comprised as many as fifty stallions, with from twenty to thirty mares, but it has been reduced to a smaller number of stallions, and a corresponding number of mares of good breed, and is now appropriated more to the rearing and training of colts. The country around Flynge is an uninterrupted plain, and the most fertile in Sweden. The Ottenby breeding stud is situated on the island of Oeland, in the Baltic, and the spot rises little above the level of the sea.

The island of Oeland was formerly the native home of a diminutive race of wild horses, very similar to the ponies of the Shetland Isles, and doubtless they were acclimatized and dwarfed descendants of race of horses introduced at a very remote period by the Goth settlers from the southern parts of the Baltic coasts.

Herds of these small horses were still found living in a state of freedom, as lately as the beginning of the nineteenth century, but with improved rapacity they have been caught and transported to the mainland, and have now almost wholly disappeared from the island. These little animals are endowed with great strength in comparison to their size, are extremely spirited, and capable of enduring great fatigue.

The administration of these three royal breeding studs has been frequently modified, and from 1809 to 1830 the Ottenby stud was given up. The stallions, with the exception of those kept for breeding purposes at the several studs, are sent into the different provinces of Sweden, where they are stationed as government stallions, for the public service. Many

years ago societies were formed in most of the provinces of Sweden for the special purpose of improving the breed of horses for farming and agricultural purposes.—Live Stock World.

SECURING GOOD LAYERS.

While every farmer should resort to the pure breeds for the best results, there are some matters pertaining to the management of poultry which the farmer or poultryman must personally attend to, as he cannot delegate the duties to others. To have a flock of good layers next year each of the pullets should be observed carefully, as it is only by daily observation of the members of the flock that a selection of the best can be made. The desired results are not always accomplished in one year. To bring a flock up to a high degree of efficiency depends largely upon the management, yet one must breed for something better every year. The best pullets should be the foundation, and with careful selection every year there will be progress and improvement. It is a problem to pick out the most suitable breeds, as climate, markets and other conditions are factors; but each farmer can take the best of his pullets every year, as well as retain any meritorious hens that have given satisfactory results. There is no known breed that satisfies all farmers. Poultrymen and farmers have their preferences, experience teaching each that the best breed is the one adapted to his farm. When introducing new blood, aim to secure stock from yards that contain hardy fowls, and do not fail to cull and dispose of all unpromising stock.

A few years ago there was a demand for heavy lard hogs. Now the tendency is towards smooth even hogs of medium weight of from 225 to 350 pounds of early maturity. Hogs of this weight should be free from surplus fat, possess smooth shoulders, well laid in with the line of the body, hams moderately heavy, a firm flesh with flanks well down so as to furnish a large development of belly meat. The back should be of good length, width and smooth, showing an absence of large patches of fat above the hams. The best cuts of the hog are taken from the back, loin and sides, hence the importance of good length and depth to the sides are desirable. The careful breeder of pure-bred swine keeps informed on just such points and aims to produce in his herd those qualities that most nearly produce the market demand. The scrub hog has no place on the farm and since the packer and his trade have called for a certain type of hog, it stands the hog raiser well in hand to meet the demand through careful breeding and feeding. Medium weight hogs, through the demands of trade, have disposed of the old time 500 or more pound lard hog.

Goat milk, owing to its ease of digestion and freedom from tuberculosis bacteria, is of great value in child rearing and in the treatment of weak stomachs generally; it is also used largely in producing the high-priced cheeses of Italy and Switzerland, which sell in this country for from 50 cents a pound upward. The department of agriculture is expecting to import a small flock of pure bred milch goats, which in Europe yield a gallon or more of milk a day, for the purpose of crossing them on a few thousand common milch goats in this country which Mr. Thomson says may be found to yield from a pint to a quart of milk a day. It is believed by the department that a very important industry has been thus far overlooked in the production of milch goats. The Angora goat is useless as a milk producer. Goats multiply more rapidly than sheep, the offspring ranging from two to four. Instances are cited by Mr. Thompson where the lives of sickly babies, cases which have been given up by physicians, have been saved by the use of goats' milk.

Scours are the bane of the herdsman in warm weather. Causes are principally of a filthy origin. Keep the calves' pail clean all times and do not allow any milk to stand in it. When the calves are through being fed, clean the pail and set it away. A handful of shorts and one or two of oil meal in the milk will hasten growth.

Of course there is a good deal in the breed that is indispensable, yet the feed and the care have an indispensable part also.

DAIRY DOTS.

Cows are so fond of ensilage that they will leave the best pasture for it. When cows are largely on pasture, they need more salt than when fed on dry feed.

Every paper would be greatly benefited if its friends would mention it to their friends and get a few subscribers for it.

In warm weather there is a great deal of rancid butter because the cream gets over ripe. Churn as soon as ready.

Vessels in which milk is kept should be left uncovered while not in use. They should be thoroughly scalded and left open to air.

When cows are upon the pasture the cream is more difficult to churn than when fed dry feed, because the cream is of an inferior quality.

Any one who will let a piece of ice melt in a pail and notice the impurities will understand why it is a bad practice to put ice into milk or cream to cool it. The cream or milk can be cooled more rapidly, and more cleanly, by filling tin pans and placing them in the milk or cream. All the settlings of the ice are thus kept out of the milk.

Ground flax seed added to skim milk makes it a good feed for raising calves. It is doubtful management to sell good heifer calves from the best milch cows.

Simple contrivances for keeping milk and butter cool are made by taking deep jars, setting them in dishes of water, with water in them, into which cloths reach, from the top of the jars. Capillary action keeps the cloths wet and evaporation keeps them cool.

It does not seem to amount to much, but if a cow gives only one pint of milk more at each milking than some other at 600 milkings, it makes 600 pints a year. In ten years it will make more than the difference paid between a good young cow and one not quite so good.

A SOLID DIRT ROAD.

The accounts are that a dirt road built by Arthur Buchanan in Williamette Grange lane is the best thing of the kind in the county. The R. F. D. carriers talk about its excellence, and nobody knows more about roads or is more interested in them than R. F. D. men. This road, built last spring, is declared to be as hard and smooth as a race track, and to be a stretch of highway that is worth a toll to drive over it. It is two miles in length, and in all parts is very complete. In building it, a layer of dirt was thrown up by the grader and then it was well rolled. Another layer was then thrown up and roller again applied. The process was kept up until the desired height of grade was attained, when there was a very efficient rolling, the result of all of which is that the road is hard and durable, and destined when gravel or rock is added, to be as fine a stretch of road as there is in the county.—Corvallis (Oregon) Times.

The Germans themselves are beginning to open their eyes and view the situation in that country with regard to the home meat supply in its true light. Consul-General Guenther, of Frankfurt, Germany, in writing to the Department of Commerce and Labor, forwards the action of the board of managers of the Association of Butchers of Berlin in which the statement is made that if the German legislative body does not intervene, and the provisions of the new customs tariffs (German) will later on exert their influence, meat will cease altogether to be a food, but will only be a luxury in that country. The statement is made that German agriculture has repeatedly demonstrated that, in spite of contrary assertions, it is not capable to provide Germany sufficiently with animals to be butchered and recommended that the frontiers of the country be opened for the importation of animals to be butchered to all slaughtering establishments with direct railroad communication. In another report Consul-General Guenther says that manufacturers of agricultural machines in Germany are recommending that German duties on imported agricultural machines, especially machines coming from the United States, be advanced.

Cows in milk will not do well unless they are fed, watered and salted regularly, nor is the milk of so good a quality. Irregularity occurs upon special occasions, and are exceedingly difficult to manage. Still it should be done.

STOCK NOTES.

Keep the cream jars well stirred up while gathering the cream.

Eight weeks old is about right to wean pigs, if they have learned to eat well.

Fattening hogs need to be fed regularly, and given no more than they will eat up clean.

Stock in a pasture should have a place of protection, where they can lie down, or escape from the storm or sun.

Small pigs confined in pens, during the summer, enjoy cut clover, and thrive upon it, as a supplement to their other food.

A dairyman states that there is no one factor with which cows have to do that will reduce the quantity of milk as rapidly as the everlasting pest of flies.

The rapidly growing cities are making constantly increasing demands for milk and butter, which opens new opportunities to a business requiring the closest supervision and hard work but the business is remunerative, and has many attractive features.

It sounds a little large, but it is stated that \$10,000,000 worth of butter is imported into Texas every year.

Irritability is a quality that is often produced by improper handling at time of first milking. It is easy to produce a "kicker" by the first milker being a man who cannot hold his temper under trying circumstances.

GIVE RIGHT START.

The money in pigs is very largely made between the time the sow is bred and the pigs are six weeks old. If the sow receives the right kind of care and feed, and enough of it, she will farrow strong, thrifty pigs. They need especial care during the first six weeks. If they are kept confined in a small pen and the sow gives a large amount of milk they are likely to get thumps and die off in short order. If the pen is not kept clean they are likely to get sore mouth or catarrh. If not properly fed they are likely to become stunted. Give the pigs the right kind of a start up to six weeks of age and they will take very good care of themselves for the next six months if you leave enough feed lying around where they can get at it. They need babying for the first six weeks. Don't go to the field in the morning until you have looked after the pigs, and come in early enough in the evening to see every one of them. They will pay for all the care you give them.—Farmer.

In ye olden times in England butter was made up in long rolls of small diameter and sold by the yard. Now the Dairy Record reports a new invention as follows: No prints, no tub but specially prepared and paraffined cloth bags, holding one, two and five pound quantities of butter automatically weighed, stuffed and sealed without contact with the air, and all done by a small and inexpensive little machine. The packages are airtight, oil and moisture proof, and are splendid for export and storage. There is no waste or shrinkage; no soiling of hand in handling and the cost only nominal.

Warranted to Give Satisfaction.

Gombault's Caustic Balsam

Has Imitators But No Competitors.

A Safe, Speedy and Positive Cure for Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a Human Remedy for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

The Lawrence-Williams Co., Cleveland, O

BREEDERS AT THE FAIRS.

Mr. E. Edmonson, a Texas swine breeder, recently read a paper before the Farmers' Congress in which his views in regard to exhibiting at fairs was set forth as follows:

Should breeders exhibit at the fairs? I would answer yes, and will give a few reasons why I do so. The fairs are educational institutions, from the county to the great State and international fairs. The county fairs all over the country correspond to the county and city schools, and the State and international to the colleges, that is in giving object lessons, and therefore giving a chance for a greater number of people to get information than in any other line of education, and are instructive to every one that attends, whether they be exhibitors or visitors. For example, one of my neighbors told me not long since that he used to think that the advertising pictures of stock were overdrawn, but since he had visited the Fort Worth Fat Stock show he said the pictures did not give the live animal justice.

I think it the duty of every breeder that has the interest of his county, his fellow breeder and himself at heart, to exhibit his stock, and we owe something to the fair association. They have offered liberal premiums and we should show our appreciation by exhibiting our stock and therefore help to fill the great program, of which the live stock is no small part, especially the swine department.

The breeder is benefited in many ways. It is one of the greatest advertisements that there is and to exhibit a winning herd is still greater. Every newspaper wants to publish the winning ones and so there is more advertising. Besides thousands of people visit the fairs to see the stock on exhibition, and by having a good exhibit you make a great many sales that you would not make by staying at home, for there are some people who won't buy until they see what they are buying, and others that will see your stock and give you orders in the future. But the greatest benefit derived by the breeder is in showing his hogs along with other herds, where he gets the benefit of a disinterested man's judgment, and can see for himself where his hogs are weak and where they are strong, and go to work to remedy the defects before another show comes off.

A breeder remarked to me once, after he had seen the hogs passed on for the first time that he had learned more that day about what it took to make a show hog than he had learned since he had been in the business. And we learn something every time we exhibit. The breeders are benefited financially and intellectually; the fair associations are benefited by the breeders exhibiting, making the live stock department of the great college a success, and thus the breeder becomes a teacher, and lends a helping hand in the upbuilding of the country and shows what can be done in the way of improvement in swine. So I think that every breeder will agree with me that to a certain extent it is a duty as well as a pleasure for him to exhibit at the fairs.

SELECTING FEEDER CATTLE.

Buying and feeding cattle is a business of growing importance on farms. In selecting feeder cattle quality should be the first consideration. Uniformity, size and color is a valuable factor, because animals of one size do better together and color indicates breeding. Uniform color also assists in making sales, not only because it is pleasing to the eye, but it conveys to the buyer the impression that the feeding operations have been conducted along proper lines.

Thriftiness is manifested by a mel-low, pliable skin and soft, silky, oily hair. In choosing a feeder it is a good plan to commence with the head and go over every part from the nose to the heels. A good feeder, one that will take on growth and fat easily usually will have a broad head, the forehead will be wide, but not coarse, the eyes mild and prominent, jaw deep and muzzle wide.

A long narrow head naturally goes with a long leg and a thin narrow frame that is devoid of the proper constitutional vigor. The head indicates the type of the animal to a greater extent than any other one feature. Nervousness is a bad indication in a feeder steer. Nervousness is displayed in the expression of the eye and the carriage of the head and ears. The uneasy actions of the animal also indicate nervousness. The neck of a good feeder is rather short

and deep with plenty of muscle extending well back on the sides where the neck joins the shoulders. The top line of the neck should show natural depression. Shoulders should be set well apart, but not too coarse or prominent. A well-rounded shoulder shows plenty of muscle with a broad top. The back should be straight and even from the neck to the tail, with a good breadth across the hips and loins. A hollow-backed animal seldom is a good feeder.

The barrel of a feeder steer should be reasonably long, deep and round. The heart girth should be ample as this is the seat of an animal's constitution. The round barrel indicates a large stomach capacity. Flat ribbed animals of the sun fish breed are unprofitable. The hind quarters of a feeder may be thin, but the frame should indicate ample room for broadening out. The depth of muscle on the upper part of the hind leg indicates breeding for valuable steaks. The best beef animals show a well developed round, muscled well down towards the hock. The legs of a feeder should be set wide enough apart to make room for plenty of development. The front legs of the champion sweep stakes prize winner at the live stock show in Chicago in 1903 measured eighteen inches between the front legs. A good thick muscular covering over all parts of the frame indicate ability to take on flesh rapidly.

Carpet wools are so high that great quantities of them are now paying the seven-cent duty which used to pay only the four-cent duty, because they are worth more than 12 cents a pound. The advance in price is due pretty much to the fact that Russian carpet wools are being used for army cloths in that country and the supply for America is thus seriously restricted. When the war is over carpet wools ought to be easier and bring less money. One result of the increase in price and consequent higher rate of duty has caused the wool imported to be made cleaner before shipment to this country.

The continued demand for the coarser grades of wool will encourage the use of rams of the mutton breeds more extensively the coming fall. It should be remembered, however, that this demand for coarse wool is not perpetual and that the production of fine wool is decreasing on the plains each year. The change of style in men's wear in particular is in the direction of finer grades, such as worsteds and other grades made from fine wools. We venture to say that the day is not far distant when the demand for fine wools will break out again. It has been so for 4000 years since Jacob was a sheep herder himself, and it will continue thus for 4000 years more.

Farmers who raise one foal a year should always bear in mind that there is more profit in keeping one choice brood mare and mating her to an excellent stallion that is well bred and a good individual than in a paddock full of ordinary mares. The more common horses a farmer raises the more indifferent and prejudiced will he become with the horse industry. Poor horses of all breeds are slow sellers at prices that return no profit on the cost of production.

Do not be in too big a hurry to get the calf wholly on skim milk. Four pounds of milk, three times daily, is a good starter for the average calf, but should be whole milk. This can be increased according to the ability of the animal to handle it to good advantage. Make the change from whole to skim milk very gradual. Do not attempt it until the calf is at least ten days.

It is a good plan to keep track of all dairy operations, such as the birth of calves, the time a cow is dried off, sales of butter, milk and cream, and such items as these. It takes just a little time, but the notes are interesting to refer to later.

Aerate new milk as soon as possible after it is drawn, but do not do this in a stable. As good a way to do this as any is to pour the milk slowly from one pail to another for a few minutes. This drives off bad odors and saves the fine butter flavor.

In Holland there are 324 cattle to every 100 acres of cultivated land, and the cows of Holland are good milkers. Only good milkers could be kept on land as high-priced as it is in that country.

DIABLO STALLION FOR SALE.

HANDSOME STALLION, FOUR YEARS OLD. dark bay, black points; perfectly sound and gentle; good gaited, good disposition. Sir Diablo 2:09 1/4; dam Hattie Hero (bred and raised by the late L. M. Moran, Lodi) by Live Oak Hero by Director; second dam (full sister to Alta Genoa 2:14) and Cherokee Prince 2:18 by Capt. Lewis. I will sell this stallion at the race track, Sacramento Fair week. Address W. R. JACOBS, Stockton Cal.

FOR SALE.

FUTURITY CANDIDATE—entered in Breeders Futurity Stake No. 3 (\$6000). Occident and Stanford stakes—two years old; by Nushagak, dam Winnie by Robt. Bonner; second dam by McClellan. A large handsome black Billy. With two months' work at the Woodland track this year she trotted miles in 2:48 easily. For price and particulars address G. J. HOLLENBECK, Rio Vista Cal.

Daedalion 2:10 For Sale.

Can Beat His Record Three Times in a Race.

A high-class Race Horse and a Coming Sire.

Sire, DIABLO 2:09 1-4.

Dam GRACE (dam of DAEDALION 2:10, Creole 2:15 Eagle 2:19, etc.) by Buccaneer.

Owner's business will not permit him to devote any time to racing. For further particulars address BREEDER AND SPORTSMAN.

Fast Team of Pacers

FOR SALE—SEVEN AND EIGHT YEARS old, stand 16 hands; bays, good manes and tails; well matched; gentle; used to the city. Will pace better than 2:40. Sound and stylish. Can be seen at the Nevada Stables, 1350 Market street. Apply or address E. G. PIERCE, Nevada Stables, San Francisco.

A GOOD FILLY FOR SALE.

HANDSOME TWO-YEAR-OLD FILLY BY Lochinvair 2:20, he by Director H. 2:27 by Director 2:17; first dam Myrtle by Sterling 6:23; second dam Theresa by Prompter; third dam Empress by Flaxtail; fourth dam Lady Narley by Marion, son of Mambrino Chief II. This filly is well broken, perfectly sound, good gaited and a first-class prospect. For further particulars address J. D. BLAMEY, Box 715, Grass Valley, Cal.

McKINNEY STALLION FOR SALE.

WILLEROO 28021, BLACK STALLION, foaled March 18, 1893; height 16 1/2 hands, weight 1200 pounds. One of the best sons of McKinney. Handsome, stylish, finely proportioned and good dispositioned horse. Winner of three-year-old blue ribbon at the California State Fair as best standard trotter. As a two-year-old showed quarters in 33 seconds; as a three-year-old, miles in 2:17. Sired by McKinney; dam Junonies by Junius 5338, second dam Lady Duroc by Iowa Duroc third dam Lady Green by Green's Mashaw, fourth dam Lady Cushman by Vermont Morgan. For particulars address DAN REDMOND, Care of Race Track, San Jose, Cal.

STANDARD BRED COLT FOR SALE.

THREE YEARS OLD, GOOD SIZE, HANDSOME blood bay in color; good conformation and a first-class individual in every respect. With little work as a two-year-old he easily showed a 2:40 gait. Is perfectly sound and good gaited. Sired by Iran Alto 2:12 1/4, dam Alma Wilkswood by Alcantara. For price and particulars address BREEDER AND SPORTSMAN, 36 Geary Street, San Francisco, Cal.

COMPRESSED PURE-SALT BRICKS AND PATENT FEEDERS

Handy. No Waste. No Neglect.

5¢ a month. Refined Dairy Salt tells.

ASK YOUR DEALER. WE'LL SEND BOOK FREE.

BELMONT STABLE SUPPLY CO. PATENTEES-MANUFACTURERS. BROOKLYN, N.Y.

FOR SALE.

Fast Pacing Stallion JOHN A 2:12 3-4 (three-year-old 2:14); sire Wayland W. 2:12 1/4 by Arthur Wilkes; dam Lady Moor by Grand Moor. Wayland W. is the only stallion to put two in the 2:10 list this year up to August 1st. JOHN A. is a rich seal brown, stands 16 1/2, weighs 1225 lbs., is kind and gentle for a lady to drive. Is a very fine individual of strongest conformation, and as all of his colts are fine lookers he should make a great sire. His oldest colts are three years old; none have been worked. There were but three of them, as he was not regularly in the stud.

Three-year-old Trotter SIR CARLTON 36367 by Nutwood Wilkes 2:16 1/4; dam Lady Keating by Stam B. 2:11 1/4, second dam the dam of Diawood 2:11 and Abidine 2:17. SIR CARLTON is paid up in the Occident Stake and ready to start. Should be not win any money this year, will make a great prospect in the green classes next year; as no gamer colt ever lived. He can trot the fifth heat the fastest. In another year he will be able, barring accidents, to trot in 2:13 or 2:14. Any horseman at the Woodland track will recommend him as a game colt and a good trotting prospect. He only wears a harness and a pair of quarter boots and does not need the latter. Wears 6 ounces in front and 5 behind.

I also have some good road horses and brood mares for sale. They can all be seen at State Fair Grounds, Sacramento. Address A. E. MASTIN, 1016 Nineteenth St., Sacramento.

FOR SALE.

SIDNEY DILLON GELDING BUENA; FIVE years old; a perfect beauty without fault or blemish; bay with black points; weighs about 1050 to 1100; can be driven by a child; an elegant road or track horse; trials in 2:17; \$750.

ALSO The celebrated DOC WILKES, a road horse; you need not take the dust of any. Record 2:12 1/4. A beautiful mahogany bay, black points; weight 1000. No one need look at him unless they want to pay me \$500 for him. A baby can drive him. Both sold for want of use.

GRAND AMERICAN

Held at Indianapolis, June 27-30, 1905. was won by Mr. Jas. T. Atkinson of Newcastle, Pa., score 99 out of 100 from the 18-yard mark, using

PETERS FACTORY LOADED SHELLS

This was the Only Event During the Entire Grand American which was won from Behind the 16-yard Line. Many other Notable Scores were made with Peters Shells, among them the following:

1st on Practice Day, F. M. See (tie), 99 out of 100. 1st on First Day, L. H. Reld (tie), 99 out of 100. 3d in Preliminary, Wm. Veach (tie), 97 out of 100. 3d in Grand American, M. Arle (tie), 97 out of 100. In the Consolation Handicap, 2 scores of 98, 5 of 97, 4 of 96 and 25 others above 90 were made with Peters Shells.

All of which merely goes to prove that Peters Shells are WINNERS.

THE ECLIPSE, for two-year-olds, foals of 1904. By subscription of \$100 each, half forfeit, \$15 only if declared by January 6, 1906; starters to pay \$100 additional, with \$5000 added, of which \$700 to the second, \$300 to the third. Nominator of winner to receive \$500 of starting money. Colts, 123 lbs.; fillies and geldings, 119 lbs. Penalties and allowances. Five and a half furlongs.

SPRING MEETING, 1907.

THE WITHERS—\$5000 ADDED.

THE WITHERS, for three-year-olds, foals of 1904. By subscription of \$150 each, \$50 forfeit, only \$10 if declared by January 6, 1906, or \$25 if declared by January 6, 1907, with \$5000 added, of which \$1000 to the second, \$500 to the third. Colts, 126 lbs.; geldings, 123 lbs.; fillies, 121 lbs. One mile.

THE LADIES—\$1000 ADDED.

THE LADIES, for fillies three years old, foals of 1904. By subscription of \$100 each \$50 forfeit, only \$10 if declared by January 6, 1906 or \$25 if declared by January 6, 1907, with \$1000 added, of which \$750 to the second, \$150 to the third. To carry 121 lbs. One mile.

THE 41st BELMONT, \$25,000.

THE 41st BELMONT of \$25,000, for three-year-olds, foals of 1904. Closed for foals of 1904 with 94 entries. To close for yearlings, foals of 1904, September 15, 1905. By subscription of \$25 each, the only forfeit if declared by January 6, 1906. If left in after January 6, 1906, a further subscription of \$50 each. If left in after January 6, 1907, a further subscription of \$75 each. All starters to pay \$150 additional. The Westchester Racing Association to add a sum sufficient to make the value of the race \$25,000. To the winner \$21,000, to the second \$3000, to the third \$1000. To the nominator of the winner \$1000. Mr. August Belmont to add plate of the value of \$1000 to the winner. Colts, 126 lbs.; geldings, 123 lbs.; fillies, 121 lbs. Mile and three furlongs.

NOTICE.

Entries for the above are received only under the conditions as printed and in all respects subject to and in accordance with the rules of The Jockey Club and Westchester Racing Association. For entry blanks address THE BREEDER AND SPORTSMAN, 36 Geary Street, San Francisco, Cal.

FIRST ANNUAL AUCTION SALE

From the Prize Winning

HUMBOLDT HERD OF SHORTHORNS

BELONGING TO

Messrs. B. F. RUSH & WM. PIERCE, Suisun, Cal.

50 Head of Yearlings, Two-year-old and Three-year-old Bulls and Heifers, sired by the following high-class bulls: Marshall's Combination, Blythe Victor, Sharon Victor VI, Humboldt Victor VI, Admiral Schley VII and King Abbottsburn. The heifers have all been bred to the best bulls in the herd. Sale takes place at the WILLOTTA RANCH, Suisun, California, on

THURSDAY, OCTOBER 19, 1905,

at 10 a. m. Conveyances will meet all trains. Lunch will be served. For catalogues send to

FRED H. CHASE & CO., LIVE STOCK AUCTIONEERS 1732 Market St., San Francisco

BE A DISTEMPER EXPERT

If you once learn the value of Craft's Distemper & Cough Cure you will be able with it to cure with almost magical quickness any case of Distemper, Hoarse, Pinkeye, Cough or Catarrhal Affection in horses, sheep or dogs. The remedy costs nothing if it fails, but it doesn't fail. No need of any horse or other stock being lost from these diseases. If your druggist cannot supply it, order direct. Sent prepaid on receipt of price, 50c and \$1. Drop a card to-day for "Veterinary Pointers." It is free and is invaluable to stockowners.

San Francisco, Saturday, September 9, 1905.

THE CALIFORNIA STATE FAIR, which closes today at Sacramento, is being held for the first time on the splendid new property acquired by the State Agricultural Society, located about two miles east of the capital city. After a hasty glance over the grounds on the opening day, we have no hesitation in saying that the new park is the best laid out, most commodious and best appointed fair grounds on the western slope of the Rocky Mountains. Everything is new, of course, and incomplete, as work was not commenced until June this year, but all that has been done has been well done, and the track, the barns, the grand stand, the show grounds, etc., have all been planned and built in a manner that reflects credit on architects and builders alike. The transportation facilities are excellent, and with a few details to be completed will be ample for the handling of both exhibits and patrons. California now has the opportunity to make its State Fair one of the great annual expositions of America. It can be made to attract within its gates every year ten times the number that have visited it this year on the days other than the two legal holidays which so fortunately occurred during the seven days on which its gates were open. The Directors labored under many disadvantages this year, and deserve much credit for what they have accomplished, but if they wish to make the California State Fair the exposition which its founders intended it to be, they will have to divorce themselves from a few of the old customs that have brought the society into disrepute during the last few years. In the first place the State Fair is not given for the benefit of the hotel keepers and street railroads of Sacramento. One week is enough for any fair, and it is not right to make visitors stay in a town ten days to see a six days' show. The great States of Illinois, New York and Ohio find six days ample for an exhibition of their products. Opening the California State Fair on Saturday this year was a mistake. Hundreds of people who would have enjoyed seeing the Occident Stake trotted, the richest stake event for trotting colts in the West, stayed at home because they did not care to spend Sunday and Monday in Sacramento, or else be compelled to go home Sunday morning and return to that city Tuesday morning. Monday was Labor Day, a general holiday all over the country. It would have been an opportune time to trot the Occident Stake, but the day was turned over to broncho busting and six cheap running races, whose only excuse for being on any program was that the results might be gambled on. Of course the attendance on Monday was large, as is always the case on a general holiday, but had the Saturday program been provided for that day the gate receipts would have been twice as great. Another mistake of the Directors is their blind adherence to the belief that running races are the chief end of State Fairs and must be made the principal feature of the daily racing program. The owners of harness horses pay 4 per cent. of the amount of each purse for the privilege of competing for them, while the runners are given free entrance to every event. It would be better to treat all alike. Make the owners of running horses pay 5 per cent. and make the purses larger. This would reduce the number of running events but it would improve the quality of the fields. These criticisms are spoken in the most friendly spirit. It is our desire to see the California State Fair made one of the great institutions of the West and it can be made so by catering to the farmers, mechanics and builders of this commonwealth. The ideal for the fair must be set higher; there must be a supreme effort to interest the breeders and producers of the State. It is time to discard the syndicate bookmaking

feature that has been the curse of former fairs. It is time to introduce the latest and most approved methods by which the breeders of live stock, the growers of fruit and grain, the inventors and builders of machinery, and the workers in all the fields of labor, art and science, can be induced to send the results of the work of their hands and brains to Sacramento once a year for the enlightenment and instruction of the youth of the State, as well as all those who are striving to build homes in California and establish enterprises that will be taken care of and carried on by future generations. There is a great future for the California State Fair, but it will require the best thought and effort of its Board of Directors to develop it.

THE DEATH OF SADIE MAC, the great race mare, was a deplorable incident of the Hartford meeting this week. It seems strange that the trainer and caretakers of such an animal should be so deceived in her condition as to start her in a race when she was ill, and it seems more strange that after she had struggled through three heats they should still have been ignorant of the illness that caused her death in the fourth heat. Sadie Mac was one of the handsomest, best dispositioned and fleetest trotters ever bred. She never lost but one previous race in her whole career, and that was at Cleveland last season, where Aerolite was given the verdict over her for the gold challenge cup at the Inter-City matinee, although many present were certain Sadie Mac had won. As a three-year-old she won both the Kentucky and the Hartford futurities, and two other three-year-old purses, closing the season with a record of 2:11½. As a four-year-old she beat Louise Mac and Prince of Orange at the Pittsburg matinee in 2:08½ and 2:09. This year she swept through the Grand Circuit winning everything, and reducing her record to 2:06¼. The sum of \$30,000 had been offered for her and refused, her owner, Miss Wilk, prizing her beyond any money value. Sadie Mac was bred by the late J. Malcomb Forbes of Boston, and foaled in 1900. Her sire was the great colt trotter, Peter the Great 2:07¼, son of Pilot Medium and Santos by Sentinel. Her dam was the great brood mare Fanella 2:13 by the greatest of all colt trotters, Arion 2:07¼ by Electioneer. Her second dam was Directress, by Director 2:17, her third dam Aloha, dam of three in the list by A. W. Richmond, and her fourth dam Guadalupe by Crichton. The death of such a mare as Sadie Mac is a distinct loss to the breeding industry. There was no better bred one. She was bred for a fast trotter and was one. She had speed enough to have lowered her mark to 2:03 or better, and coming from a continuous line of great brood mares would have been invaluable in the stud.

WOODLAND'S MEETING has been declared off. The list of entries received was so small that Manager Chas. Spencer decided it were better to have no meeting at all this year than one in which only two or three horses would compete in every race, so he very wisely notified the horsemen that the meeting was off. Woodland has never yet given anything but a first class meeting and it is not proposed to lower the standard or disappoint the Yolo county people who so generously patronize harness racing held at the Woodland Stock Farm track. Next year Mr. Spencer says Woodland will be in the circuit and the announcement made and program published early in the year. Several other associations are making the same promise. The chances are that the California harness racing circuit of 1906 will be worth while, as the horsemen of every town in the State where a track is located are determined that meetings shall be given at all of them next season. They are just beginning to wake up and realize that a circuit can be held in California every year that will be second to no other circuit in the United States except the Grand Circuit.

A SUGGESTION comes from the Chicago "Tribune" in regard to the manner in which the daily press of the country reports racing, and as it follows lines that have for years been put forth in the columns of the Breeder and Sportsman, we give it space here: "Some of the New York race track writers are doing the sport no good by their manner of handling reports of races. These correspondents seem to have the idea that the betting end is quite the overshadowing feature and that a majority of readers of track news care primarily for accounts of this incidental to the day's doings. Their judgment may be correct, as they continue to hold their jobs, but if the betting is, after all, of more concern to those who read racing news than the interests on the tracks and the doings of owners and trainers, then the sport is not what

has been claimed for it by many. If this is a correct estimate of the character of the public which supports racing about the metropolis the sooner a State's Attorney Healy appears in New York the better it will be. There is undoubtedly a good sized element in every racing community which sees nothing to interest it in the 'sport' but the gambling feature. It has little sentiment for horses or for a royal contest among the four-legged animals which themselves love so well the sport to which they are bred. These people bore you with tales of their winnings and possibly their losses, but the thrilling points in a race seldom make an impression upon them. Yet there is a more intelligent, a more sportsmanlike element, which, while it would find racing stupid enough without any opportunity to back its own judgment on the track, finds the sport a fascinating one for reasons that are largely sentimental, the mercenary consideration to a race being merely like a bit of sauce on the side. These persons are fond of racing for the sport it affords and not because they regard it as a medium of making money, for an intelligent man knows it is not, however much he may be willing to 'keep a little ahead of the game' the while he is having his outing. This class of patrons care little for the news of the plungers and less about the bookmakers. It is, therefore, merely a question of proportion. Who is supporting racing about New York? Is it, in the main, a sport seeking colony, or is it merely a set of people whose tastes are on a par with crap shooters? And, in the meantime, what will the disinterested public, which watches all classes of news in the daily journals, think if it continues to be regaled daily with little more than accounts of the success or slaughter of 'favorites,' the troubles of the bookmakers, and the triumphs of the plungers? Who was it that once called it the sport of kings?"

LOS ANGELES PROGRAM.

The program for the November meeting of the Los Angeles Harness Horse Association has been announced. The racing is to begin on November 21st and the five days scheduled include two \$1000 purses and a special for each day, which should prove attractive enough to bring the best horses in the State together in their respective classes. Following is the list of events:

Tuesday, November 21st—Trotting, 2:11 class, purse \$1000; pacing, 2:09 class, purse \$1000; trotting, 2:20 class, silver cup, \$100, Dr. Ralph Hagan.

Wednesday, November 22d—Trotting, 2:18 class, purse \$1000; pacing, 2:20 class, purse \$1000; trotting, 2:30 class, silver cup, \$100, J. A. Fairchild.

Thursday, November 23d—Trotting, 2:14 class, purse \$1000; pacing, 2:12 class, purse \$1000; trotting, Sweet Marie special, silver cup, \$100, C. A. Canfield.

Friday, November 24th—Trotting, 2:24 class, purse \$1000; pacing, 2:27 class, purse \$1000; pacing, 2:25 class, silver cup, \$100.

Saturday, November 25th—Trotting, 2:09 class, purse \$1000; free-for-all class, purse \$1000; trotting, 2:40 class, silver cup, \$100, association.

WALLA WALLA ENTRIES.

Following are the entries for the races to be held by the Walla Walla County Fair Association at its fair, which opens September 25th.

2:20 class trot—Lemmetta, Sam Bowers, Packline, Kitty Clover, Ella Fisher, Ringman, Black Diamond, Senator II, Satin Royal, Lady Jones, Sunny Jim.

Free-for-all pace—Hassalo, Queen Bee, Le Roi, Yukon, Edgar Boy.

2:20 class pace—Vinnie Mann, Robert H., Lady Julia, Horse Heaven Maid, Esther B., Nellie B., Bonnie M., Bessie R., Teddy A., Dewberry, Jim Wilkes, Ruby H.

2:25 class pace—Vinnie Mann, Robert H., Horse Heaven Maid, Lady Julia, Esther B., Nellie B., Bonnie M., Rose Rial, Dewberry, Jim Wilkes, Ruby H.

Three-year-old pace—Lord Lovelace, Cleopatra, Golden Rose, Carlyle.

2:15 class pace—Byron Lace, Dewey Ann, Teddy A., Bessie R.

2:25 trot—Lemmetta, Sam Bowers, Packline, J. H. M., Kitty Clover, Ringman, Ella Fisher, Black Diamond, Senator H., Sunny Jim, Lady Jones.

ABSORBINE JR. CURES A GOITRE.

Mr. G. A. Foehringer, R. P. D. No. 8, Butler, Pa., writes under date of May 29, 1905: "My wife is using Absorbine Jr. for goitre; has almost used one bottle and it has reduced it so that you can hardly notice it." Absorbine Jr. is a mild remedy to use and will leave no deleterious after effects. \$1 per bottle at your druggists or sent postpaid upon receipt of price. W. F. YOUNG, P. D. F., 54 Monmouth St., Springfield, Mass.

The chance to buy a heavily staked two-year-old is not offered every day. Mr. Geo. Hollenbeck, of Rio Vista, advertises one for sale, however, in this issue that is a great prospect. It is a filly, two years old, entered and paid up on the Breeders' Futurity, Occident and Stanford Stakes. Has trotted a mile in 2:48 with only two months' work. Read the advertisement.

The first annual auction from the prize winning Humboldt herd of Shorthorns, owned by Messrs. B. F. Rush and William Pierce, will take place at Willotta Ranch, Sulsum, on Thursday, October 19th. Send to Fred H. Chase & Co., Live Stock Auctioneers, 1732 Market street, San Francisco, for catalogues.

STATE FAIR OPENS AT NEW GROUNDS.

North Star Takes Rich Occident Stake--Ambush Wins the Stallion Stake--Charlie T. Again Defeats Adam G., and Daedalion Paces a Mile in 2:10.

The fifty-second annual State Fair held by the California State Agricultural Society opened at the new fair grounds at Sacramento on Saturday last, September 2d. While the Board of Directors have labored under many disadvantages they have made a splendid showing and the new Agricultural Park will be one of the most complete and best arranged fair grounds in the United States when the plans are completed.

The grounds lies about two miles east of the capital city, and comprise a little more than one hundred acres. Here has been constructed the finest mile track on the Pacific Slope, and many fine buildings for the exhibition of stock. The barns for the draft horses, dairy and beef cattle, sheds for sheep, hogs, etc., are as complete as they can be made and offer a strange and splendid contrast to the old tumble-down shacks that breeders have been showing in during the past twenty years at the old grounds.

The new grand stand, while called a temporary affair, is the best arranged in California. There is not a seat in it, from the lower to the top row, but affords a view of every foot of the magnificent track, and every occupant thereof since the State Fair of 1905 opened has spoken in praise of the architect that designed it and the Board of Directors under whose management it was built.

The horse barns are complete in every detail, with large roomy box stalls all ventilated in the most approved manner. There is plenty of room for the cattle and they are a feature of this year's fair. The grounds being entirely new are not shaded, of course, but a tree planting enterprise has already been started with Mrs. Burke, wife of Director Frank H. Burke as the leading spirit, and it is proposed to have the grounds planted with fast growing trees that will give shade and beauty to the place.

The track is laid out as perfectly as the surveyor and graders could make it. The work was all done under the supervision of Mr. A. M. Allen, the greatest track builder in America, and it is his last and his best work. One winter's rain is all it needs to make it the fastest track on the Coast. In spite of the fact that it has not had enough water owing to the delay in getting the ground piped, a heat was paced on it the first day in 2:10 and a three-year-old trotted a fourth heat over it in 2:15½.

On the opening day probably two thousand people were present. It was a larger crowd than usual for the first day of the fair, and the directors were pleased. In the judges' stand Directors Geo. W. Kingsbury and Frank H. Burke sat as judges of the harness events, with Ed R. Smith of Los Angeles as starter and Geo. B. Kelley as clerk of the course.

Secretary Albert Lindley was ubiquitous. Although it was his first fair he was much better than a raw hand, and with a year's experience will make an efficient a secretary as the society ever had. He is painstaking, level headed, affable, has excellent executive ability and is greatly interested in the success of the organization. It is his aim to put the California State Fair on a high plane and to make it what it was intended, a great annual exposition of the State's products and progress. He seems to be the right man in the right place.

The Races.

When the bell was rung to announce the opening of the racing program, the first to appear was the well known trainer, H. S. Hogaboom, who was sitting behind the pacing mare Daisy E. by Richards' Elector, dam a Waldstein mare. Daisy E. is owned by Mr. Geo. Cressy of Sacramento, and Mr. Hogaboom started her for a record. She paced a nice mile in 2:22, the first official time made on the new track.

The bell was rung again, this time for the three-year-old trotters that were to compete for the rich Occident Stake, which had a total value of \$3885, divided into three moneys—60, 30 and 10 per cent. Starting payment had been made upon nine of the original entries, but only four appeared to race for the money. North Star, the tall, big-striding Nutwood Wilkes gelding, was favorite on the strength of his great race at Santa Rosa just two weeks previous, where he won in straight heats and trotted two of them in 2:13½. Bellemont, the fast Zombro filly, was second choice and Princess Louise, daughter of

Coronado, was next in favor, with Sir Carlton, a handsome and nice moving son of Nutwood Wilkes, but little thought of as a factor in the race, although in any previous year he might have been picked to win. When the scoring began North Star did not seem to be trotting squarely and it was whispered that he was not in proper shape, while it was known that his driver, Charles Whitehead, was anything but well and had tried to get a substitute to drive the colt during the race. Mr. J. B. Iverson of Salinas, breeder and owner of North Star, was confident however that his colt's great speed and gameness would land him winner of first money and his confidence was not misplaced. On getting the word the first time Princess Louise went right to the front and was not headed during the mile. North Star broke twice during the heat, the second time indulging in a long run, although he seemed to lose greatly by it. In the race to the wire Princess Louise kept the lead and Durfee drove to beat North Star, but the Nutwood Wilkes gelding beat her out by nearly a length. The heat went to Princess Louise, Bellemont being placed second, Sir Carlton third and North Star set back to last place for running, greatly to the surprise of the spectators. The time was 2:20.

Scoring, Second Heat, in Occident Stake

An excellent start was given in the second heat and Bellemont went to the front, but Princess Louise had the speed to take the lead and keep it up the back stretch. Here Bellemont passed her and in a drive home in which North Star broke and then, regaining his feet, showed his wonderful speed, they made a grand race to the wire. Bellemont won by a neck in 2:17½, a new record for her and a very fast mile for the track which was surely four seconds slow.

Bellemont now ruled favorite, and it was thought she would finish the race in the next two heats. She won the third heat in 2:18½, North Star making a disastrous break.

In the fourth heat North Star was a little steadier. Whitehead took him back a little at the start and Durfee drove Bellemont in the lead. In the stretch the struggle for first money began in earnest. North Star's speed began to tell and he gradually gained on the little mare, coming on even terms with her about 150 yards from the wire and beating her to the judges by a half length in 2:15½, the fastest heat of the race and a much better mile than his 2:13½ at Santa Rosa. In this heat Bellemont showed her gameness, as she struggled hard to keep the lead, but was outtrotted. In this heat Princess Louise and Sir Carlton were distanced.

The fifth heat was a duel between the gelding and the filly. They trotted in close company all the way and a finer exhibition of game trotting and high-class driving has not been seen on a California track for many a day. North Star led by a neck at the quarter, at the half the positions were the same, and at the three-quarters was a half length in front. Here he began to draw away and when he trotted under the wire in 2:17½ the little mare was evidently too tired to make a fighting finish.

The last heat had several thrills in it. Bellemont broke just as the word was given, but after a few strides regained her feet and shot to the front and was leading by four lengths at the half. In this heat Whitehead showed his ability as a driver and his confidence in North Star as a stretch trotter. Although Durfee had passed him and was in the lead, Whitehead sat still and waited until turning into the stretch before calling on his colt for his best efforts. At the three-quarters two lengths separated the two, and on entering the straight they were neck and neck. With that marvelous long stride which carries him over the ground at such a rapid rate, North Star came down the stretch at increasing speed and crossed the wire four lengths in front of Bellemont in 2:18½, a wonderful mile over a heavy track for the sixth heat of a three-year-old race.

This race stamps North Star as one of the greatest three-year-olds seen on this coast for years. His

winnings amounted to \$2491 first money and \$348.50 third money, or a total of \$2839.50, which, added to the \$1750 won by him in the Breeders' Futurity, makes his total winnings on the two races \$4589.50. Mr. Iverson received the congratulations of a large number of friends, and Trainer Charles Whitehead came in for much praise for his handling of the colt. Bellemont proved herself a fast, game and consistent filly.

The 2:09 class pace had a field of eight starters. While there was a bunch of fast sidewheelers in this event, Mr. A. Ottinger's good stallion Daedalion had an easy race of it and won three straight heats just swinging. H. Ward, his driver, easing him up at the finish of each mile. The second heat was in 2:10, the first heat in that time to the credit of a horse on the new track. It was the general opinion that Daedalion could have paced a mile that day on a good track close to 2:05. He is a better horse than ever in his life and Mr. Ward deserves great credit for the horse's condition. Vision paced a good race and won second money, Virginia winning third and Kelly Briggs fourth.

While the 2:15 trot was finished in three heats, all of which were won by Charlie T., it was a horse race. In the betting Adam G. and Charlie T. divided favoritism. Cuate, Wild Bell and Lady Jones being in the field. In the first heat Charlie T. took the lead, Zibbell lying second two lengths back with the McKinney gelding until the far turn was reached when a race began between the two. They were head and head down the stretch, but Adam G. went to a break and Charlie T. crossed the goal a half length in the lead in 2:16½, the other three far behind.

In the second heat Zibbell adopted different tactics, taking Adam G. right to the front and opening up a gap of three or four lengths by the time the quarter pole was reached. He trotted the second quarter better than 32 seconds and reached the half in 1:05. At the three-quarters he was four lengths in the lead, but the pace told on him and he made a break from which he did not recover until all the others had passed him. Charlie T. reached the wire in 2:15½. Cuate was second, Lady Jones third, Wild Bell fourth and Adam G. fifth.

The third heat was an exciting one. Zibbell displayed the same tactics as in the previous one, and took Adam G. to the front at a whirlwind pace as soon as the word was given. He kept the lead until near the three-quarter pole when Adam G. broke, but this time recovered quickly. Charlie T. had assumed the lead however, and a race then began which brought the crowd to its feet. Gradually Adam G. gained on the leader and had him nearly caught, but the wire was reached with Charlie T.'s head in front and the race and first money were won. The time was 2:15½ and the pace at the finish so hot that the Zombro gelding broke just as he crossed the finish. It was a very close contest. Had Adam G. been steadier the result might have been different, as he seems to have two-minute speed when called upon for a brush. Al. McDonald drove a finely judged race with Charlie T. The summaries.

Pacing, against time, to heat 2:30.
Daisy E., br. m. by Richards' Elector-Waldstein (H. S. Hogaboom) won

ADAM G. LEADING CHARLIE T. AROUND FIRST TURN IN 2:15 TROT

Monday, being Labor Day, was a general holiday and the railroad shops and nearly all the big business houses were closed. This brought a big crowd to the track and the directors were highly pleased. There were races participated in by Indians from Nevada, broncho busting, etc., in the forenoon, and a program of six running events in the afternoon.

Tuesday's program was an excellent one, three harness events being on the card, supplemented with the usual four running races. The day's sport opened with the Harness Stallion Stake for three-year-old trotters. There were five starters—Ambush by Zolock, El Rey by Nushagak, Alto Downs by Iran Alto, Still Better by Iran Alto, and Vallejo Girl by McKinney. On his form shown at the previous meetings on the circuit Ambush was made a prohibitive favorite and there was little betting on the result. He won in straight heats, with the Nushagak colt second in all three, and Alto Downs third. Still Better and Vallejo Girl got the flag in the first heat. The total value of the stake was \$2024, of which Ambush won first and fourth money, or a total of \$1214; El Rey was awarded \$506 and Alto Downs \$303.

Fred Chadbourne's John R. Conway was made favorite for the 2:13 class pace, which had five starters. After losing the first heat to Friskarina, the Diablo stallion went on and won rather handily. Hattie Croner got third money and Argyle fourth.

The betting race of the day was the 2:12 class trot, in which Princess, What Is It, Jupiter B., The Commonwealth, Pat Rose, H. D. B., and Walter Wilkes were the starters. Jupiter B. was favorite at \$20, to \$9 for What Is It and \$5 for the field. It took fifteen scores to start the first heat, which went to Princess in 2:15, Jupiter B. second, What Is It third and The Commonwealth fourth. The other three were distanced.

In hot finishes What Is It won the next two heats and the betting switched all around. Under the rule Jupiter B. and The Commonwealth were sent to the stable for not winning a heat in three and Princess won handily from the gray gelding, and the Salinas crowd that had backed the mare heavily got all the money. The summaries:

Trotting, Stallion stake, three-year-olds, value \$2024, of which \$1012 to first, \$506 to second, \$303 to third, and \$202 to fourth.

Ambush, br. c. by Zolock-May McKinney..... 1 1 1

Walter Wilkes, b. g. by Sable Wilkes..... (Zibbel) d
Time—2:15, 2:14½, 2:13½, 2:15½, 2:19½.

On Wednesday, the fourth day of the fair, there was a poor program. But one harness event was on the card, five rather cheap running races providing the balance of the day's sport. The pacing event was for 2:20 class horses. It was won easily by the chestnut mare Loganette, owned by M. Argy. She paced the first mile in 2:13½ and in doing so distanced four of the seven starters. Eagle Pilot, an Eastern horse, and Dot, the Falrose mare, won second and third money. The summary:

Pacing, 2:20 class, purse \$600.
Loganette, ch. m. by General Logan..... (Wheeler) 1 1 1
Eagle Pilot, d. h. by Eagle Bird..... (Duffey) 3 2 2

Clara L., b. m. by Argent..... (Sprague) d
Joe Robin, blk. g. by Robin..... (Rodriguez) d
Fearnot, b. h. by Lynmont..... (Stewart) d
Time—2:13½, 2:17½, 2:33.

HARTFORD RACES.

HARTFORD (Conn.), September 5.—Sadie Mae, the favorite in the Charter Oak Stake race at Charter Oak Park to-day, dropped dead in the stretch, at the finish of the fourth heat of the race, after having been outfooted in the three previous heats. She ruptured a blood vessel of the lung, according to the verdict of a veterinarian.

It was evident at the start of the race that Sadie Mae was not in good form, but she got a good start in the fourth heat, and she led around the quarter turn, when the crowd got the impression that she had finally struck her gait and was about to win. The hope was of short duration. She was last into the stretch and as the leaders passed under the wire she staggered and fell dead.

The Zombro mare Zephyr won the first and second heats, trotting the opening heat in 2:08 and giving McKinney's greatest son his first 2:10 performer. The next two heats were won by Angiola and then the race went over till Wednesday.

There was a crowd of about 5000 at the park, and while the weather was fine, the track was slow after the heavy rains of several days.

The 2:19 trot went to the favorite, Leonardo, in straight heats. Lady Mowry by Nutwood Wilkes won third money in this event.

The 2:13 pace was a long drawn out race, requiring

seven heats to find the winner. Lady Sealskin was the favorite, but tired after two heats and could not get to the front again, although the last heat was as slow as 2:20. The summaries:

Trotting, 2:19 class, purse \$1000.

Time—2:11¼, 2:07½, 2:09½, 2:10, 2:13, 2:11½, 2:20.

September 6.—The fifth and final heat of the \$10,000 Charter Oak stake was won by Angiola to-day in 2:09½ with Zephyr second. After trotting four heats yesterday Angiola and Zephyr stood even with two heats won by each, and in the betting Angiola was the favorite to win the race. Geers made a strong drive with Zephyr to-day, but the mare had not the speed to overtake Angiola. Zephyr won second money, \$2500; Norman B., third, \$1500, and Glenwood M., fourth, \$1000.

Rain interrupted the racing this afternoon and the last race on the program, the 2:12 trot, was not reached. The rain came about 2:30 o'clock and the track was not sufficiently dried off for racing until 5 o'clock. Soon after the rain stopped A. J. Welch, owner of the track, induced a lot of automobilists to take their machines out on the track. The machines served as road rollers and did good service in getting the track in condition. Deleree was expected to take the Capitol City 2:30 trot, event, which closed in May. Her mile in 2:09½ in the 2:30 trot at Readville was

Bellemont (3) 2:17 1-2 in Action

regarded as putting her ahead of all other horses in the contest. She came in fifth in the first heat, lame from a strained tendon, and was withdrawn.

The first heat was won by Miss In Law, but, with Deleree out, Albert C became favorite in the betting, and this confidence was well placed. He took the next three heats without trouble. Most of the men with money to bet could see nothing but Don Carr in the pacing race, and there was little surprise when he won in straight heats. Owyho fought hard, but was outfooted.

Four drivers, Murphy, Walker, Howard and Helman, were fined \$50 each by Starter Robert Newton for scoring ahead of the pole horse, after they had been warned. Summaries:

Trotting, Charter Oak Stake, 2:09 class, purse \$10,000.

An gliola trotted a great race at Galesburg, Illinois, August 29th. She won in straight heats and every heat was in 2:07½. This is great trotting. Hal Frey won second money and Redlac third. There were six starters.

LAST TWO DAYS AT PROVIDENCE.

PROVIDENCE, R. I., Sept. 1.—The card at Narragansett to-day proved an attractive one for 9000 people who attended the Grand Circuit meeting, having as it did a special match race between Tiverton and Sweet Marie and a free-for-all which brought together the fastest horses in the country.

In the match race, although Tiverton opened a slight favorite, there was nothing to it but Sweet Marie. The mare led him around in both heats, and when Tiverton tried to make a race of it down the stretch he broke badly in both heats.

The free-for-all went to Nathan Strauss in straight heats. Although John M. opened a slight favorite in the betting, the best that animal could do was third in both heats, Nervola taking second money.

In the unfinished 2:25 pace, Col. Kirkpatrick's Albula, who had taken two heats of the race, won the third and deciding heat, Inter Ocean making another bad break that destroyed his chances of winning. Choir Boy, the popular choice in the 2:16 class, finished with the tail-enders in both heats, W. J. Lewis winning the event.

Boreazelle, the favorite, won the 2:24 trot in straight heats. The California mare Lady Mowry, by McKinney out of a mare by Nutwood Wilkes, trotted an excellent race and won second money. The final race of the day, the 2:09 trot, was unfinished when darkness caused the postponement of the event until tomorrow. In the two heats trotted The Roman took one and Jim Ferry the other. Summaries:

Pacing, 2:25 class, purse \$1000 (concluded from Wednesday).
Albula, br. g. by Altivo..... (Walker) 1 1 3 1

Sept. 2.—To-day's races at Narragansett close the Grand Circuit meeting here. The card contained three of the fastest races of the meeting, including the unfinished 2:09 trot, 2:06 pace and 2:07 trot, as well as the 2:11 trot and a pacing race.
Geers won his first race of the week, defeating The Friend, who was a strong favorite. Geers drove Baron Grattan, and in the first heat The Friend raced the bay gelding off his feet in the stretch. In the second heat The Friend broke in the stretch when abreast of Baron Grattan, and the latter won. Tyson drove poorly in the last heat, and should have won the race, as The Friend had speed and stamina, but Geers caught him napping and nosed him out at the wire.

In the 2:09 trot Glenwood M., the favorite, who dropped two heats yesterday, took the last two heats to-day without difficulty. Robert Mc took the 2:11 trot after dropping the first heat to Robert T., Hardwood finishing with the tailenders in both heats.

George G., with Geers driving, was favorite in the 2:07 trot, but the best he could do was second, with Wentworth taking the event in straight heats. Summary:

Trotting, 2:09 class, purse \$1500 (unfinished from Friday).
Glenwood M., br. h. by Bobby Burns..... (McDonald) 2 3 1 1

NOTES AND NEWS.

North Star's Occident.

"Didn't ye told you so?"

Daedalion looks like a 2.05 pacer next year.

There should be a record breaking attendance at the State Fair grounds at Sacramento this afternoon.

Bystander, son of Zolock 2:05½, reduced his record to 2:13½ in a whining race over East week before last.

Hallina Morgan, the three-year-old filly that raced through the Colorado circuit won a good race at Galesburg last week, with the time 2:14½, 2:15½ and 2:18¼.

Hattie Croner paced a good race in the 2:13 class at Sacramento on Tuesday. She was a good second in each of three heats, but had to go to the stable for not winning a heat in three. She got third money.

Jonesa Basler was not started in the 2:09 class pace at the State Fair. The same day, however, he worked a heat in 2:10½ over the new track.

A starter should not be condemned for sending bad actors off in the rear after giving them a few opportunities to score with the hunch. Horses that do not have good manners should not be waited on.

Deviletta, William Harkey's filly by Diablo, had a walkover in the pacing division of the Harness Stalling Stake at the State Fair. The winnings were not large, however—only \$176.

Dr. Strong won the \$5000 gold cup at the Inter-City matinee races at Washington Park, Chicago. He won in straight order, the time being 2:09½, 2:09. Aerolite, Tom Axworthy and Prince of Orange were the other starters and finished in that order.

Capt. C. H. Williams, of the Alaska Packing Company, returned this week from a four months' trip to the frozen north and will take in the last two days of the State Fair. The captain has no colts out this year, but is breeding a few at his home at Palo Alto that will be starting for the money next year and thereafter. He owns the McKinney stallion Unamak, one of the handsomest young sons of the champion sire. Unamak is out of a Director mare, a choice combination of the blood of champions.

Poor Sadle Mac! It is a pity some one did not know she was in no condition to race, or she might have been saved. What a great brood mare she would have made.

There is talk of a big speed sale at Pleasanton next March. Fred H. Chase & Co. have the matter under consideration with Ed R. Smith, who will act as auctioneer in case the sale is held. It should be a big success.

Rex Blees, the famous saddle stallion of Monroe county, Missouri, has been sold by his owner, Mr. Barnard, of Colorado Springs, to an Audrain county man, for \$8000. Rex Blees is a son of Rex McDonald, and outsells his illustrious sire by \$1500, the price paid for him being the highest ever paid for a Missouri saddle horse. He won the championship stakes at the World's Fair and has been victor in all the horse shows of recent years west of the river. Rex Blees is now in charge of John T. Hook of Paris, Missouri, and has been for three years.

On the first day of the Readville meeting W. J. Andrews drove the pacing stallion Auduhon Boy 2:03¾ a mile in 2:01¾, the last half in 58¾ seconds. The mile was not an exhibition, but a workout for the chestnut stallion and the way he finished with speed to spare led the observers to predict a record of two minutes for him a little later in the season.

The stallion John A. McKerron 2:04½, the gelding Tiverton 2:04½ and the mare Sweet Marie 2:04¾ are the three fastest trotters that trace in the paternal line to George Wilkes. John A. McKerron 2:04½ traces to him through Guy Wilkes 2:15¼, Tiverton 2:04½ through Young Jim, and Sweet Marie 2:04¾ through Aleyone 2:27.

A fair and race meeting is being held at Ferndale, Humboldt county, this week. On Wednesday next the Eureka fair and race meeting will open.

Carrie Mac by John A. McKerron 2:04½ won second money in a three-year-old trotting stake at Wellington, Ohio, last week. Jack McKerron, also by him, won the two-year-old stake for trotters.

Cuate, Chas. A. Durfee's good McKinney gelding, trotted a nice race in the 2:15 class on the opening day of the fair at Sacramento. He was up against Charlie T. and Adam G. but finished a good second in the second heat of the race, which was trotted in 2:15¾.

Fred Chadbourne's string has won quite a neat sum this year on the circuit. He has all his horses in good shape and has materially reduced the records of John R. Conway, What Is It, Dr. Hammond and Mona Wilkes.

Directum 2:05¼ is proving a great sire. His list of 2:10 trotters promises to be as large as that of any stallion within the next five years.

Noma 2:19, the two-year-old trotter who secured her record last week at Readville, is the first of the get of Walnut Hall 2:09¾ to enter the standard list. She is certainly a high-class filly and is owned by President W. H. McDoel, of Chicago.

Secretary Wilson of the Kentucky Trotting Horse Breeders' Association, has announced the classes for the nineteen purses to be on the week's program at the fall meeting at Lexington, October 3 to 14. For trotters there are nine purses of the value of \$1000 for classes from 2:06 to 2:25, and for pacers ten, ranging from 2:04 to 2:20.

Bellemont, the Zombro filly that won two heats and second money in this year's Occident Stake, got a severe bump when being unloaded from her car at Sacramento. She struck the door with her head, making quite a wound just between her ears, and trotted her race with a bandage on it.

E. E. Smathers, Jesse Lewisohn and A. B. Hudson, three of the greatest plungers in America, who have frequently bet from \$5000 to \$25,000 on a race, have agreed to limit their wagers to \$100 hereafter. This move is the result of a recent discussion by these men of chances to win on races. The three were unanimously of the opinion that betting on race horses was a delusion and a snare and to win a fortune from bookmakers was impossible. The outcome of the discussion was an agreement that \$100 should be the limit bet on a single horse hereafter. In order to make the agreement binding and provide a penalty for the one who should break it, it was expressly stipulated that if the agreement was broken the guilty man should pay to each of his fellow plungers a forfeit of \$5000.

Mr. E. E. Sherwood of San Gabriel writes us that he has just sold his handsome young mare Bessie Barnes by Zombro, dam by Truman, son of Electioneer, to Jackson & Hall, of Doval, Maine, for the neat sum of \$3000. Bessie Barnes is a pacer and very fast. She was a good second in a heat won by Virginia in 2:10 at the Los Angeles meeting last July, and at the Fresno meeting, although she did not win the race, got fourth money in the 2:20 class pace and finished third in the fourth and last heat won by Virginia in 2:10½. Truman, sire of her dam, has a record of 2:15¼. Her second dam is the great broodmare Nadine (dam of Botonica 2:09¼, etc.) by Wild-Idle, third dam Norah by Messenger Duroc, fourth dam Mary Hulse by American Star.

Zolock 2:05¼ will make an attempt to lower his record at Sacramento to-day. While the track is not in the condition for a trotter or pacer to show his best speed, still there is a probability that the son of McKinney will be able to shade his record a little as he is in fine fettle. Henry Delaney is to have \$500 if he lowers Zolock's record, and Director Geo. W. Kingsbury will give him \$100 more if he lowers the State pacing record of 2:03¼ made by John R. Gentry at Los Angeles.

A recapitulation of Cresceus' racing career shows that he started in thirty-eight races, of which he won twenty-three, and secured second money in ten others. He started sixty times against time for track records, being successful on forty-seven occasions. His total winnings on the turf amount to nearly \$110,000. Cresceus was trained and driven in all of his races by his breeder and owner, George H. Ketcham.

The handsome and fast mare Little Babe died at Santa Rosa during the Breeders' Meeting. Little Babe was a very fast trotter but had been unfortunate in her racing career in meeting the best horses in the State. She trotted three heats in 2:15 and better at San Jose in 1904, in the California Stake, but was outside the money at that. She was sired by Bradtmoor and out of a mare by Dawn and was owned by Henry Peters of Dixon, who had refused \$2500 for her.

Sarah Benton, the dam of Charlie T. 2:14¼ is also the dam of Ella Madison 2:12¼ and Lord Kitchener 2:29½, the last named being a full brother to Charlie T. All these trotters were bred and raised by Mr. M. A. Murphy, formerly of Colton, but now of San Francisco. Charlie T. is owned by Mr. John Treadwell, the well known capitalist, to whom Mr. Murphy sold him.

Zolock will not go East. The only races still open to him were a few \$1000 purses and the expenses of the trip would eat up all the profits even were he to win all the races to which he is eligible.

Wanda 2:17¾, owned by Mrs. F. H. Burke, was the first of the grand-children of Electioneer to take a standard record. She is the dam of The Roman 2:09¼, and Search Me 2:22½, the latter being the first of the get of Searchlight to enter the charmed circle. Wanda is destined to be one of the great broodmares of California, as every one of her foals has a high rate of speed. A full sister to The Roman is one of the greatest young prospects in California and looks like 2:10 will be easy for her when she is ready to start.

The ribbon parade through the streets of Sacramento last Tuesday evening by the members of the Sacramento Driving Club, marshalled by Mr. Frank E. Wright, was a very pretty spectacle. At least a hundred rigs were in line, and no handsomer parade of fine horses has been seen in the capital city.

Hollister's race meeting will open September 27th and continue four days.

Lou Dillon trotted a half in 1:02, pulling a wagon over the heavy Washington Park track at Chicago last Monday.

Hi Hogoboom made the first record on the new track at Sacramento when he marked Geo. Cressy's mare Daisy E. in 2:22 in a trial against time just before the races began. The first heat trotted on the new track was won by Billy Julian with Princess Louise in 2:20, and the first mile in 2:10 on this track was driven by H. R. Ward, when he won the second heat of the 2:09 pace with Daedalion in that time.

There is another lone tree track on the map. The State Fair track at Salem, Oregon, has one lone oak in the center field, the famous Pleasanton track is adorned in the same manner, and the new track of the California State Agricultural Society also has a solitary oak in the infield. It is an omen of good luck.

Hetty G. 2:04¼, the wonderful old pacing mare that was a sensation last season, has been thrown out of trotting for the balance of the season, as her trainer, Tommy Murphy, found that she was not in form to race in her class. He says, however, that her racing days are not over, for he will put her in training again next spring.

It is a curious coincidence that those two great members of the Mac family, Sadie Mac 2:06¼, trotting, and Ethel Mac 2:07¼, pacing, are both owned by women. The former, as has been frequently stated, is the property of Miss K. L. Wilkes of Galt, Ont., while the latter is owned by Mrs. W. H. McCarthy, whose husband trains and drives her.

Mack Mack 2:12 wrenched one of his ankles in a stall recently and it is said will not start in any further races this season, but will be shipped back to California.

An Eastern turf journal says: "The trotting horse-men of the United States need a big, brainy man to lead them out of the wilderness." And we might add that the trotting horse-men of California are also in need of a man of the same sort who will lead a crusade that will have for its object the securing of their rights.

Each one of the four money-winners in the three-year-old trot at Readville last week was a male-line Electioneer. So also were three of the four money-winners in the two-year-old trot.

An effort will be made to place Todd 2:14¾, the half-brother of Sadie Mac 2:06¼, in the 2:10 list at Lexington this fall.

Italla by Zombro won her race at Goshen, New York, August 23d, right off the reel, and took a record of 2:16¾. She repeated her winning at Newberg the following week. Italla won the Occident Stake of 1901, the fastest heat being in 2:23½.

The old Gilroy track has been used during the past few months by quite a number of trainers who are getting their horses ready for the Hollister race meeting which will open on the 27th inst.

Santa Maria will hold a meeting November 6th to 11th with purses ranging from \$75 to \$250 for harness horses and runners. William Mead is secretary. Entries will close October 23d.

Three sires are credited with two new 2:10 performers each this year. Directum 2:05¼ has Ethel's Pride 2:07½ and Directum Lass 2:09¾. Grattan 2:13 has Nutwood Grattan 2:07¼ and Clarita W. 2:09¾. Wayland W. 2:12¼ has Bollvar 2:08½ and Nelly R. 2:09½. Directum is the only one with two trotters, one of Grattan's being a pacer, while both of those by Wayland W. are pacers.

North Star 2:13¾ is not only the fastest three-year-old trotting gelding of the year, but he is undoubtedly one of the gamest. He was the contender in every heat of the Occident Stake last Saturday, finished second in every one of the first three and won the last three on his gameness. A fourth, fifth and sixth heat in 2:15½, 2:17½ and 2:18½ by a three-year-old shows not only great gameness but wonderful endurance.

James W. Marshall's filly, Mona Wilkes 2:11½ by Demonio out of a mare by Nutwood Wilkes, is the fastest three-year-old pacer of the year. A very remarkable incident of the race wherein she took her record is that she won the fifth and deciding heat while hitched to a road cart. After winning the first and second heats in 2:11½ and 2:13, in both of which her hocks hit the sulky, she broke in the next two heats and lost them to Mamonia, another daughter of Demonio, in 2:14½ and 2:17. No sulky could be had, and Fred Chadbourne hooked her to a cart. She did not mind the weight and reeled off the fifth heat in 2:15½. No gamer filly ever lived.

At the recent Pittsburg matinee there was a stunning surprise in the free-for-all trot, in which R. H. Boggs' chestnut gelding Robln C. beat S. A. Pickering's Dr. Strong, trotting the last two heats in 2:10, 2:09½, a grand wagon performance, Strong taking the first heat in 2:11½. Robln C.'s turf record is but 2:17¼, made last season. He is by Minotaur, son of Nomnator 2:17¼. His dam is Laura C., by Eros, son of Onwood 2:25¼; grandam the fast pacing mare Minnie P. 2:10½, by Ernest.

OTHER PEOPLE'S OPINIONS.

Casper Redfield in Chicago Horseman. The 2:30 standard for trotters was adopted in 1879. Its object was to separate from the great mass of trotting horses a few which, by reason of the merit of their performances, should be considered standard trotters. The total number of horses which had, at that time, trotted a mile in 2:30 or better was about 1000; now it is over 20,000, and the number is increasing at the rate of about one thousand per year. Already the list is so great as to be unwieldy.

Upon considering the changes which have occurred in the trotting horse during the past century it would seem that we should revise the standard so as to make its essential principles applicable to all time instead of to one particular date. At the time the standard was adopted a 2:30 trotter meant a horse of exceptional merit as a performer, but to-day that standard has lost its former significance. Looking back over the evolution of the horse from the three-minute trotter of a century ago to the two-minute trotter of to-day, it will be seen that the standard should be on a sliding scale which bears some relationship to the rate which speed is evolved. To maintain the 2:30 standard for all horses of all times is to not only let into the standard a large number of mediocre horses of to-day, but to exclude a great many horses of exceptional merit which existed at an early date. A record of 2:31 made forty or fifty years ago is more meritorious than a record of 2:10 made to-day, yet we hail the 2:10 trotter as a great performer and turn down the ancient 2:31 trotter as not being worthy of our consideration.

To make a sliding scale which will represent actual merit with a reasonable degree of accuracy, it is necessary to take into consideration the times at which horses lived and the extreme speed exhibited by the best horses of those times. In doing this the inclusion of any horse within, or exclusion from, the standard may be most conveniently determined from the date when he was foaled. As it is impossible in a case of this kind to obtain that degree of accuracy which will do absolute justice to all horses, and as it is impracticable to attempt it by the introduction of fractions, the best method is to group horses by decades and to vary the standard for each decade.

To carry out the idea here suggested I have calculated a sliding-scale standard which comes as near to accuracy as appears practical under the circumstances. In doing this I have assumed that the 2:30, at the time of its adoption, was very nearly right, and that it should apply to horses foaled after the beginning of 1870 and before the beginning of 1880. From that point I have calculated backward into the earlier dates and forward into the later dates and find that a variation of five seconds in the standard for each decade gives a reasonable degree of accuracy. Putting this into a table we have the following:

A Standard Trotter is one Foaled Within the Dates Named and Trotting a Mile Within the Time Set Opposite Such Dates.

Foaled within years.	Trotting a Mile in.
1810 to 1819.....	3:00 or better.
1820 to 1829.....	2:55 or better.
1830 to 1839.....	2:50 or better.
1840 to 1849.....	2:45 or better.
1850 to 1859.....	2:40 or better.
1860 to 1869.....	2:35 or better.
1870 to 1879.....	2:30 or better.
1880 to 1889.....	2:25 or better.
1890 to 1899.....	2:20 or better.
1900 to 1909.....	2:15 or better.
1910 to 1919.....	2:10 or better.

The number of 2:30 trotters in 1870 was 181, which is substantially the number of 2:10 trotters which existed in 1903. This gives a total of 20 seconds in thirty-three years, or one minute in a century. The calculation here given gives only 50 seconds in a century or a slight discrimination in favor of present day performers. A continuation of the same sliding scale for two decades further, however, would probably bring about a substantial balance. After about 1930 or 1940 the amount of variation per decade would have to be rapidly diminished. To continue the same variation for a century to come would require a horse to trot a mile in 20 seconds and a little more would have him finish the mile before he began.

The comparative accuracy of the scale may be seen by comparing it with the fastest performances within different decades. The tabular standard speed for the decade from 1840 to 1849 is 2:45. The extreme speed for that decade was 2:28 made by Pelham in 1849. The difference between the extreme and the standard is 17 seconds. For the decade 1870 to 1879 the standard is 2:30 and the extreme is 2:12½, made by St. Julien in 1879. The difference here is 17½ seconds. For 1890 to 1899 the standard is 2:20 and the extreme speed is 2:03½, made by Alix in 1894. Here the difference is 16½ seconds. The differences for the intermediate points are also substantially the same amount.

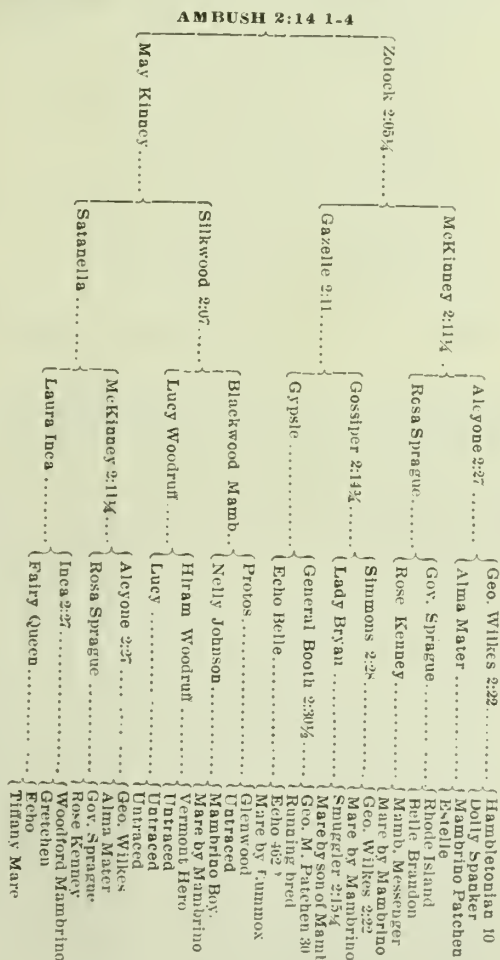

It will be a good plan to make the standard in definite relationship to the extreme speed of the fastest horse, and that is what the proposed standard is. But as it cannot be known in advance what the extreme of any decade will be it can be readily calculated from the preceding decade. Taken in this way the proposed standard for horses foaled in any decade is found to be from eleven to twelve seconds slower than the best record of the preceding decade. A convenient general rule would be to make the standard, at the beginning of each decade, ten seconds slower than the best record made up to that time. Thus, in 1910, the best record for the first decade of the present century will be known, and it will then be ample time in which to determine what rate of speed shall

constitute a standard record for horses foaled during the years 1910 to 1919 inclusive.

The advantages of such a rule as this will be obvious. Its application will make a definite record which will accurately mark the evolution of the trotter, and it would ultimately become of great historic value. It would cut out of the list a large number of horses which are not entitled to recognition at being among the best of their day and generation. At the present time the owners of many horses are content to give them record just inside of 2:30, and the consequence is that in many cases the records do not indicate the capabilities of the horses to which they are attached. With a better standard there would be an incentive to give each horse the best record of which he was capable, and these records would be better indications of merit. The evolution of the trotter is undoubted, and a horse foaled after 1900 and incapable of trotting to a record of 2:15 or better is not keeping up with the procession. All such should be discarded as not forming part of a breed in which speed is an essential element.

PEDIGREE OF AMBUSH.

Ambush, winner of the Harness Stallion Stake, is a grand looking brown colt, whose blood lines are here given, as there is probably not another colt bred like him in America. By a son of McKinney and out of a mare whose dam was by the same great sire, he is doubtless the only colt ever trained that carries two crosses of the blood of Sweet Marie's sire. A colt by a pacer that has a record of 2:05¼ and out of a mare sired by a pacer with a record of 2:07 could reasonably be expected to pace, but Ambush is a square trotter and a better gaited one is hard to find. His pedigree tabulated to the fifth cross is as follows:

RACES AT INGLESIDE.

The San Francisco Driving Club, with a bookmaking attachment, held a race meeting at Ingleside on Monday afternoon of this week—Labor Day. The results of the harness races were as follows:

First race, 2:35 class—Won by Monkey in straight heats; time, 2:25½, 2:24. Dan Alden second, Edward third.

Second race, free for all—Won by Kitty D, in straight heats; time, 2:20, 2:20½. Harry Hurst and Flora G, alternating second and third.

Third race, 2:30 class—Won by Grace McKinney in straight heats; time, 2:28½, 2:31½. Dynamite second, Lucky Prince third in first, Dick third in second heat.

Fifth race, 2:45 class—Won by Joe Mc, first in second and third heats; time, 2:38½, 2:31¼. Ed Ray second in second and third, first in first heat; Little Dick third.

Sixth race, unfinished—King Cadenza first in first heat; time, 2:23¼. Lady Jeffries second, Ring Rose third. Mixer first in second heat, time 2:20; Ring Rose second, Verona third.

DREW A TOOMEY SULKY.

When Edwin C. won the \$5,000 Park Brew Pacing stake at Providence recently, he was hitched to a Toomey low-seat racer sulky made by S. Toomey & Co., Canal Dover, Ohio. These sulkies are the most popular of any on the market and are being used by the large majority of the best horses on the turf.

LEWIS AND CLARK STOCK SHOW.

PORTLAND, Sept. 5.—A big force of carpenters is at work on the sheds for the stock show, on the heel of the peninsula across Guild Lake, at the Lewis and Clark Exposition. The framework of the various barns is already completed, and all will be in readiness by September 10. As the stock show dates are September 19 to 29, inclusive, this is ample time. There will be room for 500 head of cattle, 300 horses, 300 sheep, 200 hogs and 150 goats, and there are enough entries to fill every stall.

The list of judges has just been given out by M. D. Wisdom, live stock superintendent, who says: "The judges are the most prominent and capable it is possible to secure, each being an expert in his own class. This assures absolutely fair and able judging of every entry."

Professors C. F. Curtiss, of Ames, Ia., and W. H. Dobson, of Marion, Ohio, have been selected to judge Class A horses, and the other judges so far chosen are: W. O. Cowen of Chicago, and George F. Bellows of Marysville, Mo., Shorthorns; C. A. Spannard, Emporia, Kan., Hereford Galloway and Poled Angus breeds; Prof. W. J. Carlisle, Fort Collins, Colo., Jerseys; Prof. C. S. Plum, Columbus, Ohio, Holsteins; Dwight Lincoln Milford Center, Ohio, fine wool sheep; G. G. Council, Vandalia, Ill., swine.

The entry list is now closed, and an inspection of it assures the fulfillment of Mr. Wisdom's early prophecy that the stock show would be not only the best ever held in the West, but one of the best ever held anywhere. Stockmen all over the United States have taken a very keen interest in it from the first and a very large attendance of Western stockmen is expected, as many have postponed their visit to the big fair in order to enable them to be present when the stock show is in progress.

Among the more notable entries, mention might be made of Unvers, winner of many prizes, a stallion purchased a year ago by Boedighelmer and Yankee, of Salem, Ore., from McLaughlin Bros. of Kansas City for a consideration in the neighborhood of \$3,000. Unvers won first prize in class, and two medals and two prizes in collection at St. Louis last year. He was foaled May 27, 1900, and on the Continent won a first prize and gold medal at the show of the Societe Hippique Percheronne, in 1903, and first prize in collection at the Grand Annual Show of France in the same year. He was awarded first prize at the Indiana State Fair in 1903. Unvers is one of McLaughlin Brothers' finest importations. He is a handsome black stallion and weighs 2,310 pounds.

WESTCHESTER RACING ASSOCIATION.

A number of very important stakes for runners will close Friday, Sept. 15th, with clerk of the course, H. G. Crickmore of the Westchester Racing Association, Windsor Arcade, 571 Fifth Avenue, New York.

For the spring meeting of 1906, there is the Juvenile with \$2500 added, at five furlongs, for two-year-olds; the Fashion, with \$2000 added, at four and a half furlongs, for two-year-old fillies, and the Eclipse, with \$5000 added, for two-year-olds, at five and a half furlongs. There is also the historic Withers, with \$5000 added, at a mile, for three-year-olds; the Ladies', with \$4000 added, at a mile, for three-year-old fillies, and the forty-first Belmont Stakes, of \$25,000, for three-year-olds, at a mile and three furlongs. The tenth National Stallion Race of \$5000, for two-year-olds, at five furlongs, completes the list for 1906.

There will also close the yearling entry for the forty-second Belmont Stakes to be run at the spring meeting in 1908, with \$25,000 added, for three-year-olds, over a mile and three furlongs, and also for the tenth Matron Stakes, with \$10,000 added, for then two-year-olds, to be run at the fall meeting in 1908, at six furlongs.

Full details of these stakes appear in our business columns. Entry blanks at this office.

Washington Jockey Club.

The Autumn meeting at the Benning course, Washington, D. C., in November, is one of the great running meetings of the year. In our columns to-day are advertised the stakes, to close Friday next, September 15th.

There is the Grand Consolation, \$3000 added, for two-year-olds, at seven furlongs; the Dixie, with \$2500 added, three-year-olds, at a mile and a half, and the Vestal, with \$2000 added, for three-year-old fillies, at a mile and a half.

The closing will be noticed of the Columbia Handicap, the Washington Cup, the Benning Special, the Maximum, the Bladensburg, the Hunter's Champion and the Junior Steeplechase, in due course. Entry blanks at this office.

It is said that the "skindicate" book at Sacramento pays \$1000 per day for the privilege, with a proviso that four running races at \$250 each are placed on the program each day. Just where the profit to the State Agricultural Society comes in, is one of those things "no fellow can find out," as Dundreary says. The bill which appropriated the money for the new fair grounds expressly required that no betting should be done on the property and no intoxicating liquors sold. The "skindicate" leased a piece of private property adjoining the track on the south, built a high board fence around it, and fitted up a bar and pool room. The directors pulled down enough of the fair ground fence to permit free passage to and from this pool room, and rumor has it that \$1000 per day is the sum paid into the fair treasury by the "skindicate" for this act. There is no other passage from the park except through the regular exits, and checks are necessary to return through them.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

Coming Events.

Rod.

April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steel-head in tidewater.
 April 1-Sept. 15—Closed season for lobsters and crawfish.
 April 1-Nov. 1—Trout season open.
 June 1-Jan. 1—Open season for black bass.
 Sept. 10-Oct. 16—Close season in tidewater for steelhead.
 Sept. 10-Oct. 16—Close season for catching salmon.
 Sept. 16—Saturday Fly-Casting Contest. Re-entry. Stow lake, 2:30 p. m.
 Sept. 17—Sunday Fly Casting Contest. Re-entry. Stow lake, 10 a. m.
 Oct. 16-Nov. 15—Close season for taking salmon above tide water.
 Nov. 1-Sept. 1—Open season for crabs.
 Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

Feb. 15-Sept. 1—Closed season for mountain quail, grouse and sage hen.
 Feb. 15-Oct. 15—Closed season for quail, ducks, etc.
 April 1-Oct. 15—Closed season for English snipe.
 July 1-Feb. 15—Dove season open.
 Aug 1-Oct. 15—Deer season open.
 Sept. 7, 17—Petaluma Gun Club. Blue rocks. Kentworth Park.
 Sept. 9, 10—Empire Gun Club. Merchandise shoot. Blue rocks. Alameda Junction.
 Sept. 10, 24—Santa Rosa Gun Club. Blue rocks.
 Sept. 15, 16, 17—Interstate shoot. Blue rocks. Ingleside. Elmer E. Shaner, Manager. Pacific Coast Handicap under auspices of S. F. Trapshooting Ass'n., A. M. Shields, Secretary.
 Sept. 17—Mount View Gun Club. Blue rocks. Mount View, Cal.
 Sept. 24—Millwood Gun Club. Blue rocks. Mill Valley Junction.
 Sept.—Sebastopol Gun Club. Blue rocks. Every Sunday.
 Sept.—Napa Gun Club. Blue rocks. Every Sunday.
 Sept.—Vallejo Gun Club. Live birds. Floden Station.
 Sept. 24—Union Gun Club. Blue rocks. Ingleside.
 Sept. 30-Oct. 1—Two-day blue rock tournament. Biggs Gun Club. Biggs, Butte county. H. Haselbusch, manager.
 Oct. 1—Pacific Coast Trap Shooters' Association. Merchandise shoot. Blue rocks. Empire Club grounds, Alameda Junction.

Bench Shows.

Sept. 4—Rhode Island Kennel Club. Crescent Park, East Providence, R. I. H. M. French, Secretary.
 Sept. 4, 5—Miller's River Kennel Club. Athol Mass. Wm. W. Sutton, Secretary.
 Sept. 9—San Mateo Kennel Club. 2nd annual open air show. Burlingame. D. J. Sinclair, Secretary.
 Sept. 9—Cedarhurst Kennel Club. Lawrence, L. I. John G. Bates, Secretary.
 Sept. 11, 13—Newport Dog Show. Newport, R. I. Francis M. Ware, Secretary.
 Sept. 16—Englewood Kennel Club. Englewood, N. J. M. W. Robinson, Secretary.
 Sept. 18, 21—Genesee County Agricultural Society Kennel Club. Batavia, N. Y. A. E. Brown, Secretary.
 Sept. 23—Madison Athletic Association. Madison, N. J. E. L. Jones, Secretary.
 Sept. 25, 26—Miami Valley Kennel Club. Piqua, Ohio. Edwin A. Hiatt, Secretary.
 Sept. 27, 28—Valley Fair Kennel Club. Brattleboro, Vt. Howard C. Rice, Secretary.
 Sept. 30—Bryn Mawr Kennel Club. Haverford, Pa. Henry D. Riley, Secretary.
 Oct. 3, 6—Texas Kennel Club. Dallas, Tex. W. H. Ordway, Secretary.
 Oct. 3, 6—Danbury Agricultural Society, Danbury, Conn. G. M. Rundle, Secretary. Jas. Mortimer, Superintendent.
 Oct. 11, 14—Spokane Kennel Club. Spokane, Wash. A. B. Jackson, Secretary.
 Oct. 17, 20—Frederick Agricultural Society. Frederick, Md. J. Roger McSherry, Secretary.
 Sept. 28, 29, 30—Stockton Kennel Club. F. A. Geisea, Secretary, Stockton, Cal. D. J. Sinclair, Superintendent.
 Nov. 15, 18—Boston Terrier Club Specialty Club. Boston. F. H. Osgood, Secretary.
 Nov. 28-Dec. 1—Philadelphia Dog Show Association. Philadelphia. J. Sergeant Price Jr., Secretary.

1906.

Feb. 12, 15—Westminster Kennel Club. New York. Roht. V. McKim, Secretary.
 Feb. 20, 23—New England Kennel Club. Boston. Wm. B. Emery, Secretary.
 Feb. 28-March 3—Washington Kennel Club. Washington, Pa. F. C. Thomas, Secretary.
 March 7, 10—Duquesne Kennel Club. Pittsburg, Pa. F. S. Stodman, Secretary.

Field Trials.

Aug. 23—North Dakota Field Trial Club. Inaugural trials. Grand Forks, N. D. A. E. Palmer, Secretary, Grand Forks, N. D.
 Sept. 4—Nebraska Field Trial Association. 4th annual trials. O'Neill, Neb. H. H. McCarthy, Secretary, O'Neill, Neb.
 Sept. 6—Manitoba Field Trial Club. 19th annual trials. La Salle, Man. Eric Hamber, Secretary, Winnipeg Man.
 Sept. 11—Northwestern Field Trial Association. Inaugural trials. O'Neill, Neb. C. W. Buttles, Secretary, Kansas City, Mo.
 Sept. 21—British Columbia Field Trial Club. 3d annual trials. Ladner, B. C. H. S. Rolston, Secretary, Vancouver, B. C.
 Oct. 12—Pacific Northwest Field Trial Club. La Conner Flats, Wash. Chas. L. Lundy, Secretary, Seattle, Wash.
 Oct. 23—Ohio Field Trial Association. Washington Court House, O. C. T. Phillips, Secretary, Columbus, O.
 Oct. 30—American Field Futurity Stake. For Pointers and Setters whelped on or after January 1, 1904, whose dams have been duly qualified. Robinson, Ill., entries closed July 1. Address Am. Field Publishing Co., Chicago.
 Oct. 31—Connecticut Field Trial Club. Hampton, Conn. F. M. Chapin, Secretary, Pine Meadow, Conn.
 Nov. 6—Independent Field Trial Association. Huntsville, Ill. S. H. Sowell, Secretary, Indianapolis, Ind.
 Nov. 8—Dayton Pointer Club. Dayton, O. John Roehm, Secretary, Dayton, O.
 Nov. 13—Illinois Field Trial Association. Robinson, Ill. Wm. R. Green, Secretary, Marshall, Ill.
 Nov.—Indiana Field Trial Club, (Week following Illinois Chapman Stake). C. F. Young, Secretary, Clay City, Ind.
 Nov. 21—International Field Trial Club. Ruthven, Ont. W. B. Wells, Honorary Secretary, Chatham, Ont.
 Nov. 23—Virginia Field Trial Association. Martinsville, Va. Jhas. B. Cooke, Secretary, Richmond, Va.
 Dec.—Pointer Club of America (following the Continental trials). Barber, N. C. C. F. Lewis, Secretary, 126 Maiden Lane, New York.

Dec. 2—Continental Field Trial Club, 11th annual trials, John White, Secretary, Hempstead, Long Island.
 Dec. 12—Eastern Field Trial Club. Waynesboro, Ga. S. C. Bradley, Secretary, Fairfield, Conn.

1906.

Jan. 8—Georgia Field Trial Association. Waynesboro, Ga. P. M. Essig, Secretary, Atlanta, Ga.
 Jan.—Pacific Coast Field Trials Club, 23d annual trials Bakersfield, Cal. Albert Betz, Secretary, 201 Parrott Bldg., San Francisco.

THE FOOL AND THE WISE MAN.

He loved to lean upon the fence,
 And watch the swallows dart,
 Or list to lark, with joy intense,
 Trill melody from its heart.

He loved to linger by the brook,
 And scan the rattle's play,
 Or drowse and dream above his hook,
 With trouble—far away.

With simple joys he was content;
 He had no wish to rule;
 Men said his days were all misspent,
 And dubbed the man—a fool.

His brother, where the crowds were great,
 Sat scheming, day by day;
 He filled men's hearts with fear and hate—
 And piled his gains away.

Never knew he one hour of rest,
 His brow was lined with care;
 If joy had e'en been in his breast
 Lingered it had not there.

No birds enchanted him with song.
 His dreams—were full of sighs.
 His fellows saw him grub along,
 And thought—that he was wise (?).

MANY LURES FOR BLACK BASS ANGLERS.

In no department of angling mechanics has the ingenuity of the Yankee come more promptly to the surface than in the matter of artificial baits for black bass. It is safe to say that over 100 ingenious, practical and killing artificial baits are now on the market for the bass fisherman. These vary as to weight, size and floating quality, and range all the way from exact rubber imitations of a natural frog to some strange creature in imitation of nothing ever seen on land or sea.

A few of these novelties, although of recent introduction, have demonstrated their effectiveness as lures. One of the best of these new baits is the buck tail, which is made of the tail of a deer tied on a long shank hook and spread out liberally over the bend of the hook. What particular attraction the tail of a deer should have for black bass no one knows, but certain it is that this lure, either made in dark brown for day use or bright white for late afternoon, evening and night use, is a very killing bait. It is made generally with one or two concealed hooks. To the credit of the angling fraternity, as well as the dealer, it may be said that the use of the treble hook is rapidly being discontinued. Indeed, in some states, notably that of New Jersey, the treble hook is now illegal. Pity 'tis that not every state has followed New Jersey's fair statute. The buck tail, in the form described, is generally used on or near the surface and is light enough to be used with a fairly stiff fly rod. Like all other artificial lures, it should be kept constantly in motion, and will be found most effective when cast in the vicinity of weeds or brush.

An interesting combination is now offered of this buck tail attached as a troller to the famous floating baits. These are known as the "revolution" and "evolution" baits, and have been wonderfully effective throughout the Middle and Northwestern states. They are made of aluminum, coarsely fashioned, with arms which revolve when drawn through the water and are bright and glistening and have every reasonable attraction which inquisitive bass might ask. Strange to say, they have not yet been freely tested by Eastern anglers who seem to be very conservative in the matter of novelties for bass fishing. The hair of the buck's tail has also been found to be an attractive lure when tied on the shank of a No. 6 hook and used as a fly.

Another remarkably successful lure consists of the Dogaiac baits, which take their name from the town in Michigan where they are made, and which are, in some respects, the most highly finished artificial bass baits now on the market. They have many ingenious features to attract the critical sportsman as well as the bass. They are made in imitation of minnows of various colors and are so equipped with small pieces of lead that they float in a correct position no matter how fast they may be retrieved. A revolving spinner precedes and follows the fish, one turned to the right and the other to the left. This construction prevents kinking of the line.

These minnows are equipped with an arrangement at each side and at the end, by which the treble hooks furnished may be removed and single hooks substituted. The makers have not confined themselves to imitating either the shape or color of a variety of minnows, but have also introduced a number of ingenious shapes which have been found quite as effective as the imitation minnows. These baits are

of fine weight for casting and have a tendency to sink very slowly, which recommends them as an ideal black bass bait for some waters. In fineness of finish, quality and durability they leave nothing to be desired.

Another novel and interesting bait recently placed on the market is the Jamison coxer and teaser. Mr. Jamison is a Chicago sportsman who has devoted considerable leisure time to the study of the habits of black bass. The circular with which he announces his bait is extremely readable to any angler for this game fish. Mr. Jamison has become convinced, with the rest of the expert black bass anglers, that the bass sees his object long before it reaches the water. He has watched bass start for the place where a bait or frog would land and travel twenty feet with their back fin sticking out of the water. This experience is not novel to any angler who has fished in shallow waters or where the bass were accustomed to surface feeding. Mr. Jamison, therefore, ingeniously constructs a bait which moves freely through the air, and while in the air resembles a bug. It has a round-shaped body which is made of cork and enameled white, from which two side wings project, and the tail is furnished with two large flat brilliant red feathers in which the hook is concealed. To make the bait almost weedless, it is so weighted that when drawn through the water the barb of the hook remains uppermost. When pulled from the water this bait has a tendency to seek the surface and makes a wake like an insect or bug, and in the hands of many expert anglers has already demonstrated its remarkable killing qualities. The bait is made either single or tandem.

The "Nemahdin" is another novelty in bass baits which has much to commend it. It has a spinner in front of a barred shaped body which is more or less in imitation of a minnow, and the hooks are skillfully guarded by wires that render it practically weedless.

The difficulty with many of the bass baits heretofore is that they turn so frequently that the line becomes rapidly kniked and snarled. This has been overcome by the method described above and which consists of using spinners revolving in opposite directions, or by the use of the Stewart pilot, a recent novelty which will instantly appeal to any angler for its ingenuity and valuable service. It is so constructed that by using either the front or end of the pilot the bait will persistently seek either the surface or the bottom. It will be seen that this device will instantly turn right the frog, which, as every angler knows, has the persistent habit of landing on its back and staying there, in which position no well-constructed bass would attack him. The Pilot from Chicago is made of aluminum and sells for 25 cents.

For using live frogs several ingenious devices are now on the market. Thatcher's aluminum floating live frog rig is perhaps the most ingenious of the lot. It consists of a shaped piece of aluminum with a hook at the front and the back and rubber bands by which the frog is attached to this aluminum plate which exactly fits the shape of his body. The hooks are between his forelegs and hindlegs, one facing down and the other up, and are so located that almost any strike will hook a fish. This rig is supposed to allow the frog free and natural action.

Another device of similar style is a frog tandem, which consists of two hooks attached with a piece of lead soldered to the second hook to which is fastened a rubber band. The first hook is fastened through the lips of the frog, the rubber band drawn around his body and in this position he floats correctly whether living or dead.

Another similar device is the gang and casting hook, which consists of a small spinner attached to the upper end of a long-shanked hook and a split shot fastened to the bend of the hook. By this arrangement the advantage of a spinner is had and the split shot will persistently keep the minnow or frog upright.

A frog casting frame gang is another one of the recent novelties for bass fishermen. It consists of a coarsely shaped piece of wire, from which are sprung single or gang hooks to which the frog is attached. By this arrangement the hooks may be sent through the legs of the frog so as to hold it in correct position all the time.

Another, made in Utica, N. Y., is also an interesting variation of special baits, which is good for either trolling or casting. It has the unique feature of a darting bait as well as a revolving one. By an ingenious arrangement of fastening the line not to the forward end of the minnow, but somewhat back from the head by means of a swinging hinge, an oscillating and darting motion is given to the bait, which has proved very attractive to game fish.

A similar bait which has been remarkably successful for bass, trout and salmon, is the "silver soldier," made by a New York sporting goods house, and which consists of a German silver minnow, to which is permanently soldered a fine quality single hook. This minnow is bent into nearly a half circle, and when drawn through the water turns from side to side in close imitation of a wounded minnow endeavoring to escape from his enemy. The "silver soldier" has been effective in salt water as well as fresh.

The bass fisherman who is trolling alone for his favorite finny quarry will find it necessary to be equipped with some method of holding his rod in the boat, and the ingenious Yankee has not overlooked this important item of the equipment. A device has for several years been on the market which may be securely attached either to the gunwale of the boat, the seat or side, and into which the fishing rod may be placed ready for instant release.

The device is of galvanized iron with arms which are rubber covered to protect the finish of the rod, and is capable of a dozen different adjustments. The security of the arrangement is absolute, and no angler having once tried it would attempt to get along without it. By the use of this device the rod may be extended directly over the stern of the boat, or

at right angles, for the purpose of trolling close to shore.

The weedless hooks and spinners have also contributed not a little to the popularity of bass fishing among Western lakes where weeds are prevalent, and are entitled to equal place for recognition among the critical angling fraternity of the East. These consist of long-shanked pattern hooks, to the shank of which is permanently attached a small piece of nickel-plated copper which spins within close distance to the point of the hook. The weedless feature is obtained by the use of spring wires extending from the ringed end of the hook. An ingenious novelty is furnished by this company, consisting of a tandem of hooks, one long-shanked, the other short, to which two small frogs or minnows can be attached, and which has conclusively demonstrated its value.

Angling Devices Recently Patented.

In the use of bait or fly-casting tackle a prime object is to reduce to a minimum the friction of the line as it is reeled in and out, particularly so in casting. To attain this end much ingenuity has been shown in devising guides and tips of the proper size and shape and in the selection of material most suitable for them. With the various agate or other hard substitutes, snake, ring and metal guides and tips most anglers are familiar, yet new styles are continually being produced, and recently there has been advanced a new departure in rod tip construction which, it is claimed, practically opens the field of invention afresh. A few months ago the first roller tips and guides were offered to anglers, and already a second patent on a device of this nature has been granted, this time to Otto Miller and Philip Kunzinger of Brooklyn, N. Y. It relates, however, to rod tips only. The tip is penetrated by a transverse opening back of the boss, in which is journaled an anti-friction roller, its ends loosely fitting holes drilled in the sides of the boss and held in place by a threaded collar screwed in the outside of the boss. The returned annular flange forms a smaller orifice, which holds the line near the center of the roller. This invention is simple and may be easily applied to any trolling rod tip. It is cheaply manufactured and is said to serve the purpose admirably. Any parts broken or damaged by wear may be replaced without removing the tip from the rod. Of course the roller tip must be so placed on the tip joint, in relation to the position of the reel, that the line will pass over instead of under the roller, or sideways.

Another device, recently patented is designed to provide a simple, certain and thoroughly practical manner to effect setting of the hook in the fish's mouth when the bait on the hook is disturbed or to snag the fish should it take the bait when placed above the hook.

This device consists of a spring arm fastened to the rod near the grip and lying close to the butt joint when the mechanism is set. The line is run through a guide in the end of the arm and then through the rod tip. Midway of the arm is located a hook and sear, the latter having a counterweight which holds it in engagement until released by a strain upon the line, such as might be given by the fish in biting. In casting, or in still fishing with a heavy sinker, premature release of the spring is avoided by supporting the counterweight with the thumb or finger. The device is capable of attachment to any wooden or bamboo rod. This may not prove in practice, however, all it appears in theory. Quite frequently fish will jerk on the line before the bait and hook is fairly in the mouth, and then there must be a halt in proceedings until the arm is reset. Inventions of similar purpose are not rare, but not one is popular. In some the hook-setting spring is contained in the float. All alike lose fish the skilled angler would hook—they jerk the line at the wrong time. This device is patented by a citizen of Claremont, Cal. We do not think it will find favor with fishermen, still less with anglers. It has one commendation, it can be used by the fellow who catches all his fish in his dreams.

Among the newest ideas in floats is one that is made in detachable halves, and is supposed to be a worthy departure from the orthodox line of painted floats, for it permits changing the top to suit light or dark days—a red top for brighter days, showing up well in the sunlight, while white would be practically undistinguishable, while the white top is better under the thick shadows of foliage or on dark days.

Salmon in the Bay.

Local anglers have had royal sport with the salmon run now on in the "straits" and adjacent waters. On Sunday and Monday last, and throughout the week, it is estimated that at least 70 fish were taken by different anglers.

Most of the salmon were caught near the end of Belvedere Island, a few were hooked on the Angel Island side of the straits. One large fish, over 22 pounds, was caught in the entrance to the Tiburon ferry slip, by Clarence Ashlin, last week. He was trolling from a launch. S. A. Wells, John Fatjo and Frank Marcus were also in the launch, the party accounting for seven fish, all of which were taken on a No. 6 all silver Willson spoon. Al Willson has been very lucky on recent salmon fishing trips. He landed five one morning. "Parson" Jackson hooked a 12-pound fish on Sunday, on which day there was about twenty trolling boats out. Most of the anglers in these boats caught more or less salmon.

The fish taken were all fresh run, in splendid condition and put up game fights. The possibilities of sport in trolling for salmon as indicated by the catches of the past two weeks in the bay waters mentioned go a long way towards rivalry of Monterey bay salmon fishing. The season for salmon in tide water will be closed from September 10th until October 16th.

Jackson's Napa Soda does not tangle the feet

New Resort for Black Bass Anglers.

From time to time, the waters of the Sacramento sloughs and overflows above Rio Vista have been mentioned in these columns as affording first class black bass angling. Reports received from individual anglers have been enthusiastic in praise of the sport to be had at various places between Clarksburg and Rio Vista. The one drawback for the majority of sportsmen and a salient reason why the region is not developed, is that it requires a knowledge of the tule topography and a compass to enable one to get at the places where the fish are to be found.

The few local anglers who have been lucky enough to be piloted into the hidden recesses of the district have had the fishing of their lives, for black bass. Some fourteen miles above Rio Vista, via Prospect slough and through tortuous, shallow channels deviating therefrom can be found ideal black bass waters. Ponds are there full of aquatic vegetation, including the lily pads, which seem to be the chosen habitat of the bass. In these far away tule hidden ponds the black bass are to be found in incredible plentitude, fish weighing five and six pounds are more than numerous. They are a fighting band of scaly rascals, too, they and their congeners big pike, perch, striped bass and other smaller varieties. This immense section of tule overgrown land, bisected by innumerable creeks and sloughs and dotted with thousands of ponds is a veritable spawning and breeding ground for the fishes.

A party of four local anglers landed 182 bass in a morning and evening fishing last Sunday. The killing lure was a "phantom minnow" with treble hooks—this artificial bait was used by the party, because it is in vogue with the natives of that section.

The fishing of the district briefly described above is destined to be possibly the best black bass angling resort on the coast. For the present the "natives," those of them who know the "ins and outs" of the territory, are intensely jealous of the intrusion of outsiders, as they call them, and it is generally with reluctance that a city sportsman can obtain a pilot to the mecca of the black bass angler. But there is one consolation for the rod and line fraternity and that is, now that the veil has been lifted, even for a brief peep in, the promised land will soon be as an open book for anglers and the spirit of unsportsmanlike intolerance will be unavailing in keeping sportsmen from enjoying the benefits of what the State Fish Commission originally intended for the community at large and paid for—not for the selfish benefit of the few, who are blinded by their own ignorance and narrow-mindedness.

Trap Shooting for Ladies.

Great has been the increase in popularity of such open-air recreations as field and trap shooting for ladies. Those who have once tested the pleasure and benefit to be derived by participating with their husbands or brothers in field shooting usually become enthusiastic devotees of the sport, and the same is true of shooting at the traps. As a tonic for the nervous system there is nothing better than the pure air of field and forest, and it would be difficult to find a better incentive than that of following a good brace of dogs. Trap shooting, of course, lacks in several respects the exhilaration of shooting in the field, but it is easier to be had in the immediate vicinity of large cities, and—except in chilling winter weather in the North—is always in season, which cannot be said of game-bird shooting. Therefore, sport at the traps can be highly commended for ladies, and there is cause for rejoicing in the fact that so many of the sex are adding to their health and happiness by participation in this pastime. Referring to the benefit thus derived, Mrs. Maud K. Butler, of Chanute, Kan.—a lady of social and intellectual prominence—responded as follows to a recent letter asking information regarding her personal experience in this line of out-of-door sports.

"I sincerely wish I felt capable of expressing in such impressive language of how much real pleasure and real physical benefit I have derived from the indulgence that any number of ladies would be inspired to learn the art of handling a gun. I have been shooting at intervals, few and far between, for several years for the enjoyment, exclusively, and my supremest interest has been to break as many targets as possible. Since I haven't even been able to accomplish anything phenomenal in that direction, I feel too much of a novice to furnish any beneficial suggestions from my own resources or experience. I shall remain quite well satisfied to make a record sufficiently creditable to maintain my enthusiasm and to produce the sensation of delight which the announcement of an opportunity for shouldering my gun always occasions.

"The pleasure of meeting the more skillful knights of the gun, who are famously generous and magnanimous, is one of the anticipations which is warranted to encourage the effort to keep in touch with the shooting world, and while we don't expect to increase the weight of the family purse or jump unexpectedly into fame, Mr. Butler and I are certainly looking forward with greatest pleasure to the tournaments of the future."

The trap shooters of America, who are—as Mrs. Butler has aptly stated—chivalrous and magnanimous, will doubtless take pride as well as pleasure in maintaining their favorite pastime upon a high plane, thus bringing the sport as nearly to an ideal standard as possible by eliminating everything that can offend the most refined. At the present time the leading gun clubs of the country are steadily improving the environments and increasing the attractiveness of their club houses and grounds, in order that the wives, the sisters and the daughters may find delight in attendance at regular shoots and tournaments. A few years hence the club shoots—provided with cool tents in addition to shady verandas—may prove more potent in attraction for the ladies than the golf links or tennis court. It is a recognized fact that the pres-

ence of ladies will surely improve the tone of any form of healthful open-air sport, and therefore sportsmen must always strive to make these pastimes worthy in every respect of their attendance.

At the recent Northwest Tournament at Portland, four lady shooters were on the firing line. While there is a noticeable attendance of the fair sex at local shoots, with the exception of two or possibly three, Mrs. A. M. Shields and Mrs. J. B. Hauer, the indulgence in the sport of trap shooting by the ladies is at present somewhat limited.

On the contrary, however, the attractions of upland and marsh are strong enough to induce a large number of ladies to try 16 and 12 bore on both ducks and quail, nor are the skilled rifle women waiting who can drop a buck.

From present indications, it is safe to say, that the trap shooting boom will be contagious, and we anticipate seeing a number of ladies at gun club shoots who can and will break targets, next season.

AT THE TRAPS.

Previous to the invention of flying targets trap shooting could hardly be considered a national sport in the United States. Live bird shooting had a fair number of devotees, it is true, but the events of importance in this line could be summed up in a few state tournaments each year and the pigeon matches between experts, with an occasional team race. A glance at the files of any of the sportsmen's journals of twenty-five years ago demonstrates the fact that during the period when inanimate target shooting was just coming into popularity the scores of both live bird and flying target events were given in minute detail, yet the trap shooting department was seldom crowded. To report a three or four-day target tournament in similar manner at the present time, when the number of competitors may possibly range from 100 to 200 would fill from six to ten pages, and there would be little, if any, space for any except the leading shoot each week. Now, the problem is to do justice to the multiplicity of trap shooting events, and this can only be done by a system of condensing the scores, so that the news of the week may be placed before the reader in such manner that the department will give him the results in concise rather than cumbersome style. Even with this system the trap scores are very much in evidence every week in the year.

At the present time the relative importance of live bird and inanimate target shooting is the reverse of the condition existing a little more than a quarter of a century ago. Then live bird shooting—mainly wild pigeons—was the principal sport in the line of trap shooting. Now inanimate or flying target shooting is so far in the lead that the distinctive live bird shoots cut but a small figure. This is partly due to the extermination of the wild pigeons and the expense of securing tame pigeons, while inanimate target shooting is easily obtainable in almost any locality, at slight expense.

The influence of the sportsmen's press has done much to stimulate the sport of trap shooting, and the Interstate Association, with Elmer E. Shaner as an active, efficient field marshal, has given great impetus to this recreation. There has been almost a phenomenal increase in the number of gun clubs during the past ten years, and it is believed this development will continue in like ratio for many years to come, as it affords a fair substitute for field shooting, and the gradual decrease in the game bird supply will probably cause a larger proportionate growth of trap shooting.

The Vallejo Gun Club blue rock season for this year closed on August 27th with a merchandise shoot. A live bird shoot is scheduled for the near future for the wind-up shoot. The Vallejo club has had an enthusiastic season at the traps and is in a flourishing condition with a large list of active members on the roll.

At the merchandise shoot mentioned the principal winners were: Clarke, Mayfield, O'Hara, Hirschle, Comfort, Burnett and Roney. There was a strong attendance of visiting shooters. The list of prizes was numerous enough to give each one of twenty contestants a prize. The leading scores at 25 targets were: Clarke 21, Mayfield 21, O'Hara 20, Hirschle 18, Roney 18, Carter 20, Winkelman 12, P. Magistrali 19, Comfort 24, Woods 16.

The regular shoot of the Union Gun Club programmed for September 15th has been postponed until Sunday, September 24th. The club date fell on one of the days of the Interstate shoot. This shoot will be the closing blue rock shoot of the Unions for 1905.

The Santa Rosa Gun Club shoot, August 27th, offered a variety of events for the club and visiting shooters. The main feature of the day was a team shoot between Santa Rosa and Petaluma powder burners, at 25 targets per man. The Santa Rosans won by 15 birds. The scores were:

Santa Rosa—Hesse 21, Slusser 18, MacGregor 22, Young 18, MacQuiddy 13; total 92.

Petaluma—Murphy 19, Summerfield 12, Goper 20, Hooper 13, Carter 13; total 77.

In the club cup shoot the scores were as follows: MacQuiddy, 14 yards, shot at 30, broke 8; Slusser, 18, 25, 22; MacGregor, 16, 27, 16; Edmonds, 16, 28, 17; Hesse, 18, 25, 20. Slusser won the monthly medal.

In the pool shoot the scores were: Summerfield, 3 out of 10; Slusser 9, Hooper 4, Murphy 9, Mego 6, Steiger 3, Hesse 7, Kraper 6, Carter 8, Goper 6. Slusser and Murphy tied for first money. Carter won second money.

Twenty-nine shooters attended the Golden Gate Gun Club final club shoot for this season on the Ingleside grounds last Sunday.

In the champion class M. O. Feudner broke 89 targets out of 100 and was high gun for the day. This score

gave him the high average for the season and the A. M. Shields trophy for club high average for 1905. Webb and Feudner were both tie, 90 per cent., up to Sunday, but Feudner led Webb two targets in the club shoot and won out. Varien was close up to the leaders, but could not catch up by six targets. Ed Schultz, who was also looked upon as one of the strong contenders for high average prize, fell short with but 89 targets to go on. The purse winners Sunday in the champion class were: Feudner, Holling, Forster, Nauman and Webb.

Fred Schultz was high gun in the first class squad on Sunday, but was beaten out by Gamble for the season's class high average, with Donohoe a hair's breadth behind the two. Harpham won out over Murdock for the season. The shooters above mentioned won the purse for the class.

A. M. Shields had a lead in the six previous shoots that brought him high average for the second class—he was but two targets behind Bruns high gun for the day in the class. Jacobsen was just a notch under Shields for class high average. The class purse, four moneys, was annexed by Bruns, McElwain, Shields and Jacobsen.

Harvey scored the high average for third class as well as first money on Sunday. Cuneo, Johnson and Patrick won the other three moneys. The quartet finished for the class, the positions being in the order named.

The scores made were the following:

Club match, 100 targets, \$100 added (\$25 for each class), 16 yards—			
Champion Class—			
Feudner.....	22	23	21-89

Sylvester, Dr.....	16	10	13-49

An example to be followed by Coast gun clubs is the career of the Golden Gate Gun Club for 1905. At the seven monthly shoots of the club this season, \$700 was distributed in cash prizes to the members—\$100 at each shoot, divided into four \$25 purses, one for each class. The club still has a creditable balance in treasury for a starter in 1906.

The classification system followed this year—dividing the shooters into champion, first, second and third classes, it has been demonstrated, was a strong factor towards creating enthusiasm and maintaining the organization's popularity with the shooters as well as arousing general interest in the sport of blue rock trap shooting.

Dan Daniels took part in the first day's events at the Interstate Association shoot at Denver, August 29th. He broke 181 out of 200, 90.5 per cent., as follows: 15-12, 15-13, 15-12, 15-15, 20-20, 20-20, 15-13, 15-15, 15-14, 15-12, 20-19, 20-18. Not so bad for an engineer. Dan stopped at Denver on his return from a trip further east. His gun, a Greener, broke down on the second day.

The initial shoot of the recently organized Santa Cruz Rod and Gun Club took place on the club trap grounds at Del Mar, August 27th.

Ten bird races were on the card and the following scores were made: W. H. Varien (of Pacific Grove), 9, 8, 9, 6, 9, 10, 8, 7, 9, 8, 10. W. E. Greene (of Pacific Grove), 10, 8, 9, 10, 9, 7, 9, 9, 9, 10. Bert Pearson (of Salinas), 7, 7, 8, 9, 8, 7, 9, 7, 6, 10. Mr. Gammon, 4, 4, 5. Mr. Matthews, 5, 5, 4.

Greene seems to have struck the pace he had at the Sacramento tournament, three straights and one lost out of each of six ten-bird races—98 out of 110 is pretty good shooting. Varien was only six birds behind him.

Mr. Elmer E. Shaner arrived in this city on last Tuesday evening. Mr. Shaner is a gentleman of exceedingly pleasant personality and was taken in charge by one of the leading figures on Sportsman's Row. Rollo O. Heikes and Tom A. Marshall were due to arrive to-day. Among the shooters from the East who will be in attendance at the interstate shoot next are: W. R. Crosby, Fred Gilbert, Jack Fanning, Mr. Arnold, H. C. Herschey, D. W. King, Jr., E. D. Plank, Frank L. Carter, Chan M. Powers and Harvey McMurchy.

The Ingleside grounds are being rapidly arranged for the accommodation of the shooters next week. The grounds will be open for practice shooting on Thursday.

It is proposed to hang up a suitable trophy for a team race, open to all. This will bring a coast team or teams against the Easterners and will settle the much vexed question "How do our shooters compare with the Eastern cracks?" This will be an extra event and a lively one it promises to be.

Following the Interstate Association shoot, on September 18th there will be a live bird shoot on the grounds in which the Easterners will grass pigeons with the local shooters.

Otto Feudner, Emil Holling and possibly E. E. Drake or W. S. Wattles will attend the Medford shoot in Oregon on the 22nd and 23rd.

Today and tomorrow there will, without doubt, be a big crowd on the Empire grounds. The program of events is an attractive one and the list of merchandise prizes too numerous to mention.

British Columbia Field Trial Prospects.

A recent Vancouver, B. C., exchange has the following local announcement relating to prospects for the coming field trials of the British Columbia Field Trial Club:

Two of the best-known handlers of dogs on the Coast were in town yesterday and by the time this is read will be on Pitt Meadows working their dogs. Both men are from California and have an international reputation as trainers.

W. B. Coutts is one of the best-known sportsmen in California. He has ten dogs of the bluest of blue bloods with him. Four are Pointers and six English Setters. As it happens four of his string will enter in the Derby and six in the All-Age stake. To put it more correctly perhaps, it might be said that the dogs are not yet entered but if they turn out as Mr. Coutts hopes they will, he will enter them in that way. The list of dogs and the breeding is enough to make a man who knows a good dog from a mongrel, and who is up in society, get up from his seat and lift his hat.

This is Mr. Coutts's string: For All-Age Stake—Mr. J. E. Terry's Kilgariff by Orion, dam Mary Lou; Mr. J. H. Schumacher's Sir Roderick, sire Detroit Joe, dam Dolores; Mr. J. W. Flynn's Sabine's Molly, a Pointer by Young Rip Rap, dam Mother Sabine; Mr. F. H. Shaw's Countess Lou, by Count's Mark, dam Mary Lou; Messrs. Rose & Christenson's Belfontaine, by Count Whiteside, dam Gracie G. Gladstone.

This is the list of the probable All-Age entries with Mr. Coutts. Here are the younger ones which will be put in the Derby:

Mr. W. B. Coutts's Pointer Tod Sloan, by Bolin's Duke, dam Sloan's Whisper.

Mr. S. Christenson's Setter Goliath, sire Kilgariff, dam Maggie F.

Mr. F. D. Schumacher's Lady Bell, sire Teddy Hunt, dam Jack's Fashon.

Mr. H. Hopkins' Aunt Marle, sire Uncle B., dam Sport Belle.

Mr. J. E. Lucas has nine with him. Every one of the dogs looks good and fit, and from appearances the Vancouver sportsmen will have to go some to carry away the cups. Mr. Lucas has with him five probable entries for the All-Age and four for the Derby. They are:

Mr. J. W. Considine's Policy Girl, sire Dave Earle; dam, Top's Queen.

Mr. J. E. Lucas's (agent) Pandango, sire Dr. Daniels, dam Fan Go.

Mr. J. E. Lucas's (agent) Chiquita, by Dr. Daniels, dam Fan Go.

Mr. J. W. Considine's Roxane, sire Champion Lady's Count Gladstone, dam Jessie Rodfield.

Mr. J. E. Lucas's (agent) by Ch. Lady's Count Gladstone, dam Sports' Destiny.

Field Trials and California Quail.

W. B. Coutts in a recent letter from Vancouver, B. C., to the Sportsman's Review, says:

I just arrived in this part of Canada a few days ago to take part in the trials, and where I am located to train, the first game bird I saw was a California quail, on Sula Island, B. C., and I was delighted to see my little friend, the top-not, so far north. I am informed there is quite a few of them showing up along the deltas of the Fraser River.

It seems this is about the extreme end of their northern habitat, and the further south one goes they get more numerous. Even south of California, down into New and Old Mexico, they are found in great numbers.

We have two species in California—the mountain quail and the valley quail. The mountain birds are slightly the largest, with the prettiest plumage, and are considered the best table bird, but as they inhabit the mountain mostly in high cover they don't afford very good sport with either Setter or Pointer.

The valley birds are—or what is termed the blue quail, or the top-not—perhaps, the second best bird of the quail species in America, next to the Bob White, to give a good sport with dog and gun.

So far north as British Columbia the country is too brushy to expect good work with pointing dogs on this bird, but take it in California and south all along the Pacific Slope, this little game bird is found in most all kinds of cover, alders, willow creeks, acres of grain fields, in vineyards, in every little corner, on hill sides, but the best sport is obtained on the deserts owing to the short sage in Southern California and south into the other states. In the winter season they are found in very large beves, in fact, it may be termed bands of birds, from 100 to 1200 in one band. Such bands as this don't lay good to a dog on first flush, but after they are flushed out in low sage one can work on them for hours, and get the finest kind of point work and shooting over a good staunch dog.

The Pacific Coast field trials are run on such country as I mention—large fields with low sage for the birds to hide in. A good dog will, perhaps, have from one to ten or perhaps twelve birds to his point. Many people say after a band of birds are once flushed out and scattered that a dog cannot have a bevy point, but I for one claim that if a dog has four or more birds to his point you cannot call it a single, so what are you going to call it?

The valley quail lay good to dogs, give out good scent, and they are very fast flyers, hard to hit, and are very strong for their size, but it takes a hunter to understand their habits to obtain good sport.

Major J. M. Taylor left New York last week for Vancouver, B. C., where he will judge the British Columbia trials on the 21st Inst. at Ladnor. He will also act in the saddle at the Pacific Northwest trials at La Conner Flats, beginning October 12th.

The San Mateo Kennel Club show opens to-day near San Mateo, at the polo field of Mr. Chas. W. Clark.

The entries we are informed will probably make the show a four-point show.

There will be a large attendance of fanciers from this city at the open air show. A number of recent doggy arrivals will be benched and a surprise or two is expected from the dark 'uns.

MIXED PICKLES.

Prospects for Trout Fishing in Santa Cruz county in the future are most propitious. Thousands of young fish at the hatchery and not enough help to distribute them. This is the situation in a nutshell, as described by Superintendent Shebley of the Brookdale hatchery. Mr. Shebley has twenty-eight tanks of running young steelhead, all ready to be placed in the streams of the county. He is anxious to get rid of these fish, so as to make room for the salmon eggs, with which it is proposed to stock the waters of Monterey Bay, and will give fish to anyone who will take the trouble to stock their local streams.

Three large outdoor tanks for yearling fish are soon to be built in the hatchery grounds, so that brood fish can be raised for exhibition and breeding purposes. Mr. Shebley is putting in a main entrance to the grounds, opposite the point where the railroad platform, which Mr. Judah has promised, will be built. A cupola will also be put on the main building so as to take up the dampness, and other improvements are steadily going forward.

There are more young fish in the creeks of Santa Cruz county to-day than have been known for years. This is bringing many anglers to the district and many visitors to Brookdale and Ben Lomond. The only difficulty is in raising the money to keep the good work going. The Southern Pacific is contributing \$100 per month to the hatchery, the Supervisors have appropriated considerable money for the same purpose, but still more money is needed. As Mr. Shebley said, "There are 300,000 trout in the hatchery today which ought to be in the streams, if we only had the funds."

The prospects are good, however, that the county will be able to afford the necessary assistance before very long. Fred H. Pray and Supervisor Ralph Miller of Santa Cruz can truly be called the fathers of the hatchery. They have solicited private subscriptions, given their own time and money for the purpose and with Judge Logan, who gave the site, and Superintendent Shebley himself, deserve the credit for the fact that Santa Cruz county has a fish hatchery today.

Game Warden Reed has been engaged this week in stocking with fish from the Brookdale hatchery on the west fork of the Soquel creek and Bean creek. About 25,000 were placed in these streams today. Next week he will be engaged in placing trout in Scott's and Waddell creeks. The fish for Scott's will be placed in the stream at the headwaters in the little basin and Waddell's in the big basin.

Sempervivus creek and the stream at the Governor's camp are also to be stocked. Mr. Reed expects to place some 200,000 fish in these streams next week. This will make fishing in the big basin great sport.

The streams in the county that have been stocked are the San Lorenzo river, Soquel creek and the several forks and the following creeks: Boulder, Bear, Newell, Clara, Love, Zyante, Lampicos, Bean, Soquel, Aptos, Valencia, Corralitos, Brancifort, Waddells, Purdy, Big, Little, Scott's, San Vicente, Liddells, Moro Cojo, Wilders, Meder and Majors.

Eel River Fishing was excellent about the middle of August for a report from Eureka states that anglers returning from the river on the 14th of the month were in a happy frame of mind. Everybody reported big catches and the interior of the baskets of a majority showed that they had the goods. Among those who enjoyed a fine day's sport were P. W. Mathews and C. P. Soule, who returned with twenty-five, many of them fine, large steelhead. Dr. E. A. Montague and Attorney W. F. Clybourne landed nine, one being a steelhead weighing ten pounds, while the remainder were half pound trout. The latter were very gamey and furnished much sport. There were many other anglers on the river and only in a few instances were the catches reported to be bad.

Attacked by a Cougar was the thrilling experience of Hiram Williams of Cummings, Mendocino county, a week ago today, according to a press dispatch. Williams was out deer hunting and while resting at the foot of a rocky butte and intently watching an object farther down the gulch, which appeared to be a buck, he had a very narrow escape from being killed by a mountain lion.

Several stones rolling past him finally attracted his attention to things nearer at hand, and, on looking around, he was confronted by a huge cougar or mountain lion. On the impulse of the moment he discharged his rifle just as the beast sprang at him, but the bullet only wounded the creature. The accuracy of its spring was interrupted, however, and the lion struck just beside him and knocked him over. The animal was on him in a second and a fight for life was begun. Williams, who is a very powerful man, succeeded in holding the infuriated animal at bay until he could reach his rifle, and, pressing the muzzle against its side, succeeded in discharging a shot that put the animal out of business. The lion measured nine feet from tip to tip.

This was a most unusual course for the animal to take, for as a rule they are very cowardly and will not molest a man; possibly the big feline, true to the sneaking instinct of the cat tribe, tried to stalk him unawares.

Good Hunting and Fishing territory can be had in a mountainous zone found in northern Humboldt and southern Mendocino counties. Phil B. Bekeart returned from that particular neck of the woods this

week after enjoying an outing trip of ten days with a party of other sportsmen composed of Life Ball a resident of the district, Bob Kerr, Fred Webster of Albion, Clarence Ward, Jack Baird and Orral Humphrey of San Francisco. Camp was pitched near a place called Harris in a country full of game—bucks in plenty, the mountain quail and grouse shooting, when the season opens, will be as good as any sportsman could desire. In streams within a few miles of camp good catches of nice trout were made time and again. When Mr. Bekcart left, the bag was seven large bucks, and the full limit could have been bagged by the hunters had they been at all over anxious. One big four point buck was sent down to the Family Club in this city. A banquet this evening will be duly celebrated and the buck will be an honored and appreciated visitor at the board. The buck was sent to the club by Bekeart, Ward and Humphrey.

Over 200 pounds of venison was jerked and packed up ready for bringing in to the city before Bekeart left.

Southern California Game conditions are better right now than during any summer since 1902.

The statement is not made at random, as many such predictions are, but is based upon a painstaking average of the reports brought in by representative and well-posted sportsmen of experience, who are observers of game conditions, and do not think all the birds are raising two broods, because they happen to rush a hen quail with young ones in August.

The average hunter is a hopeful sort of cuss, and generally prefers to think the best of the country until confronted with undeniable facts in the form of poor sport. It is not wholly reprehensible, either although a failing that frequently corrupts the accuracy of his judgment.

Such sportsmen as Charles A. Loud of Encinitas, 'Pop' Stebbins of the Conejo in Ventura county, Gus Knight, Jr., of San Bernardino, Joe Mitchell of Glen Ivy in Riverside county, and Charlie Julian of San Diego are not only qualified to pass upon the state of the game, but equally important, are men who can be relied upon. When they all agree that there are three young quail this year to one seen at the same time last season, one is willing to believe it, and ready to take the statement at face value.

Charlie Loud, who trains dogs, and shoots a great deal in season on his place in San Diego county, was in town last week with most rosy reports of sporting prospects that cannot fail to stir the blood of the latest quail hunter.

"In my section of the country I am satisfied there are ten young birds for every one that was to be found in August last year," says Mr. Loud.

TRADE NOTES.

Averages Reported.

At Mason City, Ia., July 31st and August 1st, W. D. Stannard won first general average, 384 out of 400, shooting "DuPont"; Fred Gilbert won second general average, 383 out of 400, shooting "DuPont"; R. R. Barber of Paullina, Ia., won first amateur and third general average, 378 out of 400, shooting "DuPont"; H. G. Taylor of Meckling, S. D., won second amateur average with 377 out of 400, shooting "New E. C." (Improved).

Lookout Mountain, Tenn., August 15th and 16th: C. G. Spencer, first general average, 387 out of 400, shooting "DuPont"; H. N. Hall, second general average, 377 out of 400, shooting "DuPont"; Walter Huff, third general average, 369 out of 400, shooting "DuPont"; C. W. Goodlake, of Chattanooga, Tenn., first amateur average, 367 out of 400, shooting "DuPont"; H. Watkins, of Nashville, Tenn., second amateur average, 350 out of 400, shoot "New Schultze"; John Livingston of Springville, Ala., third amateur average, 357 out of 400, shooting "DuPont." The DuPont Trophy was won by C. W. Goodlake, 367 out of 400, shooting "DuPont."

IT IS WHAT HE DIGESTS.

Writing on the feeding and overfeeding of horses, Veterinarian A. S. Alexander says: It is perfectly safe to assert that thousands of work horses are injured by kindness.

The owner thinks that, because his team is hard worked, it ought to be heavily fed, but he forgets that it is not what the horse eats, but what it digests, that counts. This is especially the case in summer, when there is much field work to be done and little time in which to do it.

The horse hurries home, hot and weary, receives all he can "hog" and goes out to the water trough, where he fills up with water and goes on to work again. First of all, his stomach was not in fit condition for food reception.

The fatigued, hot, sweaty horse can not digest food. He needs a rest first and then a drink of water, which passes through his stomach and stays in the large intestines.

If he eats grain and then drinks water, the food is largely washed out by the water and passes to the small and large intestines in which the food is not digested, but decomposes, gives up gas and thus sets up more or less disturbance and distress.

In these circumstances a horse is not properly fed with six quarts of oats and all the hay he can gobble in the short interim of the noon hour. He has been fed, to be sure, but he has

derived little benefit from his food.

All the benefit derived comes from the portion of the food digested, and that is very small when there is not sufficient time to masticate properly and then digest normally.

In the busy season the work horse should have small amounts of concentrated, nutritious food, just such an amount as he can masticate and digest. When corn is fed, it adds fuel to the heat of his body and does not supply the strength and vigor he most requires. That comes from oats, and time is needed for their mastication.

Hay is unnecessary and actually injurious when fed at noon. It is not digested while the horse is at work.

It does not remain in the stomach, but, like water, passes through into the large intestines, where it lies inert or decomposing until a period of rest promotes the normal process of digestion.

On general principles it will pay to cut in half the ration now being fed to work horses, provided they have but little time to masticate and digest their food. This will be found remedial where horses are evidently panting when at work, or having a tendency to diarrhoea.

They will do better on less food for the reason that they digest a greater proportion of its nutrients. Hay in summer time should be fed very early in the morning and again at night, at which time the horse may have all he wants. Allow the drinking water before meals.

Ottawa, Ont., August 16th, 17th and 18th: J. A. R. Elliott, first general average, 612 out of 640, shooting "New Schultze"; Ed. G. White, second general average, 608 out of 640, shooting "DuPont"; F. H. Conover, third general average, 601 out of 640, shooting "DuPont." The Governor General's Cup for high amateur average for the tournament was won by T. M. Craig of Sherbrooke, Ont., 593 out of 640, shooting "New Schultze." Mr. Craig also won the Kynoch Cup. The DuPont Trophy for second high amateur average for the tournament was won by Thos. Upton of Hamilton, Ont., 589 out of 640, shooting "DuPont." The Lash & Rand Trophy, offered to the amateur making the longest straight run, was won by W. J. Johnstone of Ottawa, Ont., shooting "New Schultze," with an unfinished run of 99. The Cogswell & Harrison Gun was won by C. G. Thompson of Sherbrooke, Ont., shooting "New Schultze." Mr. Thompson tied with six others on 58 out of 60, and then broke 20 straight in the shoot-off. The Hollis Gun was won by Geo. Cline of Hamilton, Ont., shooting "DuPont." The Parker Gun was won by T. A. Duff of Toronto, shooting "DuPont." The Carling Gun was won by Geo. Howard of Sherbrooke, Ont., shooting "New Schultze." The Grand Canadian Handicap was won by Geo. McGill, 49 out of 50, shooting "Infallible." Mr. McGill also won the H. D. Kirkover Cup. The Brewers & Maltsters' Cup was won by R. W. Wakefield of Toronto, Ont., shooting "DuPont." The two-man team race was won by A. M. Throop and W. J. Johnstone, both of Ottawa, Ont., Gun Club, and both shooting "New Schultze," with 39 out of 40. The five-man team race for the Mail Trophy was won by the Sherbrooke, Ont., Gun Club, all five of the team shooting "New Schultze" and scoring 238 out of 250.

Kansas City, Mo., August 16th, 17th and 18th: Fred Gilbert, first amateur average, 568 out of 600, shooting "DuPont"; W. H. Heer, second general average, 563 out of 600, shooting "New E. C." (Improved); R. O. Heikes, third general average, 548 out of 600, shooting "Infallible"; Ed. O'Brien of Florence, Kas., second amateur average, 538 out of 600, shooting "New Schultze"; E. W. Arnold of Larned, Kas., 528 out of 600, shooting "New E. C." (Improved).

Dalton, Ohio, August 17th and 18th: C. O. LeCompte, first general average, 383 out of 400, shooting "Infallible"; F. D. Alkire of Williamsport, Ohio, first amateur and second general average, 374 out of 400, shooting "DuPont"; F. H. Snow of South Brooklyn, Ohio, second amateur and third general average, 370 out of 400, shooting "DuPont"; O. F. Cabbut of Massillon, Ohio, third amateur average, 353 out of 400, shooting "DuPont." Mr. LeCompte made three runs of 50, 57 and 60 respectively.

Chicago, Ill., August 17th, 18th and 19th. W. R. Crosby, first general average, 594 out of 600, shooting "New E. C." (Improved); F. C. Riehl, second general average, 577 out of 600, shooting "New E. C." (Improved); R. R. Barber of Paullina, Ia., first amateur and third general average, 568 out of 600, shooting "DuPont"; Hugh Clark of Wabash, Ind., second amateur average, 565 out of 600, shooting "DuPont"; Kit Shephardson of La Grange, Ind., third amateur average, 561 out of 600, shooting "DuPont."

All Do Well With the Goods.

At the Lincoln re-union live bird shoot on August 27th at Reclamation station, R. Haas killed 25 straight with U. M. C. ammunition at 30 yards rise. Straight scores of 12 pigeons, 30 yards, were shot by E. L. Gamble, George Sylvester (2), Clarence Ashlin, H. Klevesahl, "Wilson" and L. Cuneo. A notable occurrence at the shoot was the remarkably long range kills made by H. Nauman with a Remington gun and U. M. C. ammunition. Several birds he dropped were over 100 yards away; the Remingtons shoot strong and U. M. C. ammunition is accurate and reliable.

Peters Points.

At the tournament of the Orange County Gun Club, Middleton, N. Y., August 15, 16 and 17, Neaf Apgar won the high general average with Peters' factory

loaded shells.

At the Bound Brook, N. J., tournament, August 19, Mr. Apgar was again high man, breaking 143 out of 150.

On August 15, the newly organized gun club at Durand, Wis., gave a very successful one-day shoot. It was managed by Mr. E. O. Seymour, and everything went off in fine shape. Mr. Seymour was high professional, and first and second amateur averages were won by Mr. H. Nickels and Mr. J. H. Stearns, respectively. All these gentlemen used Peters' factory loaded shells.

Mr. James S. Day, traveling in Central Texas for The Peters' Cartridge Company, is proving his ability as a shooter by taking high average at most of the tournaments in his territory. At Fort Worth August 18th he scored 93 per cent., and at Will's Point, Texas, August 17th, he was again high, breaking 108 out of 115. Mr. Day shoots Peters' "Premiers" and "Ideals" equally well.

At the one-day shoot of the Lamar Gun Club, Paris, Texas, August 25th, Mr. L. I. Wade won high average, 93 per cent. Messrs. James S. Day and C. D. Ellison tied for second average, all using Peters' factory loaded shells. Messrs. Wade, Day and Ellison also won first, second and third averages at Wolf-City, Texas, August 24th.

Messrs. Wallace Miller, J. S. Day and L. I. Wade won second, third and fourth averages at Wootap Mills, Texas, August 21st and 22nd, all using Peters' shells. Mr. Wade was also high gun at Forney, Texas, August 23rd, breaking 100 targets out of 105.

A Good Record for a Year.

During the past season of seven monthly shoots held by the Golden Gate Gun Club the users of U. M. C. ammunition were steadily to the fore and fine scores mark the records of those who stood by the famous goods—this has been a noteworthy fact throughout the season in all of the gun clubs of the Coast. There were twenty-nine shooters who faced the traps at the final shoot of the club on the 27th of August at Ingleside, and out of that number twenty-four shooters were users exclusively of U. M. C. "Acme" and "Magic" shell.

A New Winchester Rifle.

The Winchester Repeating Arms Co. announces through their advertisement a new gun called the Model 1905 self-loading rifle. The new rifle is made in .32 and .35 calibres, the cartridges being of the modern smokeless powder type, and are furnished with either full metal patched or soft point bullets. The ballistic data given in the announcement indicates that the new cartridges are desirable both for hunting and target shooting. The operation of this rifle should not be confounded with that of machine guns, which reload and fire to the extent of their magazine's capacity without stopping after the trigger is first pulled. In using the Winchester self-loading rifle, it is absolutely necessary to pull the trigger for each shot, which places its operation as completely under the control of the operator as that of any repeating rifle. The self-loading system permits rapid shooting with great accuracy, and on account of the ease and novelty of its operation adds much to the pleasure of shooting at either target or game. The Winchester Model 1905 self-loading rifle is made with blued trimmings and a plain walnut stock and forearm not checked. The barrel is round, 22 inches long and is fitted with sporting front and rear sights. Octagon or half-octagon barrels, or barrels longer than 22 inches cannot be furnished for this rifle. The stock is 14 inches long and furnished with a rubber butt plate; drop at comb, 1 1/2 inches; drop at heel, 2 1/4 inches; length of gun over all, 40 inches. Fancy walnut stocks and forearms, plain or fancy walnut pistol grip stocks checked or unchecked, and stocks having special length or drop can be furnished for this gun when so ordered at the same prices as for other models.

LONG POULTRY YARDS.

The cheapest way to grow poultry is on pasture, and the most convenient way to supply the pasture is to have a yard long enough to plow. It costs something to fence a yard, but when the fence is once up it lasts for years and the amount of feed that may be grown in such a yard returns an annual dividend sufficient to pay big interest on the investment.

The width of the yard matters little, only that it costs more to fence the same amount of ground into narrow yards, but when the work is done the long, narrow yards are more satisfactory. Twenty feet wide is sufficient to turn a pair of horses when plowing.

Therefore if a poultry yard is 20 feet wide and 300 yards long it may be back furrowed one time and the furrow turned to the fence the next time.

By plowing in September and sowing a mixture of wheat and rye it is quite possible to have an abundance of pasture during the winter months when snow is not too plentiful. As soon as the ground is dry enough in the spring the yard may be replowed and planted to oats and peas, which will furnish a great deal of feed during the late spring and early summer months. In June or July the ground may be again plowed and planted to rape, several kinds of turnip, millet, buckwheat, cabbage, and kale.

Some of this stuff may be fenced off and permitted to make crop for winter. The kale is especially valuable

for late fall feeding for frost does not hurt it. For the same reason turnips are very valuable as they furnish greens all winter. It is almost impossible to get too many kinds of vegetation in the chicken yard, even weeds are relished and often picked at in preference to the finest clover. The many miserable, little dirty chicken yards seen about the country, should suggest improvements along this line.

Hogs are built to root. They get a good share of their living that way. Hogs root where they find something, usually grubs and roots that supply needed elements not found above ground. Hogs grow rapidly and they need mineral matter as well as flesh and fat building material. If hogs dig up pasture ground it is because they find grubs among the grass roots. It is worth something to have them destroyed and the pasture grows better after the ground has been turned over.

The batch of good butter is often spoiled because it is permitted to stand too long, and because when the butter has come it does not remain long enough in the cold water to harden. The milk cannot be worked out unless the butter is hard, and too much water will stay in.

When greasing a buggy or wagon with an iron spindle, it would be better to wipe the spindle clean before applying the oil.

THE RANGE HORSE BUSINESS.

A. B. Clark of Moffat, an extensive shipper of range horses, says: Generally the number of horses on the range in large herds has greatly diminished, as is also the number of cattle. As an offset to this, the number of owners of horses has greatly increased, but their holdings are smaller than they were years ago. I think the records of our stock associations in Montana show that 150,000 horses were shipped last year. This probably is the greatest number of horses that have ever been shipped from the state in one year. My opinion is that twice this number of colts were branded and the number of horses must be increasing.

There is a disposition among horse owners to buy and breed very much better stallions than they have ever owned before. I believe as good a horse can be bred on the native grasses, the blood lines being the same, as anywhere in the world. The tendency of our ranchmen is to care for their horses in the winter. In a short time we will be raising grained horses which, I think, will compare favorably with any in the United States. I think the number of horses sold and shipped out of the state this year will be equally as large as last. Most of the horses sold at Missouri and Mississippi river markets come from Idaho, Nevada, Utah and Oregon, with some from Colorado and New Mexico.

At a recent sale I sold seventy-five branded horses for one owner at an average of \$106 a head. These horses were shipped from the western part of Montana and weighed 1200 to 1500 pounds. A carload of extra good two-year-old colts sired by a Shire stallion brought \$61. Some Indian ponies went as low as \$8 and common scrub yearlings for \$15, with two-year-olds at \$17 and \$18. Matured horses and mares, unbroken, sold at \$20 for 850-pound stock, up to \$75 for 1200-pound horses. I consider these prices are about the same as last year. They are unusually good and as the horses are sold at auction and the prices are made entirely by Eastern buyers who attend we suppose they must be satisfactory to them.

Broken horses sell from \$5 to \$10 a head higher than the wild ones. Different divisions of the country prefer different types of range stock. Buyers from Minnesota, Wisconsin and Pennsylvania take good, heavy mares and geldings. Feeders in Iowa, Illinois and Ohio want large framed geldings to fatten for market. Missouri, Tennessee and Kentucky take first-class mares suitable for breeding purposes. Southern dealers purchase a light grade of rangers at lower prices than corn belt buyers pay. Alabama and Louisiana take great numbers of such animals. We have shipped rangers as far East as Vermont. Lately our ranchmen have proved good buyers of stock too thin to go East. This class is fed on grass until mature and ready for the market. In this way the flesh is put on cheaply and a double value obtained from the horses when marketed.

A METHOD OF FATTENING HOGS.

Mr. Forest Henry, writing on the above subject in the Minnesota Farmers' Institute report, advises the hog breeder to get all the growth possible while warm weather lasts. Feed liberally while it is good weather, says Mr. Henry, even though it takes lots of corn, but do not let the brood sows run in with the drove that is being fed for market, as they get too fat, thus endangering their breeding qualities. Continuing, Mr. Henry says:

While your pen of hogs is changing so much corn into pork look out for the health of your herd. This is the time swine plague and hog cholera get in their work.

I cannot give you a positive preventive for these diseases, but this much is certain: Anything that will keep your herd in a healthful condition is a preventive of that dreadful disease, and at the same time will pay twice its cost in the general thrift of your hogs.

There were several hundred hogs that died in our neighborhood last season. I made it a study, took close observation and laid down these rules to guide me in my own herd, and succeeded in bringing them through without any loss.

1. Breed from mature stock
2. See that they have dry, clean sleeping quarters.
3. See that they are never overfed, and no sudden changes made in their feed.

4. See that they have free access to pure water.

5. See that they have good shade during warm weather.

6. See that they are not obliged to eat their feed in filth or mud, and what is still worse, in the dust.

7. Never feed on an exclusive corn diet.

8. Do not inbreed.

9. See that their surroundings are kept clean. In warm weather dust fresh lime around any places that are apt to give off a stench.

I keep the following mixture in a dry place, where they can help themselves the year round: One load ashes, 100 pounds salt, fifty pounds sulphur, twenty pounds copperas, one barrel lime; mix thoroughly. In addition, I often feed charcoal and soft coal.

In our opinion some exceedingly important points are touched on above. Some will take exception to the statement that fattening hogs should not be fed on an exclusive corn diet. However, we think that the majority of successful swine breeders will endorse Mr. Henry's view.

Fattening hogs fed a straight corn ration are very apt to finish up without making sufficient size. If they are fed such by-products as tankage, oil meal or shorts, it is surprising how hogs under a year old will grow and at the same time thicken in flesh.

An excellent idea is to feed some form of slop at noon if the hogs are fed their heavy grain rations night and morning, although some believe in the practice of feeding the slop first thing in the morning and afterwards allowing the hogs to have a liberal ration of corn.

A slop composed of corn meal and shorts and especially so if to this is added a little oil meal and tankage, will contribute to rapid and economical gains.

WHAT SKIM MILK IS WORTH.

No other question has evolved a greater variety in answers and we have seen is valued all the way from five cents up to sixty cents for feeding calves or hogs.

The first evidence is of course prima facie evidence that the man making it does not know his business; and the last estimate, while we know it is all true, was made under specially favorable conditions, the milk being fed to veal calves for just one month.

In feeding skim milk its value depends both on the age of the animals to which it is fed and on the proper balancing with other food.

It is a fundamental fact that all feed including milk is worth considerably more the younger the animals are, and Professor Henry in his valuable book on "Feeds and Feeding" shows how pigs averaging 38 pounds in weight only required 293 pounds of feed for 100 pounds of gain, and those averaging 75 pounds required 400 pounds, while those weighing 320 pounds required 535 pounds of food for 100 pounds of gain in weight.

As regards the skim milk, its value depends on the intelligent feeding. Thus, to quote Professor Henry again, if a bushel of corn is worth 28 cents, then skim milk is worth 15 cents per 100 pounds, if not more than three pounds of milk is given with one pound of meal; but if nine pounds of milk is given to one pound of meal, the value is reduced to nine cents.

All intelligent farmers agree that the feeding value will average from 20 to 25 cents per 100 pounds, and to this should be added, at least 5 cents (the chemists claim, we believe, 7 cents) for its manurial value when fed on the farm.

That it may be made of great value under certain condition is illustrated by the fact reported in Hoar's Dairyman of two poultry buying concerns in Springfield, Mo., buying skim milk at 40 cents for ten gallons, paying 15 cents a can freight and providing the cans, making it cost them, with hauling from railroad depot, about 75 cents per 100 pounds. This has been going on for two years, and if these firms can make it pay, why don't the farmers utilize it themselves instead of selling it for 10 or 15 cents for industrial purposes?—New York Produce Review.

Cross-bred sires should never be used, as they are very likely to reproduce the worst faults of both families. By using a pure bull an inferior herd will be vastly improved in a few years. It is not sufficient, however, to have purity of blood alone, for the bull's ancestors must have been good butter producers.

DANGER FROM INFECTED CATTLE.

Dr. Foster, of the State Board of Health, in an interview with a press representative a few days ago, expressed himself as being strongly of the opinion that tuberculosis was to be found throughout the whole of North California. While there were still some scientists who believed that animal tuberculosis could not be communicated, the consensus of scientific opinion pointed to the presence of great danger to the community from the use of such animals. He had no hesitation in saying that this was a problem of first importance and that the general health demanded its solution.

In answer to some further questions, Dr. Foster said that the center of contagion was undoubtedly in the milk, especially where the disease was seated in the udders, as was very commonly the case. The flesh was also a medium of contagion, but this to a certain extent was minimized; first, by the fact that the disease usually attacked organs that were not used for food, and secondly, by the cooking processes that would tend to destroy bacteria. Meat that was undercooked might, however, prove dangerous.

Dr. Foster was asked if he wished it to be understood that those who drank milk from tuberculous cows were therefrom endangered, and if we might here look for an explanation of the increase of consumption. He replied in the affirmative to both questions. He explained that to drink milk from tuberculous cows was to court consumption, but that the danger was naturally greatest to those who were in poor health and who were therefore unable to resist.

Country children who live open air lives would naturally not be so subject as the children of the cities, who would be more predisposed to such contagion. It must, however, be remembered that the seeds of consumption might be dominant for many years until the health became weakened from some other cause, thus giving them an opportunity to take root and become mischievous.

Dr. Foster was not aware that there were any actual statistics showing the extent to which tuberculosis prevailed among cattle, but there were indications that pointed to 75 per cent.

The remedy, the doctor pointed out, lay in the rigid inspection of animals. The tuberculin test ought to be applied and animals found to be affected ought to be isolated, neither milk nor flesh being used. In this way it could be stamped out and a great danger to the public health be avoided. He had himself known many deaths which he would have no hesitation whatever in attributing to the use of milk from tuberculous cattle. It was a matter of urgency and one that ought not to be postponed.

CATTLE DIE FROM ANTHRAX.

A dispatch from Napa says: Anthrax, a dread disease among cattle, has broken out on several farms southwest of Napa. Last week A. Callan lost about ten head of cattle, and J. Carney lost eight head of fine cows. Dr. Charles Keane, State Veterinarian, was in Napa looking after the matter. Dr. Keane has established a strict quarantine of the stock of the two ranches in question, and a determined effort is being made to stamp out the disease.

DATES FOR WOOL SALES.

The Sutter and Yuba County Wool Growers' Association has set September 16th and October 21st as the dates for the fall wool sales.

A writer says he has never found any ration equal to oats for keeping hogs in a healthy condition. He feeds oats every day to his fattening hogs, about two bushels of dry oats to seventy or seventy-five fattening hogs are put in their watering trough, and they will clean up every oat if you do not feed too many at a time. It is cheaper to feed the oats whole, as the hogs do not waste any that way, while if you have them ground they try to avoid the hulls, and usually waste considerable of the best part of the oats. If you have anything the matter with your hogs just put them on to a dry oats diet and water, and see how quickly they will come around all right.

When storing manure, decomposition will be much more rapid, if plenty of litter is mixed with it.

THE WAY IT IS DONE.

Suppose a farmer has a herd of fairly good cows, say ten in number, that are each returning him some profit, but not much, says Farm and Live Stock Journal. He gets an average of 200 pounds of butter annually, which is above the average yield of most herds, and with the skim milk and manure he finds the business fairly profitable. But he finds that other dairymen are doing much better than he is, through getting more butter per head from their cows, while not spending much more for feed. He concludes that the weak spot is in his cows, and he decides to improve his herd by breeding some cows that will be an improvement over those he now has. He figures out that, while it will take some time to do this, yet in the end it is the surest way of getting what he wants. So he buys a first class dairy bull or pays a neighbor who has one for its service. The heifer calves are kept and raised, and when they come in milk he finds that a yield of over 5,000 pounds of milk annually is possible and that he can make an average of 250 pounds of butter, and of a higher quality. That additional fifty pounds is gained at the cost of a well bred bull and a very slight addition to the cost of feed. The cows that are returning a small profit, or barely paying the market price for the feed they consume, are soon replaced by those that will give an annual addition of \$9 to \$10 per head to the farmer's income. And the second cross of a good bull of any of the dairy breeds will increase the income half as much more as the first one.

The figures given are not large ones—they are what is possible to every farmer who will avail himself of the improvement that has been made in dairy cows by years of careful breeding and steady development, which he gets at a very light cost. He can keep on improving his cows in the same manner until he gets an average of 100 pounds of butter each year over what his original herd gave him, and if he has ten cows the extra income will be quite an item.

John R. Gentry, manager of the Overton Farms, near Nashville, Tenn., in an address on swine raising, gave the following formula for curing the famous Virginia hams. He said: "Now, as regards their curing and the peculiar taste that you get in those hams, I think it is due to the old black mammy that carries it on and treats them just as you and I would do if we knew how—that is, simply to treat them in a rational manner, not introduce any foreign substance into them. They are simply cured in dry salt, then buried in ashes, taken out and washed in thoroughly scalded water in which there is a little red pepper, dried in wheat bran and hung up in the top of the cabin and smoked with hickory wood. Then they are taken out and buried in ashes again, wrapped up in paper, and sold."

Plaster of Paris, mixed with bran or flour, or anything the rats will eat, will drive them off the place. It interferes with their digestion, and they leave.

Warranted to Give Satisfaction.

Gombault's Caustic Balsam

Has Imitators But No Competitors.

A Safe, Speedy and Positive Cure for Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a Human Remedy for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

The Lawrence-Williams Co., Cleveland, O.

A cow of about 1000 pounds weight can eat 100 pounds of grass or its equivalent per day, and it takes sixty pounds of that to keep up the system, that is, the temperature and repair waste of tissue which is consequently taking place. It is only what is eaten over that sixty pounds which goes to produce profit in the form of either meat or milk. Then if a cow only gets eighty pounds of feed she is only producing half the profit she is capable of. From this it will be seen that the necessity for providing abundance of feed in some form or other, and the folly of keeping more cattle than can be fully fed.

A bull should be taught to lead by a ring in his nose before he is a year old, and when turned a year old may be allowed to serve a few heifers. He should always be in good condition, and this applies to all young stock. They should never be allowed to fall low in condition, or they receive a check from which they never recover. Bulls, when required for service (and this applies to sires of all classes) should be liberally fed on food rich in protein, such as clover and bran.

FOR SALE.

Fast Pacing Stallion JOHN A. 2:12 3-4 (three year-old 2:14), sire Wayland V. 2:12 1/4 by Arthur Wilkes; dam Lady Moor by Grand Moor. Wayland V. is the only stallion to put two in the 2:10 list this year up to August 1st. JOHN A. is a rich seal brown, stands 16 1/2, weighs 1255 lbs., is kind and gentle for a lady to drive. Is a very fine individual of strongest conformation, and as all of his colts are line lookers he should make a great sire. His oldest colts are three years old; none have been worked. There were but three of them, as he was not regularly in the stud.

Three-year-old Trotter SIR CARLTON 36367 by Nutwood Wilkes 2:10 1/4; dam Lady Kentlag by Stam B. 2:11 1/4, second dam the dam of Blawood 2:11 and Abeline 2:17. SIR CARLTON is paid up in the Occident Stake and ready to start. Should be a winner any money this year, will make a great prospect in the green classes next year; as no gamer colt ever lived. He can trot the fifth heat the fastest. In another year he will be able, barring accidents, to trot in 2:13 or 2:14. Any horseman at the Woodland track will recommend him as a game colt and a good trotting prospect. He only wears a harness and a pair of quarter boots and does not need the latter. Weighs 6 ounces in front and 5 behind.

I also have some good road horses and brood mares for sale. They can all be seen at State Fair Grounds, Sacramento. Address

A. E. MASTIN,
1016 Nineteenth St., Sacramento.

FOR SALE.

SIDNEY DILLON GELDING BUENA. FIVE years old; perfect beauty without fault or blemish; bay with black points; weighs about 1050 to 1100; can be driven by a child; an elegant road or track horse; trials in 2:17; \$750.

ALSO
The celebrated DOC WILKES, a road horse; you need not take the dust of any. Record 2:12 1/4. A beautiful mahogany bay, black points; weight 1000. No one need look at him unless they want to pay me \$500 for him. A baby can drive him. Both sold for want of use.

Isn't He Worth Saving?

ABSOLUTELY CURE
QUINN'S OINTMENT
REMOVES
SPLINTS
SPAVINS
WIND PUFFS

Why trade off or sell at a beggarly price a good horse just because he "goes lame," "throws a curb" or develops some other blemish? There is nothing in the way of Spavins, Curbs, Splints, Windpuffs or Bunches which will not yield readily and permanently to treatment with

QUINN'S
OINTMENT.

Dr. E. H. Davenport, a prominent physician of Sheridan, Ind., writes: "I have used a number of remedies for the removal of curbs, splints, thickened tendons and tissues generally, but for the last two years I have not been without Quinn's Ointment. I have tested it thoroughly at different times, and say without hesitancy that it is the only reliable remedy of the kind I have ever tried." Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars, testimonials, etc.

—at the—

GRAND AMERICAN

Held at Indianapolis, June 27-30, 1905. was won by Mr. Jas. T. Atkinson of Newcastle, Pa., score 99 out of 100 from the 18-yard mark, using

PETERS FACTORY LOADED SHELLS

This was the Only Event During the Entire Grand American which was won from Behind the 16-yard Line. Many other Notable Scores were made with Peters Shells, among them the following:

1st on Practice Day, F. M. See (tie), 99 out of 100. 1st on First Day, L. H. Reid (tie), 99 out of 100. 2d in Preliminary, Wm. Veach (tie), 97 out of 100. 3d in Grand American, M. Arle (tie), 97 out of 100. In the Consolation Handicap, 2 scores of 98, 5 of 97, 4 of 96 and 25 others above 90 were made with Peters Shells.

All of which merely goes to prove that Peters Shells are WINNERS.

SAVAGE

SAVAGE QUALITY

HAMMERLESS SPORTING RIFLE

The smooth and easy action of this Rifle is the wonder of all sportsmen who have fired it. It's a Repeating Rifle—the magazine holds six cartridges. The cartridges lie side by side—not end to end—can't be exploded by jamming. Hammerless—there is no flying hammer to distract the aim. Perfectly balanced—the center of gravity remains constant. Absolutely safe—no danger of explosion of defective shells—the operator is protected by a solid wall of steel—steel made especially for us.

The Savage Hammerless Sporting Rifle is described in detail, with other models, in our handsome catalogue, free for the asking. Write for catalogue today.

CONDITIONS.

Entrance Fee to all races, five per cent of purse and five per cent additional deducted from money winners.

Races not filling satisfactorily to the Board of Directors may be declared off.

Declaration (to declare out) must be made in writing and will not be accepted unless accompanied by the amount due at the time the declaration is made.

Stakes for harness races will be divided into four moneys: 50, 25, 15 and 10 per cent, except for one and two year-olds, which will be divided 60, 25 and 15 per cent.

Running Races—Money to be divided into 75 per cent and 25 per cent of purse.

All harness races 3 in 5 except races Nos 8, 13, 17 and 23, which are 2 in 3.

Hopples barred in trotting races, but will be permitted in pacing races.

Conditional entries will be treated the same as regular entries, and nominators held under the rule.

Member National Trotting Association.

THE WEEKLY BREEDER AND SPORTSMAN

F. W. KELLEY, PROPRIETOR.

Turf and Sporting Authority of the Pacific Coast.

—OFFICE—

36 GEARY STREET, SAN FRANCISCO.

P. O. BOX 2300.

TELEPHONE: Black 586.

Terms—One Year \$3, Six Months \$1.75, Three Months \$1
STRICTLY IN ADVANCE.

Money should be sent by postal order, draft or by registered letter addressed to F. W. KELLEY, 36 Geary St., San Francisco, California.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

San Francisco, Saturday, September 16, 1905.

EVERY ASSOCIATION in California that gives harness meetings in the future should arrange to secure a bonus from the citizens of its town without compromising itself in any manner with those who desire to ignore the laws against gambling. There is no reason on earth why a town should have all sorts of illegal gambling games running during the week a race meeting is held, and associations and horsemen should realize this fact. The gamblers that flock to a town to ply their nefarious trade when a race meeting is on, do positive injury and no good to the sport of harness racing. They simply antagonize the respectable class of law-abiding citizens, and lead many to entertain the false idea that men who own trotters and pacers are of the same ilk as those who run the games. If a bonus cannot be raised to aid a race meeting without the aid of subscriptions from those who insist on renting their premises to gamblers, better have no race meetings at all. The breeding and racing of harness horses is a legitimate industry, and has occupied the time and attention of many of the leading citizens of the United States. Associations giving harness meetings should be too dignified to acknowledge their dependence on subscriptions from those who insist that gambling games must run in spite of the laws against them, and should devise other means to raise the revenue necessary to make their meetings successful. That it can be done is not even doubtful because there are hundreds of harness meetings held in this country every year in towns where the laws against gambling are strictly enforced. Speed contests between horses are noble sport, and they should never be assisted, let alone supported, by the money which any tin-horn gambler pays for the privilege of running an illegal skin game.

NO REVENUE was derived from the betting privilege at the State Fair this year, according to a statement made by the Sacramento Bee, and which appears on another page in this issue of the Breeder and Sportsman. If this is a fact will the Bee please tell us why a bookmaking firm was permitted to occupy a place adjoining the new track from which no charge was made to enter the grounds. And perhaps the Bee can also explain why from four to seven running races were added to the program every day to which no entrance money was charged. It was common rumor in Sacramento during fair week that the syndicate paid \$1000 a day for the exclusive privilege of booking on the races, and that for this amount it required at least four running races to be put on the program. It was also rumored that this "contribution" made by the syndicate was in the shape of a purchase of \$1000 worth of admission tickets each day, so that while the accounts show no betting privilege was let, the sum probably appears in the ticket sales.

MANY SEEM TO BELIEVE that the laws against betting which have been enforced on so many eastern tracks this season, will seriously affect the market for track horses this winter. We think their fears are not well grounded. The enforcement of these "blue laws" will so arouse the horse breeders and owners in the states where they exist, that a combined and effective effort will doubtless be made to repeal the laws or elect men who will repeal them, and in that case harness racing is very liable to be placed on a better footing than ever. The prices offered and paid for high class horses during the past few weeks does not show any drop in the market. On the contrary, prices are a little better than they were last year.

A TROTTING TRACK in close proximity to San Francisco is sadly needed. A high class harness race meeting could be given here every year if there were a suitable track to race over, and a good program would draw a large attendance. The sport is as popular as ever but there is no place to race. The new three-quarter track now building in Golden Gate Park will be ideal for amateur events, but of course no regular purse or stake racing will be permitted over it.

THE CALIFORNIA STATE FAIR of 1905, which closed last Saturday, was the most successful held in years, and the gate receipts were larger. Had the fair opened on Monday, the 4th, instead of Saturday, the 2d, the financial success would have been still greater, and had the Directors refused to open the place to a syndicate took the dignity and tone of the exposition would have been much higher.

THE PROTEST made by Trainer Chas. Whitehead at the Breeders' meeting at Santa Rosa, against the starting of F. Gomet's colt Prince McKinney, winner of the two-year-old trotting division of the Futurity, has been withdrawn and the money paid over. The protest was made on the ground that the starting payment was not made in time, although the envelope bore the proper date.

THE TULARE FAIR ASSOCIATION announces a good program of purses for trotters and pacers to close October 1st. The Tulare fair is one of the best held in the State and is always well attended. The association has the only kite track on the Coast and fast time can be made over it, as it is kept in excellent condition. See the advertisement in this issue of the purses offered.

A BOLT OF LIGHTNING descended on a county fair in Iowa last Thursday, hit the poultry exhibit, killing four people and a thousand chickens. Had it struck the race track instead, killing a few men and horses, what a wealth of material it would have furnished the preachers for sermons on "The Wrath of God."

SPOKANE INTER-STATE FAIR ENTRIES.

Pacing, 2:14 class, purse \$1000—Umatilla, Helennes, Modicum, Dewey Ann, Bessie R., Bonnie M., Yukon, Ruby H., Klamath Maid, Merry Monarch, Teddie A., Vinnie Mann, Queen B.

Pacing, 2:25 class, purse \$500—Horse Heaven Maid, Klamath Maid, May, Robert H., Jim Wilkes, Bonnie M., Nellie B., Rose Rial, Ruby H., Merry Monarch, Teddy R., Vinnie Mann.

Trotting, 2:16 class, purse \$1000—Ringman, Oveta, Richie Baron, Lady Jones, Lemmetta, Satin Royal, Sam Bowers, Kittle Clover, School Belle, Judith, Sunrise, Deception, Black Diamond.

Trotting, 2:30 class, purse \$500—Ringman, J. H. M., Kelley O., Richie Baron, Sam Bowers, Kittle Clover, Black Diamond, Judith, Nancy K., Deception, Robbie.

LA GRANDE ENTRIES.

The 2:30, 2:25, 2:10 and free-for-all paces are the only events that filled at La Grande. None of the trots received sufficient entries to justify giving the purses, but special events will be given for horses in attendance. The fair will be held October 3 to 7, following Walla Walla. Entries received are as follows:

2:30 pace, purse \$400—Lady Smith, J. W. Briggs; Rose Rial, J. S. Evan; Jim Wilkes, E. E. Sutro; Lady Julia, H. G. Cox.

2:25 pace, purse \$400—Lady Smith, J. W. Briggs; Jim Wilkes, E. E. Sutro; Robt. H., George Green; Lady Julia, H. G. Cox.

2:10 pace, purse \$400—Queen B., L. B. Lindsey; Le Roi, N. K. West; Yukon, J. S. Evans; Dewey Ann, R. H. Ball; Hassalo, Jas. Erwin.

Free-for-all pace, purse \$400—Queen B., L. B. Lindsey; Le Roi, N. K. West; Yukon, J. S. Evans; Dewey Ann, R. H. Ball; Hassalo, Jas. Erwin.

Easter Direct, a four-year-old filly bred and still owned by E. A. Gammon of Sacramento, paced a wonderful mile in a workout at Columbus, Ohio, on the 1st instant. She is credited with a mile in 2:03½ with the last half in one minute flat. Easter Direct is by Direct 2:05½, dam Cleo G. by Yosemite. She was given all her early training by Sam H. Hoy of Winters, who is one of the best speed makers and gait educators on this coast. The Eastern papers are all touting Easter Direct as the winner of next year's Chamber of Commerce Stake at Detroit, and if she keeps her present form she should "win in a walk."

"George G. 2:06¼ will soon become known as the "had luck" horse. Last season he scratched in his fast record, one day when he was on his good behavior, and last winter was touted as the equal of Tiverton and Sweet Marie. Last week he looked like a sure winner, and along came Wentworth, considered a "has been" (hut, oh, he isn't!) by the wise ones, and trimmed him good and plenty in 2:06½ and 2:08.—Horse Review.

Jackson's Napa Soda does not tangle the feet

WEARS THE TRIPLE CROWN.

North Star, the Nutwood Wilkes three-year-old whose picture graces our title page, was bred and is owned by Mr. J. B. Iverson of Salinas, and has the distinction of being the only colt that ever won all three of the trotting classics of California, the Pacific Breeders' Futurity, the Occident Stake, and the Stanford Stake, all of which are for three-year-olds. He also won second money in the two-year-old division of the first named stake, and his total winnings to date amount to \$6507, with three firsts and one second out of a total of four starts. He is without any doubt the greatest three-year-old trotter that has appeared on the California circuit since Zombro's day.

When North Star was a two-year-old he could not be considered either a good actor or a highly promising youngster, as he was balky and rather fractious in his disposition, and was given up and turned out by one trainer as a poor proposition. When Charles Whitehead took him up, however, he managed to gain the colt's confidence and soon had him going nicely and willingly, and ready to do his best on all occasions. Although Mr. Whitehead had but a few weeks to start him in the two-year-old division of the Breeders' Futurity at San Jose in 1904, the gelding made a fine showing, winning the first heat over a high class field of two-year-olds in 2:24, and being second in the other two heats because he was a big awkward colt that was short of work.

This year he was better prepared for his first start, and when the Pacific Breeders' Futurity was trotted at Santa Rosa he won so handily in three straight heats in the fast time of 2:13½, 2:13½ and 2:16, that his great merit as a colt trotter was immediately recognized by every horseman who saw him win so impressively.

Two weeks elapsed before his next start, which was in the Occident Stake on the opening day of the California State Fair. For three days previous to this race his trainer, Chas. Whitehead, was very sick and unable to work or drive the gelding. The result was North Star was a little rank and when the race was started Whitehead, after failing to secure another driver, got up behind him, but found it difficult in his weakened condition to hold North Star to his gait during the first three heats. The colt had all his speed, however, and although making disastrous breaks in each of these miles finished a good second every time and in the fourth heat trotted the mile in 2:15½, the fastest heat in the history of the stake, and won handily. The next two heats and the race and first and third money were his.

One week later he started in the Stanford Stake. Again was he returned a winner, and although losing the first heat to Athasham by a break, took the next three easily and placing first, third and fourth moneys to the credit of his owner.

North Star is a large colt, standing slightly over sixteen hands. He has a most powerful shoulder with great depth through the heart, and his hind quarters are muscular and well developed, although his great development forward would cause an inexperienced person to say he was light behind. He has a tremendous stride, with much action and when at speed his gait is regular as clock work. That he is one of the fastest three-year-olds ever foaled is proven by his two heats in 2:13½ in his first race this year. He was in condition to lower this mark at Sacramento had the new track not been so heavy and cuppy as to prevent fast time, but his fourth heat in the Occident in 2:15½ is considered by many horsemen as good as 2:11½ over a fairly good track. That he has gameness and great endurance was proven in the same race, his sixth heat in 2:18½ being a wonderful performance under the conditions for any three-year-old.

North Star is the greatest money winning three-year-old ever raced in California, is the only colt that ever won all three of the leading three-year-old stakes annually trotted in this state, and has the fastest mile by a three-year-old colt or gelding in the United States to his credit this year. Chas. Whitehead considers him the greatest three-year-old he has ever seen and believes he could be fitted for a mile in 2:10 or better on any good track. The breeding of North Star was given in tabulated form in these columns two weeks ago and is not necessary to repeat here. Suffice it to say that he represents the Wilkes-Electioneer-Mambrino-Patchen-thoroughbred cross and comes from a great line of producing sires and producing dams. He should trot in 2:05 or better as an aged horse.

Mr. Coyle, one of the star reinsmen of the Coal, Iron and Oil Circuit, over in Pennsylvania, in company with several other drivers, persisted in scoring ahead of the pole horse at the races the other day. The starting judge finally roared:

"I'll fine every man \$5 the next time down that scores ahead, and, Mr. Coyle, I'll fine you \$20. Remember that, sir!"

The field of seventeen pacers came all right, and the word "go" was given to a splendid send-off. That evening at the hotel, Mr. Coyle approached the starting judge and, doffing his hat, said, with a sly twinkle in his eye:

"Judge, you did me great honor this afternoon, and I want to thank you a thousand times."

"Why, how's that?"

"Didn't you threaten to fine me \$20 and those other sixteen fellows only \$5 each?"

"Yes, sir."

"Well, imagine how good I felt. Just think of Mr. Coyle being four times more important than all the other reinsmen. Thank you, sir; thank you."

JOTTINGS.

THE FACT that the good three-year-old North Star won over \$6000 in three races in California this year goes to show that it is possible for a high class colt trotter to earn a very snug sum for its owner without going out of the State, provided he is entered in the three established stakes which are the annual features of the small circuit of harness racing held in California each summer. As these stakes have given promising young trotters eligible to them a much higher value than they would otherwise have, so will three or four good sized stakes for aged class trotters and pacers greatly increase their value in the market and also increase the demand for them. It is not every association that can offer large stakes, but there are three or four associations in California which can afford to announce early closing stakes for class trotters and pacers that will have a value considerably greater than any given here in recent years. The Breeders' Association has a \$2000 stake for 2:24 class trotters and one of \$1500 for 2:20 class pacers that could be easily doubled in value without danger of loss, while the Los Angeles Association and the State Fair could give equally as large and probably larger stakes. The objection raised by some associations to the giving of large stakes is that those holding meetings late in the season secure but a few starters and have a large suspension list owing to the fact that a few horses show up at the early meetings that outclass the others and consequently the majority of owners refuse to start against them later in the season. This can be easily remedied by the associations conferring before announcing their programs and making their big stakes for different classes. The association giving the opening meeting should give its leading stakes for the slower classes. The years when the Breeders' Association held its meetings early in the year saw large fields in the stakes for green horses and those of the classes slower than 2:20. The stakes offered by associations coming later in the circuit should be for horses of a faster class, until at the close of the season the fastest horses would be competing for the larger stakes. There has been a pretty general complaint in California in recent years that a 2:10 pacer or a 2:15 trotter was compelled to start for smaller purses than the slower classes were racing for. This is because the largest revenue of every association giving harness meetings comes from entrance money, and the stakes for green or slow class horses can be depended upon to furnish the longest list of entries. The \$2000 stake of the Breeders' Association does not cost it as much as the average \$800 purse, because the number of entries is nearly large enough to make up the full amount of the money offered. This is the case with nearly all the big stakes offered on the Grand Circuit. Horses in training are so numerous in the East that many associations have an average of thirty or more entries to every race, and when it is understood that sixteen paid up entries pay the entire stake, it is easy to understand the expression that many of the Grand Circuit associations are "on velvet" as soon as their entries are received. California associations cannot arrange their programs on the same plan under which meetings are given in the East. This is a big State, but it is comparatively sparsely inhabited, and our circuit is one of magnificent distances and superlative transportation rates. It is often the case that an owner is required to pay nearly as much to reach a town with his horse as he can earn by winning first money, consequently the meetings where \$300 purses are given in this State have very few entries outside their immediate neighborhood. Owing to these long hauls with high freight rates it is impossible to arrange a circuit of more than a few weeks racing, as but few of our mile tracks are located in cities large enough to give four or five days of racing for purses of upwards of \$500 each.

Such being the condition of things in California it seems to me that it would be well for the managers of the different trotting tracks in California to let the lamp of experience in these matters guide them in the future. All over this country, from Maine to California, harness racing opens in the early summer and continues until the frost or the rain makes the tracks unfit to race over. On the other side of the Mississippi there is only one Grand Circuit, and if all the associations would decline to give meetings unless they could be members of the big ring there would be mighty little racing. There are a hundred minor circuits over there—some of them composed entirely of half mile tracks, where the largest purse is never over \$400. These all act as feeders for the Grand Circuit, however, and on these little circuits each year are developed horses that go out to meet the champions of the big ring the following season.

California can profit by a study of the eastern situation. We should have a main circuit with such cities as Los Angeles, Fresno, Stockton, San Jose, San Francisco, Santa Rosa, Woodland and Sacramento comprising it. The associations or track managers should effect a regular organization and as early as January of each year announce dates and a few early closing stakes. At Los Angeles, San Francisco and the State Fair the largest stakes could be given, but at all these places mentioned the programs could be made up of purses ranging from \$600 to \$1000, with an occasional stake of \$2000 or more. With a circuit of this sort owners of good horses would not object to entering clear through, and three times the number of horses now raced would be out each year.

Besides this main circuit there should be a half dozen smaller or minor circuits. There is not a town of a thousand inhabitants where a track is located that will not patronize and enjoy a few days' harness racing, if properly conducted, and there is not one but can secure enough entries, if the purses are properly advertised, to insure good contests. Purses of \$200 or \$300 are ample and a three days' program sufficient at these smaller towns. I know a horseman who, having a lease of a track, gave a three days' meeting one year and came out with quite a neat sum on the right side of his ledger. The next year he gave a four days' meeting and lost as much as he made the year before. He lives in a three-day town and a four-day meeting will not pay there. Theatrical men have solved this question long ago, and any advance agent with experience knows that in the small towns just as much money is taken in at the box office when the show is given for only one night as when given for two, while the expenses are only one-half. Race meetings are much the same, and managers must get rid of that old idea that the horsemen must be kept in town a full week for the benefit of the hotel men and merchants. A one-day meeting that is financially and otherwise successful is better for all concerned than an entire week of racing that leaves a deficit for the management or the citizens to pay out of their pockets.

There are amusing incidents connected with campaigning a horse even if one doesn't win all the time. My friend Ottinger, President of the American Ticket Brokers' Association, who was once a partner of the lamented Tom Keating during several eastern campaigns, has as much fun as the next man out of the sport. Two years ago when George Fox disposed of most of his horses at auction, Ottinger bought Daedalion for something like \$750. If I remember right it was Ed Lafferty, the well known trainer now in the east with the Butler string, that induced Mr. Ottinger to buy the stallion, and Ed put the horse in training at Pleasanton. Daedalion had a mark of 2:11 at the time, but nearly all the "wise guys" said he was all in and rather smiled when the ticket broker made the high bid for him. Even Lafferty lost faith in the son of Diablo and told me just before he went east that he didn't think Daedalion would do. Ottinger was game, however, and didn't mind spending a little money on the horse if he could win a heat now and then, and gave him to H. R. Ward to train. Ward started him three times last year, the first time without hitches, and he was distanced. He put a new pair of straps on him the next time, but they parted, and again he caught the flag. The third time everything held, however, and he won handily, beat all the crack 2:10 horses and took a record of 2:10. This year his win of the 2:09 pace at the State Fair showed him to be about the best horse in his class on the Coast. He paced the second heat over that new and heavy track right at his record and Ward was just buggy riding. At Santa Rosa he was up against Zolock, and Ottinger thinks he might have beaten the son of McKinney had the others in the race the speed their trainers claimed. Nearly every one of them claimed his horse could pace one heat in 2:06 and they proposed to hook up with Zolock, one at a time, and make him lower his record. Ottinger thought the combination would win and bet \$300 on the field against Zolock, but when the race came off the 2:06 horses failed to show the speed claimed for them and Zolock cake-walked. Daedalion can certainly show a mile in 2:06 or 2:07 over a good track and Ottinger is getting lots of inquiries from men who want to buy the horse. One fellow came in the other day and wanted to trade ten thousand shares of oil stock at a par value of a dollar a share for the stallion. Ottinger looked at the name of the company, saw that he had never heard of it, before he said:

"I don't want to swap horses for oil stock as I have plenty of both, but I'll tell you what I'll do. I've got eleven thousand shares of oil stock that I'll trade for your ten thousand, even though I don't know where the well is, but I wouldn't give Daedalion for both wells." Another man wrote asking what Ottinger would take for the horse, reminding him that he was present when he paid \$750 for him. "Why didn't you buy him then?" said the broker, "you'll never have another chance to get him so cheap." Daedalion is, in the opinion of every horseman, fully capable of beating 2:10 three times over any good track, and he is one of the best bred stallions in California.

Mr. J. R. Bowles, owner of the McKinney gelding Mack Mack 2:12½ returned to his home in Portland from the East last week and stated to a representative of the Rural Spirit that Mack Mack is only temporarily lame and may be able to start at Lexington and Memphis. Mack Mack's lameness was caused by an accident on the track. Mr. Helman was working him out and turning into the stretch at a 2:12 clip met the track harrow, which to avoid running into, he pulled Mack Mack suddenly to one side and wrenched one of his hind ankles, which caused him to pull up slightly lame. The horse is fast recovering, and will in time be as sound as ever.

Will Durfee took Claude Jones' four-year-old Carlok 2:20½ by McKinney south with him when he shipped his horses home and will put him in shape for the races next year. Carlok made his record in the Stanford stake last year winning the second heat in that time. He also won two heats in the Occident Stake and divided second and third money with Marvin Wilkes. He won over \$1600 during his three-year-old form. H. S. Hogboom trained and drove him to his record.

Danube by Direcho won second money in the \$5000 purse for 2:21 class trotters at the Hamline Fair, September 4th. The race went to Watson in straight heats in 2:13½, 2:11½ and 2:10¼. Danube's positions in the heats were 3-2-2. He was driven by Gil Curry.

DIRECTUM A WONDERFUL SIRE.

The Horse Review of last week makes the following editorial comment:

The real sensation of last week's racing was the exceptionally brilliant performance of Ethel's Pride in the \$3,000 Ponkapoag purse for 2:14 trotters, at Readville, Mass., in which she defeated the favorite, Glenwood M. 2:08¼, and trotted the second, third and fourth heats in 2:07½, 2:07¾, 2:10¾. Ethel's Pride is now five years of age. In 1903 she was one of the season's most brilliant three-year-olds, taking a record of 2:13¾ and winning, among other events, the Review Futurity at Cincinnati. Last year she was not started, and her Readville race was her first public appearance this season.

In commenting upon it, turf writers have taken occasion to draw renewed attention to this great young mare's dam, Ethelwyn 2:33, the famous matron, by Harold, out of Kathleen, by Pilot Jr. Her record is indeed a remarkable one, as she has produced, beside Ethel's Pride, those two other precocious three-year-old trotting fillies, Impetuous 2:13 and Extasy 2:11½ (the latter with a pacing record of 2:10½ at two years), the swift pacing mare Ecstatic 2:05¼, and three other standard trotters. In this connection, however, there is an interesting point that we have not seen mentioned. This is that Little Miss, thoroughbred, by imported Sovereign, the third dam of Ethel's Pride and her noted half-sisters, is also the fourth dam of the famous black thoroughbred race mare Imp, whose record-breaking achievements a few seasons ago, at both long and short distances, won her a place among America's greatest running performers. When running blood is found in the near—or moderately near—removes of a fast trotter's pedigree, it will be generally found to have also produced something of equal merit of its own kind.

Ethel's Pride is the daughter of a great dam. But do not overlook the fact that she is by a sire that is even greater. Directum 2:05¼ was one of the most marvelous trotters, while upon the turf, that the world has ever seen. As a sire he has now won equal renown. Last year he placed two of his get—Consuela S. 2:07¾ (winner of the \$15,000 Massachusetts race) and Judge Green 2:09—in the list of 2:10 trotters. This year he has duplicated the achievements with Ethel's Pride 2:07½ and Directum Lass 2:09¾. Never before have four race-horse trotters by one sire entered the 2:10 list in two successive seasons. There are only four living sires of four or more 2:10 trotters, and these are from two to eleven years older than Directum, who is now but sixteen and has been permanently retired to the stud but seven years.

Four years ago, in the fall of 1901, Directum, through the death of his owner, William E. Spier, came to the auction block. When his prospective sale was announced our unprejudiced opinion was asked, by a prospective bidder, as to the merits and value of the horse. We gave it as our conviction that he was destined to be one of the world's greatest trotting sires, and that he was worth any price within reason and the buyer's resources. We do not know how much weight this opinion may have carried with it; but we do know that the gentleman to whom it was expressed bid off Directum at the sale for \$12,100, believing that he had secured a rare bargain. The gentleman in question was Mr. M. W. Savage, of Minnesota. We have more than once, since then, congratulated him on his purchase. We now renew these congratulations.

THE KANSAS BETTING LAW.

While the California Legislature will not be in session this winter, it is more than likely that at the session of 1906-7 an effort will be made to have some legislation passed by which wagering on the results of races may be legalized. The Kansas law which has met the approval of horsemen in that State is herewith given that our readers may understand how betting on races is permitted but controlled in the cyclone belt. The law reads as follows:

Any person who keeps any room, shed, tenement, booth, or building, or any part thereof, or who occupies any place upon any public or private grounds within this State with any book, instrument, or device for the purpose of recording or registering bets or wagers, or selling pools, upon the result of any trial or contest of skill, speed, or power of endurance of man or beast, which is to be made or take place within or beyond the limits of this State, except within the inclosure of a race track and upon races or trials of speed being conducted within said inclosure (provided that the exception herein shall not apply to any race track or inclosure for more than two weeks in any one year), or any person who records or registers bets or wagers, or sells pools upon the result of any trial or contest of skill, speed, or power of endurance of man or beast, which is to be made or take place within or beyond this State, or upon the result of any political nomination, appointment, or election which is to be made or held either within or beyond the limits of this State, or being the owner, lessee, or occupant of any room, shed, tenement, or tent, booth or building, or part thereof, knowingly permits the same to be used or occupied for any of the purposes hereinbefore prohibited, or therein keeps, exhibits, or employs any device or apparatus for the purpose of registering such bets or wagers, or selling pools, as are hereinbefore prohibited, or becomes the custodian or depository for hire or privilege of any money, property, or thing of value which is staked, wagered, or pledged, contrary to the provisions of this act, shall be guilty of a misdemeanor, and on conviction shall be punished by imprisonment in the county jail for a period of one year and by a fine of \$1000.

Mr. H. M. Hanna, president of the Cleveland Driving Club, drove his mares Aerolite 2:09¼ and Leola 2:10¼ a mile to pole in 2:10 week before last at Cleveland. It was the first time they were ever hooked together.

CLOSING DAYS AT STATE FAIR.

North Star Annexes Stanford Stake, and Adam G. Wins Free-for-All Trotting Event.

Thursday was Governor's Day at the State Fair, and between six and seven thousand people turned out to honor the State's chief executive and see the races. Two harness races were on the card, but the first, the Occident-Stanford Pace, was a walkover for T. W. Barstow's bay colt Just It by Nearest. This race is for the three-year-olds originally entered in the Occident and Stanford stakes, that take to pacing. Mr. Barstow drove his colt an easy mile in 2:19½.

The only other harness event of the day was the 2:18 trot for a purse of \$600. C. A. Durfee's little trotter Cuate by McKinney, dam Miss Jessie 2:13¾, by Gossiper was a big favorite over Wild Bell, Lady Jones and Hank selling as a field. Cuate was driven by W. G. Durfee and won three straight heats in the handiest sort of fashion without getting out of his class, every mile being in 2:17½. Hank managed to finish second the first heat, Wild Bell got the place in the second heat and Lady Jones was next to the winner in the third heat. So far as speed is concerned the three field horses were on even terms. Second money went to Wild Bell, third to Lady Jones, and Hank saved his entrance. Six running races completed the day's sport. The summaries of the harness events follow:

Occident-Stanford pace, purse \$55.
Just It, b. g. by Nearest-Babe (T. W. Barstow). Walkover
Time—2:19½.

Trotting, 2:18 class, purse \$600.
Cuate, b. g. by McKinney-Miss Jessie..... 1 1 1
Wild Bell, b. g. by Wildnut..... (H. D. Freeman) 3 2 3
Lady Jones, b. m. by Capt. Jones..... (J. Green) 4 3 2
Hank, gr. g. by Vasto..... (J. L. Smith) 2 4 4
Time—2:17½, 2:17½, 2:17½.

The grand stand was not large enough to accommodate all who wanted seats under its welcome shade on Friday, and the fact was apparent to all that good harness events will draw a crowd. There were three races for harness horses on the program, the Stanford Stake, the 2:18 class pace and the free-for-all trot. For the first named four three-year-old trotters appeared to contest for the stake, which had a total value of \$1890, divided into the usual four moneys. North Star, the Nutwood Wilkes gelding that had won both his previous starts this year and proven his speed and gameness, was the favorite at \$20, with the field, comprising Athasham, Alto Downs and El Rey, selling for \$11.

When they got the word the first time North Star went to the front but broke at the half and lost many lengths. Athasham's driver took advantage of North Star's mistake and got a long lead, but when Whitehead got North Star squared away the crowd had a chance to see what marvelous speed the Salinas gelding has, as he ate up the space rapidly and was only beaten a half length at the wire in 2:20½. Alto Downs was third and El Rey fourth.

In the second heat North Star was on his good behavior and trotted the mile in 2:15, a great performance for a three-year-old, as the track was nearly if not quite three seconds slow. Athasham was the only one of the other three to beat the flag and he trotted a fast mile, being timed separately in 2:17. The third and fourth heats went to North Star in the same manner in 2:16 and 2:17, and he was awarded first, third and fourth money, a total of \$1417.50. This added to his winnings in the Breeders' Futurity and Occident stakes makes him winner of \$6006 this year and he retires an unbeaten three-year-old. In his only start as a two-year-old he won \$500.

The 2:18 class pace was not a very high class event, though it took five heats to decide it. Elmorine by Iris, driven by Farmer Bunch, won the first two heats in 2:17¼ and 2:20, and then Penrose by Falrose, driven by Walter Mastin, took the next three in 2:18¾, 2:22 and 2:31. Joe Robin was awarded third money, Sweetheart fourth and Clara L. had to be content with fifth and last position in the summary.

The announcement that Petigru would not start in the free-for-all trot, and that "Billy" Durfee had very kindly offered to drive Adam G. for Willard Zibbell gave this race increased interest. Since the entries were first published the horsemen had predicted a great contest in this event, and there was much disagreement as to the probable winner. Dr. Hammond was picked upon by the majority of first choice buyers as the one most likely to win, and they paid \$20 each for tickets on him, with all the other good ones, including Charlie T., Adam G., Princess and H. D. B., in the field at \$12. It was not Dr. Hammond's day, however, for under Will Durfee's cool and able rein Adam G. again showed the form displayed at Los Angeles when Willard Zibbell drove him to victory in straight heats. He won the race in one, two, three order, setting the track record at 2:13½ in the second heat, and trotting like the champion which many of the best judges of a trotter believe him to be. His burst of speed is wonderful and a quarter in 30 seconds seems play for him at any time. No better gaited one ever wore harness. The victory of Adam G. in this race was most popular. Durfee declined to accept anything for his services. The fight for second money in this race was quite interesting, Mr. J. B. Iverson's good mare Princess finally landing it. H. D. B. was third, Charlie T. had to be content with fourth, and the favorite, Dr. Hammond, was last in the summary. Four running races completed the program for the day. The summaries:

Trotting, Stanford Stake for 1905, value \$1890.
North Star, b. g. by Nutwood Wilkes-Ivaneer..... (C. Whitehead) 2 1 1 1
Athasham, b. c. by Athadon..... (S. Walton) 1 2 2 2
Alto Downs, b. g. by Iran Alto..... 3 d
El Rey, b. c. by Nushagak..... (C. Spencer) 4 d
Time—2:20½, 2:15, 2:16, 2:17.

Pacing, 2:18 class, purse \$600.
Penrose, b. g. by Falrose-Brigadier..... 2 4 1 1 1
El Morino, b. g. by Iris..... (C. F. Bunch) 1 1 3 2 2
Joe Robin, blk. g. by Robin..... (C. Roderique) 3 2 4 out
Sweetheart, g. m. by Haywood..... (J. L. Smith) 5 3 2 out
Clara L., b. m. by Argent..... (S. Sprague) 4 5 5 out
Time—2:17½, 2:20, 2:18¾, 2:22, 2:31.

Trotting, free-for-all, purse \$800.
Adam G., b. h. by McKinney-Nona Y..... 1 1 1
Princess, b. m. by Eugeneer..... (C. Whitehead) 2 5 2
H. D. B., b. g. by Arthur Holt..... (F. E. Wright) 4 2 3
Charlie T., blk. g. by Zombro (A. L. McDonald) 3 3 5
Dr. Hammond, ch. g. by Chas. Derby..... 5 4 4
Time—2:11¼, 2:13½, 2:13¾.

Saturday was a gala day in Sacramento. It was Admission Day and the order of Native Sons of the Golden West had chosen the capital city as the scene of their annual parade. Between twenty and thirty thousand visitors were there to witness the big event which was to occupy the forenoon of the day, and as it was 2 o'clock before this feature was over, and the literary exercises filled the pavilion during the afternoon, the crowd that was expected at the track did not materialize until half the racing program was over. The crowd was so great then, however, that the street car lines were unable to handle it and it was dark when the last of them left the track.

The two largest purse races of the meeting were down for decision, and they were won in straight heats. The first was the 2:25 class pace for a purse of \$1500. Eight starters were announced, the chestnut mare Loganette being the favorite at even money against the field, in which were Hattie Croner, Fearnot, Arthur F., Argyle, Miss Winn, Mixer and Eagle Pilot. Hattie Croner was piloted by Farmer Bunch and he took her to the front three times in 2:19¼, 2:17¼ and 2:17½. The Farmer received congratulations on all sides for his win with the daughter of Bay Bird. She could have paced much faster if necessary. Fearnot got second money, Arthur F. third, and Argyle fourth.

There were five starters in the 2:24 class trot, with Oro Belmont selling as favorite. Lady Jones, Sam Bowers, Little Babe and Billy Dooley made up the field. The first heat resulted in one of the closest finishes that has been seen this year. Ora Belmont and Lady Jones passed the grand stand nose and nose, and until the judges announced that Oro Belmont had won, only those directly under the wire knew the result. The remaining heats went to the Oro Wilkes horse very handily in slower time.

Zolock 2:05¼ then paced an exhibition miles. He was given an enthusiastic reception as he came out for his trial, driven by Henry Delaney. He started away at too fast a gait over such a heavy, slow track and when he reached the half in 1:02 those holding watches doubted his ability to lower his record. He reached the three-quarters in 1:34, but only paced the last quarter in 34 seconds, and the mile was in 2:08. The track is reckoned three seconds slow by all horsemen. Six rather ordinary running races were then decided and the State Fair races of 1905 were over. The harness race summaries follow:

Trotting, 2:24 class, purse \$1500.
Oro Belmont, b. g. by Oro Wilkes-Muscovite..... 1 1 1
Lady Jones, blk. m. by Cap. Jones..... (J. Green) 2 4 2
Sam Bowers, ch. g. by Jo Simpson..... (A. L. H. Beam) 1 1 1
Little Babe, blk. m. by Bradmoor..... (S. Hoy) 3 2 3
Billy Dooley, br. g. by Billy Bird..... (H. D. Freeman) 4 3 4
Time—2:12¾, 2:19¾, 2:19¾.

Pacing, 2:25 class, purse \$1500.
Loganette, b. m. by Loganet-Argyle..... 1 1 1
Arthur F., ch. g. by Arthur Holt..... (F. E. Wright) 2 5 2
H. D. B., b. g. by Arthur Holt..... (F. E. Wright) 4 2 3
Charlie T., blk. g. by Zombro..... (A. L. McDonald) 3 3 5
Dr. Hammond, ch. g. by Chas. Derby..... 5 4 4
Time—2:19¼, 2:17¼, 2:17½.

Pacing, 2:22 class, purse \$1500.
Wendell, b. m. by Steinhart-Kelly G. (C. Whitehead) lost
Time—2:26¾.

CLOSE OF HARTFORD MEETING.

HARTFORD, Conn., Sept. 7.—There seldom has been a better day's sport in the history of Charter Oak Park than that offered this afternoon. It was not a good day for favorites, calculations being upset in three of five races, and in one of the others two heats were won before the favorite came to the front.

Remarkably good was the time in the trotting division of the Hartford Futurity for foals of 1902. Bon Voyage, which was the champion two-year-old last year, won it, although The Phantom was favorite, after Miss Wilkes' Katherine L. had been withdrawn. William A. Clark Jr., son of Senator Clark of Montana, owner of Bon Voyage, was an interested witness of his horse's fine performance. Harrison Wilkes was expected to win the first race of the day, the 2:12 trot, but he caused his backers much uneasiness in the first two heats.

The pacing division of the Futurity was Miss Adbell's by common consent and time was not fast for her. Bonnalet by Bonnie Direct was unfortunately distanced the first heat.

The \$500 for the nominator of the dam of the trotting futurity winner goes to Charles Warren.

Geers was expected to take the Nutmeg trot with Turley, that horse being a strong favorite in the betting, but Kid Shay had it easily from the first and Swift B. took second money. De Ryder was substituted by the judges for Hayden behind Roberta before the fifth heat of the 2:12 trot. The change made no difference. Summaries.

Trotting, 2:12 class, purse \$1000.
Harrison Wilkes, br. s. by Brignolia..... 3 2 1 1 1
Wilkes..... (Cox) 3 2 1 1 1
Gold Dust Maid, blk. m. (Geers) 2 1 7 4 2

Col. Henry, b. g. (Powers) 6 9 7 3 d
Brownie, br. g. (McCarthy) 8 7 5 8 d
Cafeeno, b. g. (Tyson) 7 4 6 dr
Time—2:10½, 2:08¾, 2:09, 2:09¾, 2:11¼.

September 8.—The favorite won in only one of three races at Charter Oak Park today. Lizzie G. disappointed her backers in the first race, the 2:15 trot, after taking two heats. The third heat was a close finish between the favorite and Jim Fenton and the general opinion of the grandstand was that Lizzie had won it and the race. The judges announced Fenton as the winner of the heat and that horse then went out and got the next two handily. Mainland was marked to win the 2:10 trot, but Thomas did not appear to drive her out until after Jim Ferry had taken two heats, and it was then too late. Ferry took the third heat after a sharp struggle with the favorite on the way to the wire. Nathan Straus was favorite in the free-for-all pace and he won rather easily, although Nervolo and John M. gave him a serious argument. Summaries:

Trotting, 2:15 class, purse \$1000.
Jim Fenton, b. g. by Henry F..... (McDewitt) 3 2 1 1 1
Lizzie G., blk. m. (A. P. McDonald) 1 1 2 4 2
Pat T., b. g. (Patterson) 2 3 3 2 3
Bowcatcher, b. g. (Brusie) 5 4 4 3 4
Betty Brook, b. m. (Tites) 4 d
Kitty Giltner, b. m. (Thomas) d
Time—2:12¾, 2:11¼, 2:10¼, 2:12¾, 2:12.

Trotting, 2:10 class, purse \$1000.
Jim Ferry, gr. g. by Orange Wilkes.. (Frank) 1 1 1
The Roman, b. g. (Roth) 3 2 3
Mainland, b. g. (Thomas) 4 5 2
Gracie Kellar, b. m. (Cox) 2 6 6
Harwood, b. g. (Saunders) 6 3 5
Thorn Boy, gr. g. (Patterson) 5 4 4
Choir Boy, gr. g. (Geers) d
Time—2:10¼, 2:09½, 2:09½.

Pacing, free-for-all, purse \$1500.
Nathan Straus, b. g. by Director..... (Thomas) 1 1
Nervolo, b. s. (A. P. McDonald) 3 2
John M., blk. g. (Cox) 2 5
Baron Grattan, b. g. (Geers) 5 3
Dan R., ch. g. (Benyon) 4 4
Time—2:06, 2:06.

September 9.—Three races today ended the Grand Circuit meet at Charter Oak Park, and in two of the three early calculations in the betting were completely upset. With Tiverton drawn, the free-for-all trot went to Sweet Marie without argument, and apparently she had lots of speed to spare. George G. and McKinley divided second and third money.

There was another surprise in the 2:06 pace, which The Friend was expected to win easily. He sold at \$100 to \$25 for the field. He had no trouble in taking two heats. In the third he broke, but came into the stretch with a great stride, and King Direct beat him only by a nose. Again in the fourth heat The Friend broke and the race to the wire was between King Direct and Peruna, the last quarter being done in 30 seconds and the last half in 1:02. The Friend was driven hard to save his distance, and must have gone at a 0:23 clip to have gained on the leaders. In the final heat The Friend broke three times, but even at that was close up with King Direct at the finish. Summaries:

Pacing, 2:18 class, purse \$1000.
Inter Ocean, br. g. by Williams..... 6 1 1 1
Black Patchen, blk. g. (Hogan) 3 3 2 2
Billy S., b. g. (McCarthy) 2 5 4 1
Tommy Burns, b. g. (McCarthy) 7 4 3 3
Abuta, blk. g. (Thompson) 1 2 5 d
John Ball, b. g. (Brusie) 4 d
Little Jay, b. g. (Essery) 5 d
Time—2:12¾, 2:11½, 2:13, 2:13¾.

Pacing, 2:06 class, purse \$1000.
King Direct, blk. s. by Direct-Welcome..... 3 3 1 1 1
Bunker (Geers) 3 3 1 1 1
The Friend, blk. s. (Tyson) 1 1 2 3 2
Peruna, b. g. (Murphy) 2 2 3 2 3
Time—2:07¼, 2:06¾, 2:05¾, 2:07¼, 2:10¾.

Trotting, free-for-all, purse \$2000.
Sweet Marie, b. m. by McKinney (A. P. McDonald) 1 1
McKinley, b. g. (Benyon) 3 2
George G., b. g. (Geers) 2 3
Time—2:07½, 2:08½.

NOTES AND NEWS.

Tulare entries close October 1st. The full program appears in our advertising columns.

Sweet Marie is all right again and is the same saccharine trotter she was last year, and ready to meet all comers.

Harry Stimson heads the list of winning drivers on the Grand Circuit.

Chas. Whitehead heads the list of running drivers on the California circuit this year.

Canada, as a winter resort for trotters and pacers, is coming to the front.

Capt. Tom Merry of Los Angeles and his better half passed through San Francisco last week on their way to Lake Tahoe for a little outing.

Chas. David, whose in former years teamed many a trotter and pacer on the California circuit, is now located at Honolulu and is handling the ribbons over a pair of horses in the Honolulu Fire Department.

The totalisator was used at the San Francisco Driving Club's meeting September 9th and met with great favor. The mutual system of betting is the best ever devised and should be in use on every race track. When there was no other system of betting in Montana but the mutual, racing flourished and was largely attended. When the syndicate book was introduced racing was killed there in a short time.

Over \$5000 in purses will be offered by the Tulare Fair Association for its meeting in October.

McKinney has about seventy standard performers in the list, with a greater proportion of fast ones than any other sire.

The Grosse Pointe race track at Detroit was sold last Monday for \$160,000 to foreclose two mortgages held on it. L. A. Cella, the St. Louis bookmaker, was the purchaser and it is probable that an effort will be made to hold several months of running racing over the track each year.

Mr. Grove P. Ayers of this city claims the name Queen of Hearts for a very handsome filly by Cupid 2:18 (brother to Sidney Dillon) dam Lady by Alex Button. The filly was foaled April 7th this year and is entered in the Pacific Breeders' Futurity.

Lonzo and The Zoo, two three-year-old trotters by Zombro, worked a mile together last week in 2:23½, the last half in 1:08.

Major Delmar trotted two heats to wagon at the Chicago Inter-City matinee. They were in 2:05½ and 2:05¾—wonderful time for that heavy track.

The statement made that the Bank of Concord has foreclosed its mortgage on the new fair grounds at Concord needs qualification. While it is true the mortgage has been foreclosed, it was only a process of law to secure a clear deed to the property. Some twelve or fifteen of the citizens of Concord and vicinity have put up the money for the indebtedness, and intend spending two or three thousand dollars more on improvements as soon as the necessary time expires after the foreclosure, or sooner if they can reasonably secure the right of equity in the property. The Concord track will soon be a popular training ground for horsemen, as it is the intention of the new owners to keep it in first class shape.

Hollister's race meeting will open one week from next Wednesday. The Hollister track is in fine shape and some good racing should be held.

James M. Fletcher of the Dunham, Fletcher Co. of Wayne, Illinois, has a dozen fine stallions of the Percheron, Belgian and French Coach breeds at Woodland. These horses were exhibited at the State Fair last week and took eight first, four second and one third prize.

A match race between the pacers Lady Lemo by Memo, and Dell Wilkes by Del Norte came off over the Salem, Oregon, track on Friday of last week. Lady Lemo won in straight heats, time 2:23¾, 2:22. Lady Lemo's dam is owned by F. E. Alley of Roseburg, Oregon. Her dam is Katie Lee by Rockwood.

Six \$1000 stakes to be trotted and paced at the Arizona Territorial Fair will close November 1st, but if you enter before that time, records made between the date of entry and the date of closing will be no bar. See the advertisement in this issue.

H. S. Hogoboom has again leased the stallion Iran Alto 2:12¾ from his owner, James W. Rea of San Jose for the season of 1906, and will keep him at Woodland, where he made a very successful season this year. Iran Alto is one of the best bred stallions living, and is siring extreme speed with great uniformity.

J. W. and Willard Zibbell turned Adam G. 2:11¼ over to Will Durfee after the latter drove the McKinney gelding to victory at the State Fair on Friday of last week. Durfee shipped him to Los Angeles with his string after the fair and will race him on the Southern California circuit.

Mr. C. B. Fagnant of Stockton, who is an experienced and perfectly reliable horseman, will go East about October 1st and will personally attend to the shipment and care of horses or other stock to Eastern points at that time. Parties desiring to ship stock East should confer with Mr. Fagnant at Stockton without delay. He can furnish the highest references.

Little Babe the Bradtmoor mare is not dead as reported. It was a mare called Black Babe that passed in her checks at Santa Rosa. Little Babe, by Bradtmoor, is still in the land of the living, we are pleased to state, and was a starter in the 2:24 class trot on the last day of the State Fair at Sacramento.

Bonnalet and Bonnie Mc, both by Bonnie Direct, were starters in the pacing and trotting divisions of the Hartford Futurity, which were decided at the meeting at Charter Oak Park last week and both were so unfortunate as to be distanced the first heat of their races. These three-year-olds have both worked in time as fast as the heats in which they were distanced.

An Eastern paper says: Lord Belfast, one of E. D. Jordan's prize winning carriage horses, is pointed out by the secretary of the Hackney Horse Society as being "bred in the best strains of the hackney breed and as near a perfect specimen of the type as exists." Unless M. F. Ware, S. N. Hexter and other horsemen are much mistaken, Lord Belfast is not a hackney at all, but a native American trotting bred horse formerly shown as Adonis and shipped to England or Ireland, where his breeding as well as his name seems to have been changed before Mr. Jordan reimported him.

The beautiful residence and grounds at San Mateo owned by the late Alvinza Hayward have been sold to a syndicate for \$225,000. The place contained 110 acres and had one of the finest private mile training tracks in California. The residence will be remodeled into a hotel and the property cut up into building lots.

The Broncho paced another wonderful race at Galesburg, Illinois, last Friday. There were four heats in the race and she won the final mile in 2:03½. A break cost her the second heat.

The American Sportsman of Cleveland says. "Last winter A. C. Pennock purchased from the Two-Minute Stock Farm a pacing filly by Star Pointer, out of Javelin 2:08¾. After Mr. Pennock had worked this filly long enough to demonstrate the fact that she had speed she was sold and went into Vance Nuckols' stable. She was worked along nicely and last week she was given a try-out and stepped the track, finishing easy in 2:09¼. She is a very handsome, substantially-made filly and when matured will no doubt prove to be another sensational performer for Star Pointer." Javelin was bred in California and is by Creole 2:15, dam the great brood mare Flush by Egmont, the granddam of that high class two-year-old colt McFadyen by Diablo.

A Cleveland, Ohio, paper says: "The trotting mare Italia by Zombro is proving the confidence of her many friends by demonstrating the fact that she is a race mare of the highest quality. A good many thought that she did not have much class as a race mare after her showing in the M. and M. last year at Detroit. She was not in condition at the time of her start at Detroit and she came back to Cleveland, was turned out and bred to John A. McKerron 2:04½. She did not prove to be in foal and late this spring was placed in Doc Tanner's stable. She worked there, being given a gradual preparation, and was sent to Vance Nuckols recently to race over the half-mile tracks. She has shown herself to be a good game race mare and on Tuesday of this week won at Watertown, N. Y., stepping the second heat in 2:14½. She is well mannered and likes to race. She will join the Grand Circuit later and if she retains her present form will trot in 2:10."

Dan Redmond of San Jose writes us that he has sold the McKinney stallion Willeroo 28,021, advertised in the Breeder and Sportsman last month, to Mr. J. G. Fancher of Indiana, who shipped him to the Hoosier State on the 3d instant. Willeroo is not only a well bred stallion, but his foals are very promising. He was formerly owned by Mr. Frank H. Burke of this city and showed a very high rate of speed as a colt, but met with an injury to one of his ankles which prevented his racing.

"The bay colt, The Jester 2:15¾, a new standard trotter for Stam B 2:11¼, son of Stamboul 2:07½, is reported as being an own brother of Swift B 2:12¼. The Jester is owned by J. W. Miller of Colorado Springs, Col."—Western Horseman. The Horseman's informant is mistaken. The Jester's dam is by Silver Bow 2:16 and is an own sister to The Arrow 2:14. Swift B's dam is Swift Bird 2:13¾ by Waldstein.

Albuta, Col. Kirkpatrick's hopped pacer, has three crosses to Electioneer. Probably it is the old Palo Alto aversion to the pacing gait that makes the hopples necessary in Albuta's case.

Dan Patch 1:56, the horse that eats International Stock Food, makes good oftener than any champion that ever started to beat Father Time. He is a wonder.

If a mile track suitable to hold a trotting meeting were located in San Francisco or Oakland, a meeting could be given that would dispel the delusion that harness racing will not draw a crowd in this locality.

The Arrow 2:14 by Silver Bow was one of the best types of carriage horses ever raised in California. We learn that he was purchased a year or two ago by Mr. McCreery of Burlingame, who docked and took him to England where the horse was sold for a thousand pounds, or about \$5000.

Talk about the iniquity of pool selling on harness racing! There was more money bet last year on the result of the vote for governor of Massachusetts than has ever been wagered on trotting and pacing races in that state in any one year. There is more money bet in this country on the result of presidential elections than on harness racing. It has been so from time immemorial and will continue to be so long as governors and presidents are elected.

The above is from a Boston exchange, and is all true. The reason there is but little outcry against betting on election results is because they are not held every week day. There has never been any particular crusade against betting on trotting races. It is the continuous running meetings that make pool rooms on every block and if the runners only held the stage one or two weeks in the year at each track the majority of the anti-betting laws which are among the statutes of so many states would never have been heard of.

The Kenney Manufacturing Company at 513 Valencia street, this city, is the only establishment on this coast that makes a specialty of repairing tubular frame buggies, carts, sulkies and other vehicles. This company is coast agent for the celebrated McMurray Sulky and has sold more of these favorite sulkies on the coast this year than during the entire three years previous. The McMurray is a winner on all circuits.

A copy of the prize list, rules and regulations of the Chicago Horse Show has been received. The prizes are very liberal and should attract many entries. Trotting bred stallions are given \$150 for first, \$75 for second and \$50 for third in the breeding class and in the racing class the prizes are the same except the second which is \$100. The show opens October 23d and continues during the rest of the week.

Rain every day during the first half of the week prevented racing at the Syracuse, New York, Grand Circuit meeting.

On the opening day of the Minnesota State Fair at Hamline, Dan Patch paced a mile in 1:59½, a splendid performance for the champion, as it was his first time out this year, and the track was not fast. On the same day his son Ed Patch won the 2:30 class pace in 2:12, 2:12½ and 2:13.

It looks as though Demonio 2:11¼, own brother to Diablo 2:09¼, might out sire that great progenitor of extreme speed. There have been but very few of his get, but they have invariably shown wonderful speed at either pace or trot. The Sioux Republican of last week says: "During the present racing season Mannie Reams, the trainer, has taken Nordwell, a three-year-old colt by Demonio, to the different tracks to keep up his training. The colt has attracted the attention of many of the horsemen, Will Durfee, California's crack reinsman, being particularly interested. A week ago last Saturday Mr. Durfee was given permission to make a test of Nordwell's speed for half a mile, with the result that the distance was covered in the remarkable time of 1:02½, second quarter in 31 seconds and last eighth in 141-5 seconds. The young horse is very game and his showing of speed makes him a great prospect for next season. Nordwell has been in training since April 4th of the present year, this date being the first time he ever set foot on a race track. We have it upon reliable authority that Muzzy has been offered \$2000 for Nordwell."

The dam of Tiverton 2:04½, the greatest race gelding among trotters, is owned at Joplin, Mo., by W. H. Hahnen. This mare, Folly, by Arragon 4696, is also the dam of Miss Leo Rex 2:15½, and Van Hart 2:20½, both trotters.

A very handsome brood mare by the Morgan horse Black Ralph 10 687, and in foal to Lynwood W. 2:20, is advertised for sale by a Santa Rosa party. She has a very handsome filly by Lynwood W. at foot and the price asked for the mare and foal is very reasonable. See advertisement in this issue.

The Yuba and Sutter Driving Association has decided to hold a three days' race meeting at the Marysville track in October. The program will be out soon and a general invitation is extended to all horsemen to enter.

It is announced that the next Year Book will contain a list of all producing mares, and the old table of 2:30 trotters and 2:25 pacers will be restored. This is the best news that has been given out for some time, and if the announcement proves true the sales of the Year Book should double.

W. R. Janvier of New York has shipped to his friend, Mr. Crommelin, Haarlem, Holland, the richly-bred young mare, Baroness Zelda, by Baron Wilkes, dam Zelda, in the great brood mare list, by Dictator 113; second dam Neilson 2nd, in great brood mare list, by Almont 33; third dam Neilson, in great brood mare list, by Imported Sovereign; fourth dam Neva, in great brood mare list, by thoroughbred Vincente Nolte, with a magnificent colt at her side, by Admiral Dewey 2:06¾, and bred this season, and in foal to Royal Swell. This is about as richly a bred colt as has yet been exported to Europe.

THE GOLD CUP RACE.

The greatest amateur event on the trotting track is the race at the annual Inter-City Mat'nee for the \$5000 gold cup. It was won this year at Chicago by the Pittsburg Club's representative, Dr. Strong 2:06, and the race is described in the American Sportsman as follows: The starters were Dr. Strong, Tom Axworthy, Aerolite and Prince of Orange.

Tow Axworthy showed up quite lame and every horseman who saw him score felt he could not win. There was considerable scoring before the go. At the start Mr. Billings took Prince of Orange out in front. The handsome trotter moved along with Aerolite to the turn, the mare having the pole, but the Prince took the track before the quarter was reached. Dr. Strong moved up to Aerolite around the turn, and the three were pretty well bunched at the quarter in :33¼. Down the back stretch the Prince let out a link and had the track, but going around the upper turn Dr. Strong moved past Aerolite and was only a length behind the Billings horse. As they turned into the home stretch Dr. Strong came along in the middle of the track with a powerful stride that even at that stage made him look like a winner. Mr. Billings drove a magnificent finish with the Prince of Orange, hugging the pole and keeping the horse on his stride. But the Prince was tiring, and at the short distance he broke and fell back, enabling Aerolite to slip into second place, Dr. Strong winning by two lengths, eased up, in 2:09¼.

In the second heat Mr. Callery took no chances. He sent Dr. Strong to the front on the first turn and was never headed. Turning into the back stretch Mr. Jones began making a wonderful drive with Tom Axworthy. He quickly passed Aerolite and took after the pair in front. Dr. Strong was at the half in 1:06½, and at that point Axworthy was at least six lengths behind him. On came Dr. Strong with unabated speed, but in spite of all he could do the lanky roan gelding gained on him. Down the home stretch it was still Dr. Strong in front and Prince of Orange second, but beaten. Tom Axworthy was gaining all the time, but the distance was too great to be overcome, and the best he could do was to nose out Prince of Orange for second place, Dr. Strong winning in hand in 2:09. He trotted the last half in 1:02½ and did it easy. Then the Pittsburg Club went wild and Mr. Callery received a great ovation. Mr. Pickering, the owner of Dr. Strong, was probably the happiest man.

BEST RECORDS OF THE YEAR.

Trotters.

Two-year-old colt—Ed Custer by Baronmore 2:14¼, dam Marble 2:14 by King Clay.....2:19¼
Two-year-old filly—Noma by Walnut Hall 2:08¼, dam Miss Wooliver by Robert McGregor.....2:19
Three-year-old gelding—North Star by Nutwood Wilkes 2:16¼, dam Ivaneer 2:27 by Eugeneer.....2:13¼
Three-year-old filly—Katherine L. by Liberty Chimes 2:22¼, dam Gismonda by Gregory the Great.....2:12¼
Four-year-old colt—Fatty Felix by Constantine 2:12¼, dam by Ponce de Leon.....2:14
Four-year-old mare—Totara by Bingen 2:06¼, dam Nowaday 2:14¼ by Lookaway 2:22¼.....2:16¼
Aged stallion—Admiral Dewey by Bingen 2:06¼, dam Nancy Hanks 2:04 by Happy Medium.....2:06¾
Aged mare—Sweet Marie by McKinney 2:11¼, dam Lady Rivers by Mambrino.....2:04¾
Aged gelding—Tiverton by Galileo Rex 2:12¼, dam Folly by Arragon.....2:05½
Green stallion—Boreabelle by Boreal 2:15¾, dam Luzelle 2:15½ by Patron.....2:10
Green mare—Deloree by Delmarch 2:11¼, dam Hindie by Allerton.....2:09¼
Green gelding—Adam G. by McKinney 2:11¼, dam Nona Y. 2:15 by Admiral.....2:11¼

Pacers.

Two-year-old gelding—Rockaway by Stoneway 2:23¾, dam untraced.....2:15¼
Two-year-old colt—McFayden by Diablo 2:09¼, dam Bee by Sterling.....2:15½
Three-year-old filly—Mona Wilkes by Demonio 2:11¼, dam Trix by Nutwood Wilkes.....2:11¼
Three-year-old colt—John Kirby by Allerton 2:09¼, dam Matilda 2:30 by Nutwood.....2:13¼
Four-year-old stallion—Cresco Wilkes by Nutwood Wilkes 2:16¼, dam Allie Cresco 2:13¼ by Cresco.....2:10¾
Four-year-old mare—Doris B. by Grattan 2:13, dam Edith Zell by Strathroy.....2:07½
Four-year-old gelding—Directwood by Direct 2:05½, dam Dolly Fort 2:28¼ by Lee Wood.....2:08¼
Aged stallion—Locanda by Allerton 2:09¼, dam Katherine by Alcyone.....2:05
Aged mare—The Broncho by Stormellife, dam Luxora by Autocrat Jr.....2:03¼
Aged gelding—Baron Grattan Ly Grattan 2:13, dam Mary Gamaleon by Camaleon.....2:04¼
Green stallion—Walter Direct by Direct Hal 2:04¼, dam Ella Brown 2:11½ by Prince Pulaski Jr.....2:05¾
Green mare—Virginia by Bob Mason 2:27, dam by Grandee.....2:09½
Green gelding—Bollivar by Wayland W. 2:12½, dam by Harry Wilkes.....2:07¼

The blood of Robert McGregor 2:17½ is found in many of the season's fastest trotters, i. e., Snyder McGregor 2:06¼, Kld Shay and Robert Mc 2:08¾ being by sons, while Deloree 2:09¼, Katherine L. (3) 2:12¼ and Norman (2) 2:19, respectively the fastest "green" trotting mare, three-year-old trotting filly and two-year-old trotting filly, have each a close cross to "the monarch of the homestretch."

STATE FAIR A SUCCESS.

Sacramento Bee: The late State Fair was a success, from the standpoint of attendance, the character of the livestock and Pavilion exhibits and the racing, but whether the State Agricultural Society made any money is yet to be determined. The judgment of Secretary Albert Lindley and Financial Secretary L. R. Miller is that the Society will come out about even, with the possibility of a small amount on the right side of the ledger. Miller said today that it will be some time before the matter can be sifted down to one of dollars and cents, as is the case every year. It can not be told immediately upon the close of a fair what the exact condition of finances is.

He stated that the premiums for Pavilion exhibits had not been paid and that hundreds of bills against the society are outstanding. Some of the directors have paid bills out of their own pockets, and until returns have been made on all these it will be impossible to tell how the society really stands.

As far as the racing end of the fair is concerned there is no doubt that the race meeting just closed was one of the most successful given by the society in a decade or more. In view of the fact that this year the society received no revenue from the betting privilege, by reason of a legislative inhibition, the directors feel that the track did even more than was hoped for by the most sanguine.

Within the last ten years the revenue from the betting privilege has ranged from \$10,000 to \$12,000 annually, with \$17,500 as the big figure. This was the amount paid by George Rose ten years ago, when the Native Sons held their Admission Day celebration here.

Every horseman who won any part of the stakes or purses offered this year drew his money by 11 o'clock the day following. His money was in the keeping of the entry clerk at the park, and all he had to do was to present his demand and it was promptly paid.

For many years past horsemen have had difficulty in getting their money, and only recently the society paid racing claims which had been standing against it for many years.

This year admission to the Pavilion was free, and the society did not derive any revenue from this source. In lieu of this, it was entitled to a percentage of the receipts from the concessions located in the White City, adjoining the Pavilion, but it is understood that the patronage was not up to expectations, consequently the society's receipts will not be as great as anticipated. Until a settlement is had with the Native Sons the receipts from this source can not be determined.

HORSES IN CALIFORNIA.

C. A. Smithley, an Illinois gentleman who has been traveling in California, writes as follows to the Breeders' Gazette of Chicago: A prolonged visit through the great valley of San Joaquin river, which is located between the Coast Range and the Sierra Nevada, and comprises the best part of the State of California, enables one to write of its horses. It is a most beautiful valley and is devoted to stock-growing and farming. There are some fine ranches located here, the property of cattlemen mostly, but the country is more properly adapted to the horse, which is being most shamefully neglected. Here there are but few ranchmen who have more horses than are wanted for their personal use, and nine-tenths of them are common-bred broncos and not in demand at the prices of decent horses.

Good draft horses are in strong demand but are very scarce and will remain so for years to come because of the scarcity of good breeding stock, the prices of which are high also. The people here are not educated to know the value of the well-bred horse as they are in the East. I have seen many herds of horses in this state in the past three months, but only one first-class stud of heavy draft horses.

There are many large companies located here which use many horses in heavy work in the lumber yards and mills and they have some very nice teams, but most of these horses are ill bred ones that happen to have size. Such horses are in demand and bring from \$450 to \$600 a pair, while first-class ton horses in San Francisco will bring \$800 a pair.

I am sorry to say that the coach horse is as scarce as the draft horse and would, if he could be found, sell for long prices, but he is not here to be had and the rich people drive all kinds of teams in their carriage service, good, bad and indifferent as they happen to be. The rich people are able and willing to pay for good teams, but they are obliged to take what they can get and be satisfied. They have some trotters here that are up to date, also some Thoroughbreds that are very fine, but the draft and coach horses are neglected shamefully and that with the demand in excess of the supply.

Ranchmen, however, are beginning to see the conditions and are thinking it is time to do something to meet them, but they are at a loss to know where they will get breeding stock of the kind that will produce horses to fill the bill. I predict that in a few years this great valley will be dotted with herds of fine horses.

The land is naturally adapted to stock raising and horses can be fed here as cheaply as they can anywhere in the world. The grass grows the year round and alfalfa flourishes as it does nowhere else. It can be cut six and seven times annually under favorable conditions and all I see in the way of horses here is that the people are satisfied to breed what they have rather than to pay the prices of good breeding stock. Another reason for this condition being so common is the very small expense connected with feeding horses.

El Milagro by McKinney won a heat in 2:12½ at Hartford in the 2:12 trot.

FAMOUS COWS FOR PORTLAND STOCK SHOW.

PORTLAND, Sept. 10.—Fair Queen, champion of many fairs, and, as a cow which has never been beaten, entitled to rank as one of the greatest show cows living, is entered in the Shorthorn class at the stock show which is to be held at the Lewis and Clark Exposition from September 19 to 29. Fair Queen took championship honors at the World's Fair at St. Louis last year, and also at the International Live Stock Shows held at Chicago in 1903 and 1904, and at the American Royal Show at Kansas City in the same years. She is the holder of various premiums won at leading State fairs all over the country.

"In the Shorthorn show the class of cattle will be the highest in the United States," said M. D. Wisdom, livestock superintendent at the Exposition. "It will be a show of great quality and one that people cannot afford to miss. The Shorthorn show in general will be equal to any show ever held in America of this breed of cattle."

"In the Holstein class," continued the superintendent, "The Hazelwood Farm Company of Spokane has entered 20 head of show stock chosen from 70 head which the company purchased in Wisconsin. These are the best of the class to be found. They will compete against the world's champion herd of the Pierce Land and Stock Company of California, a herd which is without question the finest in the world. The Pierce Land and Stock Company imported 40 head from Holland last year and the bull that heads the herd is one of the importation. He is considered the finest bull of the breed living today. Besides these two herds, John B. Irvin of Wisconsin, who won at St. Louis last year, and P. A. Frakes of Oregon, who also owns some St. Louis prize winners, will show at the fair."

"In Jerseys there will be shown a fine and select herd from the Hazel Fern Farm, owned by the W. S. Ladd estate. This is one of the finest herds of Jerseys in the world, and the stock sent to the show ring will be the very finest specimens of the breed procurable anywhere. In competition with the Hazel Fern herd will be the herd of Dr. Still of Missouri, which was prominent among first prize winners at St. Louis last year, and which has been recuperated in size and merit. Besides these two there will be a number of local herds of quality, including those of Harry West, D. H. Looney, A. C. Martin, B. Altman and Atkinson Brothers, all of Oregon. In sheep, swine and goats all the prominent breeds will be represented by the finest type of animals."

The sheds for the stock show on the Government Peninsula at the Exposition are nearing completion. They are of improved style, in every way adapted to the purpose. Everything will be in readiness for the stock show several days before September 19, the opening day, and prospects are good for a remarkably large attendance from Pacific Coast states.

SAN FRANCISCO DRIVING CLUB.

The San Francisco Driving Club gave a program of five races at Ingleside track on Saturday last. The totalisator was used for the betting and met with much favor from the crowd. All the tickets were used up before the last race so the machine could not be used for that event. The bettors voted this system, which is the same as the pari mutuel, satisfactory in every way and a great improvement over the syndicate book. The results were as follows:

First race, 2:30 class, first heat—Won by Dynamite, Dan Alden second, Joe Mc third. Second heat—Won by Dynamite, Joe Mc second, Dick third. Time, 2:26, 2:27¼.

Second race, 3:00 class, first heat—Won by Dexter Wilkes, Chatterbox second, Lulu F. third. Second heat—Won by Dexter Wilkes, Bay Ike second, Lulu F. third. Second money divided between Chatterbox and Bay Ike. Time, 2:27, 2:33¼.

Third race, free for all, first heat—Won by Charlie J., Walter Wilkes second, Kitty D. third. Second heat—Won by Flora G., Kitty D. second, Charlie J. third. Winners of race, Flora G. first, Charlie J. second, Kitty D. third. Time, 2:23, 2:23½, 2:22½.

Fourth race, 2:25 class, won in straight heats—King Cadanza, first, Verona second, Grace McKinny third. Time, 2:24¼, 2:25½.

Fifth race 2:40 class, won in straight heats—Moffitt D. first, Ed Ray second, Senator Hurst third. Time, 2:30, 2:25.

Betting on horse races at the tracks where the racing is held is not permitted in San Francisco except during a limited period or by special permit, and yet there is hardly a cigar stand in the whole city where a foreign book is not run every day in the year.

DISTEMPER READILY CURED.

The class of diseases coming under the head of distemper, epizootic, pinkeye, etc. doubtless directly or indirectly cause more loss to stock owners than all others. How important it is, therefore, that no one overlook a prompt and certain cure for these ailments. Craft's Distemper and Cough Cure advertised in another column, has been so long on the market and so widely used that there seems to be no doubt that it has really remarkable properties. Further it is sold under a guarantee to refund the money if it fails. The proprietors, The Wells Medicine Co., 13 Third St., Lafayette Ind. offer to send to any reader of the Breeder and Sportsman a copy of their latest pamphlet "Veterinary Pointers." A tie from the full information it gives about this remedy, the pamphlet is valuable for the general information it gives in regard to diagnosing and treating diseases of stock. Write for it before you forget it.

"TEN YEARS EXPERIENCE."

Mr. A. B. Jones, Veterinary Surgeon at Lamont, Iowa, writes as follows: "I desire to inform you that I have been using Quilon's Ointment for the last ten years with the greatest success. For removing curbs, splints, sprains, and other blemishes more than pleased with its work." This is the general expression of leading horsemen everywhere. For curbs, splints, sprains, and all enlargements give Quilon's Ointment a trial. Price One Dollar per bottle, delivered. Satisfaction guaranteed. Address Dr. H. Eddy & Co., Whitehall, N. Y., if you cannot obtain from drug-list.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

Coming Events.

Rod.

April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steel-head in tidewater.
April 1-Sept. 15—Closed season for lobsters and crawfish.
April 1-Nov. 1—Trout season open.
June 1-Jan. 1—Open season for black bass.
Sept. 10-Oct. 16—Close season in tidewater for steelhead.
Sept. 10-Oct. 16—Close season for catching salmon.
Sept. 16—Saturday Fly-Casting Contest. Re-entry. Stow lake, 2:30 p. m.
Sept. 17—Sunday Fly Casting Contest. Re-entry. Stow lake, 10 a. m.
Oct. 16-Nov. 15—Close season for taking salmon above tide water.
Nov. 1-Sept. 1—Open season for crabs.
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

Feb. 15-Sept. 1—Closed season for mountain quail, grouse and sage hen.
Feb. 15-Oct. 15—Closed season for quail, ducks, etc.
April 1-Oct. 15—Closed season for English snipe.
July 1-Feb. 15—Dove season open.
Aug 1-Oct. 15—Deer season open.
Sept. 10, 24—Santa Rosa Gun Club. Blue rocks.
Sept. 15, 16, 17—Interstate shoot. Blue rocks. Ingleside. Elmer E. Shaner, Manager. Pacific Coast Handicap under auspices of S. F. Trapshooting Ass'n., A. M. Shields, Secretary.
Sept. 17—Mount View Gun Club. Blue rocks. Mount View, Cal.
Sept. 17—Petaluma Gun Club. Blue rocks. Kenilworth Park.
Sept. 24—Millwood Gun Club. Blue rocks. Mill Valley Junction.
Sept.—Sebastopol Gun Club. Blue rocks. Every Sunday.
Sept.—Napa Gun Club. Blue rocks. Every Sunday.
Sept.—Vallejo Gun Club. Live birds. Fiosden Station.
Sept. 24—Union Gun Club. Blue rocks. Ingleside.
Sept. 30-Oct. 1—Two-day blue rock tournament. Biggs Gun Club. Biggs, Butte county. H. Haselbusch, manager.
Oct. 1—Pacific Coast Trap Shooters' Association. Merchandise shoot. Blue rocks. Empire Club grounds, Alameda Junction.

Bench Shows.

Sept. 11, 13—Newport Dog Show. Newport, R. I. Francis M. Ware, Secretary.
Sept. 16—Englewood Kennel Club. Englewood, N. J. M. W. Robinson, Secretary.
Sept. 18, 21—Genesee County Agricultural Society Kennel Club. Batavia, N. Y. A. E. Brown, Secretary.
Sept. 23—Madison Athletic Association. Madison, N. J. E. L. Jones, Secretary.
Sept. 25, 26—Miami Valley Kennel Club. Plqua, Ohio. Edwin A. Hlatt, Secretary.
Sept. 27, 28—Valley Fair Kennel Club. Brattleboro, Vt. Howard C. Rloe, Secretary.
Sept. 28, 29, 30—Stockton Kennel Club. Chas. Heffernan, Secretary, Stockton, Cal. D. J. Sinclair, Superintendent.
Sept. 30—Bryn Mawr Kennel Club. Haverford, Pa. Henry D. Riley, Secretary.
Oct. 3, 6—Texas Kennel Club. Dallas, Tex. W. H. Ordway, Secretary.
Oct. 3, 6—Danbury Agricultural Society, Danbury, Conn. G. M. Rundle, Secretary. Jas. Mortimer, Superintendent.
Oct. 11, 14—Spokane Kennel Club. Spokane, Wash. A. B. Jackson, Secretary.
Oct. 17, 20—Frederick Agricultural Society. Frederick, Md. J. Roger McSherry, Secretary.
Nov. 15, 18—Boston Terrier Club Specialty Club. Boston. F. H. Osgood, Secretary.
Nov. 28-Dec. 1—Philadelphia Dog Show Association. Philadelphia. J. Sergeant Price Jr., Secretary.

1906.

Feb. 12, 15—Westminster Kennel Club. New York. Robt. V. McKim, Secretary.
Feb. 20, 23—New England Kennel Club. Boston. Wm. B. Emery, Secretary.
Feb. 23-March 3—Washington Kennel Club. Washington, Pa. F. C. Thomas, Secretary.
March 7, 10—Duquesne Kennel Club. Pittsburg, Pa. F. S. Steadman, Secretary.

Field Trials.

Sept. 6—Manitoba Field Trial Club, 19th annual trials. La Salle, Man. Eric Hamber, Secretary, Winnipeg Man.
Sept. 11—Northwestern Field Trial Association. Inaugural trials. O'Neill, Neb. C. W. Buttes, Secretary, Kansas City, Mo.
Sept. 21—British Columbia Field Trial Club, 3d annual trials. Ladner, B. C. H. S. Rolston, Secretary, Vancouver, B. C.
Oct. 12—Pacific Northwest Field Trial Club. La Conner Flats, Wash. Chas. L. Lundy, Secretary, Seattle, Wash.
Oct. 23—Ohio Field Trial Association. Washington Court House, O. C. T. Phillips, Secretary, Columbus, O.
Oct. 30—American Field Futurity Stake. For Pointers and Setters whelped on or after January 1, 1904, whose dams have been duly qualified. Robinson, Ill., entries closed July 1. Address Am. Field Publishing Co., Chicago.
Oct. 31—Connecticut Field Trial Club. Hampton, Conn. F. M. Chapin, Secretary, Pine Meadow, Conn.
Nov. 6—Independent Field Trial Association. Huntsville, Ill. S. H. Socwell, Secretary, Indianapolis, Ind.
Nov. 8—Dayton Pointer Club. Dayton, O. John Roehm, Secretary, Dayton, O.
Nov. 13—Illinois Field Trial Association. Robinson, Ill. Wm. R. Green, Secretary, Marshall, Ill.
Nov.—Indiana Field Trial Club, (Week following Illinois Champion Stake). C. F. Young, Secretary, Clay City, Ind.
Nov. 21—International Field Trial Club. Ruthven, Ont. W. B. Wells, Honorary Secretary, Chatham, Ont.
Nov. 28—Virginia Field Trial Association. Martinsville, Va. Jhas B. Cooke, Secretary, Richmond, Va.
Dec.—Pointer Club of America (following the Continental trials). Barber, N. C. C. F. Lewis, Secretary, 136 Maiden Lane, New York.
Dec. 2—Continental Field Trial Club, 11th annual trials. John White, Secretary, Hempstead, Long Island.
Dec. 12—Eastern Field Trial Club. Waynesboro, Ga. S. C. Bradley, Secretary, Fairfield, Conn.

1906.

Jan. 8—Georgia Field Trial Association. Waynesboro, Ga. P. M. Essig, Secretary, Atlanta, Ga.
Jan.—Pacific Coast Field Trials Club, 23d annual trials. Bakersfield, Cal. Albert Betz, Secretary, 201 Parrott Bldg., San Francisco.

Jackson's Napa Soda untangles the feet.

THE CONVERTED NATIVE.

"Yer kain't ketch nothin' 'ith them 'ar things. Huh! yarn fer bodies an' feathers fer wings—Yer must think the trout is terrible fools Ter be ketched 'ith sech outlandish tools.

"An' look at thet pole—that won't do; A good big trout would bust it in two, An' never think nuthin' uv what he did; Quick as lightnin', away he'd skid.

"Wa'al—I'll de darn, yer kin shoot me dead Ef thar haint a win'lass filled 'ith thread. An' ther littlest sort uv thread at that—Why, man, that wouldn't hold a gnat!

"Yaas, thar's a good place over thar, Under ther rapids, deep an' char; Yer'd better take wurruns an' a hick'ry pole Er yer won't ketch nothin', 'pon my soul."

* * * * *
Forty-five beauties, spotted bright, Osier creel held ere fall of night. He counted them o'er in their shrouds of fern, All that he could say was, "Wa'al—I'll be darn!"

ORIGIN AND PRODUCTION OF FISHING GUT.

An interesting paper on fishing gut—its history from the silkworm egg to the thread of the worm and its preparation for angling, with methods of treatment and use—was read before the Gresham Angling Society, London, by the Honorable Secretary, Mr. F. E. Eldred, March 21st, 1905. In the main the author has sought his information from English importers, and particularly from Mr. S. Allcock, of Redditch, one of the oldest tackle manufacturers in England. His deductions are correct as a rule and his personal views have the value that they are those of a prominent angler whose experience has been broad and deep, wherever the strand of silkworm gut is used in his native waters. The paper was originally published in the Fishing Gazette and the author says:

The silkworm moth lays a number of eggs, from 250 to 300, on the leaves, generally mulberry, which are the food of the grub when hatched. These eggs, which somewhat resemble spiders' eggs, are hatched by the sun's heat, and when the grub emerges it is about a quarter of an inch in length, and looks like a small black worm. It at once commences to feed, and in from eight to ten days it casts its skin and assumes a greyish color. This operation over, it continues to feed, and in five or six days it moults a second time, and after five more days, moults a third time. In the intervals between these processes it grows considerably, and when it moults for the fourth and last time, it has grown to be from one and a half to two inches in length, and is now a perfect caterpillar. Ten days later it searches for a convenient place where it can form its cocoon, and for this purpose it mounts upon, and attaches itself to twigs by a number of fine filaments of silk.

Naturally, in the silk and silkworm gut-producing districts of Spain and Italy, every care is taken to assist the little creature, both in providing it with food and shelter, and in forming for the caterpillar layers of branches and twigs to which it can attach its cocoon. It is at this point that further development is arrested if it is to produce silkworm gut. If, however, it is to produce silk, it is allowed to form its cocoon, which it does by spinning around itself an oval-shaped dwelling; this operation takes four days. When the cocoon is finished it smears the inside with a silky kind of gum from its spinnerets. This hardens, and its house is made waterproof. During the whole operation of forming its cocoon it is gradually undergoing a change, and this change continues until it has become a more or less rounded ball, somewhat elongated, and covered with a smooth, shell-like skin. It is to all appearances dead, and is now termed a chrysalis. If left to itself, in about ten days it changes into a moth, and works its way out of its cocoon by ejecting from its mouth a liquor which dissolves the gum lining its dwelling, and then with its head and hooked feet it pushes its way through its silky envelope, and emerges as a perfect moth, and thus the cycle of changes is complete. It is curious to note that the animal never dies—only a series of metamorphoses go on, by which, apparently, distinct forms of life are assumed.

Now, to turn to the stage where its development is arrested, if it is to produce silkworm gut, and to us, as anglers, the most interesting. As most of the silkworm gut is obtained from Spain, Murcia being the center of the industry, it would perhaps be as well to follow the modus operandi which obtains there. The worms are bred by country people in their cottages, consisting of but two rooms on the ground floor. This industry is the sole occupation of the villagers near Murcia, and while some of them breed the worms, others perform the initial stages in gut making. A number of bamboo rods are tied together by the breeder, in order to form a bed from twelve to fifteen feet long by four feet wide, and raised about a foot from the floor of the room. On this bed are spread the worms, which are fed five times daily with mulberry leaves. Great care is taken to pick out all sickly worms, in order that only good, sound gut may be produced.

When the worms are ready to spin the cocoon, they creep upon branches of trees which are placed over the bed. They are taken off these branches, and are

killed by being put into vinegar, in which they remain for six hours, after which they are thoroughly washed in clean water. Girls take the worms from the water, break them in half with their fingers, exposing the one, two or three yellow sacs which each worm possesses. This is a delicate but very sickly operation, and great care is necessary in the handling of the worm. The ends of each sac are taken between the thumb and finger, and gently but firmly pulled out as far as the sac will go without breaking, considerable skill being required in drawing to keep the now elongated sac and contents as round as possible. The ends of the sac are secured, and the gut and its envelope placed so that they may dry and harden. Each strand when dry has a yellow appearance, the color being due to the surrounding sac, its shape being more or less round, and tapering more or less according to the care taken in drawing from one end to the other.

It is interesting to note that, even in worms of the same size, there is not the same number of sacs, some worms possessing one, others two, or even three sacs.

The strands tied up in bundles, are now turned over to the finishers, and their first operation is to remove the outer skin which surrounds the gut proper. This is done by steeping or boiling the gut in water to which is added some soap and soda. The skin is then easily removed by drawing through the fingers. The color is now a dirty white. It is now washed several times in clean water to remove all traces of soap and soda, and then bleached. This bleaching process may be performed by dampening and exposing the gut to the action of sunlight, or it may be chemically treated. The former process is the slower but the more natural and the safer way, though from inquiries which have been made, it is asserted that in the hands of a skillful operative no injury is done the gut by adopting the chemical method.

It has now a rather dull, certainly by no means, a shiny appearance, and it is, from an angler's point of view, quite a question whether it would not be better to omit the polishing process altogether. This polishing is performed by rubbing each strand (held by the teeth and hand) with wash-leather. It is now assorted according to length, strength and thickness into the various qualities, an operation requiring very great experience and judgment. It is now tied up in hanks of 100 and made up into bundles of 1000 or 10,000 and is ready for export. It is usually classified thus: Refina, very finest; Fina, fine; Regular, of a medium thickness; First and Second Padron, thick; Marana, Imperial and Hebra are very thick and strong, suitable for salmon fishing. All the above are undrawn, that is, they have not been through a drawing-plate to level them.

Drawn Gut.—In order to level the thicker and to make finer the finer qualities for the market, the strands are drawn through steel plates, or even through minute circular apertures in precious stones set in the drawing-plate. This makes the strands perfectly parallel throughout and perfectly round, at the same time compressing and slightly elongating them. Thus gut of any desired fineness is obtainable.

Staining.—This process is performed by the action of chemicals, and the question is what chemical can be used to give the desired shade and at the same time not injure the gut. In order to produce a neutral or slate color pounded lokwood is steeped in water, to which is added a small quantity of copersas, but great care and skill are required or the gut is spoiled.

The Keeping of Gut.—Opinions on this are very much divided and it would be presumptuous on my part to suggest, as some anglers do, that all gut should be discarded at the end of the fishing season and a new lot obtained at the commencement of another. Personally, I have found that gut, if properly stored—that is, placed where the light is excluded and where the temperature is even—will keep for several years without undergoing much diminution in strength.

Tying.—Into the question of knotting I do not propose to go, beyond remarking that whatever knot is used it should be as neat as possible and that the cast should be tested knot by knot and then in its entire length with such a strain that it is estimated the gut should bear.

In the discussion which followed much useful information was elicited and the following questions proposed:

1. Does drawing injure the gut?
2. Is it not a fact that nearly all, and all the finer sizes are drawn?
3. Does boiling, to rid it of the sac, injure the gut?
4. Is the gut fibrous or homogeneous?
5. Has it a second skin?
6. Does staining injure the gut?
7. Which colored gut is the least visible to fish, for example, trout?
8. Does gut deteriorate with keeping?

In order that definite information might be given in answer to these questions, it was agreed to adjourn the discussion, and after various authorities had been consulted, and a number of chemical, physical and microscopical experiments had been performed, the following results were obtained:

1. Does drawing injure the gut?

Drawing, when performed by an experienced workman, injures the gut very little, but it tends to produce a liability to fray with usage. It decreases the diameter, but it is found that taking strands of equal diameters the undrawn will support no greater weight than the drawn. In the undrawn sample the surface is smoother, as may be seen by comparing specimens of drawn and undrawn gut under the microscope. Minute roughnesses are visible on the surface of the latter and these roughnesses become accentuated in use and small fibers peel off, thus weakening the gut as the diameter decreases. These roughnesses are to some extent got rid of by polishing the gut, and this should be done by rubbing in one direction only, that is, with the fiber. This polish, however, is just one

of the things anglers do not require, as polished gut undoubtedly scares the fish. The principal reason why undrawn gut is not so dependable, size for size, as drawn, is that inferior qualities of undrawn gut are often drawn and appears to possess, except to the experienced eye, the same characteristics as undrawn gut.

The only remedy which the angler has is to purchase from firms which will guarantee that the quality is of the best. If this be done one may now and then get a weak cast, but the chances of this happening are minimized. It is the falsest economy to buy inferior qualities, in this, as in most things.

2. Is it not a fact that nearly all, and all the finer sizes are drawn?

From inquiries made of one of the largest gut importers in the world, there is no doubt whatever that nearly all the finer, and all the finest casts are made up from drawn gut which has passed through the drawing-plate a greater or less number of times. However, casts can be, and are, made from 5x drawn gut which will support a dead weight of one pound without breaking. A cast with less breaking strain than this would, in the hands of a skillful angler, be sufficiently strong to kill a trout of two or three times this weight.

3. Does boiling, to rid it of its sac, injure the gut? This depends largely on the manipulator. In the hands of a skilled workman no injury whatever results.

4 and 5. Is the gut fibrous or homogeneous? Has it a second skin?

Transverse and vertical sections placed under a high-power microscope show conclusively that the only skin the gut has is the skin of the sac, and this is only seen in the raw article. Microscopic investigation further shows, as one might expect from the evidence of frayed gut, that gut is fibrous, and not homogeneous throughout. The fibers, however, are very fine, and do not appear to be of any great length.

6. Does staining injure the gut?

The evidence on this point is that staining does more or less injure the gut, but in the hands of a skillful man, this injury is reduced to a minimum. To show how careful one must be a prominent manufacturer volunteered the information, that through some carelessness on the part of one of his employees over \$1000 worth of gut was spoiled.

7. Which colored gut is the least visible to fish, for example, trout?

There is no doubt whatever that gut which most approximates to water in color is the least visible to the eye of man, and probably to that of a fish. This color is a very light blue-green.

White gut, when placed floating on clear water, has a whiter appearance, where the water and gut touch, than gut of neutral tint.

8. Does gut deteriorate with keeping?

Definite information on this head is fortunately forthcoming. Gut may be kept several years if stored in a temperature of about 60 deg. F. in a room from which the light is carefully excluded, but it seriously deteriorates if kept in too warm a place. Mr. Allcock says: "You need not discard gut unless worn out by use. Keep it in wash leather in a drawer in your bedroom."

Whether soaking in certain preparations tends to increase the life of gut or not I am not prepared to assert or deny, as I have no experience on this point. I have tried soaking in glycerine, but I have not given it a sufficiently long trial to enable me to speak with certainty either one way or the other.

San Mateo Show.

The San Mateo Kennel Club second annual one-day open air show at the picturesque polo field of Chas. W. Clark, Esq., was voted, by the majority of the large crowd of visitors and exhibitors, to be a success in almost every respect.

The average quality of the dogs shown was good, particularly so in Fox Terriers, English Setters, Irish Water Spaniels, Cocker Spaniels, Collies, Bulldogs, Bull Terriers and Bostons.

The catalogue shows an entry of 239 dogs, thus making the show a three-point show.

Awards.

St. Bernards (rough coated)—Novice dogs—1 Murry's Tom, Jr., W. H. Lange. Limit dogs—1 Glenwood Booze, S. J. Ackerman; 2 Murry's Tom, Jr. Open dogs—1 Glenwood Booze; 2 Ch. Le King, W. C. Wallace. Winners dogs—1 Glenwood Booze; res Le King. Limit, open and winners bitches—1 Linda de Chamounix, Phil C. Meyer.

Great Danes—Limit dogs—1 Prince F., F. Schmitz; absent Monarch, Dr. S. de Albergeria. Open dogs—1 Nig, F. Schmitz. Winners dogs—1 Prince F., res Nig. Novice bitches—1 Zida, Dr. S. de Albergeria. Open and winners bitches—1 Ch. Princess Harlequin, Mrs. C. G. Saxe; 2 Tempest, A. Weeks.

Russian Wolfhounds (Borzoi)—Puppy dogs and bitches—1 Queen, Mrs. J. R. Keating; 2 Glenwood Ivan, Phil C. Meyer. Novice, limit and open dogs and bitches—Glenwood Ivan. Winners dogs and bitches—1 Queen; res Glenwood Ivan.

Greyhounds—Puppy dogs and bitches—1 Red Butterfly, J. C. Bradbury. Limit and open dogs—Absent Richard Anton, J. Sweeney; Roman Athlete and Flery Face, J. H. Rossiter.

American Foxhounds—Puppy dogs and bitches—1 Kentucky Maid, F. A. Hartmann; 2 Queen III, A. Krieps. Novice dogs and bitches—1 Ben Lomond, H. Rahn; 2 Queen III. Winners dogs and bitches—1 Ben Lomond; res Kentucky Maid.

English Foxhounds—Puppy dogs and bitches—1 Valron, San Mateo Hunt Club; 2 Wishful, San Mateo Hunt Club. Novice dogs and bitches—1 Claspall, San Mateo Hunt Club; absent Vagabond. Limit dogs and bitches—1 Philapens, San Mateo Hunt Club; absent Romulus. Open dogs and bitches—1 Rockwood, 2 Tragedy, San Mateo Hunt Club. Winners dogs and bitches—1 Rockwood, res Philapens.

Pointers—Puppy dogs and bitches—1 Santa Barbara

Ted, J. H. Richardson, 2 Queen, J. Duffey; 3 Bee III, S. C. Gunn. Novice dogs—1 Shotgun, G. Barraco; 2 Santa Barbara Ted. Limit dogs—1 Santa Barbara Ted. Open dogs (under 55 pounds)—1 Santa Barbara Ted. Open dogs (55 pounds and over)—1 Mason's King, H. M. Papst. Winners dogs—1 Mason's King, res Shotgun. Novice, limit and open (under 50 pounds) bitches—1 Bee III. Winners bitches—Withheld.

English Setters—Puppy dogs—1 Cato's Sir Easton, W. H. M. Pratt; 2 Duke's Mixture, G. Barraco; absent Cato's Major, Theo. D. Moiles. Novice dogs—1 Captain Courageous, N. Riplinger. Limit dogs—1 Mark P., P. C. Pulse; 2 Tirphil Rodney, Fred P. Butler. Open dogs—1 Cato's Judge, John M. Golobek; 2 Mark P.; 3 Mark, Wm. Larsen. Winners dogs—1 Captain Courageous; res Cato's Judge. Novice bitches—1 Lady Grace, G. Barraco; 2 Luella, T. Larkin; 3 Belle J., J. O. Jones; v h c San Jose Belle, A. J. Hogan. Limit bitches—1 Queen, G. Barraco. Open bitches—Absent Ch. Laura L., C. C. Lee. Winners bitches—1 Lady Barraco; res Luella.

Irish Setters—Novice and winners dogs and bitches—1 Prince Bruno, Chas. Kane.

Gordon Setters—Puppy dogs and bitches—1 Jim, Dr. J. J. Redmond. Novice dogs and bitches—1 Flora B., A. L. Holling; 2 Jackson, C. H. Randall. Limit and open dogs and bitches—1 Doe, A. Stuart. Winners dogs and bitches—1 Flora B.; res Doe.

Irish Water Spaniels—Puppy dogs and bitches—1 Dublin, Wm. Bay. Open dogs and bitches—1 Mike B., Wm. Bay. Winners dogs and bitches—1 Mike B.; res Dublin.

Field Spaniels—Open dogs and bitches—1 Judge Casey, J. R. Stewart; 2 Tip, Chas. Mish.

Cocker Spaniels (black)—Puppy dogs—1 Monte, Mrs. C. M. Numan; 2 Bobbie S., Jess L. Sanders; 3 Omo Boy, Mrs. Geo. L. Shane. Novice dogs—1 Dixie, Mrs. Chas. Herman. Limit dogs—1 Bobbie R., V. J. Ruh; 2 Sir David, D. P. Cresswell; 3 Major Domo, Mrs. Chas. Herman; res King Dodo, N. Macfee, v h c Glenwood Havoce, Phil C. Meyer; v h c Nig, Iuez M. Marion. Open dogs—1 Mepals Saxon, D. P. Cresswell; 2 Bobbie R.; 3 Major Domo; res King Dodo; v h c Nig; v h c Glenwood Havoce. Winners dogs—1 Mepals Saxon; res Bobbie R. Novice bitches—1 Floradono, Mrs. Chas. Herman; 2 Bella, Miss N. P. King; 3 Binba, Miss N. P. King; res Maud, Chas. Dresser; v h c Juno, H. Bowie; v h c Ruby Trip, Henry S. Brown. Limit bitches—1 Plumaria Sally, A. L. Cresswell; 2 Winona, Geo. A. Nieborger; 3 Lagunitas Nell, W. S. Burnett. Open bitches—1 Plumaria Sally; 2 Creole Belle, Geo. A. Nieborger; 3 Winona; res Miss Frivolity, J. Hervey Jones. Winners bitches—1 Plumaria Sally; res Creole Belle.

Cocker Spaniels (other than black)—Puppy dogs—1 Jewel, J. Hervey Jones. Novice dogs—1 Portland Noble, W. Blackwell; 2 Glenwood Jim, Mrs. M. C. Greenberg. Any solid color other than black—Limit dogs—1 Uncas, Miss E. H. Tompkins (Pine Hill Kennels). Parti colors—Limit dogs—1 Gipsev Chief, A. Wolfen; 2 Portland Noble. Other than black—Open dogs—1 Ch Redlight, A. Wolfen; 2 Uncas; 3 Portland Noble. Winners dogs—1 Ch Redlight; res Uncas. Any solid color except black—Limit bitches—1 Patience, Geo. A. Nieborger. Open bitches—1 Little Maid, J. Hervey Jones. Winners bitches—1 Patience; res Little Maid.

Collies—Puppy dogs—1 Friar Englewood, Mr. and Mrs. W. C. Bogen; 2 Haroun Al Raschid, Bertha M. Hartmann; 3 Balo, D. W. Donnelly. Novice dogs—1 Friar Englewood; 2 Peggy's George, Mrs. Geo. W. Rennie; 3 Bob Son of Holmby, Arthur Letts; res Tallac Kiltie, W. W. Stettheimer; v h c Rhoderick Dhu, Clarence R. Walter; absent Presidio Laddie, Miss Edith Beerman. Limit dogs—Valverdi Perfecto, Wm. Ellery; 2 Peggy's George; 3 Clinker of Holmby, Arthur Letts; res Bob Son of Holmby; v h c Sunshine Alton Rightaway. Open dogs—1 Peggy's George; 2 Clinker of Holmby; 3 Sunshine Aladdin; Miss Jennie H. Hartmann; res Rhoderick Dhu; absent Prince Alert, John J. O'Beirne. Open dogs, American bred—1 Valverdi Perfecto; 2 Friar Englewood; 3 Peggy's George; res Presidio Monarch, Hugh McCracken; v h c Clinker of Holmby. Winners dogs—1 Valverdi Perfecto; res Friar Englewood. Puppy bitches—1 Faith Englewood, Mr. and Mrs. W. C. Bogen; 2 Old Hall Flora, Richard Julian; 3 Girl, Mrs. T. B. Sullivan. Novice bitches—1 Faith Englewood; 2 California Poppy, O. J. Albee; 3 Silkwood Queen, Miss Agnes Sparrow; res La Jota Peggy; v h c Wellesbourne Coquette, Miss Ethel Wiswall; h c Girl. Limit bitches—1 Southport Sphinx, Wm. Ellery; 2 Faith Englewood; 3 Rosalind, Arthur Letts, res Silkwood Queen. Open bitches—1 Southport Sphinx; 2 Faith Englewood; 3 Rosalind; res Sunshine Sweet Sue, Robt. C. Hartmann. Open bitches—American bred—1 Pearl A., O. J. Albee; 2 Faith Englewood; 3 Rosalind; res Wellesbourne Coquette. Winners bitches—1 Southport Sphinx; res Pearl A.

Airedale Terriers—Open dogs—1 Vandal, Geo. A. Pope; 2 Legram's Tommy, Austin P. Byles

Poodles (curly)—Open dogs and bitches—1 Toppy, Mrs. Eugene Murphy.

Dalmatians—Novice dogs and bitches—1 Glenwood Venus, Phil C. Meyer. Limit, open and winners dogs and bitches—1 Glenwood Adonis; 2 Glenwood Venus, Phil C. Meyer.

Bulldogs—Puppy dogs—1 Eminent, M. Levy. Novice dogs—1 Carbine, Mrs. M. Wiener. Limit dogs—1 Endcliffe Baron, Mrs. Phil C. Meyer. Open dogs—1 Ch Ivel Damon, Mrs. Chas. K. Harley; 2 Endcliffe Baron. Winners dogs—1 Ch Ivel Damon; res Endcliffe Baron. Novice bitches—1 Lady Damon, Mrs. Chas. K. Harley; 2 Gresford Rance, Mrs. Dr. J. H. Mules; absent, Ivel Chaddie, Mrs. Chas. K. Harley. Limit, open and winners bitches—1 Girtford Goody, F. J. Rodgers; 2 Lady Damon.

French Bulldogs—Novice and limit dogs—Absent Sport, J. J. Driscoll. Open dogs—Absent, Viviae, Sterling Porstley. Limit bitches—1 Margot de Pantin, Clifford G. Cook; 2 Boulette, Louis Guglielmoni. Open bitches—1 Margot de Pantin. Winners bitches—1

Margot de Pantin; res Boulette.

Bull Terriers—Puppy dogs—1 Edgecote Al, Dr. J. A. Welsh; 2 Silkwood Crisp, W. E. Secombe; 3 Silkwood Hector, C. E. Gilman. Novice dogs—1 Silkwood Dan, Miss Maud Bourn; 2 Edgecote Al, 3 Jock, Henry Jerome, res Edgecote Duke, Mrs. C. H. Ward; v h c Silkwood Hector; v h c Edgecote Figaro, Mrs. E. J. Wolff; v h c Englewood, Mr. and Mrs. W. C. Bogen; h c Ace of Diamonds, Mrs. Lida Shearer. Limit dogs—1 Edgecote Joe, Ed Attridge; 2 Silkwood Dan; 3 Jock; res Dick Curtin, W. J. Tiernan; absent Kirby's Aggressor, T. W. Kirby. Open dogs (not over 30 pounds)—1 Edgecote Duke. Open dogs (over 30 pounds)—1 Edgecote Peer, F. E. Watkins; 2 Edgecote Baron, Ed Attridge; 3 Silkwood Dan; res Jock; v h c Dick Curtin; absent, Kirby's Aggressor. Winners dogs—1 Edgecote Peer; res Edgecote Baron. Puppy bitches—1 Edgecote Dena, Dr. W. H. Watkins. Novice bitches—1 Edgecote Dena; 2 Flexner's Queen Bess, Geo. Flexner. Limit bitches—1 Meg Merrilies II.; 2 Silkwood Kentucky; Geo. Flexner, absent Edgecote Baroness, Ed Attridge. Open bitches (over 30 pounds)—1 Edgewood Jean II., John I. Sparrow; 2 Meg Merrilies; 3 Edgecote Queen Bess, Mrs. F. W. Kelly; res Silkwood Venus, Mr. and Mrs. W. C. Bogen. Winners bitches—1 Edgewood Jean II., res Meg Merrilies II.

Boston Terriers—Puppy dogs—1 Sassy, Mrs. W. H. Deming; 2 Glenwood Snowflake, Phil C. Meyer. Novice dogs—1 Sassy; 2 Glenwood Manly, Phil C. Meyer; 3 Happy Hooligan, G. B. Laughlin; res Thomas Henry Huxley, Julius Gregory; absent Glenwood Crusader, Phil C. Meyer. Limit dogs—1 Endcliffe Nobby, Phil C. Meyer; 2 Glenwood Patten, Phil C. Meyer; 3 Happy Hooligan. Open dogs—1 Ch Bayside Chauncey, G. S. Hollwell; 2 Endcliffe Nobby; 3 Happy Hooligan. Winners dogs—1 Ch Bayside Chauncey; res Endcliffe Nobby. Novice bitches—1 Glenwood Nancy, Phil C. Meyer; absent, Glenwood Estelle, Phil C. Meyer. Limit bitches—1 Glenwood Nancy; 2 Glenwood Lady Bountiful, Phil C. Meyer; 3 Bayside Reserve, G. S. Hollwell. Open bitches—1 Endcliffe Toby, Phil C. Meyer; 2 Endcliffe Vernetta, Phil C. Meyer. Winners bitches—1 Endcliffe Toby; res Glenwood Nancy.

Dachshunde—Puppy dogs and bitches—1 Rhode, Mrs. J. R. Keating. Novice dogs—1 Daxey, Henry Jerome; 2 Waldie, Jacob Muhr. Limit dogs—1 Fritz, Miss Ethel Hagar; 2 Jack, A. Krieps; 3 Daxey; absent, Waldie. Open dogs—1 Fritz; 2 Venlo Immer, Geo. M. Brenhard; 3 Eitel Fritz, Mrs. J. R. Keating; res Daxey; absent, Waldie. Winners dogs—1 Fritz; res Venlo Immer. Novice bitches—1 Isola, Mrs. J. R. Keating. Limit and open bitches—1 Glenwood Fraulein, Phil C. Meyer. Winners bitches—1 Glenwood Fraulein, res Isola.

Irish Terriers—Novice dogs—1 Dan O'Callaghan, Mrs. Edw. Duryea, Jr. Limit dogs—1 Glenwood Mixer, Phil C. Meyer; 2 Dan O'Callaghan. Open dogs—1 Irish, H. M. Papst; 2 Glenwood Mixer; 3 Dan O'Callaghan. Winners dogs—1 Irish; res Glenwood Mixer. Novice bitches—1 Shan Van Vocht, Mrs. J. R. Martin. Open bitches—1 Sweet Nell, H. M. Papst. Winners bitches—1 Sweet Nell; res Shan Van Vocht.

Fox Terriers (smooth coated)—Puppy dogs—1 Tallac Chaparral, Mrs. J. P. Norman; absent, Tiv Krelling, A. Hoffman. Novice dogs—1 Custom Made, J. Gutberlet; 2 Forest King, F. J. Foster; 3 Nigger, Mrs. Chas. W. Clark; absent, Tallac Charlatan, W. W. Stettheimer. Limit dogs—1 Tallac Marksman, W. W. Stettheimer; 2 Tallac Chuck, W. W. Stettheimer. Open dogs—1 Tallac Marksman; 2 Tallac Chuck. Open dogs—American bred—1 Tallac Marksman; 2 Tallac Chuck. Winners dogs—1 Tallac Marksman; res Tallac Chaparral. Puppy bitches—1 Forest Queen, F. J. Foster; absent, Tallac Cookie, W. W. Stettheimer. Novice bitches—1 Tallac Chicita, W. W. Stettheimer; absent Tallac Lakebreeze. Limit bitches—1 Woodlawn Dottie Dimple, F. J. Foster; 2 Tallac Chicita, 3 Endcliffe Pearl, Phil C. Meyer. Open bitches—1 Vina Belle, W. W. Moore; 2 Tallac Chicita; 3 Endcliffe Pearl. Open bitches—American bred—1 Endcliffe Pearl. Winners bitches—1 Vina Belle; res Forest Queen.

Fox Terriers (wire haired)—Novice dogs—1 Jack III, Chas. R. Duval; 2 Jerry, Chas. N. Champion; absent Humberstone Regent, I. C. Ackerman. Limit dogs—1 Tallac Private, W. W. Stettheimer; 2 Jerry. Open dogs—1 Ch Humberstone Mearns, I. C. Ackerman; 2 Tallac Private; 3 Jerry. Open dogs—American bred—1 Tallac Private; 2 Jerry. Winners dogs—1 Ch Humberstone Mearns; res Tallac Private. Novice bitches—1 Tallac Zarina, W. W. Stettheimer; absent Humberstone Briar, I. C. Ackerman. Limit bitches—1 Tallac Oanna, W. W. Stettheimer; 2 Humberstone Worry, I. C. Ackerman; 3 Humberstone Actress, Phil C. Meyer. Open bitches—1 Tallac Oanna; 2 Humberstone Worry; 3 Humberstone Actress, Phil C. Meyer. Open bitches, American bred—1 Tallac Oanna; 2 Humberstone Barkby Bess, I. C. Ackerman; 3 Humberstone Actress; absent Humberstone Briar. Winners bitches—1 Tallac Oanna; res Humberstone Worry.

Welsh Terriers—Limit, open and winners dogs and bitches—1 Selwonk Vagrant, 2 Glenwood Gladys, Phil C. Meyer.

Yorkshire Terriers—Puppy dogs and bitches—1 Peggy, Mrs. F. S. Palmer; 2 Weenie, Mrs. Webster Jones. Novice dogs and bitches—1 Brownie, Mrs. F. S. Palmer; 2 Nellie, J. Wood. Open dogs and bitches—1 Royal Jem, W. P. Feeney; 2 Brownie. Winners dogs and bitches—1 Royal Jem; res Peggy.

English Toy Spaniels (any color)—Limit and open dogs and bitches—1 Humberstone Tribby, I. C. Ackerman.

Skye Terriers—Limit, open and winners dogs and bitches—1 Glenwood Waddles, Phil C. Meyer.

Pomeranians—Novice dogs and bitches—1 Papinta, Mrs. M. A. Tobin; 2 Queen, Henry Feige. Limit dogs and bitches—1 Papinta; 2 Atom of Charlecombe, Mrs. N. J. Stewart. Open and winners dogs and bitches—1 Papinta; 2 Beauty, Janette Bernstein.

Italian Greyhounds—Limit dogs and bitches—1 Dude, S. A. Cummings. Open dogs and bitches—1 Ch Duke, S. A. Cummings; absent Baby, S. A. Com-

Empire Gun Club—The annual merchandise shoot of the Empires came off as usual on the 9th and 10th insts., there being an average attendance of seventy-five shooters altogether for both days—63 Saturday, 78 Sunday.

Six events were shot on both days. The main feature on Saturday was the fifth event, merchandise prizes, 20 targets entrance \$1.25, class shooting, 12 classes, 63 entries. The high score was 19 breaks, Otto Feudner, A. J. Webb, "Wilson" and E. Klevesahl tied, on the shoot out at ten targets, Feudner and Webb were high with 8 breaks each. There were 48 prizes distributed, winners in each class had choice of prizes "in the order of score." Otto Feudner and Edgar L. Forster were high guns for the day, scoring 98 breaks out of a total of 105 targets.

On Sunday the principal event was the fourth at 20 targets for merchandise prizes, high guns, unlimited re-entry, \$1.25 for first and 75 cents for each subsequent entry, highest score to count, 72 entries. At 22 yards Webb's score of 19 breaks was high for the event. In the fifth race at 15 targets, E. L. Schultz and C. C. Nauman scored straight from the 22 yard mark. Schultz won in shooting off and took first prize. The fifth and sixth events were also re-entry races, best scores to count. In the sixth race Frank L. Carter and M. A. Clark of Vallejo tied with 15 straight each. Carter won on the shoot-off.

The high average cup donated by Frank H. Mayer, for the two days was won by Otto Feudner, who scored 98 out of 105 and 90 out of 100, missing but 17 out of 205. Edgar L. Forster was second high average, with 18 birds lost, 98 out of 195 and 89 out of 100. Ed. Schultz lost 18 birds out of the 205—97-105 and 11-100. On Sunday Mrs. J. C. Phelan, who handles a gun gracefully and skillfully, made a score of 11 out of 20 in the fifth event.

Frank L. Carter gave an interesting exhibition with a .22 rifle, shooting at small iron washers and other difficult objects to hit. Carter is a wonder with the small bore rifle.

The out of town contingent was well represented. J. Ed. Vaughan, C. D. Plank, D. W. King Jr., W. S. Wattles, W. H. Seaver, J. B. McCutchan, T. L. Lewis and E. Holling were among the trade representatives present at the shoot. The general results follow in the summary.

Salmon Season Closed.

Sunday, the last day of the open season for the taking of salmon in the waters of this state until October 16, was duly observed by a large contingent of salt water angling enthusiasts who were out early and late in launches, yawls, skiffs and a small but choice variety of nondescript home-made mechanical craft. The total take of the day is summed up by "Parson" Jackson as between twenty-five and thirty fine conditioned fish, most of them of good size. The largest salmon, a thirty-six pounder, was taken by Attinger brothers. This catch ties the record for weight, held by Jake Christianson, up to Sunday. While the salmon were liberal in their attention to the trolling baits of a number of fishermen, singular to say, the veteran experts Al Wilson, J. Christianson and "Parson" Jackson were ignored in toto by the quinnat migrants in Raccoon straits—another evidence of the perversity of the fish tribe, a quality that keeps the anglers guessing all the time.

The salmon landed were all hooked on the Tiburon side from Belvedere point to Bluff point, but one fish was observed to be taken in mid-channel and that was captured by Mr. Bouton, a member of the Pacific Striped Bass Club.

The number of fish taken by anglers during the last three weeks is computed to have been about 200. Now that the possibilities of good sport are assured in the bay waters, fishing for the royal quinnat salmon, it is believed that the game will have many enthusiastic followers during the next open season for salmon—that is, when the fish are running, for it is not anticipated by experienced observers that there will be many fish running after October 15.

A matter of much complaint is the carelessness of the power launches in fouling anglers' tackle. A case in point is that of the "hospital" launch, which craft, it is claimed, has deliberately, on more than one occasion, fouled lines and broken away the tackle. There is no reason for this and if the identity of the persons responsible can be ascertained an angler has redress for damages.

TRADE NOTES.

Averages Reported.

Columbia, Pa., August 19th, Andy Somers of Delta, Pa., first amateur and first general average, 136 out of 150, shooting "DuPont." L. J. Squier, second general average, 129 out of 150, shooting "DuPont." J. A. Fleckenstein of Columbia, Pa., third amateur average, 111 out of 150, shooting "New Schultze." Somerville, Conn., August 22d, H. C. Barstow of Rockville, Conn., first general average, 182 out of 200, shooting "Infallible." L. H. Bradley of Bridgeport, Conn., shooting "New E. C." (Improved), and J. A. R. Elliott, shooting "New Schultze," tied for second average, 181 out of 200. H. C. Finch of Thomasville, Conn., third general average, 180 out of 200, shooting "Infallible."

Guntersville, Ala., August 22d, Walter Huff, first general average, 192 out of 200, shooting "DuPont." C. G. Spencer, second general average, 190 out of 200, shooting "DuPont." H. N. Hall, third general average, 189 out of 200, shooting "DuPont." Sam

Henry of Guntersville, Ala., first amateur average, 171 out of 200, shooting "DuPont." L. S. Long of Guntersville, second amateur average, 169 out of 200, shooting "DuPont." J. Thomason of Guntersville, third amateur average, 162 out of 200, shooting "DuPont."

Bluefield, W. Va., August 22d, E. Bond of Bluefield, W. Va., first general average, 98 out of 100, shooting "Infallible." T. W. Chambers of Eckman, W. Va., tied for second general average with C. O. Le Compte, 91 out of 100, shooting "Infallible." W. W. Wood of Elkhorn, W. Va., third general average, 87 out of 100, shooting "Infallible." E. Bond won the DuPont Trophy for high amateur average. In the team races for the Laith & Rand Trophy, the Bluefield Gun Club won the cup, every one of the five men shooting "Infallible."

Spirit Lake, Ia., August 22d to 25th, Fred Gilbert, first general average, 771 out of 800, shooting "DuPont." W. H. Heer, second general average, 766 out of 800, shooting "New E. C." (Improved). J. L. D. Morrison, third general average, 762 out of 800, shooting "New Schultze." R. Huntley of Sioux City, Ia., first amateur average, 760 out of 800, shooting "DuPont." R. R. Barber of Paulina, Ia., second amateur average, 754 out of 800, shooting "DuPont." H. G. Taylor of Meekling, S. D., and Richard Merrill of Milwaukee, Wis., tied for third amateur average, 728 out of 800, shooting "New E. C." (Improved).

A Book For Sportsmen.

The sixteenth edition of the "Hank's Book for Sportsmen," published by the Peters Cartridge Co., and the King Powder Co., is now ready for distribution. This booklet includes not only the revised game laws of the several states and territories of the United States and Canada, but also a description of the goods manufactured by the companies named. True Shooting Rules and other information of interest to sportsmen. In addition to this booklet the Peters Cartridge Co. have published the game laws of the several states in circular form for convenient reference and will be pleased to forward same to any address upon request.

Peters' Points.

At the tournament given by the New London, Ohio, Gun Club, August 31st, Peters shells were very much in evidence. They were used by the majority of the shooters, including Mr. D. D. Grosz, winner of the first average, Mr. R. J. Smith, second average, Mr. E. K. Stilson, third average.

At Lancaster, Pa., September 2nd, Mr. Neaf Apgar attended the shoot of the Bob White Gun Club, winning high average with Peters Factory Loaded Shells.

A \$450 Winchester Rifle.

The Winchester Repeating Arms Co. has just turned out for Mr. A. A. Busch of St. Louis one of the handsomest weapons ever seen in St. Louis. It was made to the wealthy brewer's special order and cost \$450. The rifle is of the 1886 model, 33, calibre, take down, with half octagon barrel and half magazine. The stock is of special imported walnut and most elegantly carved. On the sides of the receiver the engraved background is of grape leaf design and on one side a gold inlaid moose and cow stand forth with true fidelity to detail. On the other side is shown a grizzly bear and a mountain goat, both of gold, inlaid. On the cap of the pistol grip the well-known brewery trade mark in solid gold is placed, while the monogram A. A. B. in gold, is neatly but prominently shown. Delicate lines of gold and platinum inlaid trace the entire barrel's length and are also visible on the sides of the receiver. The forearm is elaborately carved, and the forearm tie inlaid with gold scroll work. Mr. Busch makes an annual hunting trip in the old country and on previous journeys his handsome Winchester rifle and shot guns have caused so much admiration, both for the finish and fine shooting qualities, that many have been left with friends by the generous St. Louisian. This new weapon is designed for his personal use and permanent possession, and Mr. Busch says under no circumstances will he ever part with it, as he considers it the handsomest rifle in the world.

Sprains, Sore Throat, etc., it is invaluable.
Every bottle of Caustic Balsam sold is
warranted to give satisfaction. Price

INDIGESTION OF HORSES.

Indigestion is one of the common diseases met with in the horse. We meet it in two different forms, acute indigestion, which is the result of sudden and more or less complete cessation of the function of digestion, the result, generally of the animal's getting loose and eating inordinately of grain; or else it is the result of gross violation of some of the foregoing principles.

This disease resembles in its symptoms, colic, the treatment being almost exactly the same, and we will consider it under that head. Suffice it to say here, that prevention is much easier than cure.

The other form is what is known as chronic indigestion, and is a derangement to a greater or less extent of the function of indigestion. In other words, the digestive process is imperfectly carried on. It may be so slight as to be hardly noticeable, or it may be so severe as to make the animal nearly useless. The disease is caused by violating more or less continuously for some time some or all of the foregoing principles. The disease is very common.

The symptoms—The first symptoms noticed is general unthriftiness. The animal is not "doing well." In order to improve its appearance, more grain is fed, but it does not respond. It loses its spirit, does not drive with old-time freeness, will not stand the hard work, tire and sweats easily. The animal generally has a ravenous appetite, although occasionally it will be dainty, but as a general thing it will eat anything within reach, frequently showing a desire for dirt, licks stone walls, gnaws the woodwork of the stall, and eats the bedding. There are apt to be frequent attacks of colic, and also more or less bloating after eating. The hair becomes harsh, unduly long, and loses its luster. The skin also becomes harsh, loses its mellowness, and is tightly drawn to the tissues underneath; in other words, the animal is "hide bound." While all these symptoms may be present in very bad cases, as a general thing only a portion of them will be noticeable in any single individual.

The treatment—First obey the proper principles of feeding; feed a balanced ration; make all changes gradually and do not overfeed. Medicinally we give those drugs which will stimulate the digestive organs to activity. The so-called condition powders are intended for this purpose. A very good mixture is the following: Gentian, $\frac{1}{2}$ pound; bi-carbonate of soda, $\frac{1}{2}$ pound; nuxvomica, $\frac{1}{4}$ pound; arsenic, 1 drachm. Mix thoroughly. Dose, a tablespoon level full in moistened grain, morning and evening. At noon give the following mixture: Sulphate of iron, $\frac{1}{4}$ pound; saltpeter, $\frac{1}{4}$ pound. Mixed. Dose, a tablespoonful in moistened grain.

Continue the use of the medicine for two or three weeks, then withhold for a week, and then give again. Continue in this manner until the animal recovers. In some cases treatment will need to be continued for six months or even longer.

These mixtures are available to give to horses in the spring, a few weeks before the hard work commences, especially where the animals have been wintered upon a large amount of roughage, as this line of feeding is very apt to cause more or less indigestion.—George A. Waltherman.

The skins from which wool is pulled have an important commercial value and it is the aim of pullers, of course, to remove the wool from the pelts by such process as will cause the least impairment possible to the skins. Sheep skins were never so largely used as they are today nor were they ever put to such varied uses. They are utilized for purposes which render it necessary that they shall be handled so that the surface of the skin shall not be rotted. At present the wool is removed from the skin by what is called the depilatory process which does not impair the quality of the skin. Years ago the method of sweating the skin was practiced, which practically rotted the wool out. The pelts were hung up in vaults in which the steaming process was introduced. The outer surface of the skin, in which the wool fibres were imbedded, was thus rotted, rendering the removal of the wool quite easy. This was succeeded by the lime process—the application of a mixture of lime and arsenic. The mixture was applied to the outer surface of the pelt with a brush. This was detrimental to the wool and has in turn been superseded by the depilatory process in which a sulphide solution is used.

GLANDERS INCURABLE.

Glanders occurs generally over the United States. It became very prevalent during the civil war, and is most common among ranch horses to-day in the West. It occurs in both an acute and chronic form, the former ending with death in a few weeks, the latter covering months and even years.

Animals may appear healthy yet be suffering from glanders. In this disease the lungs are the principal seat of the malady, and they may be affected long before any outward sign of the disease. Later the glands of the jaw enlarge and the membrane of the nostrils becomes affected and a discharge is commonly thrown off. All cases of chronic discharge are suspicious. Small ulcers or boils will appear under or on the skin also. This form is known as farcy. These ulcers often develop into bad sores on the body and hind limbs.

The disease is spread by nasal secretions on the woodwork of the stables, on posts, water troughs, etc. When on wood will dry and as dust be taken into the lungs and the disease generated. Humans become inoculated through wounds on hands generally. The germs live three to four months.

This disease is incurable and should not be treated. It is commonly subject to state supervision, and all cases are promptly killed, serviceable horses being made good by financial recompense from the state. All suspicious cases should be reported to the state veterinarian.—Dr. Paul Fisher, Ohio State Veterinarian.

Kerry cattle take their name from Kerry county, in Munster, Ireland. They are known as the "poor man's breed." They fatten easily, and the beef is of fine quality. The cows are handsome, small and very gentle. They always become pets, where they are properly used. They are large milkers, when compared with the amount of food they use. The cows average only about 400 pounds in weight.

Dairy cows are naturally fond of company, and are averse to being moved from place to place. They do better when they remain in one place for a long time. This applies whether they be fresh or dry.

Sponges. S. Adderley, 307 Market St.

FOR SALE.

BROOD MARE, SIRE BY BLACK RALPH 2:20, dam Black Baby by Black Bird 2:22; second dam by Nigger Baby. This mare is a beautiful black, weighing about 1000 lbs. She is very spirited, stylish and of unusually good disposition. Was never trained and, in fact, little used, but has done 2:40 hitched to a heavy cart and driven by an amateur. She is now in foal to Lynwood W.

Also, her Weanling Filly (4 months) by Lynwood W. This filly is of remarkable muscular build and very pretty—a bright bay with black points. Every California horseman knows Lynwood W's colts are good. A three-year-old of his did the last quarter of a mile heat in 31½ seconds on the Santa Rosa track September 9th, and this after only three months training.

The price for mare and filly is \$450, or will sell separately. Address the owner.

P. O. BOX 461, Santa Rosa, Cal.

THREE YEARS OLD, GOOD SIZE, HANDSOME blood bay in color; good conformation and a first-class individual in every respect. With little work as a two-year-old he easily showed a 2:40 gait. Is perfectly sound and good gaited. Sired by Iran Alto 2:12½, dam Alma Wilkswood by Alcantara. For price and particulars address BREEDER AND SPORTSMAN, 36 Geary Street, San Francisco, Cal.

CERTIFIED MILK.

Dairymen have not rushed into the certified milk business to the extent predicted a few years ago. City health boards do not care to place their seal of approval upon milk that does not come up to the required standard and farmers are slow to provide the expensive equipment necessary to produce pure milk.

Besides the first cost the subsequent attention also costs a great deal of time and money. Such scrupulous care and attention to all the many details is required that the production of a really high grade article is placed beyond the possibility of very keen competition. Dairymen to receive the stamp of approval vouches for by the certificate must prove to the satisfaction of the health department their ability to produce milk wholly free from germs, and containing the least possible bacteria content. It must meet all the state law requirements as to butter fat and other solids, and to be so pure as to keep for days when held at a reasonable temperature without showing the slightest acid indication. To assure this it requires first thoroughly healthy cows and a sanitary stable in which to keep them; second, the best possible clean care; third, pure sweet, clean feed and water together with such other conditions and facilities necessary to deliver the product to the consumer in the form of an absolutely pure product.

To meet all these requirements is beyond the technical knowledge as well as the financial ability of the average dairyman.

The care of the cows under such conditions requires constant vigilance in a thousand details. The cows must be groomed daily and their udders wiped carefully with a damp cloth before milking. The milkers must sterilize their hands and wear clean clothes, preference being given to white duck suits while milking. As each cow is milked the milk must be immediately carried to a cement dairy shut off from the stable by two spring doors. In some dairies the milk is poured into a leader that passes through the wall. In this way the milkers do not enter the dairy proper. The milk passes from the interior receptacle into the dairy over a cooler where the temperature is reduced to about 45 degrees and at once run into sterilized bottles and secured by a sterilized air tight cap. Until loaded into the wagons for delivery in the city the bottles are kept in refrigerators and during delivery, if weather conditions require it, the bottles are packed in ice. Milk prepared in this way will keep sweet from twenty-four to forty-eight hours longer than ordinary milk kept at the same temperature.

No one is willing to invest from five to ten thousand dollars in a stable and dairy of this kind unless he has some assurance of getting a good price for the product. But there are customers in every city who are willing to pay an extra price for a superior article. Quality is the valuable feature which is by no means confined to the extra butter fat content. Cleanliness is of much more importance.

Dirt means disease and to avoid the possibility of contamination, customers who are particular are perfectly willing to pay extra for cleanliness but they are not numerous. It requires patient persistent effort to find them and they slip away easily.

A hog at Beebe, Arkansas, had always fed under the cars loaded with grain, but last summer, while eating as usual, the train started and caught him, cutting off a leg. Several boys amputated it, and when healed, got a piece of rubber hose, sewed the bottom end and filled it with sawdust. They then attached the hose to the stump, and the hog can now be seen running around the cars at Beebe, lively as ever. This story is worthy of record for two reasons. First, as showing boys doing a good Samaritan act, when their usual role is that of the cruel Philistine. Secondly, their rude but ingenious surgery, which indicates that there is the making of a good doctor in that crowd.

It is being demonstrated that draft horse blood cannot be successfully crossed with any other to produce an active horse. In fact, it is not so very satisfactory to cross any of the distinct breeds. To breed in straight lines brings the most satisfactory results. Mares mated with sires of their own kind produce the best results.

"SAVE-THE-HORSE" SPAVIN CURE

Registered Trade Mark

It is well to know that in many cases certain conditions which cause lameness in the same location in different horses present varied and different phases.

It required over ten years' research into the nature of these complex conditions and experimenting to perfect and combine together the properties which form "Save-the-Horse" Spavin Cure, a compound of ingredients never before combined.

It is by the concentration and intensity of its penetrating strength by which the properties of "Save-the-Horse" sustain a physiological action and irresistible power to dissolve the deposits, stimulate circulation, absorb and carry off the exudate or secretion and restore an unsound limb to soundness.

"Save-the-Horse" is no untried or uncertain remedy; its marvelous power and possibilities have been proven absolutely and positively. No man will fire, blister or treat his horse with anything else if he will investigate and read our booklet and the letters from bankers, trainers and horse men on every kind of case. Send for them; also booklet and copy of guarantee.

L. O. BALDWIN, Trainer and Driver,
18 Grant Avenue,

GLENS FALLS, N. Y., Jan. 3, 1905.

You have not asked for any testimonial from me but I feel that it is only fair to tell you what your great remedy has done for me. My son had and still has a very fine mare by Baron Wilkes, and her dam was Hattie Ide by Gilly. He thought her unbroken and started to lead her home, and had not gone half a mile when she went lame. She had two spavins; he called a veterinary. She got better of her lameness and I went to breaking her to drive, and she went lame on the other side. We stopped and had her fired and blistered in both spavins. Rested her six months and commenced to drive her again and she went lame. I had that leg fired again and gave her the usual rest, and she went lame as soon as we began to use her. I saw your advertisement and wrote for a bottle and used it as the directions said. We commenced to drive her and she stood the test. We trained her; worked her twice a week, mile and repeat, and we are still driving her, and she goes as sound as any horse can. If any one will use it according to directions it will cure, and no mistake.

L. O. BALDWIN.

POSITIVELY AND PERMANENTLY CURES
Bone and Bog Spavin, Ringbone (except Low Ringbone), Curb, Thoroughpin, Splint, Capped Hock, Shoe Blisters, Windpuff, Weak and Sprained Tendons and all Lameness.

\$5.00 per bottle. Written guarantee—as binding to protect you as the best legal talent could make it. Send for a copy and booklet.

At Druggists and Dealers or Express paid.

"SAVE-THE-HORSE"
Is indicated for any enlargement caused by an injury which leaves a thickened condition of the tissues or skin.

Horse can be worked with either skin or ankle boots, as no harm can possibly come by either destruction of hair or scalding of the limb. "Save-the-Horse" can be applied in all conditions and extremes of weather.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Cerise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

ABSOLUTELY CURES
QUINN'S OINTMENT
SPRAINS
WINDPUFFS
REMOVES
SWELLINGS

Take It In Time

If you have the remedy on hand, and are ready to act promptly, you will find that there is nothing in the form of Sprains, Splints, Curbs, Windpuffs and Bruises which will not yield promptly and permanently to

Quinn's Ointment

It has saved thousands of good horses from the peddler's cart and the broken-down horse market. Mr. C. B. Dickens, of Minneapolis, Minn., who conducts one of the largest livery stables in the Northwest, writes as follows: 'I have been using Quinn's Ointment for some time and with the greatest success. I take pleasure in recommending it to my friends. No horseman should be without it in his stable. For curbs, splints, sprains, windpuffs and all bruises it has no equal.' Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars, testimonials, etc. Sent free for the asking.

W. B. Eddy & Co., Whitehall, N. Y.

Wilcoxson's Perfection Liniment

The Greatest Remedy Ever Known For Bad Legs.

It penetrates to the seat of trouble at once. It allays fever from any cause. A Safe, Speedy and Positive Cure for Splints, Curbs, Thoroughpins, Sweeney, Capped Hocks, Wind Puffs and all Lameness from Sprains, Kingbone and other bony enlargements. On broken-down, weak and injured tendons, ruptured ligaments its power is unerring. Permanently cures all broken down conditions of the Ankles, Hocks, Tendons or Ligaments without loss of hair or an hour's let-up on the horse.

PRICE \$2 PER BOTTLE. Express charges prepaid on receipt of price. Every bottle guaranteed to give satisfaction or money refunded.

GRAND AMERICAN

Held at Indianapolis, June 27-30, 1905. was won by Mr. Jas. T. Atkinson of Newcastle, Pa., score 99 out of 100 from the 18 yard mark, using

PETERS FACTORY LOADED SHELLS

This was the Only Event During the Entire Grand American which was won from Behind the 16-yard Line. Many other Notable Scores were made with Peters Shells, among them the following:
 1st on Practice Day, F. M. See (tie), 99 out of 100. 1st on First Day, L. H. Reid (tie), 99 out of 100. 2d in Preliminary, Wm Veach (tie), 97 out of 100. 3d in Grand American, M. Arle (tie), 97 out of 100.
 In the Consolation Handicap, 2 scores of 98, 5 of 97, 4 of 96 and 25 others above 90 were made with Peters Shells.

All of which merely goes to prove that Peters Shells are WINNERS.

Events 3, 6, 12 and 15 are open to Los Angeles, San Bernardino, Riverside and Santa Ana Driving Club Matinee Horses only. Horses eligible must be owned by a member of the club thirty days prior to date of race and must be driven by owner or a member of the club they represent.

CONDITIONS:

Six to enter and four to start.
Money divided 50 25 15 and 10 per cent.
A horse distancing the field or any part thereof is entitled to first money only.
Entries close Tuesday, October 24th, when horse must be named and eligible to the class in which he is named. Records made on or after October 1st no bar.
The rules of the National Trotting Association, of which the Associations are members, shall govern unless otherwise provided.
Entrance Fee, five per cent of purse, due and payable before the race starts, and five per cent additional from money winners, except in cup races no entrance fee is charged.
Positions will be drawn for by the drivers before the start of the first heat. In the succeeding heats horses will start as they finished in the previous one.
Address all communications to the Secretary.

All events are three in five, except cup races which are two in three.
Entries not declared out at 5 o'clock p. m. on the day preceding the race shall be required to start. Declarations must be made in writing and made at the office of the Secretary.
Colors must be named by 5 o'clock p. m. on the day preceding the race, and must be worn upon the track. Colors will be registered in the order in which they are received. When colors are not named or conflict, drivers will be required to wear the colors furnished by the Association.
Horses barred in Trotting events, but will be permitted in Pacing events with the exception of cup events.
Any race that may be started and unfinished on the last day of the meeting may be declared ended and money divided or cup awarded according to the rank of the horses in the summary.

San Francisco, Saturday, September 23, 1905.

THIS IS A GREAT YEAR for three-year-old trotters and the present outlook is that the record of 2:08½, held by Chimes' daughter Fantasy since she trotted in that time twelve years ago, will be lowered for the first time. The first three-year-old to trot in standard time was Lady Stout, a daughter of Mambrino Patchen. She was driven a mile by Dr. Herr at Lexington, October 1st, 1874, in 2:29. Three years later Elaine, daughter of Messenger Duroc and Green Mountain Maid, lowered this record to 2:28, and two years after that Steinway trotted to a race record of 2:25½ and was given the title of champion trotter of his age. He held the title but a few months, as Jewett by Allie West took a record of 2:23 in October the same year and wore the crown until 1881, when the grey gelding Phil Thompson by Red Wilkes trotted a mile in 2:21 at Chicago. Hinda Rose, daughter of Electioneer and Beautiful Bells, trotted in 2:20 at Hartford, October 3d, 1883, and a week later set the three-year-old mark a half second faster by a mile in 2:19½ at Lexington. Hinda Rose was the champion three-year-old for two years, then Patron by Pancoast equalled her time in 1885. Again two years elapsed before a three-year-old trotted as fast and then the crown came to California and was worn by Sable Wilkes, who made his mile in 2:18 October 9th, 1887, at Bay District track. Another two years elapsed, but in 1889 this record was broken seven times. Axtell was the first to do the trick by trotting a mile in 2:15½ at Minneapolis, July 2d, which mark he reduced to 2:14 flat at Chicago, August 23d. The Palo Alto mare Sunol by Electioneer knocked a quarter of a second off this record at Fresno October 4th, but again the crown went back to Axtell when the son of William L. trotted his memorable mile in 2:12 at Terre Haute, October 11th, and was sold for \$105,000 soon after. At San Francisco November 9th however, Sunol had another try at the record and again was she the champion with a mile in 2:10½ to her credit. Three days later Arion, who had trotted a mile in 2:10¼ as a two-year-old, took a flyer at the three-year-old record and equalled Sunol's time. The year ended with the championship at Palo Alto won by two of the farm's products. Then Arion was sold to J. Malcolm Forbes of Boston for \$125,000, the highest price ever paid for a trotting horse. All the above records were made to the old fashioned high wheel sulky. In 1892 the pneumatic tired bike made its appearance and on October 17th, 1893, Fantasy started in a field of ten three-year-olds for a \$5000 purse at Nashville, Tenn. She won the first heat in 2:16½, then distance was waived and she trotted the second mile in 2:08¾, which is yet the fastest mile ever trotted by a three-year-old.

THE SOUTHERN CIRCUIT, comprising the tracks at San Bernardino, Santa Ana and Los Angeles, announces its program in our advertising pages this week and a perusal of the announcement will show that the purses are most liberal. The San Bernardino meeting opens Thursday, November 9th, and continues three days, the Santa Ana meeting following November 15th and continuing the same number of days. The programs at these two places are almost identical for class horses. The purses are \$600 each for 2:12, 2:30, 2:20 and 2:09 pacers, and for 2:14, 2:20 and 2:09 trotters. At Los Angeles the meeting will open Tuesday, November 21st, and last through the week. \$1000 purses are the rule here. For the trotters are the 2:11, 2:17, 2:30, 2:14, 2:24 and 2:00 classes, while the pacers are given the 2:09, 2:20, 2:12, 2:27 and free-for-all classes. There will be several cups offered for matinee races at all these meetings. The Southern California Circuit deserves the
